

## Passive Skills 421

Chapter 421 explosive man

After entering the dungeon, the map was filled with monsters.

Zhang Shan was a little dizzy.

It wasn't that they were worried that they wouldn't be able to defeat the monsters in the dungeon.

Zhang Shan was not worried about this at all.

The monsters on the fourth floor of the demon-subduing platform dungeon were all probably level 50.

Even the final boss was level 50.

They could even defeat level 60 monsters and level 60 bosses in demon suppression city.

On the dungeon's fourth floor, taking care of these level 50 monsters was a piece of cake.

However, there were too many monsters in the dungeon.

There were only five of them, and the dungeon was huge.

How long would it take for the five of them to clear all these monsters?

Looking at the monsters all over the ground, the others couldn't help but have a headache.

Wind and cloud blade asked Zhang Shan.

what's going on? are we going to start farming? "

Zhang Shan was also a little depressed. There were so many small monsters. How long would it take for the five of them to clear all of them?

if we just go like this, won't it be too slow? even if we keep going until midnight, we might not be able to finish all the small monsters.

there's nothing we can do about it. The monsters in normal mode won't run over on their own like in extreme mode. We can only farm them all the way.

"Why don't we do this? two of us will ride the horses to lure the monsters and lure all the small monsters over. the other three were farming monsters on the spot. Would it be faster this way? It's too time-consuming to farm all the way."

zhang shan said after thinking for a while.

"That's a good idea, let's do it."

As for Zhang Shan's idea, wind and cloud blade expressed his approval.

With someone luring the monsters, it would be much faster than them clearing the monsters all the way.

If he were to farm them all the way, he would have to stop and waste a lot of time.

“then who’s going to lure the monsters?”

Zhang Shan turned his gaze to boss Wu and the little fairy.

The two of them had the lowest damage output and couldn’t farm the monsters quickly. It was better for them to help lure the monsters. This way, their efficiency would increase a lot.

Seeing that Zhang Shan was looking at her, the little demon said unhappily.

“isn’t it because they don’t have a divine weapon and are slow to kill monsters? Alright, I’ll go lure the monsters.”

After little fairy finished speaking, she rode away angrily.

boss wu followed him and rode in another direction.

Just like that, boss Wu and the little fairy rode the horse and ran quickly in the dungeon.

He brought over groups of small monsters.

Zhang Shan and the other two started farming on the spot.

To be honest, this demon-subduing stand’s fourth level instance dungeon wasn’t difficult for them at all.

These small monsters were all level 50 demon Warriors.

in zhang shan’s eyes, these small monsters were really weak.

Level 50 monsters, unless they were special existences, would only have around 20000 HP.

And Zhang Shan’s current damage output, in addition to boss Wu’s attack blessing and title bonus.

It had reached over 60000.

After killing the monster with one shot, there was still more than half of the damage.

It was simply too easy.

If the dungeon map wasn’t so big, it wouldn’t have taken him too long to clear all the monsters in the dungeon.

he hoped that the final boss would be a little challenging.

Otherwise, there would be no point in clearing this dungeon.

Boss Wu and the little fairy rode back and forth to lure the monsters.

The number of monsters they had lured was increasing, and there were even two orange-colored bosses.

However, for Zhang Shan, an orange-colored BOSS was no different from a small monster.

He had already killed the BOSS as if it was a small monster.

as time passed, the number of monsters in the dungeon gradually decreased.

In the beginning, the little fairy and Mr. Wu could still attract a large wave of small monsters.

In the end, when they went out for a walk, there were only a few monsters following them.

“Big brother carrying a blade, are there no more small monsters?”

...

Windcloud blade asked boss Wu.

there should be more. The final BOSS hasn't spawned yet. I'll go and look for it.

when the two of them pulled the monsters, they also looked for a place with a lot of monsters to pull, so they probably missed out on some small monsters.

“let's split up and search. that way, we'll be faster.”

After Zhang Shan finished speaking, he also rode his horse into the dungeon.

the five of them spread out in the instance dungeon.

One by one, they discovered some small monsters and defeated them.

After Zhang Shan had searched around, he suddenly received a system notification.

[ system notification: due to the death of a large number of demon soldiers, the demon god will send a demon engineer to the fourth floor of the demon subduing platform to investigate. ]

at the same time as the system notification, it also provided the coordinates of the demonic engineering project's arrival.

It was unknown which member of the party had defeated the last monster.

...

The final boss of the dungeon's fourth floor had finally spawned.

phew, I've finally cleared all these small monsters. Let's quickly find the final BOSS and finish this.

“That's strange. The demon's final BOSS is actually an engineer? Does it have the ability to attack?”

After seeing the system notification, Windcloud blade asked curiously.

the name is just a code. Since it's a BOSS, it will definitely deal damage, and it won't be weak.

that's right. Brother Guan is also a master engineer. Do you think he has any attack power? ”

what the f \* ck, you're right. This demon engineer is only a part-time profession, but do demons have a profession? ”

“Why do you care so much? once we find the boss, we'll just go up and finish it.”

“that's right. after you see the boss, go up and fight it a few times. then, you'll understand everything.”

it's just a normal level 50 red boss anyway. It won't be able to do much. We can just fight it.

"Be careful, don't flip over, hehe."

"Nonsense, a normal level 50 red BOSS, do you think you can defeat us? are you looking down on yourself or the six-barreled boss?"

alright, I'm just looking down on myself. I wouldn't dare to look down on the six-barreled boss.

Everyone rode their horses and followed the coordinates given by the system to find the BOSS, the Nephilim engineer.

Everyone dismounted and stopped in their tracks, looking at the BOSS in the distance.

the nephilim engineers were small in size, and they were definitely not comparable to the big bosses.

They were much smaller than even the normal demons.

It might only be 1/3 of the size of a demon fighter.

The scene of a small demonic engineer carrying an extra-large backpack looked very funny.

If it wasn't for the red name above its head ...

Everyone might have mistakenly thought that this was a special monster that came from somewhere.

"Hahaha, is this a boss? His looks are too funny."

The little fairy said with a smile.

"what the f \* ck? this is the first time i've seen such a small humanoid monster in the game. this demon engineer must be very weak."

"he's an engineer. fighting isn't his forte. i guess he only knows how to make some engineering products."

"Haha, then this demonic engineer won't take out a fire god cannon later, right? That would be terrifying."

you're thinking too much. Look at the demon engineer's empty hands. Where did he get the fire god cannon from? "

" that's not necessarily true. i'm carrying a huge backpack. maybe the fire god cannon is in my backpack. "

when the Nephilim engineers pull out a dozen fire god cannons, it'll be fun. Hehe.

maybe the demon engineers only know how to use their fists to hit people. Who knows? "

"you guys sure have a lot of imagination. isn't it just a normal red boss? it's not as exaggerated as you guys make it out to be. you guys wait here for a while, i'll go up and fight the boss."

Zhang Shan stopped everyone's idle chatter and walked towards the demon engineer.

Even though this demon engineer looked a little strange, he was still a demon.

It was small and didn't even have a weapon in its hands.

It looked very strange.

However, Zhang Shan was not worried that he would not be able to win.

It was just an ordinary red boss, how could it be so powerful?

when zhang shan walked over.

The demon engineer who had his head lowered suddenly raised it.

He looked at Zhang Shan with a vicious gaze.

The demon engineer strode with his short legs and quickly rushed towards Zhang Shan.

He took out a round object from his backpack and threw it at Zhang Shan.

With a loud bang, it exploded above Zhang Shan's head, damage -46078.

"What the hell is this?"

Zhang Shan was a little confused.

Although the demonic engineer's damage wasn't too high, the formation was quite scary.

Was this a bomb?

He quickly fired at the demon engineer.

he checked the BOSS's attributes.

[ demonic engineer (red): level 50, attack 12000, HP 6000000 ]

Skill 1, bomb throwing; skill 2, mine detection; skill 3, gunpowder mastery; skill 4, explosion.

[ bomb throwing: the demon engineers use their own fool bombs as a means of attack. ]

Deals double damage to the target and all enemies within a five-yard radius.

[ mines sensor: demon engineers will randomly set up mines in battle. ]

After the mine senses the surrounding enemy targets, it will quickly explode, causing three times the damage to the target.

[ perception range: five yards ] [ damage range: five yards ]

[ gunpowder mastery: the demon engineer is proficient in the principles of gunpowder, increasing all explosive damage by 100%. ]

[ explosion: the Nephilim engineer rushes to the middle of the target and detonates the bomb when they meet. Deals five times the damage to the target within the range and silence the target. ] The explosion will cause a certain amount of damage to the engineer.

Damage range: 50 yards. Silence duration: 5 seconds.

after looking at the attributes and skills of the demon race engineer, zhang shan was speechless.

He was a f \* cking explosive man.

All the skills were related to bombs.

Fortunately, it was only a normal level 50 red BOSS.

If it was a Nephilim engineer, it would be a level 60 BOSS.

If it was a real-name BOSS, they might not be able to defeat it.

These few skills were really too disgusting.

The first skill was bomb throwing.

The damage was still alright, it was only twice the damage.

it was a normal red BOSS skill.

however, the bomb thrown by the demonic engineer was an area-of-effect skill.

It was the kind that could blow up a large area.

this was also because zhang shan and the rest had fewer people.

If it was a big team fighting a boss.

This little skill was a little disgusting.

No one was allowed to stand around the boss tank.

otherwise, even if the tank could withstand the damage, the others would not be able to withstand the damage from the demonic engineers.

The second skill of the demon engineer was actually to bury mines.

It looked disgusting, but the description of the skill was not enough to tell.

the main thing was that he didn't know if the frequency of the demonic engineering project setting mines was high.

If it didn't stop setting up mines, who would be able to stand it?

if the entire map was filled with mines, they would not even have a place to stand.

If the demon engineers only set up a few mines occasionally, it would be easy.

As long as they saw it setting up mines, everyone except for the tank would pay attention.

Look at the mine's location and run further away.

The third skill of the demonic engineer, gunpowder mastery.

This skill was easy to deal with as it increased damage by 100% and was a status skill.

Many red bosses had similar skills.

The Nephilim engineer only had a little over 10000 attack power. Even if his damage was doubled, it would not be a big deal.

It wasn't much of a threat to them.

However, the demon engineer's big move ...

Zhang Shan was a little confused.

Was this a f \* cking skill that could kill 1000 enemies and lose 800 of its own?

However, the skill description only stated that the damage to the player was five times the damage.

As for how much damage the demonic engineer would take, the skill description did not state it clearly.

Most importantly, this explosion skill actually came with a five-second silence.

Fortunately, Zhang Shan was not a profession that relied on skills to survive. Otherwise, it would be difficult to deal with him.

This was the first time they had seen a boss skill like this, and it looked strange.

Zhang Shan withstood the damage from the demonic engineers, who kept throwing bombs at him, and fired continuously.

The demon engineer didn't have much HP.

He only had 60 million HP.

With their damage output, they might be able to blow it up in less than four minutes.

zhang shan said to the others after pulling the BOSS steadily.

pay attention to your positions and try to stand apart. The skills of the demon engineers are very disgusting.

After he finished speaking, Zhang Shan displayed the BOSS's attributes and skills that he had just seen on the team channel.

His friends could see that Zhang Shan had already stabilized the demon race project.

They also rushed up and continuously dealt all kinds of damage.

As they attacked the BOSS, they checked the Nephilim engineers 'attributes and skills.

"F \* ck, this is explosive man?"

Windcloud blade cried out in surprise.

it was unbelievable. he didn't expect that there would be such a BOSS in this game.

isn't it just explosive man? fortunately, it's only a normal difficulty dungeon. No matter how disgusting the Nephilim race's skills are, we can still beat it.

that's true, but the skills of the demon engineer are too annoying.

" what are you afraid of? as long as we fight fast enough, it won't have a chance to use its skills. won't that do? "

"You're right, but can you kill the demon engineer in seconds? However, it couldn't be killed instantly. The demon engineers can definitely use their skills."

"Don't think too much, fight quickly. I guess this BOSS isn't as hard as I thought."

" yes, at most, we'll let the six-barreled boss fight it alone. we'll just watch from afar. no matter how perverted the nephilim engineer is, he can't kill the six-barreled boss. "

haha, you're right. At most, we've just killed another wave of bosses.

Although the demon race's engineering skills looked strange.

However, it didn't affect them for the time being.

Under everyone's frenzied attacks, the Nephilim engineer's HP was dropping rapidly.

After a short while, it dropped to 80%.

When the demon engineer's HP dropped to 80% ...

his right hand was still throwing bombs at zhang shan.

However, the demon engineer's left hand, which had been motionless, began to move.

It took out a few large round cakes from its backpack with its left hand and threw them at everyone's feet.

f \* ck, run! The demon engineers are burying mines.

"What the f \* ck, is this a landmine? Is this a f \* cking landmine?"

Seeing the demonic engineers throw out the mines, other than Zhang Shan.

the others ran away from where they were.

However, heart moves with me was a little slower.

He had just taken a step when the mine exploded under his feet.

A loud boom was heard.

Heart moves with me directly fell to the ground.

The damage of the mines set up by the demon engineers was three times the damage.

In addition to the damage bonus from the gunpowder mastery skill.

with the demon engineer's base attack power of 12000, he had to be careful.

The theoretical damage of a mine was more than 70000.

Moving heart has never managed to buy a purple cape.

Although he had reached level 40 a long time ago, the cloak he was wearing was only a level 40 blue cloak.

With his HP, he couldn't block the damage from a mine from the demon engineer.

He didn't manage to Dodge in time.

However, it was sent away by a mine by a demon engineer.

## Chapter 422-destroyed

The demon engineers threw out a total of five mines.

heart with me didn't manage to escape in time and was directly blown to the ground.

Zhang Shan did not run. The mines under his feet exploded, and there were still bombs thrown by the demon engineers above him.

However, he didn't care.

He was still able to withstand such a small amount of damage.

He didn't need boss Wu to heal him for the time being.

He could rely on his own life-steal special effect to recover the amount of HP he lost.

Out of the five mines, two had already exploded.

There were three more mines.

Three round biscuits lay quietly on the ground.

In the beginning, they could still clearly see the mines.

But after a short while, the mine became fainter and fainter, and soon it could no longer be seen.

it was probably the mines that the demon engineers had set up. after a period of time, they would hide.

The little fairy, who had run a few steps away, picked up her bow and arrow, aimed at another mine, and shot an arrow.

With a loud bang, the mine was blown up.

f \* ck, these mines can actually be destroyed. Quick, you three long-range soldiers, destroy the mines quickly. Otherwise, we won't even remember where the mines are.

Wind cloud blade saw little fairy and destroyed the land mine with his arrow. After that, he kept screaming.

He didn't dare to come up and hit the mine.

Wind and cloud blade was a melee fighter. If he were to go up and cut the land mines, it would be better to use his physical body to deal with them.

Hearing wind cloud blade's call, Zhang Shan was prepared to withdraw and destroy the remaining two mines.

However, the little fairy and boss Wu were faster.

They took one each and destroyed the remaining two.

haha, these mines aren't that scary. We can destroy them, so there's no need to worry.

"that's right. otherwise, it won't be long before the demon engineers throw mines all over the ground. what can we do then?"

that's true. It's good that these mines can be blown up.

let's save big brother heart following first. This loser couldn't even Dodge a landmine, hehe.

boss wu stepped forward and resurrected his heart with me.

after a wave of mine attacks by the demon engineers, everyone was ready to set up the formation.

They continued to attack the demon engineers.

However, they hadn't even managed to hit each other a few times.

the demon engineer's left hand started to take things out of his backpack again.

"F \* ck, are we going to throw mines again? Isn't the frequency of this skill a little too high?"

"Be careful, run as fast as you can if you see a mine,"

Seeing the demon engineer's left hand start to fiddle with it again, the Little Friends 'spirits were all highly concentrated.

They were afraid of the demon engineers.

little fairy was the only one who could take the hit, as she was equipped with a level 40 purple cape.

If anyone else stepped on a mine, they would be dead.

Soon, the demon engineers started to attack again.

He threw a bomb with his right hand and a mine with his left.

However, this time, everyone was prepared. When they saw a mine under their feet, they quickly ran away.

This time, they all dodged, and not a single one of them lost their members.

As usual, Zhang Shan did not Dodge.

He stepped on land mines and had a bomb above his head.

After dodging the mines, boss Wu and the little fairy turned around and blew up four mines on the ground.

Then, everyone continued to attack the demon engineer.

Going back and forth like this, it took less than a minute at most.

The demon engineer actually threw five mines.

Throwing a mine every 20 seconds, this rate of burying mines was really amazing.

Was the demonic engineer's skill really that short?

The occasional appearance of land mines had caused everyone to be flustered, except for Zhang Shan.

His other companions didn't deal much damage.

They didn't have the time to deal damage.

...

When they saw the demon engineer's left hand start to move, they had to get ready to run.

How much damage could he still deal? He was only focused on running away.

"f \* ck, this demon engineer is too disgusting. he can't stop throwing mines."

After dodging another wave of land mines, wind and cloud blade said gloomily.

I suddenly thought of a problem. There are five of us fighting the boss, so every time the Nephilim engineer throws five mines, if there are fifty of us fighting the boss, doesn't that mean that it has to throw fifty mines? "

"You're exaggerating, right? Can the demon engineer's backpack hold 50 mines?"

"aren't you bickering? how many bombs did the demon engineer throw at the six-barreled boss? They were all taken out from my backpack."

"that's right. speaking of which, the nephilim engineer's backpack must be a piece of top-grade equipment with infinite space. it would be great if it dropped, hehe."

"What are you thinking of? I saw that most of the boss's weapons were very good. But is that something that can be dropped?"

Just as everyone was chatting animatedly.

The demon engineers threw another wave of mines.

...

this time, perhaps because blade of wind and cloud was too engrossed in chatting, he did not run away.

The mine under his feet detonated, and he fell to the ground.

f \* ck, do you have to be so disgusting? how can we even watch it? "

why can't you take care of it? you're the one who's not serious. Who can you blame? "

you're done for. Old Wu's resurrection skill is still on cooldown. He won't be able to resurrect you before he kills the boss. You won't be able to get any of the boss 'exp, hehe.

Little fairy said gloatingly after seeing Windcloud blade fall to the ground.

Boss Wu's resurrection skill had already been used once when the heart of salvation moves with me.

Even if the skill was maxed out, the cooldown time for resurrection was still five minutes.

And it took them less than five minutes to blow up the demonic project.

Hence, Windcloud blade would not be able to wait for his resurrection.

According to the game's mechanics. Those lying on the ground would not get any experience.

Wind and cloud blade was already depressed enough, but he was teased by little fairy.

Hmph, don't be happy too soon. There will be more land mines later. I don't believe you can avoid them all.

Windcloud blade retorted.

I'm a super artist and I'm very flexible. How can these small mines blow me up? "

"You can continue bragging."

After Windcloud blade fell to the ground, only four of them were left to fight the boss.

Besides, boss Wu's output efficiency was so low that he didn't even have a presence.

The only one who could really cause damage was Zhang Shan following his heart.

The little fairy's damage output was not bad.

But it didn't matter.

The demon engineers didn't have much HP anyway.

It only had 60 million HP.

Even if Zhang Shan were to fight alone, he estimated that he would be able to defeat them in less than six to seven minutes.

Moreover, he had two helpers now.

The demon engineers were setting up mines non-stop.

They had been fighting all the way, and they were finally about to hit the Nephilim engineer to half of his HP.

"we're almost at half health. should we retreat first?"

heart with me asked worriedly.

Demonic engineering's ultimate skill, explosion, had a damage range of 50 yards.

If they didn't retreat in advance, they probably wouldn't be able to escape.

you guys should retreat first. Come back up after the demon engineer's big move is over.

Just as the Nephilim engineer's HP was about to drop to half ...

The rest of the people retreated far away.

Zhang Shan continued to attack alone.

Not long after, when the demon engineer's HP had dropped to half ...

The demon engineer was charging at Zhang Shan like a mad man.

he was probably preparing to rush up and cast an explosive big move.

Zhang Shan did not Dodge.

In fact, he couldn't hide.

Without a horse, it was impossible for a player to outrun a BOSS.

Moreover, there were some bosses that even if players were to ride on their mounts, they would still be unable to outrun them.

A BOSS's strength was all-rounded.

The red BOSS's movement speed was never slow.

This was especially true for real-name bosses.

A real name BOSS's movement speed was almost equivalent to teleportation.

as long as they were within the BOSS's aggro range, they would arrive instantly.

A normal red BOSS's movement speed was not as fast as a real name BOSS.

But it was also very fast.

Even if Zhang Shan wanted to hide, it was impossible.

It was better to just stand there obediently.

In any case, he could take the damage from the demonic engineer's ultimate skill.

The demonic engineer's explosive big move dealt five times the damage.

In addition to the damage bonus from the gunpowder mastery skill, it was ten times the damage.

however, the basic attack power of the demon engineers was not high.

It only had an attack power of 12000.

10x damage was only 120000 damage in theory.

Such a small amount of damage was nothing to Zhang Shan.

She couldn't do anything to him, so why did she have to Dodge?

The demon engineer rushed to Zhang Shan's side.

Before he could understand what was going on.

A loud bang was heard.

A powerful shock wave almost flipped him over. The entire fourth floor of the dungeon seemed to shake.

zhang shan came back to his senses and saw that his health bar was only left with about half.

they quickly continued to fire at the demon engineer.

He had to quickly suck back some of his health.

It would be ridiculous if they were killed by a normal level 50 red BOSS when they were not careful.

After the Nephilim engineer had used his ultimate skill, the other three players who were still alive quickly went forward to continue attacking the BOSS.

Boss Wu saw that Zhang Shan's health was only half, and quickly added a few more mouthfuls of blood.

He raised his blood volume.

It was only then that everyone realized that the demon engineer's HP was only left with 40%.

It turned out that after the demon engineer cast his ultimate skill, his own HP had also dropped by 10%.

as expected, it was a move that killed 1000 enemies and lost 800 of its own.

This BOSS was really ruthless.

it was so scary when the demon engineer used his big move just now. He made such a big move.

it's fine. The wind blows, the rain drops. It's the demon engineer's big move. Although it causes a lot of movement, the damage isn't that great.

zhang shan did not mind.

the demon engineer's ultimate move only looked scary.

In fact, the damage was not much. If not for Zhang Shan's momentary daze earlier, he would have suffered a few more bomb attacks.

The demonic engineer's ultimate skill would probably only deal a small amount of damage.

They were no threat to him at all.

six-barreled boss, you're getting more and more awesome. Only you would dare to say that. How can you say that the BOSS's damage is not that good? "

in this game, with Big Boss six-barreled, all the other Guardian classes have to jump off a building. No one can take it better than six-barreled.

maybe in the later stages of the game, when the Guardian's HP has increased, they will be able to compete with the six-barreled boss. But now, they can't. The six-barreled boss's godly Cape is no joke.

" speaking of this, i'm feeling extremely unbalanced. damn it, we're only equipped with blue cloaks, but the six-barreled big boss already has a divine cloak. he's so heartless. "

" yeah, we can't even get a purple cape. it's too difficult. "

the six-barreled boss's King's Cape must have been an accident. It'll probably be very difficult for such a divine weapon Cape to appear again.

that's not necessarily true. Aren't there still six other godly beast statues that haven't been destroyed yet? during the next world war, there might be a godly cloak that will drop.

that's hard to say. The country war announcement only said that the divine beast statue would drop a complete divine weapon. It didn't say that it would drop a divine weapon cloak? "

that's true. Cloaks are still better. Compared to other divine artifacts, cloaks are much more precious. Having more flesh is the absolute truth.

"That's natural. No one can hurt you even if you have more health. You don't even need to control your skills when fighting. besides, they had to have more health to tank the BOSS. If it wasn't for the godly Cape, we wouldn't have been able to defeat so many real name bosses."

"i really want a divine cloak."

in your dreams. We'll talk about it after you get the purple cape.

" the purple cape is easy. maybe the demonic engineer will drop it later. "

"Holy sh \* t, you're really imaginative."

"Hehe, you need to have dreams."

Everyone was attacking the BOSS while blowing water.

As for the demon engineers, they would still set up mines from time to time, making everyone busy.

However, after the previous few experiences, he was no longer the same.

after that, no one else fell to the ground.

Every time they saw the demon engineer throw a mine, the others could run away in time.

Then, the little fairy and boss Wu quickly detonated the mine.

Although it was a little annoying to Dodge landmines.

However, everyone was still having fun.

Of course, wind cloud blade was an exception.

he was a person lying on the ground, so he had long lost his passion.

Under everyone's continuous attacks, the Nephilim engineer's HP was slowly reduced to 20%.

the BOSS entered berserk mode.

hurry up and kill the demon engineer. It's so annoying to keep throwing mines.

it's good to hide from the mines. You can practice your operation and reaction speed. It'll be good for your future fights, hehe.

f \* ck, you're saying it as if it's true. Do you believe it yourself? "

"Haha, I don't believe you."

The demon engineer's HP was getting lower and lower.

Zhang Shan summoned the Panda bear. The lucky Panda bear was about to appear again.

He hoped that it would bring them good luck.

It didn't take long for them to empty the demonic engineer's HP.

Zhang Shan quickly controlled the Panda ball to move forward. He looked at the time and used a combo skill.

The Panda ball waved its little palm and slapped down seven times, directly blowing up the demon engineer.

&Lt; system announcement: congratulations to six-pipe Bodhisattva, heart moves, and a little fairy for successfully killing the demonic engineer. &Gt;

Skill point +1, medal +100.

&Lt; system announcement: congratulations to six-barreled Bodhisattva, heart moves, and a little fairy. They have successfully cleared the demon subduing platform instance dungeon's fourth level (normal difficulty). &Gt;

Skill point +1, medal +100.

There were two consecutive announcements, one for the first kill of a BOSS and the other for the first clear of the dungeon.

This dungeon was worth it.

Even though Zhang Shan himself did not lack skill points.

He couldn't even find a good skill book to learn.

Until now, Zhang Shan still had a few skill points.

This time, another two skill points entered his account, and he had almost saved up to ten skill points.

however, even if zhang shan did not lack skill points, it did not mean that others did not.

The members of the team still needed skill points.

They were not like Zhang Shan.

He didn't even need to use skills when fighting and killing monsters. He relied on his passive skills to survive.

no matter if it was fighting or farming monsters, his friends had to keep switching their skills.

Only with more skills would there be combat power.

So, to them, skill points were never enough. No matter how many skill points they had, they would never mind.

After seeing the system announcement, little fairy laughed.

hahaha, I'm on the system announcement again. I've shown my face in front of all the players again, hehe.

"Look at how smug you are. If I hadn't been blown up by the mine, you wouldn't have been in this."

Wind cloud blade, who was lying on the ground, said gloomily.

that's true. Thanks to the demon engineer, you're really a smart little brat. You knew that I had to knock you down first, so you helped me, hehe.

One of the little goblin sneered.

#### Chapter 423 The engineering cloak and the fool's bomb

After the announcement that Zhang Shan and the rest had defeated the demon race engineer and cleared the demon-suppressing dais 'fourth level instance was released.

The other players in the game were already numb.

Most of the players were still struggling to clear the third floor.

Zhang Shan and the rest had already cleared the fourth level of the dungeon, leaving everyone far behind.

The players were filled with envy and jealousy, and could only vent it on the world Channel.

the world channel:

"Six-barreled Bodhisattva has cleared the dungeon. The demon-subduing stand's fourth floor? That's too fierce."

what's so amazing about it? isn't this a basic operation for a Big Shot? "

that's right. They've reached level 40, so they naturally have to clear the fourth floor.

the difference is too great. I'm only at level 32, but six-barreled Bodhisattva is already at level 44.

holy sh \* t, a level 32 boss is so terrifying. I'm only level 31.

"F \* ck, didn't they say that the higher the level, the slower the upgrade? Why did six-barreled Bodhisattva's speed of leveling up never slow down?"

why don't you take a look at what equipment they have? you have to kill them more than ten times, while they can kill them instantly. How can you compare? "

" the gap is getting bigger and bigger. this game is boring. i really want to give up. "

"Don't take it too seriously. After all, there's only one six-barreled Bodhisattva. The other players are pretty normal."

that's true. I'm just a salted fish player anyway. I'm just playing around.

"I suddenly thought of a question. How many people did they clear the instance together? Aren't there only five people on the level leaderboard who have reached level 40?"

"then there'll be at most five people."

"F \* ck, five people can clear the fourth floor? if a 50-man team like me can't even clear the third floor, am i trash?"

"Don't doubt yourself, you're trash, hehe."

what are you saying? there are so many players who haven't cleared the third floor yet. Are you telling me that they're all useless? "

"Of course, they're all trash, hehe."

"F \* ck, are there any brothers from the country of Zhao? let's go and clear the dungeon together. We must clear the third floor of the dungeon today."

"haha, i wish you success."

After the Nephilim engineer was blown up, everyone's spirits were relaxed.

He no longer had to run around to avoid those damn landmines.

"Brother Guan, quickly check if anything good dropped."

"What good things can there be? The Nephilim engineer is just a normal red BOSS. At most, he will drop two red equipment."

that's not for sure. Maybe we'll be so lucky that we'll explode.

"Don't think too much about it. We're here to clear the dungeon as a routine to get some experience and sell some trash equipment. If you want to get good items, you still have to find a real BOSS to fight."

"Damn it, can't I even look forward to it?"

"Alright, everyone has the right to dream. Sorry for the disturbance. Hehe."

Zhang Shan did not care about his friends 'nonsensical behavior.

He opened his backpack and checked the items that the demonic engineer had dropped.

Zhang Shan looked at the items in his backpack and could not help but be overjoyed.

He did not expect the Nephilim engineer, as a normal red BOSS, to drop such good items.

This was a good deal.

the demonic engineers had dropped two red equipment and one red material.

It also dropped two additional items.

A level 50 purple cape and an engineering recipe.

They were all good things.

Although these two items were far from being comparable to the divine weapon mission items, they were also not comparable to the ultimate skill book.

but it was also a rare good thing.

Moreover, under normal circumstances, such things could not be bought even if one wanted to.

Let's take the purple cape for example.

even though it was still miles away from zhang shan's king's cape.

However, there weren't many purple cloaks in the game.

The supply was in short supply.

The purple capes that others obtained were either kept for their own use or traded to acquaintances.

Almost none of them were sold.

Otherwise, there would be so many big shots in the Guild.

Even now, they were still wearing blue cloaks.

...

It was because he didn't have one.

Even if they had a lot of gold coins, they couldn't buy a purple cape.

no one sold this thing at all.

They had never seen anyone selling purple cloaks in an auction.

It could be seen how difficult it was to play this game.

As for the engineering blueprint ...

It was a level 4 engineering blueprint.

It was just right for Zhang Shan to use.

He had already learned the fire god Cannon's blueprint.

As long as he could get another level 4 blueprint ...

He would be able to raise his engineering to a level 5 Grandmaster.

...

moreover, the product produced by this engineering blueprint ...

Zhang Shan felt that he should be very rich.

As long as he could produce the product, it would be in high demand.

It was a blueprint for making a fool's bomb.

It was the kind of bomb that the demon engineers had thrown out to attack Zhang Shan.

The bomb's damage was extremely high.

[ fool's bomb manufacturing blueprint: a blueprint for making a fool's bomb. ] The fool's bomb was easy to use. After it was thrown, it would deal 100000 damage to all targets within the range.

Damage can not be stacked, effective range is ten yards, requirement: Level 4 engineering.

This fool's bomb was really awesome.

Although it was not of much use to Zhang Shan, his own attack power was already very high.

there was no need for the fool's bomb.

However, the other players' attack power was not high.

The fool's bomb's AoE damage of 100000 was simply irresistible to them.

Whether it was for farming monsters or for fighting.

It was simply a divine weapon.

Of course, the fool's bomb could only be said to be a one-time use artifact.

It was gone after he threw it out.

He wanted to use the fool's bomb to make a big impact.

They had to have enough of them.

Zhang looked at the materials needed to make the fool's bomb.

Other than the purple material, the other materials were easy to find and not too expensive.

It was very suitable for mass production.

the only uncertainty was that he did not know how many bombs he could make in one go.

If he could only make one bomb at a time, there would be no point.

in that case, the price of the fool bomb would be very high.

only then would zhang shan be able to recoup his losses.

If he could produce multiple bombs at once, that was.

That would be very promising.

in any case, this fool's bomb manufacturing blueprint was very valuable.

As for Zhang Shan, that was the case.

He saw Zhang Shan checking his backpack with a smile on his face.

Wind and cloud blade asked in surprise.

"Brother six steward, did the demon engineer drop something good?"

"There are good things. One for you and one for me."

after zhang shan finished speaking, he displayed the dropped items on the team channel.

"Haha, there really is a violet Cape. I'm really a God."

Windcloud blade could not help but laugh when he saw the purple cape.

When they were fighting the BOSS, he had joked that the Nephilim engineer might drop a purple cloak for them.

He didn't expect him to be right.

"Don't fight with me, the cloak is mine."

Windcloud blade hurriedly said.

in your dreams. Everyone can equip the cloak, so it must be distributed by rolling.

f \* ck, it can't be that the five of us are going to roll together, right? "

I won't be participating in the ROLL. I have the king's Cape, so I don't need it.

Under normal circumstances, Zhang Shan could have rolled for this purple cloak.

After all, he could also equip it.

However, they were all on the same side, so he didn't want to fight with them.

He didn't need it anyway.

Even if he rolled for it, he would sell it.

the three of you can roll for it. I don't need it either. I have the ant Queen's Cape, so I can use it for a long time.

It was rare for little fairy to not argue with wind and cloud blade.

She had given up and decided to roll for the purple cape.

&Nbsp; logically speaking, the fairy was completely qualified to ROLL.

The ant Queen's cloak she was wearing was level 40.

The purple cape that had just been dropped was level 50.

The equipment had a difference of ten levels, but the difference in attributes was huge.

The health points that a level 50 purple cape could provide were almost double that of a level 40 Cape.

The ant Queen's Cape could increase over 60000 HP.

Meanwhile, this level 50 purple cape had increased Shi Feng's HP by over 110000.

In any case, no matter who got the Cape, they could not equip it now.

He could only equip it after he reached level 50.

Of course, the little fairy could do the same. After she rolled it, she could save it and Exchange it later.

However, she still gave up.

This made Zhang Shan look at him in a new light.

zhang shan and the little fairy gave up on rolling for the cloak.

The remaining players were wind and cloud blade, following heart, and boss Wu. The three of them would roll together.

it all depended on whose luck was better.

Zhang Shan took out his purple cloak and started the roll distribution mode.

The name of this cloak was also very interesting.

It was called the engineering cloak, which sounded weird.

However, it didn't matter what the cloak's name was.

As long as the amount of HP added was enough, everyone would like it.

This engineering cloak increased health points by more than 110000. Who would not like it?

If wind and cloud blade managed to ROLL for this cloak ...

when he reached level 50.

His HP was estimated to reach more than 200000.

With such a high HP, normal players wouldn't be able to kill him.

He could even tank the BOSS.

After Zhang Shan put on the cloak and started the roll mode.

Windcloud blade was the first to roll his die, 88 points.

The points were very high and very auspicious.

Unfortunately, with just a thought, he threw out 92 points and directly eliminated Windcloud blade.

Boss Wu threw the dice casually. It was 46 points.

Alright, this was just a plaything, so it could be ignored.

Following my heart gave the highest points, so this engineering Cape was his.

Windcloud blade looked at heart moves with a resentful gaze.

He was very unhappy. There were only three of them who rolled and they still did not get it.

Just a little bit more.

Windcloud blade was simply depressed to death.

However, the result was like this. The die he threw had to be acknowledged.

Zhang Shan assigned the engineering cloak to moving heart.

The second item was the fool's bomb blueprint.

There was nothing to say about this. Zhang Shan directly assigned it to himself.

Out of the five of them, he was the only one who had learned engineering.

The others didn't need this at all.

"Brother Guan, when you make the bombs, remember to give me a few to play with."

"good."

Zhang Shan readily agreed to the little fairy's request.

This wasn't a big deal. He planned to mass-produce anyway, so it didn't matter if he gave her a few bombs to play with.

After the Cape and blueprint were distributed, there were only two red equipment and red materials left.

there was nothing to share.

the equipment was distributed according to profession, and zhang shan kept the materials for himself.

He was now a level 4 master engineer, so he needed a lot of purple materials.

By the time he reached the master engineer level, he would probably need a lot of red materials.

Just thinking about it gave him a headache. He had to save it slowly.

"Now that we're done with the dungeon, are we still going to farm monsters?"

“What’s going on?” “heart moves” asked everyone.

I won’t be going. It’s too late now. I’m going offline to sleep.

Boss Wu continued.

He would usually log off before 12 o’clock every day.

it was already past 11 o’clock, and it was time for him to go offline.

“You guys go ahead. I’ll try and see if I can make a batch of fool’s bombs.”

After he got the fool’s bomb blueprint, he couldn’t wait to try it out.

If he could produce it, he would put it on the auction house to test the waters.

Let’s see what the market demand is like.

If it sold well, he would make the best use of his time to make more and earn a wave of gold coins.

Although he was not short of money now, no one would complain about having more money.

Moreover, the engineering process did not take too much time.

As long as he had the materials, it would only take a few minutes to produce a product.

It would be done very quickly.

After returning to Dangyang city.

Boss Wu went offline and left, while the other three friends went to Gerri wilderness to farm monsters.

Zhang Shan ran to the auction house and bought a large amount of materials.

it was his first time making a fool’s bomb.

In the beginning, he would definitely fail continuously.

He had to prepare more materials.

in any case, apart from the purple material, the rest of the materials were not expensive.

In one breath, Zhang Shan had bought more than a thousand sets of materials to make the fool’s bomb from the auction house.

He had wanted to buy some materials for the six-barreled Vulcan.

After all, his fire god Cannon’s proficiency was not even at 20 points. He had to slowly increase it.

However, before the monster siege. zhang shan had already scanned through the auction house.

There was no stock in the auction house right now.

After buying the materials, Zhang Shan teleported to the Guild’s base.

Use your contribution points to enter the Guild workshop.

He came to the engineering control desk.

Zhang Shan placed a set of materials for the fool's bomb on the operating table.

a wisp of green smoke appeared. production failed.

This was a normal situation.

Every time he produced a new product, he would fail tens or hundreds of times.

Zhang Shan was already mentally prepared for failure.

In any case, he had prepared more than a thousand sets of materials, so he could do whatever he wanted.

He didn't believe that with these materials.

he still couldn't make a batch of fool's bombs.

Zhang Shan placed the second set of ingredients on the operating table.

Without a doubt, this was still a failure.

He placed the materials on the operating table again and again, but he failed again and again.

however, zhang shan still numbly placed the materials on the operating table.

He didn't know how many times he failed.

Suddenly, after he placed the materials on the operating table, a ray of light flashed.

A pile of round fool's bombs slowly appeared on the console.

Haha, he had finally succeeded once.

This was too difficult to handle.

he had failed at least a hundred times just now.

Other things were fine, but it was too costly.

although the other materials used to make the fool's bomb were not worth much.

However, purple materials were valuable.

A purple material would cost about 500 gold coins.

He had bought over a thousand sets of materials, and each set required a purple material.

Just these 1000 purple materials alone had cost him more than 500000 gold coins.

This wasn't learning a life profession, it was simply burning money.

However, for anything to be rewarded, one must first invest.

if he spent these gold coins, he would be able to earn them back in double later.

The production rate of these fool bombs was not bad.

There was a stack of bombs on the console. At a glance, there should be about ten.

at that time, he would put these fool's bombs up for auction at a price of 1000 gold coins each.

He could earn ten to twenty times the profit.

This was a unique business, and there shouldn't be anyone who had dropped the fool's bomb manufacturing blueprint yet.

As for selling the fool's bomb at 1000 gold coins each, was it too expensive?

This was not a problem at all.

Zhang Shan did not expect normal players to buy his bombs.

These fool bombs were sold to pay-to-win big shots.

1,000 gold coins for a bomb was not expensive at all.

If it was used to farm monsters, a fool's bomb would be enough to blow up a large area.

The efficiency of killing monsters was much higher than Zhang Shan's.

this was a fatal temptation for some players who were eager to level up.

If they weren't used to farm monsters, they would be used to fight.

That would be even more incredible.

the fool's bomb dealt 100000 damage. as long as it was thrown accurately, anyone would be instantly killed.

It was completely a trump card.

If it wasn't for the fact that the materials used to make the fool's bomb weren't expensive.

even zhang shan felt that selling the fool's bomb at 1000 gold coins per bomb was too cheap.

Even if they were sold for 10000 gold coins each, there would still be people who would buy them.

However, after some consideration, Zhang Shan still felt that he should sell it for 1000 gold coins.

He planned to win by quantity, mass-producing and selling them in bulk.

He had earned a lot.

Chapter 424 the second demon city

zhang shan took the fool's bomb from the console and kept it in his backpack.

He counted and found that there were exactly ten bombs.

Not bad, not bad. One production can produce ten bombs.

if he used up all the materials ...

He should be able to make thousands or tens of thousands of fool's bombs.

If one bomb was sold for 1000 gold coins.

Ten thousand bombs could be sold for ten million gold coins.

And the money he spent to buy the materials was at most 600000.

It was almost twenty times the profit.

This business was good. It was simply snatching money, and it felt great.

Zhang Shan continuously placed the materials on the operating table.

After his first successful production, he had a new set of equipment.

The subsequent production would be much smoother.

Even though he often failed in the beginning.

However, when his proficiency in making fool's bombs reached 50 points ...

He rarely failed.

Most of the time, it was a success.

after consuming more than 1000 sets of materials.

zhang shan looked at his backpack.

There were more than eleven thousand fool's bombs that he had just made.

zhang shan could not help but be amused.

It's alright. I'll make a batch when I'm free.

this was all money.

he would be a fool if he didn't earn this money.

Other than the demon-suppressing city, Zhang Shan had another way to earn money.

As he became more and more powerful in the game.

Zhang Shan felt that if he wanted to earn money now, it would be too easy.

all the materials had been consumed, and today's production was over.

Zhang Shan teleported to the auction house.

Ten fool's bombs were put up for auction in groups.

10,000 gold coins for a stack and 1000 gold coins for one.

If you're a fool with a lot of money, come quickly.

In the auction house, Zhang Shan had put up a total of 10000 fool's bombs.

He would keep the remaining 1000 or so bombs for himself.

I'll give some to my friends later.

He told them to bring some with them. Maybe they would come in handy at some time.

As for using the fool's bomb to farm monsters?

Zhang Shan had no such thoughts.

Although these fool's bombs were made by him.

He only needed to pay for the materials, which didn't seem expensive and didn't cost much.

However, everyone had to see another problem.

that was, zhang shan's current level was very high.

To level up, he needed a huge amount of experience, which meant that he had to kill countless monsters.

If he used the fool's bomb to farm monsters ...

Without tens of thousands of bombs, he probably wouldn't even be able to level up.

This consumption was a Little Big.

no matter how rich he was, he couldn't afford such a consumption rate.

moreover, their current farming speed was not slow.

Even if it couldn't be compared, the speed of killing monsters with the fool's bomb shouldn't be too far off.

Furthermore, Zhang Shan did not have too high of a requirement for his level.

He was ahead of the other players by more than four or five levels.

even if he rested for half a month and didn't kill any monsters.

...

Other than his companions, no one else could catch up to his level.

Therefore, they didn't need to use the fool's bomb to level up.

as long as they continued to farm monsters, it would be fine.

After putting the fool's bomb up for auction, he just sat there and waited for the money to be collected.

Zhang Shan did not announce it on the world Channel.

Recently, he seemed to have been a little too ruthless when it came to scamming sheep's wool. It was a little demeaning.

It would be better to keep a low profile.

otherwise, being called a black-hearted profiteer every day would also make him very unhappy.

As for the fool bomb that he had put up for auction, would no one notice it and cause it to be unsold?

Zhang Shan did not have to worry about this problem at all.

There were so many players in the game.

...

As long as something good appeared in the auction house, how could it not be discovered?

He didn't need to advertise by himself.

When the other players found out, there would naturally be people who would help him publicize for free.

After the fool's bomb was dealt with.

Zhang Shan looked at the time. It was only 11:30.

I'll go and farm some monsters first. I'll go offline and sleep at 12 am.

Zhang Shan teleported to the teleportation Hall. He wanted to go to the demon suppressing city to take a look.

It had been more than an hour since the monster attack. How was the situation of the demon suppression race?

Did a player teleport over?

Zhang Shan walked out of the teleportation Hall of the demon suppressing city.

The three fire god cannons outside the hall were still standing. They had not been destroyed.

From the looks of it, everyone knew that these things with six tubes were not to be trifled with.

To be honest, Zhang Shan was a little worried that someone would be reckless and come over to dismantle his fire god cannon.

These six-barrel Vulcan cannons only had 1000000 health points.

It was not difficult to tear it apart.

Of course, it would take a lot of people to do that.

it wasn't even enough for the three fire god cannons.

The fire god cannon outside the teleportation Hall was unscathed.

Zhang Shan was relieved.

As for the eleven fire god cannons on the city gate tower ...

He was even less worried.

With 11 fire god cannons standing together, anyone who dared to target them was truly courting death.

Even a boss would not be able to withstand the firepower of 11 fire god cannons, let alone players.

Even if thousands of people charged forward, they would not be able to withstand the firepower of eleven fire god cannons.

Zhang Shan teleported to the stone tablet of the city Lord's Manor.

he took a look at the teleportation fees he had received in the past hour.

After the monster siege event ended, he had withdrawn all the profits from the teleportation fee.

Now, all that was left was the profits from the last hour.

zhang shan looked at his earnings.

not bad, another million gold coins.

If a player was teleported over, Zhang Shan would receive 100 gold coins.

They had been clearing the dungeon just now. In the past hour or so, more than 10000 players had been teleported to the demon-suppressing city.

Although, compared to the entire game, there were two to three hundred million players.

over 10,000 people were simply a drizzle.

however, to zhang shan, this number of people was more than enough.

In just over an hour, he had already earned over a million gold coins. It was simply like picking up money.

No, even picking up money wasn't as convenient as him.

Although it was possible that they had just finished the monster attack on the city.

there were many curious players, so they were teleported over to take a look.

There probably weren't so many people here usually.

However, it was already very good.

As the level of the players increased, the popularity of the demon-suppressing city would only grow.

He was a real money tree.

after the gold coins were extracted.

Zhang Shan used the positioning ball to teleport to the Geri wilderness.

I'll kill some monsters first, then go to sleep.

According to the team's information, Zhang Shan rode his horse and found his friends who were farming monsters.

Seeing Zhang Shan coming over, the little fairy stretched out her hand and asked.

"Brother Guan, have you made the bomb yet?"

"It's done."

After Zhang Shan finished speaking, he handed over 100 fool's bombs to the little fairy.

At the same time, he also gave wind and cloud blade and heart moves with me a hundred bombs each.

Let them keep it. Maybe they could use it at some time.

after the little fairy received the fool's bomb that zhang shan had traded to her.

He quickly took out one and threw it at the herd of wildebeest.

With a loud boom, a large number of wildebeest fell to the ground.

The health of the wildebeest in the Gerri wilderness was less than 40000.

The fool's bomb, on the other hand, dealt 100000 damage.

Of course, killing monsters instantly was a piece of cake.

Besides, the fool's bomb dealt AoE damage.

The damage range was not too large, only five yards.

However, this was already very strong.

That is, if the number of monsters is dense enough.

A fool's bomb could kill more than 20 wildebeest.

this farming speed was even faster than zhang shan's.

It was just a little too costly.

haha, this is fun. I'll have another one.

The little fairy was having a lot of fun, and she threw the bombs in her hands one after another.

Large groups of wildebeest were blown to the ground by her.

"It's quite fun. I'll try throwing a few bombs."

Seeing that little fairy was having a good time, Windcloud blade also took out his fool's bomb.

He kept throwing them at the herd of wildebeest.

he saw that these two guys were so playful.

Zhang Shan was speechless.

Did he not treat money as money?

These fools were all money.

If he were to put it up for auction, it would be worth a thousand gold coins each.

even if he were to make it himself, it would still cost him materials.

How could he waste it like this?

“You guys just have to play for a while, don’t waste it.”

looking at wind and cloud blade and little fairy, the two of them were throwing bombs non-stop. zhang shan quickly stopped them.

These fool bombs were left for them to defend themselves.

He could still rely on these bombs to save his life.

If they were thrown around like this, what was there to defend against?

“Brother Liu Guan, these bombs are really useful. If you use them to kill monsters, the experience points will fly.”

After throwing out a few bombs, wind cloud blade said to Zhang Shan as if he had not had enough.

” do you think it’s free? it’s a level 4 engineering product, and each set of materials requires a purple material. it’s not cheap. ”

that’s right. It’s a little extravagant to use it to farm monsters, but it can still be used in a fight. It’ll be a beautiful scene if rows of bombs are thrown over, hehe.

well, fool’s bombs are quite useful in a fight. Keep the bombs in your hands for now. If there’s a chaotic battle in the future, they’ll be very effective.

At 12 o’clock in the evening, everyone went offline to sleep.

For the next ten days or so, they farmed monsters in the Gerri wasteland every day.

these few days, zhang shan had leveled up two more times, and his level had risen to 46.

however, if he wanted to reach level 50, it would probably take about a month.

Anyway, he was not in a hurry. He could upgrade slowly.

His level was so much higher than the others.

So far, other than the five of them.

The other players still had not reached level 40.

The highest level was only level 39.

However, there were already quite a few level 39 players.

in a day or two, there would probably be a lot of level 40 players.

These days, other than farming monsters, Zhang Shan had been busy.

He would also take some time every day to return to Dangyang city to make fool's bombs.

After learning how to make the fool's bomb, he had learned how to make the fool's bomb.

Zhang Shan was simply unlocking the password to his wealth.

The materials to make the fool's bomb were very easy to find.

every day, he would go to the auction house and buy a thousand sets of materials.

he made nearly 10000 fool's bombs and put them up for auction.

The fool's bomb was very popular in the auction house.

now, every time he put it up for auction, it would be sold out very quickly.

there were even people who became secondhand dealers.

He would bid for Zhang Shan's fool bomb and then sell it to other players at a higher price.

Even so, he did not raise the price.

He still put 10000 fool's bombs up for auction at the price of 1000 gold coins per bomb every day.

He wasn't afraid of other people's hype.

The more the others hyped it up, the more beneficial it was to him.

There was no other player who could make fool's bombs anyway.

This was his unique business.

as for selling so many fool bombs ...

Would someone use a fool's bomb against him one day?

Zhang Shan was not worried about this at all.

This was not a problem.

This was because there was a certain distance to throw the fool's bomb.

The players could not throw the fool's bomb too far away.

At most, he could only throw out half of Zhang Shan's range.

With Zhang Shan's current damage output, how could he let someone get close to him and throw the fool's bomb on his head?

Besides, even if someone else threw a fool's bomb at him, he would still be a fool.

He wouldn't die from the explosion.

The fool's bomb only dealt 100000 damage.

Most importantly, the damage of the fool's bomb could not be stacked.

In other words, no matter how many bombs were exploding around him at the same time.

They could only hurt him once.

with zhang shan's hp of over 500000, this was not a problem at all.

Besides, he was the one who made the fool's bomb.

If it was more than bombs.

Who could compare to him?

If he spent some time, he could make tens of thousands of bombs at once.

Therefore, he was at ease and sold it boldly.

He sold 10000 fool's bombs every day.

These days, he had earned hundreds of millions of gold coins just by selling bombs.

Zhang Shan was like an arms dealer in the New World.

A walking money printing machine.

The key was that the other players still didn't know that he was the one who had made these fool's bombs.

Zhang Shan specially reminded his friends not to tell anyone about this.

This was very interesting.

The players were all guessing who had made these fool's bombs.

There were even a few large guilds that offered high prices to recruit him.

He wanted to recruit the player who made the fool's bomb into the Guild.

However, they could never guess it.

these fool's bombs were all made by zhang shan.

In everyone's eyes, Zhang Shan's strength was very fierce.

As for Zhang Shan's life profession, no one cared.

they did not expect that not only was zhang shan very strong, but he was also very strong.

Moreover, the level of the profession was also very high.

To be able to make a fool's bomb, this was an amazing engineering product.

One day, when they were farming monsters in the Gerri wasteland.

Suddenly, Windcloud blade shouted.

“F \* ck! Someone has found a new Demon City.”

“Where are you? Shouldn’t this kind of thing be kept a secret first? How did it get announced?”

zhang shan asked curiously.

When other people discovered a Demon City, shouldn’t they try to occupy it first?

how could he go around telling everyone?

” hehe, it’s not that they don’t want to occupy the city, but they can’t defeat the BOSS that guards the city. ”

“Who discovered the demon City? did they try?”

“I heard that a player from a small guild first discovered it. They tried but failed, so they sold the information to peerless.”

“The unparalleled gentleman took him there to try, but he couldn’t beat him either. Then, he teamed up with domineering aura to fight it. In the end, he caused too much of a commotion and it was announced. Hehe.”

f \* ck! Does that mean that peerless and Subjugator are working together to take down the demonic city? ”

After listening to wind and cloud blade’s words, Zhang Shan understood the whole story.

however, peerless guild and domineering aura guild were their arch-enemies.

This was especially true for Guild domineering aura. They had a huge grudge against Guild wind and cloud.

If they were attacking the demon City, Feng Yun realm would not be so indifferent.

It would be unreasonable if they didn’t cause some destruction.

When the monsters were attacking the city, Subjugator had even brought his men to cause trouble.

even though the tyrant king’s actions didn’t succeed.

Instead, he had given Zhang Shan a huge teleportation fee.

However, the two sides were sworn enemies. As long as they found an opportunity, they would definitely deal with the other party.

Last time, it was because of Guild tyrannical ambition that they came to cause trouble.

Only then did Zhang Shan place the three fire god cannons at the entrance of the teleportation Hall.

Otherwise, he would have installed the fire god cannon on the city gate tower or the city wall.

Three of his fire god cannons had been wasted due to the interference of the domineering King.

This time, it was Guild wind and cloud's turn to cause trouble for Guild Subjugator.

Who knows, they might even be able to take over the demon City.

Chapter 425 return in defeat

When he heard that Guild Subjugator and Guild peerless were attacking a Demon City, Zhang Shan could not sit still.

he had to go and cause a wave.

Thinking of this, Zhang Shan asked wind cloud blade.

"What did boss say? Are we going to get involved? Even if we can't seize the city, we can at least cause them some destruction."

"What the hell are you doing? do you know how far away the demon City they discovered is from here? If we set off now, we'll need to run for at least five days to get there."

if Subjugator and the others can defeat the bosses in the city, they would have finished the battle by the time we get there. However, I don't think they can defeat the bosses, hehe.

What?

Zhang Shan was depressed. This Map of Heaven's Gate was too big.

It would take days to go to any place that was further away.

What was he going to do? was he going to just watch helplessly?

If the domineering King were to take down the demon City, wouldn't that be very disgusting?

Zhang Shan was very unhappy.

However, he had no choice.

The distance was too far. No matter how unwilling he was, he couldn't run over in an instant.

no wonder zhang shan felt that the teleportation fees had increased a little too quickly these few days.

It turned out that a large number of members from Guild Subjugator and Guild peerless had teleported over.

Unfortunately, he had received the news too late.

If only he had gotten the news earlier.

He adjusted the teleportation fee.

Let's see how they're going to come over?

It was too late to say anything now.

The players from Guild Subjugator and Guild peerless had arrived.

If he were to increase the teleportation fee at this time ...

That would be equivalent to helping them.

It would reduce the number of competitors for Guild tyrannical ambition.

“Do you think they can take down a Demon City?”

Zhang Shan asked wind cloud blade.

The bosses in the demon cities were still very powerful, especially the last Big Boss, the demon City Lord.

That was a BOSS with a real name.

People who didn't have a few skills definitely couldn't beat them.

Back then, the five of them could blow up the demon City Lord.

It was because of the mission that the demon City Lord was in a state of severe injury and weakness.

The damage they dealt was multiplied.

At the end of the fight, they could deal ten times the damage.

There was a more crucial point.

They were the ones who had dropped a silence scroll.

The general Demon City Lord was silent for five minutes.

If not for these two reasons.

They definitely wouldn't be able to deal with the demon City Lord.

This time, the demonic city that Subjugator and the others were attacking should not have a mission, right?

For example, the silence scroll was an extremely rare item. Even the domineering Guild should not have it, right?

If there was no mission, and he couldn't silence the demon City Lord.

In that case, the demon City Lord would probably be a complete real name BOSS.

If they wanted to take on a real-name BOSS, it would be a test of the team's strength.

Would domineering aura and peerless have the strength to do so?

Zhang Shan was not sure, so he wanted to hear wind and cloud blade's opinion.

“Don't worry, they won't be able to win. Do you know what level the monsters in the demon City are? The guards at the city gate are all level 70. It would be a miracle if they could defeat them.”

“Holy sh \* t, the second Demon City is in a level 70 monster area? what kind of talent is this, running to such a far place?”

According to Windcloud blade, the demons guarding the city were level 70 monsters.

Zhang Shan was relieved.

It was impossible for domineering aura and peerless to defeat them.

Zhang Shan had no idea how powerful a level 70 real name BOSS was.

...

However, just look at Magnus.

Magnus was a level 60 BOSS with a real name.

It was already outrageously fierce.

It was easy to imagine that a level 70 real name BOSS would definitely have such a skill.

Moreover, there was not a single level 40 player in the entire Guild.

If they wanted to fight a level 70 real name BOSS, they were simply courting death.

The BOSS's level suppression was enough to make them cry.

Not to mention the domineering aura Guild, even if the wind and cloud Guild had Zhang Shan, they would not be able to beat a level 70 real name BOSS.

he really didn't know where the domineering king's confidence came from, to dare to run so far to court death.

“Don't they know how powerful a level 70 BOSS is? Why are you still running to your death in vain?”

Zhang Shan found it strange. He knew that the monsters in the demon City were level 70.

...

In that case, the BOSS's level could only be high, not low. So why did the domineering King still run over?

This didn't make sense.

“Haha, they don't know that there's a real-name BOSS in the demon City. other than us, no one else has ever attacked a demon city.”

“This is going to be a good show, hehe.”

when the news of the second demon race's city was spread out ...

The entire game was boiling.

Countless players who thought that they were strong teleported to demon suppression city and ran toward the demon City.

The other major guilds also organized their forces and marched into the demon cities.

Even though domineering aura and peerless Guild were one step ahead of them ...

However, no one was willing to give up.

Perhaps they would be able to arrive before the domineering King took down the city?

Everyone had the mentality of getting lucky.

He hoped that he would be one of those lucky people like Zhang Shan.

The title of city Lord was simply too attractive.

Just like Zhang Shan.

The Lord of the demon-suppressing city sounded so domineering.

Although the title of city Lord didn't have any attribute bonuses, it was still a title.

However, after Zhang Shan had taken down the city and completed the monster siege, he had become a monster.

In total, he was rewarded with 2000 points of all attributes.

This reward was very tempting, and no one could resist it.

In contrast to the major guilds, they were marching towards the demon cities.

On the other hand, the wind cloud Guild was very calm.

Feng Yun realm did not say anything so if anyone else wanted to go, they could only go alone.

Without the strength of a Guild and relying on individual strength, it was obviously meaningless even if they ran over.

Actually, Feng Yun realm also wanted to be the city Lord.

However, after hearing that the guards of the demon City were all level 70 monsters ...

He dispelled the idea.

He simply couldn't win.

Feng Yun realm also knew that the demon City Lord was a BOSS with a real name.

They couldn't beat a level 70 or higher real name BOSS.

Running over would be a waste of time.

The wind cloud Guild sat on the mountain and watched the Tigers fight.

The other guilds in the game, on the other hand, were like moths darting into the fire, continuously advancing towards the demon City.

Before they reached the demon City, the road was filled with blood.

Many people started fighting on the way.

The great commotion lasted for less than half a day.

Some people discovered the domineering King's figure in LAN Tian city.

Slowly, everyone found out.

Both Guild Subjugator and Guild peerless had failed.

They couldn't take down the demon City and returned in defeat.

Many of the players from the domineering aura Guild and the peerless Guild were killed by the BOSS in the demonic city and sent back to the city.

The other players who had yet to reach the demon City did not give up after hearing the news.

They continued to run toward the demon City.

Five days later, after all kinds of attempts, none of the forces were able to take down the demon City.

In fact, they had not even fought the first red boss in the city.

A level 70 red boss, even if it was just a normal red boss, was still very powerful.

Although there were many players in the Nephilim race's city, they still could not do anything to the boss.

The commotion gradually died down.

Although no one had taken down a Demon City, the discussion was still very heated.

everyone was very curious. how did zhang shan and the rest attack the demon city?

One had to know that Zhang Shan and the rest had only had five people.

And this time, there were hundreds of thousands of players who ran to the demon City.

There were so many of them, but they still couldn't handle it.

Why could Zhang Shan and the five of them settle it?

The world Channel:

"F \* ck, you wasted five to six days of my time."

"Who let you go over? you must be crazy trying to be the city Lord, hehe."

who would have known that the BOSS in the demon City would be so powerful? "

" brother, you're already very impressive. you actually saw a BOSS in the city. i couldn't even defeat the guards at the city gate. "

it's too f \* cking difficult. A level 70 BOSS, is this something that players can deal with? "

sigh, I really wonder how six-barreled Bodhisattva and the others defeated the BOSS.

this is different. Most of the monsters around the town are level 50. I guess the BOSS in the city was also level 50. It's not like the current Nephilim race's city, where all the bosses are level 70."

f \* ck, all the good luck was taken by six-barreled Bodhisattva. Why is it that the cities he found are so easy to defeat, while we can only find such abnormal demon cities? "

"This Demon City isn't easy to fight, so let's find the next one. There will always be a simple one."

I'm afraid you're thinking too much. If there were any, they would have been found long ago. The deeper you go into the map, the higher the level of the monsters.

"Is this the only Demon City we can attack? Then, when will we be able to defeat them?"

at least level 50. Otherwise, the boss's level suppression is too strong.

yeah, I can only deal a dozen points of damage to a level 70 city guard.

sigh, I wonder who will benefit from this Demon City? "

"It doesn't matter who takes it, I can't win anyway."

just don't let six-barreled Bodhisattva take it again. That black-hearted fellow is too black-hearted, charging such a high teleportation fee.

I'm afraid I'll have to disappoint you. If we're talking about who's most likely to take down the demon City, it's probably still six-legged Bodhisattva. After all, he has the highest level and the best equipment.

"don't worry, the other powers won't let six-footed bodhisattva get what he wants. they'll definitely arrange for people to guard the city."

what's the point of guarding it? the demon City is so far away. Will they be able to make it in time when they see six-pipe Bodhisattva attack? "

"This isn't a problem for us to worry about. Let the big guilds worry about it, hehe."

the commotion at the demon city gradually died down.

In the wind and cloud Guild, other than a few players who ran over to join in the fun.

the others were quietly farming monsters in the gerri wilderness.

zhang shan did not participate in the excitement that had lasted for five to six days.

But he had earned money.

So many people were going to the demon City.

They were all teleported to the demon-suppressing city first.

Hundreds of thousands of people had been teleported over, which had allowed him to earn a small sum of money.

While Zhang Shan was farming monsters, he suddenly received a call from Feng Yun realm.

"Brother Liu Guan, do you think we can beat a level 70 boss?"

Upon hearing Feng Yun realm's question, Zhang Shan knew that he had not given up.

He still wanted to be the city Lord.

However, they really couldn't beat him now.

If it was just a normal red boss.

Even if it was a level 70 one, Zhang Shan could still try.

However, the demon City Lord was a BOSS with a real name.

Zhang Shan did not even want to try. It was a waste of time.

If he had the time, he might as well focus on farming monsters and leveling up.

"If we can't beat them, we'll wait for a month. When I reach level 50, I'll go and try."

zhang shan replied to feng yun realm.

It wasn't that he didn't want to go, but he really didn't want to waste time.

Running to such a far place to do something that was destined to fail, wasn't that just looking for trouble?

However, when he reached level 50 ...

he could still give it a try.

After all, after reaching rank 50.

Zhang Shan's three divine weapons could be unsealed again.

His strength would be greatly improved.

With the help of his teammates, he should be able to take on a level 70 real name BOSS.

Most importantly, after he reached level 50.

The BOSS's level suppression on him would be greatly reduced.

Zhang Shan would be able to maximize the effect of his damage.

"Okay, then we'll talk about it after you reach level 50."

feng yun realm knew what zhang shan meant.

He also knew that attacking The Fiend race's city now was too much of a stretch.

Even though Zhang Shan was very strong.

However, he was the only one who was strong.

the strength of the other members of the guild was too far away from zhang shan.

When dealing with a powerful BOSS, other people basically couldn't be of much use.

The BOSS had to be tanked by Zhang Shan, and the damage output had to be dealt by Zhang Shan.

If everyone's level increased a little after a while.

They would be of some use when fighting the BOSS.

after all, a level 70 real name boss was no laughing matter. it would definitely be more powerful than they could imagine.

A new Demon City was discovered.

However, in the entire game, there was not a single force that could take control of this city.

it had to be said that this was a very depressing piece of news.

however, with pressure comes motivation.

the entire game was unexpectedly calm.

In the past, there would be all sorts of chaotic fighting and slashing in The Map of Heaven's Gate.

he seemed to have disappeared for no reason recently.

Almost everyone was trying their best to kill monsters and level up.

as long as he was online, he would kill monsters and not do anything else.

Even the number of people who went out of their way to find bosses had decreased significantly.

Everyone seemed to be focused on killing the small monsters. No one was even fighting the BOSS.

However, the appearance of a system announcement broke the temporary peace.

[ system announcement: the development of the human race has attracted the attention of the demon gods. ] The demon God general sent his generals to attack the human cities.

For more details, please pay attention to the official website announcement.

Hearing the system announcement, Zhang Shan was a little surprised.

"huh? is there another monster attack?"

it's about time. Didn't the official website announce that there would be a monster attack once a month? what's the date again? "

"Number five."

that's right. The last monster attack was on the 6th of November, so tomorrow is the event. That's right.

I'll go to the official website and see if there are any changes to the event this time.

"change my ass, didn't you just change it last time? it couldn't be that after the update, everyone would only be allowed to play it once, and the new way of playing it would be changed, right? Wouldn't that be too much of a joke?"

"It's different now. There's a demon-suppressing city. Didn't the announcement say that the demons were preparing to attack human cities? I want to see if the demon-suppressing city will be attacked again."

Zhang Shan said, a little worried.

The demon-suppressing city was a player's city built by Zhang Shan.

However, it was still a human city.

The notice just now said that the demons would attack a human city.

Would the demon-suppressing city also be attacked?

Zhang Shan was worried about this.

When he had just built the city, he had guarded the demon-suppressing city once.

In the future, every time there was a monster attack, there would be a huge difference.

If the demon-suppressing city was under attack ...

That would affect them. They had a lot of energy.

They could only arrange people to defend the demon-suppressing city.

They did not have the time to fight the bosses outside the NPC cities.

"F \* ck, I really didn't think of that."

"I don't think so. The monster attacks in NPC cities are fought outside the city. But the demon-suppressing city is defending on the city wall. These are two completely different ways of playing, so they shouldn't be carried out at the same time."

There's no need to guess blindly. Just look at the specific announcement on the official website and you'll know.

#### Chapter 426 Passive skill, life concentration

As soon as he saw the system announcement of the monster attack event, he was stunned.

Zhang Shan was a little worried about the demon-suppressing city.

He wasn't worried about not being able to defend the city.

The Wind and Cloud Guild was able to defend the demon-suppression city last time.

Forget it, if there were a few more monster attacks.

They could also defend it.

However, this would hold them back. The Wind and Cloud Guild had a lot of energy.

Moreover, the city belonged to him alone, not the wind and cloud Guild.

They couldn't possibly drag all their guild members into the city defense every time.

It wasn't good to keep doing this.

There was another point.

The last time the monsters attacked the city.

Those tall and big demon siege beasts.

With a casual slap, he could create a huge hole in the city wall.

If there was an event like this every month ...

The teleportation fee he had earned in the demon-suppressing city ...

It was probably not enough to build the city wall.

wasn't this nonsense?

I hope that this monster attack will be a good one.

It would be better if he didn't bring it to the demon-suppressing city.

Zhang Shan was farming monsters while opening the official website.

He found the announcement about the monster attack.

The content at the front was no different from the previous announcement.

There was only one additional explanation.

It was about player cities.

During the monster siege.

outside the player's cities, there would also be a large number of demonic monsters.

However, these demons and monsters ...

It would be the same as the one in the NPC city.

They would not get close to the city walls.

When the demonic monsters reached the city wall, they would disappear.

The reason for the presence of an NPC city was because of the presence of an NPC Army. The infernal monsters did not dare to approach it.

The player cities were protected by the system.

Active demonic monsters would disappear when they were within 100 yards of the city.

Players can intercept demonic monsters outside the city.

Fighting a BOSS outside the city.

When he saw this message.

Zhang Shan heaved a long sigh of relief.

No matter what this setting was.

as long as the demonic monsters that attacked the city did not approach the city walls, it would be easy to handle.

he didn't even need to care.

He just had to focus on farming monsters in Dangyang city and fighting the boss.

If the boss in Dangyang city was not enough.

They could also send some of their people to fight the boss in demon-suppressing city.

This would depend on Feng Yun realm's arrangements.

It was fine as long as it didn't affect his demon-suppressing city.

The demonic monsters that attacked the city would not cause any damage to the demon-suppressing city.

To put it bluntly, ever since the last monster attack, the game had been updated.

The inside of the city was the world of humans, and the devil monsters could only wreak havoc outside the city.

meanwhile, if players wanted to farm monsters ...

They could only farm outside the city.

They could only fight bosses outside the city.

...

However, it would probably be the same as last time.

After the monster siege began.

The number of demons and monsters outside the city would be as many as rice.

Players without any strength or large teams.

They simply couldn't stand firm outside the city.

even though the demons outside the city were mostly small monsters, they were still too weak.

However, when the number of small monsters reached a certain level, they would be killed.

that power was also quite terrifying.

during the last monster siege event.

Many players had no sense of participation.

they could only stay in the city.

...

Otherwise, he would just go to other maps to farm monsters.

They didn't even dare to provoke the demonic monsters outside the city.

there were simply too many monsters.

Zhang Shan asked wind cloud blade after reading the announcement on the official website.

"What's the arrangement for this event? We are farming separately in Dangyang city and demon-suppressing city? Or should we concentrate our forces on one city and fight the BOSS?"

"I don't know yet. Let's wait for a while and see what the boss has to say."

"it's a good thing that the demonic monsters won't get close to the city wall during this monster attack. otherwise, we would have a lot of trouble here in the demon-suppressing city, hehe."

Zhang Shan said happily.

"What's there to be afraid of? even if the demons jump up the city walls to attack, we don't have to be afraid. we were able to defend it last time, so it's no problem now."

Windcloud blade said, not minding at all.

He said it so easily, but it turned out that he was not the city Lord.

Did he not know how much gold Zhang Shan had spent during the last monster attack?

it's possible, but it'll cost money. And it'll be too troublesome if they come every month.

"Hehe, that's true."

After the system announcement of the monster attack event came out.

In the game, it only caused some small waves.

After all, this game had been open for a long time.

Everyone had experienced many monster sieges.

The event announcement this time was not much different from the previous one.

At least, that was the case for the other players.

they weren't like zhang shan, who still had a demon-suppressing city.

Zhang Shan had to consider the problem of the demon-suppressing city.

The other players did not have such concerns.

they only needed to have events.

If there was an event, there would be a BOSS to fight.

Moreover, they could also receive treasure chests according to their contribution to the city defense.

Opening the box was also a happy thing for everyone.

perhaps, someone would get something good from the treasure chest and directly change their fate?

Although the possibility of this was very small, so small that it was almost negligible.

However, there were so many players in the game.

No matter how small the probability was, there would still be people who would encounter it.

For normal players.

Opening the treasure chest was their chance.

Even though normal players could only get the trashiest one-star Treasure chest.

Basically, he could only get trash items.

However, he could not rule out the possibility that some people would be particularly lucky.

Previously, someone had opened a 1-star Treasure chest and obtained items like scrolls and blueprints.

As long as it was a scroll or blueprint of good quality.

They could easily be sold for hundreds of thousands or even millions of gold coins.

For normal players, wasn't this a heaven-defying change of fate?

a while after the system announcement.

Feng Yun realm called out to Zhang Shan.

"Brother Liu Guan, are you going to defend the demon-suppressing city in this monster attack?"

zhang shan replied.

it's up to you. Anyway, the demons can't enter the city. It won't affect the demon-suppressing city.

As long as it didn't affect the demon-suppressing city, it didn't matter where they fought the boss.

They were going to fight the boss anyway.

of course, if they could defeat the bosses on both sides ...

That would definitely be better.

However, this wasn't easy to do.

During monster sieges, only small bosses would appear in the early stages.

These mini-bosses weren't worth much.

Only the final BOSS that appeared was the target that everyone had to deal with.

However, they did not have enough time.

It was impossible to say that after defeating the BOSS in Dangyang city.

He could also quickly reach the demon-suppressing city.

The big BOSS outside the demon-suppressing city was killed.

This was a very difficult thing to do.

Unless the wind and cloud Guild was split into two.

Both sides were fighting the BOSS.

However, in a monster siege event, the final BOSS would definitely be a BOSS with a real name.

Other than Zhang Shan, no one else in the Guild could take on a real name BOSS.

If they fought separately.

The people on Zhang Shan's team were still alright.

With Zhang Shan tanking the BOSS, the others did not feel any pressure. They just had to keep on dealing damage.

However, the other team was not easy to deal with.

If no one could withstand the BOSS's damage.

They could only rely on human lives.

the problem was that, most of the time, it didn't mean that they could kill a real name BOSS just by having more people.

Many real-name bosses were very powerful, and having more people didn't necessarily help.

Feng Yun realm must be in a dilemma.

the bosses in both cities had been defeated.

but he was also worried that something might go wrong.

It would be ridiculous if both of them missed after they separated.

"Then let's fight in Dangyang city. After all, Dangyang city is a huge city. It might be more valuable if a BOSS appears outside the city. If there's enough time, we'll go to demon suppression city after killing the BOSS in Dangyang city."

Feng Yun realm said to Zhang Shan after hesitating for a long time.

"Sure, you can make the arrangements."

Zhang Shan was not bothered by this question.

As long as it didn't harm his interests, he could arrange it however he wanted.

He was just there to listen and didn't want to waste his brain.

although the announcement of the monster attack event had been released ...

However, that would have to wait until eight o'clock the next night.

After reading the details of the announcement, everyone continued to kill monsters.

Even though it was only a day, it was impossible to level up.

However, they still had to kill the monsters.

Little by little, wouldn't he be able to level up slowly?

Zhang Shan and his friends continued to farm monsters in the Gerri wilderness.

He quickly fired the bullets.

The damage from the bullet kept bouncing around in the Horde of demonized wildebeest.

With one shot from Zhang Shan, twelve wildebeest fell to the ground.

The speed of killing monsters was extremely fast.

In the past, they had always gathered together to farm monsters.

From the moment Zhang Shan was forced into a passive position.

His farming speed had been greatly enhanced. Now, his farming speed was simply too fast.

If they were all gathered together.

The respawning speed of the monsters couldn't even keep up with his farming speed.

Therefore, he was always alone.

He was farming monsters next to his teammates.

It was fine as long as they were still within the range of sharing experience points.

After Zhang Shan had fired a shot.

He suddenly received a system prompt.

[ system notification: your passive King talent is activated by killing a demonized horned horse. You have obtained the passive skill, life concentration. ]

Haha, he finally got the wildebeest's passive skill.

He had been eyeing this life concentration skill for a long time.

even though he would definitely be able to get this passive skill.

After all, these enchanted wildebeest were level 55 monsters.

He was only level 46, so he could still grind here for a long time.

no matter how low the probability of triggering the talent was, it was just bad luck.

As long as he had enough time and the number of wildebeest he had defeated was enough.

Sooner or later, he would be able to get this life concentration skill.

However, it would be better if he could get this passive skill out earlier.

He had been grinding for more than half a month.

It was normal for him to only get life focus now.

It wasn't really luck.

However, it didn't matter. As long as the passive skill was activated, it would be fine.

let's see how this skill is.

Zhang Shan looked at his skills.

[ life concentration (passive): focus on life. when attacking, you can convert damage into health points. ]

The conversion ratio is 5%.

It's alright, but the ratio of blood-sucking is a little low.

It was lower than he had expected.

He had thought that after this passive skill was activated, the lifesteal effect would increase by 10%.

He didn't expect that it would only increase lifesteal by 5%.

However, 5% was still a lot.

The lifesteal effect on his equipment had a total of 13%.

[heavenly Eagle king's ring] increases lifesteal by 10%.

The necklace increases lifesteal effect by 3%.

In addition to this life concentration passive skill.

All of his lifesteal effects added up to 18%.

This was very impressive.

One had to know that his current attack power was extremely terrifying.

With his 60000 damage, a single attack could drain more than 10000 HP.

If the damage from the bullet was included, it would be even higher.

Moreover, his attack speed was extremely fast.

With his current lifesteal effect ...

It should be no problem for him to solo most of the red bosses.

He didn't even need to bring a support now.

He could solo most of the red bosses by himself.

Of course, it could only be a normal red boss.

He definitely couldn't beat a real name boss.

However, this was already very strong.

One had to know that in the entire game.

there were not many teams that could defeat a red boss.

Pay attention, that's for the team.

a boss that even a team of players couldn't defeat.

Zhang Shan could take them on alone.

It was an existence that broke the balance of the game.

It's just that strong, hehe.

If there was a chance in the future, he would find a red BOSS and try to solo it.

he was only at rank-46.

He was already this strong.

Perhaps when he reached level 100.

He could really defeat a Demon God in a one-on-one battle.

He was looking forward to it.

He was waiting for the day when he would become the most powerful super BOSS in the game, the demon God.

If he beat her up in a one-on-one fight.

He wondered what kind of expressions the other players would have.

It was interesting just thinking about it.

At night.

Feng Yun realm announced in the Guild channel the arrangements for tomorrow's monster attack.

The general content was:

Those who have time, try to stay online tomorrow night.

everyone will form a large team of fifty people.

After the monster siege began.

They formed their own formations and went out of Dangyang city to farm monsters.

As for the other details, Feng Yun realm did not explain.

Because there was no need.

They were all veterans.

Moreover, everyone had experienced many monster sieges.

It could be said that they were very familiar with each other.

wasn't it just farming monsters and fighting bosses?

It was just a change of location.

It was not like normal times, when they were farming monsters and fighting bosses in the wild maps.

Meanwhile, outside Dangyang city.

As for how to deal with conflicts with people outside the Guild ...

Feng Yun realm did not even mention it.

This kind of thing didn't need to be said at all.

if he met someone who was looking for death, he would just send him on his way.

Besides, the current wind and cloud Guild was not the same as it was in the beginning.

Right now, the wind and cloud Guild could be said to have a resounding reputation in the entire game.

Not only had they defeated the second-ranked Guild, domineering aura, many times, but they had also defeated the second-ranked Guild.

He had even led the players of Chu to win country Wars.

His influence was great.

Feng Yun realm was the only one who did not want to overdo it.

Otherwise, he could be like the domineering King now.

He could easily gather a troop of a million people in Chu country.

as long as feng yun realm did not seem to be keen on managing the guild.

it was fine as long as no one came looking for trouble.

As for the other matters, Feng Yun realm did not care at all.

That was to bring the brothers in the Guild to kill monsters and fight bosses.

but it was good.

Zhang Shan also did not like to show off.

If a Guild was too flamboyant, he wouldn't like it.

After all, it was just a game, so there was no need to be so ostentatious.

## Chapter 427 Black Wave

After dinner the next day, everyone killed some monsters while waiting for the monster attack to begin.

When it was half-past seven.

Zhang Shan said to his friends.

"I'll go back first. the monster attack is going to start soon, so I'll go back and make some bullets and fool's bombs."

"Alright, you can go back first. We'll play for a while more."

In the past, every time the monsters attacked the city, everyone would return to Dangyang city a long time before the event.

It was also better to prepare.

But now, everyone was a wily old fox.

To everyone, the monster attack was just killing monsters and bosses.

There was no need for any preparation.

He just had to go up and do it.

To be honest, if it wasn't for the fact that they were in the middle of a monster attack.

If there were a few bosses.

Everyone was no longer interested in this event.

He had played the same trick too many times.

It would be just like farming monsters, very boring.

of course, no matter how boring it was, everyone would try their best to participate in activities.

For many players.

Even if they couldn't defeat the boss, they could at least get a treasure chest as a reward.

As long as they were online, they would sign up for the event and earn some city defense contribution points.

Even if it was just a small monster, it would still be good.

That way, he would be able to receive the lowest reward, a one-star Treasure chest.

zhang shan stopped his farming.

He found a place without monsters and returned to the city.

After returning to Dangyang city.

Zhang Shan teleported to the auction house.

He swept up all the materials that he could use.

He bought 2000 sets of materials for making fool's bombs.

After buying the materials, Zhang Shan teleported to the Guild's base.

he used his guild contribution points to enter the guild workshop.

He started to produce various products.

Normal bullets, elementary burning bullets, and fool's bomb.

He had also made a few six-barrel Vulcan cannons.

He would use this period of time to collect materials.

zhang shan had obtained another ten sets of materials to make the six-barrel vulcan cannon.

If he had the materials, of course, he would need them. He had to make the product first.

Although the demon-suppressing city didn't seem to be facing too much of a threat now ...

For the time being, he didn't need to use the six-barrel fire god cannon.

However, who knew what the game would be like in the future?

Just like the monster attack this time.

he was shocked.

If he had not checked the event details on the official website ...

He had thought that the demons would destroy the demon-suppressing city again.

it made him worry for nothing.

If only he had enough six-barrel fire god cannons.

He wouldn't have to worry.

As long as there were enough fire god cannons ...

He could install six fire god cannons on the city walls of the demon-suppressing city.

if that was the case, no matter what kind of monster attack happened, the city would be destroyed.

He didn't need to worry.

There were a large number of fire god cannons protecting the city walls.

It was impossible for the demonic creatures to get close to the city wall.

...

Besides, even if it wasn't to make the six-fire divine cannon.

It was all for the sake of his engineering proficiency.

He had to make more fire god cannons.

His proficiency in making fool's bombs had already reached 100 points.

However, due to the lack of materials, the fire god Cannon's proficiency had not even reached 20 points.

He had to at least raise his fire god cannon crafting proficiency to 100 points.

In that case, he only needed to get another level 4 engineering blueprint.

He would be able to raise his engineering level to Level 5 Grandmaster.

Even if it was to increase his engineering level, he still had to make more fire god cannons.

Zhang Shan spent ten minutes in the Guild workshop.

He had made a large number of ordinary bullets and over a million elementary burning bullets.

...

in addition, 2000 sets of fool's bomb materials had been completely consumed.

He had made a total of 20000 bombs.

As for the six-barrel fire god cannon, eight of them had been successfully manufactured.

He would put these things in his backpack for now.

He would find a suitable place to set up the fire god cannon in demon-suppressing city.

as for the fool bomb ...

It will not be put up for auction today.

There will be a monster attack later.

I'll put it in my backpack first, just in case I need it later.

After all the items were made.

zhang shan left the guild workshop.

At this moment, many guild members had already gathered in the Guild residence.

As the monster attack approached ...

Everyone gradually returned to Dangyang city.

Feng Yun realm said in the Guild channel after a while.

“Everyone, form your own teams. After you’ve formed your teams, gather outside the East Gate. If we don’t return to the city at full speed, we won’t be able to register if it’s too late.”

to participate in the monster siege event, one had to register.

if one did not register, even if they killed monsters in the event, they would not be counted as city defense contribution.

If that was the case, he would not be able to obtain the treasure chest reward.

To participate in the monster siege event, the party leader had to sign up five minutes before the event, or they could sign up separately.

There were less than ten minutes left before the event began.

This was why Feng Yun realm urged the Guild members who had not returned to the city to hurry back.

In a short while, wind and cloud blade and the others also returned to Dangyang city.

Zhang Shan dismissed the team.

When the monster attack began, they would have to fight the big BOSS.

They had to form a big team.

Under such circumstances, Feng Yun realm was usually the one to form the team.

Not long after Zhang Shan disbanded the team.

Feng Yun realm pulled him into the party.

Now that everything was settled, all that was left was to wait for the event to begin.

“The current monster siege event. It was really boring. They were all small monsters and there were only a few bosses to fight. At the beginning of the game, there were bosses everywhere in the city. You can fight bosses until your hands are tired.”

“that’s normal. if there are bosses everywhere, wouldn’t the value of the items they drop depreciate?”

that can’t be. Even if there are bosses everywhere, not many people can beat them.

“How should I put it, if it’s like at the start of the game, dying in the city won’t cause you to lose experience. Everyone will definitely charge at the BOSS with all their might. As long as we have enough people, we can still kill a normal BOSS.”

“What’s the point of thinking so much? we’ll play the game however the game is set up. Unless you don’t want to play this game anymore, you can only follow the game’s settings.”

“That being said, there are too few bosses. in the previous monster attack, only four bosses appeared in dangyang city.”

it’s a little too few, but it doesn’t matter. If there are too many bosses, we won’t be able to kill them all. We just need to kill those within our capabilities.

that's right. We only managed to kill two of the four bosses in Dangyang city last time. The other two were killed by other players.

"I wonder how many bosses will appear this time. How many can we kill?"

"Don't think too much about it. Just get the last BOSS. The other bosses are up to you. if others want to fight, we won't snatch it. "

"You don't steal the BOSS?"

"We're not snatching, right? There's no point in snatching mini-bosses."

we won't fight for the normal bosses. We just need to kill the last boss with the real name.

Seeing everyone's discussion, Feng Yun realm said in the Guild channel.

A normal red boss was indeed not worth snatching.

things were different now.

In the past, other than them, no one else could handle a red boss.

The players 'strength was increasing very quickly.

In Dangyang city, other than them.

There must be other forces that could also deal with it now. It was just a normal red boss.

if they went to steal someone else's boss.

When they were fighting the boss later, there would also be a lot of people coming to cause trouble.

It was best not to do such things that would ruin his reputation.

Speaking of which, they were all players from the same city and faction.

There was no need to get into a conflict with others over a small profit.

They were not domineering Kings who wanted to monopolize everything.

Besides, it was just a normal red boss.

It was very difficult to get anything good. Usually, it would only drop two or three pieces of red equipment and a red material.

Normal players might treat these items as treasures, but they didn't care about them at all.

Why would he want to ruin his reputation for some things that he didn't like?

"I'm just afraid that if we don't go and steal other people's bosses, they will come and steal ours."

A guild member said worriedly.

"What's there to be afraid of? who dares to Rob us? Wouldn't that be courting death?"

"Don't worry, no one will dare to steal our BOSS."

” even if there are, it’s just a few players. they can’t cause any waves, so don’t worry about them. ”

that’s right. Other than us, there are no other major powers in Dangyang city.

“don’t think too much, just play well.”

When there were only five minutes left before the monster attack, the system notification sounded.

[ system notification: the ninth Demon God’s right general, Locke, will arrive at Dangyang city in five minutes with his troops. ]

“is everyone here? if you are, gather at the east gate.”

the monster attack was about to begin.

feng yun realm confirmed in the guild channel again.

Zhang Shan followed the group and arrived at the East Gate.

At this moment, there was already a dense crowd of people outside Dangyang city.

However, compared to the previous monster attack ...

This time, there were still a few players missing.

Many noob players might know this.

Even if they participated in the event, they would not be able to kill a single demon.

He might even die outside the city.

after all, after the event was updated, death would result in a loss of experience points.

After the monster attack began.

The number of demons and monsters outside the city would be terrifying.

Players with weak strength simply couldn’t stand firm.

There was no point for many newbie players to participate in monster sieges.

If the monster could not be killed, he might even lose a level.

They might as well not participate in the event and find a place to farm monsters.

Of course, even so ...

In the entire Dangyang city, there were still many players who participated in the monster attack.

After all, the player base was huge.

Someone had calculated that the total number of players in Dangyang city had already exceeded ten million.

With such a huge player base, even if there were five million people who did not participate in the event, there would be no way to stop them.

The remaining five million participants were already a lot.

Outside the East Gate of Dangyang city, the members of wind and cloud Guild formed a team of fifty people.

The ten teams formed small circular formations, forming a total of nearly two hundred small circular formations.

Outside the East Gate of Dangyang city, they lined up in rows, waiting for the arrival of the demonic monsters.

Not long after, the system notification rang again.

[ system notification: the ninth Demon God's right general Loke has led his troops to Dangyang city. Brave warriors, please fight bravely against the enemy. ]

the war drums beat and the horns sounded.

The monster siege event had officially begun.

Loke: " little ones, charge over and defeat the humans. Let these foolish lives fall into the arms of the demonic god.

"Impudent!"

In the city Lord's mansion, a loud shout rang out.

A general in golden armor turned into a beam of light and flew out of the city.

Outside Dangyang city, an earth-shattering battle instantly broke out. The sky and earth were turned upside down, and the sky was filled with multicolored light.

The monster sieges had started so many times.

The opening animation never changed.

Every time, it was Dangyang city's city Lord who rushed out of the city and intercepted the demon right general Locke.

perhaps they were not strong enough.

When they were strong enough to defeat the right general Loke ...

The city Lord probably wouldn't need to do anything.

perhaps the opening animation of the monster attack event would only change at that time.

after the city lord of dangyang city had intercepted the right general of the demon race, locke.

Endless black waves spread over from the distance.

"Get ready, the monster is coming."

Very quickly, the black wave of monsters crashed into the players 'formation.

The members of the wind cloud Guild had long formed a small circle formation.

they could still deal with the demon monsters that filled the sky.

Especially Zhang Shan's team.

facing countless demon monsters, they didn't feel any pressure at all.

The first wave of demonic monsters that charged over were the small monsters that they had killed at the beginning of the game.

Their levels weren't high, most of them were around level 20 or 30, and they were easy to deal with.

Zhang Shan fired a shot and 12 monsters fell to the ground.

No matter how many monsters there were, they could not get close to him.

His other teammates also dealt all kinds of damage.

the warriors in the front row held the monster back.

Everyone started happily farming monsters.

These Fiend monsters looked terrifying.

However, to them, it was no different from farming monsters.

There was no difficulty at all.

They were facing countless demons and monsters.

Although they had an easy time dealing with it, the same could not be said for the other players.

When the wave of monsters charged over.

many players fell to the ground in an instant.

They couldn't even withstand the first wave of monsters.

Many players had signed up for the event.

However, it was clear that they had overestimated their own strength and underestimated the monster's power.

"F \* ck, there are too many monsters."

you only know about it now? didn't you participate in the previous monster attack? "

"I did, but last time I wasn't even rank 30. Now I'm already rank 31. Who knew that even after the equipment update, we still can't hold off these small monsters."

"F \* ck, the event has just started and I'm already dead. What am I supposed to do? Is there any support that can come and save me?"

what are you thinking? there are monsters everywhere. How are they going to save you? "

I'm looking for a helper to resurrect you. I'll pay 500 gold coins.

brother, save it. You can't pass as a support. You should keep your 500 gold coins for yourself.

"Then what should we do? I don't want to drop a level."

"My condolences, hehe."

The monster siege had just begun.

The regional channel of the entire Dangyang city was in chaos.

Just now, when the demonic monsters charged over.

Many players fell to the ground in an instant.

Even though everyone was prepared.

however, they had still underestimated these demons.

Although the first wave of demonic monsters that charged over was not of a high level, it was still too early to think about it.

They were all level 20 to 30 monsters.

Normally, even the most ordinary player would be able to defeat these small monsters.

however, there were too many monsters.

If there was no team to protect each other.

They might face dozens of monsters at the same time.

how could those ordinary players with poor equipment withstand it?

Therefore, the event had just begun.

many players were offering rewards and calling for help on the dangyang city regional channel.

They called for the help of the resurrection skill to resurrect them.

Some even offered a bounty of 500 gold coins.

However, he couldn't find any help to revive him.

normally, with 500 gold coins for each resurrection, there would be a lot of support who would be willing to do it.

after all, it would take less than half a minute to get there if he just fell outside the city.

All he had to do was use his skill and he would be able to get 500 gold.

This money could not be any easier to earn.

Furthermore, there would not be any losses after the skill was used.

It was just a cooldown of a few minutes.

However, if he wanted to earn this money ...

The support had to be able to run over too.

Outside the city, there were many monsters.

If he did not have a strong ability to clear monsters.

Wanting to walk outside the city could practically be said to be difficult to take a single step.

Not to mention ordinary players.

Even if it was a guild leader.

If you leave the team.

They couldn't walk outside the city now.

Unless these players already had support teammates, they would not be able to survive.

It was impossible for anyone to go over and save them.

it wasn't that the support members of dangyang city didn't want to earn that bounty.

It was because the assistants simply couldn't do it.

They couldn't even get close to the players on the ground and couldn't save them even if they wanted to.

He didn't want to die on the way when he couldn't save her.

that would be a huge loss.

If it was any other time, he would have fallen outside the city.

Even if he were to fall at a place that was half an hour away from the city, he would still have to run.

there would also be a lot of support players who would be willing to rush over to save their teammates.

After all, no one would refuse something that could earn them money.

## Chapter 428 Demon race field officer

The monster siege had just begun.

Many players were beaten to the ground by the demonic monsters.

this was a very normal thing.

Not everyone could withstand the attack of a massive number of monsters.

However, the wind and cloud Guild was still fine.

Although he was human, he didn't pay attention to his positioning at the beginning.

defeated by the demonic monsters.

However, he was quickly revived by the support beside him.

After a period of time, the team had gotten used to each other.

Very few of them fell to the ground.

To the members of wind and cloud Guild, this monster siege event was nothing.

It seemed like they were only here to farm monsters.

And it was the kind that didn't give much experience points.

After all, the level of the first wave of demons was too low for them.

The experience points they gave were not even worth mentioning.

Even though these demons didn't give them much pressure.

however, these monsters didn't give much experience, let alone drop anything.

This made everyone very depressed.

Someone complained in the Guild channel.

these monster sieges are getting more and more boring. It's just a waste of time.

"brother, don't worry. the good show is coming."

"What good show can there be? It was just a few bosses. It would be more comfortable to farm monsters in the Gerri wasteland. At least when you're farming monsters in the Gerri wasteland, you don't need to do anything and you don't have to worry about being beaten by monsters."

"How can we compare killing monsters to an event? There are treasure chest rewards for monster sieges."

f \* ck, don't talk about those stupid treasure chests. I've opened them so many times, and they're all white material. They're only worth a few copper coins.

that's right. The most common items from 1-star Treasure chests are white-colored materials. They're Super Trash.

" that's because you're unlucky. i've seen people who have opened one-star treasure chests and obtained good items. "

"that's for others. there are so many players in the game. it's not strange to occasionally have one or two really good people."

"That's just a saying, who knows if it's true? There's no video to prove it. "

"It should be true."

"I'm just asking if you've ever gotten anything good."

f \* ck, the best item I got was a purple equipment, and I sold it for less than 100 gold coins.

" f \* ck, a purple equipment from a 1-star treasure chest. your luck is already heaven-defying, okay? "

sigh, these monsters are too weak. It's so boring to farm them.

"it's mainly because there's no fight to fight. if you were to fight with someone else, i'm afraid you'd be so happy that you'd fly, hehe."

haha, it's easy if you want to fight. We'll teleport to another country's city. There's a large number of people there, and we can kill them as we please.

"Don't you think you're retarded? if we teleport to another country's city, we won't be killing anyone we want, we'll be killing anyone we want."

"What's the difference between killing and being killed? It's just a fight anyway."

"Holy sh \* t, is your theory really godly? Who would be willing to be killed?"

"What's so strange about being killed? How could there be no deaths in a fight? Don't we lose tens of thousands of players every time we fight with the domineering aura?"

f \* ck, I know you're being unreasonable, but I don't know how to refute you.

"If I wanted to die, would I have to go to other countries? If you walk towards the monsters now, I'm sure you'll be killed in seconds."

stop talking nonsense. The monster is getting stronger. Be careful.

" f \* ck, this can't be. it's only been a few minutes and the monster has become stronger? "

"F \* ck, why are they all level 60 monsters?"

"F \* ck, I can't hold on any longer. Support, quickly heal me."

at the beginning of the monster siege.

Everyone was still farming monsters, and it was easy and enjoyable.

It was a pity that this devil didn't let everyone relax for long.

Less than ten minutes after the monster siege began ...

the monsters surrounding them had all become level 60 demon warriors.

Although, with their strength ...

it wasn't too difficult to deal with a level 60 demon warrior.

...

Back then, during the monster attack in the demon-suppressing city.

In the last half an hour.

The monsters that had jumped onto the wall were all level 60 demon Warriors.

At that time, everyone was still able to block all the demons and monsters.

But it was even more difficult now.

When they were in the demon-suppressing city, they still had the city walls to rely on.

Although there were many demon soldiers who had jumped onto the city wall, there were many of them.

But compared to now, it was far worse.

Right now, the entire area outside Dangyang city was densely packed with level 60 demon soldiers.

The scene was simply terrifying.

The wind and cloud Guild was still fine.

...

at the very least, the members of their guild were considered ordinary guild members.

Their equipment was not too bad either.

Everyone formed a formation to cover each other and reduce the defensive circle.

Even though there were many demon soldiers, they could still barely hold on.

The wind and cloud Guild's players could block these level 60 demonic Warriors.

However, the other players could not.

When the monsters outside the city turned into LV 60 demon fighters, they were all killed.

The players who were originally farming monsters outside the city.

Large numbers of them fell to the ground.

some players were the same as the wind and cloud guild.

Hundreds and thousands of people formed a defensive team.

However, they still couldn't stop the charge of the demon soldiers.

After all, most of the players were still around level 30.

And facing a level 60 demon warrior ...

They almost couldn't deal much damage.

If they couldn't quickly exterminate these demon soldiers, they would be killed.

The number of monsters that gathered around them would only increase.

Even in the beginning, these players could still hold on for a while.

However, they were certain that they wouldn't be able to last until the end.

When all the monsters outside the city had become level 60 demon soldiers, the entire city was in chaos.

Many players fell to the ground and left.

Many players could tell that the situation was not good.

it was just a large group of people covering each other.

They slowly retreated in the direction of the city gate.

they gradually retreated into dangyang city.

The number of players who were still fighting outside the city had increased.

In an instant, more than half of it was gone.

The number of players who were still farming monsters outside of Dangyang city.

Even with the wind and cloud Guild's nearly 100000 players ...

It might not even reach a million people.

It must be known that at the beginning of the monster attack, there was no need to worry.

there were at least five to six million players farming monsters outside the city.

Most of these people couldn't hold on any longer.

They had either fallen to the ground or retreated into Dangyang city.

Everyone was ridiculing him in the Dangyang city regional channel.

f \* ck, I'm not going to participate in this stupid activity anymore. It's simply a scam.

"That's right, how did the monster's level suddenly increase to 60? He simply doesn't leave a way out for people."

I'm only level 32. How can I possibly stop so many level 60 demon soldiers? "

"The planner who designed this event must have a hole in his brain."

this damn event isn't for normal players. They'll only die if they force themselves to join.

"It's a good thing I ran fast, otherwise I would have lost another level for nothing."

"Damn it, can someone save the child? I can't hold on any longer. I'm surrounded by monsters, I can't fight them at all."

"Brother, don't struggle anymore. Go in peace. After the event ends, we'll just find a support to resurrect him."

you're right. The monster attack event only lasts for an hour, and it's been almost ten minutes. Even if you fall now, you can wait for rescue after the event ends.

"So, brother, you can go in peace, hehe."

f \* ck, I still want to struggle. Isn't it better to be alive? "

you're awesome. You have to survive first.

"Brothers who are still outside the city, join forces. We can live as long as we stick together."

"Isn't it too late to talk about this now? If they could form an alliance, they would've done so long ago."

"Damn, I'm curious. The last time the monsters attacked the city, the highest level of monsters was only level 50. Why did it become level 60 demon Warriors this time?"

what's so strange about that? when the player's level increases, the monster's level will naturally increase as well. Do you really want to farm monsters for fun? "

"The problem is, I've only gained three or four levels this month. The monster's level directly increased by 10 levels, this is too ruthless."

"That's because you're a noob. You only get three or four levels in a month."

f \* ck, it's getting harder and harder to level up these days. It's already very strong to be able to level up three or four times a month.

"Sigh, that depends on who you're competing with. You can compare yourself with someone even worse. Of course it's very strong, but compared to six tube Bodhisattva, you'll realize that your leveling speed is like a snail's crawl."

"Damn, now I know why the level of the monsters is so high. It was all six-barreled Bodhisattva's fault. He was already at level 46. It wouldn't be strange for the demon race monsters attacking the city to reach level 60."

f \* ck, six-barreled Bodhisattva's here. He's forcefully increasing the difficulty of the game.

"So what if I know? Are you going to cut him down?"

"That's a good idea. Why don't we form a team to kill six-headed Bodhisattva? if we can get his level down, it might be easier for the next monster attack, hehe."

"If you want to die, go on your own. Don't drag others along."

"That's right. Do you know how powerful the six tube Bodhisattva is now? That's the man who single-handedly took on a real-name BOSS."

it doesn't matter how strong he is. No matter how good his Kung Fu is, he's still afraid of a knife. As long as we have enough people, we can still kill him.

you're thinking too much. The last person who had this thought was the domineering King, but he died after that.

that's right. He's as strong as six-barreled Bodhisattva. Even if there are many people, they might not be able to kill him.

sigh, we're all playing the same game. Why is there such a huge difference? "

"Spending money will make you stronger."

"Pay-to-win my ass, is there any use? If in-game purchases were useful, those big shots would've chopped the six-barreled Bodhisattva into ashes."

although khorium ore can't defeat six-barreled Bodhisattva, it can still defeat the small monsters. Hehe.

"F \* ck, is spending money just to kill small monsters? That's a good idea."

"Haha, brother, your way of thinking is indeed novel."

When the monsters attacking the city turned into level 60 demon soldiers, they were all killed.

A large number of players either fell to the ground or retreated back to the city.

However, none of the wind and cloud guild members retreated.

Although there were many people who were having a hard time.

However, under the team's mutual protection ...

They slowly stabilized their position.

even if there were some who were not paying attention and were cut down by the demon soldiers.

The support beside him could also quickly resurrect people.

All in all, they had not suffered any losses yet.

However, as the pressure increased ...

Everyone could no longer be like before.

He was killing monsters with ease while enjoying the water.

Some of them were only the Warriors in the front row, who kept calling for the support to heal.

He called for the damage dealers in the back row to hurry up.

f \* ck, pay attention to my health bar. I almost died just now. Fortunately, I brought da Hong Yao with me.

"Hurry up and kill the monsters. Are the guys in your hands all fire sticks?"

"Don't be so noisy, we can't do it at all."

hey, you're really a piece of trash. You have to hack at least 20 times just to kill a small monster. Where's your equipment? did someone eat it? "

"F \* ck, who are you talking about? You speak as if you can kill a small monster with two slashes."

“Don’t be so noisy, it’s fine as long as you can hold on.”

sigh, I’m just afraid that it’s useless to stabilize it now. When the BOSS comes, we won’t be able to handle it.

“Do you need to worry about the BOSS? With the six-barreled boss here, you can just focus on killing the small monsters.”

“You’re right. Go and kill your monsters. Don’t worry too much, hehe.”

Compared to the other guild members, they would still be flustered when facing these level 60 demon Warriors.

On Zhang Shan’s side, the monster-farming team was very relaxed.

After all, they had gathered almost all of the big shots in the Guild.

compared to the normal members, these guild leaders all had full sets of red equipment. they were very powerful.

Furthermore, they still had Zhang Shan and a few others on their side, people with divine weapons.

Dealing with small monsters was a piece of cake.

for them, lv 60 demon fighters were nothing.

They were not much stronger than the 20 – 30 monsters from before.

It was nothing more than a matter of hitting him a few more times, which was very easy.

Windcloud blade brandished his divine weapon, the battle axe, and stood at the front.

He killed a demon warrior with two axes, and because of the splash effect of the divine weapon, he was able to kill a demon warrior.

Every time wind cloud blade struck out with its axe, it could cut down a large group of demon soldiers.

If not for the fact that his attack power was much weaker than Zhang Shan’s.

The speed at which wind and cloud blade was killing monsters was not any slower than Zhang Shan.

Perhaps he could even be faster.

As for “heart moves with me,” after obtaining the God equipment bright light sword.

The damage output also had a qualitative change.

Although his bright ray sword did not have a splash effect like wind and cloud blade’s axe, it was still a powerful weapon.

However, the class ‘heart moves with me’ was a Spellblade.

Spellblades had many powerful AoE skills.

he used his aoe skills one after another.

the demon soldiers fell under his sword one after another.

Although the other guild leaders couldn't compare to these two guys who had godly weapons, they still had to be careful.

But it was also very strong.

Although level 60 demon Warriors were several levels above them, they were still stronger than the demon race.

however, they were almost the same. they could kill a monster in four to five hits.

Not to mention, in their team, there was still Zhang Shan.

Each time a demon fighter rushed forward, Zhang tie would be shocked.

They would be swept clean very quickly.

Windcloud blade said in a bored tone as he brandished his God-tier axe at the monsters.

"Why hasn't the BOSS appeared yet?"

"What's the rush? it'll come sooner or later."

"I'm just afraid that the BOSS will appear at another city gate. if that's the case, we'll have to run over. it'll be quite troublesome."

"I'm not afraid of trouble. As long as there's a BOSS to fight, I'm not afraid of trouble, hehe."

this should be the same as the previous event. There will be one BOSS in each of the four city gates.

"It should be,"

"Should we go and fight the bosses at the other city gates?"

let's see how it goes. If there's a BOSS at the other gates that no one's fighting, we'll go over and kill it.

"harvest? Big brother, you make it sound so simple. You don't even put the BOSS in your eyes."

of course, with Big Boss six-barreled around, a small BOSS is nothing, hehe.

"Alright, that makes sense."

When he became a demon, he became a level 60 demon fighter.

The first boss had finally appeared.

quick, look at the regional chat channel. A boss has appeared at the West Gate. It's a red boss, the demon Lieutenant.

"F \* ck, the boss is finally here? Let me see."

"Is there anyone fighting the boss?"

"I don't know yet."

Zhang Shan looked at the regional chat channel.

the BOSS has appeared at the West Gate. Hurry up and come fight it.

it's over, it's over. We were already on the verge of collapsing, and now a BOSS has appeared.

f \* ck, I'm going back to the city. I'm not farming anymore.

"Someone, hurry up and kill the BOSS. Could it be that Dangyang city was so weak? No one can even defeat a red BOSS?"

Outside the West Gate of Dangyang city, after the BOSS appeared, it caused a great deal of chaos.

The players who were farming outside the city were already under a lot of pressure when they faced the level 60 magic Warriors.

In the end, the BOSS rushed over.

Many people didn't even have time to escape and were killed by a wave of attacks.

When the demon Lieutenant first appeared, no one went to fight him.

Just as Zhang Shan was considering whether they should go over and cause a ruckus.

Only then did he realize that someone had already started to attack the demon field officer who had appeared outside the West Gate.

After all, the demon field officer was just a normal red BOSS.

There were tens of millions of players in Dangyang city. It made no sense to say that the wind and cloud Guild was the only one.

The others could not defeat the BOSS.

That was impossible.

Chapter 429 the ultimate skill, holy light illumination

The first BOSS had appeared in the monster siege event.

Unfortunately, he didn't appear at the East Gate where they were.

instead, he appeared outside the west gate.

Now that someone was already fighting it, they couldn't go over and steal the BOSS.

They were all players from the same city and the same country.

there was no need to fight and kill just for a normal red BOSS. it was not appropriate.

He could only pray that the others couldn't beat the demon Lieutenant.

After that, they could go over and harvest a wave.

Or at the East Gate, another BOSS would appear.

he had to find something to do.

It couldn't be said that the entire monster siege event.

Would they just keep killing the monsters until the end?

this was nonsense.

Unfortunately, the number of bosses was limited, and only one demon Lieutenant had appeared so far.

With the current strength of the players in Dangyang city, there was not enough to split.

it was true that there were more wolves than meat.

There were more people than the BOSS, so they were not enough to fight.

At this moment, Windcloud blade asked.

"Who are the people fighting the BOSS outside the West Gate? Could they win? Should we go over and take a look?"

"Don't waste your time, that's another Guild. Although their strength is weak, the entire Guild has close to 10000 people. Dealing with a normal red BOSS should be no problem."

"F \* ck, we can't do anything but watch the others fight the BOSS while we can only farm the small monsters here.

" don't worry, just guard the last big BOSS. we just need to get the last real name BOSS. the other small bosses can be fought by others. "

"will the big BOSS appear at the east gate again? It'd be bullshit if someone else got a head start when we're farming monsters elsewhere."

"who cares where it spawns, the real name BOSS is ours."

don't think too much about it. In the entire Dangyang city, other than us, who else can defeat a real-name BOSS? "

that's right. A real-name BOSS is extremely powerful. It's not something that a normal red BOSS can compare to.

let's not talk about Dangyang city. Even in the entire game, there are less than five Forces that can defeat a real-name BOSS in a short time.

"Yes, the event time is limited. The time left for players to deal with the big BOSS is no more than 20 minutes. There aren't many forces that can take down a real-name BOSS in 20 minutes."

"Don't you need to think about it? didn't we already verify it during the monster attack last time? Other than us, only the domineering aura Guild and the war god Guild managed to defeat the final boss."

"I remember now. It's like this. But now that another month has passed, everyone's strength has increased a lot. Perhaps this time there will be a few more forces that can beat the big boss."

“Then you’re wrong. I think it’s the opposite. The last Big Boss was only level 50. This time, it’s definitely a level 60 real name BOSS, which is much stronger. Although the players “strength has also increased greatly, it won’t be of much use against a Big Boss.”

“Who cares, it’s fine as long as we can beat it.”

“That’s for sure. Even we were able to defeat such a powerful BOSS like Magnus. No matter how strong the BOSS this time is, there’s no way it’ll be stronger than Magnus, right?”

the more powerful the boss is, the more it tests the high-end combat power. They don’t have someone as powerful as Big Boss six-barreled.

“Haha, you’re right. Without the six-barreled boss, it’ll be hard for us to defeat the real name boss.”

by the way, there are no bosses to fight in Dangyang city right now. Should we go to other cities to take a look? perhaps the bosses in other cities have not been fought yet.

“brother, that’s a good idea. wherever you want to go, you can go by yourself, please don’t bring me along.”

“Damn it, you’re so stubborn. Who said that they were going to fight bosses in other countries? don’t we still have two cities in Chu State? Perhaps the bosses in Yunmeng city and Yingtian city have yet to be defeated.”

“don’t think too much. someone is definitely fighting.”

why don’t we go to the demon suppression city and take a look? maybe a BOSS has appeared there, but I don’t think anyone is fighting it yet.

“That’s a good idea. Why don’t we go and do it?”

what did the boss say? let’s go to demon suppression city first and fight a wave of bosses. After that, we’ll return to Dangyang city.

“Yeah, it’s quite boring to keep farming monsters here.”

The big shots in the Guild were not interested in the drops of the red BOSS.

To be honest, it was possible for a normal red BOSS to drop good items.

However, the probability of that happening was too low.

Usually, it would be two or three pieces of red equipment and a red material.

all of these things could be sold for twenty to thirty thousand gold coins.

These big shots wouldn’t be interested.

They were just bored of killing monsters.

It was clearly an intense monster attack.

They could only kill small monsters for fun.

...

It was quite boring.

However, there was a limited number of bosses in Dangyang city.

Based on his experience from the previous event.

There were only four bosses in total.

This also included the real name BOSS that appeared at the end.

The number of bosses was too small.

There wasn't enough to go around.

He wanted to find a BOSS to fight in the event.

He had to find another way.

It just so happened that there were also monsters attacking the demon-suppressing city.

there shouldn't be any players fighting the BOSS over there.

...

Therefore, when a guild leader suggested this ...

When he wanted to go to the demon-suppressing city to take a look.

Everyone expressed their support.

If there was a BOSS to fight, of course, they had to do it.

okay, let's go together. The rest of you, continue to farm monsters here. Call me if there's a situation.

as for the idea of going to the demon-suppressing city to fight the BOSS ...

Feng Yun realm also agreed.

They really didn't need to waste their time in Dangyang city.

He had already planned to kill the BOSS in Dangyang city during the monster attack.

However, Feng Yun realm's target was the final BOSS.

The other mini-bosses were not in his plan.

and the big BOSS would only appear at the end of the event.

it was still early.

there was no harm in going to demon-suppressing city to fight small bosses.

Seeing that everyone was planning to go to the demon-suppressing city to fight the BOSS, Zhang Shan said.

“Then I’ll go to the demon-suppressing city to take a look.”

After Zhang Shan finished speaking, he used the positioning Pearl and teleported to the mayor’s residence in the demon suppressing city.

After reaching the demon-suppressing city, Zhang Shan teleported to the top of the city gate tower.

He saw that the outside of the city was densely packed with demon soldiers.

however, these demon soldiers didn’t approach the city wall.

Instead, they were all packed together, a hundred yards away from the city.

Very quickly, Zhang Shan saw a demon Lieutenant in iron armor among the densely packed monsters.

there really was a BOSS.

Zhang Shan said on the team channel.

“We saw the boss, no one’s fighting it.”

After he finished speaking, he teleported to the city gate.

Then, he charged towards the demon Lieutenant.

he didn’t wait for the others.

With his current damage and lifesteal effect ...

He should be able to solo the boss.

There was no need for anyone else to come over.

He could even defeat a normal red BOSS.

however, they might need to fight for a longer time.

After Zhang Shan had charged out of the city gates by a hundred yards.

A large number of demon soldiers surrounded him.

The demon Lieutenant not far away.

He also rode his horse and charged towards him.

Zhang Shan opened fire.

The bullets were fired at the demon Lieutenant who was running over from a distance.

As for the countless demon soldiers around him.

He was too lazy to care.

anyway, he could drain blood fast enough.

It was impossible to kill him.

Zhang Shan's damage.

He kept jumping between the demon field officer and the small monsters.

the shot was fired, and twelve damage lines appeared.

in an instant, the hp that he lost to the monsters was sucked back.

The demon Lieutenant quickly rushed to Zhang Shan's side.

He waved his big knife and slashed at Zhang Shan.

-78992 damage.

F \* ck, this BOSS is pretty strong.

One slash dealt nearly 80000 damage, that was impressive.

As Zhang Shan attacked, he checked the demon lieutenant's attributes and skills.

[demon lieutenant (red): level 60, attack 40000, hp 100 million]

skill 1, army shattering saber technique, skill 2, iron blood heart technique, skill 3, demon god's will, skill 4, saber light criss-cross.

[Army shattering blade technique: a blade technique learned by the demon lieutenants in the Army. It is extremely powerful and deals twice the damage to the target when attacking.]

[Iron Blood heart technique: a heart technique imparted by a Demon God to its generals. Increases attack power by 100%.]

[Demon God's will: when in danger, the demon Lieutenant will summon the demon God's will to assist in battle.]

[blade light criss-cross: the demon Lieutenant has mastered a peerless blade technique. With one slash, countless blade lights will sweep across the heavens and earth.]

Deals five times the damage to surrounding targets.

Damage range of 50 yards.

After seeing the demon lieutenant's attributes and skills.

Zhang Shan had almost thought that this was a boss with a real name.

How could an ordinary red boss be so strong?

Speaking of which, it seemed like he had never fought a level 60 red boss before.

All the red bosses they had fought before were level 50.

Of the level 60 bosses, they had only fought Magnus and mackmillie.

However, both of them were real-name bosses.

He was much stronger than a demon field officer.

however, a demon field officer was not as powerful as a real-name BOSS.

However, compared to the red bosses that they had fought before, it was much stronger.

A single slash dealt close to 80000 damage.

Other than Zhang Shan, in the entire game, there probably weren't many people who could withstand such damage.

Originally, he had thought that in Dangyang city ...

Other than the wind and cloud Guild.

The other player factions should be able to deal with the normal red bosses.

However, after looking at the demon race field officer's stats.

He was a little suspicious now.

Those fellows outside the West Gate of Dangyang city.

could he really defeat a demon lieutenant?

Zhang Shan felt that it should be very difficult.

It wasn't to say that others couldn't beat him.

Instead, it was extremely difficult. They would have to sacrifice a lot of cannon fodder and it would take a long time to make it possible.

then how many lives would be used to pile up the demon lieutenant to death?

Unless they also had a strong meat shield like Zhang Shan or the little Secretary.

Yes, a ferocious BOSS like the demon Lieutenant.

Secretary Feng Yun was similar, she could handle it.

Even if they couldn't hold on steadily.

But at the very least, they could hold on for a long time.

After all, the Secretary's equipment and skills were quite good.

Especially since he was equipped with a divine artifact shield.

if they couldn't even handle this, then it was just a normal red BOSS.

That would be the funniest thing.

but there was only one secretary.

The other powers did not have someone like the Secretary.

He really didn't know how others could grind the boss to death.

How many lives would that take?

Of course, Zhang Shan was only thinking about it.

These things had nothing to do with him.

all he needed to do now was to destroy the demon lieutenant in front of him.

This was not difficult for him.

the demon lieutenant's damage was high.

But to him, there was no pressure at all.

His HP had already exceeded 500000.

as for endurance and recovery ...

There was no need to even mention that.

Zhang Shan's 18% lifesteal ability.

One shot could suck blood 12 times.

As long as there were still monsters around the BOSS.

each time zhang shan attacked, he could drain more than 100000 blood.

there was no need to rely on the support to heal.

Just based on his own blood-sucking ability.

They were able to deal much more damage than the BOSS.

Not to mention his attack speed.

It was still two to three times that of the BOSS.

Therefore, the damage to the demon Lieutenant.

He didn't need to take it to heart at all.

Zhang Shan only needed to tank the damage from the BOSS and the monsters.

Just blow up the demon Lieutenant.

However, the demon Lieutenant was a level 60 BOSS.

his hp was still very high.

it had a total of 100 million hp.

Although it wasn't like Magnus, who had an insane amount of 1 billion HP.

However, 100 million HP was not a small amount.

It was almost twice the power of a normal level 50 red boss.

If no one else helped.

if he was the only one dealing damage.

It would probably take ten minutes to blow up the demon Lieutenant.

Of course, he was not a lone wolf.

Zhang Shan also had brothers.

Not long after he stopped the demon Lieutenant.

feng yun realm led the rest of the party.

He had also been teleported to the demon-suppressing city.

Wind and cloud blade, follow me, little fairy, and boss Wu. These four people were all famous because of their titles.

It could teleport within the demon-suppressing clan.

After they were teleported to the demon-suppressing city, they teleported to the city gate first.

they quickly joined the ranks of the BOSS.

The rest of them followed Feng Yun realm and quickly ran over.

together, the fifty of them launched an attack on the demon lieutenant.

Even the support classes in the team could only deal a pitiful amount of damage to the BOSS.

This was because Zhang Shan did not even need them to heal.

If the few supports in the team didn't attack the demon field officer, what else could they do?

He couldn't just stand by and watch.

Under everyone's intense firepower.

The demon lieutenant's HP dropped rapidly.

"haha, finally a BOSS to fight."

Windcloud blade shouted happily as he brandished his axe.

what are you doing? you've been following six-eyed boss around every day and fighting bosses. We're the pitiful ones. I haven't seen a BOSS in half a month.

that's right. We didn't even say anything. Why are you screaming? "

As soon as Windcloud blade finished speaking, his teammates began to ridicule him.

"i haven't fought a BOSS in a long time too."

windcloud blade said, feeling wronged.

During this period of time, Zhang Shan and the rest had not gone to fight the BOSS.

He had been farming monsters in the Gerri wasteland.

this demon Lieutenant is so weak. Other than his ultimate skill, his other skills are of no threat to us.

one of the big shots in the team said after looking at the demon field officer's attributes and skills.

what the f \* ck, you're a little too arrogant. You actually dare to say that such a powerful BOSS is weak?  
”

if a BOSS that can deal 80000 damage with one slash is considered weak, then I wonder what kind of BOSS can be considered strong.

he's just a helper anyway. He doesn't need to tank the boss, so of course I'm just saying.

“If he were to tank the boss, he would probably be instakilled.”

“please be more confident and remove the word ‘estimated’. it'll definitely be an instant defeat.”

“Sigh, I wonder if the demon Lieutenant will drop anything good?”

why are you thinking about that? there's a boss that you can have some fun with. Why are you talking about drops? aren't you just looking for trouble? ”

“What good items can a normal red boss drop? isn't it just a red equipment?”

“Maybe we'll be lucky.”

“Stop dreaming and focus on the boss.”

Very quickly, they had reduced the demon lieutenant's HP to 80%.

The demon Lieutenant started to summon the demon God apparition.

The demon God's will skill was activated.

everyone's hp started to drop rapidly, dropping by 6000 in a second.

The speed of the blood loss was very fast.

However, the bosses present all had good equipment and high HP.

With the support of the support, they easily passed through the wave of boss skills.

Everyone continued to attack for about two minutes.

The demon lieutenant's HP was almost at half.

Feng Yun realm said.

let's retreat first. We'll come back after the boss is done with his big move.

Other than Zhang Shan, the rest of the people quickly retreated to the city gate.

The damage from the demon lieutenant's big move.

they couldn't hold on.

The demon lieutenant's big move, the horizontal blade light, dealt five times the damage.

if calculated normally, it should be 200000 damage.

The big shots in the Guild had good equipment.

However, none of them had reached rank 40 yet.

Other than the Secretary, the health of these people was less than a hundred thousand.

Facing the BOSS's ultimate, they simply couldn't withstand it.

However, after they reached level 40.

Those Guardian Warriors with amazing equipment.

As long as he could get his hands on a purple cloak.

He should be able to raise his HP to more than 200000.

of course, the purple cloak was not easy to get.

That would depend on luck.

After his teammates had retreated, Zhang Shan had quickly reduced the demon lieutenant's HP to half.

The demon Lieutenant suddenly sheathed his blade.

Then, he quickly pulled out his saber and slashed at Zhang Shan.

in an instant, zhang shan was the center.

Countless blade lights crisscrossed.

Zhang Shan's health bar had been reduced by a large chunk.

But it didn't matter.

Zhang Shan lifted his hand cannon, and the bullets kept shooting at the demon Lieutenant.

Lines of damage appeared above the demon field officer and the surrounding monsters.

In a short while, he had sucked back the amount of blood.

It was a perfect combination of catapulting and lifesteal.

After the demon Lieutenant released his big move.

The other party members quickly ran back and continued to attack the BOSS together.

come on! Quickly destroy the demon Lieutenant so that he doesn't have to run around all the time.

"Don't worry, it won't have the chance to use its second big move."

that's right. We'll be able to defeat the BOSS in two minutes at most.

A demon field officer had 100 million HP.

This amount of HP looked very high.

however, among the 50 of them, other than a few support players, they really couldn't deal much damage.

The damage to the others was still very considerable.

Under their continuous attacks.

The demon lieutenant's HP dropped rapidly.

50%, 30%, 20%.

The BOSS entered berserk mode.

After going berserk, the demon field officer's damage was even more ferocious.

However, the injuries of the demon lieutenants were nothing to Zhang Shan.

It was not a problem at all.

No matter how violent it was, it could not do anything to Zhang Shan.

On the contrary, the demon lieutenants became much weaker after going berserk.

The damage they dealt became higher.

In less than a minute.

The demon lieutenant's HP was almost empty.

Zhang Shan quickly controlled the Panda dumpling to move forward.

when the demon lieutenant's health bar was empty.

Zhang Shan saw the opportunity and controlled the Panda bear, launching a combo skill.

The demon Lieutenant exploded in one blow.

Skill point +1, medal +100.

haha, it's still the first kill. I've gotten another skill point.

it's normal to get the first kill. It's a level 60 red boss. No one has ever fought it before.

I didn't expect that we would come to the demon-suppressing city to fight the boss and kill the boss before the others.

of course. How can the others beat us at the speed of killing the boss? "

what speed? it's already not bad that they can blow up the demon Lieutenant. How can they talk about speed? "

“that’s true. we’re still too strong, hehe.”

“Don’t be so high on yourself.”

“Boss, let’s see if anything good dropped.”

” what good items can there be? after rolling the equipment, quickly return to dangyang city. ”

Feng Yun realm dropped the item and displayed it on the party channel before saying.

” it’s still okay this time. there’s an ultimate skill book for the witch doctor. ”

“F \* ck, that’s impossible, right? A normal red BOSS will drop an ultimate skill book?”

“Yes, but the probability is too low. I didn’t expect our luck to be so good.”

” it has nothing to do with me. you three beautiful witch doctors are in luck. ”

in their team, including mr. wu, there were only six supports.

Three Taoist priests and three witch doctors.

Zhang Shan had not expected that the demon Lieutenant would actually drop an ultimate skill book.

There were only three witch doctors in the party, so the skill book would be distributed among the three of them by rolling.

It all depended on who had better luck.

Speaking of which, they had never dropped the witch doctor’s ultimate skill book before.

Let’s take a look at the skill description.

Let’s see what kind of effect the witch doctor’s ultimate skill has.

[ holy light illumination: rapidly restore the health points of surrounding friendly units to full status. ]

In addition, it was blessed with the state of holy light. Under the state of holy light, it was immune to all damage.

[ class requirement: witch doctor ]

Chapter 430 The general of the demon guards, alludor

after reading the description of the holy light illumination skill.

Zhang Shan was shocked.

this was an invincible support skill.

And it was a group invincible support.

This skill was a little strong.

In the state of holy light, it was immune to all damage.

Wasn't this invincible?

Although the witch doctor's holy light state could only last for five seconds, the witch doctor's holy light was still strong.

But it was already very strong.

give it to all friendly units within a 50-yard radius.

All of them will be restored to their full state, and they will be invincible for five seconds.

this support skill was a bit ruthless.

It was indeed an ultimate skill.

Really, as an ultimate skill, there was no difference.

Every ultimate skill was the essence and was very powerful.

This holy light illumination skill was truly a godly support skill.

Especially in a fight, this skill's support effect would be very powerful.

one could imagine.

If there were five or six witch doctors, they would all have the Holy Light illumination skill.

If several people took turns to cast their big moves, who could withstand it?

It was equivalent to a group of people charging at you with invincibility.

Even Zhang Shan would not be able to withstand it.

If he were to see such a situation, he would have to run away as well.

Although he had the passive [ ejection ] and a very high lifesteal effect, he was still very weak.

However, the other party was in an invincible state.

you can't deal any damage at all, so naturally, you can't absorb any hp.

If it couldn't kill people and couldn't suck blood.

No matter how tanky Zhang Shan was, he did not dare to take on a group of people.

If he let a group of people rush to his side and cut him with all kinds of knives.

If he were to cast a few more stunning skills on him, he would definitely fall to the ground.

the holy light illumination skill was very powerful, but it would only be more effective if there were a few more people taking turns to use it.

otherwise, he would only have five seconds of invincibility.

To be honest, unless it was a special situation.

Otherwise, it would cancel out the effects of other damage-type big moves.

Most damage-type skills had a five-second duration of continuous damage.

The Holy Light provided five seconds of invincibility.

If both sides used their big skills at the same time, neither side would be able to do anything to the other.

this was an interesting scene.

Therefore, no matter what kind of big move it was, it was still a big deal.

In the later stages, it was still necessary to have a large number.

Any ultimate skill, as long as there were enough of them, could be used by multiple players in turn, and the effect would be heaven-defying.

Killing an ordinary red boss could drop an ultimate skill book. They had to admit that their luck today was pretty good.

“Distribute the items and we’ll return to Dangyang city.”

Feng Yun realm opened his mouth to stop everyone’s nonsense.

They would go back after distributing the items.

They had teleported to the demon-suppressing city to fight the BOSS.

Now that they had defeated the BOSS, they had to go back.

Feng Yun realm rolled for the Holy Light skill book.

The three witch doctors in the team threw their dice one after another.

48 points, 52 points, 55 points.

Feng Yun Qing had managed to roll the ultimate skill book with a slight advantage in points.

“Haha, I’ve become stronger again.”

...

feng yun qing qing, who had received the skill book, had completely lost her ladylike image and could not help but laugh out loud.

what are you laughing at? no matter how strong you are, you’re still a support.

“What did you just say? If you dare to say one more word, don’t expect me to heal you in the future.”

“F \* ck, I was just joking. Don’t take it seriously.”

After the distribution of the skill books was completed, the remaining red equipment and materials were also distributed by rolling.

feng yun realm said.

“Alright, the BOSS is dead. Let’s go back to Dangyang city.”

let’s go back and farm some monsters. I hope we can meet the BOSS outside the East Gate.

Just as everyone turned around and was about to return to Dangyang city.

Suddenly, Windcloud blade shouted.

“Guys, look at what that is! Is it another BOSS?”

...

Everyone looked in the direction that wind cloud blade was pointing at.

In the distance, a demon general on a warhorse was galloping towards them.

He looked similar to the demon Lieutenant that they had just killed.

haha, why are we going back? let’s fight another wave.

” there are even bosses coming one after another. it’s perfect. ”

it should be the demon Lieutenant from before. It has been a while, so the second one came out as soon as we finished fighting.

“In that case, does that mean we can wait until the third one?”

“We’ll see. Let’s settle this first.”

The BOSS that was running over from afar was another demon field officer.

Zhang Shan was at the front and quickly pulled the boss.

He checked the boss’s attributes.

It really was the same as the one just now.

“It’s the same as the previous boss.”

Zhang Shan said to his teammates.

“then it’s simple, quickly finish it.”

After Zhang Shan pulled the demon Lieutenant back, the others quickly followed up.

They had just fought the same BOSS.

There would be no difficulty at all if he tried it a second time.

And there was Zhang Shan in front of him.

everyone was like you hitting a wooden stake, it was simple.

They dealt damage very quickly.

In less than five minutes, the demon Lieutenant was blown up.

However, it did not drop anything good this time.

There were only two pieces of red equipment and one red material.

Feng Yun realm said after distributing the items.

“let’s go. we don’t have to wait for the next one. if we wait for the next one, i’m afraid it will delay things.”

don’t. Why don’t we wait a little longer? the next boss might appear very soon.

that’s right, boss. Why don’t we just fight the boss in the demon suppression Hall? it’s so easy to fight here. We don’t have to worry about people coming to harass us.

“that’s not necessarily true. anyone can come to the demon suppression city. maybe the foreign players will come too. We might even have to fight it out before we can even hit the boss.”

how is that possible? who would dare to fight us here? this is the territory of the six-barreled boss.

” let’s go back. we’ve already killed two bosses anyway. we’ll be fighting another big BOSS later, and that’ll be three. this monster attack was not in vain. ”

that’s right. It’s better to return to Dangyang city. Who knows if a group of destructive guys will appear here.

“Then let’s go back. Dangyang city is still a bit safer.”

Although they were reluctant to leave, some of them still wanted to continue fighting another demon Lieutenant in the demon-suppressing city.

However, they had to consider that their target for this event was the final BOSS.

It was better to return to Dangyang city and guard the final Big Boss.

It would be nonsense if he lost the big picture because of the small.

After all, the demon-suppressing city was a place where anyone could come and go.

Even though this was Zhang Shan’s territory.

There were also a dozen or so fire god cannons placed there.

Generally speaking, they were not afraid of others causing trouble.

however, it would be better to be more stable.

After all, they were the absolute authority in Dangyang city.

The players in Dangyang city were basically not people who would cause trouble for them when they were full.

Even if there were, it would be a minority of players who could completely ignore it.

Most importantly, Dangyang city was a huge city after all, so the drops from the big BOSS there might be better.

And Dangyang city was only a small city of five li.

The final Big Boss might not even be a real-name BOSS.

It would be a joke if they stayed in the demon-suppressing city and only fought four demon lieutenants.

Therefore, it was better to return to Sun City first.

Although they were reluctant to leave, they still retreated into the demon-suppressing city.

then, he returned to dangyang city.

They teleported to the East Gate and prepared to return to their previous farming spot.

At this moment, the outside of Dangyang city was densely packed with level 60 demon race Warriors.

It was extremely difficult for ordinary people to walk outside the city.

There were too many monsters, and they were very fierce.

It was already very good for a normal player to be able to withstand these demon Warriors and not fall to the ground.

it was simply impossible to walk through a horde of monsters.

But for Zhang Shan's team, it was no problem at all.

Zhang Shan held his hand cannon and led the way.

Even a level 60 demon warrior would fall in one shot.

And it wasn't just one, it was twelve.

Zhang Shan was in front and quickly cleared a path.

The other teammates followed behind.

Very quickly, they met up with the Guild members who were still farming monsters outside the city.

After Zhang Shan and the rest returned to their original defense system, everyone continued to farm monsters.

windcloud blade asked the other guild members as he grinded monsters.

"How's the situation here? how many bosses have appeared? has the first boss been killed?"

there are two bosses so far, and people are already fighting them, but they haven't been defeated yet.

“They’re so slow. We’ve already killed two bosses, why aren’t these people done yet? Hehe.”

Windcloud blade could not help but say smugly.

“We can still beat them, but we have to grind them down slowly.”

Two bosses had already appeared in Dangyang city.

The first demon Lieutenant appeared at the West Gate.

A second demon Lieutenant appeared outside the South Gate.

It should have been more than ten minutes since the first demon Lieutenant had appeared.

It actually hadn’t been blown up.

It was clear how difficult it was for normal players to fight a BOSS.

However, it was normal when he thought about it.

When fighting a BOSS, if you can’t withstand it.

Not to mention that they would constantly lose members.

the key was that it would seriously affect his output efficiency.

Since no one could pull the BOSS, the others had no choice but to focus on dealing damage.

They could only fight and run, afraid that they would attract the BOSS’s aggro.

Zhang Shan and the rest were far away at the East Gate. They could not see the situation at the west and south gates.

However, he could roughly estimate the situation.

The cannon fodder would continuously charge forward to die and try to stall the BOSS.

Let the others deal as much damage as possible.

As Zhang Shan was farming monsters, he was also looking at the regional channel.

They had just gone to the demon-suppressing city and fought two bosses.

But it didn’t take too much time.

The whole process took about eleven or twelve minutes.

However, the regional channel was already flooded with countless messages.

It was boring to farm monsters anyway.

Zhang Shan scrolled to the front of the message and looked at the chat history on the regional channel.

There was a very interesting chat record.

It was probably after they had killed the first demon Lieutenant and made the system announcement.

"F \* ck, isn't wind and cloud Guild farming monsters? Where did they kill the BOSS?"

who knows? could it be that a BOSS has appeared at the East Gate? "

"No, I was at the East Gate. I didn't see them fighting the BOSS."

"F \* ck, did they steal the BOSS at the West Gate?"

"Don't talk nonsense. The big boss of wind and cloud Guild wouldn't be interested in such a small BOSS. They're not here to steal it, the BOSS in the West is still being fought."

"That's strange. Where did they go to fight the BOSS? did the wind and cloud guild go to another city to fight a BOSS?"

"That's impossible, right? if we cross cities to fight another BOSS, wouldn't that cause a huge ruckus?"

"You guys are so stupid. Don't we still have the demon-suppressing city? A BOSS must have appeared in the demon-suppressing city. The people from wind and cloud Guild were fighting the BOSS in demon suppression city, right?"

"f \* ck, i really didn't think of this."

"That's good. This is good too. I was a little worried that the people from wind and cloud Guild would come and steal the BOSS."

what are you worried about? would anyone be interested in your mini-boss? "

"What the f \* ck, can a red BOSS be considered a small BOSS? Why don't you come to the West Gate and take a look? the demon Lieutenant is so fierce that he can kill whoever he wants in one second."

"It can't be. Even a normal red BOSS is this powerful? If that's the case, wouldn't a real name BOSS be heaven-defying?"

who knows? I've never fought a BOSS with a real name.

even a normal red BOSS is so powerful. I wonder how six-barreled Bodhisattva managed to solo a real-name BOSS? "

that goes without saying. It must be a BUG.

"It's easy for you to say. Go and try to block a BUG."

try my A \* s! I've never seen a real name BOSS before.

I've seen it before, but I saw it on a video on the forum. Hehe.

"Then what are you saying?"

"you guys worry too much. does the real BOSS have anything to do with you? He was lucky that he didn't see it. If you really see it, you might not even be able to escape."

"Indeed,"

Zhang Shan looked at the chat history on the regional channel and could not help but sigh.

The difference in strength between the players was getting bigger and bigger.

Not to mention him, he was an exception.

For example, the big bosses of the wind and cloud Guild.

Their strength compared to normal players was like heaven and earth.

Just like the demon Lieutenant outside the West Gate.

If it were the big bosses of wind and cloud Guild.

Even without Zhang Shan's participation, they would have already been destroyed.

And not like what was happening now.

The group of people had been fighting for a long time, but they still hadn't killed the BOSS.

It was difficult to do anything without strength.

Not long after they returned.

The third demon Lieutenant appeared at the north gate.

after causing a period of chaos.

Very quickly, there were player forces. They formed a group and started fighting.

f \* ck, there were already three bosses in Dangyang city, but none of them appeared at the East Gate. Is this a sign of contempt from the system? "

"Don't think too highly of yourself. Does the system know who you are?"

it's good that the mini-boss didn't appear at the East Gate. That means that the final boss will respawn at our location.

that's right. F \* ck the demon Lieutenant. I don't care. I want to fight a real-name boss.

"You're awesome."

"sigh, i wonder when the big boss will appear."

"By the way, how long did it take for the big BOSS to appear? I can't really remember."

I remember to go. There's about 15 minutes left before the big BOSS respawns.

" f \* ck, doesn't that mean that we only have about 10 minutes at most to fight the BOSS? do you think we can kill the real-name BOSS in such a short time? "

what are you thinking about? we were able to kill him last time, let alone now.

"How is this the same? Last time, it was a level 50 real name BOSS. This time, it's definitely a level 60 boss with much more HP. I'm just afraid that we don't have enough time."

what are you worried about? there are so many of us here. If we each take one down, we can take out millions of HP from the BOSS.

that's right. We're already so strong. Do we still have to worry about not being able to kill the BOSS? "

it's mainly because we have Big Boss six-barreled here. A small BOSS is nothing to us.

haha, you're right. Just hold on to Big Boss six-barrel's thigh and you'll be done.

Time passed by slowly.

The monster siege had been going on for more than 40 minutes.

The three demon lieutenants that had appeared in Dangyang city had actually not been blown up.

the final BOSS of the event was about to appear.

as for the other players, they had yet to defeat the demon lieutenant.

The three demon lieutenants were still there.

It had to be said that their efficiency was really too poor.

Especially the first demon Lieutenant who appeared outside the West Gate.

It had been more than half an hour.

After such a long time, they still couldn't kill the BOSS. Could it be that they couldn't?

However, this had nothing to do with Zhang Shan. They just had to hold on to the final BOSS.

At this moment, Windcloud blade shouted in the Guild channel.

" keep your eyes open. the big BOSS is coming. talk to him when you see him. "

" what's the rush? take it slow. there's no rush. "

"Am I in a hurry? I'm just worried that if they don't pay attention and let the BOSS charge in, they'll all fall to the ground."

" you're just anxious. why do you have to find an excuse? you're making it sound so high-sounding, hehe. "

f \* ck, this is slander. You're slandering me.

Windcloud blade retorted helplessly.

however, no one took it seriously.

Rushing to fight the BOSS, this was also human nature.

Just as everyone was still talking nonsense.

Suddenly, he heard a guild member shout from afar.

f \* ck, the BOSS is on our side. What a handsome BOSS, White Horse, long spear, and a white robe.

“Where is it? why don’t I see it?”

Upon hearing that the final BOSS had appeared, Windcloud blade hurriedly asked.

Very quickly, a guild member sent the coordinates to the Guild channel.

Although the wind and cloud Guild was gathered outside the East Gate of Dangyang city to farm monsters, they were still in the middle of the battle.

However, they had 100000 people after all.

There were so many people outside the city, and they were quite far away from each other.

The members of other guilds saw the BOSS.

It was normal that Zhang Shan and the rest could not see it.

He looked at the coordinates provided by the Guild members.

Zhang Shan and the rest of the Guild’s main forces were getting ready to approach the target location.

He heard many guild members shouting in the Guild channel.

big bosses, hurry up and come over to help. We can’t hold on any longer. The BOSS is too fierce.

“it’s over, it’s over, i’m done for.”

“F \* ck, are you the only one who poured? A large patch of it did.”

f \* ck, the BOSS is too strong. I’ll lie down first.

“big brother, you won’t be lonely. i’ll be there soon.”

Zhang Shan and the rest were still a little far away and could not see the situation over there.

However, it sounded like the Guild members were falling to the ground.

What was going on? Was the BOSS going to use a big move as soon as it started?

Otherwise, why would these people fall so quickly?

Feng Yun realm asked in the Guild channel.

“What’s the situation? Can’t you guys avoid the BOSS?”

boss, we can’t avoid it. The BOSS is facing us and is charging straight at us.

that’s right. The BOSS rushed over and cut down our front row. We’re just fragile and can’t even stop the small monsters.

the key is that we can’t run even if we want to. There are monsters all around us. We can’t rush out.

“Sigh, I’m not struggling anymore. Just wait for death.”

“What kind of BOSS? Is it a real-name BOSS?”

feng yun realm continued to ask.

“Yes, it’s a real name BOSS, the general of the Nephilim guards, alludor.”

“Haha, it’s fine as long as it’s a real name BOSS.”

if you’re dead, just lie down. I’ll resurrect you after the event ends.

“Let’s hurry over.”

what the f \* ck? why is the BOSS so far away from us? there are so many small monsters here that we can’t even move.

yeah, don’t waste our time fighting the BOSS. We don’t have much time left, only about ten minutes.

f \* ck, don’t make it so that we don’t have enough time. If we can’t kill the BOSS, it’ll be bullshit.

” damn it, this is so annoying. why is our luck so bad? ”

could it be that I’ve used up all my luck when I dropped the ultimate skill book? ”

don’t talk nonsense. I’m still hoping that the big BOSS will drop a divine weapon mission.

Zhang Shan said.

“Follow me, I’ll lead the way. You guys just follow behind me and protect the two sides.”

Zhang Shan took the lead, raising his hand cannon and firing non-stop.

The bullets were fired continuously, and they quickly cleared a path.

The others quickly followed behind.
