

One Planet 281

Chapter 281: Clearing the field! The most powerful killing device for exterminating insects! The shock of all the planet masters

In addition, even if it was fired continuously, there was also an interval period.

The rate of fire of the rifle was not enough either!

“Speed guns, fire them up and blast the hell out of these little bugs.”

Chang Yu Chun took a deep breath and ordered loudly.

Seeing these small bugs, he also felt disgusted!

Each speed gun was operated by three people at the same time!

As the words fell, fire bursted out from the large-caliber muzzle of the speed gun.....

Tu! Tu! Tu!.....

Countless large-caliber bullets were fired from the muzzle!

The speed gun didn't care what the target was.

They?just kept shooting crazily!

With a super fast speed, countless bullets shot out in an instant!

Five speed guns fired at the same time!

It was covering all the areas outside the city walls..... all of them!

Puff! Puff! Puff!

A crazy influx of small bugs had just landed.

They were just trying to attack!

They were?blown to pieces by the speed gun!

Tu, Tu, Tu, Tu, Tu!!

In an instant, on the battlefield, there seemed to be only the sound of the roaring speed gun.

It was completely overpowering the limelight of artillery and rifles!

Even the scholars involved in the research and development of it?were also a little shocked while they were looking at the power of the speed gun.

This..... is really a big killer on the battlefield!

The artillery looked powerful?and its sound was great, but its effect was completely inferior to the speed gun!

Not to mention, there were only five on the city wall.

Even if there was only one, everyone also felt that such small bugs could not survive at all!

They were not close yet, but countless bullets directly shattered them!

They were pinned to death on the 200 meter limit with no further progress at all!

The flying insects in the sky were even weaker!

Although the technology of the speed gun was just in the beginning and a group of scholars had gone through several improvements, they could turn the gun around at will!

It was also a huge threat to the flying insects in the sky!

After a crazy sweep down, not a single flying insect could get close!

They were directly beaten into pieces!

All of them fell down!

Once the five speed guns were on the line, an astonishing scene appeared on the battlefield.....

A cannonball thrown at a super-sized bug was not as fast as the speed at which the speed gun could kill the bugs!

Once the densely packed small bugs hit the ground, they were just emptied straight away!

This kind of speed gun was even more powerful than the heavy machine gun in the previous world!

The rate of fire reached 2,000 bullets per minute and its range was up to three thousand meters away!

After blasting the small bugs to pieces, other bugs at greater distances were also affected by the aftereffects!

In a constant stream of bursts, within a kilometer, all of the bugs were cleared out!

On the ground, there were bug limbs and thick green liquid everywhere!

The bugs coming in were not stopping for a moment, but they couldn't pass at all.

Not a single one could set foot outside!

Ten thousand soldiers of the Great Desolate Army looked at each other.

They felt that after the speed gun was on the line; they seemed to be useless!

Everyone in the No. 7 Middle School who saw this scene was also stunned!

“Jiang Fan actually has such a bottom card!”

Teacher Liu Yue's eyes widened.

The leaders and teachers were also experienced.

They could naturally see that the speed gun didn't seem as powerful as the artillery, but its lethality was several times higher!

Especially in defensive battles against transcendent invasions, it was almost the existence of a King!

Regardless of the strike target and accuracy, a full-range sweep was all it took!

Under that terrifying shooting speed, no bugs could hide!

“This should be..... a rare musketeer!”

One of the leaders speculated.

The crowd still thought that Jiang Fan had awakened a transcendent civilization.

What he created was the Musketeer, a transcendent race that had never been seen before and classified according to the general transcendental level.

Rifles were treated as normal level musketeers!

Sniper rifles were treated as elite musketeers!

Now the speed gun was treated as a rare musketeer!

“This little guy is really hiding one set after another.” Qiu Yunfei said with a smile.

“This seventh hour..... is stable!”

One school leader said.

No one else objected!

Once the rare grade musketeer was out, it was indeed crushing!

The army of bugs simply couldn't get through.

They were not even close yet and were taken out by a rare-grade musket!

Time went by little by little!

Since the five speed guns went into battle, the Great Desolate Army clearly felt a sudden drop in pressure!

A group of scholars and generals were also able to breathe a bit of relief, but Jiang Fan also knew that the reason why they were only using the speed gun now was because the speed gun technology was just in the beginning!

One speed gun could not be used for a long time!

Naturally, they had to wait until the most critical time!

From the first ten minutes to all the way to the sixth ten minutes, not a single bug could get within 300 meters!

Soon, the eighth hour had arrived!

At this time, on the leaderboard of the college entrance examination, there were timely refreshed rankings!

In the first place, it was still Jiang Fan!

First place, Jiang Fan, total score: 692!

In the past seven hours, every ten minutes was a point!

A total of 42 points were scored!

Within this past seventh hour, nearly 100 more students have been eliminated!

In the entire college entrance examination rooms, there were only about 400 people left!

Seeing the ranking on the list, other peerless geniuses also couldn't help but be a little anxious!

Originally!

Everyone thought that Jiang Fan's actual combat assessment would be average and probably, he would be eliminated in the first few waves!

So on the first day, even though Jiang Fan got full marks in all three subjects, they also didn't take it to heart.

However, no one expected that Jiang Fan wouldn't just pass the first six waves, he even managed to hold on until now!

This was already the seventh hour.

The insects later would get stronger and stronger!

The waves would get harder and harder!

At that time, it would be hard to chase after this difference!

"This Jiang Fan isn't going to be in the top 100, right?"

Chapter 282: Clearing the field! The most powerful killing device for exterminating insects! The shock of all the planet masters

In City Lord's Mansion Hall, a planet master said in surprise.

"Not to get in! If there's nothing unexpected, he's bound to be in the top 100!"

Another planet master said.

The other planet masters also felt a little unbelievable, but according to the current score, Jiang Fan was ahead of the other candidates.

He was at least a dozen points ahead!

The other candidates required to last at least another three hours to do so!

Getting into the top 100 was only a matter of time.

"Musketeer civilization."

An old man next to Jiangcheng City Lord lamented, "This can be considered a super civilization!"

"Although the musketeers created by Jiang Fan are not strong individually, they are very powerful in fighting with the team, and their number is very large!"

Another powerful planet master said: "In general....."

"It can be rated as a super civilization!"

"Another brand new super civilization is born! It's honorable."

All of the planet masters were quite happy.

Although, among the remaining candidates in the examination room, each one of them was a great talent!

There were quite a few super civilizations that had been built, but all of them had been built by previous generations.

Only Jiang Fan was the one who built this musketeer civilization!

Not a single person had seen it!

Even the most knowledgeable city lord of Jiangcheng had never seen it!

This must be a whole new civilization!

A new kind of super civilization!

In the presence of the crowd, it was a new birth!

If Jiang Fan could hear the conversation of these people, he would be speechless!

“Let’s see how far he can go.”

The City Lord of Jiangcheng opened his mouth, smiled, and said, “Don’t forget, there is also Bu Jing Yue in Jiangcheng!”

“It’s a little sad.”

An admissions teacher said, “Jiang Fan and Bu Jing Yue are actually from the same city, and there’s only one top student position!”

“Bu Jing Yue is not too suspenseful.”

Another admissions teacher said, “With the strength of this third transcendent species of flying thunderbird built by Bu Jing Yue, she can hold on for at least another three hours without any problem!”

“It’s bound to be fine. She will definitely last until after the tenth hour!”

“It’s hard to say, but don’t forget, the college entrance examination compares the total score, not the score of actual combat assessment.”

A planet master disagreed and said, “Bu Jing Yue’s total score is now more than twenty-three points less than Jiang Fan’s!”

“This means that Bu Jing Yue needs to last four hours longer than Jiang Fan to overtake.”

“This is very difficult!”

“I’m not too optimistic about being able to overtake so many points either!”

“Bu Jing Yue is very strong, and has the strength to win the top ten, but it is not easy to hold on for four more hours!”

“Don’t forget that Jiang Fan might not have used all of his cards yet!”

“This kind of rare musket has come out. Haven’t all the cards been used yet?”

“Let’s see. I think that this little guy is going to give us a big surprise!”

One by one, for the ranking of Jiang Fan and Bu Jing Yue, they started arguing unlike before because of the appearance of speed guns!

Everyone was not one-sidedly optimistic about Bu Jing Yue!

Quite a few planet masters sided with Jiang Fan!

“Don’t argue. The eighth hour is here.”

A planet master reminded them.

Immediately, inside the hall, everyone was quiet.

One by one, the planet owners immediately turned their heads, looking at the huge projection in the front.

The most conspicuous position of the projection at this time was left for Jiang Fan and Bu Jing Yue!

In the eighth hour, outside the planet passage, a different aura came through once again!

After the previous seven hours of exam, many students knew that another brand new bug would appear!

In the sky, there were still flying insects and giant bees!

While on the ground, there were super big bugs.

They became even bigger.

The incoming insect bombs were even stronger!

There were five types of bugs!

“Huh?”

Jiang Fan raised his eyebrows because he didn’t see a brand-new bug!

The crowd on top of the city walls was also a little surprised!

This eighth hour, there didn’t seem to be a new bug, but they clearly felt like that brand-new aura!

After observing for a while, suddenly a scholar with a binocular shouted, pointing in the direction of the passage and saying loudly, “Look there, is the ground moving?”

The others immediately looked over.

In the next moment, they saw that near the entrance of the planet passage; the ground shook slightly.

It seemed like something was squirming quickly underneath!

“It’s not good!”

Chang Yu Chun's face changed immediately, and he said, "This may be a bug that can crawl underground, and they came directly from the bottom of the passage!"

"All hands on deck! Get ready!"

In an instant, everyone was on high alert!

Flying insects in the sky and the previous insect bomb didn't make everyone afraid!

But these bugs that can travel underground were very frightening!

"Is the tunnel still down there?"

Chang Yu Chun asked Han Xin.

"It's still there. All the tunnels within 300 meters of the city wall are intact." Han Xin replied.

"General Han, you personally have to lead the team down there and defend well."

Chang Yu Chun immediately ordered.

Then he turned his head to look at the team of scholars and said, "Send a team of scholars down to find out the characteristics of these bugs that can travel underground!"

"How deep can they penetrate? How much their speed is, what is the attack and defense power, and so forth!"

"Give me results fastly!"

"Yes."

The old leader of the research team knew something was wrong.

So he personally led an elite squad.

He followed Han Xin and quickly walked down the wall!

"Others get ready, and prepare for the worst!"

Chang Yu Chun ordered one after another!

He knew about the consequences of letting the underground bugs pass through!

Once the bugs reached the back of the city walls, the Great Desolate Army would be attacked from both sides!

"It seems that it may be necessary to use that one weapon that cannot be used until the last resort."

Chang Yu Chun muttered.

Yan personally ordered that kind of weapon to be sealed because it was too dangerous!

At the same time, it was not just the Great Desolate Army, other candidates also discovered that what came out in the eighth hour turned out to be underground bugs!

Everyone's face couldn't help but change!!

Chapter 283: Suppressing the whole field! The final throbbing! King class bugs appeared

It was the first time that insects that could move underground appeared!

As compared to the black armored insects on the ground and the flying insects in the sky, underground bugs were undoubtedly more difficult to stop!

Look at the squirming ground.

Each one of the candidates felt a raise in their heart beat.

Even the planetary masters watching the battle from outside were all focused!

Even those planet masters rarely encountered this kind of bug!

Beneath the walls, Han Xin had already brought a team of elite men.

Down below the ground, it took them a few years to make those tunnels under the city wall.

It had been laid out everywhere and in very good condition!

Under the ground, they could clearly hear the sound coming from nearby through sound devices!

Boom Boom Boom.....

There seemed to be an excavator working there!

Bugs were digging the dirt crazily!

"Start with basic tactics."

Han Xin immediately ordered.

Against the underground enemy, the Great Desolate Army was naturally prepared.

After planning for several years, they were prepared for everything they could think of!

Bugs that could travel underground were difficult to imagine, but it was still within the scope of the plan.

One by one, the soldiers of the Great Desolate Army began to make their move.

They set up a speed gun to shoot at the entrance of the tunnel and inside the tunnel was through a pipeline.

They poured kerosene into it.

One of the original functions of these tunnels was to deal with possible underground enemies.

Hence!

The slope and depth of the excavation were exquisite.

If kerosene was to be dropped in the tunnel, it would slowly flow forward.

The sound of the excavator was getting louder!

It was getting closer!

Everyone's hearts were racing!

After a minute or so, Han Xin shouted, "Here it comes!"

In the next moment, there was a boom.

On the other end of the tunnel, a hole was dug.

A huge bug with a head of about one meter drilled out!

It was chilling to the bone.

Almost all of this bug's head was just its mouth and teeth!

The mouth was densely packed with sharp teeth.

The people watching were horrified!

This digger worm rushed in directly!

Boom!

There was another loud bang.

Another hole appeared next to it.

An almost identical digger bug drilled out from this hole!

Two digger bugs suddenly came to an empty environment.

There was a slight pause, but then it was just a quick walk through!

They were not too fast, but not too slow either!

They were less than two hundred meters away from the soldiers of the Great Desolate Army!

After the body of the digger bug came out, everyone could see clearly that these diggers had very long bodies.

They were almost five meters in length!

Their appearance was similar to that of a worm!

Basically, there was nothing defensive, but the most terrifying thing was its head..... that terrifying big mouth!

Its mouth was almost one meter wide!

Its inside was densely packed and basically all covered by sharp teeth!

Everyone could think of the sourness of being bitten by it!

Boom! Boom! Boom.....

Naturally, it wasn't just these two digger worms who came through.

There must be more digger bugs.

They were digging in from the sides, and from the rear!

They were breaking open the soil and coming into the tunnel!

In just a few minutes, there were already about ten more diggers with huge bodies in the tunnels!

Filling up almost all of the space of this tunnel!

Seeing the soldiers of the Great Desolate Army near the entrance of the tunnel, not only was there no fear, instead, they even opened their mouths.

They were emitting a screeching sound like scraping a wall.

Followed by, they pounced even faster.

At this time, Han Xin ordered: "Shoot!"

Bang! Bang! Bang!.....

A stream of bullets was quickly fired out.

It wasn't these diggers that they were shooting, it was the kerosene on the ground!

Inside the tunnel at this time, all of the ground of the tunnel was basically covered by kerosene!

As the high speed bullet hit the kerosene, it was instantly set on fire!

Boom!

A roaring fire flared up!

In an instant, the surrounding diggers were wrapped in it!

Digger bugs didn't have any heavy armor.

They frantically twisted their huge bodies.

But in this small space, there was no way to escape!

They could only be burned alive!

Everyone in the Great Desolate Army had a mask on!

They?left the tunnel.

They were fully prepared around the tunnel entrance!

While defending against the Digger Bug's attack, they were preventing the flames from getting out of control!

Seeing these digger bugs which were engulfed in flames, everyone breathed a sigh of relief!

The big guys outside couldn't see this scene?because it was happening?underground.

Chapter 284: Suppressing the whole field! The final throbbing! King class bugs appeared

There was only Jiang Fan, the planet master, who could see it very clearly.

In Jiang Fan's opinion, apart from being able to dig up soil, their every other aspect was weak!

Chang Yu Chun didn't even use that dangerous weapon.

With only a fire attack, these digging bugs were easily blocked!

On top of the city walls, hearing the report from below, Chang Yu Chun and others were relieved!

The underground attack was defended successfully.

Then they could fully focus on dealing with bugs in the sky and on the ground!

As before, these flying insects also had armor.

Although their strength was better than earlier, they still couldn't withstand the speed of gun's horrible defensive firepower!

They were pinned to death 500 meters away!

Ten minutes passed.

Second ten minutes also passed.

Sixth ten minutes passed as well.

The eighth hour was officially over!

Most of the candidates were able to fend off the bugs without any risk, but nearly 100 people were still eliminated from the competition!

As the ninth hour started, there were only about 300 people left!

Boom!

As soon as it started, from inside the planet passage, there was a loud sound!

A very large bug appeared.

The length of its body reached ten meters!

Most importantly, its body was actually covered with thick armor!

It was very thick!

The artillery fire from the Great Desolate Army was non-stop.

One round of artillery went down.

The shells swept directly at the body of this heavily armored insect, however it just made its body tremble slightly.

There was no harm.

At the same time, the digger bugs did not disappear.

.

They continued to dig the ground to attack!

The test faced by the candidates was even more severe!

Boom!

Boom!

This heavy armored insect weighed a lot.

With each step, it could bring a slight vibration to the ground underneath!

“Although the armor of this new type of insect is very thick, it is roughly estimated that it is about half a meter!”

Based on the destructive power of shells on heavily armored bugs.

The team of scholars quickly calculated the thickness of the armor!

“But the speed is very slow, only about five meters per second. To get to this side, it will take at least five minutes!”

Scholars made a preliminary judgment!

However, in the next moment, everyone saw an astonishing scene.

The insects next to the heavily armored giant insect didn't rush over frantically.

Instead, they stopped and pushed the giant heavy armored bug forward!

With being pushed by dozens of bugs, the speed of the heavily armored insects was significantly faster!

It rumbled like a steam car driving over!

“Concentrated artillery bombardment! Blast away the bugs pushing it around!”

Chang Yu Chun immediately ordered.

One shell after another changed its target toward the bugs that were driving the giant heavy armored bug!

However, another unexpected thing happened.

As the shells were about to fall, the heavy armored bug suddenly expanded!

He expanded a thick pair of armor on his back, covering all the surrounding bugs.

The shells falling on this heavy armor just made an explosive sound.

There was no damage!

Seeing this scene, the expressions of Chang Yu Chun and a group of scholars..... became somewhat gloomy!

This way, there was nothing they could do.

They could only watch.

The Heavy Armored Bug was using his own thick armor to shelter dozens of bugs in the surrounding area while quickly swooping this way!

“Let's just shoot straight at them with the speed gun. These armors can block the cannonballs, but they can't block those bullets!”

A commander suggested.

“Okay, the cannonball will hit the other insects to slow them down, prepare the speed gun, aim at these big insects, and bomb them hard!”

Chang Yu Chun ordered loudly!

After the Heavy Armored bugs had reached the optimal range of two kilometers!

Five more units of speed gun had been added!

There were a total of ten speed guns, which were crazily blooming with red fire!

All of the large-caliber bullets were continuously shot at the heavily armored giant insects!

Dang! Dang! Dang!.....

As the bullets landed on the giant heavily armored insect, it made a crisp sound.

It didn't seem to do much damage.

"Keep attacking, don't stop."

Chang Yu Chun shouted: "I don't believe that the armor of these big bugs is so thick. Is it harder than steel?"

The firepower from the ten speed guns was continuous!

Tu, Tu, Tu, Tu.....

Countless blasts were made and countless bullets were fired!

These were not ordinary bullets.

Instead, it was a specially built large caliber bullet.

Both speed and power were several grades higher!

In the end, when the giant heavy armored insect was still 300 meters away from the city wall, a giant bug at the front couldn't hold it anymore!

Chapter 285: Suppressing the whole field! The final throbbing! King class bugs appeared

Its thick armor was directly pierced through!

Then its huge body instantly became a hornet's nest!

It immediately died on the spot!

The other giant heavy armored insects also entered the same fate!

Each one of them was completely unable to carry the terrible firepower of the speed gun!

They all fell 300 meters away!

The end of the other bugs that they were sheltering was naturally not good either!

They were blown to pieces by a speed gun!

"It's still a great speed gun!"

Everyone in the Great Desolate Army breathed a sigh of relief!

"This hour should be fine."

Seeing this, the slight worry in Jiang Fan's heart was finally gone!

The time of one hour passed quickly?and Jiang Fan was still there!

Bu Jing Yue and a group of the other top geniuses were also able to hold on, but against these giant heavily armored insects, there were also many students who couldn't stand it!

One hundred people were eliminated from the competition!

At the beginning of the tenth hour, only a little over two hundred people were left!

In the tenth hour, a?new kind of bug appeared!

It was a new kind of digger bug!

Its body size was much smaller, but it was much faster.

Its digging was more efficient!

In addition, it also had very high agility, but under the fire attack tactics of the Great Desolate Army.

As soon as they came over, all of them were still burned to death in the tunnel.

This extra digger bug was not very challenging!

After the experience of the previous digging insects, many candidates also had some experience with the bugs that could dig the ground!

Hence, in this hour,?the number of candidates who were eliminated was surprisingly small.

There were less than 50 students left!

Finally, the tenth hour passed!

Looking at the previous year's college entrance examination, the next hours were?hell difficult!

With every extra hour, the difficulty would increase dramatically!

The bugs would all change.

In addition,?more advanced bugs would appear!

The difficulty increased several times!

In the previous ten hours, sixty points were obtained, but after this, for the top geniuses, there were very scary challenges!

From here on out, even the top 100 in the whole province could fall down at any time!

.

"Whether Jiang Fan can get the top spot in Jiangcheng and overpower Bu Jing Yue depends on this eleventh hour!"

In City Lord's Mansion Hall, the planet masters were discussing.

"Now Jiang Fan's total score has increased by as much as 23 points." An admissions teacher said: "If he?passes this hour, then basically this year's Jiangcheng college entrance examination champion can be locked in advance!"

Everyone was very clear.

In the final round, there were only one hundred points in the endless mode!

Theoretically, if one could resist for sixteen hours and forty minutes.

He would be able to get all one hundred points!

However, theories were theories!

The examiner's intention was?that?no one would get full marks!

In other words, everyone had separate thoughts!

The further anyone?goes, the more terrifying bugs would appear!

It was unlikely that any candidate would be able to make it through!

In the previous year's high school entrance examination, there were only a few who could survive the fifteen hours, not to mention full marks.

The setting for this endless mode was?not allowed to give you full marks!

In the opinion of many planet masters, Bu Jing Yue was very strong.

Although she created three transcendental races,?she was only one of the top ten at most!

There was absolutely no way to survive after the eleventh hour, therefore, as long as Jiang Fan survived this eleventh hour, relying on a twenty-three-point lead!

It would almost secure the position of the top student of Jiangcheng College Entrance Examination in advance!

.....

In the Conference Room of No. 7 middle school, there was complete silence at that time.

No one was saying anything.

The hearts of all school leaders and teachers were racing?with a glimmer of hope in their eyes!

Will they be able to see a miracle happen?

"From here on out, it should be a real challenge!"

Jiang Fan and many top geniuses understood.

The showdown between the remaining top geniuses was there!

The battle for the overall top spot in the college entrance examination was also the most critical and hottest time.

After this, if there was one single mistake, even a popular candidate for the top spot in the college entrance examination could?be killed directly by insects!

The eleventh hour was just around the corner!

Rumble.....

The army of bugs had not entered the passage yet.

The crowd heard a loud sound?and a much stronger aura than earlier ones!!

The most terrifying king-class bugs had appeared!!

Chapter 286: Terrifying slug giant! The most dangerous weapon is here!

A terrifying aura came from it.

After only a few moments, giant bugs came out of the passage.

They drilled out one after another!

These bugs were not that big?as compared to the previous bugs.

They were only about three meters in length!

Their entire body was black.

It was covered with a layer of metal-like black armor!

It reflected?a bright light, but its body looked thinner?as compared to?the previous bugs of the same size.

It was like the difference between a cheetah and a fat pig!

With a hint of swift and fierce might, the aura of their body was also extraordinary!

Their wisdom was not low.

After entering the passage, surprisingly, they did not pounce directly, instead, they just stopped.

Those big sharp eyes were staring at the city wall not far away!

There were also two small tentacles on their forehead?which were shaking constantly.

It seemed like they were communicating with each other!

Chang Yu Chun and the others who saw this frowned for a while!

They were not afraid that transcendents?were powerful.

They were only afraid if the other party was educated.

This new batch of bugs.

It seemed that it was completely different from the previous ones who went crazy as soon as they came in!

Claptrap.....

There were not just these black bugs, behind these black bugs, there were also flying insects!

The body of these flying insects was actually covered with gray and black armor?and their speed was faster!

They were flying even higher!

In an instant, they were in the sky!

It was not just flying insects, there were even more lumps of soil squirming around underground!

Their squirming was much faster than the previous digger bugs!

In other words, in this eleventh hour, there were super-double versions of the bugs, attacking through air, land and underground.!

They didn't give any student a chance to breathe!

However, that was not the end of it!

Boom! Boom! Boom!.....

The sound of the earthquake sounded!

It was as if some giant thing had stepped on the ground!

Even the people on this side of the city wall seemed to be able to feel the vibration.

A few seconds later, an incomparably huge figure appeared at the entrance of the passage!

This was a behemoth of over thirty meters in size!

Its height was also more than five meters!

And it was the biggest bug ever encountered.

It was the kind of bug that could shoot bug bombs.

Compared to those from earlier, their size was more than three times bigger!

Their exterior was also covered with a thick layer of gray armor!

On the head, there was a long sharp corner which looked somewhat similar to a rhinoceros!

Jiang Fan immediately gave this bug a name: rhinoceros bug!

Subsequent facts proved that Jiang Fan was not wrong in using this name.

This rhinoceros bug looked bulky and heavy.

Their movements through the passage were also slow.

However, after seeing the Great Desolate Army on the city wall, the aura on their body immediately changed.

They charged up with instant acceleration and quickly rushed towards the city wall!

Going along the way, they brought up a cloud of dust like a large rhinoceros running wildly!

When the Great Desolate Army saw this rhinoceros bug for the first time, they were immediately prepared.

They fired the cannonballs quickly.

Cannonballs were rushing towards these rhinoceros bugs!

Boom! Boom! Boom!

Countless shells fell on them.

It was exploding around the rhinoceros bugs!

It caused violent vibrations and sounds!

On the ground, the dust caused by the shells mixed with the dust raised by the rhinoceros bug running over, turning the outside into a dusty weather!

They couldn't even see clearly at all!

"The thickness of the armor of these large bugs is even stronger than those of the previous bugs."

After the shelling of the cannonballs, they saw that the rhinoceros bugs were still unharmed.

A scholar immediately analyzed it!

"In addition, here's the main thing! These big bugs are not slow at all, and the shells are hard to hit."

The faces of all the people of the Great Desolate Army once again froze up!

Fortunately, they were about 500 meters away from the city wall.

The big pothole that was created by the blood of the scarlet lion was still there.

Which temporarily blocked the progress of these rhinoceros bugs, but the rhinoceros bugs didn't take a second look at all.

Instead, they directly rushed over!

Thump! Thump!.....

The huge body of the rhinoceros bug fell in!

It was not a big deal.

However, the rhinoceros bugs behind them did not care about their companions.

They jumped in as well, stepping hard on the back of the rhinoceros bugs from earlier!

As more and more rhinoceros bugs jumped in, this large hole was filling up at a rate visible to the naked eye!

"Kerosene tactics!"

Chang Yu Chun shouted!

Immediately, barrels of kerosene were directly smashed over one by one!

They fell into this big hole!

The shells followed closely!

Boom!

As soon as these cannonballs hit the kerosene, the flames blazed up!

The rhinoceros bugs immediately twisted crazily.

Each one of them was burning up.

Although they had extremely heavy armor on their body, they were not in the abdominal position.

The kerosene was ignited from below.

Several of the rhinoceros bug's feet were directly set on fire, and the flames quickly swept around!

After seeing that, the kerosene tactic was effective.

Chang Yu Chun's eyes lit up.

Then he immediately shouted, "Increase the attack. Use all the stone throwing machines that are left!"

"Is the quantity of kerosene enough?"

"There's plenty more in the warehouse."

Someone next to him replied, but Chang Yu Chun didn't breathe a sigh of relief yet.

Then he saw that, behind the rhinoceros bugs, the giant black bugs began to charge in!

As for their speed, it was too fast!

It was amazingly fast!

They disappeared from ten meters away in an instant and then appeared a few dozen meters away!

They were not even walking in a straight line.

Instead, they traveled fast in an S-shaped route!

"Could these be the king class insects....."

Seeing this scene, Jiang Fan couldn't help but guess.

Insects were also a very hierarchical race!

It was divided into very specific classes!

Basically, it was divided into ordinary bugs, advanced bugs, king-class bugs and even stronger, royal bugs!

The higher the class, the higher the wisdom would be, and their strength would be stronger.

Its status within the insects would also be higher!

Although rhinoceros bugs were huge, their intelligence was no different from the previous bugs.

They still went insane when they saw someone, but these giant black bugs were different, they knew how to observe the situation on the battlefield!

As Jiang Fan guessed, for the big guys in the hall of the City Lord's Mansion, it was evident that these were the king-class bugs!

The S-shaped route made it very difficult for the shells to hit!

Within two kilometers, the speed gun started to fire!

Its fierce firepower was like a fire dragon.

It was shooting out!

Bang! Bang! Bang!.....

Chapter 287: Terrifying slug giant! The most dangerous weapon is here!

Countless bullets were whistling wildly!

All of them were towards these giant black bugs!

These giant black bugs had taken countless bullets, but surprisingly, they were able to block all of them.

The bullet hit the metallic black shell on the giant black bugs!

Ugh! Ugh! Ugh!

There was a sound like hitting steel!

Nothing seemed to work, but the speed guns still didn't stop.

They kept firing!

Finally, under the bombardment of countless bullets, a hole was opened in the black metal armor of a front-most giant black bug!

Puff! Puff! Puff!

It was still unable to block the super firepower of the speed gun!

In an instant, there were dozens of holes in the black shell almost at the same time!

Bullets passed through the armor.

It was hitting the giant black bug body!

This giant black bug also flipped to the side.

It was dead as a doornail, but the other giant black bugs didn't flinch!

They still rushed over extremely fast!

They also hid behind the rhinoceros bugs.

They were relying on the superb defensive power of the rhinoceros bug to resist the attack of the speed gun!

"These black bugs are highly intelligent."

Watching this scene, Le Yi couldn't help but speak up.

"Everyone, beware of these black bugs breaking through the 300-meter defense line."

Chang Yu Chun did not dare to be careless at all.

He reminded the crowd again!

If they broke through the front, with the agility of these giant black bugs, it was estimated that they could quickly climb a 30-meter high wall!

But at that time, the black armored flying insects in the sky were also unwilling to be left alone!

They also launched an attack on the Great Desolate Army!

Each one of them pounced desperately!

“Add ten more speed guns to take care of these black flying insects alone!”

Chang Yu Chun immediately ordered.

As the range in the sky was bigger, the previously installed speed guns were not enough!

The Great Desolate Army had set up a special team to deal with the black flying insects in the sky!

Fortunately, there were many soldiers in the Great Desolate Army.

There were a total of 50,000 people!

There were also 50,000 reserved soldiers on standby!

There was no limit to the rotation!

There was no need to make everyone too tired!

The races created by other candidates were not so lucky.

All of their transcendent races had persisted until now.

They were almost exhausted!

The candidate with the largest number of transcendents had only just over 10,000 soldiers!

This was still cultivated by using certain special resources!

If their background was normal, it couldn't be more than 5,000!

The Xu Ling clan of Bu Jing Yue was hiding in the trunks of the spirit tree people.

They were using bows and spears to deal with the attacking army of insects!

The flying thunderbirds in the sky were even more.....

They were dropping a few flying thunders now and then!

But this time, the rhinoceros and giant black bugs were too monstrous!

With the thick armor of the rhinoceros bug, it was very difficult for the Xu Ling Clan to break through!

Their arrows were more powerful than bullets, but their number was limited!

Previously, they were entirely dependent on the amazing defense of the spirit tree people, so they were able to make it through!

But at that time, with the speed of the giant black bugs, even the Xu Ling couldn't hit!

Soon, they rushed to the bottom of the spirit tree!

Some giant black bugs frantically attacked the spirit tree people.

While some were climbing up crazily!

The spirit tree people could only slap the giant black bugs to protect themselves!

However, that was not all!

The more fearsome digger bugs had appeared underground!

Their body size didn't increase, but they were faster and more flexible!

Their digging was faster too!

Around the Spiritual Tree People, there was dense squirming!

Subsequently, the ground broke apart?and a digger worm with sharp teeth appeared!

They did not break out of the ground.

Instead, they started to crazily bite the roots of the Spirit Tree!

The roots of the spirit tree people were also very hard, but so many digger worms kept biting down, so it still got chewed up!

If seen from the sky, five huge spirit tree people were surrounded by densely packed black bugs of unknown size!

They had completely fallen into the siege of the army of insects!

The situation looked very urgent!

It was not just Bu Jing Yue.

Other candidates, including those recognized geniuses had reached an extremely dangerous situation!

At this time, everyone saw that?the difficulty increased more than double in this eleventh hour.

It was indeed as rumored.

"The number of geniuses that will fall at this level is estimated to be very high!"

One planet master lamented.

"It was the same in previous years."

Another Planet Master smiled and said, "In the last round, it will give you some points, but not too many. It's pretty good to get 60 or 70 points!"

"It's also especially hard this year."

An admissions veteran also nodded and said, "If not for the fact that this session of candidates is also particularly demonic, it is estimated that?less than a hundred people would have been eliminated long ago!"

"Let's see which geniuses will be eliminated!"

For the school leaders and teachers of the No. 7 middle school, that was unprecedented tension!

They didn't even dare to breathe!

Their eyes were fixed on the projection!

.

Their eyes kept sweeping back and forth between the scenes on Jiang Fan and Bu Jing Yue's planets!

The Great Desolate Army's speed guns were wildly attacking!

If it was a heavy machine gun from Jiang Fan's previous world, it was very likely that it would have already stopped due to overheating.

But it was made of star meteorite iron and vibranium!

There was no need to worry about this!

Just a little heat dissipation was needed!

Dozens of speed guns kept shooting at the ground and the sky!

The corpses of giant black bugs and black flying insects kept falling to the ground.

Inside this terrifying web of firepower, there were still no bugs that were able to rush in!

Ten minutes passed quickly.

More powerful giant black bugs and rhinoceros bugs rushed in, but still, they couldn't break through the raging fire and the line of fire of the speed gun!

They were blocked to death 300 meters away!

Under the leadership of Han Xin, the new digger bugs were still madly twisted by the flames underground!

They couldn't get through at all!

Seeing this scene, the school leaders and teachers of No. 7 Middle School's hearts became faster and faster because they discovered!

This overall top position seems to be here!

As compared to Jiang Fan, the side of Bu Jing Yue was much more thrilling!

The Spirit Tree People were constantly being attacked by Giant black bugs and digger bugs, but as the skin was rough and the meat was thick!

After biting for a long time, even a root could not be eaten!

Little by little, time was ticking away!

Next ten minutes were slowly crawling forward!

Chapter 288: Terrifying slug giant! The most dangerous weapon is here!

The armies of one student after another were all submerged in the army of bugs!

They had no choice but to opt out!

Fortunately, they already got a place in a super-first-class university.

There was no disappointment on their faces!

Finally, the eleventh hour was over!

In this one hour, more than 100 candidates were eliminated!

This was the top ranked, most elite group of demons in the province!

The number of remaining candidates was less than one hundred people!

There were only eighty-one left and Jiang Fan was still ranked first!

School leaders and teachers of the No. 7 middle school couldn't help but cry with joy!

As long as there was not some kind of counter-intuitive ultimate bottom card of Bu Jing Yue, this Jiangcheng's top ranking position already belonged to Jiang Fan!

Tong Zhensheng also gave Qiu Yunfei a little hug!

He was celebrating this hard-earned first prize!

"I didn't expect that this year's championship of Jiangcheng actually fell into Jiang Fan's hands."

"If anyone told me before the college entrance examination, I would never believe it!"

"You know, in the final edition of the Heavenly Pride List before the entrance exams, if I remember correctly, Bu Jing Yue was ranked in the top 100, while Jiang Fan was over 9,000, a very far position, and almost fell out."

"Hahahaha, the Heavenly Pride List has become a joke this year. They ranked such a demonic genius at the bottom of the list!"

"Don't say it. According to the news sent by my friend, those editors are said to have been directly fired by Heavenly Pride News a few minutes ago!"

"Bu Jing Yue's teacher did not hesitate to give her the Heart of Star, but unexpectedly, she can't even get the title of champion of the Jiangcheng College Entrance Examination!"

"The champion of this college entrance exam is actually just a celebrity. It's not important, but now it seems like I don't think she'll get this top ten position!"

"Yeah, with the addition of a monster like Jiang Fan, the top ten will be difficult!"

"....."

In City Lord's Mansion Hall, the big shots were also sighing and discussing.

Who would have thought that this year's top student of Jiangcheng College entrance exam fell to the No. 7 middle school?

The last to fall into place was Jiang Fan, a nobody!

"The position of champion is gone."

Inside the examination room, Bu Jing Yue looked at the real-time ranking.

Her heart trembled slightly!

This was something she initially felt was the most essential achievement, but now?with the difference of twenty-three points, it meant that it was no longer possible!

Bu Jing Yue knew it herself.

After she was able to last this far, there were no more cards left!

All the basics that could be taken out were taken out!

“Jiangcheng’s top spot is not critical. What?I want is to be in the?top ten in the province!”

A look of determination flashed in Bu Jing Yue’s eyes, “For the top ten in the province, there is still a chance! I must get it!”

The twelfth hour started.

Immediately afterwards, the bugs coming in through the passage had changed again.

This time, it was the same giant black bugs, but their body shape and appearance had completely changed!

They became faster and stronger!

It was still a king-class bug!

The rhinoceros bugs were gone!

It was replaced by a similar body type, but it was slow.

It looked like a wriggling gray-white giant worm!

There was absolutely no armor on this giant gray-white bug!

Its speed was really slow.

When it came out of?the passage, it?did not go forward!

Instead, it stopped next to the giant black bug.

It seemed to be taking orders from the giant black bug!

“It’s not right.”

Seeing this new type of giant gray and white insect, everyone in the Great Desolate Army felt that something was not right!

In accordance with the previous experience, the bug that appeared later must be more powerful than the last one!

There must be something special about such a slow and unarmored giant bug.

In the next moment, they just saw that?the bodies of these gray-white giant insects shook suddenly!

Then they opened their mouths!

From their mouth, a gray-green liquid like snot was sprayed out!

This liquid was like a sharp arrow!

Through the sky, it came directly towards this side of the city wall!

“Shields ready!”

Chang Yu Chun realized that something was wrong and gave a quick order!

One by one, the soldiers of the Great Desolate Army immediately raised their shields above their heads!

Despite the distance of more than three kilometers apart, these gray-green liquids still broke through the air!

After reaching a high point in the air, it fell quickly.

Bang! Bang! Bang!.....

The speed gun was firing crazily, but these were liquids.

Bullets were simply useless.

It was totally unstoppable.

The gray-green liquid rushed straight down!

A clatter!

It was like a water arrow.

It hit the walls, the shields, the ground and the artillery on the sides!

Chi Chi Chi.....

As soon as the gray-green liquid touched the object, there was a piercing sound.

The crowd then saw that these objects were rapidly eroding!

Even shields were not spared.

In a few seconds, there was an extra gray-black area!

The expression of everyone who saw it changed.

“These gray-green liquids are toxic? Or is it corrosive? Or maybe both?”

One scholar exclaimed.

With this much corrosion, it was certainly stronger than sulfuric acid!

Sulfuric acid was not effective against alloy shields.

“Check it quickly!”

Chang Yu Chun ordered.

Immediately, there were scholars who raised their shields to look over and collected the still intact gray-green liquid in an alloy jar!

Chi Chi Chi.....

This snot-like liquid crazily corroded the jar, but the good thing was that there wasn't a lot of it.

The alloy jar was still able to withstand it!

“Bring all the shields here!”

Chang Yu Chun shouted.

He didn’t care anymore.

They were just relying on these shields on the city walls.

There was absolutely no way that they would last the hour!

“Pay attention to the protection of the speed guns!”

Chang Yu Chun reminded everyone again!

The other guns and rifles were nothing, but there were only a few speed guns.

One less unit was one less combat power!

Each one of the soldiers of the Great Desolate Army had already taken action.

They took a special large shield?and placed it on the top of the speed gun!

From the entrance of the passage, more and more snotty giant bugs were coming in!

All of them stopped three kilometers away.

It exceeded the range of the Great Desolate Army.

There was a constant barrage of gray-green liquids!

Chi Chi Chi.....

There was no alloy shield on the city wall!

It was directly corroded by this?gray-green liquid!

At the same time, in the sky, a?swarm of caterpillars flew up!

Their bodies?were?densely packed with all white fluff!

There seemed to be no armor.

There were no tail stabs either, but these dense fluff still got the attention of the crowd!

Chapter 289: The battle for the champion! The final ten! Bu Jing Yue’s elimination!

“Be careful! Cover with your shield at all times, and never take it off.”

Chang Yu Chun didn’t know what kind of bugs these were.

He could only warn loudly!

These caterpillars flew high into the air!

Their number was increasing.

Suddenly, a?shiver ran through their whole body!

A fluff actually detached from the body.

One after another, it fell to the positions of the Great Desolate Army!

“It’s not good.”

The face of the old leader of the research group changed, and he said, “All of you hunker down under the shield, don’t be careless!”

These tiny fluff hairs couldn’t be solved with bullets.

Everyone could only look helplessly at these fluffy hairs falling like snowflakes!

It was falling on the walls, on the shields!

However, everyone was surprised to find out that it didn’t seem to have any lethality!

The fur was lying on the city wall.

There was not a single move!

A scholar curiously reached out his hand to touch some of these fluffy hairs.

After that, a scream of misery resounded.

The crowd looked over.

It was found that the right palm that the scholar had just stretched out and became red and swollen!

“This fluff is poisonous! Don’t touch it!”

Chang Yu Chun shouted immediately.

At the same time, he ordered the logistics medical staff to come up to carry this scholar down for treatment!

One minute later, people found out that these walls and shields that were stained with white fluff, began to evaporate slowly!

It seems to have been eroded by the wind!

The effect of the gray-green liquid from earlier was not quite the same, but its threat to the Great Desolate Army was about the same!

It was like the caterpillars in the air.

Because of their high location, speed guns were hardly able to hit!

So their threat was even greater!

“What do you all have in mind?”

Chang Yu Chun asked a group of scholars.

It was annoying to have all this fluff falling on the top.

The biggest difference from the green liquid was that these fluffy hairs were very tiny.

It was not in clumps.

Instead, it was in small ones.

It was drifting with the wind.

It could easily get on clothes or skin.

It was hard to guard against it!

“You can blow them away with the wind, blow them away!”

A scholar thought about it?and came up with an idea.

Chang Yu Chun’s eyes lit up, and he immediately shouted, “Don’t we have blowers in our warehouse? No matter how many, get them all and blow the fluff away!”

The support staff left immediately.

Soon, they moved a few huge blowers over!

Hoo hoo hoo.....

The loud sound of the blower was rattling.

It was louder than the sound of a steam train!

If it was normal, it was guaranteed to be killed, but this time, everyone felt that this big guy was a little cute!

Its effect was also amazing.

The fluffy hairs that fell from the sky were blown away!

They were blown to somewhere else!

The logistics staff also brought in large fans?to get rid of the fish that slipped through the net in the fluff!

Seeing this, everyone finally breathed a sigh of relief!

In this one hour, the difficulty had increased a lot!

However, that was not all.

There was a rumble, underground.

Suddenly, there was a trembling sound!

It seemed that a whole new group of powerful underground bugs had appeared!!

Inside the tunnel, with the sound of the earthquake, a?big black bug came out!

“Scorpions?”

Seeing this large insect with a black body.

Everyone was slightly stunned.

This big bug and the usual scorpion?were identical in terms of appearance.

The only difference was that?this big bug was much bigger.

It was nearly two meters long, plus that big, long, pointed tail was even longer.

Its whole body was wrapped in a metal-like black shell.

The agility was very high.

Seeing the people of the Great Desolate Army, they froze slightly.

Their heads bobbed a little.

They seemed to be thinking about something.

Subsequently, one of them lowered his head!

Surprisingly, it pierced right through the ground below!

Its massive body drilled in an instant!

“Watch out!”

Han Xin shouted.

After a few moments, about ten meters away from the place where black scorpion had just disappeared, it reappeared!

“Another king-class bug!”

Seeing this, Jiang Fan knew that this huge black scorpion was also king-class!

In addition, there was also this special ability to travel short distances!

“This is the ability of this big scorpion!”

Behind Han Xin, a scholar speculated.

“Whether it is or not, it’s better to strike first, and we can’t let it rush in front of us.”

Han Xin immediately ordered.

The kerosene was refilled again.

Bullets also swept out!

Boom!

The fire was raging!

It instantly ignited the whole tunnel!

The big black scorpion saw the situation and drilled directly into the ground again.

“Pay attention.”

Han Xin spoke up, letting the crowd pay attention to the surrounding movements!

After a while, there was a “thud”!

It seemed to be the sound of a large animal hitting the steel plate!

“Ha ha.”

Several scholars and soldiers laughed!

They were well aware that this big black scorpion must be relying on his own special abilities?to dig through the ground below!

However, the Great Desolate Army was prepared for this!

The city walls were built in this place.

.

It was decided after a careful?examination.

It was not just that the terrain was small.

In addition, there was a rock layer underneath!

Even if you blast it with gunpowder, it won't explode much.

Not to mention the level one transcendent races!

On the rock layer, the Great Desolate Army laid countless meters of thick concrete!

On top of the concrete, there was also a thick layer of steel!

With such a defense, almost no species could dig from the ground!

If they wanted to attack from underground, this tunnel was the best choice!

Sure enough,?after a while, the big black scorpion appeared again.

It seemed to be very angry, and?it was frantically rushing over!

The black shell was not afraid of flames at all, but the Great Desolate Army had already prepared a group of speed guns!

Tu, tu, tu.....

Hundreds of bullets were fired wildly!

At first, this big black scorpion was able to resist with its hard shell, but it didn't last long.

It was punctured!

They were dead as a doornail!

So far, on land, underground and in the air, the Great Desolate Army was defending tenaciously, but the planet of other candidates were not so lucky!

The five spirit tree?people of Bu Jing Yue were?covered in white fluff from the sky and gray-green liquid shot by slugs!

Chi Chi Chi.....

The harsh corrosion sound came one after another!

It was everywhere.

Even the branches and leaves of the spirit tree people started to shrink up under more and more fluffy hairs and fluid.

Rumble.....

Underground.

One after another, the black scorpions came out?sweeping their long tails?and violently plunging into the trunk of the spirit tree people!

The poison was injected!

Naturally, it was impossible for the Xu Ling people in the tree and the flying thunderbirds in the sky?to sit back and watch the spirit tree people be attacked so recklessly.

Chapter 290: The battle for the champion! The final ten! Bu Jing Yue's elimination!

All of them launched a counterattack, but the number of bugs was simply too much, especially the caterpillars, which were shaking white fluffy hairs.

For the Thunderbirds, there was no small damage.

Thunderbirds could only dodge while attacking!

Xu Ling people's arrow reserves were originally quite a lot, but after so many rounds of defense, it was also gradually depleted.

Now they could only rely on a wooden sword?to kill the bugs that were near the spirit tree people!

It was the same as Tang Qingqing.

Bu Jing Yue had also prepared a large amount of crystals?to replenish the consumed aura, but the speed of eradicating bugs was completely incomparable to the speed of insect growth!

Unlike before, this attack from underground, land and air, all three had high damage, especially the giant black scorpions from underground.

Each one could only be blown up once with poison?and it was too toxic!

Just a few moments later, the part where the spirit tree man was poisoned,?already began to show signs of ablation!

Each of the giant black scorpions kept coming out of the ground.

All of them gave a hard time to the spirit tree people.

As the saying goes, a little goes a long way.

Not long after that, on this spiritual tree man, there were scars everywhere.

Some were corroded by white fluffy hairs and gray-green liquid.

Some were poisoned by black scorpions.

Time passed slowly, minute by minute!

Under the anxious gaze of Bu Jing Yue, it was the last second of the twelfth hour!

But at this time, the spirit tree people that had suffered the most bug attacks.

They also couldn't hold up anymore!

A large part of their body was seriously injured!

Boom!

This spirit tree man collapsed with a bang!

It died on the spot!

The Xu Ling people in the trunk of the tree already jumped ahead to another tree, seeing that the situation was not good.

Next to this dead spirit tree, another spirit tree man was also attacked!

At this moment, it was also dying, it was on the verge of death!

The twelfth hour was officially over!

Another fifty people were eliminated!

In all the examination rooms, there were only thirty-one people left!

Jiang Fan was still there!

This shocked many planet masters because this was totally unexpected.

The thirteenth hour started!

The bugs at the other end of the passage changed again!

The slugs disappeared.

They were replaced by much larger bugs.

Their body size was over 50 meters and their exterior was covered in thick gray-black armor with sharp edges and corners!

It was very sharp, like a super big knife!

In the reflection by the light, there was a cold, clear light!

It seemed like super-sized armor!

There was a pair of densely packed feet beneath it!

These small feet were like wheels to drive this bulky armored bug as fast as a train!

Right behind the armored giant bug, it was still a king-class black bug!

It was more powerful than the one earlier!

Rumble!

These armored giant bugs rushed towards the city wall with all of their power.

The black bugs were stuck near the armored bug, dodging the barrage of shells!

All the shells landed on the armored bug.

Although it was still hard to break the defense, the Great Desolate Army's line of sight did not completely hit the two bugs because in the sky and underground, two other new bugs also appeared at the same time!

In the sky, one by one, they flew about one meter.

A weird bug that looked like a black ball surveyed the lower side for a while?after these round ball bugs flew high into the sky.

Suddenly, they swoop down hard!

Their speed was amazingly fast!

“Are they trying to ram us?”

One scholar speculated.

Whether they want to hit or not!

Speed guns didn’t care.

They directly swept over, tearing the ball bugs one by one!

This time a very earthworm-like slippery bug appeared underground!

Their bodies?were?very long and?because of the slippery mucus, they were actually not afraid of fire attacks!

It?was slippery as hell.

Their drilling speed was very fast!

Their mucus was also highly corrosive!

A soldier of the Great Desolate Army, accidentally got sprayed.

His clothes were instantly corroded off!

If it were not for the timely reaction of the person next to him, even his skin might not be safe!

Tu, tu, tu,.....

Since the fire attack didn’t work, in the end, they could only use the speed gun.

Once again, Han Xin called in several speed guns.

Under fierce fire, this earthworm giant still couldn’t come over!

For the Great Desolate Army, the most meaningful?threat was still the armored giant bug on the ground!

It?was not that shells didn’t work!

Instead, the accuracy of each shell was not high.

They couldn’t land on the same armored bug!

The armored bug was not slow either.

Soon they?came to the front of the big pothole from earlier.

At this time, this place was almost filled with bugs!

The armored bug went straight across!

The speed guns were firing crazily, but they were also not able to completely stop the advance of these armored insects!

“Add twenty units of speed guns!”

Seeing that the situation was not quite right, Chang Yu Chun immediately ordered.

Twenty more speed guns were added immediately.

Under the bombardment of countless large-caliber bullets, the shell of the front-most armored bug was pierced and its blood and flesh flew everywhere!

Seeing this, Jiang Fan also breathed a sigh of relief!

The bullets that the speed guns could send out in a short period of time were still powerful!

Especially the special large caliber bullets!

However, for other candidates, these powerful bugs were too difficult to resist!

Each and every one of them was trying their best to persevere!

For all candidates, if they just held on for another ten minutes, they would be able to get one more point.

Then their ranking might even squeeze into the top ten!

“In this hour, the top ten will be decided!” A planet master said.

“The top ten are going to be separated!” Many other people nodded.

These four kinds of bugs were too strong!

Each of them was extremely difficult to deal with.

Now, there were actually four of them at the same time!

It was overkill!

For the school leaders and teachers of No. 7 Middle School, since Jiang Fan locked the first prize of Jiangcheng in advance, the pressure wasn't that great.

All of them were relatively more relaxed, looking at the projection of every single candidate!

Of course, Jiang Fan and Bu Jing Yue were still the focus!

Especially Bu Jing Yue because she had come to a very dangerous point!

On the ground, the armored bug was completely unstoppable!

The crazy attack of the orb bugs in the sky was like a cannonball.

It also made the Spirit Tree people suffer!

Underground, long earthworms burrow out of the ground.

Their slime coated the spirit tree man!

Chi Chi Chi.....

Corrosion was very fast, not to mention the giant black bug that was acting as the main force of the attack!

In a very short time, the dying spirit tree man from earlier, couldn't hold it up any longer.
