

## One Planet 226

### Chapter 226: The real decisive battle! The last test!

As compared to the first day, the second day's practical test attracted a lot more attention.

Yesterday, many big shots were concerned about the final result.

Today, as long as it was not something important, they all called their friends to watch it together.

Only by actual combat could they see the potential of the planet created by each candidate!

Tang Yushu and a group of university admissions teachers were also there.

Naturally, there was also a place for them to watch live broadcasts.

It was just that the match was not in the planet association today.

Instead, it was at Jiangcheng's City Lord's Mansion, inside the large hall of the City Lord's Mansion.

This atmospheric hall was more than ten meters high and could accommodate thousands of people.

At this moment, hundreds of people were gathered here.

Each one of them was from an extraordinary origin.

Everyone was gathered there including admission teachers at various universities, the chiefs of the various forces, various powerful planet masters, at the invitation of the city lord of Jiangcheng.

They were commonly concerned about this most important event of the year!

The Jiangcheng Grand Competition was nothing to the city lord of Jiangcheng but the college entrance exam was different.

The results of the annual college entrance examination was also a very important assessment indicator for him!

"Compared to the previous years, there are a lot more people this year."

The middle-aged supervisor of the Planet Association glanced at the crowd around him.

He couldn't help sighing.

"Yeah, in previous years, we were not qualified to come in." Another supervisor next to him said.

"Who made Jiangcheng produce three top geniuses on the Heavenly Pride list this year." The president of the Jiangcheng Branch of the Planet Association said with a smile, "Especially on the first day of the exam! Tang Qingqing, Bu Jingyue, and Jiang Fan played brilliantly and all ranked in the top five thousand! Especially Jiang Fan and Bu Jing Yue! It's amazing that the two of them are ranked in the top 30! This is an unprecedented event in the history of Jiangcheng! It's no wonder that the Jiangcheng City Lord is so happy!"

Both supervisors were nodding.

For the lord of each city, their reputation was very important.

It was still a small town like Jiangcheng.

Two top 30 rankings at once.

There was also a record-breaking streak.

The temporary first place!

Along the way, the name of the small city of Jiangcheng became popular!

Looking at the smile that appeared from time to time on the face of Jiangcheng's City Lord, everyone knew that the old guy didn't say anything but his heart was definitely filled with happiness!

**"It's nine o'clock. It's about to begin."**

A powerful planet master looked at the time and said.

Immediately, the hall went quiet.

Everyone sat down and turned their heads to look at the huge projection in front of the hall!

The crowd was also aware that for the real battle assessment, there were about ten minutes left.

These first 10 minutes were for every student to prepare!

**"The previous preparations are actually very important."**

Sitting next to the city lord of Jiangcheng, a level five old planet master said, "Many details, if you don't do them well, you might lose one or two points or lose three or four points."

Everyone else nodded.

Expressing their approval.

All the people there had also taken the entrance exams of that year.

No one knew it better than them.

Practical test was the test about the strength of the transcendent race created by their respective planets but at different times, the state of each transcendentalist would be different.

Especially in the early stage of Transcendents.

Adjusting the timing was about putting the Transcendental Race in the best possible spirit and condition to go to war!

This was something every candidate should consider!

Besides, there were all kinds of details to pay attention to.

Otherwise, when the time comes, because of negligence in details, the score would be one or two points less. It was very likely that the ranking would fall down by thousands or even tens of thousands and the super first-class universities would be lost!

In previous years, such situations happened a lot.

**"Here we go, here we go."**

In the conference room of the No. 7 middle school, one by one, school leaders and teachers almost stood up but their expression was obviously much more nervous than yesterday!

This was the last subject of four hundred points of the exam, which would directly determine the final score and ranking!

Whether you go to a good university or not, it was also within these next few hours.

"I wonder what method will be used for this year's actual combat test?" A young teacher asked.

"There are only a few types of actual combat assessments."

Qiu Yunfei replied: "It is estimated that there will be no surprises this year!"

"Either way, it's essentially the same thing."

Tong Zhensheng said: "It's all about assessing the true strength of each candidate's planet."

"In this aspect, Bu Jing Yue should have a greater advantage, right?" A teacher said speculatively.

"Bu Jing Yue is now considered to have two and a half transcendent species."

Qiu Yunfei said helplessly, "There other geniuses don't have that many and she still has a super civilization! The combat power must be very strong! Actual combat assessment for Bu Jingyue is very favorable!"
