

## Chapter 114

Three Years Later

Star

This is the life, lying in the sun with one of my best friends, while our toddlers play in the pool with our gorgeous mates. Much has changed in the last three years.

Aiden and Jess have done wonders with the Spirit Moon Pack. The people are thriving, and they have invested their money exceptionally well. The park is now the proud owner of seven hotels, dotted around the Greek islands, all managed and staffed by members of the pack. The hotels have been such a hit, because they have an old Greek feel to them. Yes, they have all of the modern quirks, but at the heart is the traditions of old, Family, great food and, of course, Ouzo.

The triplets and I finally made the decision three months ago, to completely hand the pack over to them, and last night we held the Alpha and Luna ceremony. This is their pack, not ours. It will always be a part of me, but it will never be home.

The sound of giggling draws my eye and I gently stroke my growing bump, as I watch my mate throw our two-year-old, triplet daughters, Arabella, Ayla and Aurelia, around in the water.

Jess chuckles, "how many do you think you have in there this time? four or five." I grin at her; Doc Phillips has promised me that there is only one this time." I look at her huge stomach, "it looks like you have at least three in there, you are bigger than I was with the triplets."No,no,no, it is defiantly only one."

Jess and Aiden also have a son who is about four months older than my girls. I love that they are all growing up at the same time.

"Mummy Archer won't let me play with Starlight, he said she is his and I will have to find a girl of my own. Tell him he has to share."

My gorgeous Asher runs into my arms, and I turned to look at his older brother. Before I could say anything, Starlight points at Archer, "Don't be greedy Archer, I can love you both. Aunty Star has three loves, so I can have two."

Jess and I looked at each other, Well that would be interesting.

Authors note

Thank you all so much for reading my story, I hope you have enjoyed being part of Star's life. my next book will follow the adventures of Starlight, Archer and Asher. I will be starting to upload by the end of June, so keep a look out, but here is a sneak peek.

The Alphas and the elemental

This is the second book in the Hidden Elementals series.

18 years have passed since Star and her triplet Alphas defeated the evil Miller brothers and reclaimed Thalia's pack, Now Star and her Alphas pass the torch to their children.

Future Alpha twins, Archer and Asher, can't wait to turn 18. Not only will they finally be able to shift into their wolves and come into their elemental powers, but they will also be able to sense their mate.

The twins, while looking identical, have completely different personalities. While Archer sees no reason to wait for their mate, he spends his time bedding as many she-wolves as he can. Asher, on the other hand, has kept himself pure, saving everything for their mate.

The thing that they both agree on, even if they don't know it, is their love for their family friend Starlight.

Starlight has lived in the Spirit Moon pack on Paxos Island in Greece since she was a tiny pup. Her mother had been kidnapped and raped by the Miller brothers, and saved by her aunt Star, whom she is named after.

Aunt Star had made her daddy Aiden and her mummy Jessica the Alpha and Luna of the ancient pack, allowing them a completely fresh start, but the families visit each other regularly.

Starlight has loved Archer and Asher her whole life, and finding out they are mated makes her so happy, but her heart is broken when she sees Archer kissing a she-wolf.

Can Archer regain her trust? Or will he lose his title as Alpha? and how will they deal with the mysteries that are still hidden in the Spirit Moon?
