

Passive Skills 471

Chapter 471 The three godly weapons (I)

As they were worried about the BOSS, they would use their ultimate skill again.

Even though everyone was blowing water from their mouths.

But the attacks from his hands were even more forceful.

At this moment, Zhang Shan's God's descent skill had not ended.

The duration of the deity's descent skill was one minute.

Zhang Shan had to fight for this one minute.

They would be able to deal more damage.

Just as Feng Yun Qing was about to cast her curse skill again ...

Zhang Shan instantly activated his berserk and shadow clone skills.

Three Zhang Shans stood in a row.

a swift and violent attack swept towards the BOSS.

As for the fanatic skill, he had already used it when he was tanking the damage from the BOSS's ultimate skill.

Unfortunately, he only had one berserk skill.

As for why he didn't activate his berserk skill when he was tanking the BOSS's damage just now?

Even though berserk skills could increase attack power and attack speed by 20%, it was still not enough.

However, it also had a lot of negative effects.

That was to increase the damage by 50%.

That was if he dared to activate his berserk skill while he was taking the damage from the BOSS's ultimate.

Then wouldn't it be completely dull?

Originally, when Zhang Shan was taking the damage from the two bosses' big moves, he was already in a precarious situation.

if he added another one, the damage would increase by 50%.

Wouldn't that mean that he would be instantly killed?

That was why he didn't activate his berserk skill.

It's just right to stay until now.

Under the support of Feng Yun Qing Qing's curse.

The damage he dealt this time was even more terrifying.

The curse skill could increase the damage they dealt by 100% for five seconds.

It was a very useful support skill, especially when fighting a BOSS.

Unfortunately, the entire wind and cloud Guild ...

So far, there were only two witch doctor players who had learned the curse skill.

Although the curse skill was only a small skill of a witch doctor, it was still a curse skill.

However, skill books were quite difficult to drop.

Moreover, they couldn't be sold in the auction house.

Anyway, they had been doing it for so long.

He had only managed to obtain two curse skill books.

With the support of the curse skill, the damage that Zhang Shan dealt was terrifyingly high.

Each attack dealt more than 200000 damage.

When the effect of the Holy Strike was triggered.

The damage reached a terrifying 2000000.

The damage was so high that it was a little scary.

A main body and two clones.

The three Zhang Shans lined up and instantly dealt high damage.

Under their continuous attacks.

The health of the two bosses was dropping rapidly.

Zhang Shan was just casually attacking a BOSS.

This was because the damage he dealt, excluding the critical hit factor, was balanced.

With Zhang Shan's one shot, each boss would receive six times of damage.

However, the other teammates couldn't fight the same boss.

When they were attacking the boss.

He also had to pay attention to the health of the two bosses from time to time.

He tried to keep the health of the two bosses the same.

This would allow Zhang Shan's ejection passive to continue to play until the two real-name bosses were destroyed together.

...

Therefore, they had to keep an eye on the health of the two bosses from time to time.

The boss with the highest HP would be attacked first, and the HP of the two bosses would be equal.

Time slowly passed.

They gradually reduced the health of the two bosses to only 20%.

As for higliari and biswood, neither of them used their big moves again.

At this moment, the two bosses had entered a berserk state.

The damage on Zhang Shan's body was much higher than before.

But it didn't matter.

Before the BOSS went berserk.

Zhang Shan alone could withstand the damage and did not need the support to heal.

After going berserk, the BOSS was even more ferocious.

...

However, behind Zhang Shan, there were six other teammates.

with the support of the healer.

Zhang Shan was facing the two berserk bosses without much pressure.

On the contrary, the BOSS's defense was greatly reduced after going berserk.

The damage they dealt also became more significant.

In at most a minute, they would be able to defeat the BOSS.

Seeing that victory was in sight, everyone encouraged each other.

"All the best, do it quickly. the boss is about to be killed."

"haha, divine tool beauty, quickly come into the bowl."

"F * ck, brother, are you that wild? You're treating the divine artifact as a girl?"

of course, isn't a divine weapon more fragrant than a girl? "

"hmp, i'm single."

"Damn single dog."

There were a few big shots in the team who were too excited.

They had forgotten that there were a few girls in their team.

If you treat a divine weapon as a girl ...

Then how would the girls see you?

in the end, they were met with a tragedy.

He was surrounded by these girls and had a good time.

“Uh, ladies, I was wrong. My mouth is cheap. Just treat me like a fart and let me go.”

“Haha, coward.”

In the midst of their joy, the health of the two bosses dropped faster and faster.

It didn't take long for them to almost empty their blood.

Zhang Shan quickly summoned the Panda dumpling.

He controlled the Panda ball to move forward.

Although there were two bosses on the field, the Panda bear only had one combo skill.

It was impossible to destroy both bosses at the same time.

However, it was still good to be able to kill a boss.

The Panda dumpling's 10 points of luck were used for this task.

if they could snatch one, it was one.

There might be a surprise.

Very quickly, the two bosses entered a state of empty health.

Zhang Shan took the opportunity to control the Panda bear.

Aiming at higrail, he activated his combo skill.

The Panda ball waved its small claws and struck out seven times in a row.

it directly blew higrail to pieces.

[system announcement: congratulations to Feng Yun realm, six-barreled Bodhisattva, and heart follows me Tao Wu for killing demon lower house member higrail.]

Skill point +1, medal +100.

The BOSS was killed, but biswood was still alive.

But it didn't last long.

At any time, Zhang Shan could fire the fury of the wild bull and deal five times the damage.

He directly blew up biswood.

Skill point +1, medal +100.

Finally, the two real-name bosses were defeated.

everyone could not help but heave a sigh of relief.

Compared to the bosses they had fought before, this BOSS battle was much more difficult.

It could be said to be extremely difficult.

It wasn't that these two real-name bosses were that strong.

No matter how strong the BOSS was, as long as Zhang Shan could withstand it, it would not be a problem.

however, the battlefield environment was not good enough.

At any time, he could face the harassment of other players.

Just now, when the domineering King had led his men to attack.

If it was not for the fact that the BOSS had used the demon God's will skill and almost wiped out all the players that Subjugator had summoned.

It would be very difficult for them to continue fighting.

After all, the five guilds had too few people participating in the defense.

In comparison to the millions of people that the domineering King had gathered.

Their 300,000 to 400,000 people were not enough at all.

Fortunately, their BOSS had helped them.

A wave of Demon God's will skills removed the threat.

It could be said that they were able to defeat the BOSS this time due to a certain amount of luck.

If there was a next time.

They had to be more prepared.

They would have called for more people to help them defend.

It wasn't them this time, and they didn't want to call more people over to help.

It was just that there wasn't enough time.

By the time they discovered the seven real-name bosses, more than 30 minutes had passed since the monster attack.

If there was any more delay, the wind and cloud Guild would still be fine.

The other four guilds would not be able to defeat the BOSS in the remaining time.

That was why they had attacked the BOSS so early when only their guild members were present.

after that, didn't the god of war li jing call the wei players over to help?

He just didn't have the time.

After the players that Subjugator had brought over were all killed by the boss 'will of the demon God, the boss's face turned pale.

They no longer needed any reinforcements.

If Zhang Shan and the rest had been a little slower in fighting the BOSS ...

If he didn't manage to use the demonic will skill in time ...

Their five guilds "defensive line probably wouldn't be able to hold on.

If the defensive line collapsed.

They had no choice but to continue fighting the boss.

However, all of this was no longer important.

In any case, they had already defeated the boss.

Zhang Shan looked at the time.

There were still 10 minutes left before the monster attack event ended.

They had defeated two bosses with real names.

It only took ten minutes in total, which was quite fast.

Zhang Shan looked at the battlefield of the other guilds.

After the domineering King had retreated.

The BOSS teams of the other four guilds began to attack the BOSS with all their might.

Later on, they fought faster and faster, and the other five bosses were all beaten to half health.

Moreover, they had all survived a wave of damage from the BOSS's ultimate skill.

Li Jing's team, the God of War, was the fastest.

The BOSS's health had been reduced to 40%.

As long as nothing went wrong.

They should be able to defeat the BOSS.

Even though many of them had already fallen.

However, as long as they could defeat the BOSS, it would be worth it no matter how many people died.

for the divine weapon, everything was worth it.

While the other four guilds were still working hard to kill the BOSS.

The wind and cloud Guild had already killed the two real-name bosses.

after defeating the BOSS.

The big shots in the team were all very happy.

How could he not be happy?

he defeated two bosses with real names at the same time.

No matter how bad his luck was, he should at least have a divine weapon quest item or a divine weapon mold.

if he was lucky enough, he might even get a divine artifact.

everyone urged feng yun realm.

“Boss, hurry up and open the equipment.”

yeah, I can’t wait any longer. When I get the mold, I’ll go to the NPC to accept the quest and forge equipment.

“F * ck, you’re awesome. The items haven’t been distributed yet, and you’re already thinking of doing a divine weapon mission? are you sure that you’ll get a share of the god tool mold?”

“That’s a must.”

feng yun realm opened his bag to take a look but did not directly display the items.

After he waved his hand to stop everyone from talking nonsense, he said, ”

“How are we going to split the loot? Does anyone have anything to say?”

hearing feng yun realm’s words.

Everyone turned their gazes to Zhang Shan.

this BOSS battle could be considered a collective action of the entire guild.

It could also be considered a BOSS battle for their 50-man team.

It was easy to understand that it was a Guild collective action.

After all, all the Guild members were present.

However, the others did not participate in the BOSS fight. Instead, they were in charge of defense.

Therefore, it could be considered a BOSS battle for their 50-man team.

This was also very reasonable.

After all, there were only 50 of them fighting the BOSS.

The other members of the Guild didn’t participate.

However, according to their previous distribution rules ...

These two methods of calculation were very different.

If all the Guild members were involved in group activities.

Then the items would have to be distributed according to the damage ranking.

In this way, there was no doubt that Zhang Shan was in first place.

Among the items that the boss dropped, the best one had to be his.

if they were to fight a boss in a small team of 50 players ...

That was the normal distribution of items.

Distribute according to needs by rolling.

Whoever rolled it would get it.

Hence, after Feng Yun realm had spoken, everyone turned their attention to Zhang Shan.

This right to speak was clearly on Zhang Shan's shoulders.

After all, he was the one who took on the entire boss battle.

The damage from the two bosses was all taken by Zhang Shan alone.

Furthermore, Zhang Shan alone had dealt more than half of the total damage.

If they didn't ask for his opinion and just randomly distributed them.

This team was probably going to disband.

Of course, Zhang Shan understood what everyone was thinking.

However, he didn't really care about this.

If there was something he needed, then he would take it.

if there's nothing else, then do as you please.

Even if it was a divine weapon quest item or a divine weapon mold.

If he didn't need it, why would he need it?

If he wanted to sell it, he didn't lack money now.

He still had more than 500 million gold coins in his account.

Zhang Shan did not lack the money for this God equipment mission item.

Besides, the big shots in the Guild looked rather pitiful.

They had been together for so long.

Only a few of them had managed to get their hands on a divine artifact.

That was if the relic mold or quest item that was dropped wasn't for his use.

There was no harm in giving it to them.

zhang shan said.

let's distribute them normally. We'll roll based on our needs.

After hearing Zhang Shan's words, wind and cloud blade said.

that's not very good. What if there's an item you want but you don't get it from the ROLL? wouldn't that be a waste of time? "

it's fine. Everyone has an equal chance. It'll depend on our luck.

Feng Yun realm said.

"How about this, I just took a look. This time, it dropped a divine weapon mission item and two divine weapon molds, but they are not six-use ones. whoever rolls these three items will each get six tubes of 10 million gold coins, and the other items will be distributed as usual."

"Sure."

Zhang Shan had no objections to Feng Yun realm's distribution rules.

In fact, he didn't even care about the ten million gold coins.

However, he also considered that he had contributed the most in this BOSS battle.

It was only right to get some gold coins.

I can't let him work for free.

Zhang Shan's only regret was ...

This time, it didn't drop the item he used.

He still wanted to get another divine artifact.

however, he wasn't in a hurry. he should be able to get another divine artifact ring in the twin city of the demon race.

After they had blown up the demon City Lord.

If he could get the divine artifact ring, he would have all the offensive divine artifacts.

The only thing left was to get some defensive equipment.

Defensive equipment was not something he urgently needed.

this could be done slowly.

Hearing Feng Yun realm's words, the rest of the party members were overjoyed. This time, three God-tier equipment had actually dropped.

Wouldn't they be rich then?

As for the person who won the legendary item, he would have to give Zhang Shan 10 million gold.

no one took such a small amount of money to heart.

For a divine weapon, let alone ten million gold coins, even a hundred million gold coins was something everyone was willing to pay.

Holy F * ck! There are three divine artifacts this time? ”

“Yes, we’re quite lucky this time.”

“Haha, I’m rich.”

“boss, is there anything i can use?”

Feng Yun realm did not answer everyone’s question. Instead, he displayed all the items.

Other than the items that were dropped in this BOSS battle, there were also other items.

There were also the red-colored equipment and other items that had dropped from the 13 demon spear commanders they had killed.

Zhang Shan took a look.

There were a total of 36 red equipment and 15 red materials.

There were also seven trashy skill books.

Of course, the most important thing was that there was a divine weapon mission item and two divine weapon molds.

In other words, they had just killed two real-name bosses.

One of the bosses had dropped a divine weapon quest item and a divine weapon mold.

This luck was indeed good enough. It was a big hit.

Zhang Shan took a closer look at these three divine artifacts.

[curved wood: this is no ordinary wood. It exudes a mysterious aura.]

but i don’t know what it does, so please take it and consult an informed person.

[Zi Wei divine armor (strength): mold for forging Zi Wei divine armor.]

[Ziwei divine helmet (intelligence): mold for making the Ziwei divine helmet.]

Of the three divine artifacts.

It was obvious that the divine weapon quest item was a magic staff.

In this game, only the staff and sword were made of wood.

But a magic staff couldn’t possibly be curved, right?

So it could only be a staff.

The item description did not mention where to find an NPC to repair the artifact.

However, since the start of the game, they had already made many divine artifacts.

it shouldn't be too difficult to find an NPC that could repair the divine artifact.

Previously, Feng yunbingbing had used her staff of wisdom in the West capital to find Xu Fu to repair the divine artifact, right?

This bent piece of wood was probably also for Xu Fu.

There shouldn't be any problem in triggering the divine weapon mission.

The main thing was that the divine weapon mission at the end would depend on luck.

If they were lucky, they might be able to repair the artifact by spending more gold coins and buying some materials.

If they were unlucky.

perhaps it would be the same as when zhang shan had repaired the divine necklace.

He had to do all sorts of missions everywhere.

At the very least, he had to complete the material task, which would take a lot of time.

Of course, this was true for everyone.

For the sake of a divine weapon, no matter how much time was spent, it was worth it.

as for the item descriptions of the two divine weapon molds ...

That was very clear.

A divine weapon mold wasn't like a divine weapon quest item.

For many divine artifact mission items, looking at the item descriptions was like guessing a riddle.

Maybe after all this, he didn't know what it was for.

The item description of the divine weapon mold was very clear.

One was a strength-type armor, and the other was an intelligence-type helmet.

as long as one had a mold and found the corresponding divine smith NPC, they could forge a divine weapon.

As for what other requirements there were before forging a divine weapon, he did not know.

No one had done this before.

however, zhang shan estimated that the mission still had to be completed.

However, they would only know what kind of quest they had to complete after they found the NPC with the mold.

It probably wouldn't be too simple.

The system wouldn't let players get their hands on a divine artifact so easily, so it might be similar to a divine artifact quest item.

They had to complete a series of quests before the divine craftsman NPC would start to help them forge divine weapons.

He looked at the three divine artifacts.

Zhang Shan suddenly realized something very interesting.

That was, a weapon-type divine artifact still had to rely on divine artifact mission items to obtain a divine artifact through repair.

On the other hand, the defensive godly items were created through the godly item mold.

If that was the case, it would be very interesting.

This was because until now, the other players still did not understand what a divine weapon mission item was.

It was different from a divine weapon mold.

The description of a divine weapon had always been vague.

It was similar to guessing a riddle.

if there was no special hint on the description of the divine weapon mission item.

even if the other players had a divine weapon mission item, they didn't know what to do with it.

However, Zhang Shan estimated.

With the release of the divine weapon mold ...

in the future, there might be some changes in the description of the divine weapon mission items.

Just like this bent piece of wood.

As long as one wasn't a fool, after obtaining such an item, they would definitely be able to obtain it.

He would definitely go to the various divine craftsman NPCs and try his luck.

After all, the location of the divine craftsman NPC had already been marked on the official website announcement last time.

All they had to do was to take the divine weapon and find the divine craftsman one by one.

He was not like Zhang Shan.

He had to ride on the red Hare, running around East and West.

After running around for a few days, she finally found an Qisheng.

in comparison, the difficulty of getting a divine weapon should have been reduced by a lot.

of course, the difficulty had decreased.

However, the complexity of the mission had been greatly enhanced.

In the past, when he was making divine artifacts, he didn't have to go around collecting materials.

He only needed to spend gold coins to buy the materials.

However, since the last time he repaired the necklace.

The task of repairing the divine artifact became more and more complicated.

The mission might not be difficult, but it would take a lot of time.

Zhang Shan was considered a fast worker, but he still took eight to nine days to repair the relic necklace.

As for wind and cloud swordsman, who had obtained the divine weapon quest item at the same time as him.

That guy was still collecting materials.

He had yet to repair the divine artifact.

He did not know what kind of tasks he would get if he were to forge a God-grade weapon with a mold.

Was it the same as his divine weapon mission item?

Let's wait and see.

They would find out when they took the divine weapon mold to the divine Smith NPC.

Chapter 472 the three godly items (part 2)

After Feng Yun realm displayed the item, everyone was extremely excited.

these were three divine weapons.

Moreover, there were only 50 of them who were participating in the roll.

Each divine artifact was suitable for only a dozen or so people.

there was still a high chance that one item could be obtained by rolling for ten or so people.

boss, hurry up and roll. I can't wait any longer.

hurry up and roll. I still have to do the divine weapon quest, hehe.

"in your dreams."

In fact, not to mention the others, even Feng Yun realm himself was excited.

The God equipment that the Guild already had, plus the God equipment quest that the wind and cloud swordsman was currently doing.

It could be said that he had nine divine artifacts.

However, as the boss of the wind and cloud Guild ...

He had yet to obtain a divine artifact.

As the boss of the Guild, he had no sense of existence.

This was a great opportunity.

of the three divine artifacts, two of them could be of use to him.

One was a divine weapon quest item for a staff, and the other was an intelligence-type helmet divine weapon mold.

However, in the face of a divine weapon ...

Even though he was the boss of the Guild.

However, they had to follow the rules. If they wanted a divine artifact, it would depend on their luck.

No one would give in to him.

If Feng Yun realm wanted the God equipment, it would depend on his luck and whether he could roll for it.

Two magic-type divine artifacts.

Among them, the staff was an ice, fire, and witch doctor weapon that was shared by all three classes.

As for the helmet, he would have to add the Taoist profession.

However, there were not many people who could roll for it.

There were a total of 18 people with magic jobs in the audience.

Because Feng Yun Bing Bing already had a God equipment staff, she could no longer participate in the rolling of the staff.

Other than the three Taoist priests, there were only 14 people who rolled for the divine weapon quest item, the curved wood.

The 14 of them rolled together.

Feng Yun realm still had a high chance of rolling for it.

Besides, even if he couldn't roll for the staff ...

Wasn't there still a mold for the God-grade helmet?

Hence, Feng Yun realm was extremely excited.

First, he rolled for the curved wood.

the 14 mages in the team rolled their dice one after another.

after a round of encouraging competition.

in the end, this piece of curved wood was rolled away by feng yun qing qing with 96 points.

The other big shots of the rules awakened could not help but sigh.

Damn it, a God-tier weapon was actually rolled away by a support.

how could the others not be depressed?

However, what made everyone even more depressed was yet to come.

After Feng Yun Qing Qing had reached the highest point.

He said to Feng Yun realm.

“Forget it, I’ll let you have this first. In the future, remember to return me a divine weapon.”

feng yun qing qing’s words caused everyone to turn their heads.

Wind cloud blade let out a strange cry.

“f * ck, qingqing. do you have any designs on our boss?”

“It’s none of your business,”

“F * ck, I feel like I’ve eaten a bunch of dog food.”

I’m so depressed. I didn’t get the divine weapon, and I was fed dog food.

“let’s stop talking. boss, quick, let’s roll for the next item.”

...

Feng Yun Qing Qing gave the bent piece of wood to Feng Yun realm.

the others naturally did not have any objections.

However, everyone was very curious as to why Feng Yun Qing Qing would give Feng Yun realm the bent wood.

This was a divine artifact mission item.

As long as he completed the quest, he would be able to get a divine weapon, and it would be a weapon.

Although the pursuit of weapons for auxiliary professions was ...

It wasn’t as intense as the other classes.

However, no one would be disdainful if they could get their hands on a divine weapon.

It was obvious that they did not know about the situation between Feng Yun realm and Feng Yun Qing Qing.

Hearing Feng Yunqing’s words, she gave him the divine weapon mission item.

Feng Yun realm did not say a single word.

...

He just silently rolled for the Ziwei divine helmet (intelligence).

Of course, it was also possible that the two of them were secretly chatting and no one could tell.

A man and a woman.

After Feng Yun realm started to roll, everyone's attention was on the mold for the legendary weapon.

For those big shots of the rules awakened just now ...

he had missed a god-level weapon, but he could not miss this helmet.

the number of people who participated in the violet myrtle helmet (intelligence) ROLL was three more than before.

Boss Wu also participated in the roll.

After everyone silently prayed, they carefully rolled the dice.

However, when Feng Yun Qing Qing threw the die again, the others were in despair.

This time, Feng Yun Qing was even more ruthless.

He rolled 100 points directly, killing everyone in the game.

"F * ck, miss Qingqing, you can't play like this."

damn it, you're the only one getting all the benefits. So we're all just here to play with you? "

" no, you're not the only one who got it. the boss got a bigger bargain. "

"sigh, i feel like life has lost its meaning."

"Why did the sky suddenly turn dark?"

"Ah, ah, ah, I'm so depressed."

"No, I have to go and kill people. Otherwise, I won't be able to calm down."

hehe, this lady's luck is good. You guys can't be that you haven't washed your hands for a few days, right? "

Feng Yun Qing Qing was extremely pleased with herself.

The two intelligence-type godly items were all rolled away by her alone.

Even if she gave one to Feng Yun realm, she would still have one for herself.

When he saw Feng Yunqing, he had an expression that was asking for a beating.

the other big shots of the rules awakened simply wanted to chop her up.

Of course, they were just thinking about it.

the second item had been rolled.

Feng Yun realm assigned the purple Star divine helmet (intelligence) to Feng Yun Qing Qing.

This time, Feng Yunqing kept it.

the helmet would increase health and defense.

It was quite important for a support.

“Haha, I’m going to have a divine tool soon.”

Feng Yun Qing Qing had just been smug for a while when she saw the other rules awakened glaring at her.

She restrained herself a little and didn’t say anything else.

After distributing the second divine artifact.

Feng Yun realm rolled for the last god-tier item, the purple Wei godly helmet (strength).

All the strength-type bosses in the team rubbed their fists and wiped their palms, all wanting to take this divine artifact for themselves.

there were quite a number of strength-type big shots present.

There were 12 Berserkers among them.

In addition to The Guardian and Spellblade classes, there were a total of 20 people who participated in the ROLL for this God-tier equipment mold.

Wind cloud blade muttered to himself.

“A hundred points, a hundred points, a hundred points.”

Hearing wind cloud blade’s words, the other strength-type bosses were not happy.

Damn it, you’re dreaming. If you can roll 100 points, we won’t be able to play.

“Yidao, what are you screaming for? this helmet has nothing to do with you. Don’t you already have a divine weapon? And you still want to snatch it from us.”

“I only have one divine artifact. It’s still too early. Once I’ve gathered all nine divine artifacts, I’ll leave the rest to you.”

what the f * ck, what kind of dream are you having in broad daylight? you even want to think about the nine divine artifacts? why don’t you just go to heaven? ”

nine divine artifacts aren’t that hard. You see, I already have a divine artifact axe, and with this divine artifact helmet, I’m only missing seven divine artifacts. It’ll be easy to get them.

“Go to hell!”

Wind cloud blade’s words had infuriated the others.

How could he speak like that?

what did he mean by the nine divine artifacts were not difficult to obtain?

What did he mean by “with this helmet, he would have two divine artifacts”?

Everyone had not even rolled for this helmet yet and Feng Yun realm had already reserved it?

He was simply shameless to the extreme.

Hmph, it's useless to talk. Let's see who's the real one. Let's roll the dice.

“I'll vote then, who's afraid of who?”

After saying that, wind cloud blade threw the die in his hand.

A 100-point number appeared.

Everyone was stunned.

How were the others supposed to play then?

The other big shots of the strength system looked at the dice in their hands and instantly felt that it was not good.

The dream that he had been looking forward to was shattered in an instant.

Wind and cloud blade rolled 100 points.

Then what was the point of the others rolling?

“F * ck, I've really seen a ghost today.”

that's too much. I'm so unhappy that I let this despicable man, Yidao, get his way.

boss, quickly distribute the other equipment. I'm going to kill someone.

yes, hurry up. I'm going to kill people to vent my anger.

Looking at everyone's expression, Feng Yun realm could not help but want to laugh.

Today's roll was simply amazing.

Out of the three God-tier items, two of them had earned 100 points.

He did not waste any more time and quickly rolled for the other items.

The other items that followed.

There were many items that Zhang Shan had also participated in the roll.

and his luck was not bad.

He rolled a total of two red-colored equipment and three red-colored materials.

Unfortunately, other than the materials, red equipment was trash to him.

Level 70 red equipment ... It would take years and months for someone to be able to equip it.

But it didn't matter.

no matter how trashy the red equipment was, it could still be sold for some money.

even if it couldn't be sold for the time being, he could put it in the warehouse or donate it to the guild's warehouse.

Today's monster attack had not ended.

However, his gains were not bad.

at the very least, he had obtained a passive skill.

Moreover, he had already reached Level 51 after killing two bosses with real names.

In addition, there was an income of thirty million gold coins.

After the items were distributed.

Feng Yun Qing Qing and the others had each transferred 10 million gold to him.

after the 30 million gold coins were paid, zhang shan's work was not in vain.

After all the items were distributed.

Someone shouted anxiously.

"Let's go and chop people up. Let's see where the domineering King is."

he's out of luck today. I'm not in a good mood today. I'm going to catch the domineering aura members and kill them.

Just as everyone was riding their war horses and preparing to cut down the enemy ...

Feng Yun realm said.

"Wait a moment, I'll send a red packet first. Brothers in the Guild, come over and help us defend. Send a red packet as a token of appreciation."

After Feng Yun realm finished his sentence.

He sent out a red packet of 50 million gold coins on the Guild channel.

All the Guild members who were online, whether they were alive or dead, had a share.

After Feng Yun realm sent out the red packet, the Guild channel was filled with joy.

"Haha, the boss is giving out red packets."

"Boss is mighty."

"Boss is generous."

10000 gold coins in hand, how wonderful.

“Hehe, I got 300000 gold coins.”

brother, you’re going against the heavens. If you get 300000 gold coins, Won’t You Be rich? ”

“F * ck, why did I only get one gold coin?”

you d * mned thing, don’t say anything. You only got one gold coin from 50 million gold coins, and you still have the nerve to speak.

” sigh, why did i only get 2000 gold coins? this doesn’t match my identity as the son of destiny. but it’s okay, it’s enough to go to the great sword once. ”

“I was just passing by after getting 300 gold coins.”

” a hundred gold coins worth of trash. i dare not speak. ”

Zhang Shan opened the red packet and received a thousand gold coins.

If it was in the past, 1000 gold coins would be enough for half a month’s living expenses.

As for now ...

It was better than nothing.

To the members of other guilds ...

The boss of the Guild giving out red packets was, of course, something to be happy about.

Furthermore, Feng Yun realm had sent out quite a lot of money.

There were 50 million gold coins.

The entire wind and cloud Guild only had a total of 100000 members.

On average, everyone would get 500 gold coins.

Of course, the amount of money that each person would get from the red packets sent out in the game was random.

Some people were lucky and got more.

some people had bad luck and managed to get fewer.

There were even some guild members who only managed to get one gold coin.

to this, zhang shan could only say.

you can’t blame the earth for not having gravity.

He could only blame his own luck for being too unlucky.

After everything was settled.

Feng Yun realm said in the Guild channel.

“Those who want to kill people, let’s go together. We’ll look for Guild domination’s people to kill.”

that's right, kill that b * stard. He f * cking came to cause trouble while we were fighting the BOSS.

Under Feng Yun realm's lead, the rest of the Guild members left.

Only the members of the war god Guild and the other three guilds were still working hard to fight the BOSS.

he watched as the people from wind and cloud guild left.

the people from the other guilds looked at him with envy.

It was really enviable.

They had been fighting a real-name BOSS for so long, but they still hadn't defeated it.

The wind and cloud Guild had already defeated two bosses with real names.

Moreover, they were almost the same. Everyone in the Guild was fighting with all their might.

On the other hand, the wind and cloud Guild had only sent a mere 50 players and they had defeated the two bosses so quickly.

his strength completely crushed them.

At least, that was the case when it came to fighting bosses.

After feeling envious, they couldn't help but rejoice.

their BOSS's health was getting lower and lower.

They could definitely defeat the BOSS before the event ended.

This was a real-name BOSS, so it should drop a divine weapon mold.

For the four guilds.

It was good that the people from wind and cloud Guild had left.

At the very least, they didn't have to worry about the players from wind and cloud stealing their BOSS.

Although they had an agreement in advance.

they each fought their own BOSS.

however, in the game, such a verbal agreement was no different from farts.

if the people from wind and cloud guild were to turn against them and steal their BOSS ...

Then they would be in for a tragedy.

Let's not talk about whether the people from wind and cloud Guild had the ability or not.

Snatching away their boss.

But one thing was certain.

As long as the wind and cloud Guild fell out with them, they would definitely not be able to defeat the boss.

Previously, domineering King had brought his men to harass them.

they had almost failed to defeat the boss.

On the other hand, the people from wind and cloud Guild did not bring as many people as domineering King.

However, they didn't have many people left.

In order to defeat the boss, countless players had come forward.

Tens of thousands of people had fallen from each side.

The remaining members of the four major guilds added together did not have as many members as the wind and cloud Guild.

What if the wind and cloud Guild fell out with them?

They would definitely not be able to win.

Fortunately, Feng Yun realm was a kind person.

He wasn't eating the food in the bowl and looking at the pot.

After killing their two bosses, they left with their people.

he didn't continue to stay at the scene.

As for letting the people of wind and cloud Guild help them defend?

There was no need to do so now.

After the domineering King left.

No one had any ideas about them anymore.

now, the biggest threat to them was their original partner, the wind and cloud guild.

Now, the people from wind and cloud Guild had left.

It was exactly what they wanted.

In fact, Feng Yun realm was very clear about the other guilds "intentions.

After defeating the BOSS and distributing the items, the players were all stunned.

Then, he left with his guild members.

Not only that, but they were also going to cause trouble for Guild domineering aura.

Even if this didn't happen.

He would not let the People of the Wind and cloud Guild continue to stay here.

Wasn't this a waste of time?

The other four guilds were still trying their best to fight the BOSS.

If the people from wind and cloud Guild were just watching from the side.

Would others be at ease?

wouldn't others think that they had already defeated the BOSS and were still here?

are they trying to steal our BOSS?

Other than the war god Guild and Feng Yun realm, who had some friendship with them.

The other three guilds did not have much of a relationship with Feng Yun realm and the others.

It could only be said that there had never been any major conflicts between them.

If the wind and cloud Guild still didn't leave after defeating the boss.

They would definitely be panicking in their hearts.

A divine weapon moved people's hearts.

How would other people know what you were thinking?

Hence, Feng Yun realm did not even say a word and immediately left the scene with his men.

Action was the best explanation.

the people from wind and cloud guild left the scene.

Naturally, he made his stand clear.

They wouldn't steal their boss.

Feng Yun realm led his guild members and quickly left the scene.

However, not all of the Guild members had followed them.

Some of the Guild members were still lying on the ground.

Just now, domineering aura had used a few big moves and two scrolls.

He had really knocked down quite a few of them.

Although the support classes began to revive the Guild members on the ground after the cooldown of their resurrection skills was over, they were still very strong.

However, they had yet to resurrect all the people who had fallen to the ground.

Secondly, there were some guild members.

After Subjugator had left, they no longer needed to defend themselves against the BOSS.

and if they continued to stay here ...

These bosses would use the demon God's will skill from time to time.

they really couldn't stand here and couldn't take it.

After getting Feng Yun realm's approval.

many of the guild members had also returned to the city after subjugator had left.

There were only about ten thousand guild members who were following them to fight.

However, the number of people was not small.

Zhang Shan believed that at this moment, there would not be more players from Guild domineering aura who were still outside Heaven's Gate pass than them.

The only problem now was that he had to find the domineering King as soon as possible.

Even though the domineering King had retreated earlier, he was still in a daze.

However, he should still be fighting the boss near Heaven's Gate.

He didn't manage to snatch the real-name boss.

There was still the Spearman commander that he could beat up.

he believed that subjugator would not easily give up this opportunity to attack the city.

He couldn't just give up on the boss and farm monsters to level up.

It was not easy to find a normal red BOSS.

The problem now was ...

They knew that the domineering King was near Heaven's Gate, and the spearmen were the commander.

however, they did not know the exact location.

He had to find the person as soon as possible.

If only it was a little later.

The monster attack was coming to an end.

Once the event ended, there was an 80% chance that Subjugator would slip away.

If they wanted to find the tyrant king again, it would not be so easy.

That guy would definitely go back to his own territory and farm monsters.

if that was the case, even if they wanted to find trouble with the domineering king, they wouldn't be able to do so.

Hence, after running for a while, Feng Yun realm said in the Guild channel.

let's split up and search. We'll form groups of 500 people. Kill anyone from Guild Subjugator we see. If we encounter someone we can't beat, call for backup. Remember to inform them when you find Subjugator.

"Received."

"I understand."

After Feng Yun realm had finished speaking.

They were divided into twenty teams and scattered out of Heaven's Gate.

Zhang Shan was in the same group as Feng Yun realm.

He was running quickly on the map.

Along the way, he killed every member of the domineering aura Guild he saw.

Unfortunately, not many of the Guild members were still in Heaven's Gate.

As they ran, they only managed to find a group of players from the domineering aura.

However, for Zhang Shan's team, even though they had only found a wave of domineering Aura's players, they had never been able to find them.

However, they were, after all, divided into more than twenty teams, scattered around Heaven's Gate.

The other teams had also found members of the domineering aura Guild.

Some of the teams even ran into the domineering aura players and almost killed the demon Spearman commander.

He took the opportunity to kill and steal the boss.

The wind and cloud Guild attacked everywhere.

Subjugator received the news very quickly.

When he first heard the news, he was in a panic.

they thought that his previous actions had angered the five guilds.

Right now, the five guilds wanted to take revenge on the people who had surrounded them.

However, after careful confirmation ...

Only then did Subjugator realize that it was only the people from the wind cloud Guild who had come to attack.

Moreover, there were not many people in the wind and cloud Guild.

There were only about ten thousand people.

After confirmation.

The tyrant king was furious.

Was he looking down on him?

Feng Yun realm brought ten thousand men and they dared to find trouble with them.

Thinking of this ...

Subjugator said to the Guild members beside him.

send people over. Quickly send people over and annihilate the wind and cloud Guild. They're too arrogant.

Chapter 473 Six-pipe Bodhisattva is everywhere

After receiving the news that the wind cloud Guild was attacking the members of the domineering aura Guild ...

The domineering King was shocked at first, but then he was furious.

In the beginning.

He had thought that the war god Guild had brought the five great guilds to take revenge on them.

After careful confirmation.

Only then did Subjugator realize that the ones attacking them were only the members of the wind and cloud Guild.

Moreover, the number of players in the wind and cloud Guild was not large. There were only about 10000 players.

At this moment, the domineering King finally reacted.

It was impossible for the war god Guild and the other three guilds to take revenge on them now.

They were still fighting the big BOSS.

so far, the only system announcement was that the wind and cloud guild had defeated two bosses with real names.

The other four guilds were not finished yet.

How could he have the time to take revenge on them before the BOSS was defeated?

It would be good if those four guilds didn't have to worry about them going over to harass them.

Feng Yun realm had brought tens of thousands of players and they dared to attack the members of Guild domineering aura everywhere.

Just how much did they look down on him, the domineering King?

Subjugator could no longer hold it in. He immediately ordered the Guild members around him to send more people over.

He wanted to make the people from the wind and cloud Guild stay in one fell swoop.

Although many of them had fallen before and had yet to be revived.

However, there were still many players in the state of Qin who could not withstand the damage from the real-name BOSS's demonic will.

Therefore, he left Heaven's Gate.

It was also time to pull these people up together.

Let's fight the wind and cloud Guild.

Tyrant king didn't believe it.

They wouldn't be able to defeat the people from wind and cloud.

a guild member said worriedly after hearing subjugator's command.

"The monster attack is not over yet. We haven't killed all the big bosses yet, and there might be more Demon God's will skills later. If we call people over now and the demon God's will skills appear again, many people will die."

"It's okay. We'll be responsible for arranging the resurrection of those who fall."

Hearing these words, the other guild members did not try to persuade him anymore.

In fact, it wasn't just the domineering King.

The other members of domineering aura. His hatred for the wind cloud Guild was not small at all.

If they had the chance, they would, of course, want to go all out against the wind and cloud Guild.

Although it was possible to face the BOSS 'will of the demon God at any time now, it was still too late.

But it had to be said that this was an opportunity.

After all, the wind and cloud Guild had very few members.

Feng Yun realm only brought ten thousand men with him and they were scattered all over the place.

They had not heard that the wind and cloud Guild had called for other reinforcements.

As long as there were other Qin players.

It could be reached at high speed.

It was very easy for them to form a situation where they outnumbered the enemy.

After all, the battlefield was just outside Heaven's Gate.

It was easy for them to gather manpower.

Just as Subjugator was in the middle of mobilizing his men ...

zhang shan followed feng yun realm as they walked around heaven's gate fortress.

However, the area outside Heaven's Gate was not small.

Zhang Shan and the others searched for a while, but they could only find a group of domineering Aura's members.

As for players from other countries, he had encountered quite a few.

Most of the players were fighting against the demon Spearman commander.

It was a pity that Zhang Shan's main purpose this time was to pick a fight with the domineering King.

It wasn't to fight the BOSS.

So, they didn't steal the BOSS from these people.

while they were wandering around.

...

A guild member shouted in the Guild channel.

tyrant king has been discovered. Hurry up and come!

"Where is it? send me the coordinates."

Very quickly, someone sent out a coordinate in the Guild channel.

after seeing the coordinates.

Windcloud blade laughed.

haha, I've finally found the tyrant king.

let's go! Let's kill the domineering King!

Under Feng Yun realm's lead, they formed a team of 500 players and rushed towards the coordinates.

Not long after, they saw the domineering King.

It was different from what they had imagined.

...

At that moment, Subjugator was not fighting the BOSS.

Instead, it was as if he was waiting for them.

There were tens of thousands of Qin players gathered around the Overlord.

Seeing this formation.

everyone was very surprised.

From what they could see, shouldn't domineering King be fighting a BOSS?

How could he have brought tens of thousands of people to gather together?

what's going on? could it be that the tyrant king is waiting for us? "

"It's very likely. We were attacking everywhere just now, so of course the domineering King wouldn't let us go. He gathered so many people together, maybe he wants to fight with us."

"There are so many people here. It's several times more than us."

what's there to be afraid of? what's the use of having so many people? they're all trash.

that's right. I haven't even released my ultimate move yet. I can use them to test my saber.

they only have tens of thousands of people. It's not a lot. We'll just do it.

Zhang Shan followed Feng Yun realm. After finding the domineering King, he did not rush up immediately.

There seemed to be a lot of people on the other side.

Of course, the Qin players that Subjugator had brought with him were many times more than them.

but they weren't worried at all that they wouldn't win.

It wasn't as if the wind and cloud Guild didn't have people.

However, the others were still on their way.

As long as they waited a little longer, they would have more than 10000 people.

Even though they still didn't have as many people as domineering King.

However, his strength wasn't any weaker than the tyrant king.

After seeing them, the domineering King said,

He waved his hand and called out without saying a word.

kill them! Annihilate the people from the wind and cloud Guild!

After he finished speaking, the domineering King led tens of thousands of people and charged towards Zhang Shan and the others.

In the face of the tens of thousands of domineering King players ...

Zhang Shan's team had only just arrived with two teams. The total number of people was just over a thousand.

However, no one panicked at all.

Feng Yun realm waved his hand and said.

let's go too. Don't save on those with big moves. Let's go up and use our big moves.

After he finished speaking.

Feng Yun realm galloped his horse forward.

After the Qin players led by the domineering King had gotten close to them ...
he used rain of fire.

The endless rain of fire covered the Qin players.

The bosses of the other guilds were also not polite.

They charged forward on their horses.

All sorts of ultimate skills were thrown at the players from the state of Qin.

Other than Zhang Shan's God's descent skill, which had been used when fighting the BOSS just now, there was no one else.

The others had not used any of their big moves yet.

This was especially true for Feng Yun Kuang's battle axe, which he had just learned today.

he rode his horse straight into the enemy's crowd.

Then, he activated his destruction skill.

Violent shockwaves swept out in all directions with Feng Yun Kuang's battle axe as the center.

Instantly, a large area of Qin players was cleared.

"Hahaha, this big move is indeed powerful."

"idiot, run quickly, or you'll be surrounded and beaten to death."

The Berserker's ultimate skill was slightly different from the ultimate skills of other classes.

He had to rush into the crowd before he could cast it.

It was not like other big moves that could be cast from a long distance.

Therefore, when they were surrounded, they had no choice.

After the Berserker used his big move, he had to run back.

He couldn't be like Feng Yun Kuang's battle axe.

After using his big move, he was still showing off.

This person probably didn't know how the word 'death' was written.

the moment the two sides came into contact.

The wind and cloud Guild had used seven or eight big moves in a row.

Almost half of the Qin players who had brought Subjugator over had been defeated in an instant.

However, in comparison to the wind and cloud Guild ...

There were still a lot of Qin players left.

After nearly half of the tens of thousands of players were killed.

There were still around thirty to forty thousand of them left.

In contrast to the tens of thousands of players from wind and cloud Guild.

In terms of numbers, the Qin players still had the advantage.

But Zhang Shan was not worried.

There were only tens of thousands of people, so there was nothing to be afraid of.

There were still tens of thousands of players in the wind and cloud Guild.

Even if he was alone.

If he dared to follow, then he would go all out against the tens of thousands of players from the domineering King.

Zhang Shan was riding on the red Hare, and the fast horse charged straight towards the opposite side.

He ran while firing.

the hand cannon kept firing bullets at the players from the state of qin.

Although Zhang Shan did not have any big moves now.

However, he still had his teammates.

it was just a few tens of thousands of qin players, he didn't need to worry about them.

Seeing Zhang Shan's invincible posture.

Many of the Qin players were panicking.

they did not dare to go head to head with zhang shan.

The domineering King, who was standing at the back, shouted after seeing the situation.

"Don't bother with six-barreled Bodhisattva. Kill the others first."

The domineering King knew that Zhang Shan would not be easy to kill.

they had been taught many lessons.

More people might not necessarily be able to kill Zhang Shan.

But it didn't matter.

Zhang Shan was very strong, but the other people in the wind and cloud Guild were not as strong as him.

Subjugator's plan was to first defeat the other members of wind cloud Guild, then deal with Zhang Shan.

Under the command of the domineering King.

the qin players completely ignored zhang shan's existence.

30,000 to 40,000 players surrounded the 10,000 players from Wind and Cloud Guild and launched a rapid attack.

The two sides collided head-on, and countless people fell to the ground in an instant.

Even though there were more Qin players who fell to the ground.

however, the Wind and Cloud Guild had also lost quite a few people.

This made Zhang Shan depressed.

In the past, during the chaotic battle.

The enemies were all focused on him.

Because he was the strongest.

When both sides fought, they naturally had to get rid of the strongest.

However, the tyrannical King didn't play by the rules at all.

The Qin players completely ignored Zhang Shan.

The moment they saw Zhang Shan, they would run away quickly.

When they saw the other members of Wind and Cloud Guild, they were like red-eyed rabbits.

He charged forward and attacked.

This made Zhang Shan unable to hit even if he had the strength.

No one attacked him.

Zhang Shan could only chase after the others and kill them.

However, in this case, his efficiency in killing would be much lower.

After all, even though he was safe during the pursuit, his firepower was definitely not as good as a standing Fort.

After the Qin players saw Zhang Shan, they all scattered and fled.

It seriously affected his killing efficiency.

Zhang Shan was also helpless. He could only catch up to one and beat one down.

It couldn't be like the chaotic battle in the past.

In the face of an enemy's siege, he could stand still.

When he was being pursued, his ejection was passive and could not be used at all.

When others saw him, they would run.

This made Zhang Shan's catapulting passive. How was he going to perform?

There was no target at all. Let him play.

He watched as his guild members fell to the ground one after another.

Feng Yun realm shouted.

“Everyone gather, we’ll fight together.”

He finally understood.

The domineering King was afraid of Zhang Shan.

They were especially picking on the weak.

That was why he had to gather everyone in the Guild.

This way, Zhang Shan could also be with them.

Even if the domineering King wanted to avoid Zhang Shan, he could not.

Under Feng Yun realm’s command, the remaining guild members quickly gathered together.

Zhang Shan also joined up with the others.

After a chaotic battle.

The wind and cloud Guild only had 5000 to 6000 players left.

As for the Qin players, there were still close to 20 thousand.

After the people of wind and cloud Guild had gathered together.

Zhang Shan was at the forefront.

If the Qin players wanted to charge, they would not be able to avoid him.

Under his rapid fire.

Countless Qin players were instantly wiped out.

Haha, fighting is still as good as ever.

it would be troublesome to shoot one person at a time.

This was exactly what he wanted.

One shot and he could knock down 12 of them. That was what he called satisfying.

This was called efficiency.

Zhang Shan was no longer satisfied with the operation of killing a child with one shot.

What he wanted was to kill the children with one shot. That would be more exciting.

however, zhang shan could only guard one direction.

He could not reach the Qin players in the other three directions.

obviously, the overbearing king had also noticed this problem.

He shouted.

“Attack in another direction and avoid six-barreled Bodhisattva.”

As a result, an awkward situation quickly formed.

The players from the state of Qin surrounded the players from the wind and cloud Guild and attacked them.

However, as long as Zhang Shan appeared in the direction ...

The Qin players quickly went around.

but zhang shan was not a dead man.

He could also change his position.

Did he see any Qin players attacking his direction?

Zhang Shan quickly switched to another position.

The battle soon reached a stalemate.

In the beginning, Subjugator used his advantage in numbers to surround and attack the wind cloud Guild.

however, after zhang shan had continuously changed his position.

the qin players realized that zhang shan was everywhere.

What should he do? Are we still going to fight?

According to what the domineering King had said.

They had to avoid Zhang Shan's direction.

however, they could not avoid it at all.

Wherever they went, Zhang Shan would follow.

the battle quickly froze.

the people from wind and cloud guild gathered together to defend.

As for the Qin players, they could only watch from a distance.

They didn't dare to continue charging.

This was because as long as they charged, they would encounter Zhang Shan.

As long as Zhang Shan was there, they would not be able to charge in.

Charging over would be suicide.

They couldn't even kill a single member of the wind and cloud Guild before they lost their lives.

However, the Qin players did not attack.

It didn't mean that the people from the wind and cloud Guild wouldn't attack.

although they had gathered together to defend, they were still in the same place.

However, they could also gather together and attack.

Under Feng Yun realm's leadership, there were only five to six thousand players left in the wind and cloud Guild.

They formed a formation and slowly approached the Qin players.

As for the Qin players, they could only retreat.

Even though they were unwilling to retreat.

However, he really couldn't wash it away. What else could he do if he didn't retreat?

Were they going to wait for the people from the wind and cloud Guild to crush them?

Looking at such a passionate scene, even the domineering King was helpless.

Even though they still had the advantage in numbers.

However, as long as Zhang Shan was around, they could not charge forward and could only be beaten.

They watched as the people from wind and cloud Guild approached.

The players from the state of Qin retreated again and again.

Tyrant king didn't know what to do either.

Was he going to run away?

They still had nearly 20000 players, while the wind and cloud Guild only had 5000 to 6000 players left.

if wind cloud's 6000 players chased after them, the situation would be too ugly.

Of course.

even though he was unwilling, he knew.

they really couldn't do anything to the wind and cloud guild.

If he could not solve Zhang Shan's problem.

they simply couldn't break through the wind and cloud guild's defense.

However, to defeat Zhang Shan, how could it be easy to negotiate?

After observing the situation for a while.

The tyrant king ordered.

“let’s retreat,”

After saying that, he turned around and rode away.

The other Qin players also quickly followed.

Holy F * ck! The domineering King is running! Hurry up and chase him!

f * ck! We can’t let him get away this time! Catch up to the domineering King and kill him!

he saw that the domineering king wanted to run.

the wind and cloud guild’s players could no longer care about anything else and maintained their defensive formation.

Instead, he quickly rode his horse to catch up.

A chaotic battle began not long after.

It became a scene of five to six thousand players from the wind and cloud Guild chasing after nearly 20000 players from the state of Qin.

Zhang Shan galloped forward on his horse. He stared at the domineering King in the distance and chased closely.

However, the Mount of Subjugator was also a hero’s Mount.

His speed was not any slower than his.

For a moment, Zhang Shan could not catch up at all.

Chapter 474-chasing through 18 streets

In the face of the wind and cloud Guild’s group suppression.

Even tyrant king was at his wit’s end.

He could only order the Qin players to retreat.

this was what a chaotic battle was like.

They would either suppress the other party and run if they couldn’t beat them.

The reason was simple, you can’t suppress others.

Of course, other people would come and beat you up.

although the number of players in the wind and cloud guild was much lower than the players in the state of qin, the number of players in the wind and cloud guild was much lower.

However, the wind and cloud Guild only had around 5000 to 6000 players left. They were not weak at all.

With Zhang Shan at the front, the Qin players would not be able to rush up no matter what.

Every time they charged, they had to face Zhang Shan's fierce firepower.

they were killed for no reason, and the losses of the wind and cloud guild were very small.

If this continued, he would be able to charge a few more times.

The remaining 20000 Qin players would all be dead.

Therefore, he had no choice but to order a retreat.

After giving the order to retreat.

Tyrant king was the first to turn his horse around and run.

He had no choice but to run.

He knew that he was a magnet for fire.

once they retreated, the people from the wind and cloud guild would definitely chase after him.

If the other Qin players were slower, they might have a chance of surviving.

However, he was the domineering King.

He would definitely be chopped into pieces by the chaotic blades.

Who knew, after falling to the ground, he would still be spawn camped.

Tyrant king didn't want to die Here.

It was not that he was afraid of death.

It was just a game. What was so scary about dying?

If he died, at most, he would only drop a level.

But even if he died, he should die with some value.

In any case, they couldn't defeat the wind and cloud Guild now.

Then why did he have to die?

Isn't it good to be alive?

After tyrant king gave the order ...

The Qin players quickly retreated.

In the beginning, the Qin players were still covering for each other and retreating in an orderly manner.

However, not long after, the wind and cloud Guild chased after them.

The Qin players who were responsible for protecting them fell to the ground one after another.

The other Qin players saw that the situation wasn't right.

Then, they didn't say anything and started to flee in all directions.

A fellow Daoist should die rather than a poor Daoist.

He had to think of a way to save his life first.

Zhang Shan chased after the domineering King with all his might.

It was only because of the fact that Subjugator was the first to start, and that everyone was a hero Mount.

Zhang Shan would not be able to catch up to him in a short time.

Not only that, in the process of his pursuit.

From time to time, some players from the state of Qin would appear on the road.

These people weren't here to protect the domineering King.

It was because he was in a panic and did not choose the right path. He did not pay attention and ran to Zhang Shan's gun.

Zhang Shan did not hold back.

as he chased after subjugator, he would occasionally fire at the players from the state of qin who were within his range.

Although Zhang Shan's current goal was to catch up to the domineering King and then take him down with one shot.

However, since there were Qin players who came to him, he would not be polite.

...

One shot wouldn't waste much time.

the overlord continued to run.

Zhang Shan was not the only one chasing after him.

The other members of wind and cloud Guild, including a few big shots, were also chasing after them.

Wind cloud blade was right beside Zhang Shan.

He was chasing after the domineering King.

He was not like Zhang Shan, who would occasionally fire at other Qin players.

Windcloud blade did not care about anything else. He continued to bite down on Subjugator.

Slowly, he was already ahead of Zhang Shan.

Windcloud blade bit down on Subjugator as he shouted.

"Hey, kid, don't run. There's no such thing as a domineering King running away in panic. Stop, let's have a one-on-one fight."

...

Hearing wind cloud blade's call ...

Tyrant king was so depressed that he wanted to vomit blood.

Damn it, I'm not running? Only a fool would not run.

And a f * cking one-on-one?

Could he be lying to a ghost?

if he dared to slow down and wait for zhang shan to catch up ...

He was definitely going to shoot him.

Then what's the point of a 1v1?

The dejected tyrant king ran ahead of them.

In the beginning, he could run quite smoothly.

Zhang Shan and the rest followed behind, but they could not close the distance between the two sides.

However, as the Qin players collapsed ...

There were Qin players everywhere.

Many of the Qin players were also running for their lives on the same path as the domineering King.

this made his escape not as smooth as it was at the beginning.

Occasionally, there would be a traffic accident.

From time to time, there would be people blocking his way.

How was the tyrant king supposed to run?

This game didn't have any impaling.

if someone was in front of you, you would have to go around them.

As a result, the speed at which the tyrant king was running was getting slower and slower.

Windcloud blade, who was chasing after them, could not help but feel happy when he saw this situation.

The Qin players could block the path of the domineering King.

however, it could not block wind cloud blade.

Because Zhang Shan was following behind.

Seeing anyone blocking his way, as long as they were within his shooting range, Zhang Shan would have already shot them down.

Zhang Shan could easily defeat the Qin players.

However, this was not the case for the overbearing King.

He couldn't possibly cut his own people.

Therefore, whenever he encountered someone blocking his way, he would be in a daze.

He could only take a detour and continue running.

This led to ...

Even though it was the domineering king who had started running first.

However, wind and cloud blade, Zhang Shan, and the rest were getting closer and closer.

This was because wind and cloud blade did not need to take a detour. Instead, he chased after Subjugator in a straight line.

As he ran, he looked back.

When he saw wind and cloud blade, Zhang Shan, and the rest behind him, the distance between them was getting closer and closer.

He couldn't help but feel anxious.

At this rate, he would be caught before he could even make it back to Heaven's Gate pass.

However, he had no choice.

There were always people blocking the way, what could he do?

he couldn't just kill the people blocking his way.

Besides, even if he wanted to kill someone, he would not be able to do it.

Even his speed of hacking was not as fast as Zhang Shan's.

If he had the time to kill people, he might as well take a detour.

However, when he saw wind and cloud blade closing in on him from behind ...

He felt that he couldn't keep running like this.

if this continued, it would not be long before wind cloud blade caught up to him.

However, it was clearly impossible to turn back and fight head-on.

No matter how iron-headed the tyrant king was.

He didn't dare to turn around and fight back.

There was also Zhang Shan and the rest who followed behind.

He might not even be able to defeat wind and cloud blade alone.

Wind and cloud blade had a God-tier battle axe.

The tyrant king didn't have a divine weapon.

Moreover, in terms of level, wind and cloud blade completely crushed him.

Even if his head was caught by the door.

He wouldn't turn back.

As he ran, he looked left and right.

Initially, he had a group of guild members with him.

But now, they were all separated.

Even if he wanted others to drag him down, he couldn't find any help.

He looked at the trees on both sides of the road.

On the way, there would be Qin players running for their lives.

However, there weren't many people in the woods on both sides.

Moreover, there was more space in the forest, and it was more convenient to move around.

The only problem was that it was impossible to run fast on a horse in the forest.

However, as he thought about it ...

He could not run fast in the forest.

Wind and cloud blade and Zhang Shan, who were chasing after him, could not run fast either.

Thinking of this ...

the tyrant king turned around decisively and rushed into the small forest on the left.

Due to the sudden change in direction, wind cloud blade, who had been chasing after him, had almost gone over his head.

He also hurriedly turned left and entered the small forest to give chase.

Zhang Shan and the rest who were following behind also turned around to give chase.

In this game.

It had to be said that it was not easy to hunt down players.

Just as everyone was running almost as fast as they could.

If others started first, it would be difficult to catch up.

Unless the person being chased made a mistake, or someone else intercepted them.

Otherwise, it wouldn't have been easy to catch up.

If the Mount was faster, then it would be even more so.

no matter how many people were chasing after them, it was impossible to catch up.

Although they had been chasing him for a long time, they still hadn't been able to catch up to him.

However, wind and cloud blade, Zhang Shan, and the rest did not give up.

It didn't matter to him as he ran into the forest.

if he was far away from the main road, it would be even more difficult for him to return to heaven's gate pass.

As long as the domineering King did not return to Heaven's Gate, Zhang Shan and the rest would have a chance to catch up to him and cut him down.

Zhang Shan did not believe it.

The tyrant king would never make such a mistake.

Could he keep running?

What if he accidentally ran into a dead corner?

Then wouldn't they be able to chase after the dog and kill it?

After he ran into the forest ...

Zhang Shan and wind and cloud blade, as well as a few other big bosses of wind and cloud Guild, were still hot on their heels.

However, after entering the forest, the speed of their horses could no longer be used.

Compared to the fast horses on the main road, the speed of riding a horse in the woods was extremely slow.

It was just a little faster than getting off the horse and walking.

Windcloud blade called out as he pursued.

"Let's not all go in a straight line. We'll split up and outflank them from both sides."

"Alright," he said.

After wind cloud blade finished speaking ...

The other Guild bosses quickly surrounded them from both sides.

At the beginning, when they were on the main road.

Everyone's mounts were running very fast, so there was no point in surrounding them.

However, things were different now.

After entering the small forest, everyone's speed instantly slowed down a lot.

Moreover, the area of the small forest was very large.

They could totally outflank him from the left and right.

It forced the domineering King in one direction.

No longer, he could run wherever he wanted to.

As he ran, he looked back.

He soon realized.

running for his life in the forest was a bad decision.

This was because he was not the only one chasing after him.

Rather, there were a few people.

Originally, he thought that after entering the small forest, he would be able to escape.

it was more convenient to escape. he could run wherever he wanted to.

However, when they saw wind cloud's members closing in on them from both sides ...

Tyrant king knew that he was wrong.

he couldn't run to either side.

This was because the moment he turned ...

No matter which direction he went, he would run into the members of wind and cloud Guild.

He could only run for his life in a straight line.

However, how long could he escape in a straight line?

The map in the forest was completely different from the main road.

There would often be all kinds of obstacles that he couldn't cross at all.

He had to take a detour.

However, if he took a detour, he would definitely bump into the people from the wind and cloud Guild.

as long as he was held back for a second or two.

He could basically type GG.

If the domineering King could notice the problem, Zhang Shan and the rest could as well.

Seeing that Subjugator was at his wit's end, wind cloud blade could not help but laugh.

haha, the domineering king is dead for sure! Brothers, keep up the good work!

They continued to chase for more than a minute.

A large rock suddenly appeared in front of him, blocking his path.

He had no choice but to bite the bullet and run to the right.

The person who had outflanked them from the right side was none other than Feng Yun Kuang, battle axe.

When he saw the domineering King approaching him, he was stunned.

Feng Yun Kuang's battle axe charged forward, and the axe landed on Subjugator.

Not only that, but the Berserker's charge skill could slow the enemy down by three seconds.

After Feng yunkuang's battle axe had reached him ...

The tyrant king knew that he was finished.

He no longer ran, but instead raised his axe and exchanged blows with Feng Yun Kuang's battle axe.

it was a pity that zhang shan and the rest would not give him the chance to perform.

After being slowed down by charge.

Zhang Shan quickly caught up.

The shot actually had the effect of Holy attack.

the domineering king fell to the ground.

Looking at the fallen domineering King, the few of them surrounded him.

Windcloud blade said gloomily.

I say, six-Barrens, can't you slow down a little? you f * cking shot out a Holy attack with one shot, and you didn't even let me cut you twice.

" save my ass. even if the six-barreled boss didn't have the holy attack effect, it wouldn't even take two shots to kill subjugator. "

"You're right, you pervert."

"What do we do now? Are we going to camp here?"

forget it, guarding the corpse is a waste of time. Spare his dog shit.

"Oh, then let's go. Let's see if there's anyone else we can kill."

After defeating the tyrant king ...

They didn't continue to guard the corpse.

To them, camping the corpses was a waste of time.

It would be more appropriate to call the others to guard the corpse.

However, he considered that this place was really a little close to Heaven's Gate pass.

If he continued to guard the corpse, the battle might get bigger and bigger.

In order to resurrect their guild leader ...

There would definitely be more and more people coming.

Considering all these.

After defeating Subjugator, they quickly ran away.

If he had the time to guard the corpse, he might as well find more people to kill.

Just now, the Qin players had scattered in all directions.

In order to kill the domineering King, they had only killed a few people.

Thinking of this, Zhang Shan and the rest quickly rode their horses and ran out of the small forest.

They chased after the other Qin players.

As for whether or not the fallen Subjugator would be resurrected.

then let him be.

Zhang Shan and the rest were scattered outside the Heaven's Gate pass, hunting down the Qin players.

However, as time passed ...

More and more Qin players rushed to the battlefield.

Although they had already defeated many of the Qin players.

However, the Qin players that they encountered didn't seem to have decreased.

On the contrary, there were more and more of them.

Some of the Guild members were in the process of killing.

If he was not careful, he would fall into the trap of the Qin players.

He was surrounded and chopped into pieces.

The situation was getting worse.

Feng Yun realm shouted in the Guild channel.

"Everyone, gather. Don't split up."

"received."

If this continued, the Qin players would probably use up all of their remaining people.

However, their individual strength was much stronger than the normal Qin players.

But there were many of them.

If they were to split up and attack in all directions like before.

It was probably going to be a tragedy.

That was why Feng Yun realm had asked everyone to quickly gather.

As long as they were gathered together, they would not have to worry about the Qin players.

Not long after, the remaining members of wind and cloud Guild continued to gather together.

Zhang Shan looked at the number of people and realized that it had decreased by a lot.

Now, there were only about three to four thousand people left.

In other words, more than 10000 of them had come.

at least eight to nine thousand people were knocked out.

After seeing that no one was present.

feng yun realm said in the guild channel.

those who are on the ground, give us your coordinates. We'll go and save them one by one.

For the rest of the time, under Feng Yun realm's lead, they followed the coordinates provided by the fallen members and found their way there.

He resurrected the people who had fallen to the ground.

On the way, they would occasionally meet players from the state of Qin, and they would chase them.

But they wouldn't go too far.

They would just casually chase after them, and if they could catch up to them, they would beat them up. If they couldn't catch up to them, then forget it.

However, they no longer encountered large groups of Qin players.

It seemed like even though Subjugator had called for more reinforcements ...

However, he didn't have any thoughts of fighting them head-on.

he probably called people over just to resurrect the people who had fallen to the ground.

Chapter 475-divine weapon mold from the treasure chest

the battle was temporarily over.

Both sides were busy resurrecting the fallen members on their side.

He didn't go straight to the point, but searched the entire map for the other party to fight.

However, when the two sides met, it was inevitable that they would have to fight.

However, these scattered battles were no longer of much importance.

both sides had no intention of starting an even bigger chaotic battle.

The overbearing King was wary of Zhang Shan's presence.

As long as the wind and cloud Guild gathered together to defend.

he would be like a porcupine, making it impossible for him to attack.

Even though they had a huge advantage in numbers, it was useless.

With Zhang Shan in front of them, they could not charge forward at all.

even if they charged in, it would only increase their casualties.

Even though the tyrant king was stubborn, he wasn't an idiot.

he wouldn't do such a meaningless thing.

For the wind and cloud Guild, they didn't want to fight anymore.

It was just a fight, so it was fine to have fun.

they couldn't just keep fighting.

In any case, they had had enough fun just now. Now, the domineering King had already recovered.

The number of Qin players that he had called over increased.

the wind and cloud guild had always been at a disadvantage in terms of numbers.

if they were to really fight.

Many of them would also fall.

He wasn't sure what he could do to domineering aura.

In the end, it would probably be the same, killing 1000 enemies while losing 800 of their own.

Since that was the case, why did they continue fighting?

Anyway, they had gained a lot now.

It was better to quit while he was ahead.

after the chaotic battle began, the wind and cloud guild had lost a total of eight to nine thousand players.

As for the Qin players that Subjugator had brought with him, tens of thousands of them had been defeated by them.

It was mainly in the beginning.

The wind and cloud Guild cast seven or eight big moves in a row.

In an instant, tens of thousands of Qin players were defeated.

In addition to that, he had killed another ten to twenty thousand Qin players.

This exchange ratio was considered to be a huge gain for them.

since he had already gained the advantage, he had already vented his anger.

there was no need for them to focus on domineering aura anymore.

after all, they still had things to do later.

Everyone still had to kill monsters to level up.

As for Zhang Shan and the other guild leaders.

After the monster siege event ended.

They would have to set off to attack the Twin Demon City.

Feng Yun realm was still waiting to be the city Lord.

Who would still have the time to fight endlessly with the domineering King?

Of course, if the domineering King didn't know his place ...

he had to keep biting on to it.

Then there was nothing else to say, they had to f * ck him up.

He had to beat him up until he was convinced.

however, from the current situation.

the tyrant king was quite tactful.

Even though there were many Qin players who came later.

However, Subjugator did not organize any more players to cause trouble for the wind cloud Guild.

Instead, they were busy resurrecting the fallen members.

...

At least for the time being, it seemed like even Subjugator didn't want to fight anymore.

Everyone was an understanding person.

The fight was for a moment of anger.

if he could gain something from it, he might be able to crush his opponent and let himself have a good time.

Then there was no harm in continuing to fight.

But now, there was no benefit at all.

moreover, if they fought, they might not even be able to win.

Then what was the point of fighting? it was better to keep his claws and wait for the next opportunity to do it.

Both sides had no intention of continuing the fight.

He just quietly cleaned up the battlefield and revived the fallen members.

At this moment, a system announcement sounded.

...

[system announcement: congratulations to war god Li Jing, war god Lu Bu, and war god child long Qianqian for successfully killing demon lower house member Rajeev.]

Skill point +1, medal +100.

Zhang Shan was with everyone, protecting the support and reviving the fallen.

When he saw the system notification.

he could not help but sigh. the war god guild did have some capabilities after all.

There were only three to four minutes left before the event ended.

The war god Guild had already defeated the first real-name BOSS.

It had to be said that they were still very powerful.

According to the situation before they left ...

The remaining four real-name bosses should also be able to be destroyed.

After all, those guilds had put their lives on the line in order to defeat the real-name BOSS.

There were still three to four minutes left.

They should be able to succeed.

God knows when the war god Guild defeated the first real-name BOSS.

What item did it drop?

However, there should be a divine weapon mold.

The God weapon mold had just been released.

zhang shan also did not know what the drop rate of this thing was.

The official announcement only stated that bosses with real names had a high chance of dropping divine weapon molds.

As for whether the probability was 100% or not, he didn't know.

But thinking about it, it should be close to the mark.

unless they were extremely unlucky.

otherwise, there would at least be a divine weapon mold.

now, others had also defeated the real-name BOSS.

Their wind and cloud Guild would no longer be able to continue monopolizing the divine equipment.
perhaps it wouldn't be long before the other players would make godly items.

Of course, even so ...

it was also impossible for the production of divine artifacts to be too high.

After all, there were only a limited number of real-name bosses.

other than monster sieges.

At other times, it would not be easy to find a real-name BOSS.

Even if they found a real-name BOSS in the wild ...

It was also very difficult to blow it up.

After all, the wilderness map was far away from the city.

Whether it was resurrection or reinforcement, it would be very inconvenient.

If someone were to harass them, it would be even more difficult to deal with them.

Just as Zhang Shan was sighing.

the others also saw the system announcement.

windcloud blade shouted.

f * ck, the war god Guild defeated it. It's the first real-name BOSS. This strength is not bad.

"Do you even need to say that? if they don't have the strength, how can they keep the title of the number one Guild?"

"the strength of the boss of the gaming world is no joke. it's not surprising that they can take down a real-name BOSS."

"I wonder what items they dropped."

"It's probably just a divine weapon mold."

that's right. They can't possibly say that they dropped multiple God equipment items, right? "

"That's impossible. We have the six-barreled boss and his panda eyes. It can be said that every time we kill a BOSS, we have the highest drop rate. It's impossible for them to drop items that are even better than ours."

"no, i'll ask."

Windcloud blade's curiosity was burning.

He quickly called for war god Lu Bu.

After a short while, wind and cloud blade announced to everyone.

the war god Guild is similar to us. The BOSS only dropped a divine weapon mold, which is a strength-type shoe.

it seems like a real name BOSS will definitely drop a divine weapon mold.

not necessarily. We've only defeated three bosses so far. The data is useless for reference.

"Even if it's not, it's probably about the same. After all, it's a real BOSS, so at least it should drop something good."

"Let's wait a little longer. I'll ask after the other guilds have defeated the BOSS."

They resurrected their fallen guild members outside Heaven's Gate.

Slowly, the system notifications kept coming.

There was only one minute left before the event ended.

The Yan Kingdom's Jiang Hu Guild had killed the last BOSS with a real name.

At this point, there were only seven real name bosses that had appeared in the entire monster siege.

They had all been destroyed by the players.

After a series of inquiries, wind cloud blade asked, "

The items that the other bosses with real names dropped were basically the same.

Each of them dropped a divine weapon mold.

As for whether there were any more divine weapon quest items, Windcloud blade did not ask.

No one else said anything.

He didn't know if they had ever dropped it.

It was not easy to ask this question. Asking was to remind the other party.

They did not have the intention to tell the other guilds about the God-tier equipment.

From the looks of it, there were seven real name bosses in this monster attack.

At the very least, each of them would drop a divine weapon mold.

In other words, it wouldn't be long.

In the game, there would be more than seven God equipment.

It looked like the other guilds were about to rise up as well.

Of course, Zhang Shan did not have any concerns regarding this.

To him, a divine weapon was only one of the factors that made him powerful.

it didn't represent everything.

He mainly relied on all sorts of passive skills.

as long as he had enough passive skills.

Divine artifacts and whatnot were all fleeting clouds.

Even other people had gotten their hands on divine artifacts.

It was still not a big threat to him.

moreover, they had just gotten their hands on the divine weapon mold.

There was still a long way to go before he could really create a divine weapon.

Those divine weapon missions were still a headache for them.

not long after the pugilistic world guild killed the BOSS.

The system announcement rang out once more.

[system announcement: under the blood-soaked efforts of our brave warriors, we have successfully repelled the invading Nephilims. May the human race prosper.]

haha, the event is finally over. Quickly resurrect all the people on the ground and let me open a box first.

what are you opening? what's there to look forward to with that two-star Treasure chest of yours? "

why can't I look forward to it? what if I get a divine weapon mold? "

"Are you out of your mind? you can't get a divine weapon mold from a 2-star Treasure chest. Only a 5-star Treasure chest can give a God-ranked item."

"Damn it, can you not tell the truth? don't you know that telling the truth is very annoying?"

"Alright, it's my fault. I shouldn't have said it. I should let you continue to live in your dreams."

Everyone continued to resurrect the fallen players while taking out the treasure chests with anticipation.

Although, other than Zhang Shan's five star Treasure chest.

Other people's boxes could only give spiritual weapons at most.

However, everyone was still looking forward to it.

After all, other than equipment.

the treasure chest could also give other items.

What if he got a top-grade skill book? wouldn't that be a huge gain?

There were also many amazing special items or scrolls.

there was also a chance that treasure chests could be opened.

as such, opening treasure chests after each event was a great joy for the players.

From anticipation to the shattering of dreams, it only took an instant.

After the event ended.

Zhang Shan did not pay attention to the other people's bragging.

Instead, he took out the treasure chest from the mail.

This was the only 5-star Treasure chest among the rewards of the monster siege event.

After the game started.

Every time the monsters attacked the city, the first place in contribution points was always firmly occupied by Zhang Shan.

The others had long given up on fighting for the first place.

Who could compete with him?

in terms of contribution points.

from the second to the ninth place, all of them added together did not have as many points as Zhang Shan.

After all, not only did Zhang Shan have extremely high damage output, but he also had a lot of equipment.

He was still tanking the damage from the BOSS.

Damage resistance was also calculated by contribution points.

Zhang Shan took out the treasure chest and opened it in his backpack.

A ray of purple light flashed and did not stop for a long time.

Eh, purple light again?

Could it be that this time, he had obtained another divine artifact?

he couldn't be that lucky.

After the last monster siege event.

Zhang Shan opened the treasure chest, and a purple light flashed.

At that time, he had thought that it would be a purple equipment.

The result was a divine weapon.

It was the tear of the king of heavenly Eagles that he had acquired later on, a God equipment necklace.

This time, a purple light flashed again. It couldn't be another divine weapon mission item, right?

If that was the case, he would be rich.

Zhang Shan checked his backpack expectantly.

He soon saw the item that had just been opened.

[violet Myrtle bracer (strength): mold for violet Myrtle bracer (strength).]

f * ck, he really got another god-tier item.

His luck was a little heaven-defying.

one had to know that a 5-star treasure chest could give a god-ranked item.

However, there was only a one in ten thousand chance.

It was more likely that it would be trash.

He had opened it so many times before, but other than two or three times, the rest were all trash.

He did not expect that he would get a God-tiered item in two consecutive event treasure chests.

He had to admit that his luck was a little heaven-defying.

Could it be that his 9 points of luck had taken effect?

Yet another god-ranked item had been obtained.

Zhang Shan was elated.

The only pity was that it was a strength-type equipment.

he had no use for it, so he could only sell it.

As for how he was going to sell it, there was no need to say.

Of course, they would sell it to the big bosses in the Guild, to whoever paid more money.

Although he was not short of money now.

But this was equivalent to money falling from the sky.

if he didn't do so, he would be letting himself down.

however, he also considered that the divine weapons forged from the divine weapon mold were all defensive divine weapons.

And Zhang Shan's was not a piece of clothing, but a strength-type bracer.

For strength-type players, bracers were not an item that they urgently needed.

It probably wouldn't sell for a good price.

Of course, no matter how inferior a divine weapon was, it was still a divine weapon.

even though the bracers were not very important to strength-type players, they were still very useful.

However, the special effects that came with a divine weapon were all amazing.

Not to mention the other special effects, just the Holy attack special effect was enough to make everyone look at it with surprise.

Hence, Zhang Shan's strength system bracer was much more powerful than other divine weapons.

Although it wasn't very good, it would at least sell for tens of millions, or even hundreds of millions of gold.

Otherwise, he would put it up for auction.

Zhang Shan believed that a mold for a divine weapon, no matter what position it was in, would not be able to be used.

At the auction house, the starting price was 100 million gold coins, and there would definitely be a large number of rich big shots fighting for it.

He looked at everyone happily opening the treasure chests.

Even though most of the people had gotten trash items.

They were even worthless trash.

But occasionally, there would be people who would get items that were not too bad.

Even if he couldn't use it, he could at least sell it for some gold.

wind and cloud blade's contribution points for defending the city was ranked third.

He had obtained a 2-star Treasure chest.

At this moment, he was showing off.

haha, I'm indeed the son of destiny. Look at what I got, a level 50 red axe. I got at least 50000 gold coins, hehe.

"what's there to be smug about? it's just a piece of trashy red equipment. what's there to be smug about?"

"That's right, do you think I'm someone who needs tens of thousands of gold coins? What I lack is a divine weapon."

"if you have the ability, then you'll be considered powerful if you can get a divine artifact."

f * ck, you guys are just jealous. Look at all the trash you opened. They're taking up space in the warehouse. My red axe can be sold for tens of thousands of gold coins.

ignore him. That's silly Bao. Let him be smug on his own.

"Yes, ignore him. Let him entertain himself."

At this moment, Zhang Shan interrupted.

"big shots, I'm sorry to disturb you. may i ask if anyone wants to accept the strength-type bracers? If no one wants it, I'll put it up for auction."

f * ck, six-barreled boss has also learned the bad things from one blade.

Everyone heard Zhang Shan's words.

His first reaction was that Zhang Shan had also gotten a red equipment and was just showing off.

this was because zhang shan had only mentioned the wrist guard and not the mold for a divine weapon.

"That's right, six-barreled boss, don't be so pretentious. That's a 5-star Treasure chest. We won't be surprised no matter what you get."

Upon hearing this, Zhang Shan realized that he had said something wrong.

He didn't make things clear.

They didn't know that he had obtained a God-level mold and thought that he was talking about the red wrist guard.

Zhang Shan could only continue to add.

Aiya, I didn't make it clear just now. It's a strength-type god weapon mold. Does anyone want it? "

After Zhang Shan finished speaking, the surroundings instantly became quiet.

After a long while, wind cloud blade finally shouted.

f * ck, six-barreled boss, you've done a great job in this batch. You got a godly weapon mold. Can't you just say it all at once? "

"Hey, I say, one blade, you have to learn. Did you see that? this is the highest level of acting cool. That's just a child's play, it can't be shown on stage."

yeah, I can only give you ninety-nine points for this batch. I'm afraid you'll be proud if I give you one more point.

" i don't need to explain. this is the highest level of acting cool. "

"Do you have a model for acting?"

"An invisible act is the most fatal."

Hearing these words, Zhang Shan was speechless.

He really did not do it on purpose.

I didn't make it clear just now.

It was originally to sell things.

He didn't have the time to show the items and only asked the big shots around him.

He felt that the mold was a strength-type bracer.

then he would be selling wrist guards.

who knew that it would cause such a huge misunderstanding?

However, Zhang Shan did not want to explain further.

It's useless to say more, the more you explain, the worse it gets.

He would just take it as him putting on an act.

Zhang Shan did not say anything else. He displayed the crape myrtle bracer (strength) in the Guild channel.

He saw the mold that Zhang Shan had displayed.

The bosses of the strength system were in an uproar.

Damn it, it seemed like the wind and cloud Guild had obtained quite a number of godly items.

However, there were more wolves than meat, and there was not enough to share.

Now that Zhang Shan was opening a treasure chest, he had gotten another one.

It was simply like a long drought meeting a good rain.

It could effectively alleviate their hunger and thirst.

everyone, please don't fight. Please take pity on me. I'll bid 50 million gold coins for the six-barrel boss's divine weapon mold.

"Get lost. You want a divine artifact for 50 million gold coins? are you still dreaming? 70 million gold coins."

"80 million gold."

"90 million gold."

"100 million gold coins."

f * ck, I say, don't be rash. This is just a wrist guard, not a weapon. You don't have to fight so hard for it.

it's fine. If you don't want it, then move aside. 120 million gold coins.

"forget it, i'll give it to you. i'll get more divine artifacts in the future. i can't compete with you rich people. "

When the price reached 120 million gold coins, there was no movement for a long time.

zhang shan asked.

"120 million gold going once, no more bids?"

120 million gold going twice. If no one raises the bid, I'll have to say congratulations.

After Zhang Shan finished asking.

Heart moves with me called out in silence.

“150 million gold.”

f * ck, Big Boss heart is really ruthless. A wrist guard can be sold for 150 million gold coins.

” we’re done for. in the future, if there’s any strength-type divine weapon, it’ll definitely be given to big brother heart follows first. who can snatch it from him? ”

“Yeah, he’s really too ruthless. He doesn’t treat money as money.”

“It’s true. Rich people don’t need to explain.”

After following his heart made his bid, Zhang Shan confirmed it again and again. No one else raised the bid.

He said.

no more bids? then, congratulations to big brother heart following for obtaining this God-grade weapon mold.

After Zhang Shan finished speaking, he traded the crape myrtle bracer (strength) to heart moves.

At the same time, with a thought, he directly transferred 150 million gold to Zhang Shan.

It was rare to see a Big Shot carrying more than 100 million gold coins with him.

zhang shan himself did not count.

He had earned all those gold coins in the game.

Besides, he was not short of money now.

that was why he did not convert his gold coins into blue coins and transfer them out.

However, ‘heart moves with me’ was clearly not the case.

He must have exchanged his own blue coins for these gold coins.

even though moving heart had followed zhang shan and the rest and had fought many bosses together, he had earned some money.

However, he would not receive as much as 100 million gold coins.

But even so, he could still easily take out 150 million gold.

Zhang Shan could only say that this damn rich man was really rich.

in new world, there were as many rich people as there were hairs on a cow, and rich big shots were everywhere.

After all, new world was a game that was big enough and had a large number of players.

So far, the number of players had exceeded 300 million.

but even so, zhang shan had never seen anyone who could spend money to the point where his heart could move. he had seen a second one.

It could only be said that this Big Shot was truly rich.

Chapter 476 Four arrow towers

After selling the crape myrtle bracer (strength) to move with the heart, Zhang Shan had earned another 150 million gold coins.

He looked at the total amount of gold in his account and was a little confused.

it was already over 600 million gold.

If he were to exchange through the New World exchange, he would be able to exchange for the same amount of blue coins.

as a salted fish with no big dreams.

This much money made him inexplicably flustered.

Half a year ago, he was still a worker with a monthly income of more than 5000 Yuan.

It wasn't long after he quit his job to play games.

He had already accumulated such a huge sum of money.

Even Zhang Shan himself felt that it was a little unreal.

It was as if she was living in a dream.

zhang shan shook his head and muttered to himself.

Why are you thinking about such trivial things?

It was fine as long as he had enough money.

He had no intention of dominating the Blue Planet.

At most, he could maintain his dominance over the New World.

he would leave the gold coins in his in-game account and treat them as numbers.

The monster attack had ended. Everything was done.

It didn't take long for them to revive all the Guild members who had fallen to the ground.

The matter was considered to have come to an end.

Zhang Shan asked Feng Yun realm.

"are we going to twin demon city now?"

Because Feng Yun Qing Qing had just given the bent wood to Feng Yun realm.

Thus, Zhang Shan was not sure.

Right now, was Feng Yun realm planning to complete the divine weapon mission or attack the demon race's city?

well, everyone, get ready. Those who have hero mounts, we'll gather at demon-suppressing city and go to Twin City together.

ah, we're going to attack the demon City now? I just got my hands on the divine weapon mold and am preparing to forge it.

what kind of divine artifact is that? is it that easy to create a divine artifact? "

that's right. If you don't take ten days to half a month to complete the divine weapon mission, don't even think about it. It's better to take down the demon race's city first.

"that's right. we can't let others take the lead in this matter. if we delay for a period of time and let others attack the demon race's city, that would be nonsense."

"Don't worry. Other than us, who else can take down a Demon City?"

last time, even the Joint Forces of the domineering aura and peerless Guild failed to take down the demon City. I'm guessing that the other forces won't have any intention of taking down the demon City.

"That's right, the city Lord of the demon race isn't that easy to deal with."

I can't say for sure. After all, it's been more than a month. Everyone's level and equipment have improved a lot.

who cares? we'll just set off directly.

"You're right. Even if others want to fight, if we go over first, who can snatch it from us?"

"Let's hurry up and set off early."

let's go. We'll buy supplies and repair our equipment first, then we'll set off.

the crowd dispersed and prepared to go to the twin city of the demon race.

Twin Demon City was far away from them.

Even if they started running from the demon-suppressing city, it would take at least a few days.

Even if they were all hero mounts, they would probably need at least three days to get to their positions.

even though there was a mount training system now.

After training, hero mounts could run faster.

However, the effects of the Mount training could only last for 24 hours.

They couldn't possibly return to training their mounts after the effects of the Mount training had ended.

Wouldn't that be a waste of time?

Of course, it was impossible for the others to keep the training effect of the Mount.

But Zhang Shan could.

after the effects of the mount training had ended.

He could first return to the palace to train his Mount, and then use the positioning ball to teleport back to his original location.

Zhang Shan returned to Dangyang city and teleported to the warehouse.

...

He stored the red equipment and red materials that he had received from today's event.

As for the red equipment, why didn't they put it up for auction?

This was because these red equipment were either level 60 or level 70.

the mainstream players had just reached level 40.

Even if these red-colored equipment were put up for auction, no one would buy them. No one would have any use for them.

So, he would save it for now.

After he was done, Zhang Shan cleared his backpack and bought some supplies.

After fixing the equipment, he teleported to the stone tablet of the master of the demon-suppressing city through the positioning bead.

Through the city Lord's stone tablet, Zhang Shan had withdrawn a few million gold coins of the city Lord's earnings.

Apart from the transportation fee, he also received a tax of tens of gold coins.

in other words, there were already players who had bought supplies or repaired equipment in demon suppression city.

...

From the looks of it, as the player's level increased.

there were more and more players in the vicinity of demon-suppressing city.

Now, there were still players buying supplies and repairing equipment in the demon-suppressing city.

Obviously, there were some players.

They started to farm monsters near the demon-suppressing city.

This was a good sign.

The demon-suppressing city was a money tree, and it seemed that the speed of making money was getting faster and faster.

He took out the city Lord's gains from the stone tablet.

Zhang Shan teleported to the city gate and waited for the other guild leaders to arrive.

After a while, Feng Yuntian and the others arrived one after another.

Zhang Shan took a closer look. There were about 120 people.

Even though they were all players from the same Guild.

However, to Zhang Shan, almost half of them were unfamiliar faces.

Even though they were all players from the same Guild.

However, when Zhang Shan was farming monsters, he would not be with them.

At most, Zhang Shan only found the people that Feng Yun realm often brought along to fight bosses a little familiar.

Even so, he still could not recognize all of them.

A little face blindness, don't you think?

out of the 100000 players in the guild, only a little over 100 of them had hero mounts.

Of course, this did not mean that the wind and cloud Guild was weak.

It was just that the price of a hero's Mount was a little too expensive.

How could a horse in the game be sold for ten million?

It had to be said that the price was really expensive.

In reality, ten million Yuan could buy a super luxury car.

the in-game mounts were more expensive than the ones in real life.

One could only say that this game was really ruthless.

however, the problem was that players would still pay for such an expensive mount.

The wind and cloud Guild had more than a hundred players.

In the entire game, there were probably close to 10000 players who had bought hero mounts.

Zhang Shan could not help but sigh.

This world would never lack rich people.

Even though he could be considered a rich man himself.

With a net worth of more than 600 million Yuan, he would be considered a rich man anywhere.

It was just that Zhang Shan had yet to adapt to his identity as a rich man.

He thought about things and considered problems.

Most of the time, he still had the mindset of a country bumpkin.

Feng Yun realm said after everyone had arrived.

"I'll have to trouble everyone this time."

“Boss, don’t be so polite. Attacking a Demon City is such a big deal. How can it be troublesome?”

that’s right, that’s right. Last time, Big Boss six-barreled secretly took down the demon City. We didn’t even get a sense of participation.

that’s right. This time, we must have a passionate wave, hehe.

“That’s right, how could something as exciting as attacking a city be trouble?”

Speaking of which, this game is really too cheap. Why didn’t they build more cities for everyone to play? only two demon cities have been discovered so far.

“Then what do you want to do? Do you want everyone to be the city Lord?”

“Hehe, you don’t say, but that’s what I’m thinking.”

f * ck, this isn’t a city-building game. How can there be so many cities for you to fight? ”

“Why are you talking so much? let’s hurry up and run. This place is far away. If we don’t run for three or four days, we won’t even be able to see the edge of the demon City.”

“Let’s go.”

Their team of more than a hundred people quickly rushed out of the demon-suppressing city.

He ran towards Twin City of Demons.

Everyone complained as they ran.

f * ck, when I saw the coordinates on the map, I didn’t want to run anymore. It’s too f * cking far.

“What are you panicking for? just treat it as a horse race, hehe.”

haha, that’s interesting. Whoever reaches Twin City first will be the king.

“Are you talking about the King of the Mountain?”

“Haha, the king of a mountain is also a King.”

Although twin Demon City was a little far away, it was still a little far away.

However, in order to take down the city, running for three to four days was nothing.

If they could take down the demonic city, the wind and cloud Guild would have another city.

Not only would the city Lord get money, but it would also bring them a lot of convenience.

Just like Zhang Shan’s demon suppression city.

If it wasn’t for them, the demon-suppressing city would be here.

Would it be so easy for them to go to the Gerri wilderness to farm monsters?

Just like when they were grinding monsters in the beast King Valley.

Every day, he had to spend more than half an hour to run the map.

Sometimes, the road wasn't too safe.

If he didn't handle it well, he would be ambushed.

After they occupied the demon-suppressing city.

they changed their farming spot to the gerri wilderness.

since then, nothing similar had happened.

Who would dare to attack them in the vicinity of the demon-suppressing city?

Do you want to die?

No one dared to fight with the wind and cloud Guild near demon-suppressing city.

If they really wanted to fight, Zhang Shan would have to adjust the teleportation fees.

Beating the dog behind closed doors.

He would be exhausted to death.

In the same way, if they occupied Twin City again, they would be able to escape.

When everyone's level increases in the future.

When they were going to farm higher level monsters.

Then, he could go over there to farm monsters.

Moreover, the monsters in Twin City were of very high levels.

At least rank-70.

It was enough for them to almost reach the maximum level.

As long as they occupied Twin City.

It could basically be said that their wind and cloud Guild would no longer have to worry about farming maps.

It would always be a battle on home ground.

Even if they fell out with all the player forces, no one would be able to do anything to them.

So, no matter what, they had to occupy Twin City.

This was a good geographical advantage.

It was simply heavenly justice not to occupy it first.

As for why others didn't come to take over Twin City?

It could only be said that the other party's strength was not enough.

not to mention the other players.

Even if it was their wind and cloud Guild.

Even if Zhang Shan was there.

in the past, they might not have been able to take down twin city.

Recently, Zhang Shan had reached level 50.

That was why they dared to attack Twin City.

Before Zhang Shan had reached level 50, he had no confidence that he could defeat the demon City Lord of Twin City.

after all, a level 70 BOSS with a real name was no joke.

For example, the seven real-name bosses that had appeared in the monster attack this time.

Although it looked very fierce.

But those were all inferior, and their skills were so poor.

It was rare to see such a fake real name BOSS.

based on zhang shan's estimation.

the demon city lord of twin city was definitely much more powerful than the seven real-name bosses in the event.

Most of the time, such a ferocious BOSS could not be killed by sheer numbers.

If not for that, the Guild domineering aura and peerless would have taken down the city by now.

After leaving the demon-suppressing city ...

They began their career of running.

In the beginning, everyone was basically advancing side by side.

However, as time passed.

Slowly, the distance between them widened.

Because they couldn't just keep running around in the game.

He had to go offline for a meal or something.

As a result, some people went offline for a longer time, while others went offline for a shorter time.

In the end, the next day.

Due to various reasons, some people were left far behind.

after a day of running, the effect of the mount training has disappeared.

Zhang Shan used the positioning ball to mark the current location.

Then, he returned to Dangyang city.

Then, he teleported to the royal city of Chu State and trained his Mount again.

After 3 minutes of cool down.

Zhang Shan used the positioning Pearl to teleport back to his original position and continued to run.

After the re-training of the Mount.

Slowly, Zhang Shan started to leave the rest far behind.

it was not as convenient for the others as he was.

He could also go back and train his Mount.

after the effects of the training had worn off, their mounts had become much stronger.

He could only rely on his original speed to escape.

when zhang shan and the rest were still on the run.

The guilds that had fought the BOSS with them.

There were already people who had started to do divine weapon missions.

After passing wind and cloud blade, he asked war god Lu Bu.

As expected, using a divine weapon mold to forge a divine weapon also required completing a quest.

however, there was no prerequisite task for forging a divine weapon.

He only needed to farm for materials.

it was just that there were a lot of missions to collect materials.

According to Wargod Lu Bu, his guild members had received a quest.

he had to complete more than 200 material missions and was currently having a headache.

This was similar to what Zhang Shan had expected.

The difficulty of the divine weapon mission had been reduced.

However, the complexity of the mission had increased to a certain extent.

to put it bluntly, the game didn't want the players to get their hands on the divine weapon so easily.

He had to let the players grind it a few more times.

But it was still okay.

He just needed to spend more time.

Anyway, it was just to collect materials.

As long as he continued to farm, there would be a day where he would complete the quest.

At most, he could farm for a month.

on the afternoon of the third day, zhang shan finally arrived at the place.

He watched the demon Twin City in the distance.

A huge city was situated between two mountains.

Zhang Shan checked the map.

he suddenly realized that if the players wanted to go to the other side, they had to pass through twin city.

Otherwise, they wouldn't be able to cross it. There was no other way.

all of them were blocked by the mountain.

The significance of the existence of twin Demon City might be similar to that of the Heaven's Gate of humans.

Perhaps on the other side of the Twin City was the real territory of the demons.

After taking down Twin City, it was equivalent to opening the path to the demons.

in this case, the difficulty of taking down twin city might be beyond zhang shan's imagination.

This wasn't just a city, it was more like a pass.

Furthermore, Twin City occupied a large area.

Compared to Zhang Shan's demon suppressing city, it was much bigger.

if the demon-suppressing city was a small city with a radius of less than five miles ...

Twin Demon City covered at least 20 square miles, or even more.

How many bosses would there be in such a huge demonic city?

there should be more than five, right?

Zhang Shan had originally thought that Twin City was the same as demon-suppressing city.

There were only five bosses in the city.

He just had to kill the five bosses and everything would be over.

It seemed that things were not that simple.

Of course.

Anyway, he was already here.

No matter what, he had to give it a try.

With his current strength ...

As long as the demon City Lord's level did not exceed level 70, they would definitely be able to defeat him.

as for the other bosses in the city, he didn't care how many there were.

In Zhang Shan's eyes, other than the demon race's city Lord, the other bosses were just there to give them experience and equipment.

Normally, as long as there were no accidents.

Zhang Shan was confident that he could take down this Demon City.

After all, he was already strong enough.

And he wasn't alone.

There were more than a hundred people following behind.

The bosses of these guilds weren't idle.

Even though their strength was far from Zhang Shan's.

However, she could at least provide him with some help.

At the very least, there were more than 20 supports among the 100 or so people.

With so many supports, Zhang Shan did not believe that he would not be able to withstand the damage from the demon City Lord.

As long as he could hold off the demon City Lord, the rest would not be a problem.

it was just killing a fish. it was impossible for them to lose.

He couldn't just say that he had more than 650000 HP.

the demon city lord of twin city should be able to kill him in seconds.

This was almost impossible.

If a level 70 real-name BOSS could be so powerful, then there would be no point in fighting other bosses in the future.

No matter what, now that they were here, they had to go over and fight.

However, that would have to wait until everyone was here.

Zhang Shan looked at the team information.

There were more than a hundred of them, and they had formed three teams.

This was because the game had a certain limit on the number of players in a team.

A team could only have a maximum of 50 people.

He could check the location of his teammates through the team information.

Looking at the positions of the others, Zhang Shan could not help but shake his head.

These people were really slow.

Some people probably wouldn't be able to make it here from tonight.

Seeing this, Zhang Shan shouted in the team channel.

"I'm here. How much longer do you need?"

f * ck, six-barreled boss, how can you run so fast? "

" of course, liu guan has a positioning bead. he goes back to train his mount every day, so of course he can run faster than us. "

f * ck, the six-barreled boss is covered in hacks. Just give one or two to us.

"Haha, young man, work hard. You won't die."

that's right. You're just a mortal. How dare you try to cheat.

be at ease and be a salted fish. You're not fated to cheat in your life, hehe.

Feng Yun realm said.

tomorrow. Before we go offline tonight, everyone should get to their positions. We'll start attacking the demon City tomorrow morning.

no way. I'm still far from that. Don't I have to run all night? "

One of the big shots who was lagging behind could not help but ridicule after hearing Feng Yun realm's words.

who asked you to slack off and not focus on the map? I'll make you make up for it tonight.

that's right. Did you go offline to pick up girls yesterday? I didn't see you so early.

" haha, let me see everyone's position. let's see who slackers off the most. "

Zhang Shan looked at the time.

It was only three in the afternoon.

They wouldn't be able to attack the demon City until tomorrow.

What was he going to do in the remaining time?

He couldn't possibly say that he went offline to go shopping alone.

if not, he could just find some wild monsters nearby to farm.

Even though there were only level 70 monsters nearby.

But now, he had already reached Level 51.

Killing level 70 monsters was no problem at all.

A level 70 monster was only three levels above Zhang Shan.

This level suppression was nothing at all.

Zhang Shan was riding his horse, preparing to look for some wild monsters nearby to farm.

he suddenly saw the captain of the guards at the gate of twin city in the distance.

there were a total of four guard captains.

Even though these city gate guard captains were all orange bosses.

however, it was only a level 70 orange-colored BOSS.

It seemed like he could do it alone.

Even if there were four bosses, it would be fine if they were all together.

Moreover, these guard captains seemed to respawn again after they were killed.

This was because these guard captains had been killed by other players before.

Now that it had reappeared, didn't this mean that ...

These demonic guard captains could be respawned repeatedly, but he didn't know how long it would take for them to respawn.

Why don't he kill a wave of guard captains first?

Killing bosses was better than killing monsters, right?

At the very least, the BOSS would give him a lot of experience.

Even if it was just an orange BOSS.

The experience points he gave were also very impressive.

If the respawn time of these city gate guard captains was relatively short.

Perhaps he could even fight a few more times.

That would be wonderful.

Anyway, these four orange bosses ...

He would definitely be able to defeat them alone without any difficulty.

Thinking of this, Zhang Shan slowly approached the city gate on his horse.

He did not act rashly.

The orange BOSS wasn't that scary, even if it was level 70 and there were four of them together.

however, he didn't know if there were any defensive facilities on the city gates of twin city.

Previously, Zhang Shan had not paid much attention to the other players' attacks on the city.

However, there should be some.

After all, there were two arrow towers on the gate of the demon-suppressing city.

It didn't make sense that Twin City didn't have any city defense facilities.

as the captain of the city gate guards, zhang shan was not afraid at all.

however, they had to be more careful with the city defense facilities.

It would be embarrassing if he was knocked to the ground by the arrow tower.

If he were to fall here alone, no support would be able to save him.

as zhang shan slowly approached, he carefully observed the movements on the city gate tower.

when they were close enough.

He saw that there was indeed an arrow tower above the city gate.

A total of four arrow towers were erected on the city gate tower of Gemini city.

Moreover, these four arrow towers looked bigger than the ones in the demon-suppressing city.

It didn't seem easy.

The arrow tower in the demon-suppressing city could deal 20000 damage per second.

The four arrow towers looked even thicker.

The damage would definitely be more severe.

Chapter 477 intermediate arrow tower blueprint

Looking at the four thick arrow towers above the city gate, Zhang Shan felt a little guilty.

The arrow tower in the demon-suppressing city had an attack power of 10000, which could attack twice per second.

In other words, each arrow tower could deal 20000 damage per second.

Just by looking at the size of these four arrow towers, one could tell that they were much more powerful than the two arrow towers in demon-suppressing city.

And this time, it was four arrow towers together.

How powerful was the damage?

Even though Zhang Shan's maximum health was also high enough.

With his HP of over 650000.

These four arrow towers shouldn't be able to kill him instantly.

However, the arrow towers were city defense facilities, and they were not damaged by projectiles.

moreover, he couldn't be sucked dry.

in other words, zhang shan could not rely on himself to suck blood to maintain his endurance.

This didn't seem easy to handle.

However, in order to farm a wave of monsters, the captain of the demon gate guards.

No matter what, he had to think of a way to try.

zhang shan looked at the four arrow towers on the tower of the city gate and carefully thought about countermeasures.

He definitely couldn't take it head-on.

no matter how high his health was, he definitely wouldn't be able to last long enough to destroy all four arrow towers.

Moreover, as long as he was close enough, he could attack the arrow tower.

The four city gate guard captains would also rush over to cut him down.

With four arrow towers and four guard captains, no matter how strong he was, he would not be able to withstand them.

He had to at least destroy one or two arrow towers to reduce the damage. Only then would Zhang Shan be able to win.

Therefore, he had to think of a way.

after some careful consideration, he said, "

Zhang Shan took out the positioning ball and removed the original set of coordinates in the Gerri wilderness.

Now, he was only left with the coordinates of the demon-suppressing city.

there were still two empty seats.

He could totally control it.

Zhang Shan planned to mark a coordinate at the current location.

Then, he marked the coordinates at a position where the arrow tower could be attacked.

This way, when he was unable to withstand the attacks of the arrow towers, he could use the positioning ball to teleport back.

The shooting range of the arrow tower was very far, much further than Zhang Shan's, at least a hundred yards.

once he couldn't take it anymore, it would be unrealistic to ride out of the arrow tower's damage range.

if that was the case, he probably wouldn't even have a few seconds to deal damage.

therefore, he had to escape through the positioning ball.

after setting the coordinates.

Zhang Shan rode on the red Hare and quickly rushed towards the city gate.

When they were a hundred yards away from the city gate ...

The four arrow towers on the city gate tower of twin Demon City began to attack him.

zhang shan looked at his head. there were 50000 to 50000 damage points appearing continuously.

He could not help but feel his scalp go numb.

This damage was too f * cking strong.

each attack dealt 50000 damage, and each second dealt 100000 damage.

With four arrow towers, they could take out 400000 HP in one second.

He couldn't withstand this damage at all.

with his 650000 hp, he could only hold on for one and a half seconds. what was the point of fighting?

Seeing the arrow tower's high damage, Zhang Shan decisively used the positioning ball and teleported to his original position.

He looked at the four arrow towers that were like door Gods.

Zhang Shan felt like a tiger eating a Porcupine. He had no idea where to start.

He hadn't even reached the distance where he could attack the arrow tower with his charge.

He was beaten back.

Although he could still hold on for a while.

...

But that was completely meaningless.

He had to think of another way to quickly get close to the arrow tower.

It was a good thing he had the positioning bead. Otherwise, he would have been hung below the city gate.

Was there really no other way?

He looked at the four guard captains at the gate of Twin City.

Zhang Shan really did not want to give up.

these were four orange-colored bosses.

Even if he didn't say yes or no, he could do it a few times.

Even if it was only destroyed once.

Four orange-colored bosses should be able to increase his experience bar by a large amount.

It was such a good opportunity to gain experience.

...

Was he going to give up just like that?

No, there must be a way.

Zhang Shan thought about it carefully. In fact, the damage of the arrow tower was very strong.

However, the health of the arrow tower was not high.

As long as he could get close, he could destroy one in three seconds.

But the problem was that he couldn't even get close.

He had just gotten into attack range, so his health bar might be almost empty.

He had to use the positioning ball to escape.

As long as he could get close once, he would be able to set the coordinates there.

Next time, he could teleport there directly and attack the arrow tower.

He didn't have to suffer more injuries for nothing.

Zhang Shan's shooting range was about 50 yards.

The shooting range of the arrow tower was 100 yards.

In other words, when he ran over, he would be within the 40-yard gap.

He could only take a beating for nothing and couldn't fight back.

If they were close, then it would be fine.

if the arrow tower attacked zhang shan, he could also retaliate.

If he went all out, he would only need two to three seconds to destroy an arrow tower.

In reality, as long as Zhang Shan destroyed the first arrow tower, the remaining three would be much easier to handle.

After all, with one less arrow tower's damage, he could last a lot longer.

The problem now was that the first step was to get close enough to attack the arrow tower.

He couldn't take the damage of nearly 50 yards for nothing.

Zhang Shan pondered seriously.

Suddenly, he smacked his forehead.

Damn it, I'm really stupid.

Who told me to tank the arrow tower's damage?

Didn't he have the shadow clone skill?

He could let his clone tank the damage.

The clone inherited 100% of Zhang Shan's attributes, and his health was the same as his.

Two clones could hold on for three to four seconds.

With that amount of time, he would have enough time to reach the Archer Tower.

This method would definitely work.

However, there was no hurry.

The teleportation function of the positioning ball had a cooldown of three minutes.

We'll start in three minutes.

Three minutes later, Zhang Shan took a look. The teleportation function of the positioning ball could be used.

he rode on the red hare and slowly moved forward.

when he was 100 yards away from the city gate.

zhang shan activated his shadow clone skill and controlled the two clones to move forward.

At this moment, the four arrow towers on the city gate tower began to attack Zhang Shan's clone.

zhang shan seized the opportunity and quickly rushed towards the city gate.

When he was 50 yards away from the city gate, he decisively used the positioning ball to mark the coordinates.

then, he used the positioning ball to teleport back to his original position.

He did not take the risk to attack the arrow tower just now.

even though his two clones had not been destroyed when he retreated, he was still in a daze.

he was still at full health.

But Zhang Shan did not want to take the risk.

There was no need.

In any case, he could just teleport over in three minutes when the positioning ball cooled down.

Moreover, after the position was off cooldown, the shadow clone skill was also off cooldown.

the cooldown time of the shadow clone skill was the same as the positioning ball, three minutes.

Next time, we'll directly teleport over and go all out.

They could easily destroy an arrow tower.

After another three minutes, Zhang Shan first activated his fanaticism skill, and then teleported over directly through the positioning Pearl.

Almost at the same time as the position changed.

zhang shan activated the shadow clone skill.

The four arrow towers on the city gate tower kept on attacking Zhang Shan and his clone.

Haha, the arrow tower's attacks were not all focused on his main body.

Three arrow towers were attacking the clone.

There was only one arrow tower that locked its attack on Zhang Shan.

Then what was there to say? hurry up and get started.

zhang shan quickly unleashed his full firepower and launched a fierce attack on one of the arrow towers.

As he attacked, he checked the attributes of the arrow tower.

Intermediate defensive arrow tower (city defense facility): Attack power 50,000, HP 5000000, attack interval 0.5 seconds.

Looking at the attributes of the arrow tower, Zhang Shan was relieved.

The arrow tower only had 500000HP.

He didn't need to run, he could destroy the arrow tower in one wave.

Zhang Shan controlled his two clones, and together with his main body, they attacked one of the arrow towers.

Three Zhang Shans, three musket shots, continuously swept the arrow tower.

He had activated fanaticism in advance.

The doppelganger also had a fanatic state.

The main body and clone's attack speed were both extremely fast.

All kinds of critical damage kept flashing.

In less than two seconds, Zhang Shan had destroyed the first arrow tower.

As for the damage of the arrow tower, it was shared with the clone.

Zhang Shan still had more than half of his health left.

At this moment, the four Demon City gate guard captains who were originally guarding the city gate led 100 ordinary guards and rushed over.

zhang shan immediately changed the direction of his attack.

The clone continued to attack the second arrow tower, while the main body turned to attack the guard Captain.

Although the damage of the arrow tower was not all concentrated on him.

however, he had also taken a lot of damage and needed to recover some health first.

zhang shan turned to attack the guard captain, and the bullets were fired at the guard captain non-stop.

The damage jumped back and forth between the four Captain guards.

In an instant, the amount of blood was sucked back.

Then, he started to attack the arrow tower.

Let's destroy the arrow tower first.

compared to the captain of the city gate guards, the hp of the arrow tower was much lower.

It was easier to be blown up.

when the four captain guards rushed to zhang shan's side.

he had already destroyed the second arrow tower.

At this time, Zhang Shan's two doppelgangers had also been destroyed by the arrow towers.

The doppelganger had been attacking the arrow tower and did not attack the captain of the city gate guards. It did not use life-steal.

Therefore, the clone fell to the ground and left.

However, this did not matter.

There were only two arrow towers left.

Although the damage was also very severe.

But to Zhang Shan, it was not much of a threat.

Zhang Shan was holding off the attacks of two arrow towers and four city gate guard captains.

He would attack the arrow tower for a while, and then turn to attack the guard Captain.

As long as his HP was less than half, he would attack the captain of the guards.

After the HP bar was full, they would attack the arrow tower.

Just like that, after more than ten seconds of rejection ...

The remaining two arrow towers were also quickly destroyed by Zhang Shan.

Without the threat of the arrow towers.

Zhang Shan recovered and slowly dealt with the four Demon City gate guard captains.

He had been very nervous after the series of actions just now.

There were no arrow towers now.

The remaining four city gate guard captains, to Zhang Shan, were no different from salted fish.

Even if these guard captains had dozens of ordinary guards with them.

But it didn't matter, they were all here to give him experience.

As Zhang Shan attacked the guard Captain, he checked his attributes.

Let's see what kind of attributes a level 70 orange BOSS has.

Demon gate guard Captain (orange): [level 70] [attack: 12000] [HP: 5000000]

Skill 1, furious slash, skill 2, Demon God's will, skill 3, chaotic slash.

[furious slash: increases damage by 500%.]

[demonic will: when the captain of the guards is in danger, he will summon the demonic will to assist him in battle.]

[chaotic slash: the guard captain slashes his sword in all directions, dealing 500% damage to all targets within a 50-yard radius.]

He looked at the captain Guard's attributes and skills.

zhang shan was completely uninterested.

As an orange-colored BOSS, the attributes and skills of these demonic city gate guard captains could be said to be average.

But that was it.

Not to mention Zhang Shan.

even if it was other powerful players, with a few support players, they could still win.

After all, it was only an orange BOSS. No matter what, it couldn't be that strong.

Even if they were rank 70.

Zhang Shan kept firing his guns.

In his surroundings, other than the four Demon City gate guard captains.

There were also dozens of ordinary city guards.

However, these city guards were not bosses.

they were only level 70 normal monsters.

Under Zhang Shan's constant barrage of attacks.

Dozens of city gate guards were quickly cleaned up by him.

There were only four city gate guard captains left. Zhang Shan was alone, and it would still take a while.

After all, each captain of the guards had 50 million HP.

Even though his damage was high, it would still take two to three minutes.

After all, he didn't have any berserk skills.

moreover, he had also used the shadow clone skill just now.

He could only rely on regular damage to deal damage.

he would have to fight for a while longer before he could blow up these four captain guards.

As Zhang Shan attacked, he suddenly thought of something.

When he destroyed the second arrow tower, he seemed to have heard the sound of items falling into his backpack.

Would the arrow tower drop items?

He didn't know about this.

when they were in the demon-suppressing city, they had destroyed two arrow towers, but they had not dropped any items.

However, the number was too small, so there was no point in participating.

Zhang Shan was not sure if he had heard wrongly.

As he attacked, he opened his backpack to check.

Haha, as expected, there was an item drop.

A blueprint had appeared in his backpack.

[intermediate arrow tower construction blueprint: a blueprint to build an intermediate arrow tower.
Attack power: 50000. HP: 5000000. Attack interval: 0.5 seconds.]

Construction requirement: Level 5 Grandmaster engineer.

This thing was not bad, and he could use it immediately.

He was now a level 4 master engineer.

He was only ten or so proficiency points away from being a level 5 Grandmaster engineer.

And Zhang Shan took a closer look at the materials needed to build an intermediate arrow tower.

He realized that other than the orange material, the other materials were easy to find.

They were all common materials that could be bought at auctions.

However, the price of the materials might be a little more expensive.

Although the price of the materials to build the intermediate arrow tower was not cheap.

But Zhang shanyan did not care about this.

As long as he could find the materials, it would be easy.

He was afraid of the kind that was similar to the six-barrel fire god cannon.

They needed rare materials. Even if the materials were cheap, it would be useless if they couldn't be bought.

However, the intermediate arrow tower was a level 5 engineering product.

In terms of attributes, it was almost the same as the fire god cannon, if not even inferior.

A level 5 engineering product with attributes inferior to a level 4 product was a bit of a joke.

However, that was not important. The important thing was that the intermediate arrow towers could be built in large numbers.

Initially, Zhang Shan was still worried.

After they took down Twin City, how would they defend it?

according to his previous experience in the demon-suppressing city ...

After taking over the demonic city, there would be another wave of monster attacks.

If he didn't plan properly.

They might be able to take down the city, but they might not be able to withstand the monsters' attacks. If the city was destroyed by the demonic monsters, then all their efforts would have been in vain.

after all, they were surrounded by level 70 monsters.

When the monsters attacked the city, the level of the demonic monsters that attacked the city would be higher as they advanced.

the last time they had been in demon-suppressing city, the demonic monsters that had attacked the city in the last half an hour had been level 60 wild monsters.

It was ten levels higher than the wild monsters around the demon-suppressing city.

In other words, when they defended the city this time, they might have to face level 80 monsters.

Just thinking about it was a big headache.

other than zhang shan and a few others.

As for the other members of the Guild, the higher-leveled ones had just reached level 40.

Many of them weren't even forty.

How could they defend the city by themselves?

With a level suppression of more than 40 levels, the players couldn't use their full strength at all.

Initially, Zhang Shan had planned to store more fire god cannons.

After they had taken down Twin City, they would use the fire god cannons to defend the city.

It was a pity that he had spent so much time collecting the materials.

he had only built over eighty fire god cannons, which was not enough at all.

The materials for the fire god cannon were too difficult to obtain.

at the auction house, one could only buy a few at a time.

Now, he had the intermediate arrow tower blueprint.

As long as he spent money and materials, he could build a large number of intermediate arrow towers.

Of course, the materials required to build the intermediate arrow tower were relatively more expensive.

zhang shan roughly estimated that each set of materials would cost about five to six thousand gold coins.

If he were to build it in large quantities, he would have to consume a lot of materials in order to increase his proficiency.

This would require a large sum of money.

But Zhang Shan was not worried about this.

It didn't mean that he had money now.

This money would definitely be from Feng Yun realm.

Once we take down Twin City, Feng Yun realm will become the city Lord.

Of course, he had to pay for the cost of defending the city.

There was no reason for Zhang Shan to pay for both the labor and materials, right?

It was already very kind of Zhang Shan not to charge him the handling fee.

Thinking of this, Zhang Shan was very happy.

Level 5 engineering's proficiency of 100 points was stable.

as long as he could get another two level 5 blueprints, he would be able to advance to a level 6 engineering grandmaster.

Zhang Shan had never seriously understood the other players 'life profession levels. What was the highest level they had reached?

However, there were definitely no martial grandmasters yet.

After all, it was harder and harder to advance in the profession.

not to mention the cost of materials, it was frighteningly expensive.

The blueprint alone was difficult to obtain.

There was no place to buy it.

it was rare to see high-level lifestyle class recipes and recipes in the auction house.

Perhaps he could become the first life profession Grandmaster in the game.

This wave was good. He had earned big.

Not long after, Zhang Shan had defeated the four city gate guard captains.

However, the BOSS only dropped trash orange equipment and four orange materials.

Apart from that, nothing else dropped.

his luck was really bad.

The orange material was still fine, he could use it immediately.

However, no one would want a level 70 orange equipment.

the next time he returned to the city, he would just throw it into the guild warehouse and earn more guild contribution points.

Even though the items dropped by the four Captain guards were all trash.

However, the experience points he gained after killing them were quite a lot.

The four Captain guards had increased Zhang Shan's experience bar by a third.

One had to know that he was already rank 51.

To reach level 52, he needed a huge amount of experience.

If he were to farm monsters normally, he probably wouldn't even be able to level up once in ten days.

In other words, the experience points that he had gained from fighting the BOSS for two to three minutes.

It was equivalent to killing wild monsters for three to four days.

The BOSS's experience points came faster.

Of course, this time, he only got the experience points, if it was shared among several people.

the experience points given by an orange-colored BOSS were only so-so.

The captain of the city gate guards had destroyed them, and the arrow towers on the city gate tower had also been swept clean by Zhang Shan.

At this time, the gate of twin Demon City was wide open.

However, Zhang Shan did not have any thoughts of going in to take a look.

What's there to see?

anyway, he could not do anything even if he went in alone.

He couldn't even defeat a red BOSS.

Even though he was very powerful now.

However, he really couldn't beat a level 70 red BOSS by himself.

Unless there were a lot of small monsters on the side that he could use to suck blood.

Otherwise, there would be no healer to add blood.

He couldn't take it on by himself.

However, how could there be so many small monsters around the BOSS?

That was impossible.

There were not many good things waiting for him in the world.

After settling the captain of the city gate guards, Zhang Shan turned around and left.

He would first kill a wave of monsters nearby.

He would come back to take a look later.

Let's see if these city gate guard captains can still respawn.

If it refreshed again, he could do it again.

It would be perfect if they could level up by killing bosses.

Unfortunately, Zhang Shan did not know how long it would take for these city gate guard captains to respawn.

There was no rush in this matter. He just had to pay more attention to it later.

From time to time, he would come over to check if the guard Captain had respawned.

Chapter 478 Demon soldiers all over the city

After another wave of killing the captain of the city gate guards, Zhang Shan found a place to kill monsters nearby and started to kill them.

Level 70 demon Warriors were definitely hard to farm for others.

But to Zhang Shan, there was no difference.

With his current attack power, even if he didn't have the priest's attack blessing, he would still be able to attack.

In theory, the damage was also close to 100000.

Level 70 monsters were very strong.

However, it only had around 80000 HP.

because they were in the holy demon's protection state, the monsters' damage would be reduced by 50%.

It didn't matter.

Although Zhang Shan could not insta-kill monsters.

However, he only needed two shots to take down twelve level 70 demon Warriors.

As Zhang Shan was killing monsters, he looked at the positions of his other teammates.

He realized that their current position was not much different from before.

That's right, when he was grinding the captain of the demon City gate guards.

Although it took a few rounds, it didn't take much time.

From the time he started to test the waters to the time he defeated the BOSS and left, he had only spent a total of ten minutes.

Ten minutes or so was nothing compared to his teammates who were running.

Twin City was very far from demon-suppressing city.

They had already been on the run for almost three days.

How far could he run in ten minutes?

It could be completely ignored.

Zhang Shan could not help but shake his head.

Forget it, I'll just wait slowly.

The other people in the team would not be able to arrive so quickly.

Even the fastest one would have to arrive after 10 pm.

Alright, let them run first.

Zhang Shan was alone, blocking the city gates and killing the demon guards. Wasn't that great?

He had not thought of this before.

Otherwise, he would have spent a few days to get to the vicinity of the Twin Demon City.

After that, he would use the positioning beads to mark the coordinates, and when he was free, he would come and challenge the guard captains.

Unfortunately, he had not thought of this before.

Of course, that was before he reached level 50.

Zhang Shan might not be able to defeat the captain of the city gate guards.

The main thing was that the four arrow towers 'damage was simply too high.

Before he reached level 50, it would be a bit difficult for him to deal with it alone.

Sigh, what a good opportunity to farm bosses.

it was gone after they took down twin city.

of course, zhang shan was just thinking about it.

As for the demonic city gate guard captains, they would only respawn once every few days.

he didn't know yet.

If it would only refresh once every 24 hours, then he would be out of ideas.

Twenty-four hours later, they would have already conquered Twin City.

Where was the captain of the guards, let him farm.

However, Zhang Shan felt.

The respawn time of the demonic gate guard Captain should not be that long.

As a Demon City, it couldn't be that there wasn't a guard for so long, right?

This didn't make sense.

However, the respawn time should not be too short.

If the respawn time of the demon race Guard Captain was too short.

When they were halfway through the siege ...

The captain of the city gate guards had respawned again. Wasn't this nonsense?

Zhang Shan estimated that the respawning time of the demonic city gate guard Captain should be between one to two hours.

...

Of course, it could be longer, but it would definitely not exceed four hours.

Therefore, he should still have a chance to farm a few more waves.

Time passed by slowly.

Zhang Shan was farming monsters not far from the city gate.

Every half an hour, he would run to the city gate and take a look.

Until two hours later.

He discovered that the demon City gate guard captains had respawned again.

Zhang Shan was very happy.

Haha, there's hope.

It would be refreshed every two hours.

Then, he could still farm a few more waves.

...

At the very least, it would not be a problem for him to level up once.

If he had worked a bit more at night, he might have been able to level up two levels.

The captain of the demon gate guards respawned again.

Zhang Shan quickly used the positioning Pearl and directly teleported to a position 50 yards away from the city gate.

He repeated his previous actions and killed another wave of guard captains.

After blowing up the captain of the guards.

Zhang Shan looked at his experience bar.

He had already killed two waves of guard captains today.

Hehe, just one more wave and I'll be able to reach level 52.

He could level up after three to four waves of guard captains.

The BOSS's experience points were really good.

After all, he was fighting four bosses at the same time, and he was the only one getting the experience.

The experience points were simply amazing.

Zhang Shan looked at the time.

It was only four in the afternoon.

If he farmed until midnight, he could still farm four more waves.

'I don't care anymore. I must level up again today.'

If it didn't work, he would just have to work a little and go to bed later.

It was not easy to find such an opportunity to level up.

i can't let it go to waste.

Just like that, Zhang Shan stayed alone near Twin City.

he killed monsters while waiting for the guard captain to respawn.

This was the advantage of being a fixed BOSS like the guard Captain.

Not only was the location fixed, but even the refresh time was fixed.

Every two hours, the demonic Guard Captain would be refreshed.

The time intervals were very accurate.

It was past 10 pm.

zhang shan had killed three more waves of guard captains.

Not only had he reached level 52, but he was also not far from level 53.

At most, he only needed to kill two more waves of guard captains and he would be able to level up.

This kind of upgrade was truly satisfying.

one day was enough, and it would normally take a month to farm monsters.

At this time, some of the Guild leaders had already arrived in Gemini city.

Wind and cloud blade was the first to arrive. After running over, he first went to Twin City to take a look.

then, he shouted in the party channel.

“Damn, where are the guards of Twin City? Are there no guards in this Demon City?”

I think so. Weren’t there guards when domineering aura came over? ”

“What the hell? why is it gone now?”

“Do you still need to ask? If there’s a six-barreled boss around, the boss would have already been converted into experience points.”

“f * ck, that’s impossible. I remember that there were four Orange Guard captains and four fierce arrow towers in Twin City. Did six-barreled boss take them down all by himself?”

no matter how strong the arrow towers and bosses are, they’re nothing compared to the six-barreled boss.

don’t be surprised, brother. Let’s just run away. The sooner we get to the place, the sooner we can go offline and sleep.

Wind and cloud blade was in Twin City, so he did not see the guard Captain.

He followed his teammate’s location information and found Zhang Shan, who was farming monsters, and asked him.

“Sixth steward, did you kill the captain of the city gate guards?”

“Yeah, there were only four orange bosses. They didn’t drop anything good.”

Windcloud blade said gloomily.

who cares about the loot? I’m just wasting my experience. If I had known earlier, I would have run faster. I might have been able to follow you and get some experience from the BOSS.

To wind cloud blade’s words, Zhang Shan only wanted to say, “shameless hooligan.”

F * ck, I finally managed to solo a few waves of bosses.

You actually want to take my experience points, you're too shameless.

Zhang Shan did not want to bother with him, and just quietly killed monsters at the side.

He couldn't tell him that the captain of the city gate guards would respawn again.

Zhang Shan planned to secretly earn a wave of experience points.

He did not bring along the hooligan, Windcloud blade.

It was past ten O 'clock, and he had just finished a wave of guard captains.

the next wave of guard captains would only respawn at 12:20 p. m.

Let's wait.

One more wave and he would go to sleep.

He waited until 12 pm.

More than half of the Guild bosses that Feng Yun realm had brought with him had already run to their positions.

as for the others, they were still in the process of escaping.

It was already too late.

They couldn't attack the demon City tonight. They could only wait until tomorrow.

After 12 o 'clock.

Wind cloud blade said to Zhang Shan.

eh, why aren't you offline yet? don't you usually log off at 12? "

"I'll play a little more today and sleep later."

Zhang Shan said casually.

he did not want to let wind and cloud blade get his share of the BOSS 'experience later on.

"that can't be right. why do i feel like there's a problem here? don't tell me you have other plans? I don't care, I'll go offline after you go offline."

wind and cloud blade was suspicious of zhang shan's perfunctory answer.

Zhang Shan was speechless.

f * ck, i just wanted to get some experience from the BOSS alone. why is your dog nose so sharp?

zhang shan could only say helplessly.

"I'm waiting for the demonic city gate guard Captain to respawn."

Wind cloud blade said in surprise.

“What’s this? Would the demonic city gate guard Captain respawn after being killed? how often does it refresh?”

it takes two hours to refresh. In another twenty minutes, it’ll refresh.

f * ck, didn’t you kill a few waves of bosses today? ”

“Yeah, there were five or six waves in total.”

f * ck, I was wondering why you leveled up again. So you’re treating the captain of the guards like a small monster.

the orange BOSS doesn’t give much experience either. The experience points given by four guard captains aren’t even enough to level up one-third of a level.

be content. It’s a good thing I was careful. I’m definitely going to get experience points from this BOSS, hehe.

Zhang Shan was speechless. He was convinced that he could get experience points so easily.

However, it didn’t matter.

Now that Windcloud blade had discovered him, he would just let him get by.

Anyway, Zhang Shan was not lacking in experience.

zhang shan said to wind cloud blade when the time was up.

“Let’s go. The captain of the guards should have respawned.”

Wind cloud blade followed Zhang Shan and ran to Twin City.

don’t go over yet. The arrow tower’s damage is very high. You can’t take it.

“Don’t worry, I understand.”

Windcloud blade understood that he was only there to earn some experience.

For something like charging at the city gates, of course, it should be done by a piece of meat like Zhang Shan.

Once again, Zhang Shan cleared the arrow towers and then attacked the four guard captains.

As for wind cloud blade?

He was just a hooligan.

before the arrow tower was destroyed by zhang shan.

He didn’t dare to move forward at all.

After the arrow towers had been cleared by Zhang Shan, wind and cloud blade happily rushed forward and attacked the guard Captain.

together, the two of them quickly defeated the four city gate guard captains.

Wind and cloud blade, who had gained some experience, said to Zhang Shan happily.

haha, I'm so happy with this experience. I've killed four orange bosses at once. I'm so rich now. I'm about to reach level 50.

Zhang Shan ignored blade of wind and cloud, who was still showing off.

He just said to him.

" I'm going offline. sleep early. we still have to attack the city tomorrow. "

After he finished speaking, Zhang Shan went offline and left.

The next morning.

After Zhang Shan woke up, he washed up and ate something.

Then, he entered the game.

After going online, Zhang Shan observed from the city gates.

More than 120 big shots of the guilds had basically arrived.

There were still a few people missing, probably not online yet.

It might be a little later.

Feng Yun realm said to everyone after seeing Zhang Shan.

six bosses is here. Let's start first. Those who haven't come online, let them come over later.

"Haha, let's get it done first."

Feng Yun realm asked Zhang Shan after he was done.

"Six-man commander, what should we do at the city gate? you fought alone yesterday?"

"It's easy at the gate. I'll take the front and the support will heal me from behind."

"Alright," he said.

Now, everyone was basically here.

He didn't need to do what he did yesterday.

He just needed to stay in front and let the support heal him.

No matter how high the damage of the arrow tower was.

If he had enough support to heal him.

That wasn't a problem.

After all, the attack of the arrow tower was very simple.

The arrow tower did not have any skills, so it could only shoot arrows one by one.

zhang shan's hp was high enough.

With the support of the support, tanking the damage of four arrow towers was like playing around.

Feng Yun realm gathered all the support members. There were more than twenty support members in total and they followed Zhang Shan.

Zhang Shan took the lead and rushed towards the gates of Twin City. At the same time, he spoke to the support behind him.

"You guys pay attention to healing me. The arrow tower on the gate tower still has a lot of damage."

"don't worry."

When Zhang Shan was 100 yards away from the city gate.

The four arrow towers on the city gate tower began to attack him.

a single tower could deal 100000 damage per second, so four towers would deal 400000 damage per second.

However, Zhang Shan did not need to worry.

He didn't come alone this time.

There were more than 20 support players behind him.

Zhang Shan didn't need to do anything. He ran directly to a distance where he could attack the arrow tower.

then, they would attack.

the support behind him kept healing him.

Zhang Shan's blood volume was maintained at a healthy state.

The other Guild bosses in the distance, after seeing Zhang Shan attracting the damage of the arrow towers, were stunned.

He also quickly rushed over.

More than a hundred people quickly cleared the arrow towers and the captain of the guards.

looking at the wide-open gates of twin city ...

Windcloud blade shouted.

"charge! charge into twin city!"

why are you calling it 'basic wave'? there are so many wild monsters in the city. Why don't you organize them and charge in to get killed? "

Yes, Twin City of Demons was different from demon-suppressing city.

When they were attacking the demon-suppressing city.

There were not many small monsters in the city.

There were only five bosses.

However, Twin City was different.

No one had seen the bosses in Twin City yet.

however, many people had seen the monsters in the city yesterday.

Yesterday, Zhang Shan had defeated the captain of the city gate guards several times.

After the other Guild bosses arrived.

He saw that there were no guards at the gate of Twin City.

He rushed into the city and took a look.

He discovered that the entire city was filled with monsters.

they were all lv 70 demon soldiers.

This was something that wind and cloud blade knew as well.

In fact, he had gone in to take a look yesterday.

However, when they realized that the city was filled with monsters, they decisively retreated.

In response to the others 'doubts, Windcloud blade retorted stubbornly.

what's there to be afraid of? do we have to be afraid of small monsters? "

Of course, even though wind cloud blade said so, he did not actually charge in.

level 70 demon soldiers might not be considered very strong to them.

However, if there were a lot of them, they would be difficult to deal with.

If they didn't get into a good formation, many people might not be able to hold on.

Feng Yun realm said.

"Let's enter the city together. Guardian Warriors, stand in the front row. Support, pay attention to healing."

There might be a lot of monsters in the city.

However, he didn't need to worry too much about it.

Just pay attention to your cooperation.

After Feng Yun realm made the arrangements.

The Guardian Warriors walked at the very front, while the others followed behind.

When Zhang Shan had rushed into the city.

He saw the city full of monsters. He could not help but be shocked.

He really didn't come in yesterday to take a look.

Now, seeing this, Zhang Shan was very surprised.

damn it, didn't this mean that they had to kill a wave of small monsters first?

Twin City was so big.

How long would they have to wait before they could finish?

Chapter 479-the old way

zhang shan and the rest continued to rush into the demon twin city.

Seeing the city full of wild monsters, everyone couldn't help but feel their scalps go numb.

Why was this the same as the demon subduing platform instance dungeon, where the ground was filled with wild monsters?

Fortunately, the attack mechanism of these wild monsters was only equivalent to that of the normal difficulty instance dungeon.

The monsters would only attack when the player got close.

It wasn't like the extreme mode.

As long as they saw players, all the wild monsters on the map would rush over.

Otherwise, there would be no way to do it.

Twin City of the demon race was a big city.

The city was filled with monsters. If they charged over at the same time, the number of monsters would be terrifying.

That would be very difficult to deal with.

there were more than a hundred of them. the guardian warriors stood in the front row, while the rest stood at the back.

He walked along the streets of the city and advanced step by step.

Zhang Shan held his hand cannon and fired continuously. Large patches of wild monsters fell to the ground.

There were many monsters in the city.

However, it didn't cause them too much trouble.

Windcloud blade said as he killed the monsters.

” where are we going next? we can’t possibly clear out all the wild monsters in the city, right? ”

“I don’t know. Didn’t you attack the demon City last time?”

that’s different. The last time we attacked the city, there were only five red dots in the city. We just have to kill all the bosses at the five red dots. There shouldn’t be so many small monsters.

“F * ck, then what should we do this time?”

who knows? the whole city is filled with red dots. I don’t know which monsters are or which bosses are.

why do you care so much? let’s clear the small monsters along the way first. When we see a BOSS, we’ll attack it.

Zhang Shan was also clearing the monsters while checking his minimap.

the last time they attacked the demon-suppressing city, they had a map guide. as long as they killed the BOSS with the red dot, they would be able to win.

However, there was no notification this time. What was he supposed to do?

Were they supposed to clear out all the small monsters in the city?

of course, they could clear all the small monsters.

There were many monsters in the city.

However, they had more than a hundred people, so it wasn’t difficult for them to clear all the small monsters.

he just wanted to spend more time.

The problem was that there was no hint.

After clearing out the small monsters, what was the next step?

They had no idea at all.

The last time they attacked the city, there was a hint on the minimap.

But this time, it didn’t.

Perhaps it was because they had accepted a mission last time.

There was no mission this time, it was purely to attack the city.

Therefore, he could only rely on himself to figure it out.

However, the mechanism of sieging a city should be similar, right?

Why don’t we do it like last time?

zhang shan looked at the mini-map, searching for the positions of the five bosses that they had fought last time.

Although the cities were different, the NPCs in the cities should be roughly similar.

The five bosses that they had fought last time were the blacksmith, the apothecary, the priest, the garrison commander, and the city Lord.

not counting the city lord, as long as one was not blind, one would be able to see such a large city lord's mansion.

However, Zhang Shan spent a long time on the mini-map before he found the location of the blacksmith and the apothecary.

the BOSS that he had fought in the demon-suppressing city was here as well. perhaps it was attacking twin city.

At the same time, they had to defeat these five bosses.

Zhang Shan said.

let's go to the blacksmith first. Last time, we blew up the blacksmith first.

"No, six-barreled Big Shot. Shouldn't blacksmiths be functional NPCs? How could it be the BOSS?"

"Are you an idiot? that's a nephilim npc. to us, isn't that a boss?"

...

"Alright," he said.

after zhang shan had finished speaking, wind and cloud blade also chimed in.

that's right. We'll fight in the same order as last time: blacksmith, apothecary, priest, garrison commander, and finally the castellan.

then what's the point of saying that? push towards the demon blacksmiths.

Under Zhang Shan's instructions, everyone changed their previous actions of running around like headless flies.

Instead, they advanced towards the location of the demon blacksmith on the mini-map.

The demon blacksmiths weren't too far from the city gate.

Everyone cleared the monsters along the way, and it didn't take long before they reached the blacksmith.

A group of people stood outside the blacksmith shop and looked inside.

There was indeed a BOSS inside.

Demon blacksmith.

...

It was a normal red BOSS.

it's a good thing we have experience in sieging cities. Otherwise, we wouldn't even know where the BOSS is. Where would we go to find it? "

yeah, this game is so annoying. The players have to figure everything out by themselves. There's no hint at all.

"What do we do now?"

do you even need to ask? he directly rushed in and chopped the demon blacksmith.

"You make it sound so simple. You?"

don't f * cking argue. Of course, this kind of thing should be done by the six-barreled Big Boss.

Zhang Shan did not stand on ceremony.

Since he had found the boss, he would naturally kill it first.

It didn't matter if it had anything to do with the siege.

They would kill the boss as soon as they saw it.

Zhang Shan said.

"I'll go in first, get a few support to help me heal."

A normal level 70 red BOSS, Zhang Shan did not know if it was powerful or not.

It would be safer to bring a few assistants first.

As for the others, they would wait outside the door.

He would wait for the Nephilim blacksmith to stabilize before coming in to kill the BOSS.

Zhang Shan looked inside. The demon blacksmith was waving his hammer and hitting the iron block.

The BOSS didn't even look at them.

This kind of BOSS was inside a building.

The aggro range was usually within the building.

As long as they did not enter, they would not be able to attract the BOSS's aggro.

Zhang Shan was the first to enter the blacksmith shop, with a few assistants following behind him.

At the sight of Zhang shanzhi and the other three, the busy demon blacksmiths suddenly stopped.

At first, he was stunned for a moment. Then, he waved his hammer and rushed towards Zhang Shan.

This stance looked super fierce.

However, Zhang Shan did not mind.

It was just an ordinary red BOSS. How could it possibly turn the world upside down?

They had a large group of people, so it shouldn't be difficult for them to deal with a normal red BOSS.

When he saw the demon blacksmith, he rushed towards him.

Zhang Shan opened fire decisively. The hand cannon shot out bullets, continuously sweeping towards the demon blacksmith.

At the same time, the demon blacksmith had also rushed in front of him, and a hammer smashed down on Zhang Shan's head.

-496372 damage.

The demon blacksmith's hammer hit a critical hit, almost emptying Zhang Shan's HP.

The support classes that followed behind Zhang Shan quickly helped him add on his health.

F * ck, how could the damage be so high?

Looking at the damage value, Zhang Shan was shocked.

this nephilim blacksmith was only a normal red BOSS, but he had already dealt more than 490000 damage.

Even though this was a damage from a critical hit, it was still too ridiculous.

It was simply outrageous.

This was even fiercer than the demon representatives during the monster siege a few days ago.

One had to know that the demon representative was a BOSS with a real name.

What the f * ck, was a normal red BOSS even more powerful than a real-name BOSS?

this was too unscientific.

if it wasn't for zhang shan's blood volume being high enough, he probably wouldn't have been able to hold on.

Zhang Shan kept firing while checking the attributes and skills of the demon blacksmith.

[demonic blacksmith (red): level 70, attack 50000, hp 500 million]

Skill 1, hammer; skill 2, heavy hammer (passive); skill 3, Devil's will; skill 4, crazed devil hammer. Status: Holy demon's protection.

[hammering: demon blacksmiths forge daily. unique hammering technique, increases damage by 100%.]

[heavy hammer (passive): when the Nephilim blacksmith attacks, there is a chance to trigger the heavy hammer effect, causing five times the damage.]

[Demon God's will: when in danger, the demon blacksmith will summon the demon God's will to assist in battle.]

[crazed devil hammer: the devil blacksmiths will occasionally go crazy. When they go crazy, they create their own peerless hammer technique.]

After using this hammer technique, with the demonic blacksmith as the center, it will deal five times the damage to all targets within a 50-yard radius.

[Holy demon's protection: Suan ni]

After seeing the skills of demon blacksmiths, Zhang tie finally realized that he was a demon blacksmith. Zhang Shan calmed down.

That's good. This demon blacksmith wasn't too exaggerated.

It was only because he had a critical hit passive skill that he could deal such a high amount of damage.

When it was not a critical hit, the damage was less than 100000.

it wasn't too fierce.

Just now, the demon blacksmith's first strike was a critical hit, which really shocked Zhang Shan.

Now it seemed that the demon blacksmiths were not very powerful.

Normal damage was less than 100000, but Zhang Shan had more than 650000 HP.

He didn't feel any pressure taking on such a small amount of damage.

After Zhang Shan had secured the hold of the demonic blacksmith, the bosses of the other guilds outside the door quickly ran in.

the group of people kept attacking the demon blacksmith.

Looking at Zhang Shan's head, occasionally high damage would appear.

Everyone couldn't help but exclaim.

"This demon blacksmith seems to be a little fierce."

" yeah, it's a little ridiculous to deal nearly 500000 damage when it's a critical hit. "

sigh, there's nothing we can do about it. The level of the demonic blacksmith is too high. A level 70 BOSS is much higher than us.

that can't be right. It wasn't this exaggerated when we were fighting the demon representative.

that's different. The demon representatives in the monster siege are all inferior bosses.

"Maybe,"

don't panic. Anyway, with the six-barreled boss here, no matter how strong the BOSS is, it will still lie down, hehe.

"Haha, you're right."

the problem is, we're only fighting the first BOSS and it's already so strong. Will we be unable to defeat the demon Castellan at the end? "

why are you thinking so much? just sweep along the way. We'll talk about it when we really can't beat them.

"That's right, don't worry about others, take it slow."

"one is one."

seeing how powerful the demonic blacksmith was, everyone couldn't help but worry about how they were going to fight the BOSS.

They had to defeat at least five bosses before they could take down the Twin Cities.

The first few bosses were easy to deal with.

What he was afraid of was that the final Demon City Lord would be too fierce.

However, Zhang Shan was not too worried about this.

Last time, there were only five of them, and they could defeat the demon City Lord. This time, there were more than a hundred of them, so there was no reason they couldn't defeat him.

even though he had a mission last time, it was largely due to luck.

If it wasn't for the silence scroll that had been dropped earlier ...

Last time, the five of them definitely couldn't beat the demon City Lord.

However, compared to the last time ...

Zhang Shan's strength had increased greatly.

as long as there were no major accidents.

zhang shan felt that they should be able to defeat the demon race's city lord.

Under the rapid attacks of the group of people, the HP of the demon blacksmith kept dropping.

Although the damage of the demon blacksmith was a little bit fierce occasionally, it was still very powerful.

However, in terms of health, it was very ordinary.

The demon blacksmith only had 500 million HP.

To them, 500 million HP was not a problem.

With more than a hundred of them, it would probably only take two to three minutes to blow up the demon blacksmith.

Not long after, a huge shadow of a Demon God slowly rose from behind the demon blacksmith.

Everyone's HP was dropping rapidly.

However, no one panicked.

What a joke, everyone present was the big boss of wind and cloud Guild.

they were all wearing blue capes, and there were even some who had purple capes.

Moreover, everyone had reached level 40.

Even the lowest HP was over 70000.

A Guardian like the Secretary had more than 200000 HP.

Besides, the Nephilim blacksmith was just a normal red BOSS.

The demonic God's shadow that it summoned dealt much less damage than a real-name BOSS.

The damage per second was only around 6000.

with the support of the support, it was not a big problem to withstand the damage of the demon god's will.

After the demonic blacksmith summoned the demonic God's apparition, Feng Yunqing immediately stood in the middle of the crowd.

he cast a totem.

The totems healed groups of players and increased their attack power and attack speed for 15 seconds. It was a godly support skill for bosses.

"Haha, hurry up. This demon blacksmith isn't too fierce."

brother, don't be too full of yourself. When you can take the damage from the demon blacksmith's hammer, you can brag again.

"Who are you looking down on? The demon blacksmith's hammer can deal less than 100000 damage, how can I not take it? I have 110000 HP."

"Is that what you think? You ate the critical hit of the demon blacksmith?"

"What the f * ck, aren't you trying to argue? When the demonic blacksmith's critical hit is close to 500000 damage, who can withstand it except for six-barreled boss?"

don't be so noisy. Hurry up and kill the BOSS.

that's right. It's useless to just brag. Wait until we beat up the demon City Lord before bragging.

The group of them surrounded the demon blacksmith and kept hacking.

And the demon blacksmith also kept on waving his hammer, attacking Zhang Shan.

The damage kept appearing above Zhang Shan's head.

Each normal attack dealt around 80000 to 90000 damage.

When it was a critical hit, it dealt more than 400000 damage.

However, it was not a big problem.

Although the demon blacksmith had dealt such a heavy damage ...

When there were no small monsters around, it was impossible for Zhang Shan to absorb all the blood by himself.

However, he wasn't alone. He was soloing a BOSS.

He still had a large group of brothers.

Under the support of the support, Zhang Shan's blood volume was maintained at a healthy state.

More than 20 support players stood behind Zhang Shan and kept healing him.

As long as Zhang Shan's health dropped a little, it would immediately be filled up.

He carried it steadily.

after they had attacked for more than a minute ...

the demon blacksmith's hp was almost at half.

Feng Yun realm said.

leave three supports behind to heal six tubes. The rest of you, retreat.

The demon blacksmith was about to use his big move.

the damage of a big move was five times. with the 50000 attack of the demonic blacksmith, the damage of a big move should be 250000.

if it was a critical hit, the damage would be even more ridiculous. the damage would exceed a million.

The others couldn't withstand the damage from the demon blacksmith's big move.

In order to prevent any accidents, Feng Yun realm left behind three support to heal Zhang Shan.

when the ejection was passive and unable to play its role.

Zhang Shan could not be self-sufficient. He still needed support to heal.

Normal damage was fine.

The main reason was that the critical damage of the demon blacksmith was a little bit fierce.

without a support to help him heal, zhang shan would not be able to hold on for long.

The demon blacksmith could knock him to the ground with two hammer strikes.

Zhang Shan couldn't use his big move.

He had to save his God's descent skill for the battle against the demon City Lord.

If he used it now, he would not be able to use it later.

Chapter 480 Passive skill, heavy hammer

When he saw that the demon blacksmith's HP was about to drop to half, Feng Yun realm led the others to retreat.

Only Zhang Shan and three other supporting players were left.

zhang shan kept firing at the demon blacksmith.

The three support classes kept healing him from behind.

in a short while, zhang shan had reduced the demon blacksmith's hp to half.

When his HP dropped to half.

the demon blacksmith suddenly seemed to have gone crazy, and the hammer in his hand danced into a halo.

A violent aura spread out from the demon blacksmith.

The three supports standing behind Zhang Shan were instantly knocked down by this violent aura.

And above Zhang Shan's head, a damage of more than 200000 appeared.

it was still alright. this little bit of damage was nothing to zhang shan.

The damage of the demon blacksmith's big move was not even as good as the damage of a small skill.

As for whether it was because of bad luck ...

when the demon blacksmith used his ultimate skill, the critical effect was triggered?

There was no need to worry about this.

Because in the game's critical hit mechanism, group damage would not trigger the critical effect.

Not only would it deal damage with a high-level skill, but it would also not trigger a critical hit.

Damage from other sides and connected damage would not trigger the critical hit effect.

Even with Zhang Shan's ejection passive, only the first target that was attacked could trigger the critical effect.

Would the other 11 shots of ejection damage trigger a critical hit?

Therefore, Zhang Shan had never been worried about the damage from the demon blacksmith's big move.

Not to mention this crazy devil Hammer's big move, it only dealt one damage.

Even if the damage lasted for five seconds, Zhang Shan could withstand it with his lifesteal effect.

the damage of the nephilim blacksmith mainly came from the critical damage of the hammer.

As long as the Hammer's passive was not triggered, Zhang Shan could completely ignore it.

They couldn't do anything to him at all.

After a wave of high-level skills.

The others quickly ran up and continued to attack the BOSS.

As for the three support players on the ground, they were quickly revived by the others.

"come on, hurry up."

what's the rush? it's just a small red BOSS. We can kill it in minutes.

of course. If someone can tank the BOSS, it's not a problem at all.

"F * ck, I realized that you guys are a little too arrogant. Such a powerful BOSS, and you guys don't even care? And a small red BOSS?"

haha, it's not that we're arrogant. This is the truth.

"Alright, this demon blacksmith isn't too powerful."

hurry up. After we're done with this one, we'll go to the next one.

"That's right, let's take down the Twin Cities as soon as possible, and let boss also become a city Lord, hehe."

Under the swift and violent attacks of the group of people.

The demon blacksmith's HP dropped rapidly.

He quickly entered a berserk state.

However, after entering the berserk state, the demon blacksmith was just like that.

with the support of a group of assistants, the demon blacksmith could not threaten zhang shan at all.

As for the others ...

Then he didn't care.

Other than the big moves.

The demon race blacksmith didn't have a second skill that had a group attack effect.

As long as Zhang Shan could hold off the BOSS.

The others just treated it as if they were hitting wooden stakes.

He didn't need to do anything.

All he needed to do was to continuously cast skills and slash at the damage.

Looking at the demon blacksmith's HP, which was about to be emptied ...

Zhang Shan quickly summoned the Panda bear and controlled it to move forward.

...

When the demon blacksmith's health bar was empty.

Zhang Shan saw the opportunity and controlled the Panda bear, launching a combo skill.

After seven consecutive slaps, the demon blacksmith exploded.

≪ system announcement: congratulations to Feng Yun realm, six-barreled Bodhisattva, and heart follows me Pixiu for killing the demonic blacksmith. ≫

Skill point +1, achievement points +100.

[system notification: your passive King talent has been triggered by killing the demonic blacksmith.]
acquired hammer passive skill.

In less than three minutes, they had defeated the first BOSS, and the system announcement was made.

although zhang shan had brought his friends with him, and they had also fought a demon blacksmith in the demon suppressing city.

However, that time, the demon blacksmith was LV 50; this time, it was LV 70.

even though the bosses had the same name, they did not belong to the same BOSS.

...

There was still a first kill reward.

Of course, to Zhang Shan.

The first kill or not wasn't important.

The important thing was that he had obtained another passive skill.

The demon blacksmith's heavy hammer was passive, so he was able to use it.

He was lucky this time.

He was very happy just because he got a passive skill.

To Zhang Shan.

it didn't matter what kind of reward he got, as long as he had a passive skill.

He was still thinking of getting a few hundred passive skills in the future.

It was still early.

From the start of the game until now, he had less than 20 passive skills.

Although he was already very strong, Zhang Shan was not satisfied.

Still too little.

he should get more.

It was just that when he was farming monsters, passive skills were not easy to use.

The same type of monster only had one passive skill.

It's gone after I'm done.

Just like the wildebeest in the Gerri wilderness, that life was focused and passive, and he had already gained it.

No matter how he farmed, he would not have any more passive skills.

However, Zhang Shan could not keep changing maps to farm monsters.

It wasn't easy to find a monster with a passive skill.

the main thing was that he had to kill monsters of a suitable level.

There was no point in farming low-level monsters, as the experience was too little.

there was no place to look for monsters that were too high level.

The monsters in demon-suppressing city were generally around level 50 to 60.

If he wanted to find higher level monsters, he would have to run very far.

It did not matter to Zhang Shan if he was alone. He did not care how far he ran.

Anyway, he had the positioning bead, no matter how far away it was.

He only needed to run once and mark the coordinates.

However, his friends were not as convenient as him.

They had to rely on running.

However, after taking down Twin City ...

It should be much more convenient in the future.

The monsters here were all above level 70.

in the future, he could find a farming spot nearby and farm monsters here.

After the first boss was defeated, everyone was very happy.

As long as they could take down the other four bosses, they would be able to take down the Twin Cities.

And he could also get a few skill points.

There was a first kill reward for the first boss.

The next four bosses would definitely have first kill rewards as well.

Not to mention the first clear of the boss, the items dropped were usually better. Just the five skill points alone were enough.

they had earned a lot this time.

Other than Zhang Shan, everyone else was lacking in skill points.

“Haha, one skill point in hand.”

“look at you, one skill point and you’re so happy.”

“F * ck, if you don’t have the ability, then don’t come here.”

that’s right, don’t pretend to be noble. Isn’t it worth being happy that you got a skill point reward? ”

“Don’t shout, boss. Take a look and see if there’s anything good.”

“No, only trash equipment.”

Feng Yun realm said after taking a look at his bag.

At the same time, he displayed the dropped items on the party channel.

Zhang Shan took a look. There were three red equipment, one red material, and one rubbish skill book.

The skill book was the Berserker’s heart of the Berserker class. This skill book could not be considered trash.

berserker’s heart skill. upon activation, increase berserker’s attack power by 100% for 10 seconds.

It could be said that this skill was a qualitative change for the Berserker class.

Even now, this skill book was still in high demand.

at the auction house, it could be sold for at least 100000 gold coins.

The key was that he couldn’t buy it.

As long as it was hung up, it would be snatched away very quickly.

Those who didn’t pay a high price or paid close attention to the auction house might not have this skill.

Among the Guild leaders present, not all Berserkers had this skill.

As expected, after Feng Yun realm displayed the item.

A guild leader shouted.

haha, it actually dropped the heart of the Berserker. Boss, quickly ROLL for it.

that’s right. I don’t have this skill book yet either. I’ll split it up for speed.

“by the way, don’t fight for those who have already learned this skill.”

Feng Yun realm said.

“Alright, I’ve never learned the count-off from the Berserker’s heart.”

After Feng Yun realm had finished speaking, three Berserkers began counting down.

Feng Yun realm quickly rolled the dice.

The Berserker’s heart would be distributed among the three of them by rolling.

After a short while, the skill book was rolled by one of the Guild leaders.

Feng Yun realm said after the skill books were distributed.

“We won’t distribute the other items for now. We’ll talk about it after we kill the other four bosses.”

“Alright, let’s go find the next BOSS.”

“Which one should I attack next?”

I’m just playing. Is there an order to this thing? ”

Upon hearing this, Zhang Shan silently cursed in his heart.

The five bosses that were attacked in the demonic city were really in order.

Back then, when Zhang Shan and the rest attacked the demon-suppressing city, they had attacked in order.

If they didn’t follow the order, they wouldn’t be able to find the BOSS and enter the building where the BOSS was.

Zhang Shan was just about to speak.

At this moment, Windcloud blade said.

don’t mess around, these five bosses are in order. The next one will be the demon medicine master.

Upon hearing wind cloud blade’s words, the others found it hard to believe.

“That’s impossible. Aren’t they all bosses? We’ll be done once we beat them all, where’s the order?”

hehe, go and try the other bosses. You can’t get in at all.

“F * ck, there’s such a thing?”

“why don’t i believe it? is yi dao trying to trick us?”

I’m bluffing a fundamental wave. Is there any benefit in bluffing you guys? ”

Feng Yun realm said.

we’ll fight in the order they did last time. Now, let’s go find the demon medicine master.

alright, there are just too many wild monsters in the city. Otherwise, I would really want to find other bosses to try.

” there’s nothing better to do. if there’s a ready-made experience, there’s no need to use it. you must hit a wall. ”

“You know nothing. This is called the spirit of exploration.”

“Explore my ass, let’s go.”

After beating the demon blacksmith, Zhang tie’s eyes lit up.

Everyone walked out of the blacksmith shop and followed the instructions on the minimap, clearing monsters all the way to the demon pharmacist workshop.

When Zhang Shan and the rest were still pushing for the medicine master’s workshop.

The world Channel also slowly became lively.

After all, the demon blacksmith was a sensitive BOSS.

back then, when zhang shan and the rest attacked the demon-suppressing city, they started with the demon blacksmiths.

Now that he had blown up a demonic blacksmith, did that mean that the wind cloud Guild was attacking the demonic city?

” did anyone notice the system announcement? the wind and cloud guild has killed another BOSS. ”

“What’s so strange about killing a BOSS? Every day, there would be dozens of system announcements.”

pig brain, the one the wind and cloud Guild beat up was the demonic blacksmith.

“So what if it’s a demon blacksmith? It’s not a BOSS with a real name, so it’s not worth paying attention to.”

“F * ck, did the wind and cloud Guild defeat the demonic blacksmith? Are they attacking a Demon City?”

f * ck, the last time we went to attack the demonic Twin City, no one was able to take it down. Is the wind and cloud Guild attacking Twin City? ”

that’s about right. Besides Twin City, are there any other demon cities? ”

“I don’t know. Twin City is not an easy place to fight. Maybe they have found it, but what about the other cities?”

yeah, the Twin Demon City is too difficult to fight. All of them are level 70 monsters. If there are too few of them, they can’t even get through the gate.

for us, Twin City is not an easy place to fight, but with six-barreled Bodhisattva around, wind and cloud Guild will be fine.

“F * ck, we’ve only discovered two demon cities so far. Are we going to let the wind cloud Guild occupy them all? Is there anyone who wants to take over the city?”

“you’re still snatching the fundamental wave now. by the time you get there, the wind and cloud guild will have already taken down twin city.”

f * ck, this is too much. Are they going to let the wind and cloud Guild occupy both cities? ”

what else could it be? Twin City has been around for more than a month, and no one has been able to take it down. Who can you blame? ”

“yeah, it’s a weakness to not have enough strength.”

no, I have to find other cities. I don’t believe that there are no other cities of the demon race.

“There should still be some, but no one can find them.”

it’s also possible that the system has only released two cities, and the other demon cities haven’t been released yet, so no one can find them.

who cares? just send people to keep searching. We’ll find the demon City sooner or later.

The players in the game felt sour when they saw the wind cloud Guild attacking the demonic city.

But they had no other choice.

Twin Demon City was too far away from the outside world.

Even if other players wanted to come and cause trouble, they didn’t have the chance.

it would take at least three or four days to run from the demon-suppressing city.

With this amount of time, Zhang Shan and the others would have either taken down Twin City long ago, or they would have gone back directly because they could not win.

He didn’t need to worry about others coming to cause trouble.

Zhang Shan and the rest only had about a hundred people. When they arrived, there was not much movement.

Before they destroyed the demonic blacksmith, the other players would not know that they were attacking the demonic city.

Even if he knew now, it was already too late.

Zhang Shan and the others did not care about the outside world’s disturbance.

They were currently advancing toward the demon medicine Master Workshop.

the demon apothecary workshop was not far from the blacksmith shop, and was also in the same direction of twin city.

However, the city was filled with monsters.

Even if it wasn’t far away, they still had to clean up for a while before they could run over.

As Zhang Shan fired his gun to clear the monsters, he checked his skills.

He had yet to see the effects of the hammer skill that he had just obtained.

Although the passive skills that he had obtained through his talent were mostly fixed.

For such a critical hit passive skill, after Zhang Shan obtained it, the damage multiplier would not change, and the trigger rate would be one percent.

But sometimes, there would be surprises.

For example, the passive skill, public heart strike, that he had obtained previously had a 2% chance of triggering it.

Perhaps the hammer passive skill he had obtained this time also had a 2% chance of triggering.

He quickly took a look.

However, after Zhang Shan checked the skill, he did not find it surprising.

[heavy hammer (passive): there is a chance to trigger a 5x Critical Hit Damage with a 1% chance.]

Alright, one percent it is.

he just needed to get more passive skills in the future.

As long as he had enough passive skills, the probability was not a problem at all.
