

Physician Wife 1681

Chapter 1681 Reinforcing and Counteracting Each Other

An hour later, the bacteria were still very active, and there was no chemical agent that could do anything to them. Nuannuan unhurriedly added and decreased the various chemical agents, bringing the power of each chemical agent into full play. Although such things might have side effects when used on patients, Nuannuan felt that Ning Wenhao should first eliminate the bacteria in his body, and only after that should she begin to control the side effects of the powerful drugs that were being used to eliminate bacteria in his body.

After adding some chemicals to the 15 drugs, all of them were working at full power. Nuannuan dripped the drugs into the 15 test tubes in turn.

Because she would need to wait for an hour for the drugs to take effect, Nuannuan had to mix more advanced chemicals while waiting.

These chemicals were mixed and matched with the 15 of the most lethal medicines she had in her possession. Some concoctions used two or three chemicals, others six and seven, and some even ten.

During the process of mixing each medicine, she made some chemical combinations like additions and subtractions. Each combination was very complicated. However, Nuannuan did not even need to keep a record of everything she was doing. She did it all smoothly and methodically.

An hour later, she had already concocted seven more compound-type drugs.

Looking at the bacteria still active in the 15 test tubes, Nuannuan could not help but laugh coldly.

If her friends were here, they would definitely be able to see that Nuannuan was reacting to something

Nuannuan only believed in one thing

Everything in the world had its counter. As long as there was a disease, there would be medicine for it. As long as there was a poison, there would be an antidote. Nothing could exist independently. If there was something, there would definitely be something else to counteract it.

Therefore, if these people could develop this kind of bacteria, she would definitely be able to find a medicine that countered them.

She dripped the seven chemicals she had just developed into different test tubes. After the timer was set, Nuannuan continued to research other compound chemicals.

After she developed another six chemicals, her second uncle came in to ask her to eat.

After storing the chemicals, Nuannuan observed the seven test tubes that still showed no changes and went downstairs for dinner.

When the Nangong family heard that Nuannuan was coming by, they all actually came back for dinner.

However, when they heard that Nuannuan was researching a medicine to save Ning Wenhao, even Lil Sun and Lil Ling'er, who had not seen their aunt for a few days after school, obediently did not disturb her. After dinner, Nuannuan went to the deputy building to continue her research.

At 10 PM, Chi Yang returned from the special forces and quietly accompanied Nuannuan in the deputy building.

There were many people conducting these same bacteria experiments abroad. Nuannuan had met many people who wanted to develop medicines for them.

Now that the bacteria these people had spent a lot of effort developing was finally in Nuannuan's hands, a medicine could be formulated within a day.

Usually, Nuannuan's time in the lab never exceeded four hours. However, this time, she could feel that she had met a powerful opponent.

She had been working from 1 in the afternoon to 1 in the morning. Besides a half-hour break to eat dinner, for the rest of the time, she was studying non-stop. Even with that time, she made no progress at all.

Chapter 1682 The Warmest Hour

When it was one o'clock, Chi Yang, who had been waiting quietly, stood up and walked in front of Nuannuan. He reached out and held her hand, which was still mixing chemicals.

"Little girl, it's one o'clock now. I'll accompany you to sleep."

Nuannuan looked at Chi Yang. "Can you let me continue for another hour? I have a test result I want to see."

"No, I'll do it tomorrow." Chi Yang took away the chemicals in Nuannuan's hand. "You need to rest now. Ning Wenhao is still waiting for you to save his life. If you don't rest well, the chemical agent won't be at its full potential. Come, let's go to bed."

After saying that, he bent down and scooped up Nuannuan with nary an explanation, returning to the bedroom in the main building.

Nuannuan was tired after working on the medicine for the whole day. She had planned to take a shower. Who knew that Chi Yang would bring her right to the bathroom?

Looking at the man whose figure was so hot it was nosebleed-worthy, Nuannuan could not help but ask, "Big Brother Chi Yang, what do you want?"

"I want to help you take a shower."

Listening to Chi Yang's serious reply, Nuannuan could not help but laugh out loud.

"I can wash myself. Why are you washing me?"

"You're tired, so I'll take care of you."

Looking at Big Brother Chi Yang's serious face, Nuannuan's gaze softened. She simply lay down in Chi Yang's embrace, not using any strength at all.

She wanted to see how this big-tailed wolf planned to take care of her today. He always said he would help her wash, but after all was said and done, he still left her a little dirty anyway. When Nuannuan

leaned into Chi Yang's embrace, she rubbed her waist against something solid. She mentally prepared herself for what was coming.

In the end, Chi Yang hugged Nuannuan and quickly bathed her. He wrapped Nuannuan up with a towel and wiped her down first, then covered her with a blanket before wiping himself.

After getting into bed, Chi Yang hugged Nuannuan in his arms and let her lean against his chest, right over his heart. Then, he softly said to Nuannuan, "Goodnight!"

Nuannuan was stunned and looked up at Chi Yang. Under the blanket, her legs were rubbing against a certain part of Chi Yang that did not seem very relaxed. He could not help but let out a sigh into her ear.

Seeing that Chi Yang's gaze was getting more intense, Nuannuan asked with a smile, "Big Brother Chi Yang, don't you want it?"

However, Chi Yang said in a very serious tone, "Don't start any more trouble. Sleep well." Nuannuan, "..."

"I'm not tired."

"Even if you're not tired, you still have to sleep."

Nuannuan looked at Big Brother Chi Yang, who had a serious expression and was acting like her father, and she could not help but laugh out loud. She teased, "But I can't sleep. Big Brother Chi Yang, I've never heard you sing before. Sing for me. If you sing for me, I might be able to fall asleep."

He knew that this little girl was trying to cause trouble, but to get her to fall asleep earlier, Chi Yang said, "I don't know how to sing, so I can't remember any lyrics to any songs. Can I hum to you instead?"

She did not expect Big Brother Chi Yang to really try to satisfy her unreasonable request. Nuannuan was extremely happy and immediately nodded.

"Then close your eyes and lean against me. Don't say another word. Don't!" Chi Yang said.

"Okay." Nuannuan agreed, not needing to think. Then, she closed her eyes and leaned against Chi Yang's chest, listening to the steady and powerful heartbeat in his chest. She felt very warm and soothed.

Chapter 1683 Chi Yang's Singing

Seeing that she had already gotten into a sleeping position, Chi Yang started humming.

He really did not know how to sing. He did not know how to sing any popular songs. However, to satisfy Nuannuan's request, he whipped out the few songs that the soldiers in the special forces sang every day and hummed them.

The songs from the army were all filled with passion and vigor, but to get his little cutie to fall asleep earlier, Chi Yang slowed down the melodies of these songs and hummed them as lullabies.

Nuannuan had never heard Chi Yang sing before. She thought that Big Brother Chi Yang would be the kind of person who was tone deaf. Who knew that the voice that Big Brother Chi Yang hummed with would be extremely pleasant to hear the first time around?

Not only was his pitch accurate, but his voice was comfortable too. Because he roared on the battlefield all year round, when he spoke in a low voice, there was a hint of huskiness in his voice.

It was as if the fine sand was being blown by the wind, rolling beautifully on the sand dunes gleaming with light.

She never knew that her Big Brother Chi Yang had such a pleasant voice when he hummed softly.

Nuannuan's right ear was pressed against Chi Yang's heart, listening to his heartbeat. Her left ear was comforted by the gentle song. This, combined with the fact that she had done a lot of things today, she fell asleep very quickly. In less than two minutes, Nuannuan fell asleep. Chi Yang hummed and hummed some more until he finished all five songs he knew.

Smelling the sweet fragrance of the girl in his arms, he could not help but rub his head and give her a gentle kiss on the cheek.

The girl in his arms moved a little, wrapping herself around him like an octopus.

Chi Yang reached out to hug her, letting her arrange herself in a more comfortable position on his body. Then, he closed his eyes.

Ever since his supernatural ability was upgraded, Chi Yang felt like his spirit had improved. He no longer lost control of his temper from time to time. With his wife in his arms, Chi Yang quickly fell asleep.

Early the next morning, both of them woke up at almost the same time.

Chi Yang had to head to the Eagle Special Forces, while Nuannuan continued to conduct experiments.

At the end of the day, just when Nuannuan was about to fly into a rage, a type of mixed-compound medicine that was dripped onto the bacterium finally made it mutate.

This bacteria mutated into a familiar structure.

Thus, Nuannuan continued to study the medicine to deal with this mutated bacteria.

This kind of bacteria was similar to a kind Nuannuan knew about. She had previously formulated a drug to fight against this kind of bacteria.

After dropping a bit into the test tube, a small part of this bacteria finally mutated into normal bacteria. However, the rest was still the same mutated bacteria, unchanged.

Nuannuan once again formulated this medicine and the seven-compound medicine and tested them separately. She had finally found a medicine that could turn this mutated bacteria into normal bacteria.

Then, Nuannuan used a normal anti-inflammatory medicine.

Once the medicine was dripped into the test tube of the normal bacteria, the bacteria was finally eliminated.

The little black color from before dissolved in the test tube's solution at this moment.

In order to prove that the method just now really had been effective, Nuannuan separated a bit of the bacteria from the alveoli and put it into the test tube. Then, she dropped in the medicine she had

studied for two whole days, the medicine she had just prepared to deal with the mutated bacteria, and finally, the ordinary anti-inflammatory medicine.

Chapter 1684 Semi-finished Product

However, an hour later, this bacteria decayed.

Nuannuan was depressed for a moment. She made some more bacteria and dripped them into the medicine that she had developed over the past two days. After waiting for an hour, this bacteria turned into mutated bacteria. She then dripped in some medicine to deal with the mutated bacteria. After waiting another hour, after the mutated bacteria turned into ordinary bacteria, she used the ordinary anti-inflammatory medicine. It was a success.

Although she had successfully destroyed the bacteria, there was a problem.

She had only studied a small portion of the bacteria, but close to Ning Wenhao's entire lung was infected.

Such a small amount of bacteria had taken 3 hours to destroy. If she used this on Ning Wenhao, it would take at least 15 days to completely remove the infection from his lungs.

However, Ning Wenhao could not hold out for that long anymore.

Previously, she had said that Ning Wenhao would be able to hold on for another five days, but that had just been to comfort his mother.

Based on her intuition, Ning Wenhao would probably only be able to hold on for three or four days more at most.

Today was already the second day. If he was unlucky, Ning Wenhao's condition would take a sharp turn for the worse tomorrow.

If he started infusion in the early hours of the night, by the time his condition took a sharp turn for the worse tomorrow, he would have already resisted part of his menacing condition. Still, it would not be enough.

This was because these drugs would have to be injected into Ning Wenhao's body over three rounds. If the first drug could not stop his turn for the worse in time, the infection would reach Ning Wenhao's entire lung. Even if Nuannuan's drugs could stop the first and second layer's attacks, when Ning Wenhao's entire lungs were completely infected, even if it was just an ordinary bacterial infection, it would still be able to kill him.

res

Therefore, Nuannuan could only continue to research and upgrade the three drugs she already had. If these three drugs could be combined into one, she could guarantee a 100% chance of saving Ning Wenhao. However, Nuannuan found that these three medicines could not be combined.

After three experiments, Nuannuan found that the chemical components of these three medicines had non-fusion components in them. They could not mix with each other.

Just like things that counteracted and reinforced each other, these three chemical components were born to be mutually reinforcing.

Although any one of them was a very good drug, these three drugs were created to be mutually exclusive.

She could not find a good medium to fuse these three drugs together.

Nuannuan felt that she had really met her match this time.

Ordinary people would have no way to develop an antidote for the bacteria this other party had developed. Even if they could, there was no way to merge such mutually exclusive drug molecular chain structures.

Nuannuan decided to find out who had created this bacteria and rid the world of them

Otherwise, this unstoppable and powerful person who had created a harmful bacteria to poison the soldiers of Camino would not stop at just one strain of bacteria.

As a soldier's wife, she did not want her Big Brother Chi Yang and his brothers to have to face this unknown danger.

Since she could no longer make any progress with the medicine, Nuannuan decided to start from the body of the bacteria.

Although the body of the bacteria was a little bigger than the cells, it was only twice the size of the big cells. Even if she looked at the largest body of the bacteria, Nuannuan could only see a little bit of the molecular structure through the body of the bacteria.

Chapter 1685 Meritorious Service

Although she could only make out a rough outline, Nuannuan recognized it. Her eyes narrowed slightly.

As she thought about something, Nuannuan picked up the equipment, turned around, and got ready to leave. However, the moment she turned around, she bumped into Chi Yang. He had been standing behind her, trying to hide his presence as much as he could.

Nuannuan's mind was focused on the medicine, and Chi Yang had been actively trying to hide his presence. Unless Nuannuan was a clairvoyant or had eyes on the back of her head, it would not have been easy to notice him.

With her being hit so suddenly, Nuannuan's thin, fragile glassware was smashed into pieces and fell to the ground, scattering all around. Chi Yang frowned and quickly squatted down to help Nuannuan pick up the pieces of glass. Unexpectedly, she also squatted down to pick them up at the same time.

Afraid that Nuannuan would scratch his hand, Chi Yang gave way, but she cut his finger instead.

A drop of dark red blood dripped from the cut, and Nuannuan's heart suddenly tightened.

"Big Brother Chi Yang, don't move! Let me take a look at your hand!"

After all, there were many kinds of unknown bacteria in these containers. Nuannuan was afraid that Chi Yang's finger had come into contact with this bacteria. If that had happened, she would have to immediately inject three kinds of liquids into Chi Yang. Otherwise, if these bacteria were allowed to proliferate in Chi Yang's body, he would probably turn out like Ning Wenhao. Chi Yang knew that he had caused trouble for Nuannuan, so he obediently gave his wife his hand.

He knew what Nuannuan was worried about, so he did not dare to make a sound.

Nuannuan saw that what she had been most worried about had happened. The cut on Chi Yang's finger had indeed come into contact with bacteria inside the test tube. A small bit of the bacteria had already entered and mixed with Chi Yang's blood.

Seeing that, Nuannuan made a move to squeeze the bacteria out.

Just as she was about to squeeze it out, she saw that the supernatural cells in Chi Yang's body abruptly expanded. The supernatural cells seemed to have mouths, and something dark red that looked like a small fire snake shot out from the mouth of the supernatural cells.

Compared to the supernatural cells, the harmful bacteria were like zombies following the herd. The moment the cells shot out the fire snakes, the healthy cells avoided the infected ones and left a small gap. However, the harmful bacteria seemed to have a predetermined trajectory. They attempted to continue swimming deeper into Chi Yang's blood vessels.

The harmful bacteria did not try to evade the fire snakes spat out by the supernatural cells at all. Instead, they faced the supernatural cells head-on. At that moment, Nuannuan's warm hands paused as she waited to see the result.

In the end, the aggressive harmful bacteria ended up being no match for the attacks of the supernatural cells in Chi Yang's body. They were crumbled into ashes in his blood.

Nuannuan's eyes instantly lit up.

"Nuannuan, did I help?"

Seeing his wife's happy expression, Chi Yang could not help but ask what had happened.

Nuannuan glanced at Big Brother Chi Yang and smacked him.

"Yes, yes, you've done a meritorious deed. Big Brother Chi Yang, may I draw some of your blood?"

Chi Yang's eyes were filled with indulgence. He rolled up his sleeves and gave his arm to Nuannuan. "Do whatever you want."

Nuannuan did not bother being polite to Chi Yang. She retrieved a disposable syringe and drew out less than 0.1 ounces of Chi Yang's blood. Then, she took the needle away.

She was going to retrieve a cotton ball for Chi Yang to stop the bleeding.

However, just as she pressed the cotton onto Chi Yang's wound, with her X-ray vision, Nuannuan discovered that Big Brother Chi Yang's blood vessels, which had just been pierced by the needle, had already been repaired by his supernatural cells.

Chapter 1686 Chi Yang's Blood

Nuannuan removed the cotton ball and Chi Yang saw what had happened to the injury on his arm. He touched his arm, which had no trace of the needle anymore, and said, "Ever since my supernatural cells last upgraded, I noticed that my ability to recover has greatly improved."

Nuannuan happily kissed Chi Yang. "That's great."

Big Brother Chi Yang was the best. She was very happy.

"Big Brother Chi Yang, wait for me a little longer. I'll go test this again."

"Okay. I won't disturb you while you're busy."

Upon saying that, Chi Yang found a chair and sat down. He placed his hands on the table and watched Nuannuan's beautiful, slender back.

Nuannuan dropped a drop of Chi Yang's blood into the newly cultured harmful bacteria. When the harmful bacteria came into contact with his blood, it seemed like they were faced with a strong attack. They began to boil. Very quickly, they were completely destroyed by that drop of blood and turned into ash.

Nuannuan, "..."

She had never thought that Big Brother Chi Yang's blood would be so terrifying. It had such a powerful attack.

She had wanted to create a medicine that could save people. However, although the harmful bacteria had all been destroyed, the harmful bacteria was actually just the result of a mutated normal cell. Hence, destroying the harmful bacteria would also destroy the normal cells.

In other words, if Chi Yang's blood was really transfused into Ning Wenhao's, Ning Wenhao would surely be killed.

Therefore, Nuannuan took the syringe and drew some of her own blood.

Chi Yang, who was watching Nuannuan carefully, suddenly narrowed his eyes.

Watching the dark red blood flow from her arm into the syringe, Chi Yang felt his heart ache and his throat catch. It was very uncomfortable to look at.

However, he knew that he could not stop it.

This was because all of Nuannuan's efforts were for the sake of his closest sworn brother.

It was not until the syringe was pulled out of Nuannuan's arm that Chi Yang quickly walked over to help her apply pressure to the wound with a cotton ball. It was the first time in his life that Chi Yang had seen blood in a syringe, and it made him feel dizzy.

"Big Brother Chi Yang, it's already healed. Actually, my wounds heal faster than other people's do."

Nuannuan removed the cotton ball, and Chi Yang quickly looked at the wound on her arm. Seeing that her wound was really no longer bleeding, he let out a sigh of relief and returned to his seat. He frowned and looked at Nuannuan.

He wanted to ask if his blood could be of use, but he did not want to disturb her at this moment. Thus, he could only put the question aside.

Nuannuan dropped a sample of her blood into the test tube to see what would happen.

However, upon dripping her blood into the test tube, she saw no change. In other words, if she was the one who had been injured today, she would have turned out like Ning Wenhao with her lungs infected.

After all, she also had supernatural cells—but it was obvious that this harmful bacteria could only be killed by the supernatural cells in Big Brother Chi Yang's blood.

Nuannuan began to dilute the sample of Chi Yang's blood and drip it into the test tube. This time, there was a much greater effect.

Then, she simply extracted directly from the serum, taking less than one-tenth of the supernatural cells from the initial test tube and mixing it with the drug.

After that, she dripped a drop of the new drug into the sample of harmful bacteria. After 20 minutes, the harmful bacteria reverted back to being normal cells.

This experiment lasted five hours. Nuannuan skipped dinner as she studied it until late at night. When she finally finished, Nuannuan happily turned around and said to Chi Yang, "Big Brother Chi Yang, I've succeeded!"

Chi Yang stood up from his chair. His eyes, though they were a little red, were filled with gratitude for Nuannuan.

Chapter 1687 Worsening of Illness

"Nuannuan, thank you!"

Before his finger was cut, Chi Yang had already received a call from the hospital.

The equipment monitoring Ning Wenhao's lung condition had shown that he had suddenly taken a turn for the worse, and the military hospital had called Chi Yang about it. Hence, he had immediately returned to the Nangong family to look for Nuannuan and find out how she was doing.

Who could have known that he would now have to burst Nuannuan's bubble?

Seeing Nuannuan so happy, Chi Yang swallowed his words—he wanted Nuannuan to continue working hard.

The moment he heard Nuannuan say that she had succeeded, the five hours of torment he had felt in his heart were finally relieved.

"The experiment was successful! So how do we treat him?"

"We just need to mix a certain proportion of your blood into the medicine."

"Where do you plan to mix it?"

Seeing that Chi Yang was so anxious, Nuannuan asked, "Has Ning Wenhao's condition worsened?"

"Yes." Chi Yang nodded.

"How long ago?"

"The dip was detected at 6:50 PM."

"Then wait for me. I'll make the medicine here, and we'll go to the hospital."

"Okay." Chi Yang nodded.

Looking at Nuannuan's busy back, Chi Yang felt like the happiest man in the world.

Nuannuan prepared an ounce of pink liquid based on the degree of infection of Ning Wenhao's lungs. Then, she followed Chi Yang to the military hospital in a hurry.

Outside the ICU, Old Master Ning was angrily slamming the dean's table.

"Qin Muyang, do you think so little of me? Do you really think that I can't do anything to hurt the people in the Emperor District Campaign Department? Do you believe that I'll go to the President tomorrow and ask him to uphold justice?"

"Old General Ning, it's not that I don't want you to go in and see Young Master Ning. It's just that his condition has worsened tremendously. Right now, he's so weak that he can't even handle the slightest contact with germs. Our doctors are trying to save him. Even if you go in, you won't be able to help."

"Nonsense! Then how did Mao Yating get in? You allowed her in, so why can't you let me in?"

"Mrs. Ning got to go in because she's been inside the whole time—she never left. Her entire body had been carefully sterilized. Moreover, as Young Master Ning's mother, she must accompany him."

"I'm still his grandfather!"

"Yes, you're his grandfather. I don't object to that. However, today, when you came, you yelled at this lady to tell Mrs. Ning to get lost and even asked the guards to pull Mrs. Ning out. Young Master Ning's condition was initially not that serious. It was when your people went in to remove Mrs. Ning that Young Master Ning's condition took a sharp turn for the worse. So, no matter what, I can't let you go in. And no matter what, I won't let Mrs. Ning leave. If you're still dissatisfied and want to see Mrs. Ning again."

Despite Qin Muyang's temper growing from being scolded, he still stood up straight.

As a soldier, he was under pressure as he faced an older general higher in rank than him.

However, he knew some things about the Ning family. This Ning Wenhao was the main member of Chi Yang's Eagle Special Forces Team. Since he had accepted Chi Yang's trust, he definitely could not give in.

Old Master Ning was so angry his face turned red. He roared angrily, "What Mrs. Ning, what lady? The Mrs. Ning you speak of is not a member of our Ning family at all! I have never acknowledged her report this to the president, I have nothing to say. However, for today, I definitely won't let you near identity as our daughter-in-law! The lady you speak of is Mrs. Ning!"

Chapter 1688 Chi Yang's Facesmack

Qin MUYANG was very polite. "I'm sorry, I didn't know. Please calm down, Old General Ning, General Ning, and Mrs. Ning. Let's wait outside together for the results, okay?"

Old Master Ning, "..."

Ning Haoran, "..."

Xiao Yushan, "..."

After hearing how Qin MUYANG addressed them, something felt off about it although he was right.

What did he mean by General Ning and Mrs. Ning?

Ning Haoran was clearly Xiao Yushan's husband's big brother. It was just that he had just returned to Emperor District for a vacation during this time and had happened to get caught up in this incident, so he accompanied his old man here.

"What happened?"

When Chi Yang came over with Nuannuan, he happened to see Old Master Ning stroking his beard and glaring.

Seeing Chi Yang, Dean Qin finally let out a sigh of relief. However, before he could explain, Old Master Ning flew into a rage.

"Chi Yang, what do you mean? Hao's condition has worsened. As his grandfather, don't I have the right to see him? What right do you have to ask Qin MUYANG to stop us from seeing him?"

Chi Yang stood up straight—he was almost a head taller than Old Master Ning. Even Old Master Ning found his height unbearable.

Chi Yang gave Nuannuan a look, and she nodded. Then, she went straight into the ICU.

Old Master Ning had no temper when facing Nangong Nuannuan. After all, he still wanted to cooperate with Imperial Phoenix Group.

Chi Yang waited for Nuannuan to enter the ICU before asking Qin MUYANG about the situation. Only then did he look at Old Master Ning and explain, "Ning Wenhao's new stage of lung infection is very problematic. This has something to do with the Eagle Special Forces. Therefore, as the leader of the forces, I have the full authority to protect his safety."

Xiao Yushan asked unhappily, "Lieutenant General Chi, do you think that the old man will really harm Hao?"

"Don't tell me that you haven't already harmed him. Wouldn't the fact that you bullied Auntie Mao cause him major emotional disturbance?"

"Hao's condition has taken a sudden turn for the worse. He has already been issued a notice of critical illness. Don't tell me I still don't have the right to see my own grandson?"

"Grandfather Ning, as a soldier of the special forces, Ning Wenhao could be sacrificed at any time—

so his will was written long ago and notarized by the military base's Notary Office."

Chi Yang's straightforward words made the corners of Old Master Ning's eyes twitch.

"What do you mean?"

When faced with the bumbling Old Master Ning, Chi Yang maintained a direct and serious attitude. There was not the slightest hint of contempt in his expression. It made people feel like he was the most righteous man in the world.

However, it was only this kind of person who could speak righteously while conveying an extremely sarcastic message.

"There's no hidden meaning. Ning Wenhao's current situation is indeed not looking good. Since he possesses many assets, everyone will be jealous. It's not excessive for Old Master Ning and his family to have made plans. However, I didn't lie to you. You also know that the soldiers of our Eagle Special Forces are prepared to sacrifice themselves at any time on the battlefield. Therefore, their wills are protected by the Eagle Special Forces and the military base. If anything were to happen to Ning Wenhao, the general administration of the military base would strictly follow his wishes as he has stated while alive. No one would be allowed to overstep or criticize him—not even the president! This is a way of paying our respect to our members of the Eagle Special Forces.

"Thus, if Grandfather Ning is really worried about Ning Wenhao's safety, it's best for you to wait patiently."

Chapter 1689 Do You Still Want to Go In?

"Firstly, your noise will definitely not help Ning Wenhao feel any better. Secondly, even if I let you in, you won't be able to help in any way. Are you sure you still want to go in?"

Chi Yang's words made Old Master Ning feel very embarrassed, but his anger towards Ning Wenhao and Mao Yating was stronger.

They had not thought much of Ning Wenhao at first. However, because Ning Wenhao had befriended Chi Yang, entered the special forces, and had been promoted to first lieutenant at a young age, the Ning family now treated Ning Wenhao differently.

Initially, Ning Wenhao had just been a young talent with the potential to bring glory to the Ning family in the future. However, some time ago, Ning Haoran accidentally discovered the relationship between Ning Wenhao and the Eagle Eye Group. Since then, Old Master Ning had regarded Ning Wenhao as a treasure in his heart.

One had to know that behind the Eagle Eye Group was a first-class wealthy family that relied on the power of the financial group to get promoted this year. As one of the most important shareholders, Ning Wenhao's worth was extremely coveted by the Ning family.

Now that Ning Wenhao's life was in danger, Old Master Ning was so anxious he wanted to drive away Ning Wenhao's biological mother because he was afraid that this poor and unpresentable woman would badmouth him in front of Ning Wenhao. That would mean that even he, his biological grandfather, would not be able to get a share of Ning Wenhao's inheritance.

Chi Yang's words were like a bucket of cold water pouring down on Old Master Ning and the other two.

Both Old Master Ning and the Northeast Campaign Department's commander-in-chief, Ning Haoran, did not know that the campaign department was so protective of the Eagle Special Forces.

This time, they could only hope that Ning Wenhao would not die.

After all, their relationship with Ning Wenhao was not very good. Hence, they were almost certain that with Ning Wenhao's character of always protecting his mother, he would definitely not hand the inheritance over to them.

It seemed that there was still a long way to go before they would be able to get a share of the Eagle Eye Group!

Chi Yang did not explicitly mention the Eagle Eye Group, and Old Master Ning also pretended not to know about it. He snorted coldly and said, "He's just an ordinary soldier. He relies on his family for everything. What inheritance can he have? Hao's father died young, and now I'm the only relative he has left. As his biological grandfather, if something happens to my grandson and I'm not allowed to be there, can I not be mad?"

Chi Yang was very clear on the kind of person Old Master Ning was—someone who would dare to even his own grandfather for profit. Therefore, Chi Yang did not take his words to heart at all.

"You can be angry, but your anger and your attacks on Auntie Mao will just worsen Ning Wenhao's condition. So, if you continue to be angry, I have the right to ask you to leave the military hospital."

As expected, Old Master Ning, who had been hoping for Ning Wenhao's early death a moment ago, now realized that if he really died, they might not get anything. That was why he cared about Ning Wenhao's condition.

"How is Hao now? Didn't Miss Nangong promise to specially develop a drug for him? Did Miss Nangong go in just now to administer it?"

"My fiancée has already developed a targeted drug. Whether it works or not depends on Ning Wenhao's condition."

Old Master Ning's eyes lit up when he heard that a targeted drug had really been developed. Xiao Yushan, who was beside him, immediately said, "Dad, that's great! Miss Nangong has really developed a cure. Don't be sad. Since you can't see him, we'll just wait outside. I believe that Hao will still definitely be able to feel the warmth and strength of his family from there."

Chapter 1690 Is He Dying?

Listening to Xiao Yushan's 'motherly' love, goosebumps appeared on Chi Yang's arms under his battle uniform.

"Dad, how is Hao? Is he dying?"

Suddenly, a middle-aged man in a suit rushed over and saw that Old Master Ning was sputtering

Old Master Ning was sitting on the sofa outside, flustered and exasperated. He threw his crutch at the man, making him cry out in pain. This man was the third master of the Ning family, Ning Haohan. Old Master Ning had three sons.

The eldest, Ning Haoran, was now the commander-in-chief of the Northeast Campaign Department.

The second, Ning Haoyu, was Ning Wenhao's father. He had once been a high-ranking officer of the Flying Eagle Special Forces. Fifteen years ago, he died in battle with Chi Yang's father, Chi Zehao, outside the country. His body was never recovered.

The third son was the man in a suit and leather shoes, Ning Haohan. He was the chairman of the Ning Wen Group and oversaw the entire economic lifeline of the Ning family.

Some of the branches of the Ning family were involved in the military, political, and business sectors-so the Ning family was certainly a behemoth.

However, at this moment, the faces of the members of the Ning family did not look like those of a first-class noble family.

It was not an exaggeration to say that they were showing their ugly side.

"Dad, why did you hit me?"

"Can't you just wait for Hao to be a little bit better? What's the matter, huh? Tell me once more and I'll try to believe you this time!" Old Master Ning scolded in exasperation.

Ning Haohan, "..."

After being mercilessly hit, Ning Haohan finally realized that Chi Yang was standing on the sidelines, watching him coldly. As a business elite, Ning Haohan did not even need 0.1 seconds to come back to his senses. His eyes lit up, "You've developed a new anti-inflammatory drug, haven't you? Can Hao be saved?"

Old Master Ning was quite satisfied with his reaction.

"Miss Nangong developed it. She's giving him an infusion in the ICU now."

Ning Haohan was delighted. "That's great! The heavens have eyes! Haoyu will be happy if he finds out."

Chi Yang did not pay attention to the people from the Ning family. He kept watch on the door of the ICU.

Not long after, a doctor came out to let Chi Yang in.

Chi Yang immediately entered.

Ning Wenhao was still in a deep coma as he lay on his hospital bed with many tubes attached to him.

"How is it? Has it worked?" Chi Yang walked up to Nuannuan and could not help but ask.

Nuannuan smiled and nodded. "Yes, it has worked."

Dr. Cai Glanced at Nuannuan and could not help but ask, "Miss Nangong, how do you know that it worked?"

Nuannuan smiled slightly. “It’s the same reason I told you that YRHBO-3 was useless against his illness. I developed the medicine, so only I know if it’s working.” Dr. Cai, “...”.

“Alright, alright. You’re indeed amazing!”

Knowing that Nuannuan did not want to tell him, Dr. Cai did not press further. As long as they could cure Ning Wenhao, it would be a great achievement.

“Miss Nangong, what kind of bacteria is Ning Wenhao infected with this time? It doesn’t seem to be a mutated infection from the eight major groups.”

“This is likely a new type of infection. It doesn’t belong to any of the eight major groups,” Nuannuan replied.

Infections were generally divided into eight groups. The common ones were bacterial infections, viral infections, fungal infections, mycoplasma infections, and chlamydial infections. In addition to these five types of infections, there were also rickettsia, spirochetes, and actinomycete infections.

Ning Wenhao’s infection did not belong to any of these eight types—not even a mutated form of any of them.
