

# ONE PLANET FOR EVERYONE! BUILDING SCIENCE AND TECHNOLOGY CIVILIZATION AT THE BEGINNING

## *Chapter 6: Final Results!*

### **Chapter 6: Final Results!**

When he awakened, the origin energy was exhausted.

This represented the end of the awakening.

When Jiang Fan left the Awakened Space, he saw that most of the student awakening ceremony was over.

Some were cheering and jumping, very excited. Some of their faces were filled with frustration, and they even wept bitterly. There was also complicated expressions. He did not know if they were happy or sad!

—

All life, the success rate of planet awakening was not 100%.

Plus, some planets that had successfully awakened were too small.

There was almost no development potential. Therefore, only a few people were satisfied with the results.

Extraordinary energy was divided into four levels: low, middle, high, and super.

Low-level energy.

There were: True Qi, Spirit, Perception, Telekinesis, and so on.

Middle energy.

Mainly: Vitality, Combat Aura, Soul Energy, etc.

High energy.

There were mainly: Origin energy, Dragon Qi, Magic Power, Star Power, psionic energy, and so on.

Super energy.

There were mainly: spiritual energy, nuclear energy, void energy, and so on.

The higher the energy level, the rarer it was.

Among all the students who had successfully awakened, the amount of low-level energy converted was the highest.

Intermediate energy was secondary.

High-level energy could be counted on one hand.

And super energy could only depend on luck.

—

At the same time, inside the patrol room, the teachers were doing the final statistics!

The awakening planet was only the first step.

The key was to give birth to life on the planet. The first step of many people went smoothly. However, the problem was step 2.

“Number 1 awakened successfully, the final diameter of the planet is 11 km.”

“Number 2 awakened successfully, the final diameter of the planet is 12.6 km.”

“Number 3 failed to awaken.”

“Number 4 failed to awaken.”

.....

“Number 38 awakened successfully, the final diameter of the planet is 23 kilometers.”

.....

The final results of the students were read out.

Including those who had awakened successfully and those who had not. The school leader and the teachers at the side looked satisfied.

The headmaster nodded slightly and said, "This time, the students' results are not bad. More than half of the students have successfully awakened a planet. Especially Tang Qingqing and Xiang Junhao. The diameter of their awakened planets are more than 25 kilometers."

"Although they couldn't compare to the top students of a secondary school, two top geniuses appeared at once. This result... we can also be ranked," vice principal chimed in.

The others nodded in agreement.

According to the general rules.

Those with a diameter of more than 20 kilometers could be called geniuses.

Those over 25 kilometers were considered top geniuses.

The probability of producing high-level energy was very high.

Those over 30 kilometers were super geniuses.

The transformation of high-level energy was almost certain.

If nothing unexpected happened, they could successfully build a high-level civilization.

There was a high probability that they could convert origin energy into super energy.

And over 35 kilometers... it was called a monster!

The probability of producing super energy was very high.

Forget about River City, even Dongyang Province where River City was located, there were very few!

An unknown school like River City 7th Middle School, two top geniuses appeared.

It was already the best result for the past five years.

It was enough to make every leader happy.

“Number 81 awakened successfully, the final planet diameter... 35.2 Kilometers?!”

At this moment, the teacher’s voice suddenly became sharp.

The patrol room suddenly fell silent.

All of them looked at the teacher strangely.

*35.2 Kilometers?!*

*This... How is that possible?*

One had to know.

The female student who had a shocking talent in the previous middle school only awakened a planet with a diameter of 33 kilometers.

This also broke the historical record of River City.

More than 35 kilometers. However, that was considered a monster.

“Are you sure... Are you sure?”

The principal stared at the teacher who announced the results and his tone suddenly became nervous.

“Headmaster, see for yourself.”

The teacher who announced the results pointed at the screen in front of him.

On the big screen, Jiang Fan’s awakening result was very large.

There was no doubt.

One by one, the school leaders and teachers thought. They all felt that it was inconceivable and absurd.

They weren't a first-rate school. There was actually a genius student who broke the record.

"It really is 35.2!"

"Really is! Our school actually produced a genius with a diameter of more than 35 kilometers?!"

"Which class is this Jiang Fan from? He's hiding something."

"It seems to be Class 2. Class 2's results are pretty good."

—

Listening to everyone's discussion.

The principal waved his hand and said in a loud and clear voice, "Let's not talk about it for now. Quickly announce the final results."

"The principal is right, I'll do it now." A vice-principal personally ran to take charge.

They had been silent for so many years.

It wasn't easy to produce such a shocking result.

Naturally, they had to publicize it!
