

## One Planet 240

### Chapter 240: The Terrifying Fish People! The collapse of the students!

In the middle part of the forehead, there was a less conspicuous golden hue!

“The golden fish people actually came out in this wave!”

An old man sitting next to the Jiangcheng City Lord said with a smile on the corner of his mouth, “Now..... these candidates will have to suffer.”

“The Golden Fish People, that is an extremely terrifying species, even in advanced civilizations!”

“In previous years, the golden fish people came out at least in the fourth wave, or even the fifth wave, haha, but this year it came out in the third wave, and this examiner is more ruthless than us old guys!”

“In this wave, it’s definitely going to be a bloodbath, and I’m afraid that many of the Heavenly Pride List’s geniuses are going to be eliminated!”

One by one, the powerful men next to him were echoing the words.

Each one had a smile on their face and a hint of anticipation!

They were expecting many candidates to be under the powerful suppression of the golden fish people.

“Golden Fish people?”

It was not just these big guys.

Among the candidates, there were also many knowledgeable geniuses who recognized such behemoths.

After seeing this, everyone’s face was ugly!

Some people even wanted to swear on the spot!

“Interesting, this wave..... ”

Even Qiu Yunfei, who has always been relatively stable, said with a smile: “The golden fish people belong to the real Tide Clan, and have inherited the terrifying innate abilities of the Tide Clan. It is estimated that many candidates will not be able to cope with this wave!”

As the passage opened, more and more big-headed fish people.

They came flooding in.

That huge body.

A shiver ran down the spine of the ones who saw it.

That was even more tremendously oppressive as compared with the Great Desolate Army.

However, as these big-headed fish people came in, they just stared at the Great Desolate Army.

They didn't take any action.

Instead, they stopped in place.

They seemed to be preparing for a large troop gathering.

“Look.”

A scholar quickly spoke up: “Have you noticed that these big-headed fish monsters move by sliding with their fish tails, but their fish tails are not long enough to slide at a fast speed!”

Others were picking up on this as well.

“First name these monsters, big-headed fish people, it seems that they are not low in intelligence.”

Research Team's Leader, an elderly scholar said.

The research team was also quite experienced in observing transcendental species.

Their first reaction when someone came in the passage was to roughly judge the wisdom of the opposite side!

These big-headed fish monsters were clearly organized and disciplined!

They must be a powerful civilization race!

“It's still really slow.”

Chang Yu Chun also saw it.

These big-headed fish people slit their tails across the ground and then crawled forward!

It looked like..... a maggot of enormous size!

The speed was really slow.

It was even slower than the average person's running speed!

Chang Yu Chun, Le Yi and the other generals looked at each other.

They were seeing the puzzled look in each other's eyes.

With such a slow speed, it was also just a live target, no matter how big their body was.

Among the transcendental species, the Great Desolate Army was not afraid of strong ones at all.

For them, the most terrifying thing was high speed and agility!

That was really the nightmare of the Great Desolate Army!

Bullets and artillery fire were hard to hit if the opponents' speed was fast!

“Keep observing!”

Chang Yu Chun could only order.

“These big-headed fish people have a touch of gold on their foreheads.”

One scholar quickly observed this.

It caught the attention of others.

One by one, they looked carefully.

“There is indeed a golden color, but..... have you noticed, it seems that the golden area in the middle of the forehead of each fishman is?not the same!” A meticulously observing scholar said.

“There are really some small differences. Could?it be.....”

A scholar paused for a moment and speculated: “Do these golden colors represent their status? Natural talent? Or strength?”

“It should be strength.”

An older scholar said, “Look at the speed at which they crawl. The?larger the golden area, the faster the speed!”

One scholar was discussing.

Not long after, they had observed the characteristics of these big-headed fish people!

What puzzled the crowd was?that after passing through the passage, these big-headed fish people? only arranged the battle group.

No offense was chosen.

There were no other movements either!

Even Jiang Fan also raised his eyebrows.

This was the third wave.

The difficulty was one step higher than the second wave.

“That can’t be all the things these big-headed fish can do.”

Jiang Fan secretly thought.

In the next moment, Jiang Fan heard something.

There was a sound coming faintly from the other side of the passage.

In addition, it was getting louder?and clearer!

Even the people on the tall city walls?could?hear?that.

“What the hell!”

“Watch out! Beware!”

“Raise your?attention!”

Chang Yu Chun and the other?generals immediately gave orders.

There was a lot of vigilance.

Looking toward the entrance of the planet passage, they all felt some palpitations!

Rumble!

There was a loud noise.

It was very much like the sound of the giant waves.

In the next moment, everyone saw that behind a group of large-headed fish people, a wave which was nearly three meters high appeared!

It swiftly poured out from the passage.

This huge wave of water instantly drowned hundreds of large-headed fish people in front of them.

It was quickly flowing toward the front!

In the passage, one wave after another came.

It didn't stop gushing out!

It didn't take long to drown most of the entire flat ground outside the city walls.

That was not all.

It continued to flow towards the city wall!

Seeing this scene, Chang Yu Chun and others were shocked!

In the next moment, an even more frightening scene occurred.

Hundreds of large-headed fish people submerged by the water but each one lived in the water.

There was an idiom called "like a fish in water!"

It was the home of these big-headed fish people!

One by one, they were dancing with their thick fishtails.

They were sliding surprisingly fast!

That speed was way too fast compared to the previous crawling.

It was like an arrow in the air!

The generals and scholars who watched were horrified!

They knew that the Great Desolate Army was not afraid of the strong ones but they were only afraid of the fast ones.

In addition, the most important thing was that the other side was still in the water!

It was well known that the power of both bullets and artillery fire greatly reduced inside the water.

"Is this difficulty the talent of these big-headed fish people?"

Jiang Fan had a guess in his heart.

These water waves.

No matter how you look at it.

Why did it look like the big-headed fish people had activated it?

At the same time, on the planet of other candidates, this same scene happened.

It was dazzling for most?of the candidates!

Some candidates even?collapsed!

They built a race that was very afraid of water.

How else could they deal with these big-headed fish people in water?
