

"Two light spots...really an intermediate tempering body!"

"This Su Lang is clumsy, he can break through to the Intermediate Tempering Body long ago."

"Fuck, then why did he come to receive the primary body tempering allowance at this time?"

"Who didn't break through the primary body tempering and came to receive the allowance happily, how can he bear it? Fake it!"

"But the volatility that he radiated before was indeed a breakthrough volatility. I have seen this volatility a lot, so I can't mistake it."

"That is to say, he really just broke through to Intermediate Body Tempering! Yang Shi is planted!?"

"Yes, Yang Shi was really unlucky enough to encounter such a thing."

"But if Yang Shi didn't taunt others, there would be nothing wrong."

"Haha, that said."

"....."

Everyone talked in disbelief, all eyes fell on Yang Shi.

"Reserve martial artist, are you going to break your promise and get fat?"

Su Lang smiled coldly at Yang Shi, "Please give me the bet of 50 gold coins, and then fulfill the second bet!"

"Grass! What if you break through the intermediate tempering body?"

"I didn't break through to the Intermediate Body Tempering at the age of 20, that is, a common grade!"

"In front of me, Yang Shi, you Su Lang is still a trash, hum! No need to look for it!"

With heartache and shame, Yang Shi took out a spiritual stone from his pocket and slammed it on Su Lang's chest, then left without looking back.

As for taking off and running three laps around the Martial Arts Alliance Building, and yelling 'I'm a genius' while running, he has no face to do it and dare not do it.

Otherwise, not only his own reputation will be ruined, but the entire Yang family will be laughed at.

At that time, his Yang Shi's end was terrible.

Therefore, he would rather pay Su Lang a low-grade spirit stone worth 100 gold coins than fulfill the second gambling agreement.

"For the sake of this spiritual stone, let me spare you for the time being and don't let me run into you again."

Su Lang looked at the leaving figure of Yang Shi and sneered dismissively.

Immediately afterwards, Su Lang turned to look at the woman with heavy makeup in the work window: "Hey, old witch, give me the allowance and ID card for the intermediate body tempering!"

This time the incident was caused by this woman with heavy makeup. Although Su Lang earned 100 gold coins, she was still very upset.

"Humph!"

The woman with heavy makeup threw out 20 gold coins and Su Lang's identity card angrily, "It's just a mortal qualification. If you provoke Young Master Yang, you're dead, get out of the way and don't stand in the back!"

"Tsk tsk, this attitude of handling things will sooner or later die!"

Su Lang sneered, packed up the spirit stones, gold coins and identity cards, and quickly left the hall of the Warrior Alliance.

"It seems that Yang Shi has some identity."

Walking on the road, Su Lang turned the spirit stone in his hand.

Lingshi is a kind of peculiar energy spar, it is a treasure of heaven and earth produced after the aura is revived, and an important resource for martial artists to practice.

In addition, the spirit stone can be cut and ground at will, and later cut into standard size as high-end currency.

Under normal circumstances, the spirit stones are circulated among the warriors and the powerhouses of higher realms.

Lingshi is also divided into quality grades, which are low-grade, medium-grade, top-grade, and top-grade.

The lower-grade spirit stone is worth 100 gold coins, and the exchange ratio between each of the upper grades is 100 times.

This spirit stone in Su Lang's hand is a low-grade spirit stone.

"When I exchange this half of the spirit stone into gold coins, I will have 161 gold coins, which is enough to upgrade the one-key training function to level 2, hahaha!"

When he thought that his cultivation speed would be twice as fast as a genius with no lack of aptitude, Su Lang was so excited that he wanted to roar to the sky.

suddenly.

"Host, the system can provide free currency storage, exchange, and withdrawal functions."

"What!?"

Su Lang showed surprise instantly.

In this way, he saves a lot of trouble and saves a lot of handling fees.

"The system, immediately exchange this spiritual stone into gold coins!"

Su Lang thought, and the spirit stone in his hand disappeared.

There is an extra money symbol in the upper left corner of the mysterious black space, marked with 100 at the back.

"Ding! The exchange is successful, may I deposit the remaining gold coins in the system."

"Deposit!"

Su Lang nodded, the gold coin on his body immediately disappeared, and the number behind the money symbol became 161.
