

Physician Wife 1101

Chapter 1101: Not Girlfriend

How did such discordant words sound so pleasant to the ears when Chi Yang was the one who spoke them?

“Then, how did you know that I’m Queen?” Nangong Nuannuan persisted.

After all, even the mercenaries and higher-ups from KE who worked closely with her never saw her real face since she was six years old.

“It was because you wore Spade Q’s mask.”

Nangong Nuannuan, “...”

Seeing that the little girl was speechless, Chi Yang explained, “The picture on Spade Q is Pallas Athena. Meanwhile, the four colors of Q cards each represent a queen. I’ve been dealing with King’s henchmen all the time, how could I not know about Queen?”

“In this world, there’s no such thing as hate without reason, nor is there love without reason. You disguised yourself as Spade Q to help me once. Then, you showed up on Sanji’s plane to help me. Moreover, you have the same figure as my wife. How can I not recognize you?”

When Nuannuan heard this, she misunderstood the main point of Chi Yang’s words and asked with a pout, “Who’s your wife?”

Chi Yang, “...”

Seeing that Nuannuan left him and walked ahead on her own, Chi Yang quickly caught up with her and pulled her into his arms. “Won’t you admit it?”

“Admit what?”

“Admit that you’re my wife!”

“I’m not even 18 yet! What you’re doing is kidnapping a minor!”

“I sent in a report already! Everyone in the military base agrees that we’re a match made in heaven!”

Chi Yang’s words triggered a string of laughter from Nuannuan.

Nuannuan agreed that they were a match made in heaven!

Then, the original playfighting transformed into two people happily flattering each other.

Two long shadows projected onto the ground. They leaned against each other and slowly moved forward.

A woman in a military uniform approached Chi Yang. Just as anyone would expect her to greet Chi Yang with a “Commander”, she smiled and said, “Big Brother Chi, I heard from some crude men that you brought a girlfriend to the special forces unit, so I came to take a look.”

Nuannuan scrutinized the woman in front of her. The woman had a pretty face and a slender figure. Her height was about the same as Nuannuan's, but her body was slightly more muscular.

Nuannuan could sense obvious hostility from the woman.

After all, Nuannuan could always smell a love rival.

This person was using her as an excuse to get closer to her man and she did not even grant Nuannuan a second glance. It was obvious that she pretended Nuannuan did not exist, or perhaps, like Ling Pinyuan back then, she did not treat Nuannuan as a threat at all.

Could it be that Nuannuan really made Big Brother Chi Yang suffer in her previous life by making him chase away so many of her love rivals that she had to be a professional fly swatter in this life?

Forget it. For her Big Brother Chi Yang, swatting a fly was nothing. She would not be afraid even if she had to kill a dragon!

Just as she was about to snap, Chi Yang held Nuannuan's hand.

Nuannuan, "... " Chi Yang had always been unhappy that she never got jealous, had he not? Yet, why was it that every time she was about to swat some flies, he would beat her to it?

Chi Yang's gentle expression that was reserved only for Nuannuan instantly turned serious and stoic when Chi Yang heard the woman's voice. Chi Yang introduced Nuannuan to the woman with utmost seriousness, "This isn't my girlfriend. This is my fiancée, your commander's future wife. Since you've already heard of her, you should know how to address her. As your superior, I order you to maintain proper respect for my fiancée."

This was an ultimate facesmack!

As the daughter of a second-tier wealthy family, Hong Feixu risked her life to join Eagle just for Chi Yang's sake.

Chapter 1102: Prince

Initially, Hong Feixu was convinced nothing could be more convenient for her compared to the other rich young ladies since she was the closest to Big Brother Chi Yang. Hence, she was sure that Big Brother Chi Yang would either choose not to marry anyone for the rest of his life, or if he must marry a woman, that woman would be her.

In the special forces, Hong Feixu had always carried herself as Chi Yang's fiancée. With the old marshal constantly urging Chi Yang to marry, she thought that Chi Yang would definitely end up being her man if she just held on for another year.

Little did she know that there would be a bolt out of the blue today—that Chi Yang brought a woman to the special forces.

She did not believe it, so she ran over to take a look.

Yet, all she noticed was how Chi Yang, the laconic man who often avoided getting close to women, was capable of looking gentle while walking hand in hand with a woman. He even smiled at her from time to time.

Hong Feixu's jealousy blinded her eyes.

She was well aware that the best thing for her to do right now was to avoid stirring trouble and make a long-term plan.

Yet, she could not help herself!

She was already 27 years old! Meanwhile, this man was the man she had her eyes on at the Pei family's banquet since she was 8 years old.

Only such a man was worthy of her, Hong Feixu.

Therefore, she had always been watching over him and protecting him silently. He joined the army, and so did she.

He achieved great feats. Although there was a huge gap between their strengths, she still managed to get herself into Eagle, did she not?

She waited for him for 19 years. At long last, when she was about to see the fruits of her labor ripen, another woman took it away from her. How could she accept that?

How her heart bled at the thought. Yet, nobody understood Chi Yang the way Hong Feixu had after observing him for 19 years.

Therefore, to avoid letting this man continue hating her like she was a villain, Hong Feixu decisively gave up being hostile and saluted Nangong Nuannuan. "Greetings, Mrs. Commander!"

Since the woman had already been humiliated and she called Nuannuan Mrs. Commander, Nuannuan still nodded slightly on account of Big Brother Chi Yang although she was still displeased at this woman internally.

Looking at Nangong Nuannuan's arrogant look, Hong Feixu's anger inflated so rapidly that she could barely suppress it. She did not want to expose her ugly face in front of Chi Yang, so she said, "If you don't have any special instructions for me, sir, I shall take my leave now."

It was as if she had come to see the commander's wife out of kind curiosity, but the Commander yelled at her.

Hong Feixu only wanted Chi Yang to feel guilty toward her.

After saying that, she resolutely left.

At this moment, she really hoped that Chi Yang would call out at her, saying, "Wait a moment." Then, she would pretend to be stubborn and stay behind.

However, she was wrong.

Hong Feixu only stopped when he could no longer sense Chi Yang's presence. She turned around to look behind her, but Chi Yang and Nangong Nuannuan were nowhere to be seen.

Hong Feixu, "...!!!"

This could not do. She must tell her mother about this.

The old marshal only wanted Big Brother Chi Yang to marry a wife. He did not have set any prerequisite for whoever became Chi Yang's wife. If the old marshal were to find out that Big Brother Chi Yang already had a girlfriend, then her 19 years of dreams would most likely be crushed.

Therefore, Hong Feixu immediately called the Hong family and explained this matter. Then, she asked the Hong family to investigate Chi Yang's girlfriend.

The Hong family was also very hostile towards Nangong Nuannuan, this troublemaker who popped out of nowhere.

Once the Hong family got their hands on the prince of the military world, then that would be the day when the lowly pheasants rose like phoenixes.

Chapter 1103: Get Along

Moreover, based on the president's trust in the Chi family and his support for the military financial expenditures every year—especially in Eagle—anyone could tell how important the Chi family was.

For such a man to come so close to becoming the Hong family's son-in-law, how could someone else beat them to it?

After the Hong family received Hong Feixu's call, they spared no effort in asking around.

They knew that Chi Yang had been previously sent to Jiang District, so they immediately called someone in Jiang District to ask about the situation.

However, there were not many people in Jiang District who knew about Chi Yang. Even if they did, there were not many who knew about Nangong Nuannuan's true identity. Those who knew were all from the upper echelons—they knew all about Chi Yang and Nangong Nuannuan's incredible identities that could blow up the universe.

Simultaneously, the same group of people received orders that they were not allowed to privately pass on the knowledge of the Nangong family's little princess' identity.

Who could afford to offend the Nangong family?

Therefore, the Hong family could only obtain some information about Nangong Nuannuan from testing whatever little water there was.

Even those gossip entertainment and tabloid companies did not care to assert control over those who made inaccurate reports, so one could only imagine how far-fetched the information the Hong Family received was.

In the end, the information that the Hong family could provide Hong Feixu was that Chi Yang's girlfriend was called Zhong Nuannuan. She was kidnapped by human traffickers at the age of three and returned home at the age of 17.

However, this woman was a classic example of someone with a strong will to live yet she would bring calamity to everyone around her.

After getting abducted when she was three years old, the Zhong family became a powerful family in Jiang District. When she returned to the Zhong family at 17, Cloud Group was seized, her parents were arrested, and her elder sister went to Emperor District. It was said that the sister suffered a tragic ending. After getting rejected by a wealthy family, she had a miscarriage.

Hong Feixu could not believe her ears.

"Mom, why would Big Brother Chi Yang accept such a person? Is he nuts?"

Madam Hong's cold harrumph came from the other end of the phone. "The Chi family has decided to wither away. Now, other than Old Master, Chi Yang's the only bud left in the family. Old Master Chi wants Chi Yang to get married so badly because he wants the Chi family to have more descendants, not because he wants the Chi family to be completely wiped out."

"Mom, then what should I do now? I don't want to speak ill of Big Brother Chi Yang in front of the old marshal. The old marshal is such a smart old man. Even if he doesn't accept Zhong Nuannuan, he'll consider me too."

"How about this? Mom found out that this Zhong Nuannuan came to Emperor District because she won first place in the joint examination in Jiang District. She came here for training and is about to go to Yamato to participate in a competition. Therefore, we don't have to alarm Chi Yang first. For a rich daughter from a backward city like that, we can send her off with 10 million bucks."

However, there was silence on the other end.

Hong Feixu said, "Why should we give her 10 million? What's the difference between giving her 10 million and a million for a country bumpkin like her?"

"Xu'er, what's wrong with you? Don't you usually carry yourself well in front of Chi Yang? Chi Yang is such an outstanding man. How is it possible for him to not be surrounded by women in the future? If a woman like this can threaten you into losing your resolve, then how are you going to stand by his side in the future?"

Hong Feixu returned to her senses as well. She secretly despised her fragile mental strength and replied, "Mom, I understand. I'll get along with Big Brother Chi Yang."

"That's right. You should visit the old marshal during the weekend."

"Okay."

Nangong Nuannuan was not aware that she had once again been treated as a country bumpkin. She was also unaware that this person not only treated her as a country bumpkin but also wanted to steal her sweet pumpkin.

Chapter 1104: Do Not Catch Her

At this moment, Nuannuan and Chi Yang returned to the prison where Scorpion was locked up.

Scorpion was already tortured to the point of breathing his last.

"How is it? Did he say anything?"

"Commander, this person is a tough nut to crack. We've tried everything we could, but he still refused to tell us anything. It's truly rare for someone to be so loyal to their organization nowadays."

Nangong Nuannuan smiled. "I'm afraid this loyalty isn't reserved for his organization, but for the person he loves."

"If physical torture can't break him, give him a neurotic drug."

"Yes, sir."

"Chi Yang, you're shameless!"

"Oh?" Chi Yang laughed coldly. "So, you guys are on your high horses?"

Scorpion struggled with all his might, but he could not move at all. He could only watch as Chi Yang's men injected the neurotoxin into his body.

Soon, Scorpion's consciousness started to blur.

Chi Yang came before him and asked Scorpion, "What's your name?"

There was still struggle in Scorpion's eyes, but his mouth slowly pronounced his name, "Eric."

"How long have you been in KE?"

"5... 5 years old."

"What's your status in KE now?"

"..." Scorpion hesitated for a long time before saying, "Viper... Viper's subordinate. Higher management."

"Who's Viper? Where is she now?"

At the mention of Viper, a strong struggle appeared in Scorpion's eyes. This time, he did not say anything and cried out in pain.

"Alright, let's not talk about Viper. Tell me about King. Who is he? Where is he now?"

"King, I don't know. I... haven't seen his real face."

Chi Yang and Nuannuan looked at each other. They had finally caught Scorpion, but it seemed like he was utterly useless!

Suddenly, Nuannuan's phone rang.

When Scorpion heard the sudden ring, he quickly regained some of his senses. They could not reuse this neurotoxin on him anymore.

Seeing that it was Dan Qi, Nuannuan picked up the phone and asked, "Any leads?"

"Big Sis, we've found Viper."

"Where?"

"She's..."

After Dan Qi finished speaking, Nuannuan hung up.

"Big Brother Chi Yang, we've already tracked down Viper. She's in Emperor District."

Nuannuan's words sent Scorpion's eyes widening abruptly, and he was suddenly very agitated.

"You're not allowed to catch her! I won't allow you to catch her! If you dare to catch her, I'll destroy your whole family!"

However, no matter how much Scorpion howled, he did not get any response from Nuannuan nor Chi Yang.

If they could catch Viper, why would they care about Scorpion?

Chi Yang immediately called Ning Wenhao and ordered him to gather 20 elite Eagle members.

In less than five minutes, 20 members of Eagle Special Forces had gathered at the base of the headquarters. Chi Yang led Nuannuan to a car while the remaining 20 members of Eagle Special Forces boarded four cars respectively. Then, they quickly headed to the place where Dan Qi arranged to meet them.

This was a remote village 200 kilometers from the outskirts of Emperor District. The entire village was located in a mountain.

Due to weak reception, Dan Qi's tracker disappeared once they reached this place.

To avoid alerting the enemy, Chi Yang, Nuannuan, and the others walked into the mountain.

It was already nine o'clock at night.

The temperature in the mountains had reached -17 °C, and it was snowing heavily.

The group walked to the outside of the village. Chi Yang asked the members from Eagle Special Forces to stand guard outside and wait for reinforcements. Then, he followed Nuannuan, Aiden, Selina, Dan Qi, and Ning Wenhao inside.

Chapter 1105: Headshots

It was already dark outside the village. Smoke curled up from the chimneys in the houses not far away, making them look no different from ordinary houses.

However, Nuannuan and the rest of the crew were frowning.

As highest-ranked mercenaries, they were very sensitive to danger.

Everything looked normal here—it was no different than any other typical farming village.

Yet...

At this point of the day, there should be sounds of shows playing on the television, or family playing cards and drinking together after a long day of work, should it not?

They passed by a house, and it was quiet inside.

After passing by a second house, it was still quiet.

.

Suddenly, about thirty meters ahead, a door to someone's house opened. A man walked out to place some things outside when he noticed Chi Yang and the others.

The man was stunned for a moment before he asked Chi Yang, "Who are you? What are you doing in our village so late at night?"

Chi Yang was about to speak when Nuannuan raised the gun in her hand. With a ringing gunshot, she fired at the man without hesitation.

Chi Yang was stunned. At that moment, the doors to various other families suddenly opened, and a woman's crying voice came from the dead man's house. "God damn it! What in the world are you doing so blatantly? Someone, call the police!"

"Sis Gui's man just got killed!"

"Who are you people?"

"Quickly, call the police!"

"Get the reporters here!"

The villagers were furious. They raised their mallets and hammers as they surrounded Nuannuan and the group of people, looking like a bunch of law-abiding citizens.

However, Nuannuan merely sneered coldly and aimed at another one of their foreheads before firing her gun.

The villagers, "..."

Then, Nuannuan followed up with a third shot!

Fourth shot!

Initially, these killers pretended to be kind and ignorant villagers who were angered by the sudden violence in front of Chi Yang and the others. They tried to get the people from the military base to split up and ask around. This way, the killers could pick them off one by one and catch them off guard.

Who knew...

Nuannuan did not play by the rules at all. She picked up her gun and started to kill—each shot was a fatal blow too.

They were all people who had been experimented on, thus they were not afraid of pain. As long as their fatal spot remained intact, they would not die. After all, their bodies possessed amazing regenerative skills that far exceeded a normal human being's.

However, this woman's every shot was aimed directly at the center of their foreheads. Her shot would kill the bugs in their heads too. What was there left to do?

After four people died, all the 'villagers' lost their cool. They took out their guns from their bags.

They were fast, but none among Selina, and the rest were simpletons.

She had already seen the bugged people and knew that they were difficult to kill, so Selina, Aiden, Dan Qi, Chi Yang, and Ning Wenhao all opened fire at their foreheads.

If you wondered why Ning Wenhao also started firing at them without questions asked, that was because he was unconditionally loyal to Chi Yang. Since Chi Yang killed without hesitation, he had no reason to hesitate either.

As more and more villagers surrounded them, Chi Yang relayed an order to the members of Eagle Special Forces waiting outside through the Bluetooth walkie-talkie. "Kill on sight. You must target them with a bullet in the head or they won't die."

This was actually one of the laboratories where they carried out human experiments. The people here were all people who went through the experiments.

When calamity came, if any of the bugged people dared to retreat or reveal any secrets of the organization, they would be killed by the bug in their brains so long as the desire even popped up in their heads.

Even though these people went through the experiments, they could tell that they would need a few more years of training before they could match up to this group of outsiders.

Chapter 1106: Surging Emotions

Since the bugged people could not compare to even a soldier from the special forces, they were definitely unable to top Nuannuan or Chi Yang as they both possessed supernatural abilities.

With Chi Yang's subordinates joining in the fight, Nuannuan and Chi Yang quickly ran into the village with Dan Qi. Aiden and Selina helped cover for the three of them.

As this was their research base, the houses in the village leaned against each other in tight spaces.

With the people at the front of the line already fighting, even those who lived at the back of the village could hear the gunshots before anyone could inform them of the invasion. Therefore, when Nuannuan, Chi Yang, and the rest of them rushed in, more and more of their enemies rushed out.

Nuannuan activated her X-ray vision the whole time, hence before those people could rush out or get close to her, she had already sent over a bomb as a visiting present.

Even though there were two to three hundred people in the village—possessing absolute advantage in numbers—death was their only outcome when going up against Nuannuan.

On the other hand, Dan Qi investigated the geography of this area through the satellite while defending against those people.

They were currently on a large mountain with relatively flat terrain for the lower part of the mountain village. Once they were halfway up the mountain, the path upward would be difficult and steep.

This was the perfect cover for a laboratory.

Conducting experiments required a very small space to execute. Even though Nuannuan had X-ray vision, it was hard to detect the laboratory.

Therefore, at this time, she could only rely on Dan Qi.

“Found it! Head east!”

Hearing, Nuannuan led the way with her X-ray vision, while Dan Qi followed after her and manipulated his computer at the same time. Chi Yang, Aiden, and Selina surrounded Dan Qi in the middle protectively, allowing him to focus on the computer.

The people in the village were a motley crew, but the person who could control these people was not someone to be underestimated.

Aiden, Selina, and Dan Qi aside, even Nuannuan was overwhelmed by her surging emotions.

They had been in KE for so many years. From the day they joined KE, they wanted to destroy it. Eventually, they spent more than ten years to achieve that. However, cruel reality told them that they merely destroyed a fake KE.

How embarrassing!

Life was definitely threatening them like plucking the fur off a bunch of tigers.

Therefore, finding Viper and the real King, then eliminating KE was not just something that Camino’s military desperately wanted to do, but that was also what Nuannuan and her gang desperately needed.

This mountain was 1500 meters high and the laboratory was located a quarter of the distance between half of the mountain and the mountain top.

That meant they still had to climb the mountain.

Along the way, Nuannuan’s lips were tightly pursed.

The main purpose of her invasion today was not to destroy the laboratory but to find Viper. Even if she could not capture Viper alive, she swore to kill Viper.

In her previous life, this woman colluded with Jiang Shuwan and told Jiang Shuwan to trick Nuannuan into drinking a colorless and odorless drug when Nuannuan’s guard was down, rendering Nuannuan

unconscious. Jiang Shuwan then injected Nuannuan with a drug that shrank her muscles. In that situation, Nuannuan possessed great supernatural abilities, yet with no possibility of using them.

After that, Viper made Chi Yang rescue Nuannuan alone. Viper had 500 bugged people under her command, which was equivalent to sending 500 top-notch mercenaries to fight Chi Yang.

That eventually led to their deaths in the forest somewhere less than two kilometers away from the borders.

Nuannuan must have her revenge in this life.

If she did not kill Viper...

Kill Viper ruthlessly...

Then, she did not deserve to be called Nangong Nuannuan!

Suddenly, Nuannuan raised her hand and fired a shot into the forest before shouting, "Be careful!"

Chapter 1107: Were You Experimented On Too?

Nuannuan blew up the head of another person who was about to rush forward.

However, the moment his head was blown off, another two suddenly jumped out from their left and right and showered a rain of bullets onto Nuannuan and her crew.

While dodging the bullets, they also counterattacked.

However, this group of people was different from the bugged people in the village below the mountain. The second they attacked, Nuannuan and her crew knew that these people underwent strict training.

For them to have undergone strict training, they were much stronger and tougher. They were initially mercenaries with some sort of ranking. After being experimented on, they were no longer afraid of being hurt or feeling pain. They could heal much faster than before with stronger abilities than before.

If the person was only a Rank-2A mercenary before going through the experiment, then they would definitely become a Rank-3S mercenary post-experiment.

Although they might not reach the peak of their abilities, they were nearly there.

Aiden and Selina fired several shots at the two who jumped out of nowhere, but the bullets did not seem to be able to hit their enemies' vitals. Their enemies were simply too fast.

Although the duo could not hurt any of them, Aiden and Selina were still shocked.

Damnit, Aiden and Selina were two of the top 10 mercenaries in the world!

When they were at KE, they were so powerful that no words could describe them!

However, the source of their glorious pride was nearly taken over by a random swarm of pests. Nobody knew where these stink bugs came from. After a mere surgery, they acted like they could pretend to be dragons that deserved to soar into the skies.

How dare they?!

Seeing this, Nuannuan shot one of the duo dead.

The duo might be fast, but they were still too far from Nuannuan's standards.

To her, who had leveled up her supernatural ability, everyone moved in slow motion.

To Chi Yang, even though the duo was fast—so fast that he could not aim at them and blow their heads off—he had other ways to deal with them.

Just as Nuannuan was about to give the other person a fatal shot, a tree branch fell from the top of the man's head and pierced through his head, reaching into his throat.

Aiden, "..."

Selina, "..."

Dan Qi, "..."

The three of them shifted their gaze at Nangong Nuannuan. All three pairs of eyes were saying the same thing.

'Big Boss, Big Boss, did you see that? Bro-in-law isn't human!'

However, these three were the people that Nuannuan trusted the most, and so was Chi Yang. Therefore, Nuannuan often put on her vulnerable and clumsy side in front of them.

Chi Yang thought that since his wife trusted these three so much that their lives were intertwined with each other, Chi Yang thought that it was fine to expose his supernatural ability.

Yet, Nuannuan should provide an explanation for the sudden demonstration of power!

However, Nuannuan forgot that these three were not aware that Big Brother Chi Yang had a supernatural ability. Thus, when she saw the tree branch crashing down, she had already got up to her feet.

When the man died, Nuannuan had already walked forward, leaving behind the confused three who could do nothing but follow after her lead in silence.

Finally, the youngest Dan Qi could not hold it in anymore.

"Bro-in-law, are you the reason Sis Nuannuan hates Viper so much? Were you experimented on too? Yet, why won't you die since you're trying to capture Viper too? Is it because Sis Nuannuan helped you control the bug in your brain?"

Hearing Dan Qi's question, Nuannuan finally reacted.

She looked at Chi Yang gratefully.

Big Brother Chi Yang mentioned before that they must not let anyone know their secret, especially if they were not very close and trustworthy.

Chapter 1108: Fate

However, Chi Yang revealed this secret to her friends on his own initiative today.

Nuannuan knew what Chi Yang meant—anyone of Nuannuan’s friends who was granted her utmost trust, he would treat them with the same amount of trust too.

Chi Yang was aware that although these people were never serious about their work and acted like teenagers with a delusion of grandeur, they were once powerful, top-ranking mercenaries.

In receiving Chi Yang’s act of kindness, Nuannuan glanced at the man, who looked at her dotingly, and gave her friends a blunt explanation.

“Those bugged people are so low-class. How can they compare to your brilliant Bro-in-law? Your Bro-in-law has his own supernatural ability.”

All three of them, “...!!!”

So overpowering! So jealous!

Other than thinking about that, the three of them also realized how nice their brother-in-law was!

He clearly knew what kind of profession they were in, but he was brave enough to show them his trump card.

The three of them were dealt a heavy blow. Along the way, whenever they encountered bugged mercenaries that suddenly appeared, they would immediately rush up and give them a fatal blow to the best of their abilities.

Even though the crowd all died in their hands, everyone could not help feeling spooked the longer they fought.

That was because they recognized some of the mercenaries here.

They were their childhood rivals.

Not all of their opponents would die after losing. Those who were lucky enough to survive were usually heavily injured. Even though they did not die, everyone expected the losers to be abandoned or killed by the organization. They now knew it was not true.

They bumped into those they thought were dead tonight.

These people were filled with nothing but hatred toward Aiden and the others.

This was because if Aiden and the others had not won back then, they would not have ended up with severe injuries and become low-ranking assassins with no authority in the organization.

They lived like street rats and stared as Aiden and the others thrived by building their own business empire around the world. Aiden even became one of the most valuable golden bachelors in the world. He lived a life so dazzling and eye-catching that they wanted to ruin him for good.

Now that the chance had finally presented itself, these people utilized the cheat that they were granted as bugged people—it was time to fight Aiden and the others.

The closer the group got to the laboratory, the more bugged mercenaries rushed out.

However, no matter how malicious these people were and how much they wanted to use their current strength to kill Aiden and the rest, they were still powerless. Born with a natural talent in this aspect, Aiden, Dan Qi, and Selina used to be able to one-hit KO these opponents. Although they were unable to defeat them with a single hit now, Aiden, Selina, and Dan Qi remained unscathed. Their opponents were once losers, and they would still be.

After the trio had dealt with all of their opponents, Nuannuan looked at them and said, "Did you see that? Although they possess mysterious powers stronger than yours, they aren't terrifying. No matter how powerful they are, they don't have your combat experience! Moreover, I've always felt that professionalism is dependent on fate. If you're not fated to thrive in this profession, you should find another path and not end up hanging yourself up the tree you climb."

Hearing Nangong Nuannuan's words, a bugged mercenary looked at her indignantly in his final breath.

So, did this mean that no matter how hard they worked, no matter how humble they were, they would forever be inferior to this group of extremely talented people?

Finally, Nuannuan and her crew closed in on the laboratory. Without Seville, the hacker that was the closest thing to an opponent to Dan Qi, the remaining hackers in KE were at Nuannuan's level at most.

Chapter 1109: There Is A Bomb

To others, Nuannuan's hacking skills might be impressive, but to Dan Qi, it was just above average.

Although Sis Nuannuan and Bro-in-law did not do much along the way and allowed the three of them to train, Dan Qi managed to hack the satellites above their heads and blocked all the networks in this mountain range. He did destroy two of his tablets, though.

The reason why they kept getting ambushed earlier was that their enemy guided their people through the network. The satellites accurately located Nuannuan and her crew. That was how they managed to detect the directions Nuannuan and the others were moving toward.

Now that Dan Qi blocked their enemies, their enemies would not know their exact location.

"Find everyone nearby."

After discovering the laboratory, Nuannuan expected Viper, in all of her blatant arrogance in the past life, would come out and fight Nuannuan.

However, things had taken a complete turn from what happened between Nuannuan and Viper in the past. Nuannuan had already come knocking on Viper's door to destroy her laboratories, but Viper was still nowhere to be seen.

It was as if Viper was not even here.

If not for the fact that Dan Qi had been tracking Viper from the beginning, Nuannuan would be convinced that Viper was not actually here.

Dan Qi knew who Nuannuan had in mind when she gave that order. With just a tap on his Enter key, a 3D rendition of the entire mountain appeared on his screen.

He exposed all the bugged mercenaries hidden on the mountain—no blind spots were left unturned.

“Since we don’t know where she is, we’ll kill everyone here. She’ll come out eventually.”

“Yes, Big Boss.”

Nuannuan thought for a moment and changed her order. “It’s best to leave five captives alive.”

“Yes, Big Boss.”

When it came to Nuannuan’s orders, the three of them would obey her without question.

Without the strong leadership that Nuannuan once led them with, none of them would have been able to leave KE and live under the sun no matter how strong they were.

Therefore, to these people, Nuannuan’s words would always be as powerful as an imperial edict.

After their arrival, Eagle had the entire mountain surrounded.

Other than the 20 elite special forces soldiers who came with them at the beginning, there were more than 2000 special forces soldiers stationed at the foot of the mountain. This time, it would not be easy for Viper to escape.

However, Nuannuan did not underestimate her enemies either. After all, Nuannuan had been clueless of Viper’s existence even though she stayed in KE for so long. Moreover, Viper was the only person who could lead them to the real King. At the same time, Viper was the presence that had lurked around them in Nuannuan’s past life before ending them. How could Nuannuan possibly underestimate such a person?

Therefore, Chi Yang and Nuannuan stood guard at the entrance of the laboratory, holding the tablet that Dan Qi had given her. Meanwhile, Dan Qi, Selina, and Aiden went in to kill those people one by one to accrue combat experience.

“Nuannuan, is there a bomb in the laboratory?” Chi Yang suddenly asked.

Nuannuan was stunned. “How did you know?”

At this point, Nuannuan was simply being habitually stupid around Chi Yang.

Chi Yang patted Nuannuan’s head. “You’ve always wanted to know what those bugs were used for. Now that you’ve arrived at the research facility, you haven’t gone in. So, I’m guessing that there might be something inside.”

Nuannuan nodded. Tiptoeing, she whispered into Chi Yang’s ear, “Viper should be around us because I noticed that the laboratory is surrounded by remote-controlled bombs. Even if she’s not watching us, someone more powerful must be watching us. We must be careful.”

A glint of coldness flashed across Chi Yang’s eyes.

He did not detect anything either.

Moreover...

At their current location, the computer screen did not display anyone else's presence. Everyone was currently fighting the trio.

Chapter 1110: Move

Chi Yang looked at Nuannuan, and Nuannuan looked back at Chi Yang. There was no need to say anything.

Aiden's gunshots at the foot of the mountain rang continuously that even those who remained at the laboratory could sense the intensity of his battles.

However, Nuannuan and Chi Yang remained as still as statues.

They were neither too close to the laboratory nor too far away.

After waiting outside the laboratory for a long time and not seeing Nuannuan and Chi Yang enter the laboratory, the patience to capture both of them started to dissipate.

Knowing that the battle was nearing its end, the chance of her escaping would be greatly reduced when more people started to surround this place.

Viper cursed in her heart. Exerting strength in her hand, she detonated all the bombs in the laboratory.

Many bombs had long been installed inside the laboratory due to the fear that this place would be discovered and the content of their experiments would be leaked. If that happened, it would shock the world and cause mass panic. Therefore, many bombs were placed inside each laboratory.

Once detonated, the bombs would destroy everything inside the laboratory.

Taking advantage of the loud explosion from the laboratory, Viper decided to spare Chi Yang and Nangong Nuannuan's lives before turning around to run.

Nuannuan was long done with her analysis of everything in the laboratory, including the model of the bombs that were meant to be detonated. The power of these bombs stacked together, coupled with the obstruction by the mountain and the thick iron door located at the entrance of the caves, the possible range of the explosion, and whether the location she and Chi Yang stood could withstand the power of the explosion without collapsing...

Everything was within Nuannuan's calculations.

Therefore, when the earth-shattering explosion caught Aiden and the other two by surprise, they could not help getting distracted. Selina, especially, had been so distracted by her worrying for Nangong Nuannuan's safety that she got shot.

The shot did not hit her bulletproof vest, but on her left arm where the vest did not cover.

Selina, "..."

Seeing Selina injured, Aiden and Dan Qi were furious.

Initially, when they were surrounded by so many bugged mercenaries, they could still handle the situation with ease without getting injured. Now, all their pent-up anger and rage exploded like a volcano.

On this side of the cliff, Nuannuan and Chi Yang did not even budge when the explosion happened.

Both of them unleashed their senses to the limit.

At this moment, about 15 meters away from where they stood, they heard the sound of branches being crushed under someone's foot.

Even though the sound was very soft and was completely drowned out by the explosion, Chi Yang still managed to detect Viper's noise.

The two of them did not move at all. With a wave of Chi Yang's hand, more than ten tree branches jutted out from all directions toward the center of the commotion.

The tree branches might not look powerful enough to deal a blow, but under Chi Yang's control, they carried a deadly force that was enough to end someone's life.

Viper was shocked.

Thankfully, there was an escape route where she stood, so when the branches flew at her, Viper quickly rolled on the ground and escaped in another direction.

However, even if she managed to practice ninjutsu to the extreme, could she be as light as the wind?

Even the wind would leave a trace as it blew, let alone a human.

In addition, Chi Yang and Nuannuan were super soldiers and super mercenaries who received strict training since they were young. How could anything that left a greater trace than the wind escape their eyes?
