

## Overlord 1731

### Chapter 1731: Primal Chaos World

The appearance of the primal chaos world was an extremely rare spatial phenomenon. It was rumored that if one could enter one such world, one would obtain a shocking opportunity. Primal divine stones and many other divine materials could also be found within the primal chaos world. One could even absorb the world's primal chaos energy to rapidly increase one's strength.

Every single time, a primal chaos world would appear at a different location. This time, one appeared on the battlefield, causing everyone on the battlefield to be wild with joy.

"A primal chaos world has appeared! It must be here to help me enter the Nine Revolutions Realm! This is excellent!" Mao Gangqiang roared in excitement as he abandoned all his companions and started flying toward the primal chaos world.

"I need to enter the primal chaos world! I want more strength!" a different alien roared and streaked toward the primal chaos world as well.

"Young Master, the primal chaos world has appeared. Stop wasting time on these aliens. You need to go there immediately. If you manage to get in, you will be able to grow rapidly!" urged the ninth-stage God beside Qin Jiu.

Qin Jiu's eyes lit up as he dashed toward the primal chaos world without saying anything.

"Young Master, go now! This is an extremely rare opportunity. You can't miss it!" advised the expert beside Gongsun Sanyang.

In fact, that advice was not required—Gongsun Sanyang was already moving toward the primal chaos world.

"The fortuitous encounter in the primal chaos world will be mine!" said Gongsun Sanyang as his eyes burned with excitement.

"Haha, looks like this fairy is truly favored by the heavens. Primal chaos world, here I come!" Ji Feixian howled with laughter before transforming into a dragon. She flew toward the primal chaos world.

Mo Du, Shi Gong, Zhong Ding, and the other powerful young Gods also rushed toward the primal chaos world. The primal chaos world would only appear for a short while. If they did not act immediately, they might miss the opportunity. There was no guarantee that such an opportunity would come to them twice.

With that, the battle between the aliens and humans stopped. Individuals of all levels of cultivation aimed to enter the primal chaos world to search for their own fortuitous encounter.

On a different side of the battlefield, Xiang Shaoyun and company had detected the primal chaos world as well. Xiang Shaoyun was the first to react because the primal chaos energy felt extremely intimate to him, as though he had encountered a power that originated from the same place as him. He could feel a clear call for him from the primal chaos world.

"The primal chaos world has appeared. Palace lady, do not miss out on this chance! Go, now!" advised the ninth-stage Guangling Palace God beside Ling Ziruo.

"Young Master Xiang, we need to go immediately! We can't miss out on an opportunity like this!" Ling Ziruo did not forget Xiang Shaoyun.

"Alright. Let's go together," said Xiang Shaoyun as he let Purple Lightning Marquis steer the warship as they quickly rushed over.

"Overlord, ignore us! You should move at your top speed! The primal chaos world will only appear for a short while. If you miss it, you won't be able to encounter it," said Purple Lightning Marquis.

He knew very well how strong Xiang Shaoyun was. If Xiang Shaoyun moved alone, he would be able to reach it much faster than when he was moving with everyone else. He was worried that Xiang Shaoyun would miss out on such a good opportunity.

"Yes, overlord. Go! So long as you become strong, all of us will have a bright future as well!" said Scarlet Flame Monarch.

"Go, Yun'er!" said Xiang Yangzhan.

Surprisingly, Xiang Shaoyun said, "You don't need to keep urging me. I know what to do. Purple Lightning, move the warship as fast as you can."

Xiang Shaoyun also knew how rare the primal chaos world was, but he also felt an indescribable connection to the primal chaos world. The energy within his astral cosmos sea had been surging ever since the primal chaos world had appeared. With his astral cosmos sea, he could constantly sense the actual direction of the primal chaos world. In any case, entering the primal chaos world wouldn't be an easy feat for the others anyway.

That was why he was still relatively calm. The primal chaos world was a space filled with the power of primal chaos. The five-colored radiance filled the boundless space with a dazzling radiance as strand after strand of primal chaos energy spread out in all directions, attracting all life forms in the area.

Apart from the aliens and humans in the midst of a battle, some other rare space life forms were also rushing toward the primal chaos world. Mao Gangqiang and about a dozen aliens were the first ones to arrive before the primal chaos world. They charged forth unhesitatingly, but an indescribable power appeared and repelled all of them.

"Primal chaos wall!" Mao Gangqiang cried out in alarm.

Layer upon layer of protective barriers had formed around the primal chaos world. The barriers were the primal chaos world's innate defensive power, and they worked to prevent any random person or energy from entering and damaging the primal chaos world.

Without the barriers, the primal chaos world would be far too fragile. The primal chaos wall was incredibly thick. Its defensive prowess was evident from the fact that Mao Gangqiang and the others couldn't even charge through it.

However, the wall was still not enough to actually stop them. They mustered all their strength and started attacking the wall, trying to get inside as quickly as possible. Qin Jiu, Gongsun Sanyang, Ji Feixian, and the other human Gods also encountered the same issue. They all started attacking the wall, trying to break into the primal chaos world.

Using all sorts of powerful weapons, they were finally able to start creating an opening in the wall. However, they were unsure if they would be able to create a proper path through the wall in time. They were all afraid that the primal chaos world would disappear before they could get through.

One after another, the Gods went inside the thick wall as they continued digging a way through. They were mostly stuck at the wall's outer layer. They would probably require more time before they could break through.

Other individuals also tried to take the paths made by these top-tier Gods, but the openings in the wall closed not long after the young Gods created them. No one was given the chance to take advantage of someone else's hard work.

"Damn it! Why did this happen! Don't tell me the primal chaos world is actually sentient? Open already!"

"Damn it! I need to enter! Break!"

"It's too hard. Only top-tier Gods can break through this wall. Am I going to watch on as I miss the chance to enter the primal chaos world?! I can't accept this!"

"Let's work together and attack a single spot. There must be a way for us to get through!"

...

The other individuals who had arrived were also unwilling to be stuck outside the wall. Everyone started madly attacking the primal chaos wall. The two parties of the war were now focused on attacking the primal chaos wall, but unfortunately, the new event had nothing to do with the Saints. With so many Gods bombarding the wall with attacks, any Saint who dared to approach would most likely be killed by some stray attack.

It was at this time that Xiang Shaoyun and company arrived.

## Chapter 1732: The Petty Man

The moment Xiang Shaoyun and company arrived, Ling Ziruo and Song Tiandao started attacking the primal chaos wall. Unfortunately, the wall was too tough. No matter how they attacked, they couldn't break through completely.

"This primal chaos wall is very tough. Young Master Xiang, let's work together," suggested Ling Ziruo.

Xiang Shaoyun shook his head. "You won't be able to get through this way."

"What should we do, then?" Song Tiandao hurriedly asked.

Instead of replying, Xiang Shaoyun looked at an inconspicuous spot. There, a cultivator shining with five colors was slowly blending into the wall. Before long, that cultivator vanished before everyone's eyes.

That cultivator was none other than Dugu Qiubai of the True Martial Academy. With his innate Primal Chaos Physique, the primal chaos world was basically his own home. In other words, apart from the few cultivators with terrifying levels of strength, only those with the Primal Chaos Physique could enter the primal chaos world.

Xiang Shaoyun did not have the Primal Chaos Physique, but his physique possessed all the characteristics of the Primal Chaos Physique. Thus, he could get through the primal chaos wall easily. He was only hesitant as to whether he should bring Ling Ziruo and Song Tiandao with him.

"Are Primal Chaos Physique owners the only ones who can benefit from the primal chaos world?" asked Ling Ziruo with indignation.

"I believe Xiang Shaoyun will have a way for everyone to get inside," said Song Tiandao as he looked at Xiang Shaoyun with hopeful eyes.

"Pick 10 people each and come on my warship. I'll take you in," said Xiang Shaoyun after some hesitation.

No matter how generous he was, this was the most that he could do. After all, they were only allies. Their friendship wasn't even that deep.

"Can't we bring more people? After all, you are bringing all your people with you," said Ling Ziruo. She realized that Xiang Shaoyun had a way to bring others in, but a quota of 10 people was too little for her. Thus, she requested for more of her people to follow along.

After all, this was an extremely rare encounter. If the Guangling Palace could send more people inside, they might be able to gain an additional batch of powerful experts. That way, the strength of their group as a whole would increase as well.

On the other hand, Song Tiandao's reaction was much more straightforward. He merely gratefully said, "Thank you, Xiang Shaoyun."

He then started calling out names, gathering the strongest and the most talented people on his side. Those he called were all trusted full members of the Song Clan. He naturally had to share the opportunity with them.

Xiang Shaoyun deactivated the formation on his warship, allowing Song Tiandao and his people to get on his ship. He then looked at Ling Ziruo and said, "Lady Ling, I can't take more than 10. If you continue waiting, I will have to go without you."

"Petty man!" grumbled Ling Ziruo as she stomped on the ground. She hurriedly gathered 10 people and boarded Xiang Shaoyun's warship.

As for the others, they could only watch on helplessly.

"Miss Yue Xi, come on over as well," offered Xiang Shaoyun after some hesitation upon seeing that Yue Xi wasn't part of the 10 people brought by Ling Ziruo.

In the past, Xiang Shaoyun had helped Yue Xi because of Dong Ziwan. Thus, he couldn't bring himself to let her wait outside while the others entered the primal chaos world.

Yue Xi was overjoyed as she said, "Thank you, Young Master Xiang."

Yue Xi was no less talented than anyone present. She only lacked time. She had thought that she would miss out on this big opportunity, but the opportunity had surprisingly returned to her.

After allowing Yue Xi to get on his ship, Xiang Shaoyun started controlling the ship with his God Realm energy. He said to the people on Ling Ziruo's and Song Tiandao's ships, "You better take the chance to absorb the primal chaos energy here while the primal chaos world is still around. That will help increase your cultivation. If you miss out on this, you won't get a second chance."

Then, he utilized the profundity of primal chaos, sending strands of primal chaos energy wrapping around his warship. He then steered the ship toward the primal chaos wall. The other people in the area cried out in alarm.

"That's primal chaos energy! How can he release that energy? Does he have the Primal Chaos Physique?"

"Idiot. He long fused nine different energies to form the strongest physique higher tiered than the Primal Chaos Physique. It is not surprising that he can utilize the primal chaos power."

"Does he think that he can enter so easily? I doubt it's so simple."

"That's right. Even our leader had struggled greatly to enter, yet he's here dreaming of bringing so many people with him. He's simply courting death."

...

Meanwhile, Xiang Shaoyun turned a deaf ear to all their words. He had wrapped the primal chaos energy all around his ship and was currently clashing against the primal chaos wall with his energy cocoon. The people on the ship waited nervously, worried that the wall would repel them.

However, Xiang Shaoyun showed no fear. He was very clear that the primal chaos wall was formed with the profundity of primal chaos. He had the same power, so he would not be repelled.

Sure enough, the warship started phasing through the layers that made up the primal chaos wall. There were 33 layers to the wall in total, and each layer was extremely powerful thanks to the primal chaos origin energy powering the wall. It was almost impossible for the others to break through all 33 layers of the wall.

Nevertheless, a cultivator would still benefit from breaking through the layers. The more layers one went through, the more one would benefit because more primal chaos origin energy would be available for absorption. Because primal chaos energy could be transformed into all living things and all energies, it was the perfect energy for a God to absorb.

Mao Gangqiang and about a dozen ninth-stage alien Gods had reached the ninth layer. They had absorbed a large amount of primal chaos energy. Unfortunately, they were still not satisfied with what they had absorbed so far. If they wanted to reach the Nine Revolutions Realm, they needed to go deeper and absorb more energy.

As for Qin Jiu, Gongsun Sanyang and the other humans, they were also trying their best to advance. They had just reached the eighth layer. In the process of advancing through the layers, both Qin Jiu and Gongsun Sanyang started revealing their trump cards.

Qin Jiu had a five-colored fan in his hand. Lights of green, red, brown, blue, and gold constantly swirled around it. This was the Primal Chaos Fan, a fan made from some primal divine stone and the feathers of five top-tier birds. The fan was a divine weapon Venerable Yuan Shi had given Qin Hongyan in the past. For Qin Hongyan to have handed the fan to Qin Jiu, one could only imagine how much hope Qin Hongyan had for Qin Jiu.

As for Gongsun Sanyang, he also had a primal chaos item at hand. Instead of a weapon, it was a cloak, which was also made by Venerable Yuan Shi. It had an impressive defensive prowess that could withstand even the attacks of regular Nine Revolutions Realm experts.

After taking out the two divine objects, the two were able to advance at a much faster speed than before.

#### Chapter 1733: Primal Chaos Wall

Apart from Qin Jiu and Gongsun Sanyang, Ji Feixian and Mo Du had also taken out some primal chaos objects to go deeper into the wall. The aliens weren't fools either. The god-grade objects they had were comparable with what the humans had. Some even took out primal divine stones to increase the speed at which they broke through the wall.

The many top-tier Gods started breaking through the wall as quickly as possible. None of them wanted to miss out on an opportunity like this. Outside the primal chaos world, those incapable of breaking into the wall were fated to be disappointed. The primal chaos world noiselessly vanished back into the void, leaving no traces behind.

The ones stuck outside felt their hearts ache. They all knew that this was an opportunity that would probably only come once in a lifetime. However, they wouldn't leave yet, as the two parties still had a war to fight.

Once again, a massive battle erupted, and experts from both sides perished. Although the aliens had fewer numbers, their combat strength was extremely impressive. One of them was strong enough to face two humans. Thus, they were able to fight the human army to a standstill.

The humans were, unfortunately, not united. They were split into many small groups, giving the aliens the opportunity to defeat these small groups one by one.

Meanwhile, Xiang Shaoyun was bringing the people on his warship through the primal chaos wall. He had thought that he could easily bring them all in, but he was mistaken.

When he reached the 10th layer, a large number of the Saints on his ship could not withstand the suppression of the primal chaos power. If they continued deeper, they would probably be crushed to death by the pressure.

Thus, Xiang Shaoyun had no choice but to leave them there and have them cultivate at the tenth layer. He would proceed with the others instead. The deeper they went, the stronger the primal chaos power and the less they could withstand.

"The primal chaos energy here is too pure and powerful. A person can just pick random spots to cultivate at for a bit, and they'll gain massive benefits," said Ling Ziruo with joy.

"Yeah. Without enough strength, you won't even be able to withstand the power here," said Song Tiandao.

Xiang Shaoyun continued to leave people at different layers as he advanced. At the 15th layer, a majority of the people had left the warship, leaving only the powerful Gods behind.

Even Xiang Shaoyun started to feel the pressure from keeping his profundity of primal chaos active for so long. After all, he was in charge of protecting the entire warship. If he withdrew his power, this would probably be where everyone else stopped advancing.

"Let me know if the pressure is too much for you," said Xiang Shaoyun to the others.

At the 20th layer, Scarlet Flame Monarch, Devouring Ghost, and Green Ghost couldn't take it anymore, and they were forced to stay there and cultivate. At the 25th layer, the three freaks and some fourth-stage and fifth-stage Gods couldn't withstand the pressure anymore.

Song Tiandao and Devil Concubine hung on with great difficulty, but that lasted until the 27th layer. They stayed there to cultivate. That wasn't surprising, as the two's cultivation levels were still comparatively low.

Xiang Yangzhan and Purple Lightning Marquis stopped at the 29th layer. At the 30th layer, Ling Ziruo and some other top-tier Gods were forced to stop as well. That left Xiang Shaoyun alone to continue advancing. He put away the warship and shrouded his body in a layer of primal chaos energy. Step by step, he approached the 31st layer.

The primal chaos power there was surging, as though he was walking in a five-colored cloud. His surroundings were dazzling, and as the profundity of primal chaos swirled around him, he felt an indescribable sensation. It was as though countless things were being created all around him. At the same time, destruction was happening all around him. The two powers, creation and destruction, continued to crisscross and create a magical sight.

Xiang Shaoyun had comprehended the profundity of primal chaos, so he was aware that he was looking at the essence of primal chaos. Of course, he still couldn't reach the level of the creation and destruction he was seeing around him because his comprehension was still at a rather low level.

Xiang Shaoyun paid no heed to the others. Neither did he continue advancing through the final two layers. Instead, he sat down cross-legged and started absorbing the primal chaos energy and comprehending the profundity of primal chaos.

He split his focus into two. His main body absorbed as much of the primal chaos energy as possible while his clone focused on comprehension. This allowed him to benefit far more than the others who were also within the wall.

His Desolation mantra was most definitely an incredibly ancient cultivation method. It granted him an impressive energy absorption speed. Primal chaos energy was practically pouring into his astral cosmos sea.

The primal chaos energy lived up to its reputation as one of the rarest powers in existence. The moment the primal chaos energy entered Xiang Shaoyun's astral cosmos sea, his cultivation started soaring.

At the same time, his comprehension of the profundity of primal chaos increased rapidly. The five elements supported and negated each other. The cycle of five elements was also the true meaning of primal chaos. As for how one would make use of the five elements to create and destroy, that would rely on one's comprehension.

He once thought of rebuilding Dong Ziwan's body, and he had gained a new comprehension that gave him a feeling that he might really be able to do it after fully comprehending the profundity of primal chaos.

Xiang Shaoyun did not stay at the 31st layer for long. Soon, he stood up and headed to the 32nd layer. When he left the 31st layer, his astral and devil cultivations had reached late fourth-stage God Realm. His growth had been astonishingly fast.

At the 32nd layer, the profundity of primal chaos was starting to create actual living beings. These living beings consisted of flowers, grasses, birds, and other animals. They only lived for a short period of time, undergoing the entire cycle of life in a matter of seconds.

Xiang Shaoyun sat down cross-legged and started absorbing the primal chaos energy and comprehending the profundity of primal chaos again. The energy in the 32nd layer was much more powerful. Before long, Xiang Shaoyun reached the peak of fourth-stage God Realm.

He was in no rush to break through. He continued accumulating strength and solidifying his foundations. Upon reaching a point of saturation where he could no longer absorb more energy, he allowed himself to break through, easily entering the fifth stage. Once again, his strength soared.

As for his soul, it had also benefited greatly. From witnessing the birth and death of the living beings around him, he witnessed the cycle of life and death. That gave him a vague yet profound comprehension, something that no word could describe.

In short, his comprehension of the profundity of primal chaos had reached a completely new level. Those without the Primal Chaos Physique were basically unable to get farther than the 30th layer. That included Mao Gangqiang and the other powerful aliens. Qin Jiu and Gongsun Sanyang were also stuck.

The 30th layer was their limit. As for Xiang Shaoyun and Dugu Qiubai, who could go beyond the 30th layer, a fortuitous encounter unique to them awaited. However, Dugu Qiubai had gained something different from Xiang Shaoyun because he had comprehended something different from the profundity of primal chaos. Nevertheless, he had also benefited as much as Xiang Shaoyun had from the wall.

## Chapter 1734: Individual Gains

Time passed rapidly. In the blink of an eye, 10 years passed. During the past 10 years, the aliens and humans had clashed many times. The aliens had won more than they had lost, showcasing their incredible combat prowess. As for the humans, they weren't able to stay united and had weaker individual strengths. Thus, despite their number, more and more of them were killed. If this continued, it would only be a matter of time before all of them were killed.

The aliens had even received reinforcements, and a group of even stronger aliens had come. If the reinforced alien army launched an all-out attack against the human army, they would have no difficulty winning.

Fortunately, the humans had also prepared themselves. The Guardians Guild had deployed a group of cultivators from the older generations to stop the aliens' advance. Only then did the young Gods manage to catch a break.

It was at this time that those who had entered the primal chaos world left it. All these people had grown considerably. However, none of them had managed to reach the Nine Revolutions Realm. Even Mao Gangqiang, the strongest among them, was stuck at peak ninth-stage God Realm. However, his strength had truly increased massively compared to before.

That was also the case for all the other aliens—having improved greatly but being unable to enter the Nine Revolutions Realm. After all, entering the Nine Revolutions Realm was too hard. The primal chaos world alone would not be enough to change that fact.

Perhaps if they had actually reached the center of the primal chaos world, they might have been able to enter the Nine Revolutions Realm. Unfortunately, they were all stuck at the 30th layer despite their efforts.

"Haha, after this war, I'll be able to enter the Nine Revolutions Realm by spending 100 years in seclusion," said Mao Gangqiang confidently as he howled with laughter.

"I have also made considerable gains. However, I need to go into seclusion for at least 200 years before I can break through," said a different peak God alien.

The other aliens also appeared excited. Evidently, they were happy with their gains.

"Alright. Let's kill all these humans and enter the dominion," said Mao Gangqiang overbearingly.

Just as they were about to attack the humans, Qin Jiu appeared before them and shouted, "Aliens, do you really think the dominion has nobody that can stop you? I, Qin Jiu, will be seeing what you're capable of!"

With the Primal Chaos Fan in his hand and a divine aura around him, Qin Jiu looked like an extraordinary sovereign. At the ninth-stage Rebirth Realm, he stood above many other Gods. It was no wonder he would have such confidence.

Apart from Qin Jiu, four other peak ninth-stage Gods appeared behind him. They were all Qin Jiu's guards from the Guardians Guild. Gongsun Sanyang, Ji Feixian, and Mo Du also appeared one after another. All of these top-tier young Gods had reached a terrifying height in cultivation. One ought to admit that they had truly benefited greatly from their trip to the primal chaos world.

"How confident. However, I don't even need to do anything against you. Hou Sha, go!" Mao Gangqiang commanded a six-armed monkey beside him.

The six-armed monkey was a young alien God. He was an eighth-stage God prior to entering the primal chaos world and was now at the ninth stage.

"Hehe, bring it on. I have long wanted to experience the strength of the young human Gods. I hope you're not like the humans 10 years ago, only impressive-looking but actually useless," said the six-armed monkey with a sneer.

The monkey was tall and slim, and in his hand was a god-grade staff. As the monkey brandished the staff, he showcased how much strength he had.

"Very well. I'll make sure to give you a miserable death," said Qin Jiu. He knew how important this battle was, and he could not afford to lose it. With a roar, he charged forward.

Nine Lone Heaven Steps!

That was a god-grade technique, an incomparably magical footwork. With one step, he seemed to move in nine different stances, making it almost impossible to grasp his movements.

Qin Jiu appeared beside the monkey with a flicker and swung the Primal Chaos Fan in his hand. Instantly, five birds of different colors manifested and shot toward the monkey. One ought to admit that Qin Jiu was extremely stunning in a fight. The monkey was unable to react before he was sent flying far away.

Qin Jiu pressed on and swung his fan continuously, unleashing numerous primal chaos attacks, flooding the space before him with five colors. The six-armed monkey was a ninth-stage God and came from a warlike race. How could it so easily take a beating?

He immediately reacted and swung his staff madly with his six arms, forming a world of staffs that clashed against Qin Jiu's attacks. The monkey was born with divine strength, so each swing of his staff was incredibly heavy. No ordinary person would be able to withstand his attack.

Only upon the collision did Qin Jiu realize the monkey's monstrous strength. However, he lived up to the reputation of a young guild master candidate. His combat strength was not to be underestimated. Instead of being defeated by the monkey, he was able to match the monkey evenly.

Gongsun Sanyang did not stand around doing nothing either. He gently pushed the two beauties in his embrace away and advanced toward the aliens. "Who among you will face me in battle?"

He naturally wouldn't allow Qin Jiu to bask in the limelight. He had to prove that he was stronger and more qualified to become the young guild master.

"I'll fight you." A young God from an imperial alien clan walked out. He was from the Dark Devourer Clan. He had an odd appearance, but he also had the ability to change his appearance at any time.

The Dark Devourer Clan was one of the supreme devil races. Thus, there was no doubting their strength.

"Good. Come here and die," said Gongsun Sanyang fearlessly. With the Primal Chaos Cloak draped around his shoulders, he unleashed a blazing attack from his halberd.

The dark devourer devil spat out a clump of poisonous, bloody fog, flooding the space before him and creating a clump of devilish energy, which he blasted toward Gongsun Sanyang. At the same time, Ji Feixian, Mo Du, Shi Gong, Zhong Ding, Ling Ziruo, and the other young Gods stepped out and challenged the devils. They wanted to prove how much they had improved within the last 10 years. They also wished to lower the aliens' morale.

One alien expert after another stepped forth and engaged the humans in an intense battle. As for the strongest ones among them, they held back from attacking because they wanted to see which side had the stronger members of the younger generation.

## Chapter 1735: Seeing Dugu Qiubai Again

Beyond the 33rd layer of the primal chaos wall was a lively world. It was an ancient realm with mountain ranges, trees, and animals. It was basically a planet with life. Additionally, everything in that world was extremely ancient, such as the ancient stones, towering trees, and massive animals. It all showcased how unique the primal chaos world was.

After 10 years, Xiang Shaoyun had finally gotten through the 33rd layer of the wall and entered this world. He was immediately shocked by what he saw. A vicious beast he had never seen before jumped him, stabbing at him with its sharp beak. Its ruthless eyes looked at Xiang Shaoyun as if he were a bug. As far as the beast was concerned, Xiang Shaoyun was nothing.

In truth, Xiang Shaoyun was pitifully small compared to the beast. However, he naturally wouldn't be pecked to death so easily. As the beast descended upon him, he grabbed at its beak, sending a dragon claw raking forth to catch it. He then slammed the beast into the ground.

Boom!

The ground cracked, and a massive cloud of dust was created. A tongue of flame sprouted out of Xiang Shaoyun's palm, instantly turning the beast into roasted meat. He attacked so fast it could render anyone speechless.

"Let me try and see if the meat here tastes good," muttered Xiang Shaoyun. He sat down cross-legged and started trying the beast meat he had just roasted.

After several mouthfuls, he started to wolf down the food. It seemed like the meat was incredible. When he had his fill, he found that he was surrounded by some weak life forms. All of them were staring at him longingly. Evidently, they were begging for food.

"Come and eat," said Xiang Shaoyun as he beckoned to them.

Then, he left the adorable animals behind and walked away. He could sense that this world contained a lot of saint-grade and god-grade herbs. This place was most definitely a treasure vault.

As he wandered the world, he encountered many powerful life forms, including some God Realm life forms. These life forms seemed rather intelligent as well. There were a few times where Xiang Shaoyun nearly fell for their tricks.

If it were any other ordinary God here, the God would have already perished. As Xiang Shaoyun wandered the world, he had reaped a bountiful harvest. Numerous saint-grade and god-grade herbs could be easily found, to the point he was already numb as compared to his initial joy when finding these herbs.

Additionally, he had also found a land containing a god-grade vein. The pure god crystals filled over 100 mountains with energy. Countless ancient trees dotted the land, and numerous powerful life forms lived there. Not even Xiang Shaoyun had the courage to go in and harvest the vein.

"This is a paradise," lamented Xiang Shaoyun.

He could feel that the life forms here were original life forms. In other words, they were all first-generation creations of the primal chaos world. They were at the strongest state of their species, and countless civilizations flourished. This was a world that belonged only to them.

One day, Xiang Shaoyun discovered a small god-grade vein. Over 10 powerful God Realm life forms resided there. After he drove them away, he occupied the area. Just as he was digging for the vein, he discovered some ancient characters left on the mountain by some ancient humans.

"The True Sovereign was here."

"Yuan Shi entered this place by accident and found the trail of the True Sovereign."

"Baili Xiongshi was here."

The three sentences stunned Xiang Shaoyun.

He had not imagined that some other humans had been in here as well. Moreover, there were three of them. True Sovereign was a name Xiang Shaoyun couldn't know better. He was the primogenitor of human cultivation, a figure senior to even Venerable Yuan Shi. However, he had long vanished, leaving no trace behind. People of the dominion believed that he still existed somewhere in the boundless universe.

As for Venerable Yuan Shi, he was also a legend. He had founded the Guardians Guild, stopped the alien invasion, and suppressed the devils, becoming the dominion's great guardian god. As for Baili Xiongshi, this was not a name recorded in history. Thus, Xiang Shaoyun had no idea who he was.

"Looks like this primal chaos world has existed for many, many years. Even those ancient individuals were here before. It is no wonder there are so many terrifying life forms here," exclaimed Xiang Shaoyun in admiration.

Just as Xiang Shaoyun considered leaving his name behind as well, he sensed the aura of a human. When he turned around, he saw someone approaching him with peculiar footwork. A human apart from Xiang Shaoyun that could also enter the primal chaos world would be none other than Dugu Qiubai. Clad in a dull martial outfit, Dugu Qiubai walked without any emotions, as though he wasn't surprised to see Xiang Shaoyun.

"You're indeed here," said Dugu Qiubai calmly.

"Yeah, I have been here for a while. But I saw you enter before me," said Xiang Shaoyun with a nod.

"Yes. After entering the primal chaos world, I came in here immediately," said Dugu Qiubai seriously.

Xiang Shaoyun was shocked, but he kept a calm appearance as he said, "You must have reaped the most rewards from this world, then."

That was true. Dugu Qiubai had reached ninth-stage Rebirth Realm. With his Primal Chaos Physique, he was strong enough to defeat anyone below the Nine Revolutions Realm. Xiang Shaoyun had to admire that Dugu Qiubai was truly a fortuitous person.

Xiang Shaoyun did not have the Primal Chaos Physique. Instead, he had the Primal Inception Physique. Although he had benefited considerably from the primal chaos world, he had only reached seventh-stage Rebirth Realm, two stages away from the ninth stage. However, if Dugu Qiubai wanted to challenge him, he still did not think that he would lose.

"I'm here to ask for your help in getting one object," said Dugu Qiubai.

"Is there actually something that you can't get yourself right now?" asked Xiang Shaoyun in astonishment.

"Divine primal chaos lotus," said Dugu Qiubai.

Xiang Shaoyun was stunned. The divine primal chaos lotus was rumored to be the earliest object formed by the power of primal chaos. It was the oldest and most magical object. Anyone who managed to get it would be able to enter the Nine Revolutions Realm immediately. Perhaps even the Reincarnation Realm would be within reach.

Additionally, a place where the divine primal chaos lotus grew would naturally have a previous divine primal chaos spring nearby. After all, only a divine spring like that could nourish the growth of something like the divine primal chaos lotus. Numerous other primal chaos objects would also exist near it, and each would be a priceless treasure.

#### Chapter 1736: Divine Primal Chaos Lotus

Xiang Shaoyun could not refuse Dugu Qiubai's request. Even if it was extremely dangerous, that was still not a request he could refuse. He followed Dugu Qiubai and soon reached the center of the primal chaos world. The primal chaos energy there was dense, and the place was inhabited by a celestial primal chaos dragon. Xiang Shaoyun and Dugu Qiubai traveled cautiously due to the terrifying dragon, afraid that they would provoke the beast.

The celestial primal chaos dragon was the true tyrant of the primal chaos world. It was dreadfully strong and was most definitely in the Nine Revolutions Realm. Apart from that, many other primal chaos life forms also resided there. They were all terrifying, and every now and then, they would clash among themselves in terrifying battles. However, their surroundings would be automatically restored after each battle. The power of the world was automatically restoring the landscape.

Upon witnessing all that, Xiang Shaoyun's comprehension of the power of primal chaos became even deeper. It was only a matter of time before he obtained the ability to replicate the primal chaos world, granting his astral cosmos sea the same or even stronger ability. One could say that for both Xiang Shaoyun and Dugu Qiubai, each additional day spent in the primal chaos world would benefit them greatly.

However, Dugu Qiubai did not have a world within him like Xiang Shaoyun. Thus, he walked a different path. He walked the path of pure primal chaos, and he had an exceedingly bright future ahead of him.

After traveling in concealment for a while, the two finally arrived at the place with the thickest primal chaos energy. Xiang Shaoyun couldn't help but start absorbing the primal chaos energy around him. He could see that a concentration of primal chaos energy had formed a primal chaos lake, a lake with five-colored water. Any God Realm expert would greatly covet such water.

In the middle of the primal chaos lake was the dazzling and beautiful divine primal chaos lotus. It grew alone, and its five petals radiated energy of high purity. Five colors swirled around it, forming a mystical scene of creation and destruction. At the base of the flower was some sort of landing where strands of primal chaos energy hovered. That was the most original primal chaos energy. Each strand could give one an intense sense of comfort.

"This is the divine primal chaos lotus?" Xiang Shaoyun exclaimed.

"Yes. Let's work together to harvest this flower. You can have the lotus, but I want the base," said Dugu Qiubai.

Every part of the divine primal chaos lotus was incomparably precious, while the base was most definitely the most valuable of its parts. If one could meditate on top of it, one's cultivation speed would increase considerably. One might even be able to rapidly obtain full mastery over the profundity of primal chaos. One ought to admit that Dugu Qiubai had keen judgment. He knew clearly what he wanted, and he wanted the best part of the lotus.

Xiang Shaoyun smiled and said, "Brother Dugu, you have good eyes. But what if I want the base as well?"

If he could obtain the base, he would basically be guaranteed a passage into the Reincarnation Realm in the future. He naturally wouldn't want to miss out on that.

"If you're willing to stay here, I won't mind letting you have the base," said Dugu Qiubai indifferently.

"What do you mean?" Xiang Shaoyun frowned.

"To undergo the nine revolutions and enter the Reincarnation Realm, one has to stay here and absorb the world's power, eventually becoming one with the primal chaos world. Otherwise, one would not be able to complete the nine revolutions no matter how hard one tries. I have decided to stay here until my breakthrough is complete. Perhaps it will take 100 years, or 1,000 years, or an eternity," said Dugu Qiubai.

Xiang Shaoyun raised his brow. "You're really planning to stay here?"

"Hehe, all I ever wanted was to step into the peak of cultivation. This place is suitable for my physique, and I believe that I can become the master of this place in the future. This might be my predestined fate," said Dugu Qiubai.

Xiang Shaoyun looked at Dugu Qiubai, trying to see any emotion from Dugu Qiubai's face. He couldn't imagine someone living all alone here. Had this fellow achieved full inner peace to the point he wouldn't even miss the warmth of the fairer sex? If Dugu Qiubai knew what Xiang Shaoyun was thinking, he would probably faint from pure anger. Here he was, with his noble aspirations, while Xiang Shaoyun was thinking about women.

After thinking about it, Xiang Shaoyun agreed, "Ok. You can have the base. I want the petals. There are no terrifying life forms nearby. Why didn't you harvest it yourself, Brother Dugu?"

"Hehe, the divine primal chaos lotus in itself is the strongest life form in the area. Watch," said Dugu Qiubai with a smile. He then made a grabbing gesture at the lotus, sending an energy hand forward.

Just as the hand was about to reach the lotus, a burst of primal chaos energy erupted from the flower and swatted the energy hand away. Xiang Shaoyun blanked out, finally understanding what Dugu Qiubai meant.

"Don't tell me this lotus is as strong as someone in the Nine Revolutions Realm," said Xiang Shaoyun, somewhat speechless.

Dugu Qiubai was at ninth-stage God Realm, and he even had the Primal Chaos Physique. If even he couldn't take down the lotus, one could only imagine how powerful the lotus was.

"Yes. It is as powerful as someone in the Nine Revolutions Realm. I'll deal with the lotus. Pay attention and watch for a chance to cut its stem. Doing so will weaken it. At that time, this lotus will be ours," said Dugu Qiubai as he started walking on the water toward the lotus.

It was at that moment that a human figure manifested before the lotus. The figure looked exactly like Dugu Qiubai, but its body shone with a five-colored light. It radiated a dazzling sense of beauty, and with a smile, it said, "You're here again? Do you really think I won't kill you?"

"If you agree to follow me, I will stop bothering you," said Dugu Qiubai.

"A loser like you dare to speak such conceited nonsense? I shall kill you and use your body to make me the true master of this place," said the lotus before attacking.

The lotus was truly powerful. A mere casual attack shook Xiang Shaoyun to his core. As the lotus pushed its primal chaos power to its limit, the world itself started withering. The many life forms around the lake were affected as well. All of them started fleeing everywhere in fear.

"This is the concept of destruction, formed by two opposing powers," exclaimed Xiang Shaoyun in shock.

He was finally experiencing how terrifying the purest profundity of primal chaos was.

#### Chapter 1737: Versus the Divine Primal Chaos Lotus

The divine primal chaos lotus was truly powerful. Its every casual move was accompanied by the profundity of primal chaos pushed to its limits. Xiang Shaoyun knew that he was definitely weaker than the lotus. Perhaps that was the advantage the lotus had gained by living in the primal chaos world for so long.

He would probably not be the lotus's match if he was the one to face the lotus in a fight, even if he used his soul clone. His soul clone had reached ninth-stage God Realm, and his comprehension of the profundity of primal chaos was rather deep. Unfortunately, he was still rather lacking compared with the lotus.

Dugu Qiubai displayed his incredible combat strength, releasing powerful primal chaos energy and numerous primal chaos punches to suppress the lotus's attacks. However, his control over primal chaos power was incomparable to the lotus's. The gap in their power levels caused him to be beaten back again and again.

However, the lotus did not give chase. Each time Dugu Qiubai went a certain distance away from it, the lotus would stop chasing. It was obvious that something was stopping the manifested figure from going too far away from the lotus.

That was why Dugu Qiubai had looked for Xiang Shaoyun, hoping that Xiang Shaoyun would be able to help him defeat the lotus. Xiang Shaoyun utilized his Invisible Nether, but the moment he

stepped into the lake, he sensed a gust of power rush toward him, forcing him to defend himself. Even so, he was still sent flying away.

"Don't think that you can stand against me just because you managed to find yourself a helper," said the lotus with a sneer.

Xiang Shaoyun was somewhat at a loss. He had not expected his invisibility to fail.

"Since I can't hide, I'll just fight it out," muttered Xiang Shaoyun as he charged toward the lotus.

It was at that moment that the lotus formed another clone that looked exactly like Xiang Shaoyun. The figure then engaged Xiang Shaoyun.

"This is my turf. You won't be able to defeat me no matter how many of you there are," declared the divine primal chaos lotus smugly.

Dugu Qiubai transmitted to Xiang Shaoyun, "If you can't hang on, just leave the lake. It can't leave the lake."

"We'll see. I feel like this clone is kind of weak," said Xiang Shaoyun, charging the lotus clone.

Three Lives Fist!

The Three Lives Fist was powered by the profundity of primal chaos and was accompanied by a thick battle intent. Its strength reached the level of a peak ninth-stage God. It left long cracks in the air along its path as it shot toward the lotus clone.

"Destroy!" said the lotus clone. With a flick of its finger, the power of destruction bloomed and attempted to destroy the incoming punch.

The two attacks collided, instantly creating a massive rumble. Drops of the multicolored lakewater splashed all around the lake, creating a scene akin to a mesmerizing rain of stars.

Fortunately, the primal chaos world was a unique place. The collision between Gods did much less damage to this world than any other place. Otherwise, the entire place would have been destroyed by a battle of such level.

Moving around with the Sky Measuring Step, Xiang Shaoyun used the profundity of primal chaos repeatedly as he sent out an unending stream of Three Lives Fists forward. There were so many attacks that even the lotus clone found them too much to deal with.

However, the divine primal chaos lotus was not an opponent to be so easily defeated. The lotus clone formed a hand seal that was akin to a blooming lotus, sending strands of primal chaos energy out. With terrifying destructive power, the attack left numerous cuts on Xiang Shaoyun's body.

Xiang Shaoyun pushed his battle intent to his limits and formed numerous energy blades as he called upon the primal chaos lightning, slashing at the incoming attack. Each slash rumbled forth like a roaring dragon, finally overwhelming the lotus clone. After all, the lotus's main body was still fighting Dugu Qiubai. The clone it sent toward Xiang Shaoyun was weaker than its main body.

"Even a little brat like you knows the profundity of primal chaos? And you even have access to other powers?" The lotus appeared indignant. He sent even more of his power toward his clone.

The lotus petals opened and closed repeatedly, pumping more and more energy forward, attempting to devour Xiang Shaoyun completely. Xiang Shaoyun knew how strong the lotus was, but he could weaken the lotus with his primal chaos lightning. Of course, if he instead attacked with pure primal chaos energy, his attacks probably wouldn't do much.

"Looks like the divine primal chaos lotus is immune to the five elements, making it hard to kill. Dugu Qiubai probably won't ever be able to defeat it if his cultivation is not far higher than the lotus's." Xiang Shaoyun came to a realization, and a plan formed in his mind.

He stopped using the primal chaos power. Instead, he started using the other four elements—wind, lightning, light, and darkness.

Celestial King Seal!

Devil Severing Edge!

Tai Chi Yin Yang Palm!

After changing his energy, Xiang Shaoyun unleashed a storm of attacks toward the incoming primal chaos energy. His attacks were extremely destructive, scattering the primal chaos energy. Unlike his previous attacks, the lotus wasn't immune to these attacks.

"Damn these powers! They're not part of the five elements! This is so infuriating!" the lotus raged.

Unfortunately, its rage was pointless. Its energy had been scattered, and it could no longer stop Xiang Shaoyun's advance. After all, it was only a plant. Even if it was sentient, it hadn't been able to create a powerful battle technique. Thus, its attacks were rather rigid. Apart from the profundity of primal chaos, it had no flexibility in its moves. That was why it had been unable to deal with Xiang Shaoyun's varied attacks.

Just as the clone was on the brink of destruction, the lotus's main body stopped dealing with Dugu Qiubai. It forcefully disengaged from him and charged at Xiang Shaoyun. The lotus's main body was similarly using the primal chaos power. It even used the same moves as its clone, but its main body was much more powerful.

Xiang Shaoyun felt the profundity of primal chaos power surround his entire body. The power of destruction stripped his body of life, threatening to turn him into mincemeat. A suffocating sensation assaulted him.

Is this the strength of someone in the Nine Revolutions Realm? wondered Xiang Shaoyun inwardly.

"Xiang Shaoyun, watch out!" Dugu Qiubai rushed over and madly attacked the lotus.

However, the lotus ignored his attacks and focused on Xiang Shaoyun. After all, Xiang Shaoyun was much more threatening to it than Dugu Qiubai.

Just as Xiang Shaoyun was about to be killed, his soul clone appeared. With the Divine Yin Yang Sword in hand, the clone swung at the lotus. Instantly, the world around them turned still.

## Chapter 1738: Divine Lotus Capturing Two Geniuses

Xiang Shaoyun's soul clone was no weaker than Dugu Qiubai. It controlled the power of time, a power entirely different from the power of primal chaos. The two were locked in a stalemate.

Unfortunately, the divine primal chaos lotus was in the Nine Revolutions Realm. Although Xiang Shaoyun's combat strength could slightly reach the level of the Nine Revolutions Realm, he was still far from an actual Nine Revolutions Realm expert. He was sent flying away while the primal chaos power was branded upon his soul, attempting to destroy him. He panicked when he realized what the lotus was trying to do.

If it wasn't for his comprehension of the primal chaos power, which granted him the ability to counter the power of destruction with the power of life, his soul would have been instantly destroyed.

At this time, Dugu Qiubai arrived and prevented the lotus from giving chase. However, Dugu Qiubai's primal chaos power was unable to deal much damage to the lotus. The most he could do was slow the lotus down.

Xiang Shaoyun joined hands with Dugu Qiubai, and the two unleashed their strongest techniques as they madly attacked the lotus. If the two weren't such incredible geniuses, they would have been instantly defeated.

Xiang Shaoyun hurriedly rushed toward the lotus's actual body. So long as he could damage the actual lotus, it would be greatly weakened. However, when he was about to reach the lotus, he sensed a powerful primal chaos barrier protecting the lotus, stopping him from further approaching it.

The lotus naturally noticed the threat coming for its body. It roared furiously, "Brat, I will turn you into a clone of mine!"

It then retreated, attempting to return and guard its body.

"Don't let it return to its body! Primal Chaos Seal!" Dugu Qiubai roared and formed numerous hand seals, forming a five-colored ring that surrounded the lotus clone, attempting to lock the clone inside.

"How naive. Your energy will only serve to increase my strength. You really think it will work against me?" said the lotus with contempt. It opened its mouth and easily devoured half of the energy powering Dugu Qiubai's ring.

It was then that Xiang Shaoyun's eyes turned resolute as he pushed the power of his Divine Yin Yang Sword to its limits. He blended the dao of yin and yang and his battle intent before unleashing an enchanting slash—River of Time!

The slash sent ripples through the passage of time, and a long blade of time appeared. It broke through numerous obstacles before landing on the divine primal chaos lotus. That was Xiang Shaoyun's full-powered slash, which pulled upon the power of time. It was overwhelmingly powerful.

The divine primal chaos lotus clone was slashed apart, but it wouldn't die so easily since its main body was the source of its power. It had merely focused a majority of its power into its clone, a clone that could be reformed at any time.

Xiang Shaoyun took the chance to draw his Primal Inception Saber with his main body and swung at the lotus stem. The attack similarly did not utilize the power of primal chaos. Rather, it utilized the power of lightning, allowing it to skip the interference of the profundity of primal chaos and reach the stem.

Boom!

A massive explosion erupted, sending the primal chaos water splashing everywhere. Just as Xiang Shaoyun thought that he had succeeded, he saw that a trembling lotus petal had blocked his attack. The petal was even counterattacking him.

"Do you really think you can defeat me so easily? You're too naive! Both of you shall become my clones!" roared the lotus madly as its five petals bloomed, instantly forming a primal chaos domain that spread toward Xiang Shaoyun and Dugu Qiubai.

Everything happened too fast and too suddenly, to the point neither of them could react. Xiang Shaoyun and Dugu Qiubai instantly sensed the incoming crisis. They hurriedly tried to leave as they could not afford to allow the lotus to trap them in its domain.

However, the divine primal chaos lotus was too strong. Its five petals spread across the entire lake, growing at an astonishing speed. It was as though it could even wrap its petals around the entire primal chaos world if it wanted.

"Damn it, we can't escape!" Xiang Shaoyun exclaimed in alarm.

He could sense the world around him bound him in place, making it extremely difficult for him to escape. Dugu Qiubai had the same sensation, and eventually, the two were wrapped by the lotus's petals.

"Haha, your physiques are perfect for me. I will finally become the true master of this world," said the lotus with a hearty laugh.

The five petals closed in as the boundless primal chaos power suppressed Xiang Shaoyun and Dugu Qiubai. The strength of the primal chaos power had reached an unimaginable level that was definitely beyond the level of an ordinary Nine Revolutions Realm expert. No matter how they struggled, they couldn't break free. If this continued, the two would be dead.

Their bodies were being squeezed by the petals, and even their souls were being subjected to intense suppression. Their souls were on the verge of complete destruction; the primal chaos power all around them was unstoppable.

"Xiang Shaoyun, my bad for bringing you into this," said Dugu Qiubai guiltily while feeling completely helpless.

Xiang Shaoyun said, "Don't be discouraged, Brother Dugu. I thought you were going to be the master of this world? If you can absorb this lotus, everything here will be yours."

Under Xiang Shaoyun's reminder, Dugu Qiubai's battle intent was reignited. He roared, "You're right. However, the profundity of primal chaos is the thickest here, so thick I can't even compare. I won't be able to absorb the primal chaos power here."

"You still have me. Just remember our agreement," said Xiang Shaoyun. He circulated the Desolation mantra, and the profundities of primal chaos started flashing through his mind. At the same time, his astral cosmos sea started absorbing the primal chaos energy around him.

The primal chaos energy around him was so high-tiered that even those at the Nine Revolutions Realm wouldn't be able to absorb it. One had to be at the same level as the lotus and comprehend the pure profundity of primal chaos before one could even start absorbing the primal chaos energy here. However, Xiang Shaoyun had the Primal Inception Physique. With the primal inception power being a higher-tier power than the primal chaos power, he could absorb all energies in existence.

As the thick primal chaos energy entered his astral cosmos sea, his energy supply surged. Brands of the profundity of primal chaos appeared on the surface of the astral cosmos sea one after another. Slowly, the profundities of life and death created a perfect balance within the astral cosmos sea, creating a perfect world of life. One could say that Xiang Shaoyun's astral cosmos sea had finally completed its evolution and become a true life-supporting world.

#### Chapter 1739: Myriad Impenetrability

Xiang Shaoyun had a world within him. That was a secret nobody knew. After he absorbed the primal chaos power, Yu Caidie, who was cultivating within his astral cosmos sea, benefited from it as well.

Yu Caidie had been in seclusion since consuming the vermilion bird fruit. She had grown as much as those who had cultivated in the primal chaos wall, or perhaps she had grown even more.

Her mount had consumed the vermilion bird feather and had similarly grown rapidly. With a large amount of primal chaos energy entering Xiang Shaoyun's astral cosmos sea, they would inevitably absorb some of the primal chaos energy as well.

Additionally, Xiang Shaoyun was afraid that he wouldn't be able to digest all that energy, so he transmitted it to Yu Caidie and had her freely absorb the incoming primal chaos energy. Because Xiang Shaoyun had processed the primal chaos energy in his astral cosmos sea, it was safe for absorption.

Thus, Yu Caidie, who was at the sixth-stage Rebirth Realm, started madly absorbing the primal chaos energy. She managed to form the primal chaos flame, and her God Realm energy started surging.

With Yu Caidie and the phoenix absorbing the primal chaos energy, the divine discerning tree naturally wouldn't miss out on a chance like that. It had grown into a towering tree. Nine colors constantly shone around its body. Its absorption speed was much greater than Yu Caidie's and the phoenix's, and it was able to share a large portion of the pressure Xiang Shaoyun was feeling from all the primal chaos energy.

"Worthy of being the world creator. I've chosen the right master," said the divine discerning tree in joy.

Xiang Shaoyun himself also started increasing his cultivation. However, just absorbing the primal chaos energy alone wouldn't remove Xiang Shaoyun and Dugu Qiubai from the danger they were

in. The divine primal chaos lotus had unending energy. It was only a matter of time before Xiang Shaoyun exploded from an oversupply of energy. His absorption speed was unable to surpass the speed at which the lotus was releasing primal chaos energy.

"Kids, die!" the divine primal chaos lotus started roaring.

A boundless profundity of primal chaos weaved about, squeezing the two as the power of destruction continuously assaulted their souls and reduced their life force. Dugu Qiubai's skin cracked, and he bled from his seven orifices. He looked incomparably miserable. Xiang Shaoyun was only slightly better off, but his body was near its limits as well.

Xiang Shaoyun started forming hand seals repeatedly. His body emanated an abstruse aura, and a nine-colored radiance surrounded his body. Bit by bit, the profundity of primal inception started leaking from his body.

The profundity of primal inception contained the profundities of the five elements, four divisions, and the two extremities. A power that devoured and destroyed manifested. The primal chaos power around Xiang Shaoyun started being devoured and destroyed, and he was immediately in a much better position.

"Wh-what power is that kid using? Why am I feeling suppressed?" exclaimed the divine primal chaos lotus with a slight trace of fear.

It could sense Xiang Shaoyun's aura suppressing its power, making it impossible for it to put more pressure on Xiang Shaoyun. If this continued, it would be forced to expel Xiang Shaoyun from its petals. At that thought, it opened a tiny gap between its petals, and a burst of primal chaos energy erupted from that gap, attempting to blast Xiang Shaoyun far away.

Unfortunately for the lotus, Xiang Shaoyun refused to leave. His comprehension of the profundity of primal chaos had reached a new level thanks to the pure profundity of primal chaos branded on his astral cosmos sea.

Before heaven and earth came into existence was the absolute beginning.

That was when primal inception energy filled the boundless universe. This energy was a power capable of unending permutations. It wreaked havoc throughout the universe. After undergoing years upon years of development, heaven and earth formed, and primal chaos, yin and yang, wind,

lightning, and the elements separated from the primal inception energy. Countless living beings came into existence and transformed into countless races. Worlds came into existence.

The primal inception power was the origin of all powers. It encompassed the profundities of all powers. It was all-embracing, like how all rivers ran into the sea.

Xiang Shaoyun's soul clone constantly gained more comprehension of the profundity of primal inception. His astral cosmos sea started undergoing astonishing changes. Some unknown things started taking form for no apparent reason. The origin life forms in the astral cosmos sea started splitting up and growing, spreading more and more seeds in the astral cosmos sea to form a lush world.

Xiang Shaoyun was in a state of comprehension, but he was also fully aware. He seemed to have personally witnessed the countless permutations of the profundity of primal chaos. He had a feeling that he could untangle the web of primal chaos profundity all around him at any moment he wanted.

When the lotus assaulted him with the profundity of primal chaos, Xiang Shaoyun instinctively surrounded his body with a layer of primal inception energy. An impenetrable barrier rippled along the surface of his body, transforming the profundity of primal chaos into nothingness.

Myriad Impenetrability!

That was an ability exclusive to the primal inception power. It granted one immunity to the profundities of all powers. It was most definitely a heaven-defying ability, and it was proof of how terrifying the Primal Inception Physique was.

In the future, he would be able to easily dissolve the profundity of all other elements encountered. His opponents' trump cards would be weakened considerably, granting him an advantage over his opponents.

"How is that possible? This kid actually dissolved my power?" the divine primal chaos lotus exclaimed in disbelief.

"I understand now. By branding one's soul and god body with the profundity of powers, after reaching the great mastery of these profundities, my body will be impervious to all profundities. I will be unequaled," said Xiang Shaoyun as his divine dao eyes activated. Two beams of primal inception profundity shot out, piercing through the primal chaos profundity before him and striking the divine primal chaos lotus.

Xiang Shaoyun's first brand of the profundity of powers was etched on his soul. He had also focused the profundities of powers on his divine dao eyes to further enhance his eyes, turning them into a pair of godly eyes.

"Ahhh!"

The lotus was unable to stop his eyes. After it was struck, it trembled and wailed.

At the same time, it hurriedly withdrew its petals and released both Xiang Shaoyun and Dugu Qiubai. It then formed layer upon layer of a primal chaos wall around itself to defend against the two. Unfortunately for the lotus, it was pointless.

Xiang Shaoyun's primal inception profundity was too powerful. No power in existence could stop its advance. The divine primal chaos lotus was struck by yet another attack, and it wailed repeatedly. Xiang Shaoyun's attack was enough to damage its core. If this continued, he would be able to completely disable it.

When Dugu Qiubai saw that, he smiled helplessly and said, "Worthy of being a physique tiered higher than the Primal Chaos Physique. I can't compare with him."

Dugu Qiubai had been searching for a defeat since young. Xiang Shaoyun was the one to deliver him that defeat, and once again, Xiang Shaoyun dealt him another blow, making him realize that he truly was incomparable to Xiang Shaoyun.

"Submit or die," said Xiang Shaoyun coldly.

"Stop! Stop! I submit!" The divine primal chaos lotus finally surrendered, not wishing to have its consciousness erased.

#### Chapter 1740: Two Geniuses Leaving the Primal Chaos

Xiang Shaoyun stopped attacking. He had found a way to counter the divine primal chaos lotus. He no longer feared that the lotus would try some tricks. The divine primal chaos lotus shrank into a tiny lotus sparkling with five colors. It looked delicate and beautiful, completely unlike a divine being that had reached the Nine Revolutions Realm.

"Brother Dugu, I'm taking the divine primal chaos lotus with me. Are you still staying here?" Xiang Shaoyun asked.

In truth, he did not wish to see Dugu Qiubai stay in the primal chaos world. He would rather see Dugu Qiubai help humanity fight the aliens, suppress the devils, and spread the might of humanity.

Dugu Qiubai sighed and said, "I had planned to stay here and enter the Reincarnation Realm before traversing the boundless universe like the ancient humans and witnessing how wide the universe actually is. However, so what? I will never surpass you, Young Master Xiang. I will probably suffer from a shadow in my heart if I stay here now. I shouldn't stay and disturb the peace of this world. I'm an outsider here anyway. I'll just create my own world in the future."

Dugu Qiubai had thought it through and was no longer strongly attached to the thought of staying in the primal chaos world.

Sure, he might be able to reach the peak inside the primal chaos world. But what would be the point of living that way? He had a feeling that even after entering the Reincarnation Realm, he still wouldn't be Xiang Shaoyun's match. Xiang Shaoyun was the one truly blessed by fate to become the sovereign of all existences.

"Excellent. Humanity needs the protection of a top genius like you, Brother Dugu. It would be such a waste for you to stay here," said Xiang Shaoyun. "I will fulfill my promise and give you the lotus base. I hope it can help you enter the Nine Revolutions Realm. Together, we will face the aliens."

Dugu Qiubai sank into thought before saying, "You should keep the lotus base. You need it more."

Xiang Shaoyun shook his head. "No. It doesn't suit me anyway."

He already had the divine discerning tree in his body. It was constantly growing and feeding him energy. In any case, he had grown too rapidly in a short time frame. He did not want the frantic growth to continue.

After absorbing the divine primal chaos lotus's primal chaos profundity, he had reached eighth-stage God Realm. With his combat prowess, he could crush everyone below the Nine Revolutions Realm. He had to suppress his cultivation for a period of time before breaking through.

After discussing with the divine primal chaos lotus, he had the lotus release its base, which was where it stored its essence. Naturally, the lotus was unwilling. However, it did not dare to disobey Xiang Shaoyun and could only compromise by releasing a smaller lotus base. The base contained one fifth of its strength, and it loathed parting with it.

"This little bit of strength is nothing. Given enough time, you can reclaim your strength through cultivation," said Xiang Shaoyun.

"I have taken a million years to accumulate my power. Even one fifth of that requires two hundred thousand years to recover," said the lotus helplessly.

Xiang Shaoyun rubbed his nose and said, "I will find you a body that will make it much easier for you to cultivate."

"Don't forget your promise!" The lotus became excited.

"Of course. I never lie," said Xiang Shaoyun firmly.

He dug a deep hole in his astral cosmos sea and moved a large portion of the divine primal chaos spring water from the primal chaos lake into the hole. The lotus also relaxed its defense and allowed Xiang Shaoyun to draw it into his astral cosmos sea.

He was also able to dig out a large amount of primal divine stones at the bottom of the lake. He drew a portion of the stones into his astral cosmos sea while using some on his Primal Inception Saber. The Primal Inception Saber was upgraded into a top-tier god weapon. Even if it wasn't as powerful as a nine revolutions weapon, it was now strong enough to withstand a clash against nine revolutions weapons.

Additionally, he also used some of the stones on the lotus base in his astral cosmos sea, turning the lotus base into a divine weapon as well. Dugu Qiubai naturally did not leave empty-handed either. He was rather satisfied with his gains from the primal chaos world.

The two took another walk around the entire primal chaos world. During the walk, Dugu Qiubai managed to subdue a celestial primal chaos dragon. The dragon became his mount, further showcasing the might of his Primal Chaos Physique.

As for Money, he had managed to enter third-stage God Realm in the primal chaos world. As there were no lightning tribulations in the primal chaos world, breaking through was easy for Money, allowing him to grow rapidly in cultivation.

Even Gui Qi benefited from Xiang Shaoyun's breakthrough, becoming a fifth-stage Devil God. He was now strong enough to stand on his own. In truth, Xiang Shaoyun wanted to get a mount for himself as well, but he ultimately refrained from doing so.

Just the appearance of one of these primal chaos beasts would shock the world. He would rather let Dugu Qiubai hog the limelight while he remained low-profile. After all, he could always get Little White and Little Azure back to his side at any time. Those two had a much higher affinity with him. There was no need for him to look for more mounts. Furthermore, Money was already a Demon God. If he could find the inheritance of the celestial horned dragonsnake race, he would grow even stronger.

Xiang Shaoyun and Dugu Qiubai explored the primal chaos world in its entirety. After three years, they finally left. They tore through the 33 layers of the primal chaos world's wall and returned to outer space.

At that point, Xiang Shaoyun was already a mid eighth-stage God. His cultivation was almost at the peak of humanity, and his entire body enjoyed a high affinity with the world around him. He constantly absorbed all sorts of energies with his body, ensuring that he was constantly growing. Even without any divine treasures, he would only take a few more years to reach the peak of the eighth stage and enter the ninth stage.

As for Dugu Qiubai, he was now a peak ninth-stage God, only a step away from the Nine Revolutions Realm. His comprehension of the primal chaos profundity had also reached a certain limit. With the combat prowess of his Primal Chaos Physique, he could pit himself against even a fresh Nine Revolutions Realm expert.

While leaving the primal chaos world, Xiang Shaoyun suddenly asked, "Brother Dugu, do you notice anything from the primal chaos wall?"

Dugu Qiubai thought about it and said, "It's a primal chaos wall formed through the profundity of primal chaos. It's also the most optimal kind of defense."

"That's right. Don't you think that we can create our own defensive technique that is similar to this wall?" asked Xiang Shaoyun with a smile.

Dugu Qiubai raised his brow. He smiled and said, "Young Master Xiang is truly a genius to come up with something like that."

"Hehe, you must have thought of it, too," said Xiang Shaoyun.

"I created the Primal Chaos Bell," stated Dugu Qiubai proudly.

The Primal Chaos Bell was a defensive technique Dugu Qiubai had created. The technique utilized the profundity of primal chaos, and it was incredibly powerful.

"Well then, let the aliens experience the prowess of your Primal Chaos Bell, Brother Dugu," said Xiang Shaoyun with a smile.
