

One Planet 182

Chapter 182: Great Harvest! The shock of the association! The unification of the Xia Kingdom begins!

In the end, he finished this quest!

When they came to the lobby, this time it was not just any staff, a middle-aged supervisor personally received it.

After knowing what Wang Yao and Yang Fei did, the middle-aged supervisor apologized repeatedly and gave everyone one million federal dollars as an apology.

Wang Yao was the main messenger but in this kind of thing, the Planetary Association naturally also had the responsibility of lax supervision.

After waiting for the tall young man and the lean man to leave, Jiang Fan took out a large pile of cards he took from the hundreds of Cassius and said, "Does your association buy these cards!"

"Sure."

The middle-aged supervisor smiled.

A few staff members were immediately called in.

Soon, the results were out.

The cards were mainly circulated as works of art.

There were high and low prices.

The thousands of cards were worth a total of.....

"One hundred and sixty million."

The middle-aged executive smiled and said, "Do you want the transaction in federal currency?"

"Just credit it directly to my account."

Jiang Fan said.

Subsequently, he took out the Supreme Amplification Card and said, "You should be able to seal the card here, right?"

The middle-aged supervisor glanced at the supreme amplification card and said, "Of course, our association has a powerful planet master who can quickly help customers seal most of the items."

"What is the sealing fee?"

Jiang Fan asked.

"Haha, this time, because of our negligence, you have lost a lot. This time, the cost of the seal will be waived. What do you think, Mr. Jiang?"

The middle-aged supervisor had a big smile on his face.

"Thanks a lot, then."

Jiang Fan naturally would not refuse.

“Please go to the lounge and wait a moment, Mr. Jiang. It will be finished soon.”

After waiting for Jiang Fan to go away, the middle-aged supervisor immediately sent a man with the Supreme Amplification Card to a Level 5 Planet Master.

After that, looking at the direction where Jiang Fan was leaving, he muttered to himself: “This quest is almost completed by this person alone. For such a genius, it is estimated that this time the entrance examination will definitely be famous!”

Jiang Fan’s sealing fee was waived.

It was not just an apology.

There was also a hint that there was a good intention to win!

On the Twenty-eighth floor, the Supreme Amplification Card was sent in a spacious room.

The owner of the room was a fat old man.

He was a little scruffy in appearance but he was actually a level 5 planet master!

It takes at least a level 5 planet master to seal an item.

“A card!”

Seeing the golden amplification card, the fat old man looked relaxed and said, “The card is good to seal, it will be finished soon.”

After that, he picked up this golden card.

A few moments later, a hint of surprise appeared.

“Surprisingly, it’s an amplification card, it’s been a long time since I’ve seen it.”

The fat old man was immediately interested.

He picked up the amplification card and looked at it carefully.

“A tenfold amplification card? If this is put outside, I’m afraid that those old guys will also be moved.”

The fat old man muttered but he was just curious because he had lived for so many years and had seen a lot of things but the supreme amplification cards were rare and value was not very high.

There were still more powerful amplification items than this, especially for the first-level planet master.

A tenfold increase was the highest.

If it was even higher, the environment and ecosystem of the planet would be easily destroyed!

“This should be sent by someone who is preparing to take the entrance examination this year.”

The fat old man thought about it.

He immediately moved quickly and started sealing.

Inside the lounge, Jiang Fan did not have to wait long.

The middle-aged supervisor then personally delivered the sealed supreme amplification card!

Jiang Fan took it and went straight back to his own room in the relief area and entered the awakening space.

He threw the sealed Supreme Amplification Card in it!

As the supreme amplification card was on the Blue Star, it immediately played its amplification effect!

Under ten times increase, the vibranium deposit on the north side of the Blue Star was instantly ten times larger!

From the original ten tons, it became a hundred tons now!

“After a while in the entrance examination, the Great Desolate Army will be able to use alloy bullets without restrictions.”

Jiang Fan thought.

The increase of Vibranium deposits was silent.

Among the people on the Blue Star, no one knew.

.....

After a brief celebration, post-war seminars were being held in the Great Desolate Army at this time.

The conference was attended by Yan, Ghost Buster, Chang Yu Chun, Xu Tiande, Han Xin and others.

There were also generals and strategists such as Le Yi and Wang Meng who did not get the chance.

“This campaign has given us a lot to gain and has revealed many problems.”

Chang Yuchun came up with a clichéd beginning.
