

One Planet 230

Chapter 230: Eliminating half! Passing smoothly!

These bizarre humanoid creatures continued to rush forward frantically after standing up!

It seemed like they had not been hit by a bullet just now!

“No, it’s not right.”

Chang Yu Chun was also someone who had been present at each of the planet’s conquests in the past few years and immediately realized that something was wrong.

Bullets were ineffective against these creatures?

This was still a fight?

He hurriedly shouted: “What about the research team, did you observe anything?”

After several years of conquests, the Great Desolate Army had a clear division of labor!

A transcendental research team of one hundred scholars was already ready, even earlier than the Great Desolate Army before the zombie group stepped into the passage.

They picked up the newly developed binoculars one by one to watch these weird creatures!

At this time, in the research team, a scholar specializing in the study of strange transcendent creatures immediately responded: “These extraordinary creatures are not fast in speed and movement and have almost no self-awareness. Their actions seem to be based on instinct and they have a strong sense of smell but the reason for them to be unharmed by the bullets has not been able to be analyzed yet!”

Hearing this, Chang Yu Chun was a little helpless but he wasn’t angry either.

The Transcendent Research Group was not God either.

It was impossible to see through a transcendent creature at first sight.

They would not be able to know each other’s characteristics immediately!

He needed to give them some time.

“Keep firing, don’t stop!”

Chang Yu Chun could only order first!

Judging from the previous transcendent battles, no transcendent species was immune to bullet damage.

Chang Yu Chun couldn’t believe it.

These guys with weird actions, really couldn’t get hurt by the bullets!

Under continuous firing, bullets filled the air, enveloping all the zombie hordes!

Gradually, Chang Yu Chun and others also made more discoveries!

“These strange creatures are not harmed by the bullets, but the tremendous impact of the bullets still has an effect on them.”

The research team reported, "It was able to knock them out a long distance and they'll need to take some time off to get back on their feet!"

After discovering this, Chang Yu Chun and others were slightly relieved!

It was fine.

The Great Desolate Army did not say anything else.

It was just more bullets!

The warehouse in the back was piled high and all of them were alloy bullets!

"Continue to shoot with all your strength and keep these creatures at a distance of 400 meters. When that creature enters the range of 400 meters, give me all the power to repel it!" Chang Yu Chun quickly ordered.

Seeing this, Jiang Fan looked very relaxed.

These zombies were very difficult to deal with and their number was also very high but for the Great Desolate Army, it should not be a threat.

The other candidates were not as lucky as Jiang Fan.

One by one, they all went down.

They command the civilization races on their respective planets to fight, while looking anxiously at the group of zombies on one side and shouting excitedly on the other side!

When some people were nervous.

What's more, they were shouting out all sorts of things, letting the transcendent people on their respective planets..... be astonished!

Is our gods so incompetent?

With the passage of time, the number of zombies coming into the passage increased!

There seemed to be no sign of stopping.

It was not just Blue Star.

On other planets, they also discovered that their respective attacks didn't seem to have much effect on these zombie's hordes!

The zombie swarm didn't care about who was on the other side.

They immediately rushed over as soon as they smelled life.

Most of the level 1 planetary races didn't have long-range weapons.

There were only bows and arrows just like the martial artist planet.

It was necessary to take an axe, a large knife and other weapons to deal with the zombie hordes.

At that time, they were also surprised to find out that zombies really couldn't escape their attack.

They couldn't block it either but it didn't seem to hurt.

They first laid on the ground for a while and after that they got up again!

“Ahhh!”

A martial artist screamed miserably.

He turned his head, only to see that the zombie whose arm was just cut off by him, actually got up from the ground again and hugged his calf.

He also opened his mouth to eat it up!

The martial artist next to him hurriedly cut this zombie down hard!

With a few slashes down, this hateful zombie was torn apart.

The individual combat power of the martial artists was too advantageous as compared to zombies.

Each one was like a tiger entering a flock of sheep.

They were rushing into the zombie swarm and slashing crazily!

On the way, they would be bitten by one of the desperate zombies but they didn't mind either.

Just joking.

With a martial artist's physique, not to mention a few bites, even after taking a heavy cut was not a big deal either!

“Hahaha, these creatures look like they have a lot of people and don't suffer from blade injuries. However, if we just split them up, it'll be over.”

A tall, lanky martial artist shouted with a big smile.

Others also found a way to do the same.

The best one was cutting off the lower limbs of the zombies, letting them only crawl slowly on the ground!

However, not long after that, there was one martial artist who noticed that something was wrong.

He saw that the eyes of the other martial artist to his own left, suddenly turned red.

Immediately after that, he pounced on other martial artists like a madman!

“Ahhh!”

This martial artist let out a miserable scream, which drew the attention of other martial artists.

The martial artist who bit his companion continued to pounce on the other martial artists.

The situation was gradually getting out of hand!

More and more martial artists were being bitten!

More and more martial artists were also undergoing bizarre changes!

They actually transformed into a creature similar to a zombie and became unconscious.

They were only interested in biting living beings!

“No, no.....”
