

One Planet 251

Chapter 251: Under the Darkness! The first trump card of the Great Desolate Army!

Others looked over and immediately found this out as well.

“Looking at the respect of the people around, this female elf should be the leader of these elves!”

One scholar speculated.

“In that case.....”

An old scholar pondered for a moment and said, “These meteors, instead of being a racial talent of the elves, are more likely to be generated by those meteor bows and arrows!”

“How can a bow and arrow automatically produce meteors?”

A scholar questioned.

“This is a transcendent race, and these meteor bows are probably also transcendent items, and any magical ability is possible.”

Most scholars still agreed with this idea.

Transcendent!

Naturally, it is something not ordinary!

“Don’t argue yet. Watch carefully.”

The leader of the research team snorted, and then said: “Quickly find a way to decipher the appearance of these meteors, um..... these elves are attacking!”

The Great Desolate Army was concentrating on one by one!

They saw the elf army in the back. It seemed to be enraged by the shells of the Great Desolate Army.

They began to line up in formation.

They were divided into squads of a hundred people!

Each squad of 100 had an elf captain sitting on a giant tiger!

The hundred-man squads dispersed in a one-way pairing.

They were marching fast towards the city wall!

They directly dashed to the edge of 400 meters before stopping!

This was already the cordon of the Great Desolate Army.

“All down, attention gunners!” Chang Yu Chun immediately shouted.

Whoosh! Whoosh! Whoosh!

In the next moment, they heard the sound of countless arrows breaking into the air!

An arrow shot by an elf against the wind.

It still came flying.

Those arrows were descending on the city walls!

Numerous blasts rang out.

Some of these arrows were shot at the city walls.

Some of them were shot on the small shields above the heads of the soldiers of the Great Desolation Army.

There were continuous explosions!

Looking behind at Yan, Ghost Buster and others, everyone could not help but sweat.

Since the Glory Conquest, the Great Desolate Army has never had a casualty before!

Even if they met powerful big-headed fish people in the third round, it was still the same!

However, in this wave, they met with the terrible elves! Not only their defense was incredible!

That meteor that appeared out of nowhere.

Even shells and bullets couldn't penetrate it.

In addition, their attack power was also extremely terrifying.

Even its range was four or five hundred meters away.

They could still attack!

The small shields of the soldiers of the Great Desolate Army were also disposable.

They couldn't resist a few attacks!

After the small shields were completely reimbursed, these soldiers could only hold back and hide behind the battlements.

They were completely unable to show their heads!

With the elves' bow and arrow accuracy, a single revelation was bound to die!

"Bastards!"

Han Qinhu, who was in charge of the command this time, even punched hard and hid on the city wall.

He felt extremely aggrieved and helpless!

The leaders of the first three waves were all about commanding the win.

By the time his wave came, he didn't even dare to fight back.

It was extremely hard to bear!

.....

On the other candidates' planets, it wasn't any better.

The Great Desolate Army at least had walls to lean on?but the transcendent race created by other candidates could only resist with strength.

Boom!

Tang Qingqing's position.

A Dou Qi armor transformed by a Dou Qi warrior was directly shattered by an arrow shot by an elf.

The other elves cooperated very well.

Another arrow followed close behind,?this Dou Qi Warrior was directly?nailed alive to the ground!

The arrows used by such elves?could be much more powerful than ordinary arrows.

Even a Dou Qi warrior with a strong physique?hung up in no time after getting shot!

Tang Qingqing, who was watching this,?had a headache!

This was not a simulation, it was real combat.

With each dead Dou Qi warrior, her combat power was one point less!

Tang Qingqing's biggest reliance?was fifteen hundred magic legions?super-spell magic attack!

Surprisingly, they all failed as well.

All of them were blocked by the strangely appearing meteor!

This..... How else could they fight?

Under the city walls of the Great Desolate Army, the teams of elves were attacking while moving forward.

They were already approaching within 300 meters, letting Chang Yu Chun clench his fist.

This was definitely a very dangerous boundary!

“Would you like to use the tactics of the third wave?”

One of the generals asked.

“No.”

Chang Yu Chun thought for a moment, then shook his head.

The tactic in the third wave against the big-headed fish people was to catch them in a jar?but to deal with these people with obviously higher intelligence?and long-range attack capability, it wouldn't work very well!

“It's not good.”

A general suddenly shouted.

Chang Yu Chun hurriedly looked downward, only to see?the leader of an elf squad.

Surprisingly, he picked up the meteor bow that he had been carrying on his back?and shot the arrow!

An arrow came straight over?but the target was not the crowd on the walls.

Instead, it was the gate under the city wall!

Boom!

With a loud sound, this freshly mended gate?bombed?again!

Seeing this scene, they could clearly feel the morale of these 3,000 elves rising!

Their foot speed was faster.

They were moving forward fast!

The artillery fire of the Great Desolate Army continued, but because of the presence of meteors,? there was no way to pose the slightest threat to these elves!

“We must not let them rush in!”

Chang Yu Chun shouted coldly.

This arrow from the elf captain just now was much stronger than the previous big-headed fish man king’s attack with the trident!

If they came into the inner wall, shooting at close range could be very dangerous!

That half meter thick inner city gate was not very safe either!

“The key is those meteors. Without those meteors, no matter how powerful the attacks of these elves are, what’s there to fear?”

Han Qinhu clenched his fists tightly and thought secretly.

He was a general who surrendered.

He was lucky enough to get the quota of five generals in the glory conquest.

This rare opportunity to command couldn’t afford to mess it up!

Everyone else knew this too?but for now it looked like?these meteors were very incomprehensible!

“Use backup tactics first.”

Chapter 252: Under the Darkness! The first trump card of the Great Desolate Army!

Chang Yu Chun reluctantly ordered, loudly: “Fire attack!”

With Chang Yu Chun’s order, barrels of kerosene were carried to the stone thrower.

Subsequently, the stone thrower was launched.

It was quickly dropped to the ground beneath the city walls.

A shell and a bullet blasted down.

Setting this kerosene on fire!

The fire quickly blazed up!

This was also one of the alternate tactics of the Great Desolate Army.

It was very effective when used against certain special transcendent races!

But?these elves were not restrained.

The roaring fire formed a belt of fire.

The advancing elves temporarily stopped!

“Preliminary effective!”

Chang Yu Chun breathed a long sigh of relief.

If the fire attack was useless, I’m afraid they would be forced out to play some cards in advance!

But the trump card was the trump card, just because it couldn’t be a conventional weapon?but Chang Yu Chun was not completely relieved.

After that, he saw that, in the elf team, there were at least ten elf captains.

They picked up the meteor bow on their back?and aimed at that one stone thrower!

Seeing that, Chang Yu Chun’s hair stood in an instant, and he immediately shouted, “Attention to the stone thrower, use your shield!”

A large shield was placed in front of the stone thrower by the soldiers.

Boom!

With a loud sound, an arrow shot over.

It landed on the large shields.

There was a heavy explosion!

After that, the shield just turned black!

“It looks like it can withstand seven or eight hits.”

Looking at these black marks, Chang Yu Chun mentally estimated.

He angrily looked at the hundred scholars behind him and asked, “Did you find anything?”

A young scholar hesitated and spoke up, “I just observed that the elf captains shooting arrows were in the back of the brigade, farther away from us. Did?you find anything?”

“Huh?”

Chang Yu Chun suddenly became interested.

He immediately turned his head?and discovered, sure enough, it was?the elf captain in the back?who was shooting with a bow.

The front was not moving!

“Sure enough! These meteor bows still have a weakness.”

Seeing this, the experienced Chang Yu Chun just knew it.

There must be an inherent factor in the appearance of meteors!

It's natural that the research team didn't find anything.

The old team leader summed up everyone's findings and said, "According to our preliminary observations, these meteors should be emitted by the meteor bow on the back of the elf captain, and....."

The old team leader's voice was a little more intense: "It's probably a passive ability?"

"A passive ability?"

Chang Yu Chun, Han Qinhu and other generals raised their eyebrows.

"It is the ability that will automatically activate once it encounters an external attack!"

The old group leader explained.

The crowd was a little shocked to hear that.

This was the first time they had encountered this special ability!

"However....."

The old team leader changed his tone and said, "It must have some kind of limitation. For example, this passive ability can only happen when the Meteor Bow is stationary!"

"The reason why those elf captains were all shooting arrows from behind just now was because, once they shoot, the Meteor Bow's passive ability will be lost, and the elves behind will be safer!"

"At the same time, we suspect that this passive ability isn't something that can block anything. Perhaps some attacks won't trigger them!"

"Like a fire attack! Or a sudden and swift attack!"

Chang Yu Chun's eyes got brighter and brighter as he listened.

He took a deep breath and suddenly realized something.

Looking at Han Qinhu beside him, with a somewhat embarrassed face, he said, "Next, it's all up to you to command."

The opponent encountered in this battle was too powerful, so Chang Yu Chun couldn't help but command again!

Han Qinhu nodded.

The depression in his heart was swept away!

In a deep voice, he said: "Fire attack continues! Cover the cannonballs and aim at the elf captains shooting arrows from the rear! Don't bother about the damage to the rock throwers!"

Immediately, the soldiers of the Great Desolate Army perked up again!

So many previous attacks didn't work.

Naturally, their morale was a little low?but now the problem was found.

It was not as impactful.

“Padding tactics at the ready!”

Han Qinhu pondered for a moment?and finally ordered!

“Padding Tactics!”

The others were slightly taken aback?but they immediately figured it out!

Han Qinhu was trying to succeed with one blow!

“Padding tactics?”

Seeing this, Jiang Fan also could not help but raise an eyebrow.

This was one of the few hidden cards of the Great Desolate Army this time?but it could only be used once!

At?that?time, Han Qinhu chose to use it on these dark elves!

Jiang Fan’s eyes could not help but flash with a hint of anticipation.

He would like to see?if the Dark Elf’s Meteor Bow was really that powerful!

.....

At the same time, other candidates were also fighting hard!

“Block it, block it for me! Hey, these damned meteors!”

Inside the examination room, Fang Zhenting clenched his fists tightly.

Unfortunately, his transcendent race in the last wave against the big-headed fish people was already dead and injured!

Now their number was less than the dark elves.

After being bombarded by several consecutive rounds of arrows from the elves, a?lot more people fell again.

In the end, Fang Zhenting could only give up reluctantly.

Opted out!

No more quitting.

The transcendent race created by him could be shot to death by all these terrible elves!

The same scene happened on the planet of many candidates.

There was absolutely nothing they could do about the Dark Elves’ meteors!

They could only watch helplessly as the opponent approached step by step.

Finally, instead of shooting and killing their own transcendent race quickly, they also reluctantly opt-out!

Thus ending the journey of this college entrance exam!

In the fourth wave, the geniuses who were usually famous fell one after another, just like many planet masters predicted!

The speed of their fall was also very fast!

It didn't take long.

Just half of the candidates were forced to withdraw from the examination room!

Each one of them was a genius.

They were struggling as hard as they could!

The Great Desolate Army finally came up with a crushing tactic!

They were preparing for a one time?deadly strike against these dark elves!!!

Chapter 253: Moment of Horror! Capturing the Elf Queen alive!

"Shields ready, keep replenishing them if they are scrapped, don't stop!" Han Qinhu commanded loudly!

"Throw the stone thrower hard!"

"Artillery cover, use the range advantage of our rifles, fire freely, and shoot wherever there is damage."

Han Qinhu shouted loudly.

The commands were well organized, the thinking was very clear.

This was the conclusion he just came to after observing for a long time.

Although the long range attack of these elves was terrible,?in terms of range, the effective range of the rifle was 600 meters!

Some of these high-quality?rifles even had a higher range!

This was one of the advantages of the Great Desolate Army!

Absolutely,?it was not to be wasted!

Some of the soldiers of the Great Desolate Army had already begun to retreat.

They were retreating to a nearby mountain, high above the ground!

Although the terrain was steep,?they would not be threatened by the arrows of the elves!

The Great Desolate Army's counterattack had begun!

The target of the first round of artillery fire was not the elves, instead it was the ground in front of them.

They were detonating the dropped kerosene tank!

The blaze was getting bigger and bigger!

The elf team was forcibly blocked!

There was a slight commotion, but they were still born with a great aversion and dislike for fire!

The elf captains in the back were all shooting arrows with their bows!

The target was exactly that one stone thrower.

The Elf's eyesight was also very good!

Together with that matchless archery skill, their accuracy was very high!

Just at this moment, Han Qinhu's eyes lit up and said, "Half of the cannon fire, attack these elf captains who are shooting arrows!"

Those gunners had been waiting for this moment for a long time!

They took a deep breath.

One by one, the shells were fired swiftly!

Shells were rushing at the elf captains in the back!

Seeing these shells whose trajectory had changed, the faces of the three thousand elves all changed slightly.

After that, the captains of the elves hurriedly did not dare to continue shooting.

They put down the meteor bow in their hand.

It was resting in front of their body!

This scene was spotted by the research team.

"Sure enough, we guessed correctly."

A scholar excitedly said, "This Meteor Bow's passive ability has a requirement that it can only be activated when the Meteor Bow is stationary!"

"No need to dwell on the exact mechanics of the Meteor Bow's passive ability."

The old group leader spoke up, "Just discover its weakness!"

"Weaknesses can't be determined yet, but....."

A scholar next to him said, "We will know when the padding tactics are implemented later.?I think this passive ability should also have a limit!"

"Let's hope so."

The old group leader nodded!

Once?the padding tactics also failed, the situation would become very difficult!

All artillery fire, bullets and kerosene would not pose a threat to the elves!

Instead, they would be giving this padding tactic's cover!

.....

“Fang Zhenting has also been eliminated. Now our Jiangcheng’s candidates are basically eliminated.”

In the conference room of No. 7 middle school, one of the teachers lamented while looking at the previous screen projected on the screen.

“The few geniuses ranked in the top ten in Jiangcheng, Wang Tianyi and Lu Tao and others were eliminated in the last wave, and now Fang Zhenting is also out.”

Teacher Liu Yue said, “Only…… Jiang Fan, Tang Qingqing and Bu Jing Yue are left!”

“There are two more people in our school.”

The school leader next to her was nervous with a smile on his face!

If this was the previous year, it would be something absolutely unthinkable!

“These elves are not easy to deal with, and even Bu Jing Yue is in trouble.”

On the projection, the situation of the planet of Bu Jing Yue could be seen.

The Xiu Ling race that Bu Jing Yue built was also a race that excels archery but compared to the dark elves, it was still not even close!

Fortunately, there were five spirit tree people in the way, who didn’t let the dark elves advance too fast!

In these two months, Bu Jing Yue also cultivated three more spirit tree people!

Its strength was greatly enhanced, but it was clearly visible that even the spirit tree people with amazing defensive power, it was also getting a little unbearable after being constantly attacked by dark elves.

Especially with the strike of the meteor bow.

……

“Bu Jing Yue also has to use some bottom card, otherwise, he can not pass this wave.”

In City Lord’s Mansion Hall, a planet master saw this scene and said directly.

Everyone knew that this session of the geniuses must have left some cards, especially the top ranked ones.

Even if it was someone in the top 100, it was also a tough battle to fight.

It was not like the previous waves that someone would pass soon!

After holding on for a while, all of them simultaneously used their trump cards!

The Xiu Ling clan of Bu Jing Yue took out a handful of huge bows and arrows with unique shapes and unusual aura!

“This is…… the Xiu Ling arrow?”

A planet master immediately recognized it.

“This is one of the best bows and arrows of the Xiu Ling family, but the key material for making Xiu Ling arrows, spirit gold, can only be produced on at least a third-level planet!”

Another planet master said.

“This must have been given by that teacher of Bu Jing Yue, tsk. This?resource investment is really big.”

A planet master exclaimed.

“Even the heart of the stars is given. What?is this amount of spiritual gold?”

One by one, they were all lamenting!

If they had such a good teacher back then, why couldn’t they aspire to the top spot in the college entrance examination?

.....

The Great Desolate Army, at that?time, also reached the most critical moment!

The padding tactic was about to be implemented!

Jiang Fan watched with interest.

He naturally knew what the padding tactics of the Great Desolate Army were!

That was, several tunnels had already been dug out by the Great Desolate Army, under the city walls.

This was one of the many well thought out plans of the Great Desolate Army!

It was not really impressive!

It was for just in case!

For example, in the case of encountering certain underground races that can dig holes in the ground?or use this tunnel?to go around to the enemy’s rear.

They would execute the beheading!

Under the ground in front of the city walls, stripes of the tunnel?were?not much though?but it was stretched far!

The key thing was?that, in the tunnels, a?lot of gunpowder was buried!

The Great Desolate Army’s current gunpowder.

Chapter 254: Moment of Horror! Capturing the Elf Queen alive!

It was much more advanced than the black powder of the era of Qi!

It almost reached the peak level of Jiang Fan’s previous life on Earth!

In the tunnels, preliminary buried gunpowder was 200,000 pounds!

It was densely packed.

It was not buried there all at once.

Instead, it was buried separately.

It was connected?to maximize the power.

This was originally intended for dealing with powerful,?single,?transcendent creatures.

This?tactic would only be used once!

Due to the sudden arrival of these dark elves,?Han Qinhu directly chose?early activation!

On the battlefield, the commanding general had the highest command authority.

Yan and Ghost Buster and others did not object!

Han Qinhu had already made careful arrangements in his heart.

He wanted the most glorious moment in the battle of Glory.....

While the fire attack and artillery shells kept bombarding, an elite squad of thirty people had quietly slipped into the tunnel.

Lit the fuse in the tunnel!

Today's fuse?was not?the crude technology of the year!

There was hardly any sound to ignite it!

Dark elves also had a very strong sense of their environment?but with the sound of artillery fire and large fires burning all around, how could they possibly hear.....

It was such a tiny sound!

After igniting the fuse, the thirty-man squad immediately retreated backwards.

They were quickly coming back to the ground.

Seeing the return of the thirty-man squad, a?sharp look flashed in Han Qinhu's eyes.

He ordered in a deep voice: "Everyone, pick up your shields and protect yourself!"

The buried gunpowder in the tunnel was as much as 200,000 pounds!

It was equivalent to one hundred tons!

The power of this explosion would be so much!

No one knew that?the Great Desolate Army had tried gunpowder.

Naturally, it was impossible to experiment with so much gunpowder!

This was also the largest scale of its use?since the birth of the new gunpowder.

Jiang Fan was also quite looking forward to it.

He had never seen this equivalency in his previous life either!

One could imagine what a terrible sight that would be!

chi chi chi.....

The fuse was burning continuously.

It was fast forward in progression!

Above the ground, the dark elves were still isolated by the roaring fire!

They could no longer advance the slightest bit!

In the middle at the back, several elf captains were whispering something to the elf queen.

In Elvish, naturally!

They seemed to be discussing tactics!

Against this rogue-like flame of the Great Desolate Army, the dark elves also had nothing good to do for a while.

After discussing it for a while, this elf queen moved on.

She pulled out the huge meteor bow on her back!

Aimed at the three stone throwers on the wall.

That's right, there were three!

The Elf Queen put three arrows on the huge meteor bow at once!

The elf captains and guards beside them were under personal protection!

They were making sure that the elf queen was shooting arrows and that she would not be attacked by the shells of the Great Desolate Army!

"This elf queen's arrows are definitely more powerful!"

One scholar said.

"But it's too late for that!"

Another scholar shielded himself with a small shield.

A hint of anticipation flashed in his eyes.

If it was earlier that the Elf Queen attacked, she might even be able to destroy so many stone throwers.

But now, they probably figured out where the fuse was burning!

Dark elves, at that time, seemed to feel a natural sense of danger!

It was letting the bunch of elves feel slightly uneasy!

There was some commotion!

Seeing this scene, the Elf Queen frowned slightly, but she didn't say anything, nor did they stop moving.

They were still shooting arrows with the bow.

They were getting ready to shoot three arrows at the same time!

All of a sudden, a tremor came from the ground!

The Elf Queen was the first one to sense it.

She immediately realized that something was wrong.

She was just about to put down the meteor bow, but it was already too late!

The flames ignited a hundred tons of new gunpowder buried underground, which instantly blew-up!

Booom!

There was a violent sound.

Like the earth was shaking!

It exploded underground!

This gunpowder was also only a thin layer away from the ground!

What was the concept of a hundred tons of gunpowder completely exploded!

Jiang Fan saw that.

The sky was falling and the earth was splitting.

The ground was directly flipped over!

All the dirt, rocks, grass, and trees, and so forth all exploded into the sky!

A three-meter-high boulder was not immune either.

It blasted into the sky!

It was all dusty!

Within a range of several hundred meters, there was rumbling all over the place!

It seemed that a huge earth dragon was turning over!

With this sudden and instantaneous attack, the passive ability of Meteor Bow actually didn't activate!

Each one of the dark elves was like pieces of paper!

They were instantly submerged and annihilated by a huge cloud of dust!

After the smoke settled, the crowd of the Great Desolate Army saw that on the left side of the ground was a field of shattered bodies.

Most of the dark elves were dead like a doornail.

Not even a complete body could be preserved.

The elf queen in the back was also affected by the wave!

Her Meteor Bow seemed to be even more powerful.

In the nick of time, her passive defense ability was activated!

A stream of meteors fell, but that was a hundred tons of gunpowder.

Even the meteor was not able to completely block it!

She was left with the aftermath, which went straight through!

The blast hit the Elf Queen?and the Elf Queen let out a scream!

She was blown away directly by this terrifying aftershock!

She arced high in the air.

After flying for countless meters, she landed heavily on the ground!

.

Her personal guards and the elf captain beside her were even more miserable!

Out of ten elf captains, nine died on the spot?and one got all his limbs blown off!

She couldn't move.

She?was not far from death.

The personal guards were killed and wounded nine out of ten.

Everyone was coughing up blood!

At this moment, that solemn face?was filled with horror.

They couldn't believe what was happening in front of them!

Even the crowd of the Great Desolate Army on the city walls, also widened their eyes one by one after seeing that tragic?scene!

It was also the first time they saw hundreds of tons of gunpowder explode!

It was a total doomsday scenario!

It just detonated.

Even the huge city walls were trembling!

"It seems that the meteor bow does have a reaction time for the passive ability to kick in, as we thought."

Chapter 255: Moment of Horror! Capturing the Elf Queen alive!

One scholar said.

"Yes."

Another scholar nodded and said, "The instantaneous detonation of the gunpowder exceeded the reaction time of the meteor bow!"

"And..... most critically."

This scholar looked at the tragic situation in the distance and couldn't help but shake his head and said,?"The passive defense of the meteor bow is ultimately limited and can't stop the power of such a large amount of gunpowder equivalent!"

This fact was also quite a shock to many scholars!

Any tactics were secondary.

The most critical thing was still?personal strength!

Even if the Meteor Bow had such a terrifying passive ability.

It was all busted open!!!

“The special forces team, come with me! Other teams follow!”

Han Qinhu did not forget his mission.

He immediately shouted.

He personally led the team.

He was leading 1,000 elite soldiers as well as 3,000 ordinary soldiers.

They were fully armed.

They were running down to the city gate.

They quickly came to the ground that was blown away?and surrounded the remaining surviving Dark Elves!

At that time, out of three thousand dark elves, less than a third of them were left!

In addition, most were still in injured condition.

The rest of the intact ones were completely without any fighting spirit.

Looking around at the dead bodies of their companions, their faces were?numb!

It was like being hit by five thunderbolts!

“Disarm and capture alive. Kill?those who cannot be captured alive!”

Han Qinhu ordered.

After that, he brought the special forces to the position of the elf queen!

At this time, the Elf Queen was seriously injured, but she was one of the strongest of all the dark elves, with a meteor bow in her hand!

This huge meteor bow was also blown off in the explosion just now.

With a wary face, she looked at the soldiers of the Great Desolate Army rushing up!

Beside her, there were still a few personal guards and the elf captains on guard!

Bang!

Han Qinhu fired a direct shot?and discovered?that the Elf Queen’s Meteor Bow had lost its passive ability!

No meteors appeared at that time!

Seeing this, Han Qinhu immediately waved his hand?and let the special forces team rush forward?to surround these remaining elves.

The results were no surprise.

The Elf Queen resisted desperately, but after being hit by several bullets, the power of resistance was lost.

She was directly captured alive by the Great Desolate Army!

“It’s a pity.”

Watching all of this, Chand Yu Chun on the city wall was a little emotional.

Han Qinhu’s battle was really cool.

But he also exposed the big trump card of the Great Desolate Army in advance.

The underground tunnels were all destroyed.

This tactic could no longer be used for a short time and according to the time of the glory conquest, this wave was over.

After another hour, there would be the next wave of transcendental species invasion!

There was no time to dig the tunnels again!

.....

At this time, the ethereal prompt sounded in the ears of every candidate.

“The first candidate passed this round. Please cheer for the other candidates.”

Immediately, everyone’s heart was in awe!

They couldn’t believe that someone got through this shit!

They were still struggling.

Tang Qingqing was looking at her legion of warriors, which was still struggling to fend off the dark elves’ attacks.

She was a little surprised that someone actually took care of these powerful dark elves so quickly?

“Hmm? Interestingly, this challenge wasn’t cleared first by those geniuses in the top rankings.”

“This one is.....!”

“Jiang Fan!”

Tang Yushu looked at the projection and recognized it at once, and said, “That’s the candidate who broke two records in a row on the first day!”

“Surprisingly, it’s him?”

Every planet master felt a little incredible.

Before that, all of these planet masters judged him.

Although Jiang Fan had high scores in the second and third subjects, his actual combat assessment would not be ideal.

Some even judged that Jiang Fan will stop at this wave!

However, no one could have imagined that he did not only fall in this round, he was the first one to pass!

“This Jiang Fan doesn’t seem to be building a civilization for ordinary people, right?”

An admissions teacher looked at the rifle-wielding Great Desolate Army in the projection and frowned slightly, “How does this look like a rather special kind of transcendent civilization!”

“It’s very possible.”

Another admissions teacher said, “There are various transcendent civilizations, many of them are incredible transcendent races. This one, built by Jiang Fan, is estimated to be an extremely special race!”

“Have you seen the weapons in these people’s hands? Their power is good. I wonder what they are called!”

A planet master wondered.

“These people are called..... Musketeers!”

In a place in Blue Moon City, Wang Yao was also looking at the projection of Jiang Fan’s planet.

She was explaining to her own teacher.

This teacher was also very well-connected.

Immediately, this message was sent out in a group.

In an instant, many of the bigwigs were also aware of it.

“Musketeers? These were originally called musketeers? Born to awaken a musket?”

An admissions teacher suddenly realized and said: “So it’s true, it is indeed a very special extraordinary race!”

Awakening Musket was rare but there were many more extraordinary transcendent species than this.

Everyone was only slightly surprised.

It was soon accepted.

“It’s not just awakening muskets.”

Tang Yushu picked up: “They also have an even more powerful weapon called black powder, the same thing that just blew the dark elves into the sky!”

“So it’s called black powder.”

An old man next to Jiangcheng City Lord said, “This thing is quite powerful, but it seems to have a lot of restrictions!”

“Yes.”

Tang Yushu nodded and said, "I have specifically studied this stuff....."

"It can only be activated by hiding it in advance and then igniting it with fire!"

"And it must be fixed in a specific position to be ignited, and there is no distinction between the enemy and me!"

"It can only be used as a surprise weapon, and like the Dark Elf's Meteor Bow, it will be difficult to be effective if the enemy knows about it in advance and has defenses.

"Although it's powerful, the weaknesses are also obvious."

A planet master nodded slightly and said, "But..... I admit that I did underestimate this Jiang Fan. With his strength, he should be able to rank in the top five thousand this time!"

"The first five thousand are certain. Maybe?the first three thousand are also possible!"

Another planet master agreed.

This 100-ton gunpowder attack by the Great Desolate Army let all the planet masters look at it with admiration.

It was raising the rating of Jiang Fan!

However, not everyone was happy.

In the editorial room of the branch of the "Heavenly Pride News" in East Star City, there was a gloomy cloud at that moment!!

Chapter 256: Bombing the Foundation Establishment! Fight against three thousand immortal cultivators!

In the editing room, the editors were originally happy.

They were waiting for Jiang Fan to quit!

Yet, they did not expect that?the quitting didn't happen.

Instead, they waited for first place!

For other candidates, especially for those top geniuses, the impact was too great for this first place of Jiang Fan.

One by one, they didn't hide and started to show part of their cards!

It didn't take long?before the second place appeared!

The third and fourth one also appeared one after another!

Basically, it was all about using strength to crush!

Boom! Boom! Boom!

One after another magic blasts went down!

After paying the casualties of dozens of warriors, Tang Qingqing's magician legion finally wiped out these dark elves!

Bu Jing Yue relied on the bottom card Xiu Ling bow that she made!

It also crushed the dark elves!

There was no suspense in winning!

However, for most of the candidates, these dark elves, especially the weird and unpredictable meteors, were just too hard!

They couldn't find any flaws at all!

They got grinded to death by the long-range attack by the dark elves.....

Especially the transcendent races without long-range attacks were crushed.

Basically, it was unilaterally beaten like a target!

In the end, they had to quit!

In the previous wave, there were still more than 200,000 candidates!

After this wave of dark elves, there were only less than 30,000 people left!

These 30,000 candidates?were?geniuses among geniuses.

.

Every single one of them had the qualification to be on the Heavenly Pride List!

Basically,?they were the top players in each city!

"The fourth wave of Transcendent Invasion is over. Candidates are requested to rest for ten minutes to prepare for the next wave of assessment."

The ethereal prompt sounded.

It was announcing the end of this round of actual combat assessment.

Claptrap.....

A large group of candidates appeared in the high school square, they couldn't help but scream.

"It's too hard, it's too hard. In this wave, my skeleton monsters couldn't even touch the shadows of those elves, and they were almost all killed by arrows!"

"Like you, my lizardmen are even worse. They are still crawling on the ground, and they are almost dead!"

"The person who came up with the exam is really ruthless. It's only the fourth round, and even the dark elves have come out."

"It's over, it's all over, there's no hope for the super-first-class university."

"You're still thinking about super-first-class universities. Haven't?you seen how many geniuses there are this year?"

“Nearly 30,000 people passed through such a difficult wave, tsk?it’s unbelievable!”

“Let’s see. The?next wave will be even more difficult. It is estimated that there will be less than 10,000 people left!”

“.....”

Fang Zhenting walked on the square with a complicated expression.

He met with Lu Tao, Wang Tianyi and others.

These people also knew that they probably won’t be able to pass too many hurdles.

They had discussed getting?together after the exam!

“You are lucky. A?first-class university is stable.”

Lu Tao punched Fang Zhenting on the shoulder and said with a smile.

“It was thrilling.”

Fang Zhenting said with lingering fear.

“I didn’t expect that, our Jiangcheng’s candidates are already almost completely wiped out after only the fourth wave.”

Next to him, Wang Tianyi sighed with emotion and said, “This should only leave the three of them, Bu Jing Yue, Tang Qingqing and Jiang Fan, right?”

“I guess so.”

Fang Zhenting pointed to the leaderboard in the sky and said, “These three are all ranked well.”

“I’m paying attention to their results.”

Lu Tao said, “After this round, Bu Jing Yue ranked in the top 100, Tang Qingqing is firmly in the top 500, and Jiang Fan’s ranking has risen to the top 5,000!”

“This should pretty much be the final ranking of the actual battle test.” Wang Tianyi said.

“According to the practice of previous years, the fifth round can basically reveal the true level of each candidate.”

Lu Tao said, “This year’s fourth round is the difficulty of the fifth round in previous years, and even a little more difficult, and this ranking is almost equal to the final ranking.”

.....

“Bu Jing Yue is in the top 100! Tang Qingqing is in the top five hundred, Jiang Fan is in the top five thousand! This year’s Jiangcheng results are very good!”

In City Lord’s Mansion Hall, a?planet master smiled.

Although the other candidates were eliminated,?the smile on the face of the city lord of Jiangcheng was even stronger!

Since the previous high school entrance examinations, this was Jiangcheng's best performance.

All three were squeezed into the top 5,000!

Two of them were even in the top 500!

It could almost be compared with those cities with better college entrance examination scores!

This also made many people pay more attention to the city of Jiangcheng!

"According to the results of this wave."

A planet master said, "The third race of Bu Jing Yue has not appeared yet, and its strength is definitely in the top 100, or even the top 50!"

"And Tang Qingqing should have a good hope of getting the top 500!"

"As for Jiang Fan, his position in the top 5,000. It's stable. Let's see if he can get closer and strive for a higher ranking!"

Everyone else nodded.

All of the planet masters were experienced.

From the battle of the fourth wave, they could basically see the true level of each candidate!

"The next wave will be much better."

An admissions teacher smiled faintly and said, "The fourth wave has brought out almost the most powerful being in a high-level civilization, like the dark elves, so the next wave is bound to be a super civilization!"

"According to the nature of this examiner, it must be a super civilization and it could be the more powerful kind in a super civilization!"

"Super civilization, in previous years' actual combat assessment, was regarded as the last level, and in this year it will come out in the fifth wave!"

"Super civilizations are so much more powerful than advanced civilizations, it's something to behold!"

"The remaining 30,000 candidates in this wave are estimated to be eliminated by 70%."

Chapter 257: Bombing the Foundation Establishment! Fight against three thousand immortal cultivators!

"Let's see what kind of super civilization it is, if it's that kind of terrible, 80% are possible!"

"....."

The planet masters were discussing it enthusiastically.

At most, the one from earlier was only advanced civilization, however?among all civilizations, advanced civilizations were not in the minority either?and super civilizations were recognized as a clearly higher grade!

Their quantity was also relatively smaller!

Even for these powerful planet masters here, not many of them built super civilizations either!

.....

“In this wave, Jiang Fan and Tang Qingqing’s performance is not bad.”

Inside the conference room of the No. 7 middle school, all the school leaders and teachers had smiles on their faces!

In fact, two students of the No. 7 middle school were able to come to this point.

It had already exceeded the previous goal!

The geniuses of No. 7 middle school were?all eliminated in the second wave in previous years!

None of them were able to rank in the top 100,000 in the province.

“Is the race created by Jiang Fan musketeers? I heard from the people in the group, it’s not ordinary people!”

Teacher Liu Yue was browsing the communicator.

She couldn’t help saying.

“Musketeers?”

Both Tong Zhensheng and Qiu Yunfei were slightly stunned.

“It’s really possible. This?is completely unheard of. It?seems to be a completely new race.”

Qiu Yunfei laughed and said, “So it’s not an ordinary civilization. No?wonder I said how they were so powerful, in the great competition, they could turn over the Xiu Ling clan of Bu Jing Yue!”

Only Tong Zhensheng did not speak.

He remembered it very well.

At that time, when the awakening of the planet ended, Jiang Fan told him himself that it was an ordinary civilization!

“That’s not right. There’s no way this little guy would lie to me.”

Tong Zhensheng thought with some puzzlement, “He told me about this musketeer, but I don’t think that things are that simple.”

“I can see that Jiang Fan’s musketeers are not strong individually, but they have a large number of tens of thousands of people. The number of musketeers makes up for the disadvantages of the individual.” Qiu Yunfei said.

“The earlier is fine, but the next wave will be a little more difficult!”

A school leader said with some concern.

“In the next wave.....”

Qiu Yunfei paused for a moment, and a hint of gravity flashed in his eyes as he said, “If there’s nothing unexpected, it’s bound to be a super civilization!”

“Among the remaining students, there are a lot of them that aren’t super civilizations!”

“No matter what super civilization it is, it is bound to be more than a bit stronger than the Dark Elves!”

“This wave will be a real watershed, and those at the bottom of the Heavenly Pride List are estimated to be eliminated by a large margin!”

“Bu Jing Yue and Tang Qing Qing should be stable.”

Teacher Liu Yue nodded. “It depends on Jiang Fan’s musketeer.”

“I think this super civilization is not too strong!”

.....

Within the examination room, only 30,000 candidates were left.

Their hearts were more or less nervous.

None of the super civilizations were weak!

“Attention all candidates, the fifth wave of transcendental invasion is about to start in one minute. Please prepare yourself!” The ethereal prompt sounded as scheduled.

“Is it a super civilization in this wave?”

Jiang Fan had some expectations in his heart.

Since Awakening the Planet, the only super civilization the Great Desolate Army faced was the Xiu Ling Clan of Bu Jing Yue!

Even if it was a planetary conquest, trying to find a super civilization planet was also very difficult to do!

One minute passed quickly.

As the countdown ended, the planetary channel was opened again.

A somewhat ethereal aura came through.

In the next moment, people in white clothes, holding swords in their hands, appeared in the channel!

Looking through binoculars, the Great Desolate Army could see clearly that this transcendent race was almost identical to their ordinary people.

It was just that their aura, temperament, skin, etc were slightly different!

Claptrap.....

These white-clothed men swiftly poured over.

Looking at the number of people, there were almost two or three thousand of them!

After several thousand white people came in, the channel was not closed!

According to the regulations of the actual combat examination, after the Transcendental Invasion started, the planet channel was closed.

Naturally, it was also to prevent the escape of these transcendent races.

An amazing and incomparable aura appeared.

Immediately after that, a tall and beautiful woman floated out of the passage!

The white clouds fluttered, and the temperament was dusty!

She was like a fairy!

The eyes of all the people in the Great Desolate Army who were watching, widened!

.....

“Immortal cultivator?”

“This wave actually dispatched the Immortal Cultivation Civilization!”

“I’m really not disappointed. This examiner is indeed ruthless enough!”

“This is only the fifth wave. In previous years, the immortal cultivators would even be placed in the last wave!”

“Haha, it’s interesting. Look at the number of immortal cultivators there are!”

“Three thousand, that’s three thousand cultivators! Not many candidates can handle that.”

“Under three thousand cultivators, examinees who are not of a super civilization can basically choose to quit!”

Looking at these three thousand people in white, the planet masters were abuzz!

They were also not expecting it.

This was only the fifth wave.

They couldn’t believe that the immortal cultivators were deployed!

Immortal civilization was almost the most famous of all the super civilizations!

It was also the most common!

It was unquestionably powerful!

.....

“Why are there immortal cultivators?”

In the conference room of the No. 7 middle school, a group of school leaders and teachers all frowned.

“Looking at the breath of these immortal cultivators, it should be the cultivation method of Foundation Establishment and Nascent Soul.” A teacher said.

“That’s right, this is also the most conventional and mature cultivation method.” Qiu Yunfei nodded.

Among immortal civilizations, there were also many divisions.

Chapter 258: Bombing the Foundation Establishment! Fight against three thousand immortal cultivators!

Each one had its own cultivation style and rank realm.

One of the most common was to build the foundation of the firstborn but there were also other ways of practicing.

Like the Xiu Ling clan of Bu Jing Yue.

It was not the Foundation Establishment.

“With these three thousand Qi refining stage cultivators, every candidate will have to suffer.”

Qiu Yunfei couldn’t help but shake his head!

.....

“It’s an immortal cultivator!”

On top of the city walls, the Great Desolate Army also recognized it.

Although they had not faced the immortal cultivators who built the foundation of the Nascent Soul’s cultivation method but in a planetary conquest, from the information recorded by other transcendental races, they knew that there was such an existence!

“Immortal cultivators are also essentially human, but they absorb transcendent energy like aura and thus cultivate into individuals of great strength!”

A scholar said.

“Although there is no special ability like those elves, their frontal strength is stronger, and it is more difficult for us! Don’t be careless.”

The old group leader said in a deep voice.

“Don’t be careless and don’t belittle yourself!”

Chang Yu Chun also spoke at this time, sweeping his eyes around the Great Desolate Army and said, “This battle is a true head-to-head duel!”

“There are no tricks to play!”

At the same time, the three thousand white-clothed cultivators below also lined up in formation.

They were not densely packed together.

They spread out!

This made many generals on the city wall frown slightly!

The killing power of the shells was greatly reduced separately!

“Surprisingly, it’s a bunch of ordinary people?”

The fairy-like female cultivator behind the three thousand white-clothed cultivators?was looking at the Great Desolate Army on the city walls.

Her eyes could not help but flash a hint of contempt!

Immortal cultivators were naturally high and mighty.

“All out, quick solution!” the female cultivator shouted.

Immediately, three thousand white-clothed cultivators carried?swords.

They marched fast towards the walls!

Their speed was amazingly fast.

Even to the naked eye, all they could see was a trail of afterimages!

“Is this the immortal cultivator?”

The faces of the Great Desolate Army became solemn!

These immortals were even faster than the big-headed fish?people?in the water before!

“Open fire! Intercept these immortal cultivators 400 meters away.”

This time, the commanding general was Han Xin!

His voice was not too loud, but there was great confidence and calmness!

Artillery fired in unison.

The bullets rained down, overwhelmingly towards the three thousand cultivators who were rushing over!

Boom!

A cannonball fell.

It just fell?next to a white-clothed cultivator.

The cultivator in white realized that something was wrong.

He immediately dodged towards one side?but he?was still shocked by the aftermath of the explosion!

“What quick reflexes and agility!”

Seeing this scene of the white-clothed cultivator dodging the shells, all of the scholars frowned slightly!

It was not just the ability to detect a crisis in advance.

After that, they could also immediately dodge.

That agility and speed was also incomparable to all the races before!

“It’s a pity that the padding tactic has been used in the previous wave.”

One scholar said with some emotion.

If there was still a large yield of gunpowder underneath, no matter how fast these cultivators in white responded, it was also difficult to escape death!

Each of the three thousand cultivators had an amazing individual strength, but under the constant barrage of shells, they were still a good blocker!

In these bombings, several cultivators were shaken by the aftermath and were injured.

But it didn’t look like a serious injury!

As for the bullets, they blocked all of them?with the sword in their hand!

There was no need to dodge at all.

They directly wield a long sword.

It was dancing frantically up and down.

It could block a lot of bullets, but the white-clothed cultivators were also on alert.

They did not dare to continue to attack!

“These individual cultivators are indeed powerful. They are scattered and open again. They can’t be dealt with using conventional tactics!”

Han Xin watched all this and pondered for a moment.

Then he ordered, “Reduce the firepower and lure these immortal cultivators over!”

“Destroy them with heavy firepower under the city walls!”

The Great Desolate Army immediately obeyed the order.

The firepower was suddenly reduced!

The other generals next to him nodded slightly.

This was a very good move by Han Xin.

Although these three thousand cultivators were powerful,?they couldn’t fly yet!

They could just jump far away?and spread out so much.

On the contrary, it was not easy to deal with.

However, after coming under the walls, it would be better to attack!

“These weird weapons are getting weaker? Are they running out of stock?”

Watching the firepower of the Great Desolate Army weaken, the fairy cultivator thought for a moment, and then ordered: “Quickly, rush to the opposite city wall at full speed, and destroy these ordinary people!”

Under her command, three thousand cultivators charged up again!

In a few moments, they crossed the 400 meter cordon at that amazing speed.

After that they soon came under the city walls.

Looking at the thirty-meter-high wall, the white-clothed cultivator’s face showed no concern.

A male cultivator sneered.

Then kicked back!

It actually rushed up directly along the wall!

Other cultivators behind him were also climbing!

They were climbing as silky smooth as a gecko. [Gecko is a kind of lizard]

Many soldiers of the Great Desolate Army were shocked!

“Full fire!”

Han Xin immediately ordered.

His eyes remained calm.

As the words fell, ten thousand guns of the soldiers of the Great Desolate Army fired!

They aimed at the cultivators who were climbing up!

Bang! Bang! Bang!

The cultivators who rushed up kept fending off the bullets with their swords but that was tens of thousands of bullets.

It was okay at first.

Later, it was completely unstoppable.

Puff! Puff! Puff!.....

With a few bursts of sound, several cultivators were hit by the bullets!

With a bang, they fell to the ground.

The long sword of the male cultivator was knocked down by a bullet and he was shot directly into a hedgehog!

The rest of the cultivators were shocked!

For the first time, they looked squarely at these ordinary people in front of them!

Chapter 259: Powerful individual super weapon! Capturing the fairy alive!

It was not just as simple as a million bullets!

Along with the bullets, there were hand-thrown bullets!

One by one, they were desperately blasting down!

Boom! Boom! Boom

The explosions kept ringing out.

The white-clothed cultivator waved his long sword in his hand and a ray of light was drawn.

A shield opened up around everyone.

It blocked the blast of these hand-thrown bullets.

“Is it an energy shield?”

Watching this scene, a scholar asked.

“It should be an energy shield.”

Another scholar nodded and said: “This should be a means of immortal cultivators. It can use spiritual energy to form a shield, so as to protect itself and resist external attacks!”

“But.....”

This scholar aggravated his tone and said, “The energy shield is the same as Dou Qi shield. Although it is more powerful, it also needs to consume energy!”

“Once the energy is depleted, this shield will also be broken!”

There was no need for Han Xin to order because all the soldiers of the Great Desolate Army knew that hand thrown bullets and bullets could not be stopped!

A frenzy of bullets and hand-thrown bullets were poured in by 10,000 soldiers.

The hand-thrown bullets were transported to the city wall in baskets.

Boom!

There was a loud bang.

A white-clothed cultivator was bombarded by a succession of bullets and hand-thrown bullets.

Not long after, his energy shield was broken and he was blown away.

Although the physical strength of cultivators was much higher than that of ordinary people, with such powerful explosions, he was still seriously injured!

How much energy could a cultivator of the Qi refining stage have?

It didn't take long.

Several other white-robed cultivators were blown up and flipped their swords!

“Retreat!”

A white-clothed cultivator shouted.

His face was aflame with rage.

These ordinary people actually beat their immortal cultivators, the Son of Destiny, like this.

It could be said that they were disgraced!

These cultivators were not stupid either.

Seeing that things could not be done, they retreated immediately!

However, how could Han Xin let them retreat so easily?

He immediately shouted: "The artillery full blast! Add spare artillery!"

On the city walls, there were one hundred artillery pieces.

After dealing with the dark elves earlier, one hundred more had been added!

They were densely packed!

There were two hundred artillery pieces!

At this time, all of them were shooting!

The shells were raining down!

All of them blasted towards the back of the three thousand cultivators!

Han Xin knew that these white-clothed cultivators were very fast, therefore, the method of early interception was adopted!

Let's see how else you can hide?

Countless shells fell down.

It was emitting deafening explosive sounds.

Rocks, dirt, grass clippings, etc. on the ground rose to the sky!

The dust was flying!

The smoke was thick!

Three thousand white-clothed cultivators who saw this scene were dumbfounded!

How else could they run back?

A handsome male cultivator who didn't believe in evil gave a cold sneer.

After that, he rushed forward with his sword.

In this group of cultivators, the strength of this handsome male cultivator could be said to be one of the best.

However, under the indiscriminate bombardment of hundreds of artillery shells, it was still useless.

The energy shield on his body was not able to support him for a few seconds.

It just dissipated and he was blown to pieces by several successive shells!

Not even a complete corpse was preserved.

“Special Forces stand by!”

Han Xin ordered.

At that time, he saw that the individual combat power of these white-clothed cultivators was indeed very high.

They were very fast!

Their response was also very quick!

There was also an energy shield and exquisite swordsmanship!

But there was no long-range attack!

No matter how strong their close combat was, the Great Desolate Army was not afraid either, unless it was a long-range attacking opponent like the dark elves.

Three thousand soldiers of the special force were ready.

They were ready to leave the city in pursuit!

Suddenly, a cracking sound came from the air!

With the whoosh, the crowd was slightly startled.

They hastily turned their heads to look.

A sword light appeared in the air.

It flew over as fast as lightning.

It was coming directly towards the wall!

With a boom, the artillery was shattered directly!

The power of the explosion even affected the two artillery pieces next to it!

.....

“Flying swords!?”

“These cultivators actually have flying swords?”

“Foundation Establishment stage? That female cultivator is at the Foundation Establishment stage!”

In the hall of the City Lord’s Mansion, when the crowd saw this scene, they all spoke out, and were very surprised.

Their eyes were fixed on the rear, on that one fairy-like female cultivator!

The crowd also knew a lot about immortal civilization.

Flying sword spells required at least a cultivator who was above the Foundation Establishment stage to be able to use it!

And the Foundation Establishment stage, that was the realm only available on the level 2 Immortal Cultivation Planet!

This should never have happened in the fifth wave!

If placed in previous years, there were Foundation Establishment stage immortal cultivators in the last hurdle!

“That’s not true.”

A planet master pointed at the female cultivator and said, “Look at the fluctuations on her body. It’s obvious that she was not stable enough when she launched her flying sword. This is not a true Foundation Establishment stage!”

“Pseudo Foundation Establishment!”

The crowd reacted.

“There is Pseudo Foundation Establishment in immortal cultivation civilization.”

An old man nodded and said, “After the tenth layer of Qi refinement, some geniuses do not directly build the foundation, but they continue to refine Qi until the fifteenth level of Qi refining! Their cultivation and strength far exceeds that of other Qi refining stages. It is even able to compare with the Foundation Establishment stage!”

“Such a cultivator on the fifteenth level of Qi refining is also called a Pseudo Foundation Establishment!”

“Pseudo Foundation Establishment is not really Foundation Establishment after all, there is still a difference in strength.”

A planet master said: “But it should not be underestimated, relying on that flying sword, in the level 1 planet, there should be no enemy!”

“In terms of individual strength, there are basically no rivals.”

Tang Yushu nodded and said, “If these candidates want to defeat this female cultivator at the fifteenth level of Qi refinement, I guess they’ll have to rely on the combined efforts of the various races!”

“This wave is troublesome.”

Another admissions teacher said, “It’s not just three thousand cultivators, there’s also a pseudo Foundation Establishment that can control a flying sword!”

“How else can this be fought?”

“I told you that the examiner in this wave would be even more ruthless, and it is!”

.....

On the side of the Great Desolate Army, seeing the one cannon that was broken by the flying sword, their faces became a little ugly.

This was still the first time the Great Desolate Army had had its artillery shot down since the Glory Conquest!

Chapter 260: Powerful individual super weapon! Capturing the fairy alive!

“Don’t stay frozen.”

Han Xin, however, remained calm and shouted loudly, “Study small chopping, and immediately calculate the power and speed of the flying sword just now?”

“Others get everything ready!”

“This female immortal cultivator is the strongest single individual we’ve encountered so far!”

“Move immediately to use tactics against powerful individuals!”

With Han Xin’s one command, the scene suddenly calmed down.

The others all followed his orders!

There was a single powerful individual!

Although it was surprising, it was also in the preparation of the Great Desolate Army!

There were some specific tactics.

“The speed of this flying sword is very fast.”

A team of one hundred scholars immediately calculated the result and reported, “It’s stronger than the Elf Queen’s meteor bow from earlier! It’s more powerful!”

“It is estimated that the shield can only resist once!”

“In addition, the key thing is that this flying sword can turn in the air, and the female cultivator on the opposite side can control it from a long distance.”

“It’s not easy to target!”

Han Xin nodded slightly.

His gaze was directed at the female cultivator, who was a kilometer away!

With this distance, rifles were not able to hit her.

The shells were also difficult to hit, but the other side was able to cast a flying sword from such a distance!

“Observe all the movements of that female cultivator. I don’t believe that she can use her flying sword without restriction.”

Han Xin shouted.

However, in the next moment, the sword light appeared again.

The flying sword came again!

It rushed directly to an artillery gun on the edge of the city wall.

The fairy-like female cultivator was naturally not stupid.

It was obvious at a glance that these artillery pieces were the biggest threat to the three thousand cultivators in white!

She chose to use this flying sword to remove all these artillery?first!

There was a loud boom!

This gun was equally shattered?and this flying sword was spinning in the air in a circle.

It circled back!

Its speed was very fast.

Even if it was hit by bullets, there was no impact at all.

Even if the shield was prepared on the artillery, it didn't help much!

The flying sword was able to turn.

It was attacking from a direction with no shield, shattering the artillery!

As the crowd of the Great Desolate Army watched with their eyes wide open, this flying sword flew over and over again?and shattered five artillery pieces in succession.

Even with such a huge loss, Han Xin was not anxious at all.

Instead, he looked in the direction of the research team and asked, "Did you observe anything?"

"This female cultivator seems to have some unstable aura on her body when she casts her flying sword."

A scholar spoke up and said, "In addition, while casting, you must give your full attention and cannot be distracted!"

"It's just that, it seems that the aura consumption is less than we thought!"

"Good!"

Han Xin nodded slightly?and immediately said: "Continue to delay the time. The?artillery is protected as much as possible with shields, but no casualties are allowed, and the loss of artillery will be lost."

After a pause, he asked again, "Is the special team ready?"

"Ready!"

A voice came through.

"Okay."

A hint of coldness flashed in Han Xin's eyes, and he said, "In one minute, kill this female cultivator!"

.....

At the same time, on other candidates' planets, it was almost the same as entering the city on the side of the Great Desolate Army.

After initially fending off the attack of three thousand cultivators, the female cultivator attacked.

A flying sword flew out!

It was unstoppable!

In Tang Qingqing's legion of magicians, the oldest magician would be dead by now, if not for a magician next to him who helped him block the attack!

Because of the presence of flying swords, the legions of magic could not chant comfortably at all to cast a powerful spell!

It could only be done quickly.

One by one, they hid behind the Dou Qi warriors, casting their own magic to fight!

On the planet of Bu Jing Yue, the powerful defensive power of the spirit tree people was completely useless.

The flying sword of a female cultivator could completely avoid the spirit tree people, going straight to the Xiu Ling people behind!

Boom!

A powerful Xiu Ling clan member was directly pierced by this flying sword!

It was killed on the spot!

On each candidate's planet, it was all the same!

Basically, no Transcendent could stop this extremely strong individual female cultivator!

They were completely suppressed to fight.

For the big guys in the City Lord's Mansion, it was very enjoyable!

"In this wave, each and every one of the geniuses must show their cards, otherwise they will never pass."

An admissions teacher smiled.

Everyone could tell that none of them were a match for this female cultivator!

If it continued like this, there would be a lot of casualties!

"Mr. Tang, your sister looks like she can't stand it anymore, and it is estimated that she will also use her trump card."

An admissions teacher looked at Tang Yushu and said.

Tang Yushu frowned slightly at this time.

He had naturally prepared the bottom card for Tang Qingqing!

It still cost a small fortune to get it.

However, it was originally intended to be used at least in the sixth wave.

Who would have expected that this fifth wave would be so difficult!

A powerful cultivator of pseudo-foundation actually came out!

With the battle power of Tang Qingqing on the field.

If she did not use the bottom card.

It was indeed difficult to pass!

Even if she passed, it was estimated that there would be heavy losses!

“Fortunately, other geniuses also have to use their trump cards!”

Tang Yushu comforted himself.

“Hmm? Tang Qingqing is starting to use her bottom card!”

An admissions teacher shouted.

Immediately, everyone’s eyes turned to Tang Qingqing’s projection.

In this spacious hall of the city lord’s residence, it was able to project dozens of candidates’ images at the same time.

Each planet master could choose the candidates they wanted to watch.

At this time, all of them gathered on the planet of Tang Qingqing, only to see?Tang Qingqing’s magic army.

The white-robed old man took out a magic scroll engraved with mysterious symbols.

His lips moved slightly.

He started chanting the incantation!

“It seems to be very powerful. This?scroll should be very expensive, right?”

“The level 1 planet can’t produce such scrolls. If you want to seal these scrolls and send them to the planet, the price is really not small.”

All the?planet masters recognized it.

Many people couldn’t help but look at Tang Yushu with a little more admiration?for the sake of Tang Qingqing.

Tang Yushu really didn’t hesitate to sacrifice everything!

When the incantation was finished.

The white-robed old man tossed the magic scroll in his hand.

After that, there was a?loud bang!

A lightning bolt suddenly fell from the sky!

It went straight at the female cultivator who was casting her flying sword!

The female cultivator was startled.

She subconsciously tried to dodge.
