

One Planet 271

Chapter 271: Endless Mode! The most terrifying attack!

“It’s the last wave.”

For the first time, a ray of light appeared in Jiang Fan’s eyes.

It was absolutely impossible for this college entrance examination champion to give up!

It was necessary to get the best possible ranking to be the champion.

This twenty-minute period seemed especially long for the remaining 1,500 or so candidates.

Everyone was nervous like never before!

All of these people were top geniuses at the top of the Heavenly Pride list!

Their hearts were full of hope for a super-first-class university!

The total enrollment quota of the super-first-class universities in Dongyang Province was only 1,080 people.

Excluding the five hundred and eighty places received by the top students of five hundred and eighty cities.

There were only 500 spots left for these geniuses to compete for!

In addition, even if they were the top students in each city.

There were still many that had not been identified!

For example, Jiangcheng.

Now there were Jiang Fan, Tang Qingqing and Bu Jing Yue who were still competing!

It was not just for the places at the top universities.

There were also rankings!

Super first-class institutions were also divided among strong and weak.

The better the score, the higher the ranking.

They would be able to get priority for admission to the better super-first-class university, not to mention the name of the provincial champion!

That was the dream of every genius!

Especially this year, which was recognized as one of the most terrifying in history!

Other geniuses were climbing to the top of the college entrance examination!

What an honor!

Fifteen minutes of time finally passed by and the ethereal prompt sounded:

“The seventh and final wave of the actual combat assessment will officially begin in five minutes. Please get ready.”

“The final wave is in an endless mode with a score of 100!”

“Endless Mode!”

Hearing this word, all the candidates’ hearts trembled!

Everyone was sure enough that it was the hardest test but it was not unexpected because there were not many methods in the last wave of the college entrance examination in previous years!

Endless mode was the hardest one of them!

According to the difficulty of the first six waves, everyone guessed that in the last wave this method would be used.

“In the endless mode, after every ten minutes, the strength of the invading transcending species will increase by one level, and it will continue!”

“The score evaluation method is: for every ten minutes, one extra point is added, and if it is less than ten minutes, it is zero!”

“Since it is an endless mode, please do what you can. Don’t give up lightly and don’t insist blindly, and I wish all the candidates can get an ideal result!”

A prompt sounded.

Everyone knew this long before the college entrance examination, but still they listened very seriously!

The more you listen, the higher the tension in your heart.

As in this year, this wave would be the easiest wave to open the score among the top talents!

There were a total of seven waves of 400 points in the actual combat assessment!

In previous years the first six waves, each wave was 50 points and the last wave was 100 points!

“Here we go, here we go, it’s really endless mode!”

“Haha, endless terror is here! I came here this year just to watch this mode, and sure enough... it didn’t disappoint me!”

“The most terrifying and desperate mode has emerged, and this year’s examiner is really ruthless to the extreme!”

“Endless mode? Even if you are the most talented genius, under this mode, you will have to give birth to despair and cry out in pain!”

“Especially those four super demonic geniuses. The first six waves weren’t very challenging for them, but in this last wave..... We’ll have to wait and see. All of their trump cards must be revealed!”

“This year’s all?rounds were?so difficult, yet there are still more than 1,500 people left. With so many people in the final round, it’s already very lively! Who knows, there might even be a few hidden Big Black Horses!”

In City Lord’s Mansion Hall, the planet masters were talking unprecedentedly one after one.

This was what they were watching this year.....

It was the most anticipated wave!

Why was this said to be the last wave!

It was because?the endless mode was used?to make sure that no candidate would pass!

Later, the invading transcendental race would become more and more difficult, and its strength would become stronger and stronger!

In addition, it would?go on endlessly!

It was up to each candidate to hold on for as long as they could!

In previous years, even the top geniuses couldn’t survive it!

“Here it comes, endless mode.”

In the conference room of the No. 7 middle school, the leaders and teachers also took a deep breath.

Their hearts were?also a little nervous!

This wave was the most difficult.

In this wave, there was no need to choose the front projection.

Even if there were only Jiang Fan, Bu Jing Yue and Tang Qingqing in the entire Jiangcheng.

Natural selection focused on these three!.

They were all anxiously waiting for the final round to begin!

Finally, five minutes later, the ethereal prompt sounded again:

“The last round of Transcendental Invasion begins. This?round is endless mode. Please?pay attention!”

The prompt repeated again, because, in previous years, there were many candidates.

There were still bottom cards in the final wave.

All?the candidates were making the final preparations!

The same goes for the Great Desolate Army.

As?it was an endless mode,?Jiang Fan gave Yan instructions!

On top of the city walls, Yan had already done the deployment.

“In this wave,?we will face an endless supply of enemies without interruption.”

Yan looked at the crowd with an expression of unprecedented seriousness.

“Endless enemies!”

Hearing these words, everyone else’s face changed!

“All we have to do is defend ourselves against the enemy invasion for as long as we can.”

Yan continued: “So now we have to change the previous deployment!”

“General Xu, the five of you.”

Yan looked at the five men, Xu Tiande, Le Yi, Han Qinhu, Lu Sun and Han Xin, and said, “Each divide the 10,000-man army into five brigades, and each take one brigade to defend on the city walls!”

“After every half hour, take a turn!”

“Is there a problem?”

“No problem!”

“.....”

All five of them responded in a loud voice.

Of course, this wasn’t what Yan thought.

Rather, it was negotiated by a group of strategists.

“General Chang, you are the commander-in-chief.”

Yan looked at Chang Yu Chun and said: “In addition, prepare one or two support teams, if any place is in danger later, be ready to support at any time!”

“Yes!”

Chapter 272: Endless Mode! The most terrifying attack!

Chang Yu Chun also responded solemnly!

He was also aware that this wave would be an unprecedented challenge for the Great Desolate Army!

In the first six waves, many waves were somewhat tough but the Great Desolate Army did not have any casualties and in this last wave, Chang Yu Chun could imagine that if they wanted to last as long as possible, there must be a price to pay!

“Logistics all keep up, all weapons.”

Yan shouted loudly, “Everything that we have prepared in the past years, move out!”

“This wave is our true moment of glory!”

As the words fell, all the soldiers in the Great Desolate Army were quickly busy!

In the planet passage entrance, with the end of the countdown, a figure started to appear.

Claptrap.....

A sharp and violent breaking sound came from the air.

Everyone saw?a black mass of large bugs coming from the entrance of the passage!

There were all sorts of bugs!

Some looked like cockroaches, some looked like praying mantis, some looked like fleas, some looked like ants, some looked like caterpillars.....

But their body size was much bigger than the normal bugs!

It was close to one meter long!

Their speed was very fast.

Once they come through the passage.

They were just as desperate as.....

The madness was pouring in!

“Insects! Surprisingly, it’s the insects!”

“Crazy! This year’s endless mode actually used insects for the test?”

“The examiner is really bloody, and he has sent the most terrifying insects in the endless mode!”

“The elimination of the geniuses in this wave is estimated to be earlier than we expected.”

Seeing this dense mass of giant bugs appear!

The planet masters couldn’t help but make a fuss!

Everyone knew that!

Insects!

Among countless super civilizations.....

It could be ranked in the most powerful ones!

The most frightening thing about them was that.....

That unparalleled reproductive ability!

The bugs were pile after pile!

If give it enough time.

That was the endless sea of insects!

In history.

In the battle of various planet masters.

Other super civilizations had suffered from the insect hordes!

Killing endlessly!

It would get stronger!

This was a race that makes people disgusted!

“It turned out to be insects!”

Tang Yushu’s expression changed, and he couldn’t help but sigh, “It’s probably going to be difficult for Qingqing now!”

On top of the city walls.

Look at this dense, crazy influx of giant bugs!

Everyone’s face.....

All were slightly changed!

That was too much of a goddamn number!

It was not the same as the previous six waves.

There was an endless stream of giant insects coming out of the passage in this wave!

There was no end in sight at all!

This was another meaning of endless mode!

It was not just that the wave was endless.

The number of invading races was also continuing!

And at this time.

Jiang Fan also went down.

He informed Yan about the characteristics of the insects.

Yan also had a change of expression.

After taking a deep breath, she looked at everyone and said, “These are Insect races, and they are almost the most terrifying among the thousands of transcendent races!”

Hearing this.

Everyone’s faces became even more nervous!

“We need to fine-tune our tactics.”

Yan continued: “The bullets are to be replaced with ordinary bullets, and alloy bullets will come up when there is a need below!”

Despite all the years of preparation.

Alloy bullets piled up in the warehouse!

However.....

Facing this endless mode.

Yan had no confidence in her heart!

If the alloy bullets were all depleted earlier.

Then it would be too late to regret!

At the same time.

Faced with the crazy influx of giant bug armies.

The Great Desolate Army's counterattack had also begun!

Three hundred artillery pieces!

Densely occupying all the usable places of the city wall!

On the surrounding hills.

Previously, because it was steeper.

Chang Yu Chun did not dare to take the risk.

No artillery was placed.

But now.....

There were also dozens of them!

On the second wall at the back!

They had also brought up numerous Sky-Running Cannons that could be fired from a long distance!

Such artillery were less in number!

Their killing power was a little weaker!

But it was still useful against giant bugs!

One could say!

All the cannons that the Great Desolate Army could use were brought out!

One shell flew out.

Falling inside the army of bugs.

One after another explosion sounded continuously!

Bang! Bang! Bang!

10,000 soldiers of the Great Desolate Army with rifles.

Fired like crazy!

Their bullets broke through the air.

Rushing towards these giant bugs!

Because there were too many bugs.

It almost filled the open space beyond the walls!

So.....

Every single shell!

Every shot.

Almost never failed!

All of them hit these giant bugs!

Although, the giant bugs rushing to the front were very big.

But their defense was not strong! One shot by a bullet and you're dead.

The shells were even more deadly.

One goes down.

It could directly blow up a dozen!

With such a powerful firepower.

The black army of insects was pressed to death 500 meters away!

No inch of progress!

Its just that.....

No one had a look of relief on their face!

For these bugs were endless.

A group died.

And new ones kept coming in behind them!

The firepower of the Great Desolate Army didn't dare to stop for a moment!

"These bugs are a bit bigger, but they can be described as enlarged versions of ordinary bugs, nothing special otherwise."

A group of scholars had observed.

And soon came to this conclusion!

"Endless invasion ah, it's useless to say this, ants bite the elephant!" A scholar shook his head and lamented, "Even if we find their weaknesses, but....."

"It's not much use if their number is endless!"

The other scholars were silent.

They knew this very well!

In this wave!

These scholars were of little use!

Relying on the terrifying firepower of the Great Desolate Army!

See how long they could last!

And Jiang Fan.

He was also sitting on the chair.
Watching this battle against the Insects army with all his attention!
Under the ferocious firepower of the Great Desolate Army!
Not a single bug could step over the cordon!
Threats to the security of the city walls.
Although, the first batch of bugs was big.
But their strength was still weak!
It was just a living target!
Ten minutes passed quickly!
Jiang Fan then saw that.
Behind the planet passage.
There was a slight change in the aura.
There were even taller figures which appeared!
These were large bugs with a body length of about one meter and a half!
There were all kinds!
They were faster!
With more agility!
Once they passed through the passage.
They just lunged madly towards the city wall!
Closely followed by.
It was all these bigger bugs!
As the prompt said.
After every ten minutes.
The invading insects would get stronger!
On top of the city walls.

Chapter 273: Endless Mode! The most terrifying attack!

The five generals led a force of two thousand each?into?a tightly guarded area!
They were separately responsible for the defense of each territory!
Everyone's face was filled with unprecedented solemnity!
Basically, they didn't have to order it.
They just?kept firing and firing.

Fire and fire again!

Boom! Boom! Boom!

The battlefield was filled with the sound of artillery shelling.

The insects were blown apart one after another, and their juice was sent flying!

The ground was full of corpses of insects.

The thick green liquid flowing out of their body splattered everywhere?under such terrifying firepower.

The second and third waves of bugs failed to cross the cordon!

In a tense and suffocating atmosphere, half an hour went by in a flash!

The Great Desolate Army on the city walls began to take turns!

Although it was only a short half hour,?the hands of each soldier were about to be broken!

That constant pull?of the trigger, let their thumbs tremble slightly!

In Jiang Fan's examination room, in the position ahead, the scores on top of the real-time leaderboard were constantly being updated!

As long as the candidates last every additional ten minutes, one point would be automatically added to the score!

Claptrap.....

The fourth wave of bugs passed through the planet passage again.

It was flooding out!

This time it was naturally even bigger!

They?were?stronger?and were still very crazy!

In this wave, some students couldn't take it anymore!

They opted out!

They were?eliminated!

"Aiya, I'm still a little weaker. I barely passed the last wave with the bottom cards given by my uncle. I can't survive this round."

A candidate from a city that was about the same as Jiangcheng?was watching that the transcendent race he built was submerged by the army of bugs.

He could only choose to give up?but there were no regrets.

After all, he did his best.

In addition, the most critical thing was that this candidate had already locked the city's college entrance examination champion in advance!

The place in the super-first-class universities was secured!

On the planets of other candidates.

All of them were resisting with all their strength!

In this endless mode, there was no time for them to relax and rest.

It was all about holding on!

The Xiu Ling clan of Bu Jing Yue was relatively relaxed.

The five tall spirit tree people she nurtured stood at the forefront!

Although the number of bugs was very high,?against the astonishing defensive power of the spirit tree people, it was similar to scratching an itch.

There was no damage at all!

They couldn't get past the spirit tree people at all.

Bu Jing Yue chose a narrow valley?just like Tang Qingqing.

Each of the other demonic geniuses was not a fool either.

It had long been deployed in a place similar to a valley with a defensive position!

There were not many bugs to face at one time!

That's what it takes to keep going!

The length, width and height of the walls of the Great Desolate Army were also built after careful calculations.

If it was too big.

There would be too many enemies to face at the same time.

If it was too small, the output of firepower would not be enough!

There were many reasons for this.

Over time, the offensive of the six waves of the insect?army gradually passed!

One hour had passed!

Jiang Fan took a look at the leaderboard.

Over a hundred people got eliminated in just the first?hour!

There was no chance for them to continue?the competition!

In the seventh wave's ten minutes, from the end of the passage, a?more powerful aura came!

Bugs of even larger size appeared.

It was different from the previous ones.

These bugs had even darker bodies!

Their body size was bigger.

But not too big.

They looked much thinner and leaner!

“Insect soldiers!”

“The insect soldiers are coming!”

“Sure enough, the insect soldiers came out so soon, and it is estimated that more candidates will be eliminated next!”

The planet masters were not surprised!

From the experience of the previous years, after every hour, there would be a big jump in the strength of the invading transcendent!

The bugs from earlier were big, but they were all kinds of mongrels!

That was the existence of the bottom of the insect race!

It was equivalent to the unorganized ordinary people among human beings.

There were just a bunch of rabble!

These new bugs that came in were trained bug soldiers!

It was the equivalent of a soldier among humans!

Their combat power was not comparable to the mongrels just now!

It was also obvious to the crowd of the Great Desolate Army.

These new bugs that came in were no more rushing in haphazardly!

They were divided into lines.

Then charged again!

Their speed and agility were one level higher than the bugs in the previous round!

The shells of the Great Desolate Army kept falling.

These insect soldiers were still blown away.

However, everyone found out that these bug soldiers would make a dodging motion!

They would also observe the direction of the incoming shells, choosing a more favorable route forward!

But under the firepower of the Great Desolate Army, not a single insect soldier was able to rush within 400 meters!

The ones in front were all blown away and exploded!

Most of them died under artillery fire!

However, this was just the first round of bug soldiers.

Within this second hour, all that will appear would be bug soldiers.

In addition, each wave was stronger than the last one!

“Ah, no.”

One candidate wasn't able to hold off these armies of insect soldiers!

The transcendent race that was created almost half of them were exterminated!

He could only opt out!

The increase in the strength of the bugs made many candidates gradually unable to resist..... They constantly reluctantly chose to quit!

This second hour was not even halfway through, and almost 300 people were eliminated directly!

All of them were the top 5,000 geniuses on the Heavenly Pride List!

They were the demons with the greatest fame in each city!

“Let's see if Jiang Fan and Tang Qingqing can make it through this second hour!”

Inside the conference room of the No. 7 middle school, school leaders and teachers were all unprecedentedly nervous!

Hang in there!

The top five hundred were very promising!

If they couldn't make it through, it was basically announced that they had withdrawn from the competition for the place of a super-first-class university!!

To the surprise of everyone, in the second hour's first thirty minutes, nearly 300 people were eliminated, but in the latter thirty minutes, less than 50 people were eliminated!

This surprised the leaders and teachers of No. 7 Middle School!

The clock was ticking fast and furiously!

In the last wave of bug soldiers, each candidate struggled to make it through!

In the next moment, the third hour arrived!

Even more powerful bug had appeared!!

Chapter 274: Crazy Elimination! The most terrifying trump card is revealed! Tang Qingqing is out!

When the third hour arrived, there were only a little over a thousand candidates left in the entire Dongyang Province.

There were a total of hundreds of millions of candidates!

Only one in a million supreme geniuses had the ability to continue to exist on this stage!

Each and every one of them was a super genius in the list of heavenly pride!

.

They were the top demons that others had to look up to on normal days who were very talented and had an amazing background!

None of them was weak!

To get this far, there was no such thing as a fluke!

Everyone knew that.

The remaining geniuses were also desperate!

They were throwing one bottom card after another.....

They kept?throwing them out!

At the end of the second hour, the third hour immediately followed!

A more powerful aura appeared in the passage?and a huge figure appeared at the entrance of the passage!

This was another giant bug.

What made?it strange was that?the size of insects did not increase.

However, there was the extra steep armor on these bugs!

Everyone knew that this hour was hard!

“The bugs are coming.....”

“In this hour, there will be all insect generals, and after every ten minutes, it will gradually increase. At the beginning, it will be ordinary insect generals, followed by elite insect generals, advanced insect generals and so on! If you can pass this wave, basically, the place for the super-first-class universities is in your hands!”

“.....”

Each of the big shots had a calm face.

From the first two hours of the insect army’s attack, they had already guessed what kind of bugs would appear in this hour!

In the conference room of the No. 7 middle school, the expressions of every teacher were?also tense!

This hour would be crucial!

Although it was a bug in general, their number was not bad at all.

It was still dense.

Blackness!

After checking out the situation on the side of the Great Desolate Army at the entrance of the passage,?it was a quick rush over!

It was faster and more agile than previous bug soldiers!

One point stronger!

Boom! Boom! Boom!

There was no need to give orders.

The Great Desolate Army directly opened fire!

Hundreds of artillery pieces were fired frantically!

There was a non-stop shooting!

The shells formed a dense net of shells in the air!

Almost the entire sky was covered!

It finally fell within the army of insect generals, causing a burst of explosions!

Boom!

A cannonball landed in the center of a dozen insect generals.

It directly killed four or five of them on the spot!

The others were seriously injured!

The killing power was still good, but the gloom on the faces of the people on the city walls was getting thicker and thicker!

They discovered that the resistance of these bug generals was obviously enhanced compared to the previous bugs!

“It’s the armor on these bugs!”

After observing for a while, a scholar said, “The biggest difference between these new bugs that came in and those earlier is just a layer of gray-black armor!”

“By relying on this layer of armor, it can effectively cushion the attack of the artillery!”

Bang! Bang! Bang!

Bullets were also fired wildly.

One bullet hit a bug, but the bug didn’t die on the spot.

It was still crawling ahead!

“The bullets can’t kill these bugs directly anymore.”

A scholar frowned and said, “I guess it will take more rounds to make it work!”

As compared to the first round of bugs, the defense of these insect generals was greatly enhanced!

But under the firepower of the Great Desolate Army, the army of insect generals that rushed up still got knocked to the ground over and over again!

They were blown apart by a cannonball!

The first ten minutes passed quickly.

Despite that, the army of bug generals was covered in armor, but it still couldn’t stop the continuous bombardment of shells and bullets!

They were wiped out five hundred meters away.

The second ten minutes came immediately afterwards!

It was the bug general again?and this time, the strength of the insects was increased again.

There was no increase in body size.

However the gray and black armor covering their body continued to thicken and grow!

A thick layer on the back!

Bang!

A soldier of the Great Desolate Army discovered with one shot?that the bullets which hit this thick layer of armor went through?but only through armor.

It was unable to pose a threat to the body below!

“Attention all, work together, in small teams of two or three, to kill a bug!”

Chang Yu Chun ordered loudly!

Seeing this scene, the Great Desolate Army immediately adjusted its tactics slightly.

After several years of training and actual combat, the Great Desolate Army had become very skillful in cooperating and understanding each other.

They followed the order at once!

Five or six rounds were fired in unison.

It aimed for a bug general together!

Kill this bug general and set fire to it!

There was no such thing as wasted bullets.

As compared to free shooting, it was one step more efficient!

The army of insect generals surged wildly!

Wave after wave, they continued to rush in from the planet passage!

The second ten minutes.

The third ten minutes.

All the way to the sixth ten minutes, the insect generals who entered were stronger and stronger.

The most obvious was the gray and black armor on the body.

It became thicker and thicker!

In the end, five or six soldiers from the Great Desolate Army had to work together.

Only then could they break through these armors?to finish them off!

The third hour had ended.

Some soldiers of the Great Desolate Army couldn't help but take a breath!

Every?soldier's hands in the Great Desolate Army felt like they were about to break!

However, they were not able to rest at all.

After the end of the army of insect generals, the fourth hour began!

A new powerful insect race made its appearance.

Inside the passage, there was an aura that was more powerful than the insect general!

At this time, everyone also discovered that the third hour's difficulty was much higher than before, but the number of candidates who were eliminated was not much!

Only about a hundred were eliminated!

At this time, inside all examination rooms, there were less than a thousand candidates left, but to last through the third hour of the army of bug generals, many of these candidates used their trump cards at the bottom of the box!

After that, new giant bugs appeared.

Their shape was no different from that of a bug, but their armor obviously covered a larger area!

Their aura was sharper!

Most obviously, their mouths had extremely sharp teeth!

It was a little unnerving!

If this was to be pounced on and take a bite, no one would dare to imagine this scene!

"It's the Insect Commander, huh?"

"The Insect Commander is stronger than the Insect General, but not much. In this hour, there shouldn't be too many people eliminated!"

"This fourth hour, it is estimated that up to a hundred people will be eliminated."

"Why don't you take a look? What kind of candidates are these? All of them are at least of our level or even stronger! There are also many powerful trump cards, how could they be easily eliminated?"

"Yeah, these people are the monsters who have the most hope of competing for places in the super-first-class universities, and the families and forces behind them will definitely spare no expense!"

"....."

Chapter 275: Crazy Elimination! The most terrifying trump card is revealed! Tang Qingqing is out!

It was not just these planet masters, even a group of candidates saw that there were no changes in the rankings.

They all knew that the competition this year was extremely scary!

The perception of super-first-class universities and first-class universities was too great!

It could be said to be a qualitative leap.

Every candidate had to give his or her all for this!

Even for an orphan with a small background like Jiang Fan.

There were also many big forces that would invest!

The resources provided would not be worse than other candidates!

If the investment was successful and this candidate was admitted to a super-first-class university, these forces would make a lot of money!

On the battlefield, countless shells and bullets poured down, blasting these even more powerful insect marshals to pieces!

All intercepted at 500 meters away!

Jiang Fan, who was silently observing, looked at the situation on the planet, especially the tiredness on the face of the Great Desert Army.

It was also clear that, even if it was a bug marshal, its individual strength was not actually strong!

However, there were too many of them, letting every soldier dare not relax for a second!

It was basically like fingers on the trigger kept snapping and snapping again!

The first ten minutes.

The second ten minutes.

The sixth ten minutes.

Slowly and painstakingly!

The Great Desolate Army deadly pinned the insect commander's army to a distance of nearly 600 meters away!

In other examination rooms, one by one, the candidates were also out of full strength!

In this fourth hour, nearly 100 candidates were eliminated!

In the examination, there were only about 800 candidates left!

"The fifth hour is difficult! There will be a qualitative improvement in the difficulty of the previous four hours!"

"I underestimated these candidates earlier. I didn't expect that more than 800 people would be able to survive, but in the fifth hour, if there is no accident, there will be brand new bugs, and at least one or two hundred people will have to be eliminated. If you can get a place in a super-first-class university, you can see it in the fifth hour!"

The army of bug marshals was not able to excite many planet masters because candidates who passed were still the majority!

The clock ticked down to the last second.

The aura at the end of the passage changed again!

It was completely different than before!

It was not just more powerful; it was special too!

Claptrap.....

A huge pile of huge figures instantly rushed out.

This was a giant bug that looked different from all the previous bugs!

Their body length was over two meters!

Not only did they have thick gray and black armor, there was also the establishment of unparalleled teeth!

The fierce aura of their body was especially intimidating!

In the next moment, behind these large insects, one after another, a figure suddenly flew in from mid-air!

The buzzing sound was loud!

Surprisingly, it was a swarm of large bugs capable of flight!

Seeing this scene, the faces of the crowd of the Great Desolate Army on top of the city walls changed!

Even though the number of flying bugs was smaller than the number of crawling ones on the ground, the threat was much greater!

Chang Yuchun took a deep breath and immediately said: "Half of the soldiers, adjust the angle, and shoot these flying insects down. They must not be allowed to come within a range of 400 meters!"

To hit the big bugs flying in the air, relying on artillery was not an option.

It mainly depended on the rifle, but as compared to the ground, the range in the air was too big!

The main thing was that these flying insects were naturally much faster than the ground crawling insects!

Rifles had extremely poor accuracy!

"Get on the new weapons."

Seeing that the rifles were too inefficient, Chang Yu Chun clenched his fist for a moment.

Finally, he had no choice but to give this order!

This was another powerful bottom card left by the Great Desolate Army!

There were also some limitations, so it couldn't be used regularly!

Previously, it was all about holding up with artillery and rifles and the lethality of this new weapon far exceeded the artillery!

One other candidate's planet, seeing the army of flying insects sweeping in, everyone turned pale!

Some of them were quick to respond.

They hurriedly threw out their last bottom card!

If they let the army of flying insects rush over, it would be extremely difficult to defend when the time comes.

“Sure enough, the advanced insects appeared in the fifth hour!”

“Not only the advanced insects, but even the flying insects came out, this is the most deadly!”

“My previous words were still too conservative. After this hour, it would be lucky if they did not get eliminated by 300!”

“.....”

In City Lord’s Mansion Hall, the voices of the planet masters began to grow louder.

From the moment they saw the flying insects, they just knew that within this hour, there would be many talented people who would be eliminated from the game!

“This hour is difficult, Bu Jing Yue should be able to survive it. Let’s focus on Tang Qingqing and Jiang Fan.”

In the Conference Room of No. 7 middle school, the school leaders and teachers also reached the most difficult time.

It was like an unprecedented anxiety before the results were about to be announced!

They were also experienced.

Of course, they knew that survival of the attack of these flying insects would determine the ownership of the spot in the super-first-class universities!

The projected screen was placed directly on Jiang Fan and Tang Qingqing’s planet!

“Qingqing, go for it.”

Tang Yushu stared at Tang Qingqing’s projection screen because it was Tang Yushu’s sister.

This time, on the projection in the middle of the City Lord’s Hall, Tang Qingqing’s planet was also placed in the most conspicuous position!

Everyone knew that Tang Qingqing had reached the most difficult time!

Those extremely fast flying insects kept pouring out of the passage!

Not long after, they were so densely packed that it almost filled the entire sky, and they were still rushing towards the magician’s position frantically!

Tang Qingqing’s magician army at this time was unable to use large-scale magic against these bugs.

There was no need for that either.

They were all ordinary spells!

Beside these legions of magicians, there were still a lot of magic crystals piled up!

Magic crystals were minerals that could only be produced on at least a Level 3 magic planet!

In the shortest possible time, quickly replenish the magic of the magician!

Naturally, this was also a resource provided by Tang Yushu!

Every single magician cast a spell.

The majority was still the fireball technique!

Against these flying insects, flames worked the best, but it was different from before.

Flying insects were in the air and fireball spells were extremely difficult to hit.

In addition, once hit, it could only kill one flying insect at most!

If it was on the ground and one fireball spell smashed down, it could burn all the bugs within a few meters around, blowing out the crater.

It could also effectively stop the bug attack!

In the air, the effect was greatly reduced!

Chapter 276: Crazy Elimination! The most terrifying trump card is revealed! Tang Qingqing is out!

A legion of magicians of over 2,000 were blocking the army of flying insects in the air.

At the same time, there were more advanced bugs on the ground, but they had not stopped moving forward.

They were still madly rushing over!

The magic legion could only be divided into a part of the magicians to stop the army of bugs on the ground.

The blocking force in the air was not enough!

It was almost like losing sight of something!

Soon, the first flying insect rushed to the front and dived into the defensive formation of Dou Qi warriors!

The strength of flying insects was not exactly high!

It was easily beheaded by a Dou Qi warrior, but from the army of flying insects behind, there were bugs passing through the blockage of the Magic Legion constantly.

They were constantly rushing over!

Their number was increasing more and more.

The Dou Qi warriors were experiencing unprecedented pressure!

They were killing crazily!

Although the strength of flying insects was average, it was still able to cause a shock to the Dou Qi warriors!

The Dou Qi warriors were attacked by the black army of flying insects.

The Dou Qi energy shield on their body was gradually weakening!

Soon, the energy of the front-most Dou Qi warriors was depleted.

The Dou Qi armor was broken.

A flying insect saw the right timing?and gnawed on him with a hard bite!

“Ahh!”

This warrior let out a scream of dismay.

His right arm was actually directly torn off!

Another flying insect flew down, swallowing this warrior’s head in one bite!

Gradually, more and more warriors were running out of Dou Qi energy.

Their figures were drowned by the flying insects that kept coming!

Tang Qingqing gritted her teeth.

She used the last card:

Three powerful magic scrolls!

She gave them to the oldest magician to cast.

After three loud sounds, a?huge area was emptied in front of their position.

There were bug carcasses everywhere!

There were countless advanced bugs that have been blown up!

Even the lower flying insects in the air were affected!

However, the army of bugs in the back was not affected at all!

They kept pouncing crazily!

That was another scary thing about bugs!

They simply did not have the emotions of awe and fear.

After seeing the target, what came?next was a crazy attack!

The army of flying insects in the sky also continued to surge forward!

Tang Qingqing had no other cards.

Even the magic crystals that replenish?the magic power?were all pretty much consumed!

She could only watch.....

The Dou Qi energy of the Dou Qi warriors were exhausted?and overwhelmed by an army of bugs!

Many of the magicians in the back ran out of magic, becoming an ordinary person!

“Qingqing, hang in there.”

Tang Yushu clenched his hands.

His expression was unprecedentedly tense!

Tang Qingqing's situation was not very good, but the other candidates were also no better!

Claptrap.....

Swarms of bugs rushed over one after another!

The remaining Dou Qi warriors had completely ignored the magician army behind them.

The flying insects in the sky were not fools. They directly ignored the Dou Qi warriors and pounced straight at the magicians behind!

"Ahh!"

A magician was bitten by a flying insect and let out a scream of misery!

Immediately after that, more and more flying insects were swooping in.

More and more magicians were being bitten because the physique of a magician was no different from that of an ordinary person.

Under such an attack, at least they were seriously injured!

Some of them even died on the spot!

Looking at the situation on her own planet, Tang Qingqing watched the ranking change on the leaderboard.

She bit her lips tightly while watching!

On the leaderboard, once a candidate got eliminated from the competition, his name went gray!

That was an hour of flying bug hordes!

It made a lot of candidates suffer.

The pace of elimination was significantly faster than earlier!

"Hold on for another ten minutes, hold on for another ten minutes, and I should be able to make it to the top 600!"

"Hold on, great magicians and Dou Qi warriors, hold on!"

Looking at the gray rankings on the leaderboard, Tang Qingqing kept cheering up the legion of magicians and Dou Qi warriors because the candidates who were eliminated were the top students of each city!

Basically, the top six hundred were guaranteed to get into a super-first-class university!

But at this time, the legions of magicians and Dou Qi warriors were completely unable to listen to Tang Qingqing's slogans.

Each one of them was fighting with all their might against the army of bugs!

The screams could be heard one after another.

They kept coming!

There were warriors and magicians who were constantly falling under the sharp teeth of the bugs!

It was well known that once they let the army of bugs get into the formation; it was completely unstoppable!

The same goes for Tang Qingqing's army of magicians and warriors!

After a few minutes of support, it was a complete breakdown!

On the ground, there were no magicians and warriors to be seen at all.

They were covered by a black pile of bugs all over!

It was shocking to see!

"Give up, Qingqing, give up!"

Seeing this, Tang Yushu could only sigh helplessly.

The other planet masters also paid unprecedented attention.

At times like these, each candidate came to the toughest choice!

If they support ten minutes more, maybe because of this point, they might surpass the other candidates and win a place in a super-first-class university.

But it was also possible that not only would they not last, they might even let the transcendent race created by themselves suffer heavy losses!

This happened in the past during the college entrance exam where you couldn't get a place.

The species on the planet died out!

A level 1 planet was still quite weak!

Once too many transcendent species died, it would cause irreversible ecological regression!

That's a lot more to lose than not getting into a super-first-class university!

So, it was a tough decision!

It was up to each candidate to make their own choices on the spot!

This was also one of the most favorite scenes of planet masters!

In the end, Tang Qingqing did not insist.

Her lips were almost bitten.

She still opted out!

If she didn't quit, the magicians and warriors she built were going to die!

Qingqing's ranking finally settled on:

705th place!

There was no chance for a super-first-class university!

It was just a tiny difference away!

The candidate above her had one more point than her!

One could say that if she just held on a little longer, there was a high probability that this spot would be taken!

“Ew!”

Seeing Tang Qingqing being eliminated, everyone in No. 7 Middle School couldn't help but sigh!

What a pity!

That was too regretful!

It was so close, but the crowd didn't blame Tang Qingqing.

After all, if she really wanted to keep going, the legions of magicians and Dou Qi warriors would probably die out!

There was silence in the conference room!

Their first hope was gone.

“Look at Jiang Fan, Jiang Fan has not been eliminated yet.” Teacher Liu Yue said.

“Right, Jiang Fan hasn't been eliminated yet!”

The eyes of other leaders and teachers lit up again!!

Chapter 277: Finals! Huge bugs! The strongest trump card!

On the list, Tang Qingqing's name had grayed out.

Only seven hundred and four candidates remained to continue the battle, but it didn't take long for another group of people to fall!

In the conference room of the No. 7 middle school.

Everyone looked at the projection on Bu Jing Yue's planet.

It was somewhat helpless.

Bu Jing Yue relied on the strong defensive power of the Spirit Tree people to confront these flying insects.

Surprisingly, the Xu Ling clan could hide in the spirit tree people, thus being safe and sound!

“Let's see Jiang Fan's!”

On the projection in the middle.

It displayed the situation of Jiang Fan's planet!

The Great Desolate Army was in full swing. They were firing crazily because there were too many flying insects in the sky!

Yan directly ordered the support team to join.

A total of 13,000 rifles kept firing!

Most of them went up into the air and on the ground!

This time, the Great Desolate Army used the kerosene technique!

Barrel after barrel of kerosene were thrown to the ground.

Especially in the big pit hole that was dissolved with Scarlet Lion's blood!

It was full of kerosene at this point!

A few shells went down.

It burned swiftly!

A blazing fire temporarily stopped the army of ground bugs that were rushing over!

These bugs were very crazy!

Even in front of a fire, they still pounced bravely!

They burned into a charcoal of insects!

With the sound of crackling, countless advanced bugs turned into ashes!

In the air, there was a strong barbecue smell!

There were still too many flying insects in the sky!

Rifles simply could not effectively form a fully airtight line of defense!

There were still quite a few flying insects.

Even after being knocked by bullets, they quickly rushed towards the city wall!

“Flamethrower!”

Chang Yu Chun immediately shouted.

The soldiers of the Great Desolate Army who had already been prepared, immediately fired a flamethrower!

This was specially prepared.

It was a massive fire-breathing device used against aerial creatures like flying insects!

Hoo hoo hoo!

A big mouthful of flame spewed out!

It covered a large area outside the city walls.

The flying insect's wings were directly submerged by the flames!

Followed by, each one of them fell down at the foot of the city wall!

With these flamethrower guns, even if a flying insect came close to the city walls, it was still directly burnt to death!

Looking at the big fire-breathing gun that suddenly came out of nowhere, a group of leaders and teachers of the No. 7 middle school were slightly relieved!

“This musketeer race created by Jiang Fan is really peculiar. There are not only muskets, but also such destructive firearms!”

A school leader finally showed a smile on his face.

“And that powerful artillery, there are quite a few of them.” Another teacher picked up, “I heard it was awakened by a more powerful artilleryman!”

As?Jiang Fan was now temporarily ranked first, the?specific situation of Jiang Fan’s building of civilization was also noticed by all parties!

At this time, not many would believe that Jiang Fan built an ordinary civilization!

All of them thought that?it was a whole new transcendent civilization!

“With these firearms, in the fifth hour, Jiang Fan should be stable.”

Qiu Yunfei said with a sigh of relief.

“There are now nearly seven hundred remaining candidates, including nearly one hundred of the top students from various cities.”

Teacher Liu Yue said, “That means, if you want to get into a super-first-class university, it’s more stable to strive for the top 600!”

“Let’s hope so.”

In the last 10 minutes of the fifth hour, the flying insects were?strengthened again.

But it still could not break through the double defense of bullets and flamethrowers!

Time passed by, the seventh hour arrived.

At this time, there were only about six hundred and fifty people left?in the entire mourning field of the province!

The one ranked at the top was still Jiang Fan!

His total score reached 686!

So far, he got all the points he could get!

From the passage, a?new batch of bugs appeared!

Surprisingly, they were also flying insects!

Unlike previous flying insects, these looked like bee species!

On their tail, there was actually a long and sharp tail thorn!

“Surprisingly, these bugs can deal long range damage! This round might be hard for Jiang Fan!”

Seeing these giant bee species, in City Lord’s Mansion Hall, the big shots were shaking their heads!

The focus of attention here is naturally the only two remaining candidates of Jiangcheng: Jiang Fan and Bu Jing Yue!

Bu Jing Yue had spirit tree people?who were very resistant to beatings.

There was no problem for now.

Jiang Fan was the focus of attention!

Especially now that he only needed to hold up a little longer than 50 more candidates!

It would basically secure a place in a super-first-class university!

This way, Jiangcheng would get two places in super-first-class universities this year.

It would be the highest record!

On the battlefield, these giant bees were separated by hundreds of meters.

Whoosh!

They were launching the tail spike from his tail.

They were pouncing straight at the Great Desolate Army on the city walls!

There was no need for Chang Yu Chun to order.

One by one, the soldiers had placed their shields beside their heads!

Dang! Dang! Dang!

These tail spikes landed densely on top of the alloy shield.

A dense sound rang out.

Hearing these intense sounds, everyone knew that the attack of these tail spines was definitely not small!

After the first round of shooting, blackened marks had appeared on the top side!

That was just the first round and there would be more and more giant bees later!

It also meant that the tail thorn attack that the Great Desolate Army would face was going to get more and more terrifying!

Chapter 278: Finals! Huge bugs! The strongest trump card!

“All snipers go up and shoot down these giant bees!” Chang Yu Chun ordered immediately.

There were one thousand snipers in the Great Desolate Army!

And two thousand was half-assed level!

But at this time.

They could only use all of them!

“These giant bees will pause in place when shooting at long range, and this is the best time to snipe!”

A scholar analyzed by the side!

And it was indeed true!

With such a big body.

Plus it was in the air.

Only seven or eight hundred meters away!

It was easy for snipers to deal with them.

Whoosh! Whoosh! Whoosh!

They shoot the bullets!

Hitting these giant bees straight on!

With almost a hundred hits!

Each of the Giant Bee.....

It fell from the sky on the spot!

Flying insects compared to bugs on the ground.

Although they could fly.

But their weaknesses were also obvious.

There was no thick gray and black armor!

Otherwise.....

It was going to be a major headache!

“Hmm? Jiang Fan’s musketeers actually have this kind of tactics! These seems..... to be no ordinary muskets?”

It was quite a sight to see.

Many planet masters widened their eyes!

Previously, the scene where Jiang Fan finally resolved the female cultivator.

A lot of people don’t notice.

“Indeed, it is not an ordinary musket.”

Another planet master nodded and pointed to the projection, “These muskets are even bigger and not quite the same shape, and they seem..... to be more accurate!”

“Their range is even longer.”

An old man next to Jiangcheng City Lord added: “Ordinary muskets only have a range of about six hundred meters, while these special muskets are able to reach over a thousand meters!”

“This should be the elite of the musketeers!”

“What awakened was an elite musket!”

Each planet master had a vicious vision.

Basically, with a glance.....

They could see the characteristics of Jiang Fan's musketeer!

It's just that.

What they didn't know was this.

These weren't even musketeers!

So.....

He just used the traditional characteristics of transcendent civilization to cover it!

What sniper was regarded as a musketeer who had awakened an elite musket!

"Jiang Fan actually still has these special musketeers hidden!"

The people in No. 7 Middle School were obviously a lot more excited!

"This sixth hour should be stable for him."

A teacher was a little nervous, but also a little expectant.

"It's not easy to say, it's not easy to say....."

Qiu Yunfei, however, immediately shook his head.

He did not dare to set up this flag!

In previous years, those who set up flags died miserably!

Although there were many giant bees in the air.

But because space was needed to launch the tail spike.

So, at most there were only a few hundred giant bees attacking at a time!

The rest had to wait in line!

This gave the Great Desolate Army's snipers..... an excellent sniper opportunity!

Plus there was shield's blocking!

The giant bees looked very tricky at first.

But later.

It was just a live target!

Seeing this.

Jiang Fan also breathed a sigh of relief!

He was also a little nervous while watching this endless mode!

Every next round of bugs was even harder!

In addition.....

Jiang Fan hoped that the Great Desolate Army would have no loss!

This was also the inner expectation of every planet master.

In the sixth hour.

Every ten minutes were still the same as the previous ones.

Flying insects, giant bees, and advanced bugs on the ground were all getting stronger!

But it still posed no threat to the Great Desolate Army!

After every ten minutes.

Many students would be eliminated!

This was an attack from the air!

For other candidates.

It was a nightmare!

Especially the tail attack of giant bees!

It could be blocked from the front!

But they could only be passively beaten in the back!

Most candidates didn't have the long-range striking ability of the Great Desolate Army!

When the sixth ten minutes passed.

Jiang Fan took a look at the leaderboard.

There were already only.....

Less than six hundred people!

Exactly five hundred and fifty people!

In this sixth hour.

Nearly 100 people were eliminated!

So far!

The enrollment quota of 1,080 super-first-class universities in the province..... was settled!

On the Jiangcheng side.

Jiang Fan and Bu Jing Yue!

Both of them got one!

It was the best result in the history of Jiangcheng!

"Congratulations, congratulations."

"Congratulations to the City Lord, congratulations to the City Lord."

In City Lord's Mansion Hall.

One by one, they all congratulated the Lord of Jiangcheng City!

"This Jiang Fan and Bu Jing Yue have great merits, so Chenglan wants to reward them." An old man next to Jiangcheng's City Lord said with a smile.

“A reward? That’s for sure.”

The city lord of Jiangcheng was also quite happy.

The smile on his face didn’t stop!

This was a rare moment in his life!

And in the Conference Room of the No. 7 middle school.

When they saw that Jiang Fan had completely secured a place in a super-first-class university.

Everyone was.....

Cheered up!

In the history of No. 7 Middle School!

This was the first student to get a place in a super-first-class university!

It would be forever engraved in the history of the No. 7 middle school.

Principal Tong Zhensheng and Qiu Yunfei hugged each other.

There was a trace of moisture in their eyes!

He was a few years away from retirement.

But in these last few sessions.

He was able to witness such a scene with his own eyes!

He was very excited.

After a short period of excitement.

The crowd also quieted down.

They continued to pay attention to Jiang Fan and Bu Jing Yue’s planet!

For the people of the No. 7 Middle School now.

Any other geniuses and demons were not important.

There was another thought in their minds.

That was.....

Can they get the overall top student’s position in the Jiangcheng entrance exam?

Chapter 279: Finals! Huge bugs! The strongest trump card!

In the history of the No. 7 Middle School, there had never been an overall top student in the college entrance examination.

They were thinking about it, but they all knew how difficult it was.

There was an extremely powerful opponent:

Bu Jing Yue!

“Bu Jing Yue’s five spirit tree people are too much of a BUG, and.....” Teacher Liu Yue raised her voice and said, “Have you noticed that Bu Jing Yue still hasn’t revealed her third transcendent species until now.”

Hearing this, the expressions of the others also became a little solemn.

The news that Bu Jing Yue obtained the Heart of the Star?was?spread?throughout the province.

Everyone knew that Bu Jing Yue had created an extremely powerful third transcendent race, but by the sixth hour, Tang Qingqing was eliminated?and it was still not revealed yet!

Formally, Jiang Fan’s Great Desolate Army seemed much tougher!

Bu Jing Yue relied on the five spirit tree people.

So, it was a little easier!

However, the crowd still saw hope?because?Jiang Fan’s total score was now ahead of Bu Jing Yue.

There was?a gap of twenty-three points!

“Fortunately, Jiang Fan played very well on the first day, with full marks in all three subjects. Although this Bu Jing Yue may be stronger, it is not very easy to catch up!”

A teacher said.

23 points meant that?she needed to last four hours longer than Jiang Fan.

Only then could she overtake him!

“Everything is possible. It?just depends on the third transcendent species of Bu Jing Yue.”

Qiu Yunfei,?Tong Zhensheng and others were not careless.

In previous years, after finally revealing the bottom card, there were few who had completed the ultimate overtaking!

“Is there a quota for a super-first-class wind university?”

Seeing the remaining candidates on the leaderboard, Jiang Fan also realized this,?but he didn’t care at all.

What he wanted was?the position of the overall top student in the entire Dongyang Province!

He turned his attention to the Blue Star.

In the seventh hour, from the planet passage, once again another terrifying aura came out!

A new kind of bug appeared!

In the sky, there were still flying insects and giant bees from before!

On the ground, there was an extra behemoth with a body size of more than ten meters!

So far, it?was the largest insect that had ever appeared!

At the first sight of this superbug, everyone's face changed slightly, but then, everyone found that this behemoth looked very strong?but its speed was unusually slow!

It was crawling like a snail!

Just when the crowd wanted to breathe a sigh of relief, these giant bugs suddenly bulged up.

Subsequently, a?shell-like unidentified object was shot out of?their body.

The object darted and pounced.

Not on the city walls. Instead, it landed on the ground three hundred meters away from the city walls!

This had already crossed that big pothole!

“All hands on deck!”

Chang Yu Chun immediately raised his vigilance.

At this time, the crowd just realized?that it was not some kind of cannonball.

It was a bug bomb consisting of a small bug less than half a meter!

The whole insect bomb was dense!

Countless small bugs like this were in there!

Claptrap.....

As soon as the insect bomb touched the ground, these small bugs immediately scattered in all directions!

They were fast!

They were rapidly lunging towards the walls!

The super bugs in the back?fired this bug bomb one after another!

The bugs were catapulted to the ground at close range.

Similarly, as the bug bomb landed, the small bugs dispersed immediately!

The Great Desolate Army's artillery shells and bullets couldn't stop it at all!

After only a few insect bombs,?the ground outside the city walls was already covered with dense small bugs!

It looked mind numbing?and the super-large giant insects behind them kept coming in from the passage.

Their number was increasing.

More and more insect bombs were being fired!

Small bugs could run fast.

Faster than all the bugs they had seen before!

Bang! Bang! Bang!

Bullets shot down quickly, hitting these small bugs.

These small bugs were weak.

There was no gray and black armor.

One bullet could directly kill them!

But there were too many of them.

Their agility was also amazing!

The main thing was that they were too close to the city walls.

Their landing point was only 300 meters away!

After a while, it came within two hundred meters!

A small bug, through a round of bullets, actually scampered under the city wall!

It was climbing the city wall.

He opened his mouth with sharp teeth and bit it!

Whimper, whimper.....

That frosty hoarse voice kept ringing.

The crowd saw with binoculars.

Under the bite of this small worm, the wall was actually quickly bitten out of a small hole!

This scene caused everyone to panic!

Bang!

There was the sound of a gunshot.

Han Xin fired the shot himself to get rid of this little bug, but more small bugs rushed over quickly!

Not to mention Jiang Fan here.

On the side of Bu Jing Yue, spiritual tree people with amazing defensive power were also bitten by these small bugs!

“This round is really hard!”

Seeing this scene, everyone in the No. 7 middle school was frowning!

“I wonder if Jiang Fan has any more cards. If not, I’m afraid he won’t last this hour!”

One of the teachers frowned.

“Let’s see, I don’t think so.”

Another teacher sighed.

On top of the city walls, witnessing that the city walls could be bitten by small insects.

Chang Yu Chun also frowned slightly, then made a decision and said loudly: “The artillery bombards the super-large bugs behind, as for these small bugs..... use the speed gun!”

That's right.

The Great Desolate Army was going to use another bottom card!

It was also developed in the past few years.

It was one of the most lethal weapons!!

**Chapter 280: Clearing the field! The most powerful killing device for exterminating insects!
The shock of all the planet masters**

Speed gun was the super powerful weapon developed by the Great Desolate Army in the past few years!

After the invention of the automatic rifle, this was the idea of a scholar!

It was also known as the super-double version of the automatic rifle!

After this idea was presented, it was immediately recognized, and many scholars were interested in this.

A brand new group was created.

Soon, the speed gun was built.

Chang Yu Chun gave an order.

.

Logisticians who were already prepared brought a large rifle-shaped firearm, which was several times larger, to the wall!

The caliber of this speed gun was almost the same as a small gun!

The black hole looked very infiltrating!

Jiang Fan took a closer look.

This was similar to the heavy machine guns of his previous life!

The difference was that the Blue Star's unique star meteorite iron and vibranium, two magical metals, were used in it!

The performance and accuracy of the speed gun was on another level!

It was more powerful than the heavy machine gun in his previous life!

In addition, the caliber was bigger!

For this reason, a group of scholars also made a special supply of bullets for the speed gun!

There were ordinary bullets.

There were also alloy bullets!

As compared to the heavy machine gun of the previous life, one of the advantages of the speed gun was that even with continuous firing, the muzzle won't overheat either!

This was naturally the heat absorption effect of the Star Vibration alloy!

But there was a problem with that!

The technology of the speed gun was still just in the beginning.

As a result, there were not many speed guns created!

Currently, in the entire Grand Desolate Army, there were only over 100 units!

“It would have been enough if it wasn’t endless mode.”

Jiang Fan thought secretly.

Although the heavy machine gun in his previous life was not as powerful as the artillery, its lethality was much better!

It could be said that a big killer on the battlefield was the human reaper!

Generally speaking, if one was set up within one kilometer, the enemy would basically not be able to rush over!

At this moment, thirty units had been moved up to the top of the city walls.

It was evenly distributed in all locations!

.....

“Look, Bu Jing Yue has started to use the third race!”

Inside the conference room of the Mo. 7 middle school, one teacher said loudly.

The others also turned their attention at once to look at the projection of Bu Jing Yue.

On the planet of Bu Jing Yue, five giant spirit tree men weren’t able to resist the bite of these tiny bugs!

The Xu Ling clan did not have the firepower of the Great Desolate Army.

They couldn’t stop the attack of too many bugs.

Thousands of small bugs rushed over!

They were rushing to the feet of the spirit tree people.

They held the body of the tree and began to bite frantically!

Click!

Click!

Click!

That tiny, quick biting sound was dense and loud.

Whoever listened had goosebumps all over his body.

Not long after, everyone saw that the spirit tree man’s body had been bitten out of a small hole, connecting the dots!

If you let people with intensive phobia look at it.

It must be creepy!

“These little bugs are not strong, but their lethality is not weak.” A teacher said.

“The main thing is that these little bugs were thrown over, and the speed is fast, and they will soon be able to approach the positions of each transcendent. Their number is even more, and it is extremely difficult to guard against!”

The other teachers nodded.

The attack of the Xu Ling clan didn’t have much killing power against these small bugs.

After clearing up a group, another group would come up.

It was a steady stream!

Bu Jing Yue also seemed to know that it would continue like this.

Sooner or later, the spirit tree people would be chewed through by the small bugs!

Without hesitation, she immediately used the third transcendent species!

It was the same species that was built using the heart of the stars!

Claptrap.....

A cracking sound rang out!

Immediately after that, a flock of large light blue birds flew out from a valley behind.

These birds were over five meters long!

Their whole body was covered with an extremely rare light blue.

As they flapped their wings, there seemed to be a faint flash of lightning!

“Flying Thunderbird!”

“It’s a Flying Thunderbird, right? Bu Jing Yue actually built this transcendent species?!”

“Tsk, no wonder there are rumors that Bu Jing Yue’s goal is to be in the top ten! With such a terrifying species, the top ten is really very possible.”

See these light blue birds.

Every big shot was quite surprised by this!

Flying Thunderbirds!

It also belonged to a level 1 planet.

It was an extremely rare transcendent species!

On a level 1 planet, the species that could fly into the sky were basically invisible!

This air strike could be described as it was cheating!

“It turned out to be a flying thunderbird. It?seems like there will be no problem for Bu Jing Yue.”

People in the No. 7 middle school who saw this scene.

All of them sighed helplessly!

This was also too buggy.

Hundreds of flying thunderbirds came out once.

They flew straight into the sky!

They were flying higher than flying insects and giant bees!

Immediately after that, their wings slammed down!

In the sky, all of a sudden, there was a flash of lightning!

Crackling.

It hit hard at the small bugs on the ground!

There was a loud boom.

The ground was blasted directly!

These small bugs were split into pieces of black carbon in an instant!

Lightning was also transmitted through the body of the insects, electrocuting all the surrounding bugs!

Seeing this, the leaders and teachers of No. 7 Middle School sighed a little.

Originally, they were thinking.

If they could compete with Bu Jing Yue!

Who knew that flying thunderbirds would come out!

An existence that looked like it was hanging on.

Not only could they fly.

Their lethality was also very high.

The Great Desolate Army had set up 30 speed guns on the City Wall.

After taking terrain and consumption into account, only five units were deployed.

One unit every twenty meters!

That was?one for each legion!

Each was responsible for an area!

Near the entrance of the planet passage, more and more super big bugs were pouring out.

One by one, insect bombs were thrown over and over again!

Small bugs were swarming wildly!

Although the power of the artillery was great, its accuracy was not enough.
