

## Passive Skills 501

Chapter 501-Feng Yun realm panicked

When Zhang Shan saw that his shot had only managed to reduce the godfiend Guard's health by a small amount.

he was really a little shocked.

Why did these godfiend guards have such high HP?

Weren't these godfiend guards just ordinary monsters?

Could it be that he was also a BOSS?

However, the names of these godfiend guards were white.

It wasn't like the BOSS's name, which had color.

In other words, these divine-demon guards were indeed small monsters and not bosses.

But why were the monsters so high in HP?

Only the heavens would know.

This was probably a special setting in the game.

Although the godfiend guards had high HP, they had to be cleared out first.

As for the demon siege cannon and the godfiend Guard Captain on the cannon, Zhang Shan did not even look at them.

He had to deal with these godfiend guards first.

In any case, the cannon minion and the captain of the divine fiend guards didn't seem to attack them.

Zhang Shan kept firing while checking the attributes of the divine demon guards.

[ divine demon guard: level 70, attack 10000, hp 1000000, skill, divine demon (passive) ]

[ God and demon (passive): born as a God and demon, has abnormally strong HP, greatly increases HP. ]

After seeing the God's passive skill.

Zhang Shan was drooling.

It was no wonder the godfiend guards had such ridiculously high HP.

A normal level 70 monster would only have around 80000 HP.

These godfiend guards had a million HP.

His HP had increased by more than ten times.

It turned out that the divine-fiend guards had such a powerful passive skill.

Natural-born divine demon?

It looked very powerful.

It was a skill that increased the HP of the monsters by more than ten times.

It was ridiculously strong.

More importantly, it was a passive skill.

In other words, through his passive King talent, Zhang Shan had the chance to farm out this passive skill.

Of course, he was just thinking about it.

These godfiend guards could only be considered ordinary monsters from their names.

In order to obtain a passive skill from normal monsters ...

Based on Zhang Shan's experience, it would take hundreds of thousands, or even millions, to farm them.

As for the godfiend guards, there were only about a thousand of them.

The chances of him obtaining this passive skill were not high.

Thinking of this, Zhang Shan raised his head and looked at the captain of the divine demon guards who was standing on top of the demonic cannon.

This squad leader was a red boss.

He didn't know if it was because this God was also passive.

If there was, then it would be easy.

On a red boss, there was a high chance that a passive skill would be activated.

Zhang Shan kept firing his guns.

However, he still hadn't killed a single godfiend guard.

With 1,000,000 HP, without a critical hit, he would have to hit it nearly 20 times.

Including the critical hit, it would take at least seven or eight hits.

After Zhang Shan started to attack the divine-demon guards.

the other bosses in the team also started to attack.

After the godfiend guards pushing the cannon carts were attacked, the godfiend guards' faces darkened.

They quickly split into two. Half of the godfiend guards blocked in front of Zhang Shan and the others, while the other half continued to push the demonic siege cannon.

windcloud blade could not help but call out in frustration as he swung his greataxe at the monsters while looking at the advancing cannon minions.

holy shit, we won't be able to clear out all these godfiend guards in a short time. The siege cannon is still advancing.

...

"Then what do we do?"

"Why don't someone try to block it and see if it can attract the aggro of the cannon minion and block it?"

stop my ass. We don't even need to try to know that this demonic siege cannon only has wind Cloud City in its eyes. It won't even care about us.

yes, I guess the aggro of the demonic siege cannon has long been locked on wind Cloud City. We can't pull the aggro.

that should be the case. Look at the captain on the cannon chariot. When we were killing the other godfiend guards, he didn't even pay attention to us. He only focused on commanding the cannon chariot to advance.

"Then isn't Fengyun city finished? with the cannon minion's speed, it won't take long before it reaches wind cloud city."

"Don't panic, just quickly cut down these fiendcelestial guards. Didn't you guys notice? After half of the demon God guards were taken away, the speed of the demonic siege artilleries has already slowed down."

it seems so. As long as we keep destroying these Demon God guards, the speed of this demonic siege cannon will only become slower and slower.

"haha, you're right. Kill the monsters quickly so that the cannon minion will never be able to get close to wind Cloud City."

Under their rapid attacks, the godfiend guards pushing the cannon carts slowly decreased in number.

Although these divine-demon guards had more than ten times more HP than normal monsters, they were still weak.

...

However, Zhang Shan and the rest were not ordinary people.

Under their attacks.

Even a BOSS would fall, not to mention the fact that these divine-demon guards weren't bosses.

Each godfiend guard had a million HP.

Each of Zhang Shan's shots dealt more than 60000 damage.

If it was a critical hit, it would be even higher.

as for the special effect of the holy strike, it was one-shot.

Under the passive boost of ejection.

Zhang Shan only used 10 shots to take down 12 godfiend guards.

The other members of the team also attacked together, and the damage they dealt was also quite considerable.

Although the demonic siege artilleries were still moving forward.

However, as the godfiend guards pushing the cannon carts were attacked, the number of godfiend guards decreased.

The speed of the siege cannon also became slower and slower.

They were about two hundred yards away from Wind Cloud City.

If they could maintain their current clearing speed ...

This demonic siege cannon couldn't even get close to Wind Cloud City. It couldn't even get within a hundred yards.

While they were busy clearing out the godfiend guards, Windcloud blade suddenly shouted.

"Oh no, there are three more demon cannon chariots in the other directions. We've already stalled this one, but we don't know what's going on with the other cannon chariots."

"Hurry up and remind them. Let the others quickly push forward and stall the cannon minions."

Unfortunately, everyone was too focused on dealing with the godfiend guard in front of them and forgot to remind the others.

It was already too late when they remembered it now.

In the distance, three loud rumbling sounds could be heard.

The three demonic siege cannons in the other directions had already advanced to a distance where they could attack.

They were launching an attack on Wind Cloud City.

As no one went forward to kill the godfiend guards, the three demonic siege cannon chariots continued to move forward at normal speed.

Very quickly, they were within attack range.

The three demon siege cannon chariots each fired one shot.

Three large holes were blasted open on the city wall of Wind Cloud City.

One shot, one wound. It was very fierce.

Hearing the loud noise from afar, Feng Yun realm's face turned ashen.

This was only the first wave of monsters, and the city wall had already been broken through.

how were they going to defend against the more powerful demon monsters?

When three holes were blasted into the city wall of wind Cloud City, the entire Guild channel instantly exploded.

"F \* ck, the city wall has collapsed."

"You trash that stayed outside the city, why didn't you delay the demonic siege cannon?"

"f \* ck, we can't hold them back at all. these demonic siege artilleries simply ignore us and keep pushing forward. we can't stop them at all."

"Damn it, I'm already dead on the city wall."

Zhang Shan's side had no problems.

However, the entire Fengyun city was one entity.

If the other three sides of the city wall were broken through.

There was no point in just defending their side.

At this moment, Feng Yun realm anxiously shouted in the Guild channel.

" first, attack the godfiend guards that are pushing the cannon carts. after clearing out all the godfiend guards, the demon siege cannon carts will not be able to move. "

boss, it's not that we don't want to fight the godfiend guards. These godfiend guards are a bunch of meat. Furthermore, there are so many of them. It's impossible to clear them all in a short time.

we have to clear them even if we can't. Let's clear the godfiend guards first.

Feng Yun realm said to Zhang Shan after he finished speaking in the Guild channel.

six-man Butler, I'll hand over the captain position to you. I'll go back and repair the city wall first.

"Alright," he said.

This time, Feng Yun realm was really anxious.

He knew that the monster attack on wind Cloud City this time was not that simple.

however, feng yun realm never expected this.

This was only the first wave of attack, and there was already a huge flaw.

Now, he had to go back and repair the city wall.

Otherwise, if too many of the city walls fell, the system would probably judge that the defense had failed.

After Feng Yun realm passed the party leader position to Zhang Shan, he started to channel a return to the city.

He had no choice.

In order to block the demonic siege cannon earlier, they had pushed forward a distance.

Right now, behind them, there was also a large number of demon soldiers.

If Feng Yun realm wanted to return to wind Cloud City, he would have to clear the monsters behind him.

He didn't have the time to clear out these small monsters.

He could only return to Dangyang city and teleport from Dangyang city to wind Cloud City.

When Feng Yun realm arrived at the city Lord's mansion, he started to use gold coins to repair the city wall.

however, just as he finished repairing the city wall, three more loud sounds rang out.

The city wall collapsed again.

he had no choice but to continue building the city wall.

Feng Yun realm stayed in the city Lord's mansion and spent a large amount of gold coins.

Every time there was a loud noise, he had to invest a large amount of gold coins to repair the city wall.

Fortunately, the attack speed of these demonic siege cannons was not too fast.

He could only launch three to four attacks in a minute.

Hence, Feng Yun realm was still able to hold on for now.

of course, the most important thing now was to quickly clear out these demonic siege cannons.

Although Feng Yun realm was not lacking in money.

However, if this continued, the landlord would not have any surplus food.

After Feng Yun realm left.

Zhang Shan led the others and continued to clear the godfiend guards that were pushing the cannon carts.

after three to four minutes, they finally cleared out all the godfiend guards.

when all the godfiend guards were knocked to the ground ...

The unmanned demonic siege cannon had completely stopped at a position about 150 yards away from wind Cloud City. It could not move a single step forward.

"haha, this demon siege cannon can't be moved. kill the dog."

"quickly destroy the cannon. after we're done with this one, we'll go to the other directions to help."

At that moment, a sharp-eyed Big Shot suddenly shouted.

f \* ck, look at the BOSS on the cannon! What is he doing?"

When Zhang Shan raised his head and looked at the squad leader on the cannon vehicle.

The captain of the divine fiend guards held a rope in his hand and suddenly pulled.

It was the giant arrow installed in front of the demon's siege cannon.

with a boom, it shot forward.

Five or six of his teammates who were in front of the cannon minion fell.

They were not hit by the giant arrows.

Just the air current brought about by the huge arrow had killed them in seconds.

However, no one paid any attention to this.

Zhang Shan and the others who were still alive could not help but look at Wind Cloud City behind them.

They were afraid that the demons' cannon chariots would attack the city. The attack just now had opened another hole in Fengyun city.

However, when they looked back ...

Wind Cloud City behind him was still intact.

He was not hit by the giant arrow.

It was because the shooting range was not enough.

The huge arrow that was shot by the demon siege cannon.

they stopped about fifty yards away from Wind Cloud City.

Then, it slowly dissipated.

Seeing such a situation, everyone could not help but let out a long sigh of relief.

The support quickly resurrected the fallen players.

"Holy shit, it was so scary just now. I thought that from such a long distance, even the demon race's siege artillery vehicles could break through the city wall. If that's the case, I'm afraid Fengyun city won't be able to defend at all."

"That's right, it's a good thing that the range of these demon siege cannons is limited."

"That's normal. If these demonic siege cannons don't have a range limit, then what's the point of playing?"

"Hmm, these demonic cannon chariots probably only have a range of 100 yards. As long as we can stop them from a hundred yards away, there won't be any problems."

Sigh, we have no problems here, but the demonic siege cannons in the other directions have already advanced to attack range and are attacking non-stop. I really feel sorry for boss's gold coins.

Hurry up and destroy the cannon minion. Destroy the cannon minion as soon as possible and save some gold for boss.

After clearing out all the godfiend guards ...

They quickly began to attack the demonic cannon chariots.

Zhang Shan lifted his hand cannon, and the bullets flew towards the demonic siege cannon.

The damage was between the cannon minion and the captain of the divine fiend guards, bouncing back and forth.

However, there was one thing that made everyone feel very strange.

It was understandable that the demonic siege cannons would not attack them.

After all, it was specially used to attack cities.

It was normal that it couldn't be used to hit people.

However, why didn't the captain of the divine fiend guards attack them?

He just stood firmly on the cannon vehicle, his hand pulling the rope tightly.

Could it be that the captain of the divine demon guards was just a prop?

As Zhang Shan fired continuously, he checked the attributes of the leader of the divine demon guards and the demonic siege cannon.

[ divine demon guard squad leader (red): level 70 ],[ HP: 5 billion ] [ skill 1 ] [ heavenly worker ] [ skill 2 ]  
[ celestial demon (passive) ]

[ heavenly workmanship: the captain of the godfiend guards has learned the heavenly workmanship skill. He is now proficient in controlling and controlling all sorts of siege weapons. ]

[ Demon God (passive): born as a Demon God, has abnormally strong vitality, greatly increases HP. ]

[ demon siege cannon (red) ]

attack power: ?, [ HP: 5 billion ] Skill, city break.

[ city siege: has a destructive effect on city walls. ]

After Zhang Shan looked at the attributes of the divine demon guard Captain and the demonic siege cannon vehicle, he was shocked.

he couldn't help but be surprised.

The attributes and skills of these two guys are really weird.

Its attack power was all question marks.

it was possible that these two guys did not have any attack power.

Of course, it could also be that its attack power was so high that it was a question mark.

however, zhang shan's view leaned towards the former.

The two red bosses would not attack players.

Hence, to players, it had no attack power.

Although the demonic cannon had launched an attack just now, it was still too weak.

he had also knocked down a few of them.

But that was just an accident.

The target of the demonic siege cannon had always been wind Cloud City.

Who asked those few unlucky fellows to just give way in front of the cannon vehicle?

This was only an additional damage.

The squad Captain of the divine fiend guards and the demon siege cannon vehicle were specially made for sieging cities.

It was not meant to deal with players.

However, these two red bosses did not have any attack power.

However, their HP was terrifyingly high.

each had five billion hp.

With such high HP, how long would it take to kill him?

zhang shan suspected that they would probably fight until the second wave of monsters arrived.

They might not even be able to kill these two.

Many people in the team might have realized this.

they were immersed in the happy rhythm of killing dogs.

haha, is the captain of the divine fiend guards a fool? he actually didn't fight back.

"what kind of hands does it have? didn't you see that it's always pulling the rope? It's probably used to operate siege cannons."

it's a red BOSS after all. Can't it just jump down and slash at us? "

"Who cares? isn't it great that it's a BOSS that can't kill people?"

"That's right, let's kill the dog."

" why are you guys so happy? didn't you see the health of the divine demon guards 'squad leader and the demonic siege cannon? they both have five billion health. how long will it take for them to die? "

"F \* ck, no way. They all have such high HP?"

Many of his teammates had not checked the health of the two red bosses.

When he heard that the HP of these two guys was five billion, he was stunned.

Everyone was stunned.

“What the f \* ck, what should I do? I estimate that the next wave of siege cannons will be here soon.”

did we do something wrong? we shouldn't have stopped the demonic cannon chariots. We should have let them enter the shooting range of the arrow towers and let them attack. Our damage is not enough.

“Don't say anything, quickly call people over to help. With only a few of us, we definitely won't be able to kill these two.”

that's right, quickly call for reinforcements. Those guys on the city wall are fine staying there. Let them come down and help cut them down. They're just killing dogs anyway.

After checking the health of the two red bosses, everyone quickly realized that they had been killed.

They wouldn't be able to kill these two guys with just these people.

Zhang Shan's team only had 50 people.

After Feng Yun realm returned, there were only forty-nine people left.

It was impossible for them to take down two bosses with 10 billion HP.

It was simply unimaginable.

Even if Zhang Shan's catapulting was passive and could achieve the perfect effect, it would not be effective.

The health of these two bosses was simply too high.

No matter how high Zhang Shan's damage was, it would not be of any help.

He had to call for backup.

In such a situation, it was better to have more people.

No matter how high Zhang Shan's damage was.

the damage he could deal alone was equivalent to that of dozens of people.

But it couldn't compare to the damage of a few hundred or a few thousand people.

As long as a few thousand players attacked together, they could quickly kill these two bosses.

Fortunately, the godfiend guards that were pushing the cannon carts had all been cleared.

The demonic siege cannon couldn't move, nor could it counterattack.

The rest of them came over together and just had to keep on dealing damage.

Chapter 502 Guild skill attribute enhancement

When everyone realized that it would take a long time to defeat the two red bosses with just the few of them, they were all stunned.

Meanwhile, the monster attacks came in waves.

Therefore, he had to call for backup as soon as possible.

They had to defeat the two red bosses before the second wave of demonic monsters arrived.

Zhang Shan quickly called for Feng Yun realm and asked him to arrange for reinforcements.

Under Feng Yun realm's arrangement.

The Guild members that were originally on the city wall quickly split off 5000 players.

It didn't take long for them to join in the attack on the two bosses.

They had thousands of people, under the leadership of Zhang Shan.

They surrounded the demon siege cannon and kept attacking.

after a while, the health of the demonic cannon began to decrease rapidly.

however, none of them attacked the captain of the divine fiend guards, who was standing on top of the cannon.

That guy was standing too high up.

He couldn't hit it in close combat.

Although long-ranged players could hit him, they had to look up.

No one was willing to waste this effort.

Everyone lowered their heads and attacked the demon siege cannon.

He completely ignored the existence of the godfiend guard squad Captain.

Other than Zhang Shan's bullet damage, there were not many people who would fight the small teams of the divine demon guards.

This could not go on.

Wouldn't that affect the efficiency?

Seeing this situation, Zhang Shan opened his mouth and said.

close-combat, kill the demonic siege cannon. Long-range, attack the divine demon guard Captain.

Zhang Shan quickly distributed the firepower.

He couldn't keep catching them, as the demons were attacking the city with cannons.

Everyone had to take care of the captain of the divine fiend guards.

Don't always think about picking easy fights.

These two red bosses had the same amount of health.

if everyone only attacked the demonic siege cannon and no one attacked the divine fiend guard squad leader ...

After they had blown up the demonic siege cannon, they had been stunned.

Only the leader of the divine demon guards and the boss were left.

Zhang Shan's ejection damage would not be effective.

After Zhang Shan redistributed the firepower.

The demonic cannon minion and the divine demon guard captain's HP continuously decreased under their attacks.

The squad leader of the divine fiend guards, who was being attacked, didn't pay any attention to them.

however, she was still holding onto the rope.

Every ten seconds or so, he would pull it once.

he controlled the demonic siege cannon and fired the huge arrows.

Unfortunately, they were still more than a hundred yards away from Wind Cloud City.

It had exceeded the range of the demon siege cannon.

In other words, the huge arrows fired by the demon siege cannon had no effect.

It didn't even damage Wind Cloud City's fur.

As for the Guild members present ...

After his previous experience, he had become a God.

Everyone on the scene deliberately avoided the front of the demon siege cannon.

Instead, they stayed at the back, left, and right sides, launching attacks continuously.

The demonic siege cannon would fire three to four giant arrows every minute.

however, they couldn't even hurt a single hair of theirs.

As for the squad leader of the divine fiend guards, who was standing in the cannon chariot, he didn't need to pay any attention to him.

That BOSS was just a tool.

It was a tool used to operate siege cannons.

It would not attack the players at all.

...

At least for now, that was the case.

Under the continuous attacks of the large group of people, the health of the two red bosses was dropping rapidly.

90%, 80%, 50%.

After three to four minutes.

The demons' attack on the cannon minion had only half of its HP left.

The divine demon guard Captain on the cannon chariot also had about the same amount of HP.

Soon, it would be reduced to half of his health.

However, no one retreated. Instead, they continued to attack the two bosses with their maximum damage.

this was because these two red bosses did not have any skills at all.

In other words, it had no skills to attack players.

even if they had beaten him to half health.

...

These two bosses weren't like other normal bosses, who could use big moves.

This was because these two red bosses didn't have any big moves to use.

The only way the squad leader of the divine fiend guards and the demonic siege cannon could attack was to shoot huge arrows at the city walls.

Other than that, the two of them were completely Blockheads.

A BOSS that didn't fight was not a boss for everyone.

as long as he kept on dealing damage, it would be fine.

Logically speaking, this was the simplest combination of all the bosses they had fought.

if it wasn't for the fact that the demonic siege artilleries from the other three directions were still attacking the city walls.

The monster attack this time was simply giving them benefits.

A BOSS that couldn't fight back, wasn't that just a bonus?

As long as they killed the BOSS, they would get some items.

Even if nothing was dropped, there would still be experience points.

A red BOSS's experience points were quite a lot.

Moreover, there was no reason for these two red bosses not to drop anything.

No one dared to even dream of encountering a BOSS that wouldn't fight back.

However, the reality was like this. They just had to meet a BOSS who didn't know how to fight back.

And two of them appeared at once.

If the four directions were added together, that would be eight red bosses.

eight bosses with benefits.

of course, the benefits were only for guild members like Zhang Shan.

To Feng Yun realm, this city Lord, he was nothing.

these demon siege cannon vehicles were simply cutting his flesh.

Even if Feng Yun realm was a truly rich man.

Every time he repaired the city wall, his heart was bleeding.

no matter how much money he had, he could not afford to spend it.

These demonic cannon chariots could Attack 3 – 4 times per minute.

Every time, he could break the city wall.

In other words, Feng Yun realm had to repair the city walls three to four times every minute.

Feng Yun realm did not mention how much gold it would cost to repair the city walls.

However, according to Zhang Shan's estimation, it would cost at least a million gold coins.

It could also be millions or even tens of millions.

The key was that they had to get the gold coins and spend them endlessly until they destroyed all the demon siege cannons.

From the first arrow shot by the demonic cannon until now.

Four to five minutes had already passed.

How many seconds of gold coins would that cost?

And this was on Zhang Shan's side, who had stalled the demon siege cannon ahead of time.

with one less demon cannon to attack the city wall, Feng Yun realm had saved quite a bit of money.

Zhang Shan did not know how the progress in the other three directions was.

In any case, they had only taken half of their health.

The entire battle would take about ten minutes to defeat the two red bosses.

Of course, there were also the demon siege cannons in other directions.

Apart from facing the siege of a large number of guild members.

They also had to face the attacks of many arrow towers.

After all, those demon siege cannons were already within the shooting range of the arrow towers.  
perhaps the demonic cannon vehicles in other directions would be blown up before them.

&Nbsp; no matter what.

This first wave of attack would cost Feng Yun realm to repair the city walls.

At the very least, he would have to spend tens of millions of gold, or even hundreds of millions of gold.  
this was just the beginning.

The demons 'attacks would only get fiercer.

Zhang Shan could not help but feel heartache for Feng Yun realm's gold.

He didn't know if the gold coins he had prepared were enough.

sigh, it's not easy to be a big shot.

Zhang Shan did not think further.

Destroying the demonic siege cannon as soon as possible would be the best help to Feng Yun realm.  
he held the hand cannon and kept firing at the demonic cannon.

Every shot dealt damage that alternated between the cannon minion and the divine demon guard  
Captain six times.

Furthermore, as long as Zhang Shan's explosive skills were on cooldown, he would go all out.

He didn't have the slightest intention of saving his skills.

It was still early for the event anyway.

The monster attack in wind Cloud City would last for two hours.

Berserk and fanatic skills had a cooldown of five minutes.

He could use it countless times throughout the event.

There was no need to save his skills.

Other than the big moves.

As for his other skills, Zhang Shan would activate them as soon as they were off cooldown.  
under their swift and violent attacks.

the demonic cannon minion and the divine demon guard captain's hp fell faster and faster.  
50%, 40%, 30%, 20%.

very quickly, they had reduced the health of the two red bosses to 20%.

However, it was different from other bosses.

These two bosses did not go berserk after their HP dropped to 20%.

It was still normal, shooting three to four giant arrows every minute.

As Zhang Shan attacked, he also kept an eye on the health of the two bosses.

In a short while, the health of the demonic siege cannon had been reduced to zero.

He saw that the demonic cannon minion was empty of health.

Zhang Shan did not control the Panda bear, but used his combo skill.

apart from the demonic siege cannon, there was also a godfiend guard captain.

The captain of the divine demon guards was not empty of HP.

It still had 5% HP left.

Zhang Shan was planning to leave the Panda's combo skill to the team leader of the divine demon guards.

after all, the team leader of the divine demon guards had a divine demon passive skill, which made him very envious.

However, the problem was that only by snatching the last hit could one trigger the talent and obtain a passive skill.

However, there were simply too many guild members participating in the attack.

Although Zhang Shan's damage was very high, there was no guarantee that he would be able to get the final kill.

He wanted the Panda ball to deal the final blow.

This way, it would be more stable.

The damage of the Panda's combo skill was much higher than Zhang Shan's own.

It was more stable to use it to kill.

As for the demonic cannon, he would just use normal attacks to destroy it.

Everyone focused their attacks on him.

The demonic siege cannon vehicles were directly turned into ashes by them.

&Lt; system announcement: congratulations to six-barreled Bodhisattva, heart moves, and wind and cloud blade for successfully killing the demonic siege cannon. &Gt;

Skill point +1, medal +100.

Very good, a BOSS fell to the ground.

After the demonic siege cannon was blown up by them.

The squad leader of the divine fiend guards, who had been standing on the cannon chariot, suddenly fell to the ground.

Suddenly, it pulled out a large blade from somewhere and slashed at Zhang Shan.

-192786 damage.

Holy sh \* t, this damage is so high.

Now, only the leader of the divine demon guards and the BOSS remained.

Zhang Shan's catapulting damage was not effective.

The captain of the divine fiend guards couldn't withstand such a powerful attack with his lifesteal.

Looking at the damage value, Zhang Shan could not help but scream.

"Support, quickly heal me."

The support jobs nearby quickly reacted and quickly added more blood to Zhang Shan.

f \* ck, why are your ranged soldiers so useless? you can't even fight as fast as us melee fighters.

A close-combat Big Shot had already been blown up when he saw the demon siege cannon.

However, the captain of the divine fiend guards couldn't help but curse before he fell to the ground.

After all, these two bosses had the same amount of health.

From the beginning, everyone had already divided the work.

The melee fighters were responsible for attacking the demon siege cannon.

As for the captain of the divine demon guards, he would leave it to the ranged classes.

However, the squad leader of the divine fiend guards had yet to fall to the ground.

This was not all.

After the demonic siege cannon was blown up by them.

The leader of the divine demon guards, who was originally like a block of wood, had now become a real BOSS.

He was waving his big knife and slashing at Zhang Shan.

Fortunately, the leader of the divine demon guards had locked his hatred on Zhang Shan.

He didn't cut anyone else.

if it went to cut other people.

Wouldn't that be killing a child with one blade?

He heard the ridicule of a certain melee boss.

The long-range classes present were not happy.

“Brother, you’re really bold to open up a map and taunt all the long-ranged classes. I’m afraid you don’t know that the six-barreled boss is also a long-range profession.”

that’s embarrassing. How dare you call Big Boss six-barreled a waste? are you out of your mind? hehe.

“A slip of the tongue, a slip of the tongue.”

“Haha, can you take back the words you’ve said?”

he really doesn’t know his place. He actually dared to call the six-barrel boss trash, hehe.

“f \* ck, what’s the point of shouting? hurry up and beat up the divine demon guard squad leader.”

Although the divine demon guard squad leader’s damage was indeed a little high, it was still too much.

However, it was just a normal red boss.

Even if Zhang Shan was in a passive position due to catapulting and could not unleash the effect, and could not absorb much health.

However, they still had a lot of support players.

There was no problem at all in adding blood to Zhang Shan’s body.

Furthermore, the captain of the divine demon guards did not have any damage skills.

it could only swing its big knife and slash.

A BOSS that could only use normal attacks was no threat to everyone.

Most importantly, the squad leader didn’t have much HP left.

After the demonic cannon fell to the ground.

The captain of the divine demon guards only had 3% of his HP left.

Under everyone’s concentrated fire, they quickly reduced their health to zero.

zhang shan saw the opportunity and controlled the panda bear, launching a combo skill.

The squad leader of the divine fiend guards exploded.

&Lt; system announcement: congratulations to six-barreled Bodhisattva, one fairy, and Windcloud cannon Wufu for killing the divine demon guard squad leader. &Gt;

Skill point +1, medal +100.

haha, I’m actually on the system announcement.

Seeing her name appear on the system announcement, little fairy cried out in joy.

Actually, this was normal.

The little fairy’s equipment and skills were not inferior to the bosses of other guilds.

and she had already reached level 50.

They far surpassed the bosses of other guilds.

In a situation where close-combat classes didn't participate in the attack.

After killing the divine demon guard squad leader, little fairy's damage was naturally at the top.

After the system announcement, the little fairy was elated.

But Zhang Shan was very depressed.

There was no system notification, only a system announcement.

In other words, he did not trigger the passive King talent.

zhang shan was depressed.

but don't panic.

The next wave would most likely include the divine fiend guards and the divine fiend guard squad leader.

according to his experience in the demon-suppressing city ...

There should be four waves of such monsters attacking the city.

A wave of them would come every half an hour.

The demon monsters that attacked the city in every wave were basically the same.

However, the level of the monsters would gradually increase as they progressed.

As for the rest, there wasn't much difference.

If he didn't get the first wave, the next wave would come.

There were four waves in total anyway.

He didn't believe it.

After killing four waves of divine fiend guards and the divine fiend guard squad leader, he would not be able to obtain this passive skill.

.....

as the leader of the divine demon guards fell to the ground, the two bosses on zhang shan's side had been dealt with.

However, he still didn't know what the bosses in the other directions were like.

After killing the divine demon guard squad leader, Windcloud blade shouted in the Guild channel.

"We're done. What's the situation in the other directions? do you need reinforcements? tell us."

"No need, we'll be there soon."

“There’s no need for reinforcements, we can immediately destroy it.”

“Damn it, why are we not as fast as you guys even though we have the firepower of the arrow towers?”

we have the six-barreled boss. Is this something the arrow tower can compare to? ”

alright, six-barreled boss is awesome.

“Then you guys should rest first, no need for reinforcements.”

He saw that they did not need their help in other directions.

Zhang Shan said.

let’s retreat first. The next wave of demonic siege cannons might be arriving soon. Let’s go back and wait.

“why should we go back? isn’t it better to just wait here?”

“I think it’s better if we don’t. Who knows if the next wave of demonic siege cannons will appear here?”

that’s right. If the next wave of the demon siege cannon appeared in a slightly different direction, we wouldn’t be able to rush up in time.

that’s right. There are wild monsters everywhere. If the next wave of demonic cannon minions appears a little further away, then it’ll be a big deal.

“Let’s retreat first. When the next wave of demonic siege cannons appear, we’ll advance in the right direction.”

Under Zhang Shan’s lead, everyone quickly returned to a position about a hundred yards away from the city gate.

it was very safe to stay here.

There were 24 intermediate arrow towers on the city gate tower behind him.

It was simply impossible for those demon soldiers attacking the city to charge over.

They only needed to stay at the edge of the arrow tower’s firing range and happily kill monsters.

Everyone had their backs to the intermediate arrow tower, farming monsters and drinking water at the same time.

six-barreled boss, let’s see if anything good dropped.

there’s nothing good, just two normal red bosses.

f \* ck, don’t be so arrogant. Don’t you care about the items dropped by the red BOSS? ”

“I really don’t think so. Aren’t they just a few red equipment? There’s nothing to do.”

“alright, you’re awesome.”

Actually, Zhang Shan was not very concerned about the items that were dropped.

It was just as the Guild leader had said.

Normal red bosses rarely dropped anything good, so there was nothing to look forward to.

However, that was just a thought.

zhang shan was still farming monsters while checking his backpack.

Five pieces of red equipment and two red materials appeared in his backpack.

Eh, there's also a skill book.

[ attribute enhancement (Guild skill): increases all guild members 'main attributes by 5%. The Guild Master can learn and use it. ]

It was alright.

Even though this Guild skill was much better than the previous four guild skills, it was still a Guild skill.

It was still a little lacking.

No matter what, it was still a Guild skill book.

Guild skill books were very difficult to obtain.

Attribute enhancement was the same as other guild skills, it increased the percentage by 5%.

However, the direction of this increase wasn't very good.

it increased the main attribute and looked very powerful.

However, how many main attributes did everyone have in total?

Not to mention others.

Even for someone as strong as Zhang Shan.

his agility attribute was not even 6000 points.

This attribute enhancement increased his agility by 5%, but it only added less than 300 points of agility, which was more than 200 points of attack power.

It wasn't very useful, but it was better than nothing.

After all, it was a Guild skill that was effective on all guild members.

it was already good enough to get one.

There was nothing to pick on.

In the entire game, there were only nine guild skills.

Every time a player's guild level increased, they would be able to learn a Guild skill.

of course, the prerequisite was that they had to have a guild skill book.

the level of their wind and cloud guild was about to rise to level 5.

They would soon be able to use this skill book.

When Feng Yun realm comes over, I'll pass it to him.

Zhang Shan displayed all the items on the Guild channel.

He said.

"it didn't drop anything good, only a guild skill book."

"f \* ck, it's already good enough that you have a guild skill book. i wonder how hard it is to drop this thing."

"That's right. Many guilds still don't have skill books to learn,"

"It just so happens that our Guild will be able to reach Level 5 very soon, and we'll be able to get an additional skill soon, hehe."

"Speaking of which, how many contribution points do we need to level up our Guild?"

"i think i'm still short about 300000."

"Isn't that just two more days?"

yes, if we really want to make it, we can make it today. We just need to buy a bunch of materials and trash equipment and donate them to the Guild warehouse. it's just that there was no need to do this before."

"That's right, we didn't have any extra Guild skill books before. Apart from being able to recruit more people, there's not much use in raising the Guild's level."

"Now that we have a skill book, which Big Shot can go back and earn some Guild contribution points? hehe."

"forget it, i'll think about it after the event ends. a 5% increase in main attributes isn't that useful for the time being."

"yes, at most, it can increase my attack power by a hundred or so points."

After a while, the demonic siege cannons in the other three directions were also blown up one after another.

At this moment, Feng Yun realm was finally unraveled, He released it.

He didn't need to stay in the city Lord's mansion and repair the city walls.

After Feng Yun realm was done, he immediately rushed over to repair the city wall.

After Feng Yun realm arrived, Zhang Shan passed the position of team leader to him.

He then traded all the dropped items to Feng Yun realm.

He was in charge of the distribution of the items.

In addition to the Guild skill books.

It was just a few pieces of red equipment and two red materials.

the things were not valuable.

But Zhang Shan did not know how to distribute it.

After all, there were more than five thousand people involved in the attack.

he couldn't possibly distribute these trash items according to the damage output ranking.

It was not worth it at all.

It was better to let Feng Yun Tian have a headache.

Chapter 503 Passive skill, God and demon

Feng Yun realm asked after receiving the items that Zhang Shan had traded.

"How many contribution points does our Guild need to reach Level 5?"

Obviously, Feng Yun realm had also seen the enhanced attributes and the Guild skill book.

Therefore, he was considering if he should level up his Guild first so that he could learn new guild skills.

"I'm still short about 300000."

"Then I'll go back first and get my guild level up."

When he heard that he was only 300000 contribution points away from leveling up his Guild, Feng Yun realm immediately decided to go back and level up his Guild.

"There's no need to be so anxious, boss."

"Yeah, this attribute-strengthening skill isn't that useful."

as long as it's useful, it's fine. Even if it can slightly increase everyone's strength, we have to get it.

that's true. The monsters and bosses that come after will only get harder to deal with. It's good to improve a little.

"Okay, I'll go back and donate my Guild contribution points first."

after feng yun realm finished speaking, he immediately returned to the city.

After a while, Zhang Shan realized that on his skills panel, there was an additional Guild skill.

It should be Feng Yun realm who had already finished.

The game had reached this point.

To be honest, 300000 Guild contribution points wasn't that hard to get.

As long as they were willing to spend money, they would buy more suitable materials and trash equipment from the auction house and donate them to the Guild's warehouse.

They could increase their Guild contribution points.

Of course, it would not be easy.

with over 300,000 guild contribution points, he would have to donate quite a number of items.

Zhang Shan estimated that Feng Yun realm had spent at least a few tens of millions of gold.

In order to defend wind Cloud City.

feng yun realm was really going all out.

Even if this attribute-enhancing skill could only increase everyone's strength by a little.

Feng Yun realm was not willing to give up.

he could directly spend money to level up his guild and learn this skill.

With the addition of an attribute strengthening skill, he had become a God.

Zhang Shan's agility attribute had reached a little over 6000.

at the same time, his attack power had also increased by more than 500.

This was because Zhang Shan had many passive skills and equipment special effects that increased attack power by a percentage.

Therefore, even though the attribute-enhancing skill only increased his agility by less than 300 points, he still had to be careful.

However, his attack power had increased by more than 500.

This was only the basic attack power on the character panel.

If the killer book's effect was included.

That was to increase his attack power by more than 1000 points.

Of course.

Compared to Zhang Shan, who already had an attack power of more than 100000.

this little increase in attack power didn't have much effect.

It could only be considered a small improvement.

After a while, Feng Yun realm returned to wind Cloud City.

Everyone stayed outside the West Gate, farming monsters while waiting for the second wave of demonic cannon minions to arrive.

After half an hour of activity.

in the distance, the huge figure of the demon siege cannon appeared again.

"Eh, the demon siege cannon has appeared."

"Is the second wave coming? why didn't the monsters in front of us increase in level? they're still level 70 demon warriors."

"How can it be so fast? I reckon that by the time we're done clearing the monsters in front of us, the monsters in the back will have their levels increased."

"That's right. We haven't cleared out all the previous level 70 demon Warriors."

the second wave of demonic cannon minions has already appeared. Why are you guys still farming monsters? hurry up and stall the cannon minions.

Big Boss, hurry up. We'll be there soon.

Zhang Shan took a look at the siege cannon vehicles in the distance.

Even though there was still quite a distance between them.

...

However, in order to prevent the demonic siege cannon from getting close to Fengyun city ...

It was indeed time for them to make a move.

At this moment, Feng Yun realm shouted in the Guild channel.

"brothers outside the city, attack the demon's cannon. you must hold the cannon back and not let it attack the city wall. i really can't afford to repair the city wall. it cost me more than 100 million gold coins just now."

"F \* ck, why did you spend so much? The first wave of attack had already cost a lot of money, and a hundred million gold coins? how much money will we have to spend after that?"

"Brothers, for the boss's gold, let's attack!"

"Kill, hehe."

Feng Yun realm continued.

"Brothers, come on! As long as we don't let the demons' cannon chariots hit the city wall, I will give you 100 million gold coins as a reward for each wave."

f \* ck, 100 million gold coins for one wave. There are still three waves of demonic cannon chariots behind. Doesn't that mean that we have to pay 300 million gold coins? "

"300 million gold coins, divided among 100000 people, on average, each person can get 3000 gold coins?"

...

haha, boss is going to pay everyone their salaries. Everyone, you have to work hard.

"Hurry up! Don't let the demonic cannons get close to the city wall!"

"don't worry. for the sake of gold coins, i'll give it my all,"

Feng Yun realm's words immediately filled everyone with passion.

zhang shan and the rest could not care less about the demonic siege cannons in other directions.

However, he could be sure that the demonic cannon chariots at the West Gate would not have a chance to get close to the walls of Fengyun city.

Under Zhang Shan's lead.

The five thousand of them aimed in the direction of the demon siege cannon and pushed forward.

However, not long after they pushed in ...

Everyone suddenly discovered that these demon soldiers attacking the city seemed to have become a bit more powerful.

f \* ck, these small monsters have been changed to level 75 demon Warriors? "

"It seems so. It's getting more and more difficult to deal with."

"don't panic. a lv 75 demon fighter is nothing. it's not a big problem for us."

"A lv 75 demon fighter is indeed not powerful. but this is only the second wave. if this continues, won't the demon soldiers attacking the city reach level 85 in the last wave?"

"F \* ck, don't make it sound so scary. Could we defeat a LV 85 demon fighter?"

that's right. Not to mention level 85, even if it's a level 80 monster, I think I can only kill one or two at a time.

yeah, this wave isn't too bad. It's just that I don't know how to deal with the next two waves of wild monsters.

why do we need to care about these small monsters? we just need to stall the demonic siege cannon. Leave the small monsters to the arrow tower.

do you have a pig's brain? if we don't kill the small monsters, how are we going to stall the demonic siege cannon? "

"F \* ck, it seems like that's the case. What should we do?"

it's nothing. Why are you thinking so much? let's settle this first.

that's right. Don't think too far ahead. Come one wave at a time.

When the small monsters in the surroundings turned into level 75 demon Warriors, Zhang tie was shocked.

The speed of Zhang Shan's side's advancement had not slowed down by much.

The main reason was that they had Zhang Shan on their side.

A lv 75 demon fighter had a bit more than 100000 blood.

To the members of other guilds ...

The monsters 'level had increased by one grade, and their HP had increased by more than 20000.

This greatly reduced their efficiency in clearing monsters.

However, to Zhang Shan.

There wasn't much difference between level 75 and level 70 monsters.

Anyway, he had to fire two shots to kill the small monsters.

With his current damage, he could deal over 130000 damage.

When Zhang Shan attacked, he could deal more than 60000 damage each time.

He would need two shots to kill a LV 70 demon fighter.

It was the same for level 75 monsters.

He was also killed by two shots.

to him, these two types of monsters were no different.

Therefore, with Zhang Shan leading the way, they pushed forward without slowing down much.

In a short while, they had advanced to a distance where they could attack the demonic siege cannon.

feng yun realm said.

hurry up and get rid of the godfiend guards that are pushing the cannon carts. We'll fight the BOSS after we're done with the godfiend guards.

"i understand."

"don't worry, boss."

brothers, let's hurry up. For the gold coins.

"For gold coins."

Zhang Shan held his hand cannon, and the bullets shot out rapidly, sweeping towards the divine demon guards in front of him.

As he attacked, he checked the stats of the godfiend guards.

The second wave of godfiend guards was of a higher level than the first wave.

These Demon God guards were all level 75.

each godfiend guard had 1.5 million hp.

It was much more difficult to deal with than the first wave.

However, it was not a big problem.

In the first wave, they only had 50 people.

It was only later on when they were fighting the BOSS that Feng Yun realm arranged for the others to come over to help.

They had more people now.

Five thousand players were sent out right at the start.

And there were only about a thousand godfiend guards pushing the cannon carts.

On average, there were three to five of them fighting one godfiend guard.

Even if many of them had to deal with the demon soldiers on the side.

There were still many guild members who had the time to attack the godfiend guards.

They didn't need to spend too much time clearing out the godfiend guards.

A large group of them surrounded the demon siege cannon and quickly cleared the surrounding godfiend guards.

The speed at which they cleared the monsters was getting faster and faster.

The godfiend guards began to fall to the ground.

And the speed of the demonic siege cannon also became slower and slower.

After a short while, they destroyed the last few godfiend guards.

the demonic cannon came to a complete stop.

Without the godfiend guards pushing the cannon carts, it couldn't move.

"hurry up, everyone, kill these two bosses quickly."

Zhang Shan quickly opened fire. The bullets were like raindrops, sweeping towards the demonic siege cannon.

the others quickly divided the work.

under feng yun realm's arrangement.

The long-range classes were responsible for attacking the divine demon guard captains standing on the demonic siege cannon.

The melee professions were responsible for attacking the demonic siege cannon.

As Zhang Shan fired his shots, he checked the attributes of the two bosses.

The skills of these two bosses were exactly the same as the previous two.

It was only an increase of five levels.

His HP had also increased accordingly.

Each BOSS had as much as 7.5 billion HP.

This was the first time Zhang Shan had seen a BOSS with such high HP.

The others were also speechless after seeing the BOSS's HP.

"F \* ck, is this how all bosses grow? For every 5 levels, my HP will increase by 2.5 billion?"

"Yeah, it's really too terrifying. If we make it to the last wave, how much HP will the BOSS have? it won't be 20 billion, right?"

I don't think so. If every BOSS had 20 billion HP, how could we possibly kill them? "

"It shouldn't be possible to grow like this. Otherwise, that would be too ridiculous."

why do we care so much? let's kill these two bosses first.

"That's right, why are you talking so much? just do it."

Looking at the two red bosses with such high HP, everyone was a little worried.

But he wasn't too worried.

The next two waves of bosses might be difficult to deal with.

But at least this time, they would have no problem dealing with it.

Each BOSS had 7.5 billion HP, and they had over 5000 players.

It wasn't a lot.

He estimated that he would be able to destroy it in about ten minutes.

feng yun qing qing cast a curse skill at the divine demon guard squad leader.

Zhang Shan quickly went all out.

He activated his berserk and fanatic skills, as well as his shadow clone skill.

Three Zhang Shans stood in a row.

Countless bullets, like raindrops, swept towards the demon siege cannon.

The health of the demonic cannon minion was continuously reduced.

As for the captain of the divine demon guards, his HP dropped even faster under the barrage of attacks.

This was because Feng Yun Qing Qing's curse skill had a damage amplification effect.

Although Zhang Shan did not lock his attack on the leader of the divine demon guards.

however, its hp was still dropping rapidly.

while everyone was surrounding the two red bosses and slashing at them.

Feng Yun realm shouted to the others in the Guild channel.

“What’s the situation with the demon cannon vehicles in the other directions? Did you manage to hold him back?”

we’ve already stalled them. We’ve cleared out all the divine demon guards, and they’re starting to fight the BOSS.

don’t worry, boss. They’re just two normal red bosses. They won’t be able to do much.

“That’s right, just prepare your gold coins, hehe.”

haha, you’re right. Boss, hurry up and prepare your gold coins.

“It’s impossible for this wave of demonic cannon chariots to get close to the city walls. They won’t have the chance to attack wind Cloud City.”

Hearing everyone’s words, Feng Yun realm was slightly relieved.

He said.

everyone, let’s do it! Defeat this BOSS and I’ll give you a 100 million gold coin red packet!

“Boss is awesome.”

Compared to the first wave of demonic siege cannon vehicles, this was much more difficult.

the second wave of demonic cannon minions was five levels higher and had higher hp.

however, everyone was playing very smoothly.

The main thing was that everyone was prepared this time.

after they saw the demonic cannon chariots appear, they were shocked.

They charged into the group of monsters ahead of time and stalled the demon siege cannon.

It was not like the first time.

Other than Zhang Shan’s team, the rest of the people were waiting at the city wall, waiting for the demonic siege cannon to come.

In the end, when the demonic siege cannon was 100 yards away from wind Cloud city’s city walls ...

They kept shooting giant arrows at the walls of wind Cloud City.

Even if everyone continued to attack, they couldn’t stop the demon siege cannon from firing the huge arrows.

After the cannon vehicle got close, no one could push it back.

Unless it was blown up.

Otherwise, it would keep attacking the walls of Fengyun city.

This time, everyone had learned their lesson.

They directly charged into the group of monsters and stalled the demonic siege cannon in advance.

Although this way ...

When everyone was fighting the BOSS, they could not get the support of the arrow towers.

But that wasn't important.

Without the support of the arrow towers, they would just be a little slower.

Compared to the destruction of the city wall by the demon's cannon chariots, Zhang tie's battle strength was much greater.

It didn't matter if they fought a little slower.

The most important thing was to keep wind Cloud City safe.

The Guild members from all four directions blocked the demonic cannon.

this wave was in the bag.

They would not let the demonic siege cannon chariots attack wind Cloud City.

Zhang Shan and the others buried their heads in their attacks. The health of the two red bosses was constantly being reduced by them.

98%, 60%, 50%.

this was the good thing about these two bosses.

All they needed to do was to deal their maximum damage.

He didn't even need to think about getting hit by the BOSS.

This was because these two bosses would not attack players.

Even the squad leader of the divine fiend guards had a certain level of offensive ability.

However, that would have to wait until they destroyed the demonic siege cannon.

Only then would the squad leader of the divine demon guards start to attack the players.

Now, it was standing so high.

he was only operating the demon siege cannon with all his heart.

Now, it would not attack players at all.

Under their continuous attacks.

After about ten minutes.

The health of the two bosses was almost emptied at the same time.

Zhang Shan quickly controlled the Panda dumpling to move forward.

He wanted to use the Panda fighter's combo skill to get the last kill from the divine demon guard squad leader.

Only by snatching it and killing it, would Zhang Shan have a chance to trigger the passive King talent.

Only then could one obtain a passive skill.

However, he soon realized.

There seemed to be a problem here.

F \*\*k, the Panda ball had short legs.

They couldn't hit the captain of the divine demon guards standing on the demonic cannon.

he was really f \* cked up.

Zhang Shan quickly changed his target.

He locked his attack on the captain of the divine fiend guards.

Since the Panda dumpling wasn't reliable, he could only do it himself.

If he locked his attack on the squad leader, he might be able to deal a critical hit.

otherwise, they could only rely on their ejection damage.

It didn't have a critical effect.

With so many people attacking him at the same time ...

Even though Zhang Shan's damage was many times higher than the others.

If he didn't get a critical hit, he might not be able to get the last kill.

the two bosses that were left with empty health held on for a while.

With Zhang Shan's Divine Strike, the captain of the divine demon guards was blown up.

[ system notification: your passive King talent has been triggered by killing the divine demon guard squad leader. ]

Acquired passive skill, Demon God.

Haha, I finally got this passive skill.

zhang shan was overjoyed that he had obtained another passive skill.

But now was not the time.

There was still a demonic cannon that hadn't been blown up.

he saw an opportunity and controlled the panda ball to use a combo skill on the demonic cannon minion, destroying it in one fell swoop.

As the demonic cannon chariots were turned into ashes.

only then did zhang shan have the time to check on the passive skill that he had just obtained.

He opened the skills panel to check.

[ Demon God: born as a Demon God, has abnormally strong vitality. Increases health points by 20%. ]

Holy sh \* t, this passive skill is awesome.

It directly increased his HP by 20%.

It was simply a BUG skill.

Zhang Shan had never thought that this passive skill, after he had obtained it, would be able to change his fate.

How could he be so strong?

based on his previous experience of obtaining passive skills, he had a lot of experience.

Zhang Shan had thought that this passive skill was the same as the other innate skills.

It only increased his HP by 10%.

He didn't expect there to be an unexpected surprise.

It was a 20% increase.

It was simply perfect.

Zhang Shan took a look at his character's attributes.

His HP was almost 800000.

This God's health was directly increased by 20%.

It was equivalent to his HP increasing by more than 100000.

What an awesome passive skill.

It was perfect.

Chapter 504 Big red packet

He had obtained another passive skill, and it was a very powerful passive skill.

zhang shan was very happy.

It could be said that this passive skill came at the right time.

As his level increased, the BOSS's damage also increased.

Against some of the more ferocious bosses, even Zhang Shan could not take it.

After all, hunters were a fragile profession, and their HP growth was not high.

Currently, he was only able to withstand the BOSS's damage because of his high lifesteal and the king's Cape's high HP.

the king's cape gave him a lot of health.

However, every time the king's Cape was unsealed, it only gained 100000 HP.

It wasn't enough.

Moreover, the BOSS was getting more and more powerful.

this was especially true for bosses above level 70.

If he really met a powerful one, Zhang Shan might not be able to take it.

Now that he had this passive skill, the situation had greatly changed.

The passive skill of gods and demons directly increased his HP by 20%.

Now, it had given him more than 100000 HP.

in the future, as his level increased, the amount would increase even more.

After all, gods and demons were passive and only increased his HP by a percentage.

the higher the base hp, the more it would increase.

what an awesome passive skill.

After killing the two bosses, Feng Yun realm quickly asked the others in the Guild channel.

"we're done here, do you need any reinforcements?"

" no need. we have so many people. it'll be easy for us to take down two normal red bosses. "

"Don't be smug. To be honest, if you can't handle it, we'll go over and help."

" that's right. don't wait until the second wave of the demonic siege cannon comes and you haven't taken care of these two yet. "

don't worry, it definitely won't. The demonic cannon beside us only has 30% of its health left.

it's fine. The demonic monsters 'wave of attacks will last for half an hour. It's impossible for us to kill two normal red bosses in half an hour.

"That's true."

then you guys take your time. We'll kill some monsters for fun.

After repeated confirmation, the Guild members in the other three directions did not need their help.

Then Zhang Shan and the rest would not need to go over.

Feng Yun realm said as he waved his hand.

"Come, let's go back first."

“alright,” he said.

Zhang Shan quickly turned around and led the way.

they killed their way back to the west gate.

Just now, in order to intercept the demon cannon chariot in advance, they had all rushed into the middle of the monsters.

Now, they had already defeated the BOSS.

However, there were still countless monsters around them.

it was impossible to stay here and clear the monsters.

There were so many monsters that they couldn't clear them all.

The task of clearing the monsters would be left to the arrow tower.

they had to return to the firing range of the arrow tower first.

In that case, it would save him a lot of trouble in farming monsters.

They only cared about continuously dealing damage and weren't worried about being surrounded by monsters.

If he continued to stay here ...

Although they could also farm monsters.

However, if they grinded here, they would have to face the siege of countless monsters.

That would be so annoying.

more importantly, if they continued to farm monsters here ...

When the third wave of demonic cannon chariots appeared.

they weren't sure if they could stop the demon siege cannon at the first moment.

...

This was because the location of the demon siege cannon vehicles was not completely fixed. There would be some deviations.

Therefore, they had to retreat first.

When the next wave of demonic siege cannons appeared ...

They would be able to attack at the first moment and intercept the demon siege cannon.

Zhang Shan led the way, and the rest followed behind.

After a short while, they returned to a position about a hundred yards away from the West Gate.

Everyone stood at the edge of the arrow tower's firing range and began to happily kill monsters.

The monsters attacking the city had become level 75 demon Warriors, and their HP was higher than the first wave.

however, the intermediate arrow towers on the city gate had very strong firepower.

They still locked down the demon race monsters 100 yards away from the city gate.

Above the city gate, the 24 intermediate arrow towers were not just for show.

...

The firepower was very strong.

After Zhang Shan and the rest returned, they started to farm monsters nearby, waiting for the next wave of demonic siege cannons to arrive.

“Boss, let’s see if anything good dropped.”

Feng Yun realm was farming monsters while checking his inventory. He displayed all the dropped items on the Guild channel and said, ”

“there wasn’t anything good dropped this time.”

Zhang Shan took a look.

The two red bosses that they had killed this time did not give them a single hair, but an extra one.

There were only five pieces of red equipment and two red materials.

And that was it.

The drop rate of this item was really bad.

they were all trash that no one wanted.

Of course, this was actually a normal drop from a red boss.

The chances of a normal red boss dropping good items were pitifully low.

Usually, red equipment would be dropped.

For many players.

red equipment could already be considered as top-grade equipment.

He should be very happy to be able to get a few pieces of red equipment.

It was just that Zhang Shan and the rest had very high standards.

they looked down on the red equipment.

“f \* ck, this is really trash.”

it’s alright. The items dropped by normal red bosses are just like this.

sigh, I thought there would be a surprise. It turns out that I was overthinking it.

“you’re thinking too much. what surprise? it’s good enough that you’re not frightened.”

” that’s right. be content. at least five more red equipment. ”

what’s the use of red equipment? who’s lacking in trash? ”

“don’t talk big. you’re talking as if your entire body is a divine artifact.”

” haha, you’re wearing a full set of red equipment, yet you still dare to look down on red equipment. ”

“F \* ck, am I looking down on red equipment? However, red equipment was not considered rare. If one wanted it, they could buy it at any time. what’s the use of something that can be bought with money?”

“Alright, you’re awesome, big brother.”

After Feng Yun realm displayed the item, he said.

“We won’t distribute the items for now. We’ll talk about it after the event.”

“sure.”

After killing the two red bosses, not a single good item was dropped.

however, no one was happy.

It was normal that nothing good dropped.

It was impossible for them to get such a big drop every time they killed a boss.

Even the Panda bear, who had 10 points of luck, could not make every wave drop.

if this wave didn’t come, then the next wave would come.

if it really didn’t work, then he would wait for the last wave.

Based on past experience, there would definitely be a boss with a real name in the last wave of monsters.

When they defeated the real-name boss, there would definitely be good items.

At the very least, there should be a divine weapon mold.

Everyone buried their heads in killing monsters while waiting for the Guild members from the other three directions to destroy the demonic siege cannon.

He was waiting for Feng Yun realm’s big red packet.

Feng Yun realm had mentioned it before.

As long as the demonic cannon chariots didn’t hit the city wall, the city would be destroyed.

After each wave, he would give out a 100 million gold.

they weren’t going to post it together after the event.

Instead, he would send out a wave of red packets after each wave.

No one knew what would happen in the next two waves, and no one dared to guarantee anything.

However, this wave was clearly stable.

As long as the Guild members in the other three directions destroyed the demonic siege cannon, they would not be able to escape.

Then, they would be able to enjoy the fun of snatching red packets.

100 million gold coins was not a small amount.

Although their Guild, Wind and Cloud, had 100,000 guild members ...

this 100 million gold coin red packet would require 100,000 guild members to fight for it by luck.

But on average, each person would get 1,000 gold coins.

If they were lucky, they might even be able to get tens of thousands, or even hundreds of thousands of gold.

To ordinary guild members, this was a huge problem.

They might not even be able to earn this much money even after working for a few years.

Now, they were only here to help Feng Yun's realm defend Wave City and there was a chance that they could earn a huge sum.

How much anticipation would they have?

Even if he couldn't get a big red envelope, it would still be good to get a few hundred gold coins.

A few hundred gold coins was not a small sum.

It was not a problem at all to pay for a few days' worth of food.

While everyone was farming monsters, they were also looking forward to Feng Yun's realm's big red packet.

After seven or eight minutes, the other three directions also blew up the demon siege cannon.

After defeating all the bosses ...

Everyone was shouting in the Guild channel.

"Boss, hurry up and give out red packets."

Send a red packet. The demonic monsters that attacked the city didn't even touch the edge of Wind Cloud City.

"I'm waiting for the big red packet."

All the bosses had been killed by the Guild members.

Feng Yun's realm did not hesitate as he did not lose out by giving out a hundred million gold coins.

If it wasn't for everyone stalling the demon siege cannon earlier.

He would need more gold coins to repair the city walls, definitely more than 100 million.

Compared to the gold spent on repairing the city walls ...

Feng Yun realm could totally accept a 100 million gold coin red packet.

He said in the Guild channel.

alright, I'll post it immediately. Everyone, get ready to grab the red packets.

After Feng Yun realm finished speaking, he quickly sent a 100 million Gold Red packet to the Guild channel.

"Haha, I got 2000 gold coins."

2000 gold coins? what are you calling for? I got 5000 gold coins, hehe.

"f \* ck, big boss is awesome."

Wahaha, I got 200000 gold coins.

"F \* ck, 200000 gold coins is so heaven-defying? Why did I only get 100 gold coins?"

you f \* cking piece of sh \* t! How dare you say that you stole 100 gold coins? "

"That's right, 100 million gold coins, 100 thousand people, and you only want 100 gold coins? Who would I let down?"

"Wuwuwu, you want to be criticized for stealing a hundred gold coins? Then what should I do as I only managed to get one gold coin?"

f \* ck, you still have the face to live after snatching a gold coin? buy a piece of tofu and knock yourself to death, hehe.

haha, a person who steals a gold coin doesn't deserve to live in this world.

Zhang Shan opened the red packet and 10000 gold coins were transferred to his account.

This one was good, easily earning ten thousand gold coins.

It was equivalent to two months of his salary when he worked.

Although Zhang Shan was not short of money now, it would not be bad to get some unexpected wealth.

Feng Yun realm spent another 100 million gold.

zhang shan couldn't help but sigh. they were really rich people.

This guy must have prepared hundreds of millions of gold coins in order to defend Fengyun city.

During the first wave of monster attacks, Feng Yun realm had already spent more than 100 million gold coins to repair the city wall.

Later on, in order to upgrade the Guild's level, he had probably spent tens of millions of gold coins.

Now, he had sent a red packet of 100 million gold coins.

This was only the second wave of the monster attack and Feng Yun realm had already spent 300 million gold.

The difficulty of the entire monster siege was yet to come.

Even though they had done well in this wave of attacks.

He did not let the demonic siege artillery hit the walls of Fengyun city.

However, this didn't mean that they would be able to do the same in the next two waves.

The mobs and the demonic cannon minions would only become more and more powerful.

Zhang Shan estimated that it was unlikely that they could hold off the demonic cannon vehicle.

in the next two waves, feng yun realm might have to repair the city walls.

He had to spend money.

Spending a lot of money.

after feng yun realm sent out the red packet, he said in the guild channel.

"Everyone, continue to work hard in the next wave. We must stall the demonic siege cannon."

"Boss, don't worry. We'll definitely be able to stall the demonic siege cannon."

" even if it's for gold, we have to stall the demonic cannon. hehe. "

"Sigh, that's true, but it's very difficult. the next wave of mobs won't be level 80, right? if they appear, we won't have the chance to rush over and stall the demonic siege cannon."

"We have to charge even if we can't."

that's right. We must rush up and stall the demonic cannon. Then, everyone can grab a wave of red packets. Hehe.

in contrast to everyone's optimistic mood, zhang shan felt that the next wave might be a little uncertain.

zhang shan and the rest were still fine.

With him, they could even charge through level 80 monsters.

At most, he would only be a little slower.

However, outside the range of the demon siege cannon, it shouldn't be a problem to stall it.

However, on Zhang Shan's side, they could intercept the demonic siege cannon ahead of time. It was hard to say for the Guild members in the other three directions.

However, Zhang Shan did not say anything.

Everyone understood the logic, so they just had to try their best.

After a while, the huge figure of the demon siege cannon appeared in the distance again.

The third wave of monster attacks began.

This time, Feng Yun realm adjusted his arrangements again.

He continued to send people down from the city wall.

Originally, there were close to 40000 people who stayed on the city wall doing nothing but to prevent any accidents.

They had transferred five thousand people to join Zhang Shan's team.

This time, Feng Yun realm had almost transferred all the Guild members on the city wall to join the army outside the city.

He had left less than ten thousand people on the city wall to defend.

There were only about two thousand people left on each wall.

With the arrow towers, it didn't matter if the city walls were defended or not.

If the demon monsters were allowed to reach the city walls, there would be no need to defend the city.

if even the thirty thousand arrow towers on the city wall could not defend the city wall ...

no matter how many people they had, it was impossible for them to defend the city wall.

After all, they could still deal with the BOSS if they worked together.

However, it was impossible for them to stop so many demons.

As the level of the demonic monsterlings increased, the normal guild members were no longer able to follow their heart.

If they were to fight the small monsters, they probably wouldn't be able to kill more than a few.

However, there was no problem in fighting a BOSS.

after all, neither the demonic siege cannon nor the divine demon guard squad leader would attack players.

All they needed to do was to deal damage to the BOSS.

Considering the BOSS's health, it was getting higher and higher.

If they didn't have enough manpower, even if they successfully stalled the demonic siege cannon, they wouldn't be able to kill it.

Hence, Feng Yun realm decided to withdraw all the Guild members on the city wall and strengthen the teams that were fighting the BOSS in all directions.

On Zhang Shan's side, there were more than 10000 people in the team, and there were even more people in the other three directions.

there were more than 20000 people in almost every direction.

At the sight of the demon's cannon chariots, Zhang tie was shocked.

zhang shan took the lead and charged into the group of demons.

He held his hand cannon and led the way.

As the bullets continued to shoot out, the surrounding demon soldiers fell to the ground in large numbers.

Their large team of more than ten thousand people, under the leadership of Zhang Shan, quickly advanced in the direction of the demon siege cannon.

after about two minutes, they slowly approached the position of the demonic siege cannon.

"eh, the wild monsters this time seem to be level 75. the small monsters didn't level up."

I think so. We've advanced all the way here, but the monsters 'levels haven't increased. It seems that the Nephilims in this wave of attacks didn't increase in levels.

that's good. In that case, the last wave of demons attacking the city will be level 80 at most. We still have a chance of defeating them.

they pushed all the way to the demonic siege cannon. the wild monsters around them were still level 75 demonic warriors.

Seeing this situation, Feng Yun realm's heart finally settled down.

He was really afraid that every wave of demon monsters would increase by five levels.

If that was the case, then the last wave of monsters would be level 85.

They could still try to fight against lv 75 demon fighters.

However, it would be very difficult for them to fight against level 80 monsters.

If a level 85 monster really did appear, they wouldn't be able to charge out and kill the demonic siege cannon.

Even the city walls would be protected.

The 30,000 intermediate arrow towers on the city wall were very strong.

However, they might not be able to defend against the dense horde of level 85 monsters.

However, it seemed that this was not the case.

This wave of monsters did not increase in level.

In other words, the monsters that appeared in the monster attack of wind Cloud City this time were at most level 80.

And only in the last wave would level 80 monsters appear.

They should be able to defend Fengyun city.

If it really didn't work out, when the last wave of demon siege artillery appeared ...

Feng Yun realm stayed in the city Lord's mansion and continued to repair the city walls until the event ended.

Isn't it just half an hour to build the city wall?

If the fourth wave of demonic cannon chariots still had the same degree of damage to the city walls as before ...

repairing the city wall for half an hour would cost three to four hundred million gold.

Although it required a lot of gold coins, it was still within Feng Yun realm's acceptable range.

after drawing close to the demon's cannon vehicle, zhang tie's eyes brightened.

feng yun realm said as he waved his hand.

let's attack together. Clear out the surrounding godfiend guards first.

Zhang Shan said.

let's wait. The divine demon guards this time seem a little different. There seems to be an additional BOSS.

no, I didn't. Six-barreled boss, are you seeing things? "

that's right. There's also a red BOSS among the godfiend guards.

After Zhang Shan finished speaking, he stretched out his hand and pointed forward.

Behind the demonic siege cannons, apart from the godfiend guards pushing the cannons, the godfiend guards were all standing in front of the cannons.

There was also a red BOSS.

However, this red BOSS looked similar to the other godfiend guards.

Moreover, he was standing behind the demonic siege cannon, so no one else had noticed him.

Chapter 505 Infinite Recovery

Following the direction of Zhang Shan's finger, everyone quickly saw the BOSS hidden in the middle of a group of divine demon guards.

A small banner officer of the godfiend guards.

It looked like an ordinary red BOSS.

But no one dared to be careless.

godfiend guards all had ridiculously high hp.

However, the divine demon guard squad leader didn't have any damage skills, so he wasn't a threat to them.

However, this divine fiend guard squad commander might be different from the divine fiend guard squad Captain.

It didn't need to operate the demonic siege cannon, so it was a Real Red BOSS. It should have some damage skills.

If a BOSS like this had any damage skills, it would be very powerful.

f \* ck, three red bosses appeared in one wave. That's ridiculous.

ridiculous my ass. Isn't this great? we have the chance to fight another BOSS.

"Haha, you're right. An additional BOSS is just a piece of cake."

six-barreled Big Boss, go! I'm counting on you.

Zhang Shan was not pretentious and said.

" I'll go first and hold the divine-fiend guard's small flag officer back. a few supports will follow me. you guys clear out the other divine-fiend guards that are pushing the cannon carts. "

"Alright," he said.

Zhang Shan carried the hand cannon and continued to push forward. The bullets were like rain, sweeping towards the godfiend guards who were pushing the cannon Cart.

The divine fiend Guard's small flag Officer, who was originally standing behind the Asmodians 'siege cannon, had been stunned after Zhang Shan attacked the divine fiend guard.

He quickly rushed over from behind.

it quickly rushed in front of zhang shan, waving its big knife and slashing down at zhang shan.

-230368 damage.

The damage was a little high.

Zhang Shan quickly turned his attack towards the small flag Officer of the celestial demon guard while checking his attributes and skills.

[celestial demon Guard's little Flag Officer (red): level 75][attack: 80000][HP: 75000000]

skill 1, demon god blade, skill 2, demon god (passive), skill 3, demon god's will, skill 4, recovery.

[demon god saber: as a demon god's guard, the divine demon guard's small banner officer has learned the demon god's saber technique. increases damage by 200%.]

[demon god (passive): born as a demon god, has abnormally strong vitality, greatly increases hp.]

[Demon God's will: when in danger, the divine demon Guard's small banner officer will summon a Demon God's apparition to assist in battle.]

[revival: when the godfiend guards under you die in battle, the small flag officer can use the flag to revive them and start a new battle.]

after looking at the celestial demon guard's little flag officer's attributes and skills, zhang shan was a little dumbfounded.

The skills of this small flag Officer of the fiendcelestial guards were truly unique.

The first skill of the BOSS was a skill that dealt three times the damage.

Damn it, this was really exaggerated.

a small skill with three times the damage, no wonder the damage was so high.

As for the BOSS's second and third skills, it was still easy to guess.

It was considered a normal skill.

However, what the hell was the fourth skill of the divine-fiend Guard's small flag Officer?

did this mean that even if they killed all the godfiend guards who were pushing the cannon carts, it would be useless?

killing him would also revive him by the divine fiend guard's little banner officer?

if that was the case, then it was a bit of nonsense.

There should be some restrictions.

Otherwise, what would they be doing?

The fiendcelestial guards that could never be killed.

Then how could they stop the advance of the demonic cannon chariots?

If the fiendcelestial guards were killed, they would be resurrected.

then wouldn't their efforts be in vain?

Zhang Shan had seen the skills of the divine-fiend Guard's little Flag Officer. Naturally, the others had seen them as well.

"F \* ck, what does the BOSS' resurrection skill mean?"

"i don't know,"

I just want to ask, what should we do now? do we still have to clean up these fiendcelestial guards? "

aren't you talking nonsense? of course, we have to clear them out first. If we don't clear these godfiend guards, it won't be long before the demonic siege cannons are pushed to the foot of wind Cloud City.

but what if we're resurrected by the divine-fiend Guard's little Flag Officer after we're done? wouldn't that be a waste of our time? "

...

even if it's a waste of time, we have to be clear. I don't believe that the divine fiend Guard's banner officer's ultimate move has no restrictions.

that's right. It'll only use its ultimate skill when it's at least half of its HP. Besides, the ultimate skill of the divine demon Guard's banner officer should have a cooldown time.

that's right. Everyone, don't panic. Just fight at the normal pace and it'll be over.

The large group of them surrounded the thousand-odd fiend God guards and began to quickly clear them out.

Soon, the godfiend guards who were pushing the cannon carts were cleared.

The advancing demonic cannon vehicles immediately stopped.

Zhang Shan pulled the celestial demon Guard's small flag Officer and slowly approached the demon siege cannon. He started to attack non-stop.

The three red bosses were next to each other.

The damage from the bullet kept jumping back and forth between the three bosses.

This was very interesting.

Fighting three red bosses together, Zhang Shan had never experienced such a satisfying thing.

...

If it wasn't for the demon God Guard's flag officer's resuscitation skill, which made everyone a little flustered ...

Their wave should be secured.

Under their continuous attacks, the three red bosses 'HP was steadily decreasing.

When his HP dropped to 90%.

The divine fiend Guard's junior banner officer took out a flag from his back and waved it.

More than a thousand godfiend guards instantly appeared around the demonic siege cannon.

This was not all. The divine demon guards that appeared this time completely ignored Zhang Shan and the others.

Instead, he lowered his head and pushed the demon siege cannon Cart forward.

"F \* ck, isn't the resurrection skill of the divine-fiend Guard's small flag Officer a powerful skill? Why did it start using its ultimate skill when its HP has only dropped by 10%?"

"God knows what's going on."

“Don’t shout. Quickly clear out these godfiend guards who are pushing the cannon carts. Otherwise, we’ll see if there are a few more of them. The demonic siege cannon is about to be pushed to the city gate.”

f \* ck, what kind of mechanism is this? why do these divine-fiend guards push the cannon carts the moment they come out and don’t kill people at all? ”

who knows? we just have to clear the monsters quickly.

When the divine-fiend Guard’s small flag Officer used resuscitation to resurrect the divine-fiend guard that was pushing the cannon Cart ...

It caused everyone to be flustered.

In reality, these 1000-plus divine-fiend guards were not a big problem for their 10000-strong team.

In less than a minute, they would be able to clear out the godfiend guards.

however, the problem was that the godfiend guards were starting to act out of the ordinary.

As soon as they were resurrected, they directly pushed the demon siege cannon Cart forward without caring about anything.

This gave everyone a huge headache.

they weren’t worried about anything else. what they were worried about was that the demonic siege cannon would be pushed to a distance of 100 yards from wind cloud city.

In this case, the demonic siege cannon would be able to attack the city walls of Fengyun city.

If that was the case, Feng Yun realm would have a lot to do.

He had to go back and repair the city wall.

After the divine-fiend guards were revived ...

Zhang Shan and the rest of the ten thousand people quickly left the three red bosses behind.

they focused all their firepower on clearing out the godfiend guards.

Even Zhang Shan had focused his attacks on the divine demon guards.

The BOSS could be taken down slowly, but they could not let the demonic siege cannon Run to the city gate.

Otherwise, they would have wasted their efforts.

Zhang Shan quickly went all out.

He activated his berserk and fanatic skills, and at the same time, he activated his shadow clone skill.

The three Zhang Shan’s stood in a line, and their rapid fire swept towards the godfiend guards.

Under the desperate attacks of a large group of people.

The resurrected godfiend guards were quickly cleared.

However, these godfiend guards had pushed the demonic siege cannon a few dozen yards forward in that short moment.

Zhang Shan looked at wind Cloud City behind him.

Their current position was about three hundred yards away from the West Gate of wind Cloud City.

If the divine-fiend Guard's small flag Officer continued to use the revival skill at this rate ...

They really couldn't hold back the demonic siege cannon.

Feng Yun realm also saw the problem.

He quickly ordered.

"everyone, focus on the fire god and the little flag officer. we'll kill it first, then we'll deal with the other two bosses."

that's right. Let's take care of the junior Flag Officer first and see how the other divine-fiend guards can recover.

but the problem is that the celestial fiend Guard's small flag Officer isn't big. He doesn't have that much space to stand around. Let's focus our fire.

as long as you can hit the divine fiend Guard's small flag Officer, hit the small flag Officer first.

"Alright," he said.

When everyone focused their fire on the divine-fiend Guard's flag Officer, one of the Guild leaders suddenly said, "

"We're done for. There are three bosses here. Does that mean there are three bosses in other directions? We might be able to stop them, but the others definitely won't be able to."

it's fine. I just asked around. There are three red bosses here. The other three directions are the same as before. There are only the demonic siege cannon minions and the divine demon guard squad leaders.

"That's good. You scared me."

"why are you so worried? if there was an accident, boss would have gone back to repair the wall. would he still have time to fight the BOSS with us? Hehe."

"Haha, you're right."

all the best. Let's destroy this small banner officer first.

As more and more people joined in, more and more people attacked the divine-fiend Guard's banner officer.

The three bosses' health points no longer decreased in a balanced manner.

The health of the divine-fiend Guard's little Flag Officer dropped much faster than the other two bosses.

when the divine-fiend guard flag officer's hp dropped to 80% ...

A huge demonic God's shadow slowly rose from behind it.

The divine demon guards 'Flag Officer started casting the demonic will skill, and everyone's HP started to drop rapidly.

However, it was not a big problem.

The divine fiend Guard's little Flag Officer was just a normal red BOSS.

The demonic god apparition it summoned was not particularly powerful.

In addition, there were enough support and support classes on the scene.

Feng Yun Qing Qing cast a totem pillar in the crowd.

Everyone easily passed through this wave of BOSS skills.

In the following time.

The divine-fiend Guard's small flag Officer would use the revival skill every two to three minutes.

It revived the godfiend guards that had been blown up and pushed the demonic siege cannon forward.

However, everyone had their previous experience.

Every time the divine-fiend Guard's small flag Officer used the resurrection skill, the divine-fiend Guard's soul would be revived.

everyone quickly unleashed their full power and destroyed the revived godfiend guards.

The speed at which they cleared the monsters also increased.

the distance that the demonic siege cannon chariots could move each time was also getting shorter and shorter.

When the divine-fiend Guard's flag officer's HP was reduced to half ...

The demonic cannon was still two hundred yards away from the West Gate of wind Cloud City.

At present, it seemed that they could still hold off the demon siege cannon.

Of course, this was the only wave that they could still hold on.

If there were still three bosses in the fourth wave, they would not be able to hold on for long.

But it didn't matter.

it was already good enough that they could deal with the first three waves.

Worst comes to worst, during the fourth wave, Feng Yun realm will stay in the city Lord's mansion to repair the city walls.

They had already tried their best, and their strength was only at this level. There was nothing they could do about it.

As long as they could spend money to defend the city, they believed that Feng Yun realm was prepared.

Zhang Shan withstood the damage from the divine-fiend Guard's small flag Officer and kept firing.

The others also kept throwing out skills, causing little Flag officer's health to drop rapidly.

Other than the divine-fiend Guard's little Flag Officer, there were also people attacking the other two red bosses.

After all, they had more than ten thousand people here.

as for the divine fiend guard's banner officer, he wasn't too big.

They could not allow too many people to attack together.

There were about two to three thousand people. Under Zhang Shan's lead, they had been attacking the small banner officer of the divine-fiend guard.

As for the others, they continued to attack the squad leaders of the divine demon guards and the demon siege cannons.

However, the Guild members that attacked the divine-fiend Guard's small flag Officer were basically the Guild's elites.

Although they had fewer people, their damage was higher.

When the divine-fiend Guard's flag officer's HP dropped to half ...

The other two red bosses 'health had only dropped to 40%.

as feng yun realm attacked, he also paid attention to the progress of the other three directions.

At the moment, the demonic cannon chariots in the other three directions had all been stalled.

The divine fiend guards did not appear in the other directions. They only needed to destroy the divine fiend guards once.

After clearing out the godfiend guards, the demonic siege cannon would no longer advance.

the only thing left was to slowly defeat the two red bosses.

it was much simpler than their side.

It was not like Zhang Shan's side.

On Zhang Shan's side, there was not only one more red BOSS to fight.

The key was that the divine-fiend Guard's small flag Officer would use a revival skill every three minutes.

They revived the godfiend guards that they had destroyed.

As a result, they had to clear out the revived divine-demon guards while fighting the BOSS.

This was not all.

As long as these revived godfiend guards were revived, they would be able to push the demonic siege cannon forward.

It was a little annoying.

They were afraid that the demonic cannon chariots would be pushed near the city wall.

Fortunately, everyone was getting more and more familiar with the situation.

Every time the godfiend guards were resurrected, they would be quickly eliminated.

It didn't push the demon siege cannon too far.

Under everyone's combined attacks, the divine-demon Guard's health was dropping faster and faster.  
50%, 40%, 20%.

After about seven or eight minutes, the divine-fiend Guard's small flag Officer was sent into a berserk state.

Yes, it was.

When the divine-fiend Guard's small flag officer's HP dropped to 20%, he would enter a berserk state.

The little Flag Officer was different from the other two red bosses.

This was a Real Red BOSS.

he wasn't like the captain of the godfiend guards, who was a tool.

After the divine fiend Guard's small banner officer entered a berserk state, his attacks became even more ferocious.

But it didn't matter.

After obtaining the God-devil passive ability.

zhang shan's hp had already exceeded 790000, just a little bit more and he would have 800000.

With his high HP and a group of support behind him, he was able to heal himself.

Zhang Shan was able to withstand the damage from the divine-fiend Guard's small flag Officer without any problems.

Even if it entered a berserk state, it would be fine.

On the contrary, after entering the berserk state.

the divine fiend guard's small banner officer was even more fragile.

the damage they dealt became higher.

It didn't take long for them to reduce the divine-demon Guard's small flag Officer to zero health.

zhang shan saw the opportunity and controlled the panda bear, using a combo skill.

with seven consecutive slaps, the divine fiend guard's banner officer exploded.

&Lt; system announcement: congratulations to Feng Yun realm, six-barreled Bodhisattva, and heart follows me Pixiu for killing the celestial demon Guard's small banner officer. &Gt;

Skill point +1, medal +100.

"Haha, I've finally taken care of one."

all the best! Kill the remaining two bosses as soon as possible!

" don't panic. without the divine-fiend guards 'little flag officer, the divine-fiend guards won't be resurrected again. we can take our time. "

that's right. It was a little dangerous just now. The demonic cannon is only about 100 yards away from the city gate. If it were to advance a few more steps, it would be able to hit the city wall.

it has no chance now. It's just a dead thing that can't move. Let's kill it together, hehe.

After the divine fiend Guard's small flag Officer was blown up by them ...

The demonic cannon minion and the captain of the divine demon guards had about 20% of their health left.

However, everyone was no longer in a hurry.

The third wave of monster attacks had only taken about ten minutes.

There were still more than ten minutes before the fourth wave of monsters arrived.

They only needed to wait for the fourth wave of cannon chariots to arrive.

He just needed to kill these two bosses.

They had plenty of time.

After the other three guilds saw the system announcement, they couldn't help but shed tears of envy.

"F \* ck, you guys killed a BOSS so quickly?"

hehe, we have a lot of big shots here. Who asked you guys to be so weak? "

"F \* ck, who are you calling a noob?"

"I know very well who the noob is."

" f \* ck, just you wait, kid. when the event ends, i'll kill you and show you the power of a noob. "

"I'm not afraid of you."

"Wait, the BOSS you just killed, what was that? What the hell is a small flag Officer of the godfiend guards?"

you're inexperienced. The divine demon Guard's small flag Officer is a super powerful BOSS.

that's Bullsh \* t. It's just a normal red BOSS. How powerful can it be? "

you don't know this, do you? the divine demon Guard's little Flag Officer is a super disgusting BOSS.

that's right. This BOSS will resurrect continuously. Those godfiend guards that were destroyed are too disgusting.

"No way! Can a godfiend guard that was killed be revived? Then how did you guys stall the demonic siege cannon?"

how else can I stall them? I have to keep clearing the monsters.

"Awesome."

"Big brother is awesome."

The Guild members from the other three directions saw that there were three bosses to fight on Zhang Shan's side.

She couldn't help but feel a little sour.

the BOSS and the demonic siege cannon were a big problem for fengyun city.

but to everyone, it was a benefit.

After all, it was difficult to find a red BOSS even if they wanted to.

killing the BOSS meant that there was a possibility of it dropping good items.

Even if it was a red BOSS, the chances of it dropping good items were very low.

But there was still a chance.

Even if it did not drop anything good, it would be good if it only dropped red equipment.

To many guild members, this was a very difficult situation.

It was already a miracle that he could get a set of red equipment.

What else did he want?

Moreover, killing another red BOSS would give him a lot of experience points.

it was a pity that only zhang shan's side had three red bosses.

There were only two in the other directions.

Of course.

Fortunately, there were only two bosses in the other directions.

Otherwise, Feng Yun realm would be crying.

The Guild members in other directions were much weaker than Zhang Shan's side.

And in the other three directions, there was no one as strong as Zhang Shan.

If a small banner officer of the godfiend guard really did appear ...

They didn't even have a single person who could tank the monsters.

Then what was the point of fighting?

The demons "siege artillery vehicles would rush to the city wall in an instant.

If that was the case, wouldn't Feng Yun realm have to stay in the city Lord's mansion and continue to build the city walls?

The cost of building the city wall was a little hard to bear even for Feng Yun realm.

It was simply too expensive.

And this was already the third wave.

The demonic siege Cannon's HP increased the further it went.

As for its attack power, no one could tell.

However, it was clear that they would be much stronger than the first wave, and their damage to the city walls would be much greater.

In the first wave, Feng Yun realm spent more than 100 million gold to build the city wall.

If this was the third wave ...

If the demonic cannon chariots kept attacking the city wall, the demonic Army would be able to destroy the city wall.

I'll probably have to spend 200 to 300 million gold.

Wouldn't that give Feng Yun realm a big headache?

Chapter 506 The demon race's city-attacking chariot, the formation-breaking great general

on zhang shan's side, they had already killed the celestial demon guard's small flag officer. the guild members in the other directions were also stepping up their attacks.

Everyone was having a great time.

This was because this wave was definitely in the bag.

On Zhang Shan's side, the small flag Officer of the divine-fiend guard had been defeated.

As for the demonic cannon, it was still more than a hundred yards away from wind Cloud City.

There wouldn't be any new godfiend guards appearing to push the demonic siege cannon forward.

The advance of the demonic siege artillery stopped there. They no longer had the chance to attack the walls of wind Cloud City.

All that was left was to destroy it.

As for the other three directions, there was even less to worry about.

Although the other guild members were much weaker than Zhang Shan's side.

However, there were no small flag officers from the godfiend guards in other directions.

All they needed to do was kill all the godfiend guards.

They would be able to stop the advance of the demon siege cannon chariots.

now, on zhang shan's side, they had already destroyed the small flag officer of the divine-demon guard.  
this wave could be said to be stable.

This wave of four demonic siege cannon chariots would not have the chance to attack the walls of wind  
Cloud City.

Everyone was full of energy and kept killing the BOSS.

as long as they could defeat all the bosses in this wave, they would be able to defeat them.

then, everyone could grab a wave of red packets.

After all, Feng Yun realm had said that he would send a wave of red packets after every wave of monster  
attacks.

In the second wave, they had successfully intercepted all the demon siege cannons and destroyed them  
one after another.

He did not let the demonic siege artillery hit the walls of Fengyun city.

Hence, Feng Yun realm followed his promise and gave out a hundred million gold to all guild members.

This wave was the same.

as long as they could quickly kill the remaining bosses, it would be fine.

They couldn't wait until the fourth wave of monsters. If they killed the current BOSS, it would be a waste  
of time.

However, such a situation should not happen.

On Zhang Shan's side, there were only two bosses left.

he only had 20% hp left.

the guild members in the other directions were a little slower.

however, they had basically taken out 60 to 70% of the BOSS's health.

There was still plenty of time.

it was enough for them to defeat all the bosses.

under everyone's continuous attacks.

After a short while, the two red bosses on Zhang Shan's side had been beaten to zero health.

Zhang Shan went all out.

The damage of the shot was between the two bosses, jumping back and forth.

the captain of the divine fiend guards and the demonic siege cannon fell to the ground.

One spear, two kills.

It was perfect.

After defeating all three bosses, they returned to their original positions.

Everyone was killing monsters while waiting for the other guild members to kill the BOSS.

zhang shan opened the mission panel to take a look.

In this monster attack, he had already killed seven red bosses.

In addition, he had killed one in the dungeon and another in the wild.

Zhang Shan had taken care of a total of nine red bosses today.

In other words, his divinity activation mission had already completed nine stages.

However, Zhang Shan was still worried. He opened the mission panel to take a look.

[ activate divinity: kill powerful demons and use their blood to awaken the divinity in the divine weapon.  
]

[ requirement: kill 81 red bosses. ]

[ mission completion rate: 9/81 ]

Very good, he had indeed completed nine.

It was still better when there was an event. There would be many bosses during the event.

...

If there were all sorts of activities every day.

Then, Zhang Shan's divine activation mission would not be too difficult.

He estimated that he would be able to complete this task in a few days.

Of course, that was impossible.

It was impossible for a monster attack like wind Cloud City to happen again in the near future.

This was because there wouldn't be any more players attacking demon cities.

If the players wanted to take over the demonic city, they had to leave through the West Gate of Wind Cloud City.

They followed this direction and looked for the demons' territory.

but the problem was that the demon monsters there were at least level 80.

With the current level of the players, how could they possibly win?

after the players occupied the city, there would be demonic monster attacks.

...

then, it could only be a normal monster attack.

However, a normal monster attack would only happen once a month.

And this month's event had already been organized.

The next time would be more than 20 days.

Zhang Shan could forget about completing the divinity activation mission by fighting bosses in the event.

It was better for him to be honest and slowly look for bosses in the wild.

However, it wasn't urgent to go find the BOSS now.

First, help Feng Yun realm and finish the city defense.

After killing the BOSS, Feng Yun realm displayed the items dropped by the BOSS on the Guild channel and said, "

"It's still okay this time. I got a trashy skill book."

Zhang Shan took a look at the items that Feng Yun realm had displayed.

There were eight red equipment and three red materials.

There was also a skill book.

The skill book was a Guardian warrior's [ block ] skill. It was a pretty good skill book and could be sold for tens of thousands of gold coins.

After displaying the items, Feng Yun realm continued.

"As usual, the items will be distributed after the event ends."

"No problem," he said.

They had only killed three normal red bosses, so they did not care much about the items they dropped.

It was better to snatch a wave of red packets than to have such a small amount of trash.

zhang shan and the rest stayed at the west gate, farming monsters while waiting for the guild members from the other directions to finish off the boss.

After about ten minutes, the last demonic cannon was destroyed.

haha, another wave is settled. Boss, hurry up and send red packets.

hurry up and send out red packets. I'm the king of red packet snatching. I've been waiting for you for a long time. Hehe.

you're a f \* cking King, D \* mned loser. I wish you a gold coin.

f \* ck, what do you get from me snatching a gold coin? "

yes, if you don't steal too much, we might be able to get more.

"Swordsman."

While everyone was waiting excitedly, Feng Yun realm sent out the red packet. As usual, it was 100 million gold coins.

"Wahaha, I got 50000 gold coins."

"F \* ck, why did I only get 2000 gold coins?"

"2000 is not a small amount, you should be content."

that's right. Two gold coins is enough to make a trip to the great sword.

"F \* ck, I only got 300 gold coins."

"You d \* mned piece of trash, you have the nerve to say 300 gold coins?"

hahaha, my luck is back! Last time, I only got one gold coin, and this time, I got 100000 gold coins. Do you have a lucky day? "

is it true? are you that fierce? "

"You're talking nonsense. How can I brag? everyone can check the red packet records."

I'm depressed. I only got 1000 gold coins.

1000 gold coins is not a small amount. It's just the average amount.

that's right. I only managed to get one gold coin. I don't dare to say anything.

"Seriously, brother. Don't say anything after snatching a gold coin, it's too embarrassing."

"that's right, there's a whole 100 million gold in the red packet and you only managed to grab one gold. your luck is really amazing. Be honest, what did you do last night?"

"The great treasure sword has gone, hehe."

"Haha, you've probably used all your luck on that."

Zhang Shan opened the red packet and 20000 gold coins entered his account.

His luck today was still alright.

By snatching red packets, he had already earned 30000 gold coins.

No wonder everyone liked to join big guilds.

After joining a big Guild, one would have the opportunity to participate in various activities or fight bosses.

Although as a hooligan, it was impossible for him to get anything good.

However, snatching red packets like this was not a bad idea.

If Zhang Shan was still doing as he did in the past.

If he could earn 30000 gold coins in a day, he would wake up smiling even in his dreams.

The Zhang Shan of the past was a realistic portrayal of most of the current ordinary guild members.

After all, not all of them were rich.

No matter where it was, ordinary people always made up the majority.

It was the same in the game, where there were more poor people than rich people.

Even the big guilds were the same.

After all, a Guild could easily have tens of thousands or even hundreds of thousands of players.

In the future, after the Guild leveled up, they could recruit even more guild members.

The Guild members that had been recruited were all ordinary players.

There were only a few who really spent money.

For normal players, how could they not be happy when they could grab red packets from time to time?

Moreover, the amount of money in the red packet was very impressive.

as long as their luck wasn't too bad, they would at least be able to get a few hundred to a thousand gold.

To ordinary guild members, this was a huge income.

If they managed to snatch a big one, they would be able to take off instantly.

After sending the red packets, Feng Yun realm said to the people around him.

"What should we do next? do you have any suggestions?"

Once Feng Yun realm said this, everyone fell silent.

To be honest, the fourth wave would definitely be very difficult to deal with.

Just the monsters attacking the city were definitely level 80.

Many guild members might not even be able to deal with a single level 80 monster.

It would be difficult for them to charge into the group of monsters and stall the demonic siege cannon.

In the wind and cloud Guild, not many people could do it.

However, if they couldn't delay the demonic siege cannon ahead of time ...

It was obvious that Fengyun city would have to suffer the attacks of the demonic siege cannons.

Feng Yun realm had to stay in the city Lord's mansion and repair the city walls.

spending money was fine.

What he was afraid of was that the fourth wave of demonic cannon chariots would be too destructive.

What if the city wall couldn't be repaired?

regarding feng yun realm's question, no one dared to give any suggestions.

This was because it was indeed very difficult.

After a moment of silence.

Wind and cloud blade said.

"Why don't we just focus on one or two directions and give up on the other two?"

"What do you mean by giving up?"

what else could it mean? I just don't care about it and let the demons attack. Boss, keep repairing the city walls.

"What if I can't fix it?"

"there's no other way. it's unrealistic to defend all four directions."

that's right. It might be better on our side. We should be able to pull the demon siege cannon in advance, but it's hard to say in other directions.

"It's not that it's hard to say, it's that it's impossible for them to intercept the demon siege cannon ahead of time."

"Yes, level 80 monsters are very powerful. If even I can't deal with a few of them, the Guild members with inferior equipment will have even less of a chance."

that's right. We have the six-barreled boss here, so we can definitely make it through. As long as the others block the small monsters around us, we can clear out the godfiend guards pushing the cannon carts and hold back the demonic siege cannons. The other directions won't work without someone as strong as the six-barreled boss.

After listening to everyone's suggestions, Feng Yun realm was silent for a while before he spoke.

alright, let's do it this way. Concentrate our forces on the East and West gates. We'll leave the north and south gates alone. Leave a small number of guild members under the cover of the arrow towers to defend the city walls. The rest of you, gather at the East and West gates.

Feng Yun realm quickly made arrangements.

the main force of the guild members was split into two.

A portion of them followed Zhang Shan and continued to guard the West Gate.

as long as the demonic siege cannon appeared, they would immediately rush over and intercept it.

At the East Gate, under the leadership of Secretary Feng Yun, they also tried to rush over and intercept the demonic siege cannon.

If they really couldn't make it through, they would have to attack the BOSS under the cover of the arrow towers.

As for the city walls in the north and south, they had basically given up on defense.

With the arrow towers, the monsters could not reach the city walls.

even level 80 wild monsters couldn't withstand the firepower of the arrow towers and directly rush to the city wall.

feng yun realm left a portion of his men to stay below the city wall to clear out the small monsters that had escaped.

As for the demonic siege cannon vehicles that might appear in the north and south, there was no need to worry about them.

Let them smash the city walls.

Let it smash whatever it wants, as long as it doesn't destroy the city with one hit.

As long as it could be repaired, Feng Yun realm would be able to repair it no matter how much gold it would cost.

At most, he would just repair it every time he smashed it and repair it until the event ended.

At most, it would only take half an hour.

He believed that Feng Yun realm would be able to take it.

after feng yun realm had arranged everything, he said to zhang shan.

"liu guan, i'll have to trouble you to lead everyone and guard one of the roads. the less attacks there are, the less damage fengyun city will suffer. it should be able to be repaired."

"Don't worry, we can stop them on our way."

Zhang Shan replied with confidence.

The fourth wave of attack would definitely be very fierce.

Whether it was a level 80 monster or a real-name boss that might appear.

Neither of them was easy to deal with.

But Zhang Shan was not worried.

Level 80 monsters were easy.

he would definitely be able to charge in with his men.

As for the possibility of a real-name boss appearing ...

Zhang Shan was not too worried.

in particular, he had obtained the passive skills of gods and demons.

His HP was now close to 800000.

Even if a real name boss appeared and reached level 80, he should be able to stop it.

Moreover, their team had been strengthened.

In the earlier arrangements, Feng Yun realm had also transferred over ten thousand men from other directions.

Now, they were a large team of more than 30000 people.

With Zhang Shan there, there was no reason that they could not defend against this wave of attacks.

After hearing Zhang Shan's reply, Feng Yun realm nodded his head and did not say anything else.

Zhang Shan could understand.

the current feng yun realm must be feeling a little heavy in his heart.

He was worried that he wouldn't be able to defend Fengyun city, which would be a great loss.

In addition, he had spent one billion gold to build the city.

So far, for the sake of wind Cloud City.

feng yun realm had already invested more than one billion gold.

if the city still couldn't be defended, then he would suffer a great loss.

And it wasn't just about losing money.

If the Asmodians destroyed the Asmodians 'cities they had taken down, they would lose a lot of face.

In order to defend the city, Feng Yun realm was willing to give it his all.

After Feng Yun realm had arranged everything, everyone quietly waited for the demonic siege cannon to arrive.

In a short while, a huge demonic cannon appeared in the distance.

He didn't know if it was an illusion.

Zhang Shan felt that this time, the demon siege cannon seemed to be even bigger.

“Have the demon’s cannon chariots become bigger this time?”

“It seems so.”

” f \* ck, wouldn’t that demonic cannon’s arrow be even more destructive if it hit the city wall? ”

” that’s normal. this is the last wave, so it’s definitely not that simple. ”

don’t worry about it. Let’s rush over.

Zhang Shan waved his hand and led everyone in the direction of the demon siege cannon.

as for feng yun realm, he returned to the city gate tower after the demonic siege cannon appeared.

As long as the demonic siege cannon approached, he would teleport to the city Lord’s mansion and stay there to repair the city wall until the monster siege was over.

Zhang Shan held his hand cannon and pushed forward.

However, not long after they advanced, they realized that the monsters around them had become level 80 demonic strongmen.

Each demon strongman had as much as 160000 blood.

After the monsters reached level 80, their HP would greatly increase.

fortunately, zhang shan’s attack power was also considered high enough.

He only needed to fire three shots to take down 12 monsters.

However, the other people in the team could not.

Even if it was Windcloud blade or heart moves with me, they would still need close to 20 slashes to kill a single monster even with the divine weapons in their hands.

This kind of monster-clearing speed might be considered passable when used to farm monsters.

However, he could not do that now.

Now, they had to move forward.

However, there was no time for them to catch a monster and hack it dozens of times.

If they were too slow.

The speed at which they cleared monsters would be far slower than the speed at which the surrounding monsters replenished their numbers.

If they wanted to move forward, they had to be fast.

he had to cut fast.

Windcloud blade shouted after killing the monsters for a while.

don't split up and attack the monsters. Everyone focus on the same monster as a group. Open up the passage as soon as possible and push forward.

"I understand."

Even though Zhang Shan was leading the way.

However, their team was huge after all, with more than 30000 people.

It was impossible for him to open up a path for more than 30000 people by himself.

The others had to follow and clear the monsters together.

Zhang Shan led a group of the Guild's main forces and cleared the way in front, while the others protected his left and right.

Everyone advanced in the direction of the demonic cannon vehicle with great difficulty.

When Zhang Shan and the rest charged into the group of monsters.

The other guilds also tried.

The Guild members in the north and south had all been moved away due to their main strength.

The remaining guild members were all very weak.

They tried to charge forward, but they were quickly beaten back by the monsters.

He couldn't move at all.

Therefore, they could only retreat to the bottom of the city wall and lie down.

On the other hand, the Guild members at the East Gate were still struggling to move forward under the leadership of the Secretary.

however, their speed of advancement was extremely slow.

They didn't have strong fighters, so they couldn't quickly clear the monsters when facing level 80 demon strongmen.

They could only move forward at turtle speed.

who knew if they could successfully hold back the demon siege cannon?

Zhang Shan did not care about the other directions. He only cared about the West Gate.

Zhang Shan went all out. He had activated all his explosive skills.

They quickly cleared the monsters and advanced.

He didn't need to save any skills. He just had to open up a passage and get close to the demonic siege cannon.

otherwise, the demonic siege cannon would have continued to advance.

it would be even more difficult to delay them from behind.

After about four to five minutes, they finally pushed close to the demonic siege cannon.

Zhang Shan looked out.

A huge demon siege cannon appeared in front of them.

In terms of size, this demon siege cannon vehicle was at least four to five times larger than the previous three.

Not only that, but this demon siege cannon actually had a name.

It was a demon siege cannon vehicle. The formation-breaking general.

This was a BOSS with a real name?

F \* ck, a siege weapon can be considered a real-name BOSS?

This was too ridiculous.

Also, was this formation-breaking general the name of the demon siege cannon chariot or a title?

Was he considered a real-name BOSS?

Zhang Shan was a little confused.

There were more than ten thousand godfiend guards pushing the cannon chariots.

Not only that.

The key was that behind the demonic siege cannon, there was a BOSS with a real name.

the commander of the divine fiend guards. Achilles.

Two real-name bosses appeared at once?

did he have to be so ruthless?

Zhang Shan subconsciously looked at the top of the siege cannon.

after he finished reading, he couldn't help but heave a sigh of relief.

Fortunately, the one operating the demonic siege cannon was still the captain of a small divine demon guard.

It was just an ordinary red BOSS.

Chapter 507 commander of the divine fiend guards, achilles

When everyone saw the demonic siege cannon, they couldn't help but be stunned.

"Holy sh \* t, can we handle such a big guy?"

"Brother, size isn't a problem. The BOSS 'health is the deciding factor."

are you a pig? the demon cannon in front of us is much smaller than this one. However, it has 7.5 billion HP. How could this one have less HP? ”

why are you all staring at the demonic cannon chariots? look at the commander of the divine fiend guards.

“F \* ck, there are three bosses again.”

“F \* ck, it’s a real name BOSS.”

I’m afraid there’s more than one BOSS with a real name. This demonic siege cannon looks like a real name BOSS too.

“Damn it, I just realized that this demon siege cannon actually has a name. Formation-breaking general? Can this name not be so domineering?”

the name isn’t a problem. Let’s just start.

that’s right. Why are you talking so much nonsense? let’s start.

Zhang Shan said.

I’ll hold back the commander of the divine fiend guards. You guys quickly clear out the divine fiend guards. Don’t let the demons ‘cannon chariots advance.

“Alright,” he said.

zhang shan held his hand cannon and fired at the divine demon guards in front of him.

The commander of the guards who had been behind the demonic cannon carriage.

After Zhang Shan had attacked the divine-fiend guard, he had rushed forward quickly. He waved the broadsword in his hand and slashed at Zhang Shan.

Damage -386588.

Looking at the damage value, Zhang Shan was shocked.

This was really F \*\*\*.

The commander of the divine fiend guards could deal nearly 400000 damage to him with a single slash.

The knife cut off half of his health bar.

Fortunately, he had used a passive skill to increase his HP to nearly 800000.

Otherwise, the commander of the divine fiend guards would have been able to kill him with two slashes.

If it was a critical hit, Zhang Shan would be gone with a single slash.

It was truly terrifying.

Zhang Shan quickly turned his fire on the commander of the divine demon guards.

As he attacked, he checked the divine fiend guard commander’s attributes and skills.

The commander of the divine fiend guards. [Achilles (red): level 80, attack 200000, HP 200000000]

Skill 1, hexagonal blade, skill 2, Demon God (passive), skill 3, resuscitation, skill 4, eight barren slash.

[Six Harmonies blade: increases damage by 100% and deals the same amount of damage to other targets within a five-yard radius.]

[ Demon God: born as a Demon God, has abnormally strong vitality, greatly increases health points. ]

[ revival: when a godfiend guard under your command dies in battle, the commander of the godfiend guard. ] Achilles could use the flag to revive them and start a new war.

[ eight desolations slash ]-with one slash, one could slash eight desolations. Deals 5x the damage to all targets within a 100-yard radius.

after looking at the attributes and skills of the commander of the divine-demon guards, zhang shan could not help but shake his head.

Damn, a level 80 real name BOSS was really powerful.

His basic attack power had actually reached 200000.

and this was the divine fiend guard commander, who didn't have any status skills that increased his attack power.

If he added another status skill that increased his attack by 100%, wouldn't his attack reach 400000?

It was simply terrifying.

The commander of the divine fiend guards not only had powerful attacks, but his HP had also reached an absurd 20 billion.

With such a high amount of health, Zhang Shan was a little suspicious. Could they even kill this commander of the divine demon guards?

Even if there were no accidents.

If they kept attacking, it would probably take about half an hour. By then, the monster attack would have ended.

once the event ended, all the monsters attacking the city, including bosses, would be killed by the system.

Then what's the point of fighting?

the only good news was that there were enough people on their side to come together.

The large group of them attacked together.

Let's see if we can get it done faster.

While Zhang Shan was looking at his attributes, the others were also looking.

" f \* ck, this commander of the divine fiend guards actually has 20 billion hp. "

“The demonic siege cannon also has 20 billion HP.”

...

f \* ck, a BOSS with 20 billion HP, can we even kill it? ”

let’s try. If we can’t kill them, then so be it. We just need to stall the demonic siege cannon. As long as the demonic siege cannon can’t hit the city wall of wind Cloud City, our mission will be completed.

“That won’t do. This is a real name BOSS, and it will drop a divine weapon mold. Usually, you can’t find it even if you want to. It’s such a pity if you don’t blow it up now that you’ve encountered it. ”

“unfortunately, there’s no other way.”

no, everyone, work hard. If we work together, we still have a chance to blow them up.

“Why are you guys always looking at the boss” HP? you should be looking at the boss “skills.”

what’s so good about the boss ‘skills? anyway, the six-barreled boss is taking the damage, so we can just deal damage as usual.

that’s right. As long as the six-barreled boss can handle it, this won’t be a problem.

look at the commander of the divine fiend guards. How did its recovery skill become a minor skill? it’s so F \* cked up.

“so be it. it’s just a minor skill that can resurrect the godfiend guards. once the godfiend guards are resurrected, we can quickly clear them out.”

that’s right. Compared to the boss ‘HP, these divine-demon guards are just a small problem.

...

“Alright, you guys are awesome.”

After Zhang Shan held back the commander of the divine fiend guards, the others quickly cleared out the surrounding divine fiend guards that were pushing the cannon carts.

There were more than 10000 godfiend guards this time.

but they had a lot of people.

This time, they had over 30000 people.

On average, two or three people could fight a godfiend guard very quickly.

it didn’t take long for everyone to clear out the surrounding godfiend guards.

zhang shan opened fire at the commander of the guards as he spoke.

“Everyone, attack the commander of the divine fiend guards first. If you can’t hit the commander, go and cut down the demon siege cannon chariots. As for the squad leader of the godfiend guards, there’s no need to worry about him.”

even though there were three bosses this time.

However, he didn't need to pay any attention to the captain of the divine demon guards who was operating the demonic siege cannon.

in any case, they were going to fight for a long time this time.

With his bullet damage, he could kill the captain of the divine demon guards.

Zhang Shan asked everyone to focus their fire on the two real name bosses.

The commander of the divine fiend guards, in particular, had to think of a way to arrange for more people to attack together.

Zhang Shan was afraid that at the end, he would not be able to handle it.

this was because the commander of the divine fiend guards was a real boss.

It was the ultimate move of the commander of the guards, the eight desolations slash.

Zhang Shan had to activate the God's descent skill in order to be able to withstand it.

But the problem was that he could only use his big move once a day.

In other words, Zhang Shan could only block the ultimate attack of the commander of the divine demon guards once.

if the commander of the divine fiend guards used a second ultimate move, he definitely wouldn't be able to withstand it.

Although the ultimate skill of the divine demon guard commander was not much different from the ultimate skills of other bosses, it still dealt five times the damage.

However, its basic attack power was high.

the commander of the divine demon guards had 200000 attack power. if his ultimate skill dealt five times the damage, it would deal 1000000 damage in theory.

If not for the God's descent skill, Zhang Shan would not have been able to withstand such damage and would have been killed in one hit.

the problem now was that the commander of the divine fiend guards was likely to use a second move.

This was because the commander of the divine fiend guards had 20 billion HP.

Even if they were at half HP, they still had 10 billion HP.

Even with 10 billion HP, they would still need a long time to fight.

Even if there were many people participating in the attack, it would still take at least ten minutes.

After such a long period of time, it was very likely that the commander of the divine fiend guards would release a second move.

also, a real-name boss would at least drop a divine weapon mold.

Since they had encountered such a boss, it would be a pity if they didn't kill it.

Thus, Zhang Shan arranged as many people as possible to attack the commander of the divine fiend guards.

Moreover ...

Among the three bosses, the commander of the divine fiend guards was the key.

As long as he could destroy it, nothing else would be a problem.

Without the commander of the godfiend guards, the godfiend guards that pushed the cannon carts would not be revived.

The demonic siege cannon would not advance anymore.

In that case, their basic task of stalling the demon siege cannon would be completed.

So, no matter from which perspective.

they had to do their best to destroy the commander of the divine fiend guard.

however, when zhang shan's words came out, wind and cloud blade said gloomily.

we can't kill the commander of the divine demon guards. The BOSS 'first skill is an AoE skill. We can't get close to it.

that's right. As a close-combat class, I'm really helpless. I'm being targeted at every aspect.

" it's fine. if you can't kill the commander of the divine fiend guards, go and kill the demon siege cannon. everyone else, try your best to attack the commander first. "

of course, zhang shan knew about this problem.

This was something that could not be helped.

the minor skills of the commander of the divine fiend guards were just that disgusting.

When the six Harmonies saber slashed out, no one could stand within a five-yard radius of the commander of the divine fiend guards.

The commander of the divine fiend guards had dealt nearly 400000 damage with a single slash. Other than Zhang Shan, who else could take it?

Without the damage from the melee classes, their attack efficiency was severely affected.

after all, in the wind and cloud guild, many of the big shots played as berserkers.

without their group of big shots, the damage efficiency would be greatly reduced if it was replaced by other long-range damage dealers.

But there was no other way.

In this game, there were some bosses that were specifically targeted at melee classes.

Or rather, they were jumping too fast.

Most players would start fighting level 80 real-name bosses when they were still around level 40.

It was normal to be targeted.

That is, if they all reach level 80.

With the equipment of the Guild's bosses, they might be able to withstand the damage of the divine demon guard commander.

However, it was clearly not possible now.

Without the melee boss's damage output, their efficiency in killing the commander of the divine fiend guards had decreased significantly.

But fortunately, Zhang Shan's damage output was strong enough.

His damage output alone was comparable to that of dozens of people.

In addition, Zhang Shan had strengthened the two helpers in the Guild who had curse skills to the level where they could deal with the commander of the divine demon guards.

Curse the commander of the divine fiend guards twice every minute.

In other words, within one minute and sixty seconds.

the commander of the divine fiend guards had a curse on his head for ten seconds.

Curses increased their damage by 100%, which was very powerful and could greatly increase their damage output.

Under their attacks, the health of the commander of the divine fiend guards began to slowly decrease.

When his HP dropped to 90%.

The commander of the divine fiend guards took out the flag on his back and waved it.

Countless godfiend guards instantly appeared around them.

These revived godfiend guards quickly pushed the demonic siege cannon Cart forward.

f \*\* k, quickly clear out these godfiend guards.

"Let's clear the monsters first, then fight the BOSS."

The appearance of nearly 10000 godfiend guards caused them to be flustered.

Although they were prepared, it was still a little annoying to deal with.

When they were fighting the BOSS, a large wave of divine demon guards appeared around them. How could they not be annoyed?

The large group of them used all sorts of skills to quickly clear out the godfiend guards.

in a short while, they had cleared out this wave of godfiend guards.

The demonic siege cannon was pushed dozens of yards further.

He looked at wind Cloud City behind him.

Zhang Shan considered it seriously.

This could not go on.

Their current position was only about two hundred yards away from wind Cloud City.

If there were a few more waves, the demonic siege cannon would be pushed to the foot of wind Cloud City.

Zhang Shan said.

next time, after the commander of the divine-fiend guard uses his resurrection skill, you guys can take turns using your ultimate skills to clear the monsters.

that's right. We'll use one big move for every resuscitation. It just so happens that we have eight people here who have learned big moves. It should be enough to last until the end.

"Yes, as long as we can stall the demonic siege cannon, we don't need to keep our big moves."

Everyone began to discuss the order in which they should release their big moves.

They had eight ultimate skills, but they couldn't use them all at once.

He had to arrange the order first.

After a while, the commander of the divine fiend guards used [ resuscitation ] again to revive the divine fiend guards.

Wind cloud blade shouted.

"I'll do it."

As soon as Windcloud blade finished speaking, he activated the Berserker's wrath and charged into the group of monsters. He then used destruction.

A strong wave of energy spread out from the blade of wind and cloud.

and then there was no more.

Windcloud blade's ultimate skills did not even kill a single godfiend guard.

Wind and cloud blade's ultimate move was fierce.

The Berserker's destructive skill was a skill that dealt ten times the damage.

Moreover, Windcloud blade had activated Berserker's wrath in advance, increasing his attack power by 100%.

however, the damage was still not enough to kill the monster.

The godfiend guards 'HP was odd.

By the fourth wave, each godfiend Guard's HP had reached two million.

Meanwhile, even after activating Berserker's Fury, Windcloud blade's ultimate only dealt around-340000 damage.

In a fight, it was okay to kill people instantly.

It was still far from killing monsters instantly.

These divine demon guards were much more difficult to deal with than players.

However, it didn't matter. Although wind and cloud blade's ultimate skill hadn't instantly killed any godfiend guards, it was still a powerful skill.

However, after his ultimate skill shaved off 340000 of the divine-demon guards 'HP, he had already lost 340000 HP.

This way, everyone could clear the monsters faster.

The others used all sorts of AoE skills on the revived divine-demon guards.

Zhang Shan's shrapnel skill was also continuously released.

Under their Swift and fierce operation ...

The second wave of godfiend guards that had been revived was quickly cleared by them.

This time, they cleared the monsters much faster than the previous wave.

The demonic siege cannon only moved about ten yards before the revived godfiend guards were all cleared.

"Haha, let's do it this way. As long as we can maintain this rate of progress, the demonic siege cannons won't be able to attack wind Cloud City."

"After the event is over, I'll ask boss to give out another wave of red packets."

"That's right. If we stall this demon's cannon, we can save a lot of gold coins for boss."

I'm afraid it's not just a matter of gold coins. The demonic siege artilleries on our side are much larger than those in other directions. I'm afraid that with a few giant arrows, Fengyun city might be gone.

that's right. The other demonic cannon chariots are still the same as before, but the ones on our side have become formation-breaking generals. Their destructive power towards the city must be much stronger.

"Indeed, it is."

"that's why we must hold it back. we can't let this demonic siege cannon have the chance to attack wind cloud city. Otherwise, the city will be gone after the first day boss became the city Lord, hehe."

"Haha, don't worry. We can definitely handle this."

"brothers, all the best!"

Just like that, the commander of the divine fiend guards would use the recovery skill every two to three minutes.

however, under the attacks of their ultimate skills and all sorts of other skills ...

Zhang Shan and the rest were able to quickly clear out the revived godfiend guards.

While Zhang Shan and the rest were fighting, the demonic siege artilleries in other directions were attacking the walls of wind Cloud City.

Not only the demon's cannon chariots in the north-south direction, but also those in the north-south direction.

That was why they had been attacking wind Cloud City.

Even at the East Gate.

The little Secretary led tens of thousands of people, but they couldn't stop the advance of the demonic siege cannon.

There were no real-name bosses at the East Gate.

however, a small banner officer of the godfiend guard had appeared.

The little Secretary brought people with her, but she couldn't handle the little Flag Officer at all.

The divine-fiend Guard's small flag officer's damage was also over 200000.

The little Secretary's HP was less than 300000. He couldn't even take two hits.

As long as the little Flag Officer dealt a critical hit, he would fall to the ground.

against the ferocious divine fiend guard flag officers, there was no need to talk about stalling the demonic siege cannon at the east gate.

They couldn't even keep their own lives.

The remaining people retreated all the way back to the eastern gate.

Leaning on the city gate tower, the 24 intermediate arrow towers provided cover fire, barely managing to survive.

As for the demon siege cannon at the East Gate, they were powerless.

They could only watch helplessly as the demonic cannon chariots attacked the walls of wind Cloud City.

Of course, now that they had the support of the arrow towers, they might be able to destroy the demonic siege cannon first.

But it would take a long time.

At least for now, the little Secretary and the others could only let the demonic cannon chariots attack the city wall non-stop.

there was nothing they could do. they could only slash out damage continuously under the cover of the arrow towers.

Zhang Shan and the others at the West Gate were still doing their best to attack.

In the other three directions, the demonic siege cannons were firing huge arrows.

Rumbling sounds could be heard from afar.

The other three demonic cannon minions were not real bosses.

However, as the fourth wave of siege cannons, their destructive power was much stronger than the previous ones.

Every time a giant arrow was shot, it would destroy a long section of the city wall.

At this moment, Feng Yun realm could only stay in the city Lord's mansion and repair the city walls.

he must be having a big headache now.

There were about 20 minutes left before the event ended.

Facing such a ferocious demon siege cannon, Feng Yun realm did not know how much gold it would cost to repair the city wall.

Zhang Shan estimated that the amount of gold coins needed to repair the city wall this time would be very exaggerated.

Fortunately, at least the city wall could still be repaired for now. Those demonic siege cannons did not directly destroy Fengyun city.

This was because Zhang Shan's side's demonic siege cannon had already been successfully stalled.

If the formation-breaking general at the West Gate also joined in the attack on wind Cloud City ...

Even if Feng Yun realm wanted to repair the city wall, he would not be able to do so.

he estimated that a few giant arrows would be enough to destroy wind cloud city.

The demonic cannon vehicles on the West Gate had names.

The formation-breaking general.

Just from the name, one could tell how terrifying this demon siege cannon would be.

Chapter 508 The human race's Fengyun city, standing in the world forever

Not long after the fourth wave of demonic cannon chariots appeared, the other three directions had been completely lost.

The demonic siege artilleries from three directions kept firing giant arrows at wind Cloud City.

The rumbling sound continued.

The city walls of wind Cloud City were continuously broken through and Feng Yun realm spent gold coins to repair them.

Fortunately, the demon siege artilleries in the other directions were only ordinary models.

It was not like Zhang Shan's side.

the demonic cannon minions were all replaced by real name bosses, the formation-breaking general.

Their initial judgment was not wrong.

The focus of the demons "attack was indeed the Western gate.

As long as they guarded the West Gate, they would not let the demonic siege artillery at the West Gate have a chance to attack the city wall of Fengyun city.

Then, they would have a chance to defend wind Cloud City.

As long as Feng Yun realm spent a huge amount of gold coins to repair the city walls, it would be fine.

however, it was still fine for now. at least, there was still a chance to repair it.

the demonic siege cannon hadn't destroyed fengyun city.

It meant that the destructive power of the demonic cannon chariots from the other three directions had not reached the limit of what wind Cloud City could withstand, and it could still be repaired.

Zhang Shan could not care less about the demonic siege cannons in other directions.

He was only in charge of the three bosses in front of him.

in particular, the commander of the divine fiend guards had to be dealt with as soon as possible.

They had a group of thirty thousand people surrounding the Asmodians 'cannon chariots and the divine fiend Guard's commander, constantly attacking.

Feng Yun Qing and the other witch doctor in the Guild would cast a curse skill at the commander of the divine demon guards every half a minute.

Together with the curse skill, everyone quickly attacked and dealt a wave of rapid damage.

It was the same for Zhang Shan. Fanaticism and shadow clone skills. These two skills, as soon as they were off cooldown, he would quickly activate them.

Under the continuous attacks of the large group of people, the health of the commander of the divine fiend guards was rapidly decreasing.

90%, 80%, 60%.

After fighting for about ten minutes, the divine-fiend guard commander's HP had almost been reduced to half.

The divine fiend guard commander's HP was getting closer to half.

Zhang Shan said.

split up a group of people and clear out the surrounding monsters. When the BOSS uses his ultimate skill, everyone will have a place to hide.

“alright,” he said.

The Guild members who were originally attacking the demonic siege cannon quickly sent out a portion of their members to clear the surrounding monsters.

Originally, they had more than 30000 people, but there had always been more than 10000 people on their periphery.

They were in charge of clearing out the small monsters and keeping them out of their way so that they would not interfere with their BOSS fight.

However, the commander of the divine fiend guards was almost at half HP.

A BOSS with half health would use a big move.

Furthermore, the commander of the divine fiend Guard’s ultimate attack was extremely fierce.

The damage range of the eight desolation slash was 100 yards, which dealt five times the damage.

They had to expand their range of activity to at least a hundred yards.

otherwise, after the commander of the divine fiend guards released his ultimate move ...

Zhang Shan did not mind.

He activated the skill {God’s descent} and withstood the damage from the BOSS’s ultimate skill without any problem.

But the others couldn’t.

They had to avoid it in advance.

Other than Zhang Shan, no one could withstand the BOSS’s powerful skill.

As Zhang Shan fired his gun, he looked at the health bar of the commander of the divine demon guards.

When its health bar was infinitely close to half, Zhang Shan shouted.

quickly retreat. Remember to maintain a distance of more than 100 yards from the commander of the divine fiend guards.

After Zhang Shan finished speaking, he quickly activated the God’s descent skill.

After activating his ultimate skill, his HP instantly approached 1.6 million.

At the same time, his attack power and attack speed had also been greatly improved.

Now, he could deal close to 150000 damage with a single shot.

This was also because the wild monsters here had the Holy demon’s protection state, which reduced the damage effect by half.

Otherwise, the damage he could deal now would be around 300000.

...

The God's descent skill was indeed a powerful skill.

Not only that, but Zhang Shan's current attack speed was also much faster than before.

His current attack speed was almost double that of before.

Countless bullets were fired from Zhang Shan's hand cannon.

The damage kept jumping back and forth between the three bosses.

Five to six shots were fired in a second, and the damage was simply explosive.

After the others had retreated.

Zhang Shan was alone. He activated his ultimate skill and continued to attack the boss.

Soon, the commander of the divine fiend guards had half of his HP left.

when the divine fiend guard commander's hp fell to 50% ...

It wielded a large saber and slashed eight times at the surrounding area.

...

Countless blade lights instantly spread to the surroundings.

At this time, a certain guild member suddenly called out gloomily.

f \* ck, I didn't calculate the distance properly. I was hit by the BOSS's ultimate.

"Silly baby, who asked you to stand further away?"

" stand my a \* s! there are level 80 demon strongmen all around. where do you want me to stand? "

yeah, the space we expanded just now wasn't big enough. We didn't even have space to squeeze in.

shut up. Support, quickly resurrect the fallen players and continue to attack the BOSS.

After the commander of the divine-fiend guards had used his ultimate move, some of the Guild members had not calculated the distance properly.

If they didn't run far enough, they would be instantly killed by the big move.

He couldn't help it.

they were surrounded by level 80 demon strongmen, and they didn't have enough safe space to expand for a while.

Otherwise, they wouldn't need to calculate and could just run far away.

However, there was limited space just now, and there was no place to run.

Therefore, some guild members were unable to avoid the ultimate attack of the commander of the divine fiend guards.

But it didn't matter.

In any case, they had enough support here. If someone fell, they could just revive them.

The fallen guild members were instantly killed by the commander of the divine fiend guards 'ultimate skill.

they couldn't even see the exact damage figures.

This was because their maximum HP was far from the BOSS's ultimate damage.

The BOSS's ultimate skill had a huge damage overflow.

Therefore, they could not tell how much damage the BOSS's ultimate skill dealt.

The others could not tell, but Zhang Shan could.

when the commander of the divine fiend guard used the eight desolate slash ...

a damage of over 900000 appeared above zhang shan's head.

The damage was terrifying, close to a million.

After playing the game for so long, this was the highest BOSS damage value that Zhang Shan had ever seen.

fortunately, his hp was high enough. although the damage from the commander of the divine fiend guards 'ultimate move was terrifying, he was still injured.

but zhang shan could still hold on.

After activating God's descent, his current HP was almost 1.6 million.

The commander of the divine fiend guards 'ultimate move couldn't instantly kill him.

Furthermore, Zhang Shan's current injuries were extremely terrifying.

Therefore, his current efficiency in absorbing blood was also very exaggerated.

Not long after the divine fiend guard commander's ultimate attack landed on him ...

Very quickly, he was back to full health.

After the commander of the divine fiend Guard's ultimate move ended, the others quickly ran up and continued their attacks.

As for those who had fallen to the ground, they had already been revived by the support.

Zhang Shan said as he fired rapidly.

attack quickly. Don't let the commander of the divine fiend guards use his second ultimate move.

this seems a little difficult. The commander of the divine fiend guards still has 10 billion HP. We still have to fight for a long time.

"It's not too bad. We fought for about ten minutes just now and we lost 10 billion HP. The remaining 10 billion HP will probably be cleared in less than 10 minutes."

but the problem is, I don't know how long it takes for the commander of the divine fiend guards to use his ultimate move.

"there's nothing i can do about it. i'll just treat it as if it's more than ten minutes. if it releases a big move every two minutes, i won't be able to fight it at all. i can't even hold the demonic siege cannon back."

that's right. Don't think too much. Just play as fast as you can.

Everyone surrounded the two bosses and attacked them continuously. The more they attacked, the faster they attacked.

In particular, the commander of the divine fiend guards' HP was rapidly decreasing under their continuous attacks.

As for the health of the demonic siege cannon, it decreased a little slower.

After all, Zhang Shan and the rest had been focusing their attacks on the commander of the divine fiend guards.

Zhang Shan opened up his big move and attacked madly.

All sorts of critical hits and attack special effects would appear on the divine fiend guard chieftain's body.

Zhang Shan's current damage was extremely terrifying.

A single Holy Strike from the spear could take out the BOSS's HP of nearly 1500000.

A normal 5x critical hit could deal 300000 to 400000 damage.

In the duration of his God's descent, Zhang Shan had dealt high damage.

after a minute, zhang shan's ultimate was over. he could only use normal attacks.

However, the commander of the divine fiend guards only had eight billion HP left.

According to his current progress, he estimated that he would be able to destroy it in another seven or eight minutes.

Windcloud blade joked as he brandished his huge axe and continuously attacked the demonic siege cannon.

"I can hear rumbling sounds coming from other directions. I wonder if boss has enough gold coins. If he doesn't have enough gold coins, we'll have wasted our efforts. I'm worried for him, hehe."

“What are you worried about? do you think boss is someone who is unprepared? He must have exchanged a huge amount of gold coins before the event started.”

that’s right. If you have the time to worry about that, why don’t you hurry up and kill the BOSS? ”

“Aren’t I cutting it now? The damage in the game can’t be increased by hard work. It’s limited by equipment and level.”

“Shut up, you.”

They were a large group of people, and they were attacking the BOSS nervously while complaining.

Under their continuous attacks, the health of the commander of the divine fiend guards was rapidly decreasing.

50%, 40%, 20%.

After fighting for five to six minutes, the commander of the divine fiend guards was forced into a berserk state.

during this time, the commander of the divine fiend guards had used [ revive ] twice.

However, with their skillful response, the revived godfiend guards were quickly eliminated.

The demonic siege cannon hadn’t been pushed too far.

They were still about 150 yards away from the West Gate of wind Cloud City.

As long as the commander of the divine fiend guards didn’t use any more powerful moves, they should be able to win.

After entering the berserk state, the damage of the commander of the divine fiend guards became more and more intense.

One slash and Zhang Shan’s HP was reduced by half.

When the attack was a critical hit, it could almost empty Zhang Shan’s health bar.

Fortunately, the support was strong enough. Every time Zhang Shan’s health bar dropped, the group of support would give him a quick wave of health.

therefore, even though zhang shan’s health bar looked like it was constantly in danger, he had never fallen.

good luck, brothers! The BOSS is about to be killed.

I hope that this BOSS will drop a few more divine weapon molds. This is too difficult to fight.

it’s possible. After all, it’s the first clear.

“First kill my ass! Which real-name BOSS isn’t the first kill when it’s killed? I’ve never seen a BOSS with a real name being killed by players twice.”

” that’s right. a BOSS with a real name seems to be like that. after killing it once, it won’t respawn again.  
”

there are. The real-name bosses in the event will occasionally appear again.

I don’t care. This is our first kill anyway. Give me two divine weapon molds.

I don’t want a divine weapon mold. I want a divine weapon mission item. I don’t have a divine weapon yet.

sigh, that’s right. The mold can only be used to forge defensive artifacts. We want weapons. Only artifacts can truly change the quality of the equipment.

“F \* ck, there’s a divine artifact and you guys still have to pick? If you don’t want it, then give it all to me. I don’t mind.”

“get lost,” he said.

As they were worried that the commander of the divine fiend guards would use his ultimate move again, everyone kept on talking to each other, trying to ease the tense atmosphere.

Luckily, nothing happened after that.

Under everyone’s continuous attacks, the health of the commander of the divine-fiend guards was slowly reduced to zero.

Zhang Shan saw the right time and controlled the Panda ball to move forward. He used a combo skill and directly blew up the commander of the divine demon guards.

&Lt; system announcement: congratulations to six-barreled Bodhisattva, one little fairy, and Windcloud cannon wangliang for killing the commander of the divine demon guards. &Gt; Achilles.

skill point +1, medal +100.

After the commander of the God-devil army was destroyed ...

Everyone could not help but let out a long breath.

He had finally settled this fellow. He was so f \* cking hard to deal with.

without the commander of the divine fiend guards, the demonic siege cannon chariots would no longer be able to advance.

It could only stop here.

They would no longer have the chance to attack the walls of Fengyun city.

It could be said that this wave of city defense was basically a success.

Feng Yun realm’s wind Cloud City was saved.

Of course, if Feng Yun realm did not have enough gold on him to build the city wall, it would be a different story.

This was clearly impossible.

if they really did not have enough gold coins, feng yun realm would have sent someone back to exchange for gold coins.

In short, this wave was stable.

After today, Feng Yun realm could be his city Lord in peace.

Zhang Shan looked at the time. It was 9:55 in the evening. It was less than five minutes before the event ended.

Although the commander of the divine fiend guards had been defeated, he was still alive.

However, the demonic siege cannon and the godfiend Guard Captain operating it were still alive.

At present, the demonic cannon still had 20% HP left.

As for the captain of the divine demon guards, he had more HP, at about 30%.

There were less than five minutes left until the end of the event. They should still have a chance to defeat these two bosses.

zhang shan said.

turn to the other two bosses. Ranged classes, attack the divine demon guard squad leader. Melee classes, attack the demonic cannon minions. Try to kill these two bosses as well.

“There’s not enough time, there’s only four minutes left.”

how would we know if we don’t fight? we just have to keep attacking.

we have to fight for it. There’s still a real-name BOSS.

“That’s right, isn’t a real-name boss good? wasn’t a divine weapon mold good? Hurry up and call.”

“Alright, you guys are ruthless.”

After the commander of the divine fiend guards fell to the ground, they quickly turned their attacks on the other two bosses.

Actually, to Zhang Shan, the mold for a divine weapon did not matter.

If he wanted to complete the mission of activating divinity, he had to defeat the red boss.

It was a real name boss, and it was also a red boss.

Today, he had already completed ten progress tasks. As long as he could finish these two, he would have completed twelve progress tasks.

Such an opportunity was not so easy to find, so he had to try his best to destroy it.

Zhang Shan looked at the time as he fired nervously.

The remaining two bosses’ HP continued to drop rapidly under their continuous attacks.

There was still more than a minute before the end of the event.

Zhang Shan's spear shot out and turned the demon's siege cannon into ashes.

&Lt; system announcement: congratulations to six-barreled Bodhisattva, heart moves, and wind and cloud blade for successfully killing the demonic siege cannon. &Gt; The formation-breaking general.

Skill point +1, medal +100.

haha, I've taken care of another one. I've quickly defeated the little Captain.

what's the rush? there's still more than a minute. The divine demon Guard's squad leader is just a normal red BOSS. It's not difficult to kill him.

hehe, it's already done anyway. There are two real-name bosses. It doesn't matter if the little Captain can kill them or not.

"Fuck, why are you so generous? I don't even care about the red BOSS."

"Since you're so generous, I'll give you one less share when we distribute the equipment later."

in your dreams. My equipment is so bad, and I don't even have a single divine weapon. You guys actually want me to get one less share? it's too difficult for me.

"Then you should shut up."

After a short while, Zhang Shan fired a shot. The leader of the divine demon guards was also killed by him.

the time was fixed at 9:59 p. m.

Seeing the captain of the divine demon guards fall to the ground, Zhang Shan could not help but heave a sigh of relief.

They could kill all the bosses before the event ended.

There were only a few dozen seconds left before the event ended.

So close.

Other players were trying to defend the city or to obtain items from bosses.

And Zhang Shan was doing it purely to kill the BOSS.

As long as there was a red BOSS for him to fight, even if he did not lose a single hair, he would be very happy.

As long as he could complete the mission, why would he need a bicycle?

After everyone had defeated all the bosses, they would be able to defeat the boss.

The monster siege was coming to an end.

They didn't need to rush back to wind Cloud City.

Everyone stayed where they were, farming monsters, and quietly waiting for the event to end.

Zhang Shan opened the mission panel to take a look.

[activate divinity: kill powerful demons and use their blood to awaken the divinity in the divine weapon.]

[requirement: kill 81 red bosses.]

[mission completion rate: 12/81]

Very good. It was only the first day and he had already completed Twelve Steps.

Although it was mainly because of the monster attack in Fengyun city.

But it was still a good start.

There were still 69 more progress points to go before Zhang Shan could complete the mission. Then, he could look for an Qisheng to help him repair the divine weapon.

Thinking that he could have another divine weapon ring, Zhang Shan could not help but look forward to it.

A divine artifact ring could greatly increase his damage ability.

His current theoretical damage, after adding the damage buff from the priest, was around 140000, not even 150000.

If he could get another divine artifact ring ...

His theoretical damage should be able to break through 200000.

200,000 damage was a little scary just thinking about it. It was even more powerful than an ordinary real name boss.

Zhang Shan kept the mission panel, feeling very happy.

All of a sudden, the dense crowd of demon strongmen around them disappeared.

At the same time, a system notification sounded.

&Lt; system announcement: under the leadership of wind Cloud city's city Lord, wind cloud realm, the human warriors have successfully repelled the demonic Army's attack. &Gt;

From then on, the human race's Fengyun city would stand in the world forever.

Reward: Feng Yun city Lord, Feng Yun realm, all attributes +100.

Chapter 509 I don't want to work hard anymore

The monsters disappeared, and the announcement sounded.

They had finally managed to defend wind Cloud City.

Everyone gathered at the West Gate.

At the same time, Feng Yun realm had teleported from the city Lord's mansion to the West Gate Tower. Everyone asked one after another.

"Boss, how many gold coins did we spend to repair the city walls?"

"A few billion, I think."

"f \* ck, so ruthless? You've spent so many gold coins."

damn it, the players in this game are burning money to build cities.

"Isn't it? From the beginning to the end, we have to spend money everywhere, and it's a lot of money."

"it's so ruthless. i've never seen a game that can suck in so much money."

"Hehe, I'll feel sorry for boss for a second."

At this moment, Windcloud blade ridiculed.

"It's all your fault. You can't even hold back an ordinary demon siege cannon. The demonic cannons on our side were real bosses, but they were all destroyed."

"F \* ck, you hooligan, do you have the right to speak?"

"That's right, what does stalling the demon race's cannon car have to do with you? If it wasn't for the six-barreled boss, you guys wouldn't even be able to drag it out."

if the six-barreled boss is with us, we can also blow up the demon siege cannon.

"Don't argue. Boss, are there any more red packets for this round?"

don't. We didn't manage to defend three sides. The boss spent so much gold to repair the walls. I'm a little embarrassed to snatch the red packets.

"If you're sorry, then don't snatch it."

feng yun realm said.

"There are red packets. How can we not have red packets when we are defending the city? give them out now."

After Feng Yun realm finished speaking, he sent out another 100 million gold in the Guild channel.

haha, I got 3000 gold coins. Boss, you're so powerful.

hehe, I managed to get 10000 gold coins. City Lord, you're amazing.

Suddenly, a certain guild member said affectionately.

I silently opened the red packet and saw a 500000-dollar note. I couldn't believe it was real.

"Fuck, 500000 gold coins? that can't be."

"Let me take a look. If I find you acting like a b \* stard, I'll drag you out and beat you to death."

“F \* ck, this swordsman really got 500000 gold coins.”

“Swordsman, wuwuwu, why did I only get 500 gold coins?”

I only managed to get 100 gold coins. I don't dare to say anything.

a hundred gold coins is too little. It's only enough for fast food.

“100 gold coins is enough. Hurry up and thank me.”

“the city lord is mighty.”

After Feng Yun realm sent out the red packet, the entire Guild channel was filled with joy.

Zhang Shan opened the red packet. One million gold coins.

F \*\* k, seeing the amount of gold coins, even Zhang Shan was a little stunned.

Was his luck today so heaven-defying?

100,000 people fighting for 100 million gold coins in red packets.

He had picked up a million Yuan by himself. This made Zhang Shan feel a little embarrassed.

Zhang Shan did not dare to speak at all, afraid of being rebuked.

I remained silent.

Can't see me, can't see me, sob sob

However, there was a record of everyone snatching red packets together on the Guild channel.

Zhang Shan had snatched a million gold coins in one go, how could others not notice?

“f \* ck, what did i just see? Six-barrel boss got one million gold coins.”

“F \* ck, is that true?”

are you blind? can't you see such a huge amount of gold coins? ”

“Big Boss six-barreled is too much. He's taken away our share of the pie. No wonder I only managed to get 100 gold coins, wuwuwu.”

sigh, I'm not as strong as you, and I can't even compare to your luck. What a sad story.

luck is also a type of strength. Big Boss six-pipe's strength is really strong in all aspects, and even his luck is so heaven-defying.

...

that's a must. If his luck wasn't heaven-defying, would a six-barreled Big Shot be this strong? ”

“I won't say anything else, jealousy has made me unrecognizable.”

sigh, looking at the luck of the six-barreled Big Boss, the 2000 gold coins that I got will instantly be lost.

"If you don't want it, give it to me."

"Get lost," he said.

Zhang Shan had stolen a million gold coins and was quickly discovered by everyone.

This made him feel very awkward.

Of course, it was just embarrassment.

Zhang Shan did not have the thought of redistributing it after snatching too much.

He had snatched the red packet with his own ability, so why did he have to send it out again?

Even though one million gold was not a big deal to Zhang Shan.

...

He didn't lack this bit of money.

When the profits of the demon-suppressing city were good, the teleportation fee for a day might be millions of gold coins.

However, since he had snatched it, he naturally had to keep it.

Today's earnings were not bad.

Not counting the items dropped by the BOSS, just the red packets alone had earned them more than a million.

He felt that it was getting easier and easier to earn money now.

The gold in his game account had already reached 700 million.

He was a rich man.

Of course, that depended on who he was compared to.

If he were to be compared to Feng Yun realm, then he, Zhang Shan, would still be a little brother.

In terms of money, no matter what, he would never be able to compete with Feng Yun realm.

Just for Wind Cloud City.

Feng Yun realm had already invested a huge amount of gold.

From the construction of the city yesterday to the defense of Fengyun city today.

Feng Yun realm's investment in the game had probably exceeded three billion gold coins.

Three billion was a terrifying number.

With such a large amount, it would be a big project no matter where it was.

However, Feng Yun realm had invested so much money just for a city in the game.

Zhang Shan could only say, " this dog is rich, and his spirit is soaring.

Of course, don't be fooled by Feng Yun realm's investment today.

If the New World could continue on ...

It would probably take at most a year for Feng Yun realm to earn back the money.

the potential of wind cloud city was much greater than that of zhang shan's demon suppressing city.

zhang shan's demon-suppressing city might be able to earn a lot of gold coins in the early stages.

however, after another half a year or a year.

As everyone's level increased, the value of the demon-suppressing city would decrease greatly.

In the future, Zhang Shan would probably only be able to earn a small amount of money while guarding the demon-suppressing city. It would not be easy to earn big money.

Of course, even so ...

Zhang Shan would not lose out.

Strictly speaking, the gold that Zhang Shan had invested in the demon-suppressing city had almost been earned back.

In the future, they would be making profits.

Zhang Shan was not a greedy person.

He wasn't like some people who thought that small gains were losses.

.....

After snatching the red packets, everyone's excited mood slowly calmed down.

Zhang Shan passed all the items dropped by the three bosses to Feng Yun realm and let him preside over the distribution.

In any case, the items dropped by the previous bosses were all on Feng Yun realm.

When Zhang Shan was trading the items to Feng Yun realm, he took a quick look.

The items dropped by the boss this time were pretty good.

There were three god weapon molds.

They had killed two real-name bosses and obtained three divine weapon molds. It could be considered a big drop.

However, Zhang Shan did not care about this.

To be honest, even if he was given a mold for a divine weapon, he wouldn't have the time to deal with it.

Zhang Shan still had to complete his mission.

He had to make divine artifacts one by one.

If he wanted to get his hands on the next divine weapon, he would have to at least wait until he finished the task at hand.

The last ring of the sky Eagle King had not been repaired yet.

How would Zhang Shan have the time to get his hands on other divine weapons?

moreover ...

The godly items that were forged from molds were all defensive godly items.

to others, a defensive artifact was still an artifact that could greatly increase their strength.

But to Zhang Shan.

&Nbsp; a defensive divine artifact wouldn't have much of an effect on his strength.

A defensive artifact, other than the special effects on the artifact that Zhang Shan was interested in.

He didn't really care about the attributes added to the divine weapon.

A defensive divine weapon that added so little attribute points was not as good as a few more passive skills.

Of course, it didn't mean that he didn't need to get a defensive artifact.

However, he had to do it step by step. He had to complete the ring quest first.

Feng Yun realm said after receiving the items that Zhang Shan had traded.

the rest of you can go now. The brothers who were fighting outside the West Gate, stay behind and distribute the equipment.

f \* ck, boss, I'm not leaving. Although I didn't fight at the West Gate and didn't get any equipment, I can still take a look.

What are you looking at? don't you feel bad seeing someone else get a divine weapon mold? "

"Even if it's unfair in my heart, I still want to take a look."

"You can look at it if you want, hehe."

The others wanted to stay and watch but Feng Yun realm did not say anything.

He said after displaying all the dropped items in the Guild channel.

"That's all, let's discuss how to split it."

There were many items to be distributed this time.

Zhang Shan and the rest had killed a total of ten bosses outside the West Gate.

Two of them were real-name bosses, while the other eight were red bosses.

All the bosses had dropped a total of 26 red equipment and 10 red materials.

There was also a Guardian's block skill book.

The other items were the three god weapon molds.

Strength-type shoes, agility-type leather armor, and intelligence-type bracers.

There were a total of three pieces, one for each class.

That was all the items. As for how to distribute them, there was indeed a need to talk about it.

Finally, outside the West Gate, there were more than 30000 guild members fighting the BOSS.

It was impossible for so many people to ROLL for it.

There were too many people, and this was simply impossible.

There had to be a distribution procedure so that everyone had no objections.

Wind and cloud blade said.

why don't we follow the old rules and distribute the items according to the damage ranking? whoever gets the items will be given red packets. It's simple like that.

it's easy for you to say. The problem is that we've fought so many bosses this time. How do we calculate the damage ranking? "

"That's right, it's impossible to calculate."

"Then what do you guys think we should do?"

I think we should just auction it. Anyone who participated in the BOSS fight can participate in the auction. We can give everyone a red packet of the gold coins earned from the auction. That's the most convenient way.

"But isn't this too unfair? it's not based on contribution? Big Boss six-eyed has contributed so much, is he going to be like us, relying on luck to get red packets?"

"yeah, some people are just punks. what will they do when they get the big head? This way, it doesn't reflect everyone's contribution to the BOSS."

"Then what do you guys think we should do? Do you have a better distribution plan?"

Actually, Feng Yun realm was also having a headache.

There were many people who participated in the BOSS fight this time, and they had fought ten bosses in total.

In terms of contribution, other than Zhang Shan, it was hard to say for the rest.

You can't say that just because you contributed a lot, others contributed less than you. You have to use data to speak.

In fact, everyone was about the same. Perhaps you could deal more damage than others.

However, it was only a little more.

And there was no evidence.

this was because it would be very troublesome to pull out all the damage rankings.

A total of 10 bosses were defeated.

It's not like we're splitting the items for every monster we kill.

The damage ranking of the ten bosses was not automatically accumulated by the system.

There was no credibility to speak of if one were to calculate by hand.

No matter how they were divided, it didn't feel appropriate.

Feng Yun realm thought for a long time before asking Zhang Shan.

"What did six-man Butler say?"

Zhang Shan replied.

"I don't mind, I'm fine with any distribution."

He didn't lack these items, even if it was a divine weapon mold, it was no exception.

Other people might not even be able to get a divine weapon mold even after half a year.

However, to Zhang Shan, it was not difficult to get a mold for a divine weapon.

If he wanted to, he could still get it.

Only real-name bosses had a high chance of dropping divine weapon molds, and real-name bosses were so rare that they were hard to find.

It wasn't easy to get a mold for a divine weapon.

However, Zhang Shan had the confidence that he could get a mold for a divine weapon.

Just the monthly monster attack event alone was enough.

Aren't there a few real-name bosses there?

he should be able to obtain a divine weapon mold by relying on the monthly monster siege event.

It wasn't easy to get a divine weapon anyway. Even if he got a divine weapon mold, he would have to complete a long task.

Wasn't this a good thing? he could get a divine weapon mold every month.

After that, he started to complete the quest. When he finished forging the divine weapon, the monster siege event would start again next month.

If this cycle continued, he would have something to do.

Besides, other than monster sieges, they would always encounter real-name bosses.

in short, a capable person would never lack equipment.

after hearing zhang shan's words, feng yun realm continued to think for a while before speaking.

"Since it's not appropriate to split it, let's open the auction. Those who win the item, send a red packet on the Guild channel. Count the number of people who participated in the fight against the BOSS outside the West Gate. Give out red packets according to the number of people who fought the BOSS. Those who aren't participating in the BOSS fight outside the West Gate, don't fight for the red packets. Kick out anyone you find."

feng yun realm was helpless as well. it was a little messy this time as the items dropped by the BOSS were not easy to split.

He would just make do with it.

After Feng Yun realm finished, no one had any objections.

or rather, even if he had an opinion, he didn't know what to say.

Because Zhang Shan had not said anything, what else could the others say?

In terms of contribution, who could compare to Zhang Shan?

If Zhang Shan was not there, they would not even be able to get a single hair.

Now that they could participate in the auction and snatch red packets, what else could they say?

After Feng Yun realm was done, he looked at the crowd and saw that no one was speaking so he continued.

"alright, since no one has any objections, we'll do it this way. I'll host the auction now."

Feng Yun realm took out the first item, the purple boots (strength) and said.

the first item is a pair of strength-type shoes. Name your price.

ten million gold coins.

"20 million."

"50 million gold coins, why are you all so gentle? hurry up."

"F \* ck, if you're rich, then you're awesome. I'm not following."

"60 million gold."

sigh, it's just a pair of shoes. There's no need to be so ruthless. 70 million gold coins.

"f \* ck, you win."

When the price of the purple boots (strength) reached 70000000 gold coins, everyone stopped bidding.

Although many people wanted a defensive artifact, the price was already a little high.

Feng Yun realm asked.

“70 million going once, is there anyone who wants to raise the bid?”

“70000,000 gold going twice.” He said.

When Feng Yun realm asked for the second time, heart with me replied.

“80 million gold.”

“F \* ck, big brother heart following, don’t you have a divine weapon mold in your hands and are doing a quest? You still want to snatch this one?”

Everyone was speechless when they saw freewill’s bid.

this big shot was really rich and willful.

Didn’t he have a wrist guard mold and was currently doing a quest?

the mission had just begun, and they were going to bid for the second item? Your family runs a bank, right? you’re so rich.

“I’ll bid for it and keep it for now. I’ll make this one after the wrist guard is done.”

Alright, everyone couldn’t respond to the words ‘your heart moves with me’.

They just had money, so they bought it and saved it first, doing the divine weapon missions one by one.

feng yun realm asked.

“80 million gold going once.”

80000000 gold going twice. If no one raises the bid, this pair of purple boots (strength) will go to you.

“Eighty million gold coins for the third item, sold.”

Feng Yun realm assigned the purple Star Boots (strength) to heart moves.

As for heart with me, after he received the God tool mold, he immediately sent out a red packet of 80 million gold coins on the Guild channel. The number of red packets was 3291.

This time, not all guild members could snatch red packets.

Only those who had participated in the fight for the BOSS outside the West Gate could steal it.

According to the statistics, there were only so many guild members outside the West Gate who had participated in the BOSS fight.

to those normal guild members who had followed zhang shan and fought with bosses, this was a happy occasion.

If they were to distribute the loot normally, the items that the BOSS dropped would definitely have nothing to do with them.

They were just there to play a supporting role, casually dealing damage to the BOSS.

According to the normal distribution plan, they could only get a small red packet at most.

How could it be like now, where he could grab a wave of red packets?

One had to know that only 30000 people were fighting for the 80 million gold coins red packet.

Normally, as long as one's luck wasn't too bad.

Compared to the red envelopes Feng Yun realm sent out previously, they would definitely be able to get more red envelopes this time.

After all, all the Guild members, close to 100000 people, had fought for it together.

this time, the number of people snatching red packets was much lower.

As for the gold coins in the red packet, it was not much less.

This was only the first wave of red packets. There were still two more divine weapon molds that had not been auctioned yet.

everyone could still grab two more waves of red packets.

As for the red equipment and red materials, they were just extra.

Everyone was happily snatching the red packets. The others who were not participating in the fight against the BOSS outside the West City could only be envious. They did not get to snatch the red packets.

Zhang Shan opened the red packet. It was 30000 gold coins.

It was alright.

After the first item was sold, Feng Yun realm took out the purple Myrtle godly armor (agility) and said.

the second item, agility-type leather armor. Anyone who wants it can bid.

"50 million gold coins."

Just as Feng Yun realm finished his sentence, little fairy quickly opened her mouth to bid.

She had been waiting for the divine artifact for a long time.

Little fairy had followed Zhang Shan and fought many bosses.

unfortunately, it had never dropped any of her god-tier items.

This time, it was an agility-type leather armor. Little fairy could not wait any longer.

She hurriedly made the first bid.

"Holy sh \* t, little beauty, don't be so fierce. The starting price is already so high, how are we supposed to follow? 60 million gold coins."

"Seventy million."

“Eighty million.”

“100 million gold coins.”

The little fairy immediately called out a high price of 100 million gold coins.

As a defensive artifact, the price was a bit high.

However, the clothes were different from other defensive equipment.

Clothes were still very important. To rich bosses, a price of 100 million gold coins was acceptable.

When the little fairy called out a bid of 100 million gold coins, no one followed.

Feng Yun realm asked again to confirm.

“100 million gold coins going once.”

“100 million gold going twice.”

“100 million gold going thrice, deal!”

Little goblin took the divine weapon mold from Feng Yun realm’s hands and sent a 100 million Gold Red packet to the Guild channel.

Zhang Shan looked at the little fairy with a strange look.

This girl was a little crazy.

In the past, he really could not tell that this was a rich woman.

the daughter of a real estate agent was terrifying.

He was really a rich man.

the little goblin’s heroic spirit made zhang shan a little reluctant to work hard.

Chapter 510 Fighting a divine beast in the new year

little fairy had won the purple wei godly armor (agility) at the price of 100 million gold.

This kind of heroicism had truly shocked Zhang Shan.

In the past, Zhang Shan already knew that the little fairy was a truly rich person.

However, Zhang Shan was not very clear on how rich she was.

After all, there was a huge difference between the rich.

Financial freedom and a worry-free life was a type of wealth.

spending money like dirt was also a form of wealth.

zhang shan had never thought that the little fairy was such a rich person.

He was a rich man who would throw away hundreds of millions of gold coins for a piece of game equipment.

In the past, Zhang Shan had only seen him in the game.

This was a completely different concept from the people he knew in real life.

Like Feng Yun realm and his gang, Zhang Shan knew that they were rich.

However, Zhang Shan had only interacted with them in the game. In reality, he did not even know them.

Zhang Shan did not even know what they did for a living.

But little fairy was different.

Zhang Shan lived next door to the little demon's house and went to her house every day for free food.

he knew that she was rich, but zhang shan had never thought that this girl was extremely rich.

Would a rich person be able to take out hundreds of millions of gold coins to buy a piece of gaming equipment?

in the game new world, divine artifacts were the best equipment.

However, that was not the case. Just one item was enough.

Not including the Cape, each player could get a total of nine pieces of divine equipment.

If he had to spend money on every divine weapon, wouldn't that cost him nearly one billion gold coins?

this was really not something that ordinary people could afford to play with.

Ever since he had earned money in the game.

Zhang Shan had always felt that he was a rich man.

Although he could not compare to Feng Yun realm and his gang, Feng Yun realm had spent nearly 30 gold coins for wind Cloud City.

the amount of money was a little scary.

However, Zhang Shan had never felt that he would lose to the little demon even after earning so much money.

However, when the little fairy made her move today, Zhang Shan knew that there was still a huge gap between him and her.

The difference was so huge that Zhang Shan did not know how much it was.

Thinking of this, Zhang Shan could not help but shake his head.

If he didn't play games, he wouldn't have known that there were so many rich people in this world.

Sure enough, poverty had limited his imagination.

When the crape myrtle godly armor (agility) was in little fairy's hands.

The last item, the intelligence bracer mold, was also bought by a mage in the Guild for 70 million gold coins.

Next, it was time to auction the other trash items.

More than 20 pieces of red equipment and 10 red materials were quickly bought by others.

compared to the divine weapon mold, these red items were indeed trash.

The highest bid was 10000 to 20000 gold coins, while the lowest bid was only a few thousand gold coins.

after all, no one would be able to use these pieces of equipment for a long time, and they were only red equipment.

To the big shots of guilds, they didn't lack these things.

only normal guild members would bid for it and save it for future use.

On the other hand, the Guardian's blocking skill book had been sold for more than 400000 gold coins.

The blocking skill was indeed very powerful and practical.

Moreover, this skill book did not drop much.

The big shots of the guilds who were guardians and many others had not obtained this skill book.

therefore, the competition was very intense.

A skill book for a minor skill was actually sold for more than 400000 gold coins. This was already a very high price.

Zhang Shan and the rest were happily auctioning off their items and snatching red packets.

The other players in the game were all jealous.

The world Channel:

sigh, the wind and cloud Guild really managed to defend the city. It's amazing.

...

"What's so strange about that? if they can take down a Demon City, they can naturally defend it."

that's not necessarily true. I heard that the demonic monsters attacking the city this time are all level 70 to 80 wild monsters. There are also so many bosses. It's definitely not easy to defend.

"how can that be? feng yun realm has already set up so many arrow towers. no matter how many demon monsters there are, they are nothing more than food to them."

"It can't be that simple. No matter how strong those arrow towers are, they can't possibly kill the BOSS."

that's right. There are so many bosses, and there are even real-name bosses. Just the bosses that the wind and cloud Guild killed alone numbered ten to twenty. How could an ordinary Guild withstand such a number? "

sigh, I'm really envious of the people from the wind and cloud Guild. They killed two real-name bosses again. Doesn't that mean that they'll drop another divine weapon mold? "

that's for sure. After killing two real-name bosses, there will definitely be a divine weapon mold.

"F \* ck, the wind and cloud Guild has already gotten so many divine weapon molds recently. Do they really need that many? Why don't you take it out and sell it?"

"Are you kidding me? who would mind having too many divine artifacts? How could they sell the divine weapon molds that they got?"

that's right. There are so many people in the wind and cloud Guild. No matter how many divine weapons there are, there won't be enough to split. How can there be any more to sell? "

"you can't say that, right? Not everyone can afford to use a divine weapon."

...

" that's right. i heard that it takes a long time just to complete the divine weapon quests. why would those ordinary guild members need a divine weapon mold? "

yes, I heard that during the monster siege event, several guilds obtained a divine weapon mold and are now doing a divine weapon quest. I heard that the quest is very complicated and will take at least half a month to complete it.

"For the sake of the divine weapon, what's the big deal with half a month of missions?"

that's right. For a loser like me, I'm willing to do half a year's worth of missions if you give me a divine weapon mold.

that's Bullsh \* t. If you had a divine weapon mold, you would definitely sell it.

"Haha, you're right. a divine weapon mold could be sold for at least tens of thousands, or even hundreds of millions of gold coins. As long as you sell it, you'll instantly become tall, rich, and handsome. Why the hell would you still want a divine weapon?"

"That's right, isn't real gold and silver fragrant?"

what you're saying gives me the motivation to farm monsters again. Maybe I'll be lucky and a divine weapon mold will drop from killing small monsters. Wouldn't that make me tall, rich, and handsome? "

"in your dreams."

so what if I'm dreaming? I'm afraid there are many people in the game who dream like me, hehe.

"Haha, you're right. One must have dreams. Otherwise, what's the difference between you and a salted fish?"

work hard to farm monsters. I'll never be a salted fish.

“He’s farming monsters for a divine weapon mold.”

After their wind cloud Guild successfully defended wind Cloud City, it attracted all kinds of envy and jealousy from other players.

Not only were they envious of the wind and cloud Guild, but they had also firmly occupied a player’s city.

They were even more envious of them for killing so many bosses during the monster siege.

Especially since they had defeated two bosses with real names.

The players now had a certain obsession with real-name bosses.

This was because killing a real-name BOSS meant that it would drop a divine weapon mold.

With a divine weapon mold, one could forge a divine weapon.

Even though the divine weapon mission was not easy and it would take a long time to forge a divine weapon, it was not easy.

However, no one cared about the complexity of the mission.

For the sake of a divine weapon, what was the big deal with doing some complicated missions?

as long as he had a divine weapon, everything would not be a problem.

Unfortunately, it was too difficult to get a divine weapon mold.

The game was set so that any monster could drop a divine weapon mold.

However, the chances of a divine weapon mold dropping by farming monsters were close to zero.

Basically, no one would have any hope for this.

in the entire game, who knew if there would be one such lucky person in a year.

A divine weapon mold dropped from killing small monsters.

Even a normal red BOSS would rarely drop a divine weapon mold, let alone a small monster.

Zhang Shan and the rest had also been fighting quite a few red bosses recently.

However, normal red bosses did not drop any divine weapon molds.

Normal red bosses only had a small chance of dropping divine weapon molds.

Everyone knew how small it was in the game.

Therefore, if he wanted to get a divine weapon mold and forge a divine weapon, he had to kill the real-name BOSS first.

However, everyone knew how difficult it was to deal with a BOSS with a real name.

The most important problem was that it was too difficult to find a real-name BOSS.

In general monster maps, there were no bosses with real names.

If they wanted to find a real-name BOSS in the wild, they would probably have to rely on luck.

for all players, only during events would a real-name BOSS appear.

However, in new world, there were pitifully few activities.

The only known activity was the monster siege. There were no other activities.

On the other hand, there was only one monster siege event every month. There were only a few real-name bosses that appeared in the event, so there was not enough to go around.

For example, in the previous monster attack, there were only seven real name bosses.

There were so many players in the game, but there were only seven real name bosses. How could there be enough to split?

The wind and cloud Guild led a few other guilds and surrounded the seven real-name bosses.

The others could only watch helplessly.

Recently, the guilds had been sending people to look for real-name bosses.

However, up until now, Zhang Shan had not seen anyone who had defeated a real name BOSS.

Wild real-name bosses were basically the first clear as long as they were defeated.

As long as it was destroyed, a system announcement would appear.

in any case, in this recent period of time, zhang shan had not seen anyone else beat a real-name BOSS.

.....

after distributing all the items, feng yun realm stayed in wind cloud city to make some adjustments.

Zhang Shan and the others dispersed.

Today was the day of the monster attack in wind Cloud City.

Zhang Shan did not get a single item, not even the red-colored materials that were auctioned at the end.

Zhang Shan also did not participate in the bidding.

Although he needed the red-colored material, he didn't want to compete with others.

In any case, red-colored materials could be bought from the auction house when he wanted them.

There was no need for him to compete within the Guild.

Moreover, he didn't lose anything today.

The monster siege event had allowed him to complete ten of his quests.

It saved him a few days of looking for bosses.

In addition, he managed to snatch a total of two million gold coins from all sorts of red packets.

zhang shan's gains today were not small.

it felt like zhang shan had always been very strong in terms of luck.

He had always been lucky in new world.

Even Zhang Shan had an illusion.

i'm afraid he's really the son of games, hehe.

everyone dispersed.

the little fairy said to zhang shan.

brother Butler, i'm going to forge a divine weapon. You and old Wu can go find the BOSS.

"Alright, you can go first."

Zhang Shan also knew that the little fairy was already a little crazy for the divine weapon.

Now that she had obtained the divine weapon mold, she was not in a hurry. It would be strange if she activated the divine weapon mission.

Besides, they didn't need too many people to fight normal red bosses.

It was enough for boss Wu to help him heal.

As for before, he had brought his friends along just to let them hang out.

Now, his other companions were all going to complete the divine weapon mission.

To forge a divine weapon with a divine weapon mold, one had to do many quests to get materials.

These missions were all very time-consuming.

It was much more troublesome than the divine artifact mission items and the mission to repair divine artifacts.

Without half a month's time, he would not be able to complete all those missions.

The others had left, so only he and boss Wu were left.

Zhang Shan brought boss Wu along and wandered around The Map of Heaven's Gate.

Before they went to bed at night, the two of them found another red BOSS.

The mission progress had improved again. The current mission completion rate was 13/81.

Time passed by slowly. Zhang Shan brought boss Wu along. The two of them wandered around The Map of Heaven's Gate.

More than ten days had passed, and his God's activated mission had progressed to 46/81.

They had already completed more than half of the quest, and they were still short of 35 red bosses.

Zhang Shan would be able to find an Qisheng to repair the divine artifact.

In these ten days, if they were lucky, they could defeat five red bosses in a day.

When they were unlucky, the two of them could not even find a red boss.

However, in total, they could still find two to three red bosses on average every day.

The progress of the mission was faster than Zhang Shan had expected.

Apart from the progress of the mission, they had been fighting bosses for more than ten days.

Not only did they find more than 30 red bosses, but the other purple and orange bosses, Zhang Shan and the other two had also fought quite a few.

the various trash items that dropped had earned them quite a bit.

All sorts of miscellaneous items were sold equally by the two of them for more than two million gold coins.

two million gold was nothing to zhang shan, but it was equivalent to a few days 'profit of the demon-suppressing city.

However, to boss Wu, it was a huge sum of money.

Ever since he had entered the game with Zhang Shan, boss Wu had long since gotten rid of the life of a loser.

Their family had moved into the big Villa two days ago.

zhang shan and the little fairy even went to have a meal together.

The current boss Wu could be said to be a little rich.

He followed Zhang Shan around every day to play with bosses. Other than buying a big villa, he should have a few tens of millions in savings.

With money, life would naturally be comfortable.

Their family would no longer have to live a bitter life like before, and they would be happy together.

Boss Wu's wife was even making preparations to find a partner for Zhang Shan.

.....

during this period of time, those who had obtained the divine weapon mold were still doing their quests.

However, no one had managed to forge a divine weapon with a mold.

This was because no one had completed the material collection quest yet.

However, it was only a matter of time before it would be completed. Moving heart and wind and cloud blade were the two whose missions were progressing the fastest.

He estimated that he would be able to complete the task in one or two days.

after that, he would be able to find the corresponding divine craftsman to forge the divine weapon.

on this day, just as zhang shan was bringing boss wu to the map of heaven's gate to look for a BOSS ...

Suddenly, a system notification sounded.

[ system announcement: in order to celebrate the Spring Festival, new world has specially launched the Spring Festival divine beast event. For more details, please check on the official website. ]

Seeing this announcement, Zhang Shan could not help but feel a little depressed.

The new year was tomorrow.

Two days earlier, Zhang Shan had called his parents who were still in the countryside. He did not plan to go back for the new year this year.

His old home was too far away from Pengcheng.

even with the convenience of transportation now, it would take two to three days to go back and forth to his hometown, and there would be all kinds of trouble, which was very inconvenient.

originally, he had planned to bring his parents to pengcheng. after all, he was the only one living in such a big villa, and it would be quite lonely.

But his parents were not used to living in a big city, so Zhang Shan did not force them.

After half a year, when he had settled down in the game, he would go back to his old parents.

In the past, he had a hard time, and he could only go back once a year during the new year.

Although he had earned money now, he really didn't have time recently.

He was undoubtedly the number one player in new world.

But Zhang Shan still did not dare to relax.

Playing games was the same as doing other things. If you don't advance, you will fall behind.

If he went back to his hometown and stayed for more than ten days during the new year, he was afraid that he would be caught up with by others.

Although he could bring the game helmet back with him, he could still log into the game from his hometown in the countryside.

however, if that was the case, why would he go back if he was still playing games every day in his hometown?

It was completely meaningless.

Zhang Shan had already made gaming his career.

He was currently at the peak of his career, so he couldn't relax.

Anyway, he had nothing to do at home. He just wanted to spend time with his old parents. It would not be too late for him to go back after more than half a year when things settled down.

after the system announcement, the entire game was in an uproar.

The world Channel:

haha, the New Year's event is finally out. I thought that new world didn't have any New Year's events.

"how is that possible? as a traditional festival on the blue planet, how could there be no activities during the new year?"

"Damn it, this event is a little too late. It's going to be New Year's tomorrow, but they only made the announcement now. Our Guild's boss has already gone back for New Year's, what a scam."

"so what? going home for the new year doesn't affect your gaming. as long as you're wearing the gaming helmet, you can log in to the game anywhere."

what? our boss is using a gaming pod. He didn't bring such a big thing back. Our boss hasn't been online for the past two days.

haha, why do we need a guild leader for a New Year's event? just play by yourself.

that's true. It's a good thing I didn't go back to my hometown this year.

I'm in my hometown right now, but I've brought the game helmet back. It won't affect my participation in the event, hehe.

what are you guys calling for? the activities are all patented by the big shots. They have nothing to do with us, the street punks.

that's impossible. If the Spring Festival doesn't have the benefits of us, I'll give up.

I don't think so. This event should be a national event. Everyone should be able to benefit.

"why are you talking so much? hurry up and go to the official website to see the announcement."

"Has the announcement on the official website been updated? Tell me the big one."

"It's already been updated."

"I'll go take a look."
