

One Planet 511

Chapter 511: Climbing the Tower! Eighteen kinds of weapons! Rapidly leaping up!

After Liang He finished speaking.

Above the huge square.

A huge countdown appeared right away, very conspicuous.

Let everyone be able to see.

The waiting crowd wasn't really nervous at this point.

After all, They were also from a star area to kill out.

Mental quality was definitely not weak.

Some people were laughing and talking to each other.

Researching about the rules of the Star Tower breakthrough station.

Just now, Liang He just gave a general idea, and the specific rules still needed to be looked at carefully.

Jiang Fan's side was also studying.

The focus was on the rules of the breakthrough points.

“The Star Tower has a total of ninety-nine levels.”

Huo Kong looked at the projection while saying, “For every layer you break through, you get a hundred points, and the more layers you breakthrough, the more points you get.”

“If many people fall on the same layer, it ends up being the same number of points, how is the ranking going to be differentiated?”

Chang Feng, who had been silent, asked.

“Generally the top 10,000 won’t have too many identical points.”

Huo Kong paused, said: “According to this year’s rules, if the points are the same. They will be ranked according to the clearance time!”

“It will no longer be the same as before, with play-offs.”

“So

Huo Kong looked at Jiang Fan, Xi Ya and Chang Feng, smiled and said: “Wait a minute, I’m afraid everyone will try their best, especially those of us who hope to get the top 10,000, but it’s not very easy.” Contestants who are stable must work hard from the very beginning!”

“There is nothing to say. It’s different from the past battles. It almost depends entirely on strength.”

Xi Ya said, “Come on everyone, I hope all four of us can make it out of the line!”

“See you in the first 10,000.”

Chang Feng also said something.

After talking about the rules.

The rest of the time

The crowd was waiting quietly.

Ten, nine, eight, seven, six , three, two, one, zero!

When the countdown counted down to zero.

The one million participants in the square.

One by one, all of them instantly disappeared.

And were transported to the star space alone.

What differed from before was the surroundings turned into chaos and nothingness.

But it made people feel more comfortable.

Jiang Fan sat on a chair and looked ahead.

On the left was an “exit” button.

If a participant felt he couldn’t pass this level, he could press it and choose to quit.

But it also meant that the breakthrough station ends here.

On the right was a countdown.

The time displayed on it was

Exactly 24 hours!

This was the maximum time limit for each level of the Star Tower.

In other words

Each layer could stay up to one day at most.

If you couldn't pass this layer within one day's time.

Then, they would be directly eliminated!

"In theory, wouldn't it be possible to stay in the Starry Night for a maximum of ninety-nine days?"

Jiang Fan suddenly thought of this.

But this was absolutely impossible.

How could anyone do that?

Not to mention that a new rule had been added this year.

The pass time was used to determine the final ranking of the same score.

I'm afraid that once you came, it would all be on fire!

And in the very middle of the position.

There was a point panel!

It would show the points you have earned in real time.

"In one minute, the passage to the first level of the Star Tower will open. Please prepare yourselves."

A pleasant woman's voice rang out.

A new countdown appeared in front of

Jiang Fan and the other contestants.

One by one, they were all making their final preparations at this moment.

On their respective planets.

An army of people was all fully loaded and ready to go.

Standing in front of their respective passages.

Of course.

Before that.

They gave the contestants a channel mark on the first floor of the Star Tower.

Throw this channel seal on the respective planet channel there.

Only then would they be connected to the Star Tower.

The one-minute countdown soon ended.

The planet passage slowly opened.

A pale aura came from inside.

It gave people an ancient and vicissitudes feeling.

The Great Desolate Army was ready to go.

It was different from the previous preliminaries.

This time, after the planet passage was opened, they could come and go an unlimited number of times.

That means

The Great Desolate Army's storm fighters could fly out, then fly back, then fly out again!

As long as there was enough time.

They could come and go indefinitely.

"The Star Tower is also an ancient treasure."

Information about the Star Tower surfaced in Jiang Fan's head.

Instead, his eyes were fixed on the Great Desolate Army.

This time, Huo Qubing, who was already close to retirement still dominated the Great Desolate Army.

Luo became the vice.

The total number of warriors was 100,000.

There were still half a million people as replacements in the Royal Tomb Mountain Range behind.

Because they could support, at any time.

It was unnecessary to bring too many people at once.

Aircraft, cannons were naturally essential.

One thousand giant gorillas guided by micro drones.

As the vanguard!

The first to step in.

A spider chariot carrying 100,000 warriors followed closely behind.

What specific transcendent creatures would be in each layer of the Star Tower.

No one knew about it.

Even Liang He, who hosted the competition, could not know in advance.

Because this magical pagoda would occasionally refresh the transcendent races in each layer.

The interval time was also uncertain.

And this time

The first layer of the Star Tower.

It was a relatively desolate plain.

On this plain, there was a giant wild boar with blood-colored tusks.

At this moment, it was gnawing on the grass roots in the ground.

“Blood Tusk Steel Pig!”

Jiang Fan recognized it at once.

This was also considered a relatively rare transcendent race.

But during those five days of intensive training in the Long Sky Kingdom.

Jiang Fan and the others had literally, viciously studied a variety of the rarer Transcendent Mortal creatures.

They could still recognize them.

“It’s very similar to the long-tusked steel pig from before.”

In the team of scholars, a scholar immediately said, “But these boars’ tusks are blood-red, and it is estimated that Strength is stronger!”

Chapter 512 : Climbing the Tower! Eighteen kinds of weapons! Rapidly leaping up!

With the scholar team's research on transcendent creatures.

Now there was also a preliminary conclusion.

That were extraordinary creatures that looked more unusual in appearance.

Its strength would be more powerful!

At the same time, the Blood Tusk Steel Pig that was gnawing on the grassroots also found this group of uninvited guests.

After a slight daze, the eyes suddenly became as red as the tusks.

One by one, they let out a squeal.

Frenziedly rushed towards the army!

Even the layman could see it.

These blood tusk steel pigs were starved for a long time.

In this situation.

Everything was food.

“All fire, directly crush them!”

Huo Qubing ordered.

Swoosh, swoosh, swoosh.....

The 10,000 warriors at the front raised their electromagnetic rifles.

Towards the rapidly charging herd of Blood Tusk Steel Pigs, they fired continuously.

Poof, poof, poof.....

The defensive power of these blood tooth steel pigs was not much different from that of the long tooth steel pigs.

Even the previous armor-piercing blasts could not be stopped.

Not to mention the upgraded electromagnetic rifle.

It was beaten to pieces!

After a while.

Three thousand meters away, the ground was covered with a ground of blood tooth steel pigs.

Not knowing how many heads were dead.

The remaining Blood Tusk Steel Pigs were not fools.

As transcendent creatures, they still had the basic intelligence.

It immediately turned around and ran, disappearing from sight in an instant.

According to the rules of the level-breaking battle.

There was no need to kill all the transcendent creatures at each level.

Just defeat the opponent.

That way.....

The Great Desolate Army just broke through the first layer easily.

At the same time.

There was also a change on the middle points panel –

Participant: Jiang Fan

Points: 100

After the point change.

The environment around the Great Desolate Army instantly changed dramatically.

From the original desolate plain, it transformed into a desert!

The temperature of this desert was over forty degrees.

It was boiling.

There was a huge dune around it.

Micro drones hovered overhead.

Monitoring one dune after another.

But what was puzzling to the crowd was that there was not a single living creature here.

The experienced Huo Qubing felt that something was wrong.

Just wanted to warn.

And heard a subtle sound coming from the side.

Turn his head to see.

A slender shadow suddenly sprang out of the sand.

It pounced on the nearest warrior like a phantom!

“Be careful.”

Huo shouted immediately.

But it was already too late.

The warrior hadn't reacted yet.

It was too late to dodge!

Seeing this warrior about to be pounced on by this long and thin shadow.

A loud thud.

-A lightning flash.

Crackle!

It instantly struck this long and thin shadow.

It fell down softly.

The crowd fixed their eyes to see.

And saw

This was a body length of over three meters, head triangular-shaped, the appearance of the red spot color of the snake.

Looking at this appearance.

The crowd knew it must have been highly poisonous.

“Next time pay attention. You must not be careless.”

Huo Qubing severely criticized the warrior Fan who was almost attacked by a poisonous snake just now.

Just now, this warrior was too far ahead in the chariot.

Thus, the viper that was ambushed under the sand found the opportunity.

If not for the quick reaction of the electric mound next to it.

The consequences could have been unthinkable.

“Did our instruments not detect it?”

Luo Cheng, however, noticed another problem.

“No.”

A scholar shook his head, his face somewhat grave and said, “This kind of poisonous snake may have the gift of concealment. Even the instruments could not detect it in advance.”

“These snakes are troublesome if they keep hiding in the sand.” Luo Cheng said.

“Everyone goes back into the spider chariot and don't come out.”

Huo ordered.

Then he looked at the five thousand leaping electric mounds on the ground and said, “Electric mounds, it's up to you.”

The large electric mound in the lead nodded its head.

The Great Desolate Army also had other ways to deal with these venomous snakes that could conceal themselves.

But it was too time-consuming.

So.....they let the electric mound work.

Although the electric mounds also couldn't detect such hidden snakes in advance.

But their superb reflexes could react in the moment the cryptic snake rushes over.

Then unleashed the electric counterattack!

The scene is just now.

The crowd saw that these hidden snakes' strength was not strong.

The key was to conceal and contain poison!

If you get bitten.

It was estimated that even transcendent creatures would have a headache.

Under the temptation of five thousand electric hills.

The red-spotted venomous snakes hiding in the sand took the bait one after another and launched an attack on electric mounds.

But with no surprise, all were electrocuted into charcoal!

It didn't take long.

These red-spotted vipers also knew that the electric mound was not easy to mess with.

They withdrew quickly.

The Great Desolate Army also passed this level with no risk.

Jiang Fan's points increased by another hundred.

“I wonder how many of the others have passed this level by now?”

Jiang Fan looked at his points and wondered.

But there was no way

You can only see your own points here.

Other people's points couldn't be seen.

There were also no total points ranking.

Those watching the battle outside could only see the total points ranking.

This time for the group star main competition.

The first round of the Star Tower battle.

There was no live broadcast to the public.

Only the tournament party and the Lord of the Long Sky Kingdom, the people leading the team, could see the projected images of each participant in real time.

Inside a huge room.

The crowd gathered together.

Together, they focused on this breakthrough battle.

In front of the crowd.

There was a projection screen.

It was the situation of each participant to create a racial team to break through.

Each person could also choose their own contestants.

Like the Lord of the Long Sky Kingdom focused on Chang Feng, Huo Kong, Jiang Fan and Xi Ya, the four people who had the most hope of making it to the top 10,000.

“Is the second floor so difficult this year?”

Seeing that many teams were still fighting with the red-spotted viper, a sixth ranked planet master couldn't help but said.

“This kind of red-spotted venomous snake is extremely rare, not to mention these little guys. I'm afraid many of us don't even know them.”

Chapter 513 : Climbing the Tower! Eighteen kinds of weapons! Rapidly leaping up!

Bru laughed.

“I should measure the special snakes born by the Star Tower itself. We definitely don't know them.”

The Lord of the Long Sky Kingdom laughed and shook his head.

“No way.”

Liang He, who was standing in the middle, smiled faintly and said, “There are too many demons this year, so the difficulty will naturally be slightly elevated, but this second layer is more troublesome, it's definitely easy to beat these little guys.”

“That's for sure.”

A six ranked planet master said: “This is a star area carefully selected from a million top level two planet masters. If the first few floors fall down, then it’s okay?”

“The first ten layers are no problem for these little guys.”

Bru nodded and said, “Starting from the eleventh layer, there will be something to see.”

“I wonder which layer this year will be the first to be eliminated?”

“There's no point in guessing this, or guess who the first place winner is this term?”

“It's difficult to guess. This year there are five big favorites, considered the first group for the top spot, but there may also be some dark horses behind, which are not easy to say.”

“I'm optimistic about the Ice Moon Sage. The strength will be better.”

“You have a good relationship with the Ice Moon Sacred Land. Of course you are optimistic about the Ice Moon Sacred Saintess. I think that the race created by Huo Ge is more powerful.”

Once it comes to who will be the first.

It immediately sparked a lot of controversy!

Because this year there was no absolute favorite.

So everyone had their own opinion.

No one could convince anyone.

“Stop arguing, both of you.”

At this time, Liang He said, “We'll talk about it after the Star Tower battle is over.”

The topic died down.

.....

After settling the Red-spotted Viper on the second level.

The Great Desolate Army also did another thing.

That was

Send the dozen red-spotted vipers that were killed.

Send them back to the Blue Star.

Let the scholars in the research lab analyze the characteristics of these vipers.

Especially that ability to conceal.

It made the Great Desolate Army feel a little surprised and quite curious at the same time.

The third floor of the Star Tower was a large grassy area.

Here lived a herd of grumpy giant iron-horned cattle.

As soon as they saw the Great Desolate Army.

They stomped on all fours.

Rumbled and rushed over.

Iron-horned cattle's lather was very thick.

More so than the blood tooth steel pig.

But still couldn't resist the power of the electromagnetic rifle.

Directly pierced!

After a while.

The iron-horned cattle scattered in all directions!

The Great Desolate Army passed through without incident.

The fourth layer.

It was a group of ugly-looking dog-headed people.

The number was very large, and they also possessed the special talent of combining forces.

But the number of offensives was of little use to the Great Desolate Army.

How much could they dodge electromagnetic bullets?

The defense of the dog-headed people was just average.

Therefore!

This layer passed more quickly.

On the fifth layer, a group of robust centaur chiefs lived.

Same as the goblins.

It is also the only super civilized race in the centaur group.

These centaur chiefs.....

The actual sense of the human tall horse!

Also had the powerful ability to trample the earth.

But it was still not much use.

This trampling the earth had a range of action.

For melee species, they had a lot of killing power.

But how could the centaur chief..... get close to the body of The Great Desolate Army.

It became a target completely.

The Great Desolate Army did not bother much.

Still passed smoothly.

On the sixth layer, there was a dark space.

A special underground race was living there.

The same as the red-spotted vipers on the second layer.

All were species born out of the Star Tower itself.

But there were electric mounds.

A group of warriors also hid in the spider chariot, so this underground race found little opportunity.

Every sneak attack, there was no gain at all.

Instead, it made itself lose a lot of money.

Moreover

The Great Desolate Army still had enough lighting equipment.

Directly illuminated the surroundings into the daytime.

These underground races turned around and ran in fear.

“Really afraid of the light.”

Seeing this scene.

Everyone had a smile on their faces.

This level.....seemed to be the most tricky.

But it was the easiest.

Once the lighting equipment was on, flash bullets were thrown out a few dozen more.

It scared these underground races to scurry around.

No longer dared to come out.

Thus.

They smoothly promoted the Great Desolate Army to the seventh layer.

The seventh layer.

Eighth layer.

The ninth layer.

Again, they encountered a variety of transcendent species.

But none of them were much of a challenge.

Passed one by one.

The tenth layer!

It was also the last layer of the first ten layers.

According to Jiang Fan's knowledge of previous breakthrough battles, every tenth layer would increase in difficulty.

And the tenth layer

It was the most difficult of them all.

“This layer.....should be a flying species, right?”

Jiang Fan secretly thought.

The first nine layers hadn't encountered flying transcendent creatures.

Then this layer was bound to be encountered.

As expected.

The species living in the tenth layer.

It was a flying transcendent species.

The appearance was like that of a goose.

But it was much more vicious.

The most important point was

These transcendent geese not only could fly but also had a powerful physique.

The ability to fight in close combat was extremely powerful.

It was not inferior to those melees mortal species.

But it was not yet a match for the spiked bullets.

Not long after.

The feathers were beaten all over the place and flew around.

Completely afraid to come closer.

At this point!

All the first ten floors of the Star Tower were passed.

Jiang Fan looked at his points panel, which showed

Participant: Jiang Fan

Points: 1000

“The next is the eleventh floor? The difficulty will increase by another level.” Jiang Fan thought to himself, “Starting from this floor, it is estimated...someone will be eliminated!”

The old men outside were also paying attention one by one.

After the giant goose was resolved.

The scene around changed.

A more desolate aura came from it.

The eleventh layer was coming!

Chapter 514: Broken Record! Straight up to the ninth heaven! Big Brother’s

Surprise!

On the eleventh floor of the Star Tower, there was nothing unexpected.

What appeared was a brand new transcendent species.

What made Jiang Fan feel a little surprised was that, this species was actually an “old acquaintance” that the Great Desolate Army had encountered before –

Water Cannon Turtle!

Not just a head-to-head duel.

And the experience of fighting side by side.

For the species of water cannon turtle.

The Great Desolate Army was naturally familiar and couldn't be most familiar.

The strengths and weaknesses of each other were very well understood.

“This is the eleventh floor!?”

Jiang Fan blinked his eyes, feeling incredulous.

Although they were all super civilized races, there were specific divisions.

They were divided into lower, middle, upper, and peak.

Like the Water Cannon Turtle and the maze puppets.

They were at the entry level, classified as inferior.

And the demonized people built by Xiang Zhifei and the Xiu Ling race of Bu Jing Yue could be classified as medium.

Golden Behemoths, Demon Apes, Forest Trolls and these would belong to the upper class races inside the super civilization.

As for the peak level of the super civilization.

It was very rare.

Belonging to the rare and were hard to be found.

So far.

In the second level planet master.

Jiang Fan had only seen a Flaming Bird created by Huo Kong!

This was still produced by chance when the Flaming Bird underwent a mutation.

If he wanted to breed it directly.

That would be a troublesome thing to do.

Even for those powerful forces, it was very difficult to do!

Water cannon turtle belonged to the super civilization race.

The most low-level existence.

The battle power itself was not strong.

Even

It was not as good as the demonized people with very poor defense!

The demonized man could at least transform quickly and had an extremely good long-range output.

But if the water cannon turtle wanted high output.

They had to store the force for quite a long time.

It seemed weaker than some of the transcendent creatures in the first ten levels.

Just when Jiang Fan was feeling puzzled.

A scholar who had been observing for a long time suddenly spoke up, “No, these aren’t water cannon turtles. Look.”

This scholar pointed to the nearest water cannon turtle and said, “The shape and patterns on these giant turtles are all slightly different from the water cannon turtles.”

The crowd looked away.

Jiang Fan also glanced at it a few more times in curiosity.

Sure enough, he found that

These giant turtles were indeed not quite the same as the water cannon turtles.

Boom!

Just when the team of scholars was about to study this kind of giant turtle properly.

A few large giant turtles across the street suddenly opened their big mouths.

They spewed a white column of water out!

The speed and force were very amazing.

Instead of saying it was a water column.

It would be more appropriate to describe it as a water arrow.

“Water Arrow Turtle!?”

The name of a transcendent turtle suddenly came to Jiang Fan's mind.

Boom!

Boom!

Boom!

.....

Immediately after that.

A giant turtle opened its mouth immediately after.

And sprayed out a water arrow.

The range of these water arrows was extremely terrifying.

It reached a distance of over two thousand meters!

The Great Desolate Army was taken aback.

In terms of conventional range alone.

This was the farthest the Great Desolate Army had encountered a transcendent species since the conquest.

Not only that.

The water arrows in the back were even faster than the ones in the front.

And the hit of the water arrows in front was like a rocket boost.

Increase the speed and range of the water arrow in front again!

The water arrow in front of it, which was about to fall, exploded instantly.

The wind rushed towards the Great Desolate Army.

Jiang Fan looked a little dumbfounded.

For the species of water arrow turtle.

He had only heard of it, but because it was relatively rare, he had no specific information.

Now look at

It was so distinctive.

“Shrink up.”

Huo Qubing quickly ordered.

He couldn't care about anything.

Immediately, the head shrank and hid under the spider chariot.

—A series of water arrows landed on the position of the Great Desolate Army.

Directly hit one of the spider chariots.

Tremendous power.

Let the whole chariot shake slightly!

But!

Naturally, it was impossible to break through the chariot's exterior covered with a thick layer of armor.

They made this armor of deformation alloy.

Rumble

The spider chariot immediately changed direction.

Quickly backward.

This was also a powerful function for the spider chariot.

It could retreat directly without turning around.

It kept retreating until it was six kilometers away from the giant turtle, and only then did it stop.

One by one, the scholars slowly poked their heads out.

There was still some shock on their faces!

They also did not expect it at all

They would encounter this kind of transcendent race whose attacks were able to cooperate with each other in the air to accelerate.

"After the water arrow boosted just now, the range reached more than four kilometers!" A scholar said with a palpitating heart.

"Just Use armor piercing missiles."

Looking at a water arrow turtle leaning over.

Huo also made a quick decision.

After that, there was no surprise.

Although the water arrow turtles also had a turtle shell with extremely strong defense.

But under the tremendous power of the armor-piercing missile.

It was still fried into a shell and separated from the meat!

The tortoise shells are all broken.

It was really bloody!

The dead couldn't be more dead.

Not long after that.

Thousands of water arrow turtles began to flee with fear in both eyes.

The Great Desolate Army passed this hurdle with no danger.

Continued to the twelfth layer.

The twelfth layer was a melee species.

Although very powerful.

It was also a super medium race.

But somewhat similar to the Goblin Chief.

There was nothing outstanding in offense or defense, and it was not a threat to the Great Desolate Army at all.

Easily solved.

Then passed quickly to thirteenth level

A reptilian transcendent species.

Somewhat similar to the Desert Giant Lizard.

Ambushes in the grass.

Not much of a threat.

Just a little time consuming to deal with.

It took the Great Desert Army an entire hour to defeat these reptiles.

Advanced to the next level.

The fourteenth layer.

Fifteenth layer.

Eighteenth layer.

Nineteenth layer.

None of them encountered particularly powerful species.

All of them belong to the super mid-level transcendent races!

Chapter 515: Broken Record! Straight up to the ninth heaven! Big Brother's

The twentieth floor!

Again, a peculiar terrain appeared.

This was an underground cave.

In the middle of the cave.

There was also an unfathomable underground river.

Below the surface of the water.

There seemed to be some kind of behemoth lurking.

This made the crowd of the Great Desolate Army could not help but raise an unprecedented level of vigilance.

After the deliberations of the team of scholars.

Roughly judged.

The transcendent species in this layer should stay under the water.

However, these species never appeared.

The Great Desolate Army was far away.

Did not approach easily.

The same was true for the races built by the other contestants.

Even if there were aquatic species.

Before the situation was clear, they also did not dare to go down easily.

“This level is interesting.”

Bru, in the viewing hall, looked at Liang He with some curiosity and asked, “In this cave, what kind of species is it?”

“Don’t ask me, I don’t know either.”

Liang He said with a helpless smile: “Have you forgotten the characteristics of the Star Tower? We can only come up with a general assessment method. As for... the specific species of each layer, we can’t decide, and the tower spirit can’t decide.” Impossible to tell us.”

Everyone laughed.

For the Star Tower.

They all had some understanding of it.

This Star Tower was the same as a sixth ranked planet master.

It also had a tower spirit that existed.

The transcendent species that appear in the Star Tower layer by layer now.

There was also a tower spirit.

“Let’s see, it may eliminate someone on this level.”

Liang He continued.

This increased the concentration of many sixth ranked planet masters.

Anyone could see that.

This cave especially under that unfathomable water.

There must be an extremely dangerous species hiding.

Time passed minute by minute.

-Each of the species built by the participants was still watching.

Didn’t dare to be reckless.

Especially those participants whose strength was more backward.

But the time of each layer was limited.

The time limit was one day.

If they could not defeat the transcendent race of this layer within one day.

Then they would automatically be eliminated.

After a few hours.

Finally, there were teams that could not resist.

They made their move.

The Great Desolate Army did not panic.

They had long dispatched underwater robots to go down.

Explore the situation below.

Footage captured by an underwater robot.

They saw the species that were hiding under the deep water.

This was a kind of salamander in appearance.

But it was an enormous crawling species.

The body length reached over ten meters!

The team of scholars tentatively named it the giant fish.

Clatter!

A giant baby fish opened its vast mouth.

Swallowed an underwater robot in one gulp.

The crowd didn't panic.

This time

The number of robots sent down was very large, and this was just in case.

It didn't matter if one was swallowed.

The other underwater robots were still working.

After some deliberation.

They finally decided

Use medium torpedoes!

The torpedoes now.

It was much more powerful than the predecessors used in the AC race.

The same body size but they multiplied its power several times!

Nothing unexpected.

Under the terrifying power of torpedoes.

It blew a giant baby fish away, crying out for help.

No longer dare to hide under the water.

Rolling their immense bodies and running everywhere.

This level was still without any suspense...passed smoothly!

Next was the thirty-first level.

Another new difficulty.

Each of the other contestants also passed this level with no risk.

This result was unexpected for many of the bigwigs in the viewing hall.

“The overall strength this year is indeed much stronger than all the previous ones.”

A rank six planet master said.

“It should be the highest overall level ever.”

Another rank six planet master nodded.

“So far, so good.”

Liang He also smiled, “It’s up to each of the demons below to play and see if they can set the best result in history.”

Thirtieth-tier.

They didn’t mention the specific race.

Strength had become stronger, though.

But still couldn’t resist the power of the electromagnetic rifle.

Beaten to death.

Thirty-second layer.

Thirty-third floor.

Thirty-fourth floor.

.....

Thirty-eighth floor.

Thirty-ninth floor.

All the way to the fortieth floor.

Although on the way, they encountered some very peculiar transcendent species that Jiang Fan had never even heard of.

But none of them posed any threat to the Great Desolate Army.

The largest layer.

It only took less than three hours.

The opponents were also solved.

Smoothly passed!

But the difficulty was increasing little by little.

To the fortieth floor.

It has already made many contestants feel very tricky and strained.

Only

What was surprising was that.

All the way to the fortieth floor.

Still, no contestants were eliminated.

“Is this set a new historical record?”

A rank six planet master asked curiously.

“There is still one more layer to go.”

Liang He showed a smile on his face and said, “If all the contestants can pass the forty-first layer, then it will break the previous record of the Group Star Competition!”

“Of course, it’s tied now.”

The previous Group Star Competition.

The strongest time was when all the contestants passed the fortieth floor.

The forty-first layer!

It was the same as before.

The difficulty had been significantly strengthened again.

Many participants felt the strain.

Even

There were some who had to use their bottom cards they had been reluctant to use.

It was a thrilling pass.

Those who were stronger.

There was no need for this.

The electromagnetic rifle still has an amazing killing power.

Once again, it crushed the opposite transcendent race.

“Haha, a broken record.”

A rank six planet master said happily.

One by one, the other bigwigs also revealed smiles.

This was a historical record for so many sessions of the Group Star Competition.

They were able to witness it with their own eyes.

Naturally, they felt some glory.

“Congratulations, congratulations.”

A group of people also joined to congratulate Liang He.

Although the main credit went to the individual contestants.

But as the host of this year’s competition, this was also undoubtedly a brilliant achievement.

“Let’s watch the competition, next level some contestants must be eliminated.”

Liang He said with a smile.

“The next level, at most the next level, there are bound to be contestants eliminated.”

A sixth ranked planet master said with considerable certainty.

The others knew it as well.

The situation on the fortieth floor just now was very clear to everyone.

A part of the contestants sort of spelled out their bottom cards.

Chapter 516: Broken Record! Straight up to the ninth heaven! Big Brother's

They lost a lot of forged races.

Only then, they barely passed.

In the forty-second layer, the difficulty had increased a bit.

As expected, in this layer, there were teams that got tired.

After fighting hard for a while, they found out that they weren't an opponent.

And could only helplessly press..... the “quit” button.

So far!

The first round of the Star Tower Battle of the Stars Competition.

The first eliminated person appeared.

The first one.

The second one was not far behind.

By the time the Great Desolate Army had broken through this level.

There were already over ten contestants eliminated.

Among them was also one from the Long Sky star area.

The face of the Lord of Long Sky did not change.

This was naturally something that was expected.

What he was really concerned about this time were..... the four people, namely Huo Kong, Chang Feng, Jiang Fan and Xi Ya.

The others had little hope at all.

On the forty-third floor.

Another group of contestants fell down.

The number was even greater than the previous layer.

Forty-fourth layer.

The forty-fifth layer.

The difficulty increased a little at the same time.

The number of eliminated participants was also increasing.

Started to have a tendency to pile up and pile up.

The forty-sixth layer!

The difficulty increased by one point again.

The transcendent species encountered on this layer was.....Scarlet Minotaur!

One of the best of the super medium races.

Strong body, huge bull horns and wind-like speed.

All made the Scarlet Minotaur a very big threat!

Rumble.....

As soon as they saw a team of participants appear.

The Bloody Minotaur's bull horns immediately turned blood red.

It's charged beyond all hope.

But it was still no match for the electromagnetic rifle.

Only

Many of the participating teams were already holding up to their limits at this point and were barely holding on.

“Kill! Kill! Kill! Black Flame Giants, you are the strongest!”

-Inside the star space.

Hess, who had once fought with Jiang Fan and came from Giant Island, was glaring with his eyes.

He was commanding loudly, as if he was crazy.

Although the Black Flame Giants belonged to the higher races in the super civilization.

But there were too many Scarlet Minotaurs.

There were ten times more than the Black Flame Giants!

Over one hundred thousand heads!

It couldn't be helped.

This was also the characteristic of all giant groups.

Single strength was powerful.

But the ability to reproduce was worse.

Under the frantic attack of the Scarlet Minotaur, who did not fear death in the slightest.

At first

The black flame giant could still resist.

But gradually.

The black flame giant also suffered casualties.

The two sides fought fiercely.

-An hour.

Two hours.

The casualties of the Black Flame Giants were getting bigger and bigger.

There were over five thousand of them!

For the Star Tower Battle, Hess had mobilized over 10,000 Black Flame Giants.

But if the casualties were too heavy.

It would still impact the planet.

And on the opposite side, the Scarlet Minotaur died even more.

All exceeded 50,000 heads.

Only

There was one difference.

The Scarlet Minotaur had no fear at all.

Like a madman.

When they saw other creatures, they rushed up.

“Charge! Keep charging! Don't be afraid, great black flame giants.”

He clenched his fists.

He was cheering on the Black Flame Giants.

He didn't have any cards left.

He could only rely on his spirit to generate electricity.

Another hour passed.

The Black Flame Giant once again fell down to three thousand.

Hess' pep talk was also getting more and more feeble.

The fingernails almost got stuck in the palm's flesh, and he was very unwilling.

But there was no way.

One could only choose to admit defeat.

This layer!

The number of contestants eliminated.....exceeded 100,000 people!

Hess's strength in the qualifying round was recognized as being in the top 300.

Even he had been eliminated.

The other contestants were from the Long Sky Star Area.

Naturally, they were no better.

Over seven hundred people fell at this level.

Although it had been expected.

But after seeing this.

The Lord of Long Sky Kingdom still could not help but..... frowned slightly.

Especially when he saw his best friend Bru's face with a smile.

A thousand participants from the Elves Empire.

That was smooth sailing.

Until now.....

None of them had been eliminated yet!

“Haha, Long Sky Kingdom, it's not my fault. It's really because all the geniuses from our Elves Empire are too good this year.”

Bru also didn't forget to vanquish a bit.

Pissed off the Lord of the Long Sky Kingdom's teeth.

Forty-seventh layer.

Forty-eighth floor.

Again, numerous participants were eliminated.

The number of each layer exceeds one hundred thousand.

Forty-ninth layer.

With the fall of a participant from the Long Sky Kingdom.

The face of the Lord of the Long Sky Kingdom suddenly became tense because The participants from the Long Sky Star Area who were still in the Star Tower now. ~~ŘÁNõBÊş~~

There were only less than fifty people left!

And Bru's Elves Empire.

None of them were still eliminated.

The fifth floor!

There was no surprise.

Again, numerous contestants with a rather terrifying number of participants had fallen.

Naturally, it also included quite a few contestants from the Long Sky Star Area.

The face of the Lord of the Long Sky Kingdom was about to turn pale.

After this layer was over.

The entire Long Sky Star Area

There were only ten people left!

The only good thing was.

The race, created by Chang Feng, Huo Kong, Jiang Fan, Xi Ya and others who had high hopes.

At this moment, they were still inside the Star Tower.

“The next level is the fifty-first level.”

A sixth ranked planet master said, “Compared to the previous one, the difficulty should be greatly improved.”

“The Star Tower has ninety-nine floors, and the difficulty will increase slightly for every ten floors.”

Liang He also nodded and said, “And every fiftieth floor there will be a substantial increase!”

“The fifty-first layer, or fifty to sixty layers, it is estimated that

“It’s about to decide the top 10,000 participants.”

“If it’s quick, we would see the first signs in the next layer.”

Bru smiled and said, “After the fifty-first layer, those who appear should be super advanced species.”

At the same time.

The Great Desolate Army was also increasing the concentration.

Coming to the fifty-first layer!

A new fight had begun.

Chapter 517 : Only five left! The final battle! Super peak creatures!

After the fiftieth floor of the Star Tower.

Over half a million participants had already been eliminated from the competition.

It was okay at first.

Especially from the forty-sixth floor onwards.

Almost every layer had over one hundred thousand people eliminated.

By the time the fifty-first floor was reached.

Within the Star Tower, only a little over 400,000 teams of transcendent races built by various participants remained.

These teams were of different kinds.

They were all different.

Some had only built one race from start to finish.

Most were of two kinds.

There were also a tiny number..... that built three races!

Numerous races had the advantage of a large number.

A small number also had the advantage of a small number.

There was no doubt about it.

In this breakthrough battle, the competition was the actual strength. There was no luck.

Because each team faced the same opponent.

“On the fifty-first level, the ones coming out should be super higher species.” A sixth ranked planet master said.

The others also raised their spirits.

Looking at the remaining contestants.

According to the situation of the fiftieth layer just now.

This layer

Basically, there was nothing unexpected.

There would be a substantial increase in difficulty.

At least over 100,000 people would be eliminated.

Inside the Star Tower.

A transcendent team was also on alert like never before.

The Great Desolate Army was also the same.

When stepping onto the ground of the fifty-first floor.

The miniature drones immediately spotted a brand new race not far away – a very large and sturdy, half-human, half-mighty transcendent beast!

“Half-human Manticore?”

Jiang Fan raised his eyebrows slightly.

This kind of giant beast was over ten meters tall.

The body was extremely sturdy!

It could be regarded as the Great Desolate Army so far.....

One of the most massive transcendent species encountered.

It belongs to the super high species!

This kind of giant beast was also very famous.

It could be said to be

Goblin Chief's fully enhanced version.

That stout body, long and powerful pair of fangs, and strong limbs.

It was all unbearably intimate.

As soon as the Great Desolate Army was discovered.

The half-human mammoth immediately stopped eating.

First, they swept a few eyes at the Great Desolate Army.

Immediately after that.....

A tallest half human mammoth roared.

Like an order.

While on the plain.

All the half-human mammoths madly rushed over towards the Great Desolate Army.

Although the size was immense.

But the speed was not slow at all.

Rumbling.....

Over 100,000 heads of half-human mammoths rushed at the same time.

The thick limbs trampled on the ground.

Even the earth trembled!

“Follow the tactics used against the Goblin Chief and execute the attack.” Luo Cheng gave the order.

Fifty layers ahead.

Huo Qubing had rarely commanded anymore.

Most of the time.

It was all handed over to Luo Cheng.

This was also for Luo Cheng to take over more smoothly.

Not to mention that

Dealing with melee extraordinary creatures was what the Great Desolate Army feared the most.

And in the previous fifty levels of the breakthrough battle.

The team of five hundred scholars did not come to stare blankly.

Naturally, they also issued a certain role.

They analyzed the characteristics of different transcendent creatures.

Then the various transcendent races were summarized.

Finally, a summary was made.

From there, they develop the corresponding tactics.

For example, seeing the burly melee of an extraordinary creature, a half-human mammoth.

The crowd instantly thought of the previous goblin chief.

Both of them were the same type.

There was also the Goblin Chief built by Lin Youhe.

In fact, it was also a type.

Both belong to

A powerful transcendent race with a sturdy body, powerful physique and excellent melee combat ability.

But speed and agility were not considered outstanding.

The output was very average.

There was no powerful and instant explosive power.

There was also no strong special ability.

All together.

It was just a meat shield!

Against this transcendent race.

The Great Desolate Army had a lot of experience.

The first was the “decapitation tactic”.

Get rid of the most powerful one in this group of Half-Human Mammoth.

The rest of the goblin morale would instantly drop.

This was in the previous battle to solve the goblin chief.

This had been fully reflected.

The storm fighters above the sky had long been ready.

After discovering the largest goblin Mammoth that made a roaring sound.

Immediately, an armor piercing missile was shot out.

The leader of the half-human mammoth was shot straight at.

The result was no surprise.

The half-human mammoth, although the skin was thick.

But could not withstand the power of the armor-piercing missile.

The whole vast body was blown apart!

Over the past few years.

Whether it was the power of the missile, or the armor-piercing device's ability to break armor.

There was a certain amount of improvement.

After killing the Half-Human Mammoth leader.

The rest of the Half-Human Mammoth army was dumbfounded.

Some wanted to attack to take revenge for the leader.

But the gun hit the head.

The Great Desolate Army was dedicated to attacking these Half-Human Mammoths who rushed in the front.

A few clicks of effort.

One by one, they all fell to the ground.

The other half-human mammoths suddenly panicked.

The situation of the group, without a leader.

Even if there were lots of them.

It was still a mess.

A half-human mammoth led the way.

Instantly, countless others followed.

Scattered and fled!

The Great Desolate Army easily passed this level.

But other participating teams were not so comfortable.

Even

They were still struggling.

Powerful transcendent race for the Great Desolate Army.

It was equivalent to a huge target that could move.

But for most of the participating teams.

That's a tough nut to crack!

Half-human mammoth was full of strength, meat and tough!

The output was not enough.

It was difficult to kill the opponent directly.

This way.

It was easy to get into a tangle, which was more advantageous to the physically strong half-human mammoth.

Chapter 518 : Only five left! The final battle! Super peak creatures!

Like with Hess, tootie was from the giant island.

The most powerful member of the Giant Island this year.

Ranked in the top thirty of the Long Sky star area.

The one who built the Golden Amazing Giant, which was even stronger than the Black Flame Giant.

But facing over 100,000 heads of Half-Human Mammoth.

The Golden Amazing Giant's golden aura had limited killing power.

It could not cause heavy damage to the half-human mammoth. If one was not careful.

He would be trampled to death by the tall Half-Human Mammoth.

Rumble.....

The terrifying giant hooves of the Half-Human Mammoth.

It is trampled on the positions of one of the participating teams.

It was like a nightmare.

Eliminating over 100,000 contestants from the competition.

This is the fifty-first level!

Many participants whose strength ranked at the top of each star area had fallen under the giant hooves of the Half-Human Mammoth

Even the Elves Empire.

There were also dozens of elves eliminated.

The Long Sky Star Area was even worse.

After this layer.

There were less than twenty people left!

“Long Sky, don't be too nervous. There might be an accident later on, maybe.....”

Bru comforted, “In the next round, all the contestants in your Sky Star Region will be eliminated.”

“Get lost.”

The Lord of the Long Sky Kingdom scolded without good grace.

Although Bru was only joking.

However, the Lord of the Long Sky Kingdom could not help but slightly squeeze his palm.

What Bru said.....

It was indeed quite possible.

If a special species appeared in the fifty-second layer.

I'm afraid that the dozen players left in the Long Sky Star Area.

All of them would be wiped out by the group.

The fifty-second layer.

Didn't let the crowd down.

Sure enough, there appeared a transcendent creature that differed from all the previous races!

The size was very tall.

The figure exceeded twenty meters!

It was the tallest species that had appeared so far in the Star Tower.

One of the tallest species to have appeared.

The whole body seemed to be shrouded in a shadow.

Walking between

There seemed to be layers of phantom shadows flashing by.

“Ultimate Demonized Man!?”

One by one, the big guys all stared in surprise.

This was a fully enhanced version of the Demonized Man.

But compared to the Demonized Man.

The Ultimate Demonized Man would be very difficult to see.

It was also very difficult to cultivate!

It was also only in the Star Tower.

Only then would one have the chance to see this transcendent species with a very terrifying output that could be described as a violent aesthetic.

“The Ultimate Demonized Man's range is greatly enhanced compared to the Demonized Man, reaching over three thousand meters.”

Jiang Fan was naturally no stranger to it.

“The output is even more terrifying. In terms of output alone, it's almost considered the most powerful firepower among the super higher species!”

“These big guys, they're almost born turrets.”

But to the Great Desolate Army.

Just took a little extra look.

There was no panic at all.

Threat was smaller than that of the previous water arrow turtle.

Although the transformation time of the Ultimate Demonized Man was very short.

But.....

It didn't help either.

The Great Desolate Army was five kilometers away.

The ultimate demonized man even after transforming, it had to move forward two kilometers.

Only then was it possible to beat the Great Desolate Army.

How could everyone give this opportunity?

One thing was the same as the demonized man.

The defense of the ultimate demonized man was also quite weak.

This time

The storm fighter in the sky did not use missiles.

Directly air-dropped cluster munitions.

These were not very useful ammunition for these strength-based transcendent species like the Half-Human Mammoth.

But the ultimate demonized people could not take it too well.

Bombing up.

Debris and shock waves.

Both could cause fatal damage to the ultimate demonized human.

“Long-range output type.”

The team of scholars watched as one Ultimate Demonized Man fell.

While doing so, they are attributed a brand new type.

This was also considered the category that the Great Desolate Army was most unafraid of.

Because

The long-range output transcendent species.

Generally, they were physically more fragile.

Then the Great Desolate Army could inflict significant damage on the opponent!

There was no need to use weapons like missiles at all.

But the other participating teams were not so well off.

Especially those melee transcendent species. One by one, they were beaten and cried out.

They were completely beaten on one side.

There was three kilometers of range to break through.

I don't know how many corpses would have to fall down.

“Hahaha.”

Seeing this scene, Bru couldn't help but laugh: “Melee species encountering the ultimate demonized human really met their nemesis, being pressed and beaten, completely unable to get close.”

“Yeah.”

The Lord of the Long Sky Kingdom also nodded and said, “Especially these Ultimate Demonized People, their output has penetration, melee species can't defend against them even if their defense is strong!”

The Lord of the Long Sky Kingdom was in the mood to talk about it.

Naturally because

This level.

The participants from the Long Sky Star Area had performed quite well.

Apart from Jiang Fan.

The other top ten ranked ones also passed very smoothly.

But most of the other star areas.

Not so good results.

This layer had eliminated over 100,000 people.

The number of teams that stepped to the 53rd layer was less than 300,000 teams!

On the fifty-third layer, a brand new species appeared again.

But it was a shadow race capable of backstabbing.

It was also commonly called “assassin” in the outside world!

The speed and agility was very high.

It was one of the most agile species they've ever seen!

The Great Desolate Army had long learned to be smart.

In the absence of a clear situation.

The entire personnel were hiding in the spider chariot.

Waiting for the micro-drones to capture the images of the transcendent creatures on this level.

Chapter 519: Only five left! The final battle! Super peak creatures!

Only then would the next step be taken.

Therefore, the most powerful "backstab" ability of the shadow race wouldn't work at all.

The attack on the spider chariot.

Only a dull sound would be made by the chariot.

It was completely unbreakable.

Then

The machine cannon on the chariot would directly knock them down.

Although the defense of the shadow race was so much better than the ultimate demonized people.

But it was not much better.

The physique was brittle.

"Melee agility type."

After resolving the Shadow Race.

The team of scholars had summed up a new type.

This layer

For some participants, there was a surprise.

And for others, it was a disaster!

Many powerful long-range output transcendent races were especially afraid of this kind of Shadow race that could get up close and personal instantly.

For example, the ultimate demonized people.

The Shadow race.

That was really a natural nemesis.

They might even transform out.

One blow directly knocked it down.

But for goblins, such a physically powerful strength-type melee species.

The lethality of the shadow race was not enough.

Not afraid at all.

The elves from the Elves Empire.

Just a little afraid of these guys.

So

This fifty-third layer.

The Elves Empire's contestants were eliminated and it eliminated over two hundred contestants.

Let the Bru who had been keeping a smile on his face couldn't help but stiffen.

Long Sky laughed out loud.

"Don't be complacent."

Bru didn't have a good mood and said, "The next level, it is estimated that in your Long Sky Star Area, not even ten of yours will pass through."

"It doesn't matter, as long as there are one or two in the end to make it into the top ten thousand."

The Lord of the Long Sky Kingdom smiled faintly.

The fifty-fourth level.

There was still a brand new species that appeared.

A melee violent output type of race.

The output was slightly weaker than the Ultimate Demonized Human.

However, the speed, agility and physique were several levels stronger.

However

To the Great Desolate Army.

The threat was even less than the ultimate demonized man.

The ultimate demonized people were at least able to output from a distance.

These races could only close in on them.

Only then did they have a chance to launch an attack.

This level completely turned into a one-sided slaughter!

It didn't even get close to the three kilometer limit.

It was like cutting wheat.

Falling down one crop after another.

But the teams with long-range output entries after all, there were only a few.

Most of them were melee combat.

That was very hard to bear.

The terrifying output of the opposite side.

It was enough to put the demon ape, the golden behemoth and other transcendent species directly killed in seconds!

Many teams.

All of them were in a bitter battle.

Long Sky Star Area was no exception.

On this fifty-fourth floor.

Several more were eliminated.

Of those left, there were less than ten.

To be precise It was eight!

Jiang Fan, Changfeng, Huo Kong, Xi Ya, the Crown Prince and three others!

The fifty-fifth level.

It was also a completely new species.

The strength was naturally more powerful than the previous ones.

But it was no match for the Great Desolate Army.

Three people from the Long Sky Star Area were eliminated from this layer.

There were only five people left!

Fifty-sixth layer.

Jiang Fan, Huo Kong, and five others were holding up.

One by one, the other contestants were also putting in their best efforts.

The fifty-seventh layer.

Fifty-eighth floor.

The fifty-ninth floor.

Out of everyone's expectation.

The number of participants eliminated from these layers was actually gradually decreasing.

There were still over 80,000 participants left!

Even the Lord of the Long Sky Kingdom himself was a little surprised.

Because

Until now.

Jiang Fan, Chang Feng, Huo Kong, Xi Ya and the Crown Prince were all five still around.

A whole four levels more than others in the same star area had lasted.

The elves of the Elves' Empire also played an outstanding strength.

There were nearly two thousand people left!

“Originally I thought that after fifty layers, or the first few layers, the first ten thousand could be selected, I didn't expect”

A sixth ranked planet master spoke: “All of them are so powerful, I'm afraid they can last until the 60th floor.”

“Shouldn’t be a problem.”

Another planet master nodded and said, “Then it’s the sixty first floor to divide the top ten thousand rankings.”

“Sixty-one floors will definitely be divided.”

Bru also agreed.

These big brothers who had participated in the last group star competition.

All were very clear

The difficulty of the sixty-first floor would continue to increase.

The ones that come out would definitely be the super peak races!

And of the one million contestants.

There were few who could create a super peak race on quality alone.

And could not even beat.

Not to mention the quantity.

There would definitely be more.

But before that.

They still had to get through the sixtieth floor.

Nothing unexpected.

Except for a few people who were eliminated.

The remaining participants all passed the sixtieth floor without any problems.

Came to the sixty-first floor!

At this time, the participants

There were only 50,000 left!

This was also the number of participants who have passed the 60th floor since the previous Group Star Competition.

This was the largest number of participants to pass the 60th floor!

“Go! Go for it! You guys are the best.”

“Use all your abilities to pass this layer, and you will win.”

“Snow Lions, show your courage and defend your honor!”

“As long as you can defeat the opponents on this level, go back to all your conditions. I will agree!”

“.....”

One by one, in the star space.

Many participants were cheering for the team they had built.

They were all very clear.

If they could pass this sixty-one layer.

The top ten thousand was almost a nail in the coffin!

“Everyone be alert, the next layer should be a species as powerful as the Fire Amazing Bird, don’t be careless.”

Luo Cheng also gave an extra reminder.

The crowd naturally would not be careless because they had passed the level so easily in front of them.

In the battle with Huo Kong.

The fearfulness of the Fire Amazing Bird.

Everyone has seen and experienced it.

The sixty-first level!

Nothing unexpected.

The super pinnacle species made an appearance!

The one that appeared in the micro drone screen

It looked ordinary.

The size was also not too big.

But it was a terrifying and extraordinary creature that made the faces of many contestants change!

Chapter 520: The Star Tower ends! Jiang Fan’s ranking!

It was about five meters tall.

Walking upright and somewhat human-like in appearance.

But it was a strange and extraordinary creature with a pair of fangs in its mouth.

And it wasn't the pair of fangs that stood out the most.

Rather

These transcendent creatures were holding an extremely large axe in their hands.

The size of the axe was almost as big as their body size.

Seeing this never-before-seen strange species.

All the contestants froze.

Not only the participants.

Even the group of the six ranked planet masters outside was a little baffled.

They had never seen this kind of transcendent creature before either.

“What is this?”

A sixth ranked planet master asked.

“If I'm not mistaken, this should be the Giant Axe Warrior!” Liang He spoke up.

“Giant Axe Warrior?”

It was the first time the crowd heard such a word.

“The most powerful Giant Axe Warriors.”

Liang He continued, “The giant axe in their hands, these giant axes are not built and made, but this race was awakened with it.”

“With this giant axe, these warriors can be classified among the super peak species.”

“If I’m not mistaken”

Bru continued: “The most powerful of these giant axe fighters is probably the giant axe in their hands.”

One of the participating teams was also a bit confused.

What the hell was that?

The people of the Great Desolate Army were just a little curious.

A group of scholars’ eyes were shining.

Excited to see a brand new transcendent species once again!

Especially for the anatomy majors, it was like seeing a treasure.

The giant axe warrior surveyed the personnel and formation on this side.

Not like those melee races before.

Charge up at the drop of a hat!

Not long after.

A scene that surprised everyone happened.

They saw that some giant axe warriors spread out in advance.

Everyone was separated by a suitable distance.

Then!

Only then did they launch a charge.

“What a speed.”

Jiang Fan couldn't help but sigh.

Although these Giant Axe Warriors were also melee fighters, they ran like a gust of wind.

It was not something that the Goblin Chief or the Goblin Mammoth could compare to.

In the eyes of ordinary people.

It was completely a phantom.

“Not bad for a super peak species.”

One of the big guys outside was also nodding and lamenting.

Phew, phew, phew

Needless to say.

The Great Desolate Army had long formed a set of relatively skilled tactics.

Waiting until the opposite side rushed to within range.

And fire straight away.

Tens of thousands of electromagnetic rifles fired.

The current electromagnetic rifle, compared to the one that was used for the first time before.

The power had been slightly improved.

The previous electromagnetic rifle.

The bullet fired was over three thousand meters per second.

Now it has touched the number four thousand!

Accuracy had also been greatly improved.

Against the not so powerful transcendent creatures.

There was no need for other weapons at all.

The electromagnetic rifle alone could solve it.

The moment it saw the Great Desolate Army warriors raise their electromagnetic rifles.

These huge numbers of giant axe warriors also responded in time.

Immediately an enormous axe blocked their bodies from the front.

The spiked bullets arrived from afar.

Clang.

Hit on this enormous axe.

Surprisingly, this enormous axe was not shot through!

This result made Huo Qubing's eyes widened, and the other scholars were even more surprised.

This was still in the Star Tower.

The first time they encountered

There were transcendent creatures that could actually block the armor piercing effect of the spiked bullets.

No doubt.

It must be related to the giant axe that was blocking the body.

At a closer look, the scholars found.

Although this enormous axe was not shot through, it still hit the surface with a deep pit.

This made people slightly relieved.

If it was really not penetrated at all.

The Great Desolate Army would have had a headache.

“What a powerful axe. I wonder what kind of material it is made of?”

An expert in material science was fascinated to look at this handful of huge axes.

No need to think about it to know.

It could stop the spiked bullets.

Definitely a very extraordinary material!

Dang! Dang! Dang!

They fired a bullet out.

But without exception.

The giant axe blocked all across the front of the giant axe warrior.

Naturally, there was no way to shoot two or more bullets.

In case of hitting the same location.

“Hit the backs of their hands and feet.”

A scholar shouted.

Some soldiers had already noticed the weakness of the giant axe warrior’s defense.

Although the giant axe was big.

But it couldn’t block the entire body.

There would always be some gaps left.

For example, the back of the hand holding the giant axe.

And feet!

All were points that could be used.

After discovering some of these.

Great Desolate Army warriors aimed and shot with purpose.

They equipped the electromagnetic rifle with

Many, many instruments to help aim.

Let the hit rate increase year by year.

Poof!

-A light sound.

The back of a giant axe warrior's hand.

A spiked bullet opened a flower.

Followed by a "clang" sound.

The spike bullet pierced through the back of this giant axe warrior's hand.

It was shot on the enormous axe behind the back of the hand.

“The defensive power of these giant axe warriors is like that of the previous half-man mammoth.”

Through this shot.

The team of scholars quickly judged this.

“But the recovery power might be stronger.”

A scholar added.

Just hitting the back of the hand had little effect.

The giant axe warrior’s right hand trembled slightly.

Changed the giant axe to the left hand.

Still charging forward quickly.

Since the hit was not fatal.

Tens of thousands of soldiers of the Great Desolate Army directly pick the opponent’s exposed hands and feet to hit.

Ten rounds of spiked bullets went down.

Even if the giant axe warrior was strong in recovery.

That arm was useless.

Not to mention the feet.

Only a few rounds could make a giant axe warrior lose the ability to run.

Under the terrifying firepower of the Great Desolate Army.

These giant ax fighters moved extremely slowly, and their companions fell down from time to time.

The rainstorm warplanes in the sky also from time to time swoop down to help.

Sometimes put a missile.

To kill the leader on the other side.

Sometimes a machine gun strafing.

But the giant axe warriors were very brave.

Even if the leader fell to the beheading tactics of the Great Desolate Army.

The rest of the giant axe warriors were still very brave.

They were still charging forward without fear of death.

“This is also another hidden racial characteristic of the giant axe warriors – the fervent blood!”

Liang He explained, “Once on the battlefield, it’s almost like being immortal!”

“So

“No one wants to be an enemy of this race.”

Because of the giant axe’s resistance.

The speed of the Great Desolate Army killing the enemy also dropped.
