

One Planet 401

Chapter 401 : Quantum Cat! A new era!

Yan and other people also didn't know what was behind it.

Was there still a need for glory conquests and so on?

For Jiang Fan, at that time, there was no need to hide it too much.

He found Yan and communicated with her.

..... Established the future form of power of the Great Desolate Army and even the Xia Kingdom—

Jiang Fan used the power of the source and set a star house up within the Royal Tomb mountain range.

There were seven seats inside the star house!

Only seven people approved by Jiang Fan could enter this room.

Otherwise, any other beings, including bacterial microorganisms, could not pass the threshold.

The seven people today were Yan, Ghost Bustler, Wang Meng, Han Xin, Le Yi, Dr. Chen and Laite!

Advisors, generals and scholars were all represented.

All were old men of the Great Desolate Army.

This was also the cabinet system that Yan and the others discussed.

There were these seven people who decided all kinds of things for the whole Xia Kingdom!

Later on, this form would also be adopted.

One person from the royal family.

Strategist.....Now it was also called strategist out of two people.

Generals out of two and also scholars out of two.

A cabinet of seven people was formed.

There was a transparent panel at the front of the Star House.

Once Jiang Fan had a task.

It would be displayed directly here.

Without notifying someone individually!

The seven people of this generation except for Yan and Han Xin.

The physical condition of others was not as good as before, and it was difficult to maintain long hours of work.

The candidates for the next generation had also been selected.

Wait until the current generation leaves, then there would be a smooth transition of power!

To ensure that the entire Xia Kingdom glides forward.

As for the conquest, Jiang Fan thought about it for a while and decided to keep it.

In Comparison, the Xia Kingdom almost occupied the entire first land.

With nothing internal or external problems.

A long-lasting comfort with lack of struggle goals.

It would give birth to some unnecessary incidents.

But the frequency of conquest was naturally reduced.

Changed to once a year!

The Great Desolate Army had 100,000 people.

There were still five legions.

Twenty thousand people per legion.

Every year, an elite team of 30,000 people would be dispatched... to go to alien planets to fight.

While training the team.

It was also to let the Great Desolate Army understand that their biggest opponent was always
Transcendents!

After determining the core structure of the seven people.

Yan and the others finally breathed a sigh of relief and settled down.

And started developing the economy vigorously!

The entertainment and cultural industry surged forward.

Various movies, dramas, songs and so on sprouted up like a spring.

It was not as developed as in the previous world.

For example,

The sports industry was almost non-existent.

Soccer, basketball, tennis, racing and so on.

Completely without a word!

Especially those soldiers of the Great Desolate Army.

After fighting with transcendents, they didn't care about things like that.

They only had fun every now and then.

It was impossible to upgrade to a formal industry.

Also, because of this, the main themes of movies and TV series... were mainly fantasy!

There was no palace drama and also no messy family drama.

As for martial arts drama that was even more impossible in this world.
There was no place for martial arts in nature and could not be born.
Most of the subjects were simple.
A poor boy abandoned by his girlfriend or broke off the marriage.
And then worked hard.
Joined the Great Desolate Army to become a glorious soldier.
Suddenly, one day, an alien race invaded.
The soldier grew step by step during the war.
Finally made outstanding achievements.
Become a hero of the Xia Kingdom and finally get a beautiful ending!
Or maybe the poor kid goes through a lot of hardships to be admitted to a scholar.
In the battle with the alien transcendental race.
He made significant contributions and was promoted to the chief doctor!
Dr. Chen's example was frequently used for reference.

The story was old-fashioned.
But people still read it with great interest.
Especially those soldiers of the Great Desolate Army and the staff who knew about Neimu.
Very immersive.
Jiang Fan also took the time to watch one.
He was quite speechless after watching it.
To be honest, the screenwriting was hell.
Blood, cliché!
Xia Kingdom still needed to go further in terms of the cultural industry.
Jiang Fan thought about it.
If he came to the Xia Kingdom to be a novelist or screenwriter.
With the development of the economy, he would not make a fortune.
People's living standards have improved greatly.
The requirements of all aspects were higher.
Refrigerators, electric fans, air conditioners, microwave ovens, rice cookers and so on appeared one by one.
Needless to say, phone.

Half of the households in the Xia Kingdom had installed it.

This period was mainly based on civil technology.

But a major invention was also born.

That was – Xia's first computer!

At first, the computer was extremely large!

It took up a whole big room.

Once this computer was introduced.

Yan was keenly aware of its future potential.

Directly under the order, she formed a special research group.

Research improvements to the computer!

At least not such a large body.

After ten years of research and development.

The size of the computer was slowly reducing, the performance was also increasing!

But from the previous life, Jiang Fan used the computer.

There was still a distance.

A few more years down the road.

Yan spent her 100th birthday!

The whole country celebrated it.

The Great Desolate Army and the Xia Kingdom Royal Family...

They all insisted on hosting a grand 100th birthday celebration for Yan!

But at this time by Yan's side.

There were no more familiar old people.

In the past ten years, Wang Meng, Le Yi, Dr. Chen, Laite, etc.

All were old.

Yan was ninety-eight years old.

Considered the second pillar of the Great Desolate Army.

Ghostbuster, who was the highest strategist of the Xia Kingdom also passed away suddenly!

Now, among the old ones, only Yan and Han Xin were left!

Han Xin was also very old.

His face was already wrinkled.

Even walking was very difficult and he needed someone to help.

There were still various diseases in his body.

Being able to persist here was to see Yan's 100th birthday!

Not long after the birthday.

Han Xin also passed away.

Leave peacefully!

So far, the entire Cabinet of Seven Elders.

Only Yan was left alone.

But the follow-up successor had come up.

Whether it was character or ability, all made Yan quite satisfied.

On generals side, there were younger Su Dingfang and Xue Rengui!

These two were the best of the best.

Among Scholars, it was even more remarkable.

There were so many outstanding talents in various fields!

Especially some young people born after the conquest.

That was, those born after Blue Star was promoted to the second level.

Thanks to Bluestar's eternal-level talent.

The emergence of genius was extremely terrifying!

The number of geniuses produced in a single year exceeded the previous ten years combined!

This made Yan very happy.

The Xia Kingdom had a new generation!

There was no need for her to worry so much.

After her 100th birthday, Yan was still working in the front line.

But the power had been gradually released to later generations.

The one who succeeded Yan was a woman from the royal family.

In terms of seniority ... She was Yan's niece!

Unlike Yan, this niece had no scientific talent.

But in political affairs, she was extremely astute and competent.

She had the style of an iron lady!

Her name was Xia Ke!

Most of the work, Yan handed over to Xia Ke to handle.

Just needed to report the final result to Yan.

Outside of work, Yan would occasionally look at the sunset in the distance, recalling the past.

She knew it herself.

There were a few days left!

When she leaves, The Great Desolate Army and even the entire Xia Kingdom would usher in a whole new era!!!

Chapter 402: Yan's departure! The official contact between the two lands!

Xia Kingdom was developing at a high speed.

All lives were fully developed!

More and more people were going out to do business!

One by one, individual businesses were springing up like rain!

Companies, groups, etc. emerged one by one.

They also opened stocks and other institutions with the consent of the cabinet

Opened up banks had been around for a long time.

But until now.

Only by sudden leaps and bounds.

All over the country.

Roads and tall buildings were being built everywhere!

The original dirt roads and old-fashioned houses were Demolished.

The spring breeze was blowing.

The earth was vibrant.

Everywhere the people of the Xia Kingdom were full of hope and strength.

And one by one works and projects were being started.

Only

Unlike the previous world, the financial industry and the construction industry were restricted.

Instead, the biological industry was developing more rapidly!

In particular, there was a special industry that did not exist in the previous world – the transcendental industry!

Every time the Great Desolate Army went out to fight, not just for training alone.

To be more realistic It could be from the outer planets.

They brought many, many things that the Blue Star did not have.

For example

Those transcendent creatures and items!

These things were not only of a high value in themselves.

They were also a great boost to the development of biology!

The second level of the Blue Star.

The outbound conquest was naturally also a second-ranked planet.

According to the rules, high-level planets could not enter the lower-level planets.

Therefore, they got a lot more of all kinds of transcendent creatures!

There were also biologists who had a new idea.

“Do you guys think that we, ordinary people, can also become more powerful as individuals like the Transcendents?”

A young biology scholar asked.

“Not really.”

An older scholar replied, “We, on this planet, cannot cultivate without a semblance of transcendent energy.”

“No, no, that’s not what I meant.”

The young biologist waved his hand and said, “Of course I know we don’t have much transcendental energy here. What I mean is

“Is there a way to make an individual strong without relying on transcendental energy?”

This statement made a group of scholars present fall into contemplation.

Biology was a big hit right now.

The influx of geniuses was very large.

There were all kinds of strange and bizarre ideas and thoughts.

People like Dr. Chen who were previously considered “odd”.

Now there were many!

It could be said that

In these scholars, it was normal to feel weird.

Compared to the biological industry, other industries were not so popular.

But also in rapid development.

Especially in the field of energy.

The main energy source at present was still coal and oil!

The reserves of these two sources of energy was very much!

But the resulting deterioration of the air was visible to the naked eye.

Let many scholars and seniors frown slightly!

Because of the past 100 years, Xia's development was too fast!

When Yan was a child, it was still a feudal dynasty era.

But now

It has almost completely transformed into modern society.

Even before the upgrade, the first land was still green mountains and water.

Now it started to show signs of deterioration.

This was something that Yan and many other old people could not quite tolerate.

In the ranks of scholars, It was also a consequence of technological development.

They felt very uncomfortable!

“Energy is a big problem.”

At the first relevant meeting, Iron lady Xia Ke said loudly.

“The current coal, oil, etc. should only be considered as a transitional product, which cannot be developed vigorously anymore. We must develop alternative energy sources, preferably without side effects.”

The scholar in the field of energy proposed.

“How easy is it to talk about alternative energy? Oil and coal are not only for energy but also important raw materials, which have a huge role in the development of the whole industry!”

A representative of an energy company said.

There were dozens of people who attended this meeting.

There were people from all walks of life.

Energy companies mainly rely on oil and coal to eat.

Stability was the primary focus.

They naturally opposed the development of alternative energy to the attitude!

“I agree with this view. Everything can not be too hasty. We must take one step at a time.”

Another representative also spoke up.

More people followed behind them.

All of them were expressing their own opinions or those of the forces behind them!

Yan sat in the middle, watching quietly

These people were bickering!

But she did not interject.

In the end!

There were still more people who supported alternative energy development.

Prevailed.

After all

Xia's scholars were very sublime in both number and status.

“Then let's start the nuclear fusion project.”

Yan swept a glance at the crowd.

Finally, a decision was made!

Nuclear fusion!

Then it was the most likely alternative energy source to be realized!

Since the atomic project discovered nuclear fusion.

Many scholars had proposed such a concept.

That wasn't difficult. There were also many research groups trying to follow,!

Even

In just a matter of time, it was even more difficult than the atomic project.

The atomic program and the technical problems that nuclear fusion energy had to overcome were... too much!

Decades down.

And there was no one to look forward to.

Therefore!

This time, the nuclear fusion project was no longer a major national project.

Just classified as a key project to increase financial investment and policy support!

The fields corresponding to energy

The most important thing was still transportation!

Swifter transportation brings economic take-off!

Besides cars and trains, aircraft in the sky was another important direction.

But the Xia Kingdom was not big enough.

Transportation by vehicles was completely enough.

The main research of aircraft was still in... combat field!

Because of the influence of the last promotion combat, when they went to the island world.

The maritime industry had received unprecedented attention.

The Great Desolate Army increased its investment in shipbuilding.

A warship appeared one after another.

With the increase in the ocean area.

The people living on the sea also went out to sea more frequently.

Fishing all kinds of seafood!

Such a situation.

More and more people discovered the second land on the other side of the ocean!

Naturally, the top management of the Xia Kingdom had long known this news.

As early as a few decades ago.

There were many proposals like should we cross that ocean with horrible waves.

And go to the other land to see!

But because there were more important things.

Plus Sailing technology was not very developed.

So they put it on hold!

Now

Many people mentioned it!

People for unknown things were always full of curiosity.

“The First Fleet has basically taken shape, and many generals are proposing whether to go to the land across the sea and explore a bit?” Xia Ke was asking Yan for advice on this matter.

“You guys discuss it yourselves.”

Yan said.

Except for the nuclear fusion project, which was the final decision of Yan.

There was no intervention in other matters.

“Good.”

Xia Ke nodded.

She gently stepped back and exited the door.

Before closing the door, she could not help but turn back.

She took one more look at Yan, who looked gentle and calm.

Her heart was not feeling well.

At this time, Yan was already one hundred and five years old.

Everyone knew about her.

Basically, time was running out!

The matter of new land exploration was also temporarily put on hold.

Chapter 403: Yan's departure! The official contact between the two lands!

As the planet master of the Blue Star.

Jiang Fan could tell how much life span each person had.

But he didn't project how long Yan could still live.

Just quietly watching.

For Jiang Fan, the entire history of the Xia Kingdom.

There were four people who he had personally taught –

Huang, Kai, Han and Yan!

Among these

Kai and Yan were the longest and also the most emotional.

Especially Yan!

Jiang Fan watched her grow from a curious little girl to an epoch-making technological giant and a pillar of Xia!

That day, Yan did not do as usual.

She came to the lab to work.

Instead,

She stepped outside, circled the Royal Tomb Mountain Range around.

Looked at a familiar place.

After watching, she let the driver send it to the capital.

She had not been in the palace for a long time.

The palace was still the same as the palace.

But now it was only the residence of the royal family personnel.

There were very few people inside the palace.

Now, there were few eunuchs or palace maids.

Yan got out of the car at the entrance of the palace.

Then

She walked towards the palace where she used to live as a child.

This palace had been cleaned and maintained from time to time.

It was still not dilapidated.

It still retained its previous appearance.

Yan was alone, walking around in the palace.

After staying for more than an hour.

She moved on to other places—

The back garden where she often came as a child, the Transcendental Institute where the royal sons and daughters studied, the gathering place where she occasionally came a few times

Yan walked through.

Finally!

Yan came to the Stargazing Building.

This was also the place where Yan liked to come the most when she was a child.

Climbed up to the seventh floor.

Everything was set up as usual.

Nothing had changed.

That old antique astronomical telescope was still there.

It was still able to be used.

A hint of curiosity appeared in Yan's eyes once again.

To this old telescope.

After many years.

Once again she looked above the sky.

Then

Yan's gaze turned to the roof.

That one hanging planet.

The eyes couldn't help but recall the scene when they first came into contact with Jiang Fan!

The air shook slightly.

Jiang Fan appeared at this time.

"Father God, I thought you wouldn't show up."

Yan revealed a small smile.

"Huang, Kai and Han, I sent them all off for the last time." Jiang Fan used the air to shake out his voice.

"Father God, what do you think people look like after they die?"

Yan suddenly asked.

Not waiting for Jiang Fan to answer.

She continued, “According to the current scientific perception, a person is nothing but the transformation of matter after death, but isn’t there a soul?”

“I can’t answer this question.”

Jiang Fan said after a moment of silence.

“And I wonder what the world you are in is like, Father God?”

Yan suddenly became rambling.

Asking a lot of questions that even Jiang Fan couldn’t answer.

But Jiang Fan knew

She didn’t want to ask these questions.

Rather,

At the last moment, she wanted to have some more communication with herself only.

Jiang Fan listened quietly.

After asking the last question.

Yan looked at the sky and said, “Father God, thank you.”

Then quietly sat down on the chair.

The eyes gradually closed.

There was an evening breeze blowing outside the window.

There was a sunset and stars in the distance.

.....

This peaceful afternoon.

Yan passed away peacefully at one hundred and five years old!

The whole country of Xia was in shock and grief!

Although according to the words left by Yan.

No large-scale commemorative activities were held.

But the people of the country, especially the scholars and generals of the Great Desolate Army still acted spontaneously.

An unprecedented send-off took place.

A universal mourning!

Everyone automatically brought up a white flower.

In remembrance of this superstar and pillar of the Xia Kingdom.

To this point!

The old men of the Great Desolate Army

All departed.

After Yan's death.

The succession handover of the seven members of the cabinet proceeded smoothly.

Xia Ke officially joined the cabinet.

A new era had dawned!

The second land exploration plan that was shelved in the previous meetings was brought up again.

It was passed with little surprise.

The First Fleet was ready to depart.

A brand new battleship docked neatly and orderly in the bay's mouth.

On top of the battleship, each warrior was fist pumping.

There was a look of eagerness on their face for the unknown land.

Everyone was curious and wanted to explore it.

Not to mention, if this time was a success.

Then

They would be the entire history of the Xia Kingdom.

The first group of people to set foot on the new land!

It would be etched in the history books forever.

"Set off!"

Su Dingfang, who was only in his early thirties, ordered loudly.

He was now the commander-in-chief of the First Fleet.

He was also the top general of the navy.

One of the seven members of the cabinet!

Originally, many people were against it.

But Su Dingfang insisted on his own opinion.

And came to lead this New land exploration operation!

Thirty warships were vigorously traveling on the sea.

Towards the second land in the distance.

But before reaching the second land.

There was an important problem, that was

The terrifying ocean between the second land and the first land.

People also called it

The Sea of Fury!

There used to be folk boats.

Brave to break through this sea of fury several times.

But in the end, they all failed.

This time

The First Fleet had made all the preparations!

They specially built a spare warship for this purpose.

After crossing the Sea of Fury, several ships were damaged.

The crowd breathed a small sigh of relief.

Shortly after penetrating further.

The outline of the second land came into view!

“No one had ever reached this land before.” Su Dingfang stood at the bow of the ship and looked out at the ancient beast-like Second Land in the distance and said, “Maybe someone has reached it before, but there is no record of it.”

“I wonder what could be on this land?”

“According to our analysis, with the environment and terrain around this land, it should differ greatly from the land we live on!”

A scholar at the back spoke up, “There may be various species!”

“Make all preparations. Everyone should mention the highest vigilance. Don’t be careless!”

Su Dingfang was a cautious person.

Immediately, he ordered.

For this strange brand new land.

No one in the First Fleet dared to be careless, either.

The second land was getting closer and closer.

The crowd was also surprised to find the jungle in sight.

-Trees.

Seemed to be incomparably tall.

Almost all in ten meters, twenty meters or more.

Those below ten meters were considered small.

“Be careful, there may be even bigger beasts living here.”

An old scholar of the scholar team frowned.

The others also knew this common sense.

The trees were so big.

And so the animals living inside.

Surely the size would not be too small.

The fleet docked at one shore of the second land.

Su Dingfang was very cautious.

He did not immediately get off the ship.

Instead

Formed a raiding party of one hundred people to explore the land.

And conduct a test exploration!

Thus!

The first land and the second land began Official contact!

Chapter 404

: The most amazing creature! Ten years of evolution!

While the raiding party was ascending to the second land.

The giant beasts on the land did not notice.

Most of their attention was captivated by the battle between giant three-headed snakes and atomic dinosaurs!

After the giant three-headed snake took out several atomic dinosaurs in a row.

It was finally discovered!

The Atomic Dinosaurs were lazy but not stupid.

The intention of the giant three-headed snake was immediately clear.

They had always been alone

The grouping has also started!

They grouped together to fight with the giant three-headed snake!

The giant three-headed snake has nothing to do for a while instead of fighting alone.

Atomic dinosaur wasn't a match for it.

But so many atomic dinosaurs united.

It couldn't fight hard either.

The two sides began to confront each other.
The other giant beasts around it were greatly delighted!
Watching it secretly from the side.
They wanted these two sides to fight to the death!
But the giant three-headed snake was very cunning.
It actually took advantage of this opportunity.
It started the hunt for the offspring of the giant gorilla again!
The descendants of that giant gorilla back then.
Now there were two more inherited genes!
One was taken out directly by the giant three-headed snake.
The other one was running away in a panic!
The giant three-headed snake was chasing frantically in the back.
It was keenly aware that
This race had extreme potential.
If it grew up, it would be a huge threat to itself!
This threat must be strangled in advance in the cradle.
Clattering
A loud sound rang out in the jungle.
It was as if some fierce beast was escaping quickly.
The assault team that had just entered the jungle was startled!
Everyone became vigilant and stared straight ahead.

Then
They saw a scene that they will never forget — a super gorilla with a height of more than four meters, rushed out of the jungle.
And quickly fled towards the coast!
On the way although passed by the assault team.
But it did not stop at all.
The crowd was dumbfounded.
Trembling all over!
Was that gorilla taller than the floor?
“Report, report, anomaly found, anomaly found.”

Took a deep breath.

The commando leader immediately reported the matter to Su Dingfang on the battleship.

“We found an oversized giant beast, which looks like a gorilla, is running towards the coast, please be prepared!”

Su Dingfang, who received the news, frowned slightly.

A scholar next to him slapped his thigh and said, “Sure enough, as I guessed, there is a growth environment for giant creatures on this land!”

Soon, the crowd on the battleship saw

A giant gorilla that was much bigger than an ordinary gorilla.

Flew out from the jungle.

It ran away anxiously.

After running to the beach and stopped to take a breath.

“Is this gorilla injured?”

A sharp-eyed scholar called out.

The crowd looked.

Sure enough, they found out.....

There were many wounds on this gorilla!

One sturdy arm seemed to be bitten by something blood dripping!

It hung down limply.

Other places were also full of wounds.

A look of bruises all over the body!

“This mega gorilla is not being chased by some other animal, right?”

A scholar guessed.

Heard a sound

Everyone was aghast!

What creature would dare to chase and kill a gorilla of such a large size?

Could there be more powerful beasts on this piece of land

There were more powerful giants?

“The assault team will return immediately.”

Su Dingfang made an immediate decision.

The order was given directly.

This wounded giant gorilla made him feel very uneasy!

If there really was a more powerful giant beast on this land

Then theri ruler would be very dangerous.

The raiding party also dared not be careless.

Returned immediately!

On the sandy beach, the wounded super gorilla looked curiously at the battleship and the people on the battleship not far away.

Stroked his head.

A trace of confusion appeared in his eyes.

These were

What is it?

Never seen before ah.

“General, what about this injured super gorilla?” A scholar asked.

“Observe first, don’t make any rash moves.”

Su Dingfang said cautiously.

The assault team also came back.

Although they didn’t burst in deep.

But it was not without harvest.

They collected some plant samples from this land.

There were also some animal skins.

Especially this wounded gorilla.

Some of the blood left by passing by was also collected.

The team of scholars immediately began to work.

After some analysis.

A scholar reported, “Initial analysis, this should be the gorilla, but I wonder why it grew so big?”

As a result of such a change of events.

The people on the battleship did not move on.

Instead, they were ready to take a look first.

Especially to find out the reason for this super gorilla’s injury!

On the sandy beach, the injured super gorilla found a rock to sit and lean against.

Breathing heavily.

The sky was getting dark.

What puzzled the gigantic gorilla was, Why didn't the giant three-headed snake behind him catch up?

It did not care so much.

The first thing to do was to get through the night.

The super gorilla gradually fell asleep.

But the people on the warship could not sleep.

There have been special people observing This super gorilla.

Wait until the next morning.

The sea was not bright.

A scholar woke up Su Dingfang and said, "General, that super gorilla has fainted, it looks like it is too badly injured and bleeding too much!"

The inquiry was made.

Su Dingfang immediately rushed over.

By the beach, there was already a team of scholars under the protection of warriors.

Carefully approached the super gorilla leaning on the rock.

At this moment, the super gorilla was already unconscious.

"General, if we don't take action, this super gorilla probably won't survive..."

A scholar reported.

"Will this super gorilla wake up?"

Su Dingfang asked.

"This"

Several scholars looked at each other and shook their heads, "It's hard to say, such a big gorilla's physique is estimated to be beyond ordinary cognition, it may wake up halfway!"

"Then it would be too dangerous."

Su Dingfang said in a deep voice: "I can't risk the lives of you and the warriors!"

After a moment of silence, Su Dingfang added: "How about this, inject this super gorilla with anesthetic, put it under anesthesia and then do the rescue!"

This was a more secure approach.

The team of scholars and warriors immediately took action.

Anesthetize the injured super gorilla first!

Since the amount of anesthesia was not known.

To ensure safety, straight up a whole lot!

And waited until the super gorilla was completely unconscious.

A group of scholars and warriors breathed a sigh of relief.

And begin rescue treatment above the battleship.

Naturally, there was a team of doctors.

Because of the unexplored land, there were many veterinarians.

What the battleship crowd didn't know was.

All they did

All of it was seen by six grim eyes, deep in the jungle in the distance.

The giant three-headed snake was hiding its huge body in a tall, giant tree.

Quietly watching the situation on the beach!

Before

The reason why it did not continue to pursue this super gorilla.

The main reason was the discovery of the raiding party and the thirty warships on the sea.

This made it feel surprised at the same time!

And a little uneasy!

These look-alike walking creatures.

Although the size was very small.

But obviously not the same as other creatures!

Giant three-headed snake was very similar to Su Dingfang.

That was

Extremely cautious nature.

The moment they encounter any unexpected accident.

Chapter 405: The most amazing creature! Ten years of evolution!

They will choose the safest way to deal with it.

Therefore!

The giant three-headed snake held back the impulse in its heart.

It did not choose to continue chasing after the super gorilla.

Instead, it hid.

Watching from the shadows!

It wanted to wait until it figured out the situation before resuming its actions!

Waiting for the crowd to save the injured super gorilla.

A scholar couldn't help but ask, "This gorilla What are we going to do with it?"

Leave it unattended?

Unlikely, catch it and put it in a cage?

Didn't seem right either.

"First take a tissue sample from it for research, and let's see about the rest."

Su Dingfang also frowned slightly.

Feeling that things were not going well.

After all

This was not a transcendent species.

The team of scholars had already studied it.

This super gorilla did not have any transcendent energy in its body!

Originally, Su Dingfang also planned to send a helicopter.

From the air to investigate the situation of this piece of land.

But after seeing this super gorilla.

The plan was immediately suspended.

The following days, the super gorilla's injuries were recovering rapidly.

This surprised the observing scholars.

But they didn't leave the beach.

Still staying here.

Because beware of uninvited guests like humans.

The giant three-headed snake had little time to pay attention to the rest of the land.

It made the Second Land silent for a while.

After waiting for several days.

The giant three-headed snake became a little impatient.

Its grim eyes rolled, and it thought of a way.

It lured a huge tyrant bear, come and attack this super gorilla.

When seeing the tyrannical bear appear from the woods.

Everyone in the battleship was shocked again!

This tyrannical bear was much bigger than the super gorilla!

It was over six meters tall!

After roaring, it lunged towards the super gorilla!

The two fiercely fought together.

Super gorilla despite the size disadvantage, inherited the genes of the giant gorilla.

It was still very powerful.

The tyrant bear fought back and forth.

It was hard to separate!

The fleet of people were wide-eyed

The whole time, they didn't dare to blink to watch this rare scene!

Finally!

Both the tyrant bear and the super gorilla were bruised and battered.

The bear ran straight away.

The super gorilla continued to stay on the beach and glanced over towards the fleet.

The team of doctors cautiously approached, and gave the super gorilla another treatment.

The super gorilla did not move at all.

It was at the mercy of these people!

The fleet breathed a long sigh of relief.

A doubt arose in their minds –

Was this super gorilla highly intelligent?

.....

First Fleet's side of the exploration It wasn't going well!

And in the Third Land, the momentum of various flora and fauna was very fierce!

The lively and lovely electric mound was still not able to resist the biological instinct.

At the arrival of spring, it found a local indigenous female bamboo rat.

Became a family!

Soon after, gave birth to a litter of offspring!

There were five young electric mounds that had inherited the genes of the electric mounds!

There was enough food.

The speed at which the mice reproduce was still very impressive.

In less than a few years.

Litter after litter of offspring appeared one after another.

More and more little electric mounds with yellow hair all over their bodies were born!

In the bamboo forest.

By the stream, on the grass.

Among the trees, everywhere you could see these little yellow moving figures!

Electric mound family quickly formed.

And became a local hegemon!

The fish and shrimp in the stream suffered.

Other creatures snakes, frogs, grasshoppers, caterpillars, etc. all became the target of predation and teasing by the little electric mounds!

A snort!

A small electric mound waved its zigzag tail.

It let out a bolt of electricity.

Directly put a nearly two-meter long cobra gave electricity to the whole body scorched black.
Dying.

After several generations of development.

The electricity released by the electric mound had been more and more!

This little electric mound was only a few months old.

It was already more powerful than its ancestor Its released electricity is even more powerful than the first electric mound.

A number of animals living around the electric mound could be said to be suffering!

Every day was not on the way to be electrocuted.

But it was on the way to be electrocuted.

Electric mound lifespan was also longer than ordinary rats!

Could live a long time.

On the side of the electric mound.

Other creatures were electrocuted at the same time.

A long way away on the other side.

Yukon kangaroos were also growing rapidly.

This piece of land itself had kangaroos.

That's why the system decided that Yukon kangaroos were suitable to grow here.

There was no genetic isolation between the two.

The bouncing Yukon kangaroo was also mundane.

The same choice to have a family!

Kangaroos were also rats capable of reproducing lots.

Between a few years.

The generations passed on.

The offspring inherited a lot of genes.

Could be much stronger than the original atomic dinosaurs.

This was natural because

The current Blue Star was an eternal level talent!

What Jiang Fan didn't expect was.

These offspring also had a space, and the size of the space was even more outstanding!

The growth rate was even higher than that of the electric mound.

The main reason was of course

Yukon Kangaroo nurturing the next generation.

All the babies and children were put in the nursery space.

That was very safe.

This nursery space was only for Yukon kangaroos.

No other life could enter.

Even

Even bacteria and other microorganisms were powerless.

This also ensured the smooth growth of the baby kangaroos.

The only thing that was different from the electric mound was.

On the territory of the Yukon kangaroo, a natural enemy began to appear – a falcon with very sharp claws!

It wasn't big in size.

But the speed was fast.

Flying ability was extremely strong.

Especially the pair of claws.

Not only sharp.

The surface also had a silvery glow.

Jiang Fan simply named this kind of falcon Silver falcon!

This kind of creature was very heartfelt.

Not much interested in the ordinary rabbits in the grass.

A pair of sharp eyes.

All day long aiming at Yukon kangaroos!

As long as it finds a hint of opportunity.

Silver falcon would not miss and immediately swoop down.

Of course, the Yukon kangaroo was the offspring of odd creatures.

It wasn't easy to mess with.

The physique was much stronger than ordinary kangaroos.

The jump was several meters high.

Especially the two fists.

If you take a punch The silver falcon couldn't stand it!

The two sides were on guard against each other.

Yukon kangaroo while breeding offspring.

Also keeping a close eye on the silver falcon.

The silver falcon was catching rabbits to eat.

-While the Yukon kangaroo couldn't stop thinking about it!

The Yukon Kangaroo's offspring were more powerful.

One generation was more progressive than another!

It made Jiang Fan very pleased.

“At this rate of development, it was estimated that in a short time, the Yukon Kangaroo's nursery space could grow to one cubic meter.”

Jiang Fan thought secretly.

It wasn't much use now.

But when the development reached a certain height.

It would have great strategic value.

The Yukon Kangaroo and the Electric Mound colony grew more and more.

Jiang Fan turned his attention again to the Quantum Cats that lived not far from the beach.

However!

What made Jiang Fan quite surprised was.

The breeding of quantum cats had taken a different path!

Chapter 406: Thirty Years of Stormy Weather! School team training! Captain Jiang Fan!

When seeing the Quantum Cats' current condition.

Jiang Fan couldn't help but say it!

“You are a cat, not a dog, what's so good about single dogs?”

That's right

The quantum cat was still all alone.

With no companion, surrounded by the environment.

There were other feral cats, too.

All kinds of them.

Some of the little female cats even leaned over.

Very inverted.

But the quantum cat did not even look at it.

Instead, it was interested in

The near sea and the distant sunset were more interesting!

The eyes were still The starry sea!

See here, Jiang Fan was not worried.

This peculiar cat was estimated that the other aspects were not ordinary either.

.....

The third land was developing very quickly.

On the second land side.

The fleet was still struggling in the coastal line.

Didn't dare to land easily!

Finally

They chose a stable decision, that was —

Step by step!

Establish a base along the coast first and then whoosh, slowly explore the land later.

The fleet of men took that jungle along the coast directly

Burned it all with fire!

The relationship between super gorillas and humans became more and more friendly.

While the Fleet people were setting up their base.

It was on the lookout!

Watching out for surprise attacks from various giant beasts on the land!

Not long after that.

The scholars also figured it out.

This super gorilla's IQ was indeed higher than the ordinary gorilla.

And also much higher!

Although the two didn't speak the same language.

But by hand gestures and eyes.
Slowly they could do some basic communication.
From the information passed by the super gorilla.
The crowd knew that
This continent was indeed extremely terrifying!
There were many tall beasts that were even more terrifying than the super gorillas!
Especially the one described by the super gorilla The gigantic snake with three heads!
It was even more terrifying!
The mouth of the snake could also spit out fire!
This made the team of scholars shocked at the same time more interested in this land.
The base was being built little by little.
The giant three-headed snake had been watching from afar.
But the cautious one did not come up to stop it!
Instead, it wanted to see exactly what these upright creatures wanted to do.
Because all day long to worry about the giant beasts on the land.
Plus across the Sea of Fury.
Supplies were more difficult to transport.
The construction speed of the base was not fast.
It was built for three months and was barely formed.
The Great Desolate Army brought in batches of equipment and weapons!
The most advanced ones were all delivered.
As more and more scholars joined.
Everyone was surprised to find
The terrifying extent of the giant beasts on this land.
I'm afraid it was even more than the transcendent species of the outer planets!
This had triggered many people to think deeply.
Only
It was only unexpected on this land.
There were not only a variety of terrifying beasts.
There was another kind of intelligent life—
Water-dropper!

The movement of the Great Desolate Army establishing a base near the coast had been noticed by the Waterdropper!

They hid in the shadows.

They were hiding in the shadows, secretly observing these creatures that were vaguely similar to them.

Strange creatures that could walk upright!

From the human body.

They saw the same trait as themselves, that was –

Extraordinary intelligence!

A few dropper people communicated with brain waves.

Then hurried back.

Reported this important matter up!

Subsequently

Water dropper sent a special squad.

Every day took turns to watch the movement of the Great Desolate Army.

Their own actions also became more and more cautious.

The attention of everyone in the fleet was on the giant beasts on this land.

Never thought about it at all.

There was also the existence of the Waterdroppers.

“These two parties met later Will they fight?”

Jiang Fan speculated with interest.

But in the short term.

It was unlikely that this would happen.

The current technology level of water droppers was much worse than humans!

Except for the second generation of water droppers.

All other aspects were crushed in all directions!

Because of the advent of human beings.

Water dropper’s research and development of technology had become more urgent.

Generation after generation to pass on.

Relying on the advantages of memory inheritance.

The same as humans.

After a basic accumulation of thick and thin hair!
After more than a decade of development.
It exploded!
The water dropper's community became even larger.
For the first time it exceeded 10,000 people!
But the difference with humans was.
Unlike humans, water droppers basically had no entertainment life.
There was nothing in the cultural and entertainment industry.
The whole staff was working on technology.
Its logical ability was quite excellent!
Now it was not just water droplets.
Every other aspect were also starting to grow rapidly!
Clothing, food, housing and transportation
All had the shadow of technology.
For food.
The Waterdroppers began to grow their own crops, raise animals.
But they were growing crops in pyramids.
Like a human greenhouse!
But even more superior than the greenhouse!
Planting efficiency was very high.
Pyramids also began to have a classification.
Previously, they were all for living.

Now they were divided into various kinds –
Farming pyramids, planting pyramids, working pyramids, study pyramids, etc..
All kinds of pyramids had different internal structures.
What surprised Jiang Fan the most was
Water dropper's means of transportation!
It was completely different from humans.
There was no such development as horse-drawn carriages, cars.
Even
There wasn't even a vehicle.

Water droppers actually directly intend to manufacture airships!

Because of the nature of water droppers, this vision was actually feasible.

.....

At the same time the water droppers were making great progress.

The first land's side of the Xia Kingdom, the development of technology did not fall behind much!

Since Yan left the world.

Into a new era.

And in this new era, various fields across was also very big!

“This is considered the third technological explosion, right?”

Jiang Fan thought to himself as he watched Xia country during these decades.

This time, the technological explosion was..... still based on major breakthroughs in fundamental theories.

Like the theory of relativity, quantum mechanics, computer science and other major theories were born one by one!

It was mainly due to the emergence of a large number of geniuses.

But Jiang Fan felt a little regretful.

There was not an epoch-making figure such as Yan.

The Grand Desert Award was also reformed for the first time.

Like the Nobel Prize in previous generations was divided into various fields of awards!

The most attention of the world was estimated to be Artificial intelligence in this piece!

Since the computer was listed as a key project.

Only twenty years had passed.

It had developed to a level similar to that of the previous world.

The original huge size of the computer shrunk into a personal computer and laptop!

Information field was attached to an unprecedented degree of importance.

Especially in the field of combat.

The new fighting style completely replaced the old school style of the past!

Information warfare became the first element of the Great Desolate Army's foreign conquests!

Because the demand was not big enough.

There was no major development in the sea.

But in the air, the progress was amazing!

Warplanes developed to the third generation!

But the people of the Great Desolate Army were still not satisfied.

They felt that they could become even stronger!

Time was passing little by little.

With the change of years!

The first decade and the second decade passed one after another!

The shock brought by Yan's death slowly faded away.

The new era was also officially established!

Chapter 407: Thirty Years of Stormy Weather! School team training! Captain Jiang Fan!

The third decade began.

The population of Xia continued to explode.

For the first time, it exceeded

-billion people!!!

Per capita life expectancy was further increased.

It came to over ninety years old!

Xia kingdom had set the marriage age and retirement age –

Eighteen and seventy-five respectively!

And at this time.

Xia Ke, the Iron Lady who succeeded Yan, was not too young.

When Yan passed away.

She was only thirty years old!

It was the best time to be in the prime of life and full of energy.

But it passed in a flash.

White hair had grown on her head.

Wrinkles also appeared on the face.

The eyes were starting to look a little old.

Energy and physical strength was not as good as before.

Not many years away from retirement.

General's side.

Su Dingfang and Xue Rengui were still relatively young.

Su Dingfang had been struggling in the second land all these years!

They had built the base for years.

But the speed of moving forward was slow.

During this period, they also sent people to explore.

However facing that powerful beast.

The exploration team was also very helpless.

In the jungle, there was no match for others!

But the super gorilla from before lived right next to the Great Desolate Army base!

It found a partner and mate.

A new offspring of giant gorillas was born.

The giant gorilla offspring that followed seemed even more powerful!

Because there was enough origin power.

The ratio of Jiang Fan's acceleration was much faster than before!

And this time.

The brand new metal developed at the forefront had also been studied by scholars to find out the properties.

And utilized in industry.

This metal was not quite the same as other metals.

The whole body was translucent, light blue.

It looked like Light blue tears.

Therefore!

This brand new metal was named Tearstone!

It was a metal that differed completely from Star Meteorite Iron and Vibranium.

Its single property was not strong when used alone to manufacture.

Even ordinary copper and iron were not as good.

But it was a powerful binder!

They could use it in a variety of materials.

For example, the new vibration alloy.

After adding the tear stone it would become more powerful!

This makes Blue Star's materials science embarked on a different path from the earth in the previous life.

Jiang Fan once again looked at the planet panel.

There had been a small change in the above—

Planet name: Blue Star

Planet level: Level 2

Planet diameter: 2588 km

Planet species: 1716

Planet talent: Eternal level

Extrapolation route: None

The diameter was increasing very quickly.

This was mainly because of the three land masses, the great explosion of life.

Especially within the Xia Kingdom.

The population had exploded!

It felt like a thousand miles a day!

Species-wise, the growth was also extremely rapid.

In just a few decades.

It has increased by more than two hundred species!

Inside

The main thing was still the credit of the third land!

Thirty years of Blue Star were just a month away!

The higher the life force of the planet.

Increasing the flow rate consumed more of the power of the source.

Jiang Fan stretched his back and stood up.

He was about to go out for some fresh air.

When the communicator suddenly rang.

It was Su Jicheng calling.

Jiang Fan picked up.

“Jiang Fan, I haven’t seen you go out lately.”

Su Jicheng said with a smile.

Although most of the students at Bei Dou University were relatively hardworking.

But those who were as diligent as Jiang Fan were still relatively rare.

-The first time in a month.

Except for going out for dinner.

He almost never went out.

Like other students.

There were occasional dinners, friendships, etc.

“Teacher Su, is something wrong?”

Jiang Fan asked.

According to Jiang Fan's understanding of Su Jicheng.

The other side had nothing to do.

Nor would he come to bother himself.

"There's something you need to come out of the mountain."

Su Jicheng said, "The school has set up a school team. As the strongest freshman in this class, they naturally asked you to join."

"School team?"

Jiang Fan raised his eyebrows and asked, "Is it going to be some competition?"

"That's right!"

Su Jicheng nodded and said, "But what's different from before is that this time it's a team competition?"

"A group competition?"

Jiang Fan blinked.

"Specifically, it's a five-person team competition, and there will be ten people on the school team, and they will select ten people from the freshmen."

Su Jicheng explained, "Five people will serve as the main players, and the other five will be substitutes."

"You, as the strongest freshman in this class, are naturally the captain of the school team!"

"That means"

Jiang Fan laughed: "I also have the right in the selection of team members?"

"That's up to you."

Su Jicheng smiled and said, "Because you are the captain and the only freshman in our school at the big mythical level, you can certainly interfere in the selection if you want to."

"If you don't want to bother, leave it to the school coaching staff."

"Who's the coach? You, Mr. Su?"

Jiang Fan asked.

"It can't be me."

Su Jicheng shook his head and said, "I've never ever led a team before, I've never even been able to get in, this time it's still the old rules"

"Ao Xiong is the coach. I am a member of the coaching team."

“Ao Xiong?”

Jiang Fan couldn't help but raise an eyebrow.

“You don't have to worry.”

Su Jicheng immediately explained, “He has been the head coach of the team for the previous few terms, he has a lot of experience, and this is also an honor on behalf of the school, so he wouldn't dare to do anything about it?”

“This time, the school also attaches considerable importance to the team.”

Su Jicheng paused for a moment and continued, “Because of the emergence of you, a great mythical level genius, it is estimated to get a relatively excellent result at the Starlight Grand Prix!”

“Not as much as in previous years

“Eliminated in the first round!”

“Starlight Grand Competition?”

It was the first time Jiang Fan had heard this term.

“The Starlight Grand Competition is an academy competition held by the Six Houses of Starlight, with thirty-six superb academies taking part, but it's a group competition.”

Su Jicheng explained again, “The group competition differs from the single competition, relying on the collective power!”

“Although our school has a great mythical level cadet in you, and Prince Qing is still okay, but the others are not good.”

Su Jicheng exclaimed.

“Are there any rewards?”

Jiang Fan asked.

“Rewards?”

Su Jicheng faintly froze, then nodded and said, “Naturally, there are rewards. The prize for this year's champion is a precious treasure, whose value is even a little coveted by me!”

“But it's only available to the champion.”

“There will be no reward for other places.”

“This tournament is mainly a competition for honor.”

“So, when does it start?”

Jiang Fan thought about it for a while and decided to go there.

After all, he was now the strongest freshman.

It had already cost the two billion given by the school.

It wouldn't be right not to join the school team.

"Come over this afternoon."

Su Jicheng said, and then said with some emotion: "Our school's heritage is still poor, those superb schools ranked at the top. This year is also full of many, many geniuses!"

"Mythical level talent is"

"Being able to form a team!"

Su Jicheng continued, "So"

"Don't be too burdened. Just do your best!"

"I know that."

Jiang Fan smiled slightly.

"I don't know the extraordinary species created by other people's secondary planets... How strong is it?"

Jiang Fan was a little curious.

Chapter 408: Conflict! Kick out Prince Qing! Those who disobey all get out!

After ending the communication with Su Jicheng.

Jiang Fan prepared a little.

At least he took a shower and changed into clean clothes.

Made himself a hearty lunch.

Usually, when Jiang Fan did not observe the Blue Star, it would slightly reduce the time flow rate.

A little after one in the afternoon, Jiang Fan called a charm car.

He came directly to the place where Su Jicheng said they held the school team training — the central arena of Bei Dou University!

It was also the best arena in Beidou University!

The facilities inside were the most advanced and top of the line.

When Jiang Fan arrived at the central arena.

He found out It was empty outside.

Slightly surveyed.

Jiang Fan walked into the arena gate.

Walked inside for a while.

Came to a wide arena inside, only to find

There were a lot of people standing here.

There were school leaders, various instructors and members of the school team selected from the freshmen!

Basically everyone had come!

Su Jicheng had also come.

From time to time, he looked in the entrance's direction of the arena.

When he saw Jiang Fan enter, he hurriedly waved.

Jiang Fan walked over.

And saw that

In the center of the arena.

Nineteen freshmen of this class were standing.

All of them were the most outstanding group.

Lin Youhe, Wan Yunsheng and Xiang Zhifei were were also among them!

Lined up in a neat line.

And in front of the team.

It was the head coach of this year's varsity team Ao Xiong!

At this moment, Ao Xiong was lecturing to a group of freshmen.

Saw Jiang Fan walking over and frowned slightly.

But it was ignored.

Instead,

He continued to sweep a glance at the crowd of new students and shouted: "You Although all of you are the most outstanding freshmen this year, remember that there are people outside, and there is a heaven outside of heaven!"

"Speaking of which, you guys have only just stepped into the realm of the second level!"

"On the path of planet master, you just hit the road!"

"Do not be complacent, do not take yourself seriously, no matter how talented you are..."

"There are also many people who fall in the middle!"

At this time, Ao Xiong seemed to notice Jiang Fan, who was beside him.

Turning his head, he scolded: "Jiang Fan, hurry and get into the team and take a suitable position! Don't let others wait for you for a long time in the future!"

"Didn't the training start at two o'clock? It's only 1:59? What's the point of waiting for a long time?"

Jiang Fan retorted.

Since, the charm car at the school was automatic.

It was very punctual.

There wouldn't be any accidents on the way.

That's why Jiang Fan was stuck in time to come.

Come over at two o'clock.

It wouldn't be too much earlier.

Hearing that, Ao Xiong frowned slightly.

The other school leaders and teachers were also stunned!

It seemed that What Jiang Fan said wasn't unreasonable.

It's just that the crowd was used to arriving early.

There was no one like Jiang Fan, who was stuck in time.

This made it hard for Ao Xiong to say anything.

After waiting for Jiang Fan to join the team, he continued, "Next, announce the list of the school team this time!"

"The school team is divided into two teams, the first team and the second team."

"Each team is ten people."

"Of these ten people"

"Five of them are starters, and five are substitutes!"

"The following announcement of the specific list, read the people's name to come forward, starting with the first team of ten people!"

"The main five are--"

"Jiang Fan, Prince Qing, Wan Yunsheng, Wang Yiteng, and Li Zihao."

The words fell.

Four people came out of the team.

It was the four people of Prince Qing whom he read out.

There was a pause.

Ao Xiong read: "Next are the five substitutes: Lin Wuhe, Xiang Zhifei, Jane Ziqiang, Laoshan, Mark Li!"

Lin Youhe and Xiang Zhifei also stood out.

When they walked past Jiang Fan.

They also smiled at Jiang Fan.

Jiang Fan raised his eyebrows.

To Lin Youhe, who was standing behind him, he said, "You and Xiang Zhifei are stronger than Wang Yiteng, right? And Who is Li Zihao?"

"Never heard of it?"

"Li Zihao was the other freshman who passed the legendary mission besides Wan Yunsheng. His family was very prominent! This time the planet promotion mission should have used a lot of extremely precious treasures, and unexpectedly passed this level!"

"As for Wang Yiteng No way."

Lin Youhe shrugged helplessly and said, "Wang Yiteng also passed the epic mission, but in terms of strength... Maybe we are still a little stronger."

"But this matter of school team selection is not purely based on strength!"

"Then rely on what? It wouldn't be Ao Xiong's idea, is it?"

Jiang Fan couldn't help but ask.

"Er"

Lin He hesitated, lowered his voice, and quickly said, "This is not true, although Ao Xiong is the head coach, but the power is not that big, the selection of the school team's quota, many school leaders and a group of mentors are watching the whole thing."

"Mainly because Li Zihao and Wang Yiteng are the people of the Prince's Party!"

"Crown Prince Party!"

Jiang Fan heard this word for the first time.

"The Crown Prince Party is a large group of people surrounding the Crown Prince, including Prince Qing, who also just joined the Crown Prince Party, led by Ao Xiong!"

Lin Youhe looked at Jiang Fan's expression and said with some surprise, "Don't you even know who the Crown Prince is?"

"Which one is it?"

Jiang Fan really didn't know.

Lin Youhe was a little speechless, then said, "Well, I'll explain it to you!"

"You should have heard that you are The second student of our Bei Dou University to pass the Great Mythology level, right?"

"What you mean is"

Jiang Fan immediately understood.

"That's right."

Lin Youhe nodded and said, "The first is the Crown Prince!"

"That's what others call him, and he was also the most demonic genius of that group back then!"

"Now he has made it to the Star Ranking!"

"Star Ranking?"

Jiang Fan's gaze flickered slightly.

The Star Ranking was not the same as the Heavenly Pride Ranking.

It was a list of all the second-tier planet masters!

And as everyone knew.

Tier 2 Planet Masters could live for several hundred years.

That means

This was to compete with dozens or even hundreds of heavenly pride!

That's much more terrifying than the Heavenly Pride list!

"The prince's father is also a powerful vice principal of our school!" Lin and River continued: "But This is not the most critical!"

"You should be able to think of using the word prince in school What does it mean?"

Hearing this, Jiang Fan faintly nodded his head.

Probably guessed something.

For a superb school like Bei Dou University.

The real master could not be the president or the group of elders in the back.

Nor was it the vice-principal and other school leaders.

Not even one of the following mentors.

Rather

The high and mighty level six planet master!

The only thing that matters was this powerful being.

The only factor that distinguished super-first-class forces from other forces was... there was a sixth-level planetary master!

If a superlative power's level six planet master died, then no matter how brilliant his power was.

It would also instantly fall from the superlative power.

The actual fact was that you could find a lot of people who had a lot of power.

To be honest

It's just managing the school for the sixth-level planet master above!

Chapter 409

409: Conflict! Kick out Prince Qing! Those who disobey all get out!

Dethroning them was just a matter of words.

"You should have guessed that."

Lin Youhe said helplessly: "For these powerful existences, school honor, genius competition will not let them look more than once!"

"The only thing that matters is"

"Cultivating the next level six planet master!"

"After all Level 6 Planet Lord has a long life span, but is ultimately limited!"

For this, Jiang Fan heard Su Jicheng said something vaguely.

This powerful existence of the Bei Dou University had lived for a long, long time!

Few people knew exactly how long.

But everyone could guess

It should be like the old age of ordinary people.

There was an urgent need to train a successor as soon as possible.

Once this powerful existence passed away.

There was no other level six planet master to take over then

Bei Dou University would instantly fall from the ranks of superlative institutions of learning!

The consequences were not too much to describe with ten thousand calamities!

"This prince is the first great mythical level of our school in nearly ten thousand years, so he became the successor chosen by the one above!"

Lin Youhe whispered: "The resources obtained are different from ours!"

"It is personally carried out to cultivate!"

"Therefore"

"That's why others call him 'Crown Prince' and treat him with such respect."

"Of course." Lin Youhe glanced at Jiang Fan and said, "You may have questions in your mind, you are also at the Great Mythic level"

"Why didn't this powerful existence look at you?"

"There's a very important reason involved. I'm not sure about the specifics"

“You’ll know when the time comes!”

“Anyway

“Your luck may not be too good!”

“So that’s how it is.”

Jiang Fan nodded slightly, realizing it in a flash.

Then he asked, “Why didn’t you join the Prince’s Party? With your strength and background, I guess others wouldn’t refuse.”

“Hehe.”

Lin Youhe smiled gently and said, “I heard that the family this crown prince belongs to had a good relationship with the lineage of Prince Qing of the Yong Yang Dynasty back then!”

“Prince Qing is now considered the Crown Prince’s deputy!”

“Wouldn’t I be asking for trouble if I went in!?”

“But you don’t have to worry about it.”

“You are not like us. This powerful being is still fair.”

“Look, Ao Xiong and the others must have a deep hatred for you, but they also had to let you be the captain of the school team!”

As he spoke.

Ao Xiong had also finished announcing all the team members!

Immediately

He looked at Jiang Fan.

A hint of helplessness flashed across his eyes.

But still said, “The captain of the school team will be Jiang Fan, and the two vice captains will be Prince Qing and Li Zihao!”

“In the future, the team’s training and tactics will be controlled by you three!”

“Especially Jiang Fan you

Ao Xiong looked at Jiang Fan and his voice changed: “You haven’t experienced a team competition before. So you should learn from Prince Qing and ask for advice!”

“The group competition is for five people, not a single fight. Without teammates, no matter how strong you are, it is useless! So...”

“Cooperation is very important!”

Hearing these words.

Su Jicheng and Lin Youhe and the others all frowned slightly.

He completely aimed this at Jiang Fan.

First, to suppress Jiang Fan!

Who told Jiang Fan to offend Ao Xiong so hard last time?

In full view, the face was almost wiped out.

“Well, each of you first familiarize yourselves with the situation of your respective teammates. What’s the situation with me

Ao Xiong didn’t finish his words.

Jiang Fan directly interrupted it.

Ao Xiong frowned slightly and looked at Jiang Fan and said, “Jiang Fan, what do you have to do?”

Jiang Fan took a step forward, looked at Ao Xiong.

With a faint smile, he asked, “I want to know, what are the criteria for this school team selection?”

At those words.

Ao Xiong faintly froze, then said, “Naturally, it’s based on each person’s planet talent, and then refers to the characteristics of the race they each built.”

“If that’s the case, why are Lin Youhe and Xiang Zhifei a substitute? According to their strength, they are not weak!”

Jiang Fan said.

He came to join the school team.

It was purely for that championship reward.

But once he came up.

Ao Xiong came to dismount several times.

Would there be any good fruits to eat in the future?

Jiang Fan did not fight before, that wasn’t necessary.

But it was different now.

Since the goal was the champion, then

It was necessary to first exclude all the unexpected factors.

“Is this your opinion of my selection?”

Ao Xiong stared at Jiang Fan, a trace of coldness flashing in his eyes.

“As the captain of the school team, I must also be responsible for the school’s honor, and I can’t let some troubled people into my team.”

Jiang Fan smiled faintly and said, “For the sake of fairness, I think we should hold a selection tournament, and whoever wins will be the main player!”

At those words, Ao Xiong and the others all frowned slightly.

And Lin Youhe and Su Jicheng were looking at Jiang Fan with some surprise.

Totally unexpected

Jiang Fan would actually open his mouth and speak out.

“Jiang Fan, don’t be ridiculous!”

Behind Ao Xiong, a school leader frowned and shouted.

“Don’t think that just because you’ve become the strongest freshman, you can act recklessly. The selection of the school team list was fully considered and deliberated, and it’s not something you alone can question.”

Another school leader also chided.

But the other school team leaders stood aside, watching quietly!

For the inside story of this school team starter list.

They also knew it by heart.

Lin Zihao was okay to say.

But about Wang Yiteng

Everyone knew he was certainly not as good as Lin Youhe and Xiang Zhifei!

But no one would offend Ao Xiong for this.

Not to mention

Wang Yiteng was also an epic level talent.

Not much worse than Lin Youhe and Xiang Zhifei.

Not much of an impact.

This kind of thing happens in every school.

Of course, At least the strength could not be too much worse.

If Wang Yiteng was a king-level talent, it would be very difficult to operate!

“Since as the captain, I also have to make the selection, those who do not meet the qualifications can not enter my team, and”

Jiang Fan paused, first glanced at Ao Xiong and the two school leaders, then looked at the others, and said loudly, “As for the team’s coach, I think Mr. Su Jicheng may be more suitable as the coach!”

The words fell.

There was silence in the arena.

All the people turned their attention to Jiang Fan.

A thought came to their minds in unison –

This Jiang Fan is crazy, right?

Not only was he unhappy with the school team selection.

Even

He even dared to dictate the position of the head coach?

Who did he think he is?

The one who was almost confirmed to be the successor of the prince?

Jiang Fan was not crazy for doing this.

Rather, he wanted to get rid of these guys who were in the way

To be directly kicked away!

Anyway, everyone was offended.

It wasn't that bad.

And in a void of the Bei Dou University.

More than a dozen seniors in the senior group were also paying attention to this school team training.

When they saw that Jiang Fan wanted to change the coach.

Everyone was astonished.

According to the unusual imagination.

Ao Xiong's suppression.

Jiang Fan would naturally be upset.

But at best they could endure or not cooperate.

But no one could have imagined.

Jiang Fan was so tough!

Directly asked to change the coach?

Chapter 410: Jiang Fan's Determination! The school's decision!

Within the arena, one by one, including a bunch of school leaders, instructors and freshmen were astonished when they heard Jiang Fan's words about changing coaches.

Everyone was very clear that Jiang Fan and Ao Xiong's side had deep conflicts.

It was basically impossible to reconcile, but this was the school team!

School leaders, instructors, etc. Too many people were watching!

It was for the honor of the school.

Even Ao Xiong, who was the head coach, didn't dare do too much.

Just verbally.

A few words of Jiang Fan were suppressed!

No one could have imagined.

Jiang Fan was actually So explosive!

One word of disagreement.

Directly counterattacked!

Hearing Jiang Fan say that he thought Su Jicheng was more suitable to be a coach.

Ao Xiong's face was instantly gloomy.

Coldness flashed in his eyes.

Even Lin Youhe and Su Jicheng and others were also greatly dismayed!

Jiang Fan's dissatisfaction with the school team candidates was fine.

But even the coach dared to assign.

That was really unexpected for everyone!

"Hmph!"

Behind Ao Xiong, a majestic-looking varsity leader coldly snorted.

Staring at Jiang Fan, he coldly shouted, "Jiang Fan, what do you want? Don't think that just because you're the strongest freshman, you can be lawless! Remember! You're just a second-tier planet master who just got on the road! Put yourself in your place and don't act recklessly!"

"Stand down quickly and reflect on yourself! Don't be a black sheep!"

"Yes."

Another school leader followed and said, "Even if you have any opinions about the list, you must not come and question it in public, remember! You are now the captain of the school team. Lead by example. How can you question the coach?"

"Instructor Ao Xiong is not only the best tutor of our Bei Dou University, but also the best coach!"

"I know you are a student of Teacher Su, but you must never waste your public life for personal reasons and joke about the school's honor!"

Hearing the words of these two people.

Jiang Fan's face was calm.

Although he basically stayed in the villa these few months.

Didn't go out so much.

Not much contact with people either.

But it didn't mean that he didn't know the situation in the school.

These two school leaders

In fact, they were the people of Ao Xiong's faction.

Naturally, they stand and speak for Ao Xiong.

If it was any other students.

Maybe this combination of soft and hard words adds some reprimands, warnings, education... and they will discourage you!

But Jiang Fan has always been very direct.

Moreover

Before taking action, Jiang Fan still used the system to deduce a little.

Then he found out

The identity of my great mythical talent was still very useful!

As Su Jicheng said.

The power of the school team captain was actually very great!

There was indeed a certain amount of power of choice over the list of players.

Of course, It was impossible to point fingers at the coaching position.

No matter how big the conflict is for others.

There would be an air of peace on the surface.

Impossible to tear the skin off.

But Jiang Fan didn't care about this.

The coach was of little use to him.

Not to mention It was Ao Xiong.

Did he had to lower his eyebrows?

"The best coach?"

The corner of Jiang Fan's mouth curled up in a smile as he said, "Then hold a selection competition to see if these main players are the five best freshmen in our school?"

Jiang Fan was too lazy to find other words.

Directly hit the point of the main players.

At those words.

Ao Xiong and the two school leaders behind him both had slightly changed their faces.

Among these five people.

Jiang Fan, Emperor Qing, Wan Yunsheng and Li Zihao had nothing to say.

This year's freshmen were just four... and were above legendary level talent!

If not, choose them, choose who?

But the key was

The remaining person, Wang Yiteng!

Although he was also epic level talent.

However, there were several more epic level talents.

Not to mention Lin Youhe and Xiang Zhifei.

There were other freshmen who were also stronger and had more potential than Wang Yiteng!

Lin Youhe and Su Jicheng and the others just had some strange faces.

Originally

They had thought that Jiang Fan was young and vigorous.

Couldn't stand Ao Xiong's suppression.

But now it seems This was completely prepared.

Just hold on to Wang Yiteng.

It made Ao Xiong and others look very ugly!

Other school leaders and instructors who were watching from the back also had a flash of laughter in their eyes.

The big tearing drama

That's what anyone would be happy to see.

Squeak!

Ao Xiong with a gloomy face directly squeezed the air!

Made a huge noise.

This was also the strength of a fifth level Planet Master.

He glared at Jiang Fan and scanned the crowd, shouting, "Since you have such a problem with my selection, well, then hire someone else! This coach Let someone more capable be the one to serve!"

After saying that, Ao Xiong left!

Big steps towards the arena gate.

"Teacher Ao, don't be angry, don't be angry."

The school leaders at the back cooperated and hurriedly went forward.

Pulled Ao Xiong who wanted to leave.

immediately.....

Coldly staring at Jiang Fan, he said, "Enough of this nonsense. Hurry up and apologize to Teacher Ao!"

Jiang Fan knew very well.

Ao Xiong certainly didn't really want to leave.

Since he was not reasonable in the matter of Wang Yiteng.

Then he would just use his status to threaten.

He had been the school team coach for over ten years!

Both prestige and fame were very big.

The most important thing was that very patient indeed.

Inside the school, even Su Jicheng, who was deeply conflicted, had to admit

Ao Xiong was the best coach!

"Since Mr. Ao doesn't want to go, then I'll go."

Jiang Fan also stepped out and said: "Either change the coach or change the captain, you can choose!"

Jiang Fan directly showed up!

He knew that It wasn't just these people present.

The group of elders behind the school were also paying attention here.

Pick one of these two!

I'm too lazy to continue arguing with you guys.

Seeing that Jiang Fan actually followed Ao Xiong to use this trick.

Everyone was surprised!

This was completely out of order.

Su Jicheng was also anxious.

He quickly stepped forward and grabbed Jiang Fan.

But he also didn't know what to say.

With his understanding of Jiang Fan.

This was definitely not a joke.

Jiang Fan stopped in his tracks.

Turned around with a calm face and looked at the crowd.

But!

Looking at this expression on Jiang Fan's face, anyone could see that

Jiang Fan was not joking!

In the void, the dozen elders of the elder group were all frowning slightly.

They also didn't expect

Things had actually come to this point!

Either change the coach?

Either change Jiang Fan, the captain?

There was no discussion at all.

“Nonsense! What nonsense!”

An old man in black spoke up, “This Jiang Fan What a revolt, the strongest freshmen have made him crazy like this!”

“What Jiang Fan said is also quite reasonable.”

Another gray-clothed old man glanced at this black-clothed old man and said, “What’s up with that Wang Yiteng? Everyone should be able to see that.”

The other old men all had faint smiles in their eyes.

Who didn’t know?

But Wang Yiteng was also an epic level talent.

It was not a big deal.

It was just that

No one could have imagined.

Jiang Fan caught him alive!

Hearing that.

The black-clothed old man also ran out of words.

Wang Yiteng was really a dead end!

Caught dead!

If you want to refute it, you can’t refute it!

“These two seem to be incompatible with each other.”

The oldest elder in the center spoke up: “In that case, let’s make a resolution, let’s keep one of the two and settle the matter of the school team as soon as possible!”

“That goes without saying.”
