

One Planet 8

Chapter 8: Reward! The school's goodwill!

Jiang Fan pushed the door open and entered. He could see it at a glance.

Sitting behind the desk, a man around 50 years of age with a rather dignified appearance.

It was the headmaster of River City Seventh Middle School—Tong Zhensheng!

A level 4 planet lord with extraordinary strength.

At this moment, Tong Zhensheng's voice was no longer as dignified as before.

He put on a friendly smile. He stood up and said amiably, "Student Jiang Fan is here. Come, sit on the sofa over there."

"Principal Zheng." Jiang Fan had lived two lives.

He was not restrained. He sat down next to the sofa.

Seeing Jiang Fan's calm expression, Tong Zhensheng nodded inwardly.

He was neither arrogant nor impatient. No wonder he could suddenly charge out and become a dark horse.

"Jiang Fan." Tong Zhensheng looked at Jiang Fan and said, "First of all, congratulations on taking the first place in our school's awakening. It is also a new record for River City."

"Thank you." For these, Jiang Fan did not mind.

Tong Zhensheng was not a formalistic leader. After a short exchange of greetings, he went straight to the point.

"According to the rules of our school, since your awakening result is first," Tong Zhensheng smiled and said, "We will give you 500,000 federal dollars."

"500,000?" Jiang Fan's eyes narrowed.

What was his identity? He had been an orphan since he was young. He had grown up with the help of the Federation.

500,000. For Jiang Fan, naturally, it was a huge sum of money. And, his planet was different from other people who had successfully awakened.

Jiang Fan had created a natural and ecological planet.

Theoretically, he did not need too many resources.

As long as he had enough origin energy, which was very expensive, he would be good. An official price of 1 million federal dollars was needed to buy origin energy.

With Jiang Fan's wealth, he couldn't afford it!

“Plus your results this time, you’ve broken River City’s historical record, so...”
Tong Zhensheng continued, “The school has decided to give an additional 500,000.”

Taken together, a million in total.

It was just enough for a portion of origin energy.

“That...” Thinking of this, Jiang Fan looked at Tong Zhensheng and said, “These rewards, can you... I want to exchange it for origin energy.”

Although the price of origin energy was one million, that was the official price.

If he was to buy it himself, since he had no connections or channels, that was not the fixed price.

Since there was a chance, Jiang Fan was not polite.

“En?” Tong Zhensheng did not care about these details. Instead, he looked at Jiang Fan in confusion and asked, “Do you want to trade it to origin energy? You don’t consider using this money to buy other planet resources first?”

As usual, since his planet had just awakened, he had to cultivate more life first.

All kinds of resources were needed to cultivate life. For example, buying extraordinary life plants and animals. Those were needed on the planet as the food for intelligent life. These required a large amount of money.

“Let’s trade it to origin energy first. The energy on my planet is a bit special,”
Jiang Fan smiled and said.

“Sure, I just happen to have a portion of origin energy, so I’ll give it to you as a reward.” Tong Zhensheng stood up.

From the drawer of the desk, he took out a packaging box.

Inside the box, it was a transparent crystal ball. There was origin energy.

Tong Zhensheng understood Jiang Fan’s thoughts. However, he did not care. Instead, there was even more appreciation.

To become a powerful planet lord, it was better to have thicker skin.

Jiang Fan took it. He didn’t immediately open it. Of course, he still had this bit of trust.

“That’s right, Jiang Fan, can you tell me, what is the initial energy of your awakening?” Tong Zhensheng looked at Jiang Fan. He asked the question he was concerned about.

The size of an awakened planet. It was just an appearance.

Most importantly... was the level of the initial energy.

Only at high levels would it be possible to create a high-level civilization.

Planets with a diameter of more than 30 kilometers were usually advanced civilizations, even a super civilization was possible.

Jiang Fan's planet was 35.2 kilometers in diameter. The probability was much higher.

"The energy I awakened is somewhat special." Jiang Fan vaguely reminded.

"Could it be super energy? Or was it the rarer one? Void energy?" Tong Zhenheng immediately guessed.

There was a hint of anticipation in his eyes.

In the super energy, spiritual energy was the most common. The rest were similar to the Void Energy. It was relatively rare.

Throughout the history of the Seventh Middle School, a student who awakened a super energy had never appeared before.

Now there was Jiang Fan. Naturally, Tong Zhenheng was looking forward to it.
