

One Planet 351

Chapter 351: Final Test! Promotion Eve! Amazing news!

Jiang Fan took a glance at the current Blue Star panel.

The numbers had changed considerably-

Planet name: Blue Star

Planet level: Level 1

Planet diameter: 901.5 km

Planet species: 1435

Deduction route: None

.....

Planet diameter of Blue Star for the first time broke through to nine hundred kilometers!

From eight hundred kilometers to the current nine hundred kilometers.

It only took just under ten years!

If we count from the high school exams.

At the time of the entrance exams.

The diameter was only the first seven hundred!

By now it has gone up nearly two hundred kilometers!

The reason, Naturally because of the population explosion in Xia!

Thanks to the second technological explosion.

Xia's productivity level had increased rapidly.

People's lives and health care levels had also improved significantly!

Plus no Civil war.

The population began to grow on a large scale.

"It's very similar to the Earth in the previous life."

Jiang Fan wasn't surprised.

The previous world Earth's population change was also the same trend.

Before the industrial era,

Although the population also had a high birth rate, the death rate was also very high.

Resulting in an extremely low growth rate!

In 1 AD, there were about 200 million people in the world.

In 1600 AD, the world's total population was about five hundred million.

In 1800 AD, it was about one billion!

Breakthrough from one billion to two billion.

It took more than a hundred years.

But into the twentieth century.

Especially after World War II.

The population began to skyrocket!

At the time of Jiang Fan's crossing.

The total population of the Earth had exceeded seven billion!

The time it took to go from two billion to seven billion... less than a century!

The same goes for the Blue Star.

The population was in a stage of rapid development.

The diameter of the planet was rising!

This also let Jiang Fan's heart let it go.

"It seems that Blue Star doesn't have transcendent energy, so it won't be restricted."

Jiang Fan muttered to himself.

Other transcendent planets, because of the restricted transcendent energy.

The planet developed to the back.

It would be difficult to move up in diameter.

But

Blue Star's current diameter was still accompanied by the increase in life force.

And continued to increase at high speed!

"Teacher Su said that the most diameter of a planet in the history of first-class planets, one of the most diameter of the planet is nine hundred and forty-six kilometers, Blue Star should be able to reach and surpass it soon."

Jiang Fan estimated the current speed of Blue star's development.

In his heart, he had a rough prediction!

The only beautiful thing was

The increase of Blue Star's species was a bit slower.

But Jiang Fan wasn't in a hurry.

The first-class planet was still too small.

The terrain and landscape were limited.

It couldn't hold too many species.

For example

On the current Blue Star, There were basically no tropical rainforests.

The area was pathetically small.

In the previous life on Earth.

The species growing inside the tropical rainforest was the most in all regions.

High mountains, deserts, tundra or something was also very little.

And the ocean area was also not enough!

Life inside the ocean was also an important source of species composition!

Wait until the secondary planet.

There would be a qualitative leap!

It was likely to surpass the former Earth!

After looking at the planet panel.

Jiang Fan refocused his attention on the "Atomic Project" hosted by Yan himself!

About this plan, Jiang Fan kept an eye on it.

Therefore

Time did not flow too fast.

The atomic plan looked even simpler than gunpowder.

The raw material was even only one kind of just –

Uranium 235!

But!

Extracting this uranium 235 was a very difficult thing to do.

There were two isotopes of uranium.

There was Uranium 238 and Uranium 235!

Uranium 238 was more stable and neutron bombardment was useless, only Uranium 235 could be blasted away by neutrons!

Then you had to get rid of the Uranium 238.

Only Uranium 235 remained.

This would be difficult.

Uranium 238 accounts for more than ninety-nine percent of the natural world.

Less than one percent was Uranium 235.

The first problem facing teams like Yan's was

How to sieve out the uranium 235.

After some trials and research.

Eventually.

The method the people came up with was to use a cyclotron!

But making a cyclotron was another hassle.

It required huge magnetic field coils!

The quantity was terrifying!

Yan directly called up almost all the copper and silver currently in stock in Xia.

Over tens of thousands of tons!

And made nearly 10,000 of the large electromagnets!

Only.

Unexpectedly.

Uranium 235 was not extracted.

Instead, another element was extracted –

Plutonium-239!

Many scholars were surprised to find that

Plutonium-239 was actually similar to Uranium-235!

It was also able to crack after absorbing neutrons and then releasing three neutrons, which could also form a chain reaction!

Having reached this point!

All the scholars breathed a long sigh of relief!

They finally saw the light of victory for the “Atomic Project”.

Every scholar and staff member became more and more energetic.

They stayed behind every day to work extra hours!

There was a hint of expectation in their eyes.

For many ordinary staff members and scholars.

They simply did not know what this so-called “atomic project” was doing.

They roughly knew that

It seemed to be a very scary weapon!

How scary was it?

A doctor once described it as “devastating”!

At this point in time.

The time from the beginning of the atomic program.

Ten years had passed!

More time than the previous life!

But it couldn't be helped.

Xia's industrial base and technological level weren't that perfect yet!

Yan had already passed her 60th birthday.

Wrinkles were gradually increasing at the same time.

A strand of white hair had also appeared on the head.

Chang Yu Chun was even more than eighty years old.

The body began to become a little weak.

But every day he was still up early.

Spirited to lead the team patrolling around the Royal Tombs Mountain Range.

The other old men of the Great Desolate Army.

Most of them were also old.

Among the several great generals.

The youngest Han Xin was also in his fifties!

But the crowd was still vying for that one ever-vacant position of commander-in-chief!

Yan sixty-years.

The atomic project had finally acquired five kilograms of plutonium-239!

The plutonium was very dense.

Only the size of a grapefruit!

Over ten years of the atomic project!

And in the end it came to such a small ball?

But the crowd was excited!

This little five kilogram thing means

The initial success of the “Atomic Project”!

But there was an important problem!

That was

Where to conduct the test?

The Blue Star was so big.

It couldn't afford to be tossed around too much.

The air shook slightly.

Jiang Fan reappeared.

“Prepare for promotion conquest.”

Jiang Fan left a series of prompts.

If the Blue Star wouldn't work, then go to the outer planets!

There were plenty of worthless planets out there anyway.

The Great Desolate Army assembled again.

A new round of...preparation for promotion was also required!

Ten years on Blue Star.

Outside in March!

During these three months.

All the new students were silently cultivating their planet!

After the hustle and bustle of admission.

A calm had fallen!

Jiang Fan every day except for meals.

Chapter 352

352: Final Test! Promotion Eve! Amazing news!

Basically, he didn't go out so much.

Su Jicheng would often send Jiang Fan some important information.

There was also the initiative to provide some resources!

Of course, Jiang Fan couldn't use most of these things.

The other freshmen weren't like that except for Jiang Fan.

They still had to stay close to their respective mentors.

Let the instructor pass on more experience.

In general.

What kind of civilization to build.

Choosing the kind of mentor!

The experience of the mentor would give the planet owner a very big help!

Much better than building a car behind closed doors!

Not far from Jiang Fan, In Bu Jing Yues villa.

Bu Jing Yue came out of the awakening space.

Answered the communication from her mentor.

Jing Yue, hows the diameter of your planet now?

The middle-aged woman asked.

At this time, The only thing the people were concerned about was the planets diameter.

Once it reached the upper limit.

Then they could start preparing for the promotion.

It has already exceeded six hundred and fifty kilometers, and the rate of rise has become much slower, but it can still last for a while.

Bu Jing Yue said.

Not bad.

The middle-aged woman nodded slightly and said, Your teacher gave you the effect of the Heart of the Stars. You built three transcendent species, the initial stage is not so strong, but the development of the latter will be very strong!

This speed of yours is estimated to continue for another month or two, more than seven hundred kilometers is not a problem.

You develop at ease, you cant be ranked in this batch of promotions.

How many people in our school have reached the point of promotion now? Bu Jing Yue asked.

As far as I know, there are about ten.

The middle-aged woman said, There are three or four more than in previous years, similar to what was guessed before, they are all those freshmen who are at the top of the entrance ranking!

Lin Youhe, Xiang Zhifei, Wan Yunsheng these peoples planet diameter has exceeded seven hundred and fifty kilometers!

But All at a little over seven hundred and fifty kilometers!

The limit has been reached!

If there are no surprises, they will soon receive a promotion prompt from Awakening Space.

They are already making the final preparations now, and it is estimated that they will go for promotion next month.

What about Emperor Qing? Bu Jing Yue asked.

Well, Emperor Qing

The corner of the middle-aged womans mouth showed a smile and said, He also reached the upper limit of the planets diameter, but this limit is a bit Terrifying, It did not live up to the expectations of the schools leaders and teachers, but also exceeded the expectations of the crowd!

After listening to the middle-aged womans narrative.

Bu Jing Yue was also slightly shocked!

Then suddenly he thought of something.

And asked: What about Jiang Fan, He is in the same place as me? He should have the same diameter of the planet, right

Jiang Fan?

The middle-aged woman frowned slightly and shook her head: Im not sure about this, Su Jicheng side covered very tightly, we simply do not know what Jiang Fans current situation is!

In a lakeside villa area, One of the elegant villas.

A large room outside.

There were several people standing!

At the head of them was the majestic-faced first instructor Ao Xiong!

This room was not the same as the other rooms.

There was a layer outside

similar fluctuations to the star space that Jiang Fan got!

At a closer look, it wasnt a star space.

Rather, it was the use of a formation.

To increase the effect of this large star space where the Beidou University was located!

But in this formation, There were only a few of them in the whole school.

Every time it was used.

It costs a huge amount of resources!

Even Ao Xiong couldnt use it for a long time.

Once it reached the upper limit.

From inside came out Emperor Qing who was dressed in a bright yellow robe, full of spirit and temperament!

Teacher.

Coming outside.

Emperor Qing respectfully spoke towards Ao Xiong.

Ao Xiong nodded slightly, then looked at Emperor Qing and asked, How is it going?

Almost to the upper limit.

Emperor Qing replied, At most ten more days, the awakening space should have a hint!

The diameter of your planet has exceeded That value? Ao Xiong asked.

The tone seemed slightly nervous!

Even though Ao Xiong was the recognized number one tutor of Beidou University.

The students he had brought were also several dozen.

But

There was only one talent like Prince Qing before!

And how to evaluate a mentor?

The most critical thing was to look at the achievements of each cultivated student.

The most important of these was naturally

The results of the first-class planet promotion examination!

On the outside, The crowds expectation of Emperor Qing was

At least to pass the epic difficulty to do so!

And Ao Xiong himself was not satisfied.

He wanted a higher pursuit, not the legendary level, but-

Mythical level!

This difficulty was a level that many tutors and students can only dream of!

For a tutor.

Even a lifetime of just one mythical level student.

That would be completely enough!

Teacher, just exceeded.

Emperor Qing said with a smile.

There was silence in the air.

Immediately after that

Ao Xiong shouted loudly, Good!

The voice fell, he was laughing happily!

This legendary level of difficulty

It should be stable!

Even

May challenge higher mythical level! !

In Jiang Fans villa.

Detached from the awakening space.

Jiang Fan connected to the communication from Su Jicheng.

Tapped on it.

Su Jichengs projection then appeared in front of Jiang Fan.

Thats right.

During this time, Jiang Fan was also letting his old communicator rest.

He bought a brand new communicator, Projection viewing was possible.

Jiang Fan, how far has the diameter of your planet developed now?

Su Jicheng asked, The tone seemed a bit anxious!

Its still developing, it hasnt reached its limit.

Jiang Fan said.

How was the development of Blue Star?

In fact, Jiang Fan was able to accelerate it.

No need to consider the time outside.

But this acceleration would have to be determined by the progress of the atomic project!

Hasnt it reached the upper limit yet?

Upon hearing this, Su Jicheng faintly started.

Then he asked, I wonder if you can tell the teacher, what is the diameter of your planet now?

Its already over eight hundred kilometers, it seems like the teacher is in a bit of a hurry.

Jiang Fan smiled and said.

He couldnt possibly tell Su Jicheng what was going on.

He could only be vague about it.

Let Su Jicheng make up his own mind!

Otherwise

It was more than nine hundred kilometers.

And still able to continue to grow.

That absolutely had to alarm the entire federation!

No way.

Su Jicheng smiled and said, Now and your batch of freshmen, like Lin Youhe, Xiang Zhifei, their planet diameter has developed to the limit, already making the final promotion preparations!

But their planets do not exceed eight hundred kilometers in diameter and pose no threat to you.

But

Now there are rumors outside

Su Jichengs tone became somewhat gruff, saying, The diameter of Emperor Qings planet has reached a very terrifying situation, beyond what was originally expected by the crowd!

Chapter 353

353: Blue Star Cap! Unprecedented! Tips for Awakening Space

Very terrifying?

Jiang Fan pondered over what Su Jicheng said.

Could it be that exceeded nine hundred kilometers!?

Jiang Fan guessed.

How is that possible?

Su Jicheng directly shook his head in denial and said with a dumbfounded laugh, Nine hundred kilometers? In the entire history of the Federation Few people have even reached it!

I once told you before, the entire history of planetary development, the largest planet in diameter limit is nine hundred and forty-six kilometers!

Thats the most in a long history of billions of years!

The diameter of the planet is over nine hundred and forty kilometers. There is only one!

Not to mention, over 900, even if it is a value of 900 kilometers, it can be achieved there is not much!

Then how much is Emperor Qing?

Jiang Fan feels like he should read more about the history of planetary development!

There were still some misunderstandings about the upper limit of the diameter of the planet.

A level of planet diameter ceiling, eight hundred kilometers a hurdle, nine hundred kilometers is also a hurdle.

Su Jicheng said: Like Lin Youhe, Xiang Zhifei and the rest of them, the top of this years freshmen, the upper limit has been fixed at over seven hundred kilometers, did not break through the eight hundred kilometers of this hurdle!

The outside worlds expectations of Emperor Qing

It should be no problem to break through 800 kilometers, but it is difficult to determine how much it is!

And unexpected

Emperor Qing after the match is very good!

According to the information I got so far, it has broken through eight hundred and fifty kilometers!

The exact amount is unknown!

Su Jichengs tone was somewhat emotional!

Jiang Fan blinked his eyes.

His face was very calm.

Originally, he thought there were some challenges.

But he didnt expect

It was less than 900 kilometers!

Not even in the category of Jiang Fans opponent!

Eight hundred and fifty kilometers or more, ah.

Su Jicheng shook his head and lamented, This is also relatively rare in the history of our school!

This diameter should be able to steadily pass the promotion test difficulty of the legendary level!

If it is mythical, there is also a certain possibility.

The specific depends on exactly how much is more than eight hundred and fifty kilometers!

These are the data of some students in the schools history before the promotion, you see for yourself.

Su Jicheng transmitted another piece of information to Jiang Fan.

In fact, It had already been transmitted before.

But the history of Beidou University was also very long.

There was too much information.

Jiang Fan didnt even read it all.

Su Jicheng was choosing an important part of it this time.

Those with a planet diameter of eight hundred and fifty kilometers or more can cross over into the historical level of genius.

Su Jicheng teleported while saying, Normally!

To challenge the mythical level of difficulty

It also requires at least this value.

If you want to challenge the Great Mythic level, its estimated to be over 900 kilometers? Jiang Fan asked.

Thats right!

Su Jicheng nodded and said, The Grand Mythic level is considered the highest difficulty that humans have been able to challenge through the ages!

Even those supreme heavenly pride geniuses who are countless times stronger than Emperor Qing.

Want to successfully challenge this difficulty

The probability is also not high!

Small mythical level is still okay.

The Great Mythic level is not something that can be passed easily!

The entire history of the Federation, though few of them!

None of them were the most demonic geniuses of the time, the existence of other geniuses of an era!

But even if the diameter of the planet exceeds nine hundred kilometers, the challenge of this difficulty is extremely difficult!

According to such a projection, wouldn't the eternal level require over nine hundred and fifty kilometers!?

Jiang Fan asked with a smile.

That's theoretically true.

Su Jicheng also laughed and said, But since no one has ever succeeded, no one knows for sure!

What's more

And no genius has ever broken through over nine hundred and fifty kilometers!

This value is too hard and too difficult. It's simply not something you can reach if you want to!

It's over 940 kilometers, and it's the one I told you before!

Then this is it successful? Jiang Fan asked.

He didn't choose the eternal level

Su Jicheng directly used the communicator to project out a piece of information and said, Look for yourself. This one is very famous. He did not choose the Eternal level difficulty!

Instead

He securely chose the Great Mythic level!

It worked out in the end!

Very wise!

Su Jicheng's eyes flashed a trace of appreciation and said, According to this one later revealed, he also wanted to challenge the Eternal difficulty level, but

He was not at all sure.

He vaguely feels that if he goes to challenge, he will definitely die!

Speaking of which, this is only a first-level planet, and there is still a long way to go before it truly grows.

Stability is better than everything. As long as you are successfully promoted to the second-level planet, it is possible to continue to develop!

Su Jicheng looked at Jiang Fan and said, it should also not distract you for the sake of Emperor Qing, don't change your goal easily, the legendary level is for you

It is the most stable!

I know.

Jiang Fan faintly nodded his head.

He naturally wouldn't change his goal easily.

His goal was always

Eternal level!!!

After ending the communication with Su Jicheng.

Jiang Fan continued to be busy with a fresh round of training for the Great Desolate Army!

In this past decade.

Although the countrys strength was developing the atomic program!

But the technology of the army side of the Great Desolate Army did not fall behind!

Instead, new inventions were born one by one because of the atomic plan!

The progress was very much improved.

According to Jiang Fans plan.

It was faster than before.

Every month, going to the outer planets to train in actual combat!

Jiang Fan carefully selected opponents.

In order to deal with more transcendent opponents!

Unlike before, now theres no need to go to the planet association!

There were many unowned planets inside Beidou University that belong to the school!

Even

There were also some dominant planets.

It could also open up!

Of course, Most of these were used for training purposes.

But this time to the outer planets.

The most important thing was not the actual training.

Rather, it was The first test of the atomic program!

The product made from plutonium-239 was used!

When the Great Desolate Army returned from the outer planets.

Every one of them had a huge look of excitement on their faces!

Yan, who was already over 60 years old, couldnt hold back the joy in her heart either!

Quickly walked into her room.

Looking up to the sky.

Excitedly, she said, Father God! We succeeded!

She could basically guess now.

Jiang Fan could control all the information about the Blue Star.

Well done!

Jiang Fan appreciated it!

But Plutonium 239 wasnt enough.

Thereafter, Yan and a group of scholars continued their research on U-235!

Perfecting the ultimate piece of the atomic plan!

At the same time.

Preparations for the promotion campaign were also quietly and quickly being carried out in the shadows!

Looking at Yans busy figure.

Everyone realized that

This should be an even more important battle than the previous glory campaign!

It was necessary to make a thorough plan for this!

After observing the busyness of the Great Desolate Army.

Jiang Fan shifted his gaze to the second land.

The number of giant beasts here was already high.

The Giant Three-Headed Serpent was building an unprecedented giant beast dynasty!

Right.

It traveled to the territory of a single giant beast, forcing the other to submit to it!

If it doesn't submit.

Then It simply killed!

Chapter 354

354: Blue Star Cap! Unprecedented! Tips for Awakening Space

Cold-blooded and decisive!

If surrendered.

Naturally, it's good to talk.

One of the giant beasts

None of them was a match for the giant three-headed snake.

Even if there were smart beasts and joined their hands.

They still can't beat it!

Giant three-headed snake was too powerful!

Completely crushed them at least one level.

Most of the giant beasts had submitted!

Finally!

Only the largest group of atomic dinosaurs remained.

The giant three-headed snake also set its eyes on these lazy guys!

In fact.

One of the major reasons the giant three-headed snake made the other giant beasts submit was

It was aware of the threat of the Atomic Dinosaur clan from the very beginning!

It planned to deal with the Atomic Dinosaur clan after taking care of the other giant beasts.

Then it would deal with the Atomic Dinosaurs!

But the battle didnt break out.

The number of Atomic Dinosaurs was still too many.

There were at least a dozen of them.

Their strength was still very strong!

The most critical thing was its laziness.

Not the slightest desire for dominance at all.

Giant three-headed snake, after some consideration, decided not to take on the Atomic Dinosaur!

A level one planet is still too small.

Jiang Fan observed the giant beasts and couldnt help thinking, The strength and number of these giant beasts are bound, if it were a level two planet

They should be able to become stronger!

Like atomic dinosaurs, although the strength was also very strong.

But it had not yet reached the expectations of Jiang Fans heart.

The body also did not give birth to any reaction furnace!

Lets wait for these big guys to get stronger before we let them on the field. Jiang Fan had a decision in his heart.

Spring went and autumn came.

Another period had passed above the Blue Star.

For the first time, the diameter of the planet broke through Nine hundred and fifty kilometers!

Exceeded the previous ones nine hundred and forty-six kilometers.

And created a record in the history of the entire planet!

But not a single person knew about it.

Jiang Fan also could not say, This wasnt the limit.

It was still rising rapidly upwards!

The population explosion was still going on.

Jiang Fan was watching the end of the atomic plan.

He was also paying close attention to the changes in the diameter of the blue star sphere.

According to common sense.

When it reached a stage, the diameter of the planet would reach the upper limit.

Subsequently

A reminder of planet promotion will appear in the awakening space!

It means that the planet was going to take the promotion test.

Nine hundred and sixty kilometers!

Nine hundred and seventy kilometers.

Nine hundred and eighty kilometers.

Nine hundred and ninety kilometers.

Nine hundred and ninety-eight kilometers.

Nine hundred and ninety-eight point one kilometer.

Jiang Fan silently watched the data of the planet panel jumping little by little!

Finally!

After reaching nine hundred and ninety-nine kilometers.

The value stopped growing!

It was completely stagnant.

Even though the life of the Blue Star was still slowly increasing.

But the diameter was only decreasing.

And would not continue to increase!

Jiang Fan was also aware of it.

This should be the Blue Star, and also The limit of a first-class planet!

The diameter of a first-class planet is nine hundred and ninety-nine kilometers.

Jiang Fan knew it by heart.

This meant that

Blue Stars development came to the upper limit.

If it didnt go for a promotion.

The area could not become larger.

Even if the level of technology could continue to progress.

But the resources in all areas behind it were limited.

It also limits the development of technology.

As expected.

Soon after, the diameter of the Blue Star reached 999 kilometers.

Awakening space slightly vibrated.

A line of text appeared

The planet has developed to its limit. Do you want to take part in the planet promotion test?

There are two more options below

Yes and No.

Planet promotion was not mandatory.

If you were not sure.

You couldn't take part now.

But there was one thing to note.

The diameter of the planet was decaying.

If the latter was below the upper limit.

This line of prompt text was going to disappear!

There have been many such funny things that have happened before!

Many first-class planet owners in order to be more secure.

Did not immediately go to the promotion test.

Instead, they went to the outer planets to train in actual combat.

The result!

The created transcendent species suffered heavy losses.

Vitality declined.

The diameter of the planet fell straight down.

It took a long time for the latter to climb back up again!

This wasted a lot of time.

There were some worse scenarios.

The planet shrunk directly.

It would never reach the limit again!

Steady stability.

But too much stability was unnecessary!

Just like the transcendent, cultivation would produce demons hearts.

The planet did not promote for a long time.

There would be the same problem!

Not only was there a hint in space.

The planet panel also changed.

Jiang Fan looked at the current Blue Star panel.

There was some more text on it that wasn't there before

Planet name: Blue Star

Planet level: Level 1

Planet diameter: 999 km (promotable)

Planet species: 1450

Extrapolation route: None

Jiang Fan detached himself from the awakening space.

Didn't wait to contact Su Jicheng.

Su Jicheng communicated over.

Jiang Fan, you know what I'm going to ask?

Su Jicheng said with a smile.

My planet has received a prompt from Awakening Space. Jiang Fan said.

That's good.

Su Jicheng breathed a sigh of relief.

Because

the more gifted the planet, the shorter the time it would take to come to the cap.

Now this freshman class at Beidou University.

There were already over fifty people who had reached the upper limit of the diameter of their respective planets!

They were early in their final preparation!

These were the groups with the highest talent in the New Year.

But Jiang Fan was rather late.

This was natural because the planet's diameter of the Blue Star kept rising.

It didn't stop until it was nine hundred and ninety-nine kilometers.

There was nothing Jiang Fan could do.

According to the convention of planet promotion.

Su Jicheng gave Jiang Fan a scientific explanation: There are two times a year, once every six months, in unison!

Most of the new students in your batch will have their promotion tests next year!

And the best freshmen like you, Jiang Fan, Prince Qing, Lin Youhe, are the first batch!

Jiang Fan faintly nodded his head.

The sooner you get promoted,

Naturally, there were advantages.

After all

The promotion of the planet had certain benefits for the planet master himself!

The most obvious ones were increased lifespan and enhanced physique!

Get ready, this promotion test will be held in unified in ten days!

Remember the point!

Dont change the difficulty at will! Prepare for the level and choose the corresponding difficulty when the time comes! Su Jicheng warned earnestly.

After ten days?

Jiang Fan slightly narrowed his eyes after he hung up the communication with Su Jicheng.

He walked out of the villa.

Took a deep breath.

Jiang Fan found that the surroundings were silent.

Not many people appeared either.

Jiang Fan knew.

This should be because the other people nearby knew that he was preparing for a promotion.

So they didnt dare to come and disturb him!

Ten days might be nothing to others.

But for Jiang Fan, he still had a lot of things to do.

There were more fallen leaves outside the house day by day.

After that, Su Jicheng also did not come over or communicate!

The entire school also seems to be more quieter than usual!

In such a quiet and tense atmosphere.

Ten days passed in a blink of an eye!

The planetary promotion assessment day, which had attracted the attention of many leaders and teachers in the school, has arrived! !

Chapter 355

355: Planet Promotion Examination Begins! Surging geniuses!

-Early in the morning.

Jiang Fan got up early.

He ate breakfast and went out to look.

Found Su Jicheng's car already waiting outside the villa.

As a mentor, naturally, he could have his own car.

Because Su Jicheng only had one student, Jiang Fan, so he came to pick him up personally.

Most of the other new students were so lucky.

The car started quickly.

Soon!

It came outside a wide arena.

At this time, outside the arena, Many people had already come!

Jiang Fan looked over and saw a lot of familiar faces

Lin Youhe, Xiang Zhifei, Wan Yunsheng, Wang Yiteng, and so on.

All of them were the top ranked existence of this freshman class!

Expressions were as good as the previous Freshman Challenge Relaxed!

The entrance exam was nothing difficult for these geniuses.

But the planet promotion test was not the same!

Even in the most stable difficulty, There was also the possibility of failure!

There was also a hint of luck involved.

Not to mention that many geniuses were trying to challenge higher difficulties!

The probability of failure was even greater.

Many freshmen were still constantly taking deep breaths.

To get rid of the tension in the heart.

Next to these new students, Also stood their respective mentors.

Seemed to talk and laughing.

But deep in the eyes, there was also a trace of nervousness.

every year, They mostly look forward to this time, and were the most reluctant to face !

According to the practice of previous years.

After the planet promotion examination.

The best freshmen of this batch.

Some of them are bound to fail!

Thus

Fall down!

Su Jicheng barely said anything to Jiang Fan along the way.

It was for fear of putting pressure on Jiang Fan!

Seeing Jiang Fan walking over.

It attracted everyones attention!

After all

Jiang Fan was the champion of the Freshman Challenge.

The existence that defeated Emperor Qing!

It was also a sensation!

Jiang Fan, this way.

Lin Youhe looked like he knew himself well and greeted Jiang Fan as he went over.

Jiang Fan didnt refuse.

He walked over to Lin Youhes group of people.

Jiang Fan, dont blame me for being too direct.

Lin Youhe spoke, Were all very curious, now the whole school is rumored that you and Emperor Qing are the only two contenders for the strongest freshman in this years class!

Whoever can win in the planet promotion test, then

Who is the strongest freshman!

Emperor Qings planet is over eight hundred and fifty kilometers in diameter, you should know that right.

I know.

Jiang Fan said.

Yours should be about the same, right?

Lin Youhe and the others were all looking at Jiang Fan.

Of course its not bad.

Jiang Fan smiled faintly.

Oh.

Lin Youhe and the others glanced at each other.

They all saw the doubts in each others eyes.

Actually, they heard some rumors.

So they asked Jiang Fan tentatively.

But I didnt expect Jiang Fan to say it directly either.

You and Prince Qing are at least relatively stable at the legendary level, its harder for us

Next to Xiang Zhifei sighed and said, Like us, the planet is less than eight hundred kilometers in diameter, the king level of difficulty is more stable!

At most, the challenge of the epic level!

If we can pass the legendary level

For us it is against the odds.

Lets make a steady promotion first. In previous years, there were a lot of geniuses with stronger talents than us. Because of their overconfidence they failed

Wan Yunsheng on the side smiled and comforted.

Hmm?

At this time, The crowd suddenly realized something.

Turning their heads towards the left, they looked.

Only to see

-Ao Xiong and several teachers accompanied The Emperor Qing, who was dressed in bright yellow robe.

The dragon walked towards this side.

He swept a glance at this side.

After seeing Jiang Fan, there was a slight pause.

I heard that this Jiang Fans planets diameter limit isnt ideal. A teacher at the back said with a smile.

Not very clear, Su Jicheng side covered tightly, tried several times, but refused to leak.

Another teacher said.

Its not that he didnt want to reveal this, it should embarrass him to say it, especially after hearing about the diameter of the planet of our Emperor Qing.

-A teacher smiled gently.

It is estimated that over eight hundred kilometers is no problem, but it will be difficult to compare with Emperor Qing

Several teachers were discussing.

You dont have to worry about this Jiang Fan.

Ao Xiong looked at Emperor Qing and spoke, You do well for yourself Its fine!

I know.

Emperor Qing nodded slightly.

It wasnt just Beidou University.

This day

It was also the time for the entire Federation to conduct a unified planetary promotion assessment.

It was held twice a year.

The time was unified!

No exceptions!

If you miss it, you'll have to wait for the next opportunity!

And, you'll have to wait until the diameter of the planet reaches the upper limit.

If you immediately take part in the promotion

The probability of success would instead be greater!

But for some planet owners with more average talent.

They would rather accumulate more time to improve their strength.

And thus challenge a higher difficulty!

Even

Some people were not happy with the current state of the planet.

They wanted to be like the few people in history to win against the odds!

I have waited for three years, three years, just to wait for this opportunity. I want to change my life against the heavens.

In a normal university, a male student clenched his fist.

His eyes filled with determination!

He was three years ago.

The diameter of the planet reached the upper limit.

But it was less than 500 kilometers!

Many teachers thought that

For this diameter, it was more secure to choose the ordinary or elite level!

But he was not willing to!

He was holding back for three years.

And waited until everything felt enough.

Only then, he came to take part in the planet assessment promotion!

This time!

He was going to challenge the Epic level difficulty!

Once the challenge was successful.

That was the real heavenly change success!

In a place very far away from the Beidou University.

It was a dynasty with a vast territory.

The name was The Fire Dynasty!

This was a dynasty that was much more powerful than the Yong Yang Dynasty!

The strength was enough to rival the top ones of the thirty-six superlative academies!

Because this Li Huo Dynasty had three level six planet masters!

Inside the Li Huo Dynasty Palace.

-Inside the immense palace.

A tall man was wearing a golden yellow robe stood on the steps.

He was the current emperor of the Li Huo Dynasty!

He was also a powerful level six planet master.

It was because of the existence of this person.

The Li Huo Dynasty in the Federation was powerful!

Almost no one dared to provoke!

At this moment!

A sound of footsteps came.

Chapter 356

356: Planet Promotion Examination Begins! Surging geniuses!

A handsome and dignified young man walked in from outside the palace.

He came down the steps.

He bowed respectfully and said, Father!

The tall man nodded slightly and said, Zhe Er, how are the preparations going?

Everything is ready.

The handsome youth replied.

With your talent, it is most secure to pass the small mythical level difficulty. The tall man said, The Great Mythic difficulty is also very possible. All you have to do is to pass this planet promotion test safely. There is still a long road ahead!

The tall man taught him earnestly!

Unlike the Yong Yang Dynasty, there was little competition for the successor of the Fire Dynasty.

Basically, there was no suspense.

This handsome young Emperor Zhe had just awakened the diameter of the planet exceeding 50 kilometers!

He created a record of the dynastys history!

Others were shocked!

As it was far more than other people of his generation.

The later development was also smooth sailing!

The record of the Li Huo Dynasty was broken again at the entrance exam.

Before half a month, the diameter of the planet was over nine hundred kilometers of the upper limit!

It was said to have set an unprecedented record!

It was known as the first heavenly pride of the Li Huo Dynasty throughout the ages!

Even in the Federations history, such a demon wasnt weaker than those epoch-making geniuses!

This time, the crowd expected more from the planet examination promotion!

They wanted to see how this Emperor Zhe could once again create brilliance!

Prince Zhes father knew that the more demonic genius was the more arrogant!

The more you want to challenge higher difficulties.

I know, Father.

The handsome young Emperor Zhe responded.

Only a genius who can grow smoothly all the way down is a genius! Back then, in your fathers and my generation, there were several who were more talented than me, but in the end

The only one who became a level six planet master was me!

The tall man admonished, using himself as an example.

Emperor Zhe was silent.

He was certainly clear about the tall mans deeds.

The talent was not the top.

What passed at that time was only the legendary level difficulty!

And among his peers.

There were several existences that passed the mythical level.

The latter was not even a successor.

But at the end of the day

He became the emperor of the Li Huo Dynasty Tall man!

Steadily pass the mythic level difficulty, and the future level six planet master will be definitely yours!

The tall man looked at Emperor Zhe, raised his volume and said, Dont think about the impossible Eternal level!

Dont learn from your eldest uncle!

Emperor Zhes eldest uncle.

That was the brother of the tall man!

Back then, the stunning level was not much worse than the current Emperor Zhes son!

The upper limit of the planets diameter was also over 900 kilometers!

It was known as the most demonic one in ten thousand years.

The glory was unlimited!

This great uncle was very high-spirited.

In the planetary assessment, they chose

Eternal difficulty that no one has ever passed!

The result was no surprise!

Failed!

No matter how demonic and scenic he was before.

But he stopped at one level, one planet master for life.

Although this uncle wasn't dead.

But he was living like a walking corpse.

The tall man warned him.

He was afraid that Emperor Zhe would repeat the same mistake.

Even though the Emperor's son's planet diameter was higher than this uncle!

But it was far from the ultimate eternal difficulty level

It was still short!

I remember, Father.

Emperor Zhe said, I won't go for the Eternal Level difficulty.

There was a deserted area.

Not even an inch of grass grew on the black earth.

A young girl walked silently in the rolling sand.

While looking ahead, mumbling to herself.

Father, mother, when I finish the planet examination and promotion, I will definitely take revenge for you!

At the same time.

Sixth Academy of Stars.

From the six schools of the Sixth Academy of Starlight.

All the freshmen of these classes were gathered here!

There were hundreds of people!

Each one of them was the most demonic group in their respective provinces!

Even

Many of them were also the overall top students!

The Sixth Academy of Starlight was not just a name.

The six schools were also Very united with each other!

Every year, the planet promotion examination would be unified!

In front of these new students.

There was a man in black with a terrifying aura.

This man in black was the chief instructor of this years training, but also -a level six planet master!

These were also the resources that a top ranked university like the Beidou University couldnt come up with!

You are all the most demonic existence in this years freshmen.

The man in black looked at the hundreds of freshmen and shouted, I have no other requirements for you, only one point

Never choose the eternal level difficulty!

When the man in black finished his lecture.

One by one, the other teachers around were all talking.

Every year, they say this, but

A teacher shook his head and said, If geniuses were so obedient, would there be so many examples of fallen people every year?

Its not a genius if youre not high-minded.

Another teacher laughed and said, We can only give advice as teachers, and they are the ones who make the choice in the end!

Look, there must be a lot of people who choose Eternal difficulty this year, especially these top geniuses.

A teacher sighed.

Its not just the top academies.

The entire federation, Even the entire vast and incomparable territory.

Whether it was the Li Huo Dynasty Or those powerful clan forces.

Even the most powerful behemoths!

They cultivate even more amazingly talented demons.

Before this planet promotion examination.

The last sentence was almost the same.

That was

Dont choose Eternal difficulty!

Dont choose a difficulty higher than your own strength.

Inside Beidou University,

A vice-principal, as the schools representative, was also giving his final teachings!

Beidou University was not worried about the eternal level.

But there were examples from previous years.

Many geniuses were so deceitful.

They said that they were choosing the epic level of difficulty.

But in the end, their choice was a higher legendary level, and even mythical level!

The development on each individual planet was not clear.

No one could say if they could pass the test or not!

Okay, you guys go in.

The vice principals words fell.

The arena doors opened.

This time fifty-two freshmen from Beidou University who participated in the planet promotion examination entered!

Jiang Fan also walked in with the group.

Inside the arena, there was actually a small star space.

Jiang Fan looked around.

He knew that

This should be a temporarily condensed by the spirit of the planet.

It wasnt quite the same as the one Jiang Fan had gotten.

It wouldnt last too long.

It wouldnt consume much origin power either.

It turns out that there are over sixty newborn planets that have reached their maximum diameter. Lin Youhe on the side lowered his voice and said, But only fifty-two have come!

Chapter 357: Planet Promotion Examination Begins! Surging geniuses!

“There were some new students who still backed out!”

Jiang Fan nodded slightly.

This was something that happened in previous years!

Everyone wanted to challenge a higher level of difficulty.

Trying to be more secure!

But according to the results.

Instead, they ended up being more likely to fail!

Stepping inside the arena, into this temporary star space inside.

-Everyone sat down on their knees.

With closed eyes, to meditate.

Saying no words!

The role of this star space was not huge now, just to make every new student better... recharge.

Through the information sent by Su Jicheng, Jiang Fan almost understood the assessment process for the planet's promotion!

Two batches per year.

Each batch at the same time!

But exactly how much time was different every year.

Probably around this time.

Sometimes it would be ten minutes earlier.

Sometimes it would be ten minutes later!

Ten minutes before the test.

In the awakening space

A prompt would appear!

There would be a countdown that appears.

The crowd did not just close their eyes to rest.

They also entered the awakening space.

To make the final arrangements for the transcendent species of their respective planets.

Time passed little by little.

There was silence in the arena!

The tension in the air was frozen to the extreme.

Under this unprecedented silence.

Finally!

After about thirty minutes.

Jiang Fan saw inside the awakening space.

A line of numbers appeared.

It was a countdown —

10:00.

When the countdown reached zero.

The examination of planet promotion would officially begin!

It was the examination arranged by Awakening Space.

Who knew what the assessment would be?

Outsiders couldn't interfere either!

Even the incredibly powerful sixth-level planet master could only watch from the outside!

There were people who tried.

But it didn't work!

One could only rely on the ability of the individual level one planet masters.

The countdown was decreasing by the second.

After entering the last minute.

Jiang Fan saw Lin Youhe next to him glance toward himself.

The corners of his mouth moved slightly.

It seemed to say

Go for it!

"You too."

Jiang Fan's lips also moved gently.

He knew that Lin Youhe wasn't really cheering for him.

Rather, it was his way of giving him relief from the tension!

It had to be said.

The effect was wonderful.

Ten, nine, eight, seven

Three, two, one.

Zero!

Finally!

At the end of the countdown.

Everyone just felt a blur before their eyes.

But after the sight got clear they found themselves

They were no longer staying in the square.

The environment had changed.

Surrounded by a space of nothingness and chaos.

And they were all alone.

Jiang Fan looked around.

It was similar to the examination hall during the college entrance exams.

But it was more real!

According to the information Su Jicheng gave.

Even those powerful planet masters didn't know what exactly this place was.

It was clear that

This was during the planet promotion mission.

A measure that Awakening Space had in order to protect the planet masters!

Jiang Fan didn't care that much.

After feeling conscious into the awakening space.

At this moment in the awakening space, there was already a line of text alert —

The diameter of the planet had reached the upper limit, whether or not to promote it?

There were two options below

Yes, and No!

“Yes.”

Jiang Fan immediately chose.

There was no doubt about it.

The text immediately changed —

The planet promotion test had officially begun. Please choose one of the following test difficulties.

There were eight options below, which were:

Ordinary, Elite, Commander, King, Epic, Legendary, Mythic, and Eternal!

To the right of the Mythic level.

There was also a bracket.

Inside the brackets there are two more options

Minor Mythic Level and Major Mythic Level!

At this time, no one would immediately go to the point.

Even some freshmen who had previously prepared securely.

At this time also could not help but hesitate a little!

Because

They only had one chance!

After choosing, it was impossible to regret!

Not to mention those geniuses who had some reluctance inside.

It would be between two adjacent difficulties

The two were not the same.

For example, the epic level and the legendary level.

Difficulty was different.

Later, the talent of the second level of the planet was also different.

The gap between each level was still not small.

Everyone wanted their planet to be more talented in the future!

Of course.

In the long history.

There was no shortage of guys who were too nervous.

And accidentally chose the wrong option.

That could be cool.

There were still some people who would temporarily change their minds!

When choosing the difficulty, anything could happen.

For Jiang Fan, his heart was very calm.

He swept through the eight options.

And finally!

Jiang Fan was very calm and chose

Eternal level!

The choice was complete.

The text in the awakening space changed again...

The “Eternal Level” planetary promotion assessment task has been selected. Please get ready. In ten seconds, the Eternal Level difficult task assessment will be conducted.

Ten seconds passed in a flash.

The specific assessment task appeared in the awakening space.

“I wonder what the eternal level difficulty mission will be?”

Jiang Fan looked away with a hint of curiosity and anticipation in his eyes.

Chapter 358

358: Highest Difficulty Mission! Endless star field! Terrible World

With Jiang Fan's wholehearted attention, another line of text appeared in the Awakening Space

Eternal level quest: kill the Leif Grand Commander of the Island World and destroy his forces.

Time limit: Three days.

The timer would start in one minute.

Island World? Grand Commander Leif!?

When he saw this line of text.

Jiang Fan couldn't help but raise his eyebrows slightly.

According to the usual practice in the previous years.

The Awakening Spaces promotion assessment missions.

All of them were in the Endless Star Realm!

Endless Star Realm

As the name implies!

It was a star field with an unknown end.

There were many living planets in it!

There had been many people who had gone to explore.

Even

Including the powerful sixth-level planet masters.

But some sixth-level planet master not only failed to explore this endless star field.

Instead, they got lost in it. And never came back!

Therefore, outsiders could not help!

Because you simply did not know where the mission test would be on a planet!

The endless star field was a vast and endless planet!

The distance was too far and far away!

Besides the awakening space, no one else could reach it!

Is it three days?

The time was very urgent.

Of course, the time differed from the real world.

Rather, it was the time for the assessment of mission location.

If they did not complete the task within three days.

Then

It means failure!

The promotion test was not just an examination of strength.

There were many other aspects of the requirements!

Especially for the eternal level The ultimate difficulty.

The requirements would be very high.

Jiang Fan immediately passed the relevant information to Yan!

At this time, Yan and the Great Desolate Army were already ready!

One hundred thousand Great Desolate Army lined up in a neat line.

Standing densely at the entrance of the planet passage!

Followed by a car and a tank!

And a set of heavy weapon and so on!

For this battle, the elites of the Great Wilderness Army were all out.

With all weapons of mass destruction.

The leaders of the army were still Xu Tiande, Le Yi, Han Xin, Lu Sun and Han Zuhu!

The others were all old.

Han Xin was still young and strong!

Therefore

This time, the commander of the campaign was Han Xin!

The two old companions who fought before, Chang Yu Chun and Su Qin, were too old.

And did not insist on accompanying the team.

Instead, they stayed at Blue Star.

To stabilize the rear, also in case of emergency!

-Minutes passed quickly!

Planet promotion assessment Officially started!

A three-day countdown appeared in Awakening Space!

At the same time, the planet passage on the Blue Star opened on time.

Depart!

Han Xin ordered.

The group of special combat teams were walking at the front of the line.

These were the elites of the Great Desolate Armys elites!

Selected from a hundred miles!

Trained for years, they were prepared for this battle!

They were proficient in various abilities!

When the special combat team stepped through the passage.

What came into view was a lush and dense forest!

The trees were incredibly tall.

Basically, they were over ten meters.

There were over twenty meters.

As if in a primitive forest.

Nature knew nothing about vegetation.

Swept a glance.

Overhead was a cloudless blue sky.

The nose smelled the fresh air.

And the rich aroma that filled the air.

Although it was only for three days.

Time was tight, but the Great Desolate Army was not in a hurry.

This world differed completely from the previous outer planet.

Because it was in the endless star field!

It was likely to be a complete planet.

The strength of the other side was even more unknown.

Considering that countless people had challenged the eternal level of difficulty before.

In the end, they all failed.

Jiang Fan could basically conclude.

This world was at least a second level planet or higher!

First, build the passage entrance and make a good defense.

Han Xin took a quick look around and began a series of orders!

The first to enter this world was An elite special operations team of one thousand people!

Dressed in alloy battle suits.

Equipped with the latest high-end weapons.

The first thing they did was Check the neighborhood.

Clean up the surrounding threats!

Secure this passage entrance!

The special forces team of 1,000 people split into ten teams.

Quickly checked around the perimeter and made sure its clear!

Special Warfare Team 1, go scout the situation outside, be careful and very careful again. Once you find something wrong, dont act rashly. Report to me first. Han Xin continued to order.

At this time, the Great Desolate Army was already equipped with radios.

They could communicate over short distances.

While the special combat team went out to investigate.

The others didnt stay idle either.

They started to construct a simple base at the entrance of the passage!

Naturally prepared materials and stuff long ago.

A group of Great Desolate Army came in with firewood knives and saws in hand.

And started working on this dense forest.

The main reason for not using a chainsaw was

Avoid making too much noise!

But there were a lot of soldiers in Great Desolate Army.

Several people worked together to tackle a tree.

Soon

A gigantic tree fell down.

When the forest was cleared of the gigantic trees.

A tank from the middle of the passage drove in!

They placed it at the edge of the woods.

A defensive circle was formed!

The felling of large trees continued.

A path had to be cleared out for the Tank and vehicles.

Han Xin observed the surrounding situation.

Usually glancing at the radio now and then.

At that moment.

A communication suddenly came over the radio

Intelligent life found, intelligent life found.

Be specific. Han Xin said in a deep voice.

Were two kilometers away and have found a person.

A person?

Han Xin raised his eyebrows.

Yes, not a transcendent, but similar like us, very weak, similar to an ordinary person. We have him subdued now. What should we do next?

Send a few people, bring them back immediately. While others continue to explore.

Since there are people in this place, it means that there is a swarming point in this world nearby, you must be extremely careful!

Not long after ending the communication.

There was a loud noise outside the woods.

Ten special warriors escorted a young man with brown hair, dark skin and a height of about 1.7 meters

quickly walked over!

Except for the flowery, green, unknown material clothes he was wearing.

In other respect, it looked no different from ordinary people.
The scholars of the research team had already gathered around.
This time for the operation, they brought a full thousand scholars and doctors!
All of them were top-level existences in various fields.
The brown-haired man saw the situation in the woods.
Especially the thousands of heavily armed warriors and a steel tank.
His eyes were wide open.

% ** #.

He gibbered something in his mouth and didnt know what was being said.
Then shrieked loudly.
But the special warrior next to him was prepared.
He stuffed his mouth with a cloth!

Language barrier.

This was a big problem of planetary conquest.
In the previous conquests, just run straight through it.
But not this time.

Han Xin took out a leaf.

Put it in his hand.

Looking at the brown-haired man, he asked, Whats your name?

The brown-haired man faintly stared.

Because

He realized, he could actually understand Han Xins words.
He couldnt help but look at the leaf in Han Xins hand one more time.
Basically, he guessed it.

Chapter 359: Highest Difficulty Mission! Endless star field! Terrible World

This was the leaf's ability.

This leaf was named – translation leaf!

As the name implied, its function was to ? translate most of the speech.

It was a resource given to Jiang Fan by Su Jicheng!

It was worth at least hundreds of millions outside.

Many people couldn't afford it.

“Who are you people? How come I've never seen you guys before?”

The brown-haired man's eyes rolled.

While looking at the Great Desolate Army.

While questioning back.

"Name, age, and identity origin."

Han Xin directly took out a dagger directly.

And stuck it on the brown-haired man's dark face.

Looking at the glowing blade, the brown-haired man experienced the icy touch.

The brown-haired man was scared to the point of cold sweat and hurriedly said, "Don't Don't don't, don't kill me, I'll talk, I'll talk."

Under Han Xin's icy gaze, stare.

The brown-haired man continued, "My name is Luke. I'm nineteen years old, and I'm from Xiangye Village."

"Have you ever heard of the name Grand Commander Leif?"

Han Xin asked.

The Great Desolate Army had come here to do two things –

One, figure out what kind of world was this place?

Two, figure out what the Grand Commander Leif in the mission was?

"Grand Commander Leif?"

Luke, the brunette, was stunned for a moment.

His eyes rolled.

Then he shook his head and said, "Never heard of this person."

Looking at Han Xin's icy gaze, he hurriedly begged again, "I'm just a small villager, with an old man at the top and a young man at the bottom. All of you big brothers must not kill me."

Han Xin still wanted to ask something.

At this time, the radio rang again.

A voice came from inside.

But it was a report from Special Operations Team 3 –

"Situation spotted, we are at a nearby prime point. Using binoculars, we see the sea in the distance."

"The sea!"

Han Xin raised his eyebrows.

“He Can’t be completely sure if it’s the sea, but it looks like endless water, so we guessed this should be an island.”

Ending the communication.

Han Xin looked at Luke, the brown-haired man, and asked, “What island are you on here?”

“Uh

Luke, the brown-haired man, hesitated for a moment and said somewhat embarrassedly, “Small islands like ours have little of a name, but

“Outside are generally called here as the fragrant island?”

“Fragrant Island?”

“Right.”

Luke, the brown-haired man, nodded and said, “Because we produce spices here. They usually come to buy a lot of businesses, so the outside world are so called.”

“Is there an island master here or something like that?”

Han Xin asked.

“Is there an island master or something?”

Luke, the brown-haired man, was stunned for a moment, then shook his head and said, “It doesn’t seem to be, there are several villages on the island, but there are village chief.”

“Good, you answered honestly.”

Han Xin nodded his head.

He seemed quite satisfied.

Then he raised his hand, signaling the Great Desolate Army to release Luke.

Looking at Luke, he smiled and said, “Don’t be afraid, we’re not any bad people. You can go back now.”

“Really?”

Luke was overjoyed.

Seeing the two special warriors beside him really took a step back.

A hint of excitement flashed in Luke’s eyes.

He took a few steps backward.

Seeing that no one was really blocking him.

He immediately flew away.

When Luke’s figure almost disappeared.

Han Xin winked at several special warriors on the side.

Several special warriors nodded and chased after him.

“This kid is lying.”

Lu Sun, who was next to him, spoke up.

The crowd had experience.

Even though this young man named Luke acted very cunning and smart.

The acting skills were also good.

But still he couldn't hide it from the crowd's eyes!

“If this is really just an island, then we need to speed up.”

Han Xin spoke up.

“I'll lead the group.”

Le Yi spoke up.

Although Le Yi was also over sixty years old now.

But he was still in high spirits!

His body was very fit!

This was also the result of keeping up with his years of exercise.

“I'll go along.”

Lu Sun also stepped forward.

“Okay.”

Han Xin did not object.

In terms of sudden battles.

There was no one in the Great Desolate Army who was better at it than Le Yi.

Han Xin was better at overall dispatch.

In addition, there was Lu Sun, who was good at outstanding strategies, which could be said to be relatively secure.

Soon, Le Yi and Lu Sun took three thousand elite warriors of the Great Desolate Army with them.

They disappeared from the view of the crowd.

According to the judgment of the crowd.

If it's a small island, then there could not be too much power.

Three thousand warriors should be enough.

.....

Ho, ho, ho

In the grass by the woods.

Luke, who had just been let go by the Great Desolate Army, was desperately running away.

“What are these people just now? Could it be the people from the legendary New Sea area?”

While running, his eyes flew around, guessing.

“So many people, there must be some purpose. No, I have to report this important information to the island master. With such a big credit, I should be able to enter the island master’s house and become a guard.”

The more Luke thought about it, the more excited he was.

The foot was working even harder.

He didn’t go towards the Xiangye village where he was.

Instead,

He rushed to the east of the island.

A flat area near the coast.

This piece of flat land, there were fields after field.

Above the fields, they planted plants one by one with a height of about one meter.

On it grew a fist-sized red fruit.

The rich aroma was emitted from these red fruits.

And in the middle of the flat, there was a stone-built fortress!

Seeing this fortress, Luke could not help but jump up.

Excitedly shouted out.

Only

What he did not know was.

Not far behind him, several special warriors were following close behind.

Closely following him.

“This guy is really lying.”

In the further distance.

Le Yi and Lu Sun were watching this side with binoculars.

Luke’s every move they were watching it all.

“That side should be the island master’s house of this island. Should we directly attack in or?.....”

Yue Yi asked.

“Surround first and then decide based on the situation.” Lu Sun said more cautiously.

Yue Yi nodded his head.

Lu Sun’s physique was ?weak.

He could not move quickly.

So Le Yi led the group with two thousand warriors.

Under the cover of the surrounding vegetation was approaching the stone fortress little by little!

It must be said that although the red fruit tree was not high.

But the growth was extremely dense.

It was an excellent cover for the Great Desolate Army.

But also couldn’t dare to get too close.

Because the Great Desolate Army found out that on the stone fortress.

There were two guards standing.

But they were walking around carelessly, simply did not notice the Great Desolate Army under their noses.

Luke soon came to the island master’s house.

After a lot of verbal explanation.

Finally, he was walking in.

After a while, he did not come out.

“Can’t wait any longer, Let’s dive in.”

Le Yi ordered at once.

Poof! Poof!

Two light sounds, and the two guards on the stone fortress.

The Great Desolate Army snipers accurately took them out.

They naturally equipped the sniper rifle with a silencer!

It made little noise.

Thirty agile special warriors immediately climbed up, jumped into the fortress.

Not long after that, there was a sudden commotion from inside.

Chapter 360

360: Highest Difficulty Mission! Endless star field! Terrible World

Immediately after, the fortress door was opened and there was a special warrior who walked to the door.

He waved towards the Great Desolate Army outside.

Le Yi immediately understood what this meant.

Immediately, he led the Great Desolate Army and rushed over.

He entered the fortress gate and saw that the courtyard was squatting with many heads in black.

There were dozens of people on the ground.

There were also a dozen of guards who had been shot and killed!

Sorry, General.

A special warrior came up and said to Le Yi, As soon as we came in, it didnt take long for us to be discovered, so we had to do it.

Oh?

Le Yi frowned slightly and said, How were you guys discovered?

Because of this rat.

A special warrior came over with a dead rat in his hand.

This rat was very small.

It was only half the size of a palm.

Le Yi looked at it a few times and guessed, This is probably a product unique to this world. We should be more careful in the future.

After that he turned his head to look at the dozens of people being pointed at with guns by the special warriors.

He took out the translation leaf and asked loudly, Which one is the island master here?

The words fell, but no one answered.

Not saying yes?

Le Yi smiled gently.

This could not be difficult for the experienced Great Desolate Army.

Immediately, a few warriors came up from all corners of the crowd and dragged away five people.

They took them to separate rooms and left to do the interrogation.

Not long after, one of these five people could not hold up to the interrogation of the Great Desolate Army.

Could say or maybe couldnt.

One by one, all shook out.

So its turned out to be you.

Le Yi looked at an obese middle-aged man in the crowd.

Immediately, a warrior came forward.

The obese middle-aged man was pulled out.

The obese middle-aged man immediately let out a pig-like scream and yelled.

You cant kill me. Im protected by the alliance.

Alliance?

Le Yi raised his eyebrows!

Yes, I am an island master recognized by the Alliance, and I am also the magistrate here.

Seeing that Le Yi seemed to be intimidated, the obese middle-aged man immediately held his head high and shouted, If you hurt me, the Alliance Navy will definitely hunt you down!

The ocean is so big, you wont be able to escape anywhere Ah!

The words had not finished.

Le Yi directly slapped him down.

The already fat face swelled up even more exaggerated!

Be honest.

Le Yi scolded, said: Now answer to what I ask, if you dare to talk more, you will be left without food!

Yes Yes Yes

The obese middle-aged man touched the right side of his swollen face.

Immediately, he became low-browed and incomparably obedient!

How far is the nearest navy from here?

Le Yi asked.

From the words of the obese middle-aged man just now.

Le Yi probably guessed.

This so-called alliance should be the ruling organization of this world!

The navy must be an important force under that alliance!

Its close to here.

The obese middle-aged man aggravated his tone and said, It will take less than an hour to come over.

That fast?

Le Yi was slightly shocked.

Of course.

The fat middle-aged man said proudly: It is a large naval territory stationed near here. Under the charge of Commander Modo, with a commander-class warship, that speed is super quick!

After saying, he also looked at Le Yi.

A look like you are afraid of it.

Commander-class warships?

Le Yi slightly narrowed his eyes!

In this island world, ships were naturally very important.

Although the Great Desolate Army had brought a lot of weapons and large equipment.

But it was impossible to move all the ships over.

Moreover

With what the obese middle-aged man just said.

Such a fast speed of the ship.

With Xias current level of shipbuilding.

They probably couldnt built it.

After all, there was no demand for it in the Xia Kingdom yet.

Immediately notify General Han and the others to come over.

Le Yi quickly gave several orders in succession.

The obese middle-aged man and the people in the courtyard were closed up.

Afterwards He was just about to give other orders.

Suddenly!

A guard took advantage of when the Great Desolate Army warrior turned his head.

A stomp in place and jumped up directly from the courtyard.

Surprisingly, he jumped over the fortress gate in one go.

Landed on the outside and was about to escape.

A gunshot rang out with a bang.

This guard covered his right leg.

He let out a miserable scream!

Seeing this scene, Le Yi could not help but be a little surprised.

Immediately, he asked someone to bring this guard in.

This is Transcendentalist of this world?

Yue Yi immediately had a guess in his mind.

Let the warrior bandage this guard.

Yue Yi interrogated, You differ from others. Why can you jump so high?

Hearing that.

This guard looked at Le Yi in surprise.

Then he said, You dont know about the Ability Fruit?

Ability fruit?

Le Yi frowned slightly.

There are still people in this world who doesn't know about the Ability Fruit Phenomenon.

This guard blinked and then said, I just ate a jumping fruit, that's why I have such bouncing power!

So, this ability fruit is a fruit or plant fruit?

Le Yi asked.

Something like that.

This guard nodded and said, Eating it does not differ from ordinary fruits, but it can make people produce all kinds of abilities!

Who are you anyway?

This guard swept a glance at Le Yi and the Great Desolate Army warriors and said suspiciously, I've seen nothing like you guys before.

Don't care who we are.

Le Yi said in an icy voice: Is there anyone else like you, an ability fruiter, here?

That's not true.

This guard shook his head and said, Ability fruit is a rare thing, and I only took one by luck.

If I hadn't just had to escape, I wouldn't have used it at all.

You came here as a guard, you have other purposes, right?

Le Yi asked with a smile.

This obese guy is not a good person. Ever since he became the island master here, the people below are living a miserable life.

The guard snorted coldly and said, I sneaked in just to kill him.

There was a pause.

This guard looked at Le Yi and said, As long as you can eradicate these abominable guys, I promise to keep my mouth shut about this, including other people on the island, and not to inform the navy!

Is the navy very scary?

Le Yi asked.

Of course.

A hint of scorn flashed in this guard's eyes as he said, This obese guy becomes the island master of this island because he has a sister who is a concubine in the Modo commander!

You'd better finish killing people and run away. If Modo finds out, it will be the end!

The guard advised.

Modo Commander?

Le Yi pondered over this word and was about to ask something.

The sound of footsteps came from outside.

Le Yi turned his head to look.

Only to see Han Xin and the others were already trotting over in a breeze.

I have a clear picture of your situation here. As soon as Han Xin entered, he immediately said, I have an idea.

Just in time. I also have an idea. Le Yi also said.

The two men looked at each other.

The corners of their mouths both revealed a smile!

They were going to do a big job!!!
