

One Planet 239

Chapter 239: The Terrifying Fish People! The collapse of the students!

The one who was even more concerned about Jiang Fan's performance than the No. 7 middle school was the editorial office located in the East Star City branch of the "Heavenly Pride newspaper"!

"Who still dares to question our Heavenly Pride Ranking now? Which one of you still dares to question it?"

An editor looked at Jiang Fan's ranking and said loudly, "Is it accurate? I just asked you if it's accurate??How much you will be ranked has already been completely determined for you.?Even if you got full marks in all three subjects on the first day and broke two records, so what!?Didn't we make it clear?"

"Low profile, low profile."

Another editor said: "It's not too late to wait until the actual combat assessment is over."

"There's no need to wait."

The previous young editor, Da Yiwei, slapped the thick ranking that Yu Li had just printed out, and shouted, "As far as the difficulty of this year's assessment is concerned, I can say, if this Jiang Fan can break through the fourth round, I'll take this ranking on the spot and eat it! Down! Go!"

.....

"The third round of assessment begins, candidates are requested to be prepared, the third wave of Transcendent Invasion will come in ten seconds!"

The ethereal prompting sounded, getting all students to focus!

Some candidates were very nervous.

Everyone was taking a deep breath of air!

There was no other way.

The first two waves were so hard.

This third wave?would be a higher level, according to the past practice of high school entrance examinations.

Jiang Fan was also aware.

The second wave was more difficult than the first wave.

It was definitely not comparable to the increased difficulty of the second?wave compared to the first wave?because?the difficulty of this high school entrance exam was divided according to the level of the planet.

A level 1 or level 2 planet?was usually called the primary planet in the outside world.

And the level 3 planet was an intermediate planet!

It was completely out of the league!

The same was true for the difficulty of the practical test.

The first and second waves were one level of difficulty.

Third and fourth were on another level.

“Here we go, here we go.”

“The third round is coming. In previous years, there were geniuses who couldn’t pass the third round. This year, it will be more difficult. I don’t know how many heavenly geniuses will fall!”

“According to the previous point of view, the difficulty of the second round of undead knights is comparable to the third round of previous years, so..... this third round is estimated to be the difficulty of the fourth round of previous years!”

In the hall of the City Lord’s Mansion, the big shots were all looking up one by one.

The discussion grew louder.

To be honest, the first two waves were a little boring to watch, for these big guys who were at least 4th level planet masters.

If not for the fact that transcendent invasive species in the first and second waves were still somewhat special, they would almost feel sleepy.

The third wave was different.

It was one of the great joys of the big shots that were watching the actual combat assessment.

They personally witnessed the geniuses being eliminated, especially those demonic geniuses who were ranked on the heavenly pride list and were quite famous!

It would be great to have a blowout!

In the first two waves, Xiang Junhao, Wang Yue and other’s unexpected outings, let the big guys have a lot of fun!

.....

“I wonder who this teacher is this year? It’s simply terrifying. Not only is the difficulty increasing, but the transcendent species showing up is also extremely rare.”

Tang Yushu said with a smile.

Tang Qingqing was ranked among the top 600 in the first two waves!

It made her feel quite joyful!

Another teacher said, “This third wave is also estimated to have a rare species.”

“Here we go, here we go.”

Everyone turned to look.

They were waiting to see the image on top of the projection.

All of them were slightly stunned!

.....

In the Royal Tombs Mountains, from the Planet Passage, a strong wave surged once again!

As compared to the previous two waves, it was even more intense!

Many soldiers of the Great Desolate Army on the city walls that were farther apart could feel that amazing aura.!

The faces of Chang Yu Chun and other soldiers were slightly gruff!

With a flash of light, dozens of huge figures appeared from the passage.

After those figures completely passed through the passage, everyone could see them clearly.

It had a very large head.

Its whole body was black and gray, with a thick fishtail dragging behind it like a monster!

These monsters were immense.

They were more than three meters tall!

It gave an extremely shocking feeling.

The previous zombies and undead knights were transcendent species but their body type was still normal.

These fish-tailed, big-headed monsters were very large!

They were not only big, their body also looked very thick!

“Fish people?”

Jiang Fan thought of one of the more famous transcendent species!

Jiang Fan was able to recognize them.

Everyone was a little surprised.

In this third wave, a common species actually appeared?

The teacher who created the test was no longer making things difficult for them?

It was just that, after a careful observation of the surroundings, everyone discovered that these fish people seemed to be the same as those common fish people!

Many teachers and planet masters who were watching the battle also recognized it in an instant.

This species of the third wave was not special.

“Fish people? Tide Clan, this is the third wave?”

“Old Wang, take a good look. The fish people race is divided into several types. Look at what these fish people are!”

“Let’s see…… F*ck! No way, this is an advanced civilization race! It came out on the third wave?”

In the City Lord’s Mansion Hall, the discussion of planet masters came to an unprecedented level, after seeing the appearance of these big fat-headed fish people.

The big guys were naturally familiar with the common transcendent species of the fish people, but there were many different kinds of fish people.

The more common ones were:

Swamp fishers, deep sea fishers, desert fishers, rainforest fishers, lakeside fishers and more……

This was a powerful group.

Almost all of them were above intermediate civilization!

Many of the candidates also cultivated this transcendent species!

The pattern of?regular fish people?and the fish people coming out of the passage?didn’t quite match.

The fish people that were crawling out of the channel were obviously larger.

The most conspicuous was the fish’s?head.

“Among all the fish people, there is one of the most powerful and the only advanced civilization.”

Tang Yushu looked at the projection and said with a smile, “It’s golden fish people in the third wave!”

“Look at the middle of their heads.”

“There is a little golden yellow color!”

Everyone else saw it too.

It was at the head of these massive fish people, above the fish eye.
