

## Physician Wife 2421

### [My Sweet Physician Wife Calls The Shots](#)

#### Chapter 2421

After that, the two old men hung up the phone.

elder ning hung up the phone with an ugly expression. ning haohan looked at his father, not daring to say a word.

Old master ning and old master Xiao were at loggerheads.

Even though elder Nangong didn't like elder ning either, he was a noble and had never been on the same side as elder ning.

however, old master xiao was born from a humble background. with his passion and bravery, he had made countless contributions on the battlefield and established his position today. However, when he was young, he was a soldier under elder ning. In the past, in order to prevent old master Xiao from climbing up the ladder faster than him, he had spared no effort in suppressing him. In the end, old master Xiao, who came from a humble background, still managed to climb higher than him.

This was something that old master ning could not accept. So until now, he had been calling elder Xiao 'old Xiao'. He always felt that he was more than just a little bit higher than the other party.

Now that he had been criticized, elder ning was even more depressed.

At this point, it was impossible to lower the donation amount with the Xiao family. The Xiao family and the Wu family of Haizhou had already donated 4 billion Yuan. Only the ning family and the Shi family were left.

The Shi family had been focusing on the development of the Internal Affairs Bureau all these years, and the family's interests had been greatly satisfied. In addition, the Shi family had almost monopolized the medical Association. Although it was costly, the things they researched could bring huge wealth to the Shi family.

All that was left was the Xiao family.

"Dad, are we really going to donate 2 billion? you also know that the ning family is in a difficult period right now, it's really hard to come up with 2 billion!"

While ning Haohan was talking, the news media reported the donation again.

Just the six big corporations-disheng, Imperial Palace, Shengyang, Hawkeye, Yunxiao, and the Wu group-had donated 12 billion.

The reporter asked the public what they thought about the donation, and many of them expressed their gratitude for the donation. He said that he felt the positive energy of society. He could feel the power of these companies at a critical time.

However, some people said that when the ning family and the Shi family were included, the funds from these eight big groups would be enough for disaster relief.

The speaker had no intention of speaking, but the listener took note of it, especially elder ning. After hearing the words of the person in the crowd, he wanted to drag him out of the TV and beat him up.

The room instantly fell into a strange silence.

It was unrealistic for the ning family to donate 2 billion, but if they didn't, they would be laughed at by the whole country.

Even ning Haohan thought it was impossible for ning Wenhao to take out 2 billion Yuan from Eagle Eye group, let alone elder ning.

So, what should the ning family do?

If they couldn't take out 2 billion in the face of a national crisis, then the ning family would definitely decline in the future.

Finally, elder ning gave elder Shi a call.

The only person who had yet to express his opinion was master Shi.

At first, elder ning did not like to deal with elder Shi. Although elder Shi was a very kind person who was willing to give others opportunities, because of his manipulation in the competition for the president of Kamino a few decades ago, no one in the entire Kamino country was willing to be on his side.

Asking a Tiger for its skin was something that elder ning would not do unless it was absolutely necessary.

### [My Sweet Physician Wife Calls The Shots](#)

#### **Chapter 2422**

But now, it was obvious that they had no other choice, and the ning family was really unwilling to take out the two billion, so they could only ask elder Shi about the situation.

The call was directly answered by elder Shi.

"Elder ning, why are you free to call me?"

hehe, elder Shi, I'm not going to beat around the bush. I'm calling you this time to ask how much the Shi family is going to donate.

"Disheng, Imperial Palace, Shengyang, Hawkeye, Yunxiao, and the Wu family have all donated 2 billion. I don't think the second-ranked Shi family will donate less than them, right?" To tell you the truth, the Shi family is planning to donate 3 billion."

When elder ning heard that, he felt as if his heart had stopped beating for a moment when he heard 3 billion.

Elder ning's eyes narrowed unhappily.

He felt that the Shi family was extremely detestable!

Elder ning couldn't help but sneer, "elder Shi, if I'm not wrong, the Shi family doesn't have much liquid funds, right?" In terms of wealth, the Shi family could not compare to di gang and Sheng Yang. In terms of Foundation, the Shi family could not compare to the Nangong family. Although the Shi family's

Foundation is indeed better than my ning family's after a few years of settling down, the Shi family has invested a lot in the medical Association, right? The students you're raising all have sky-high salaries. I don't understand why elder Shi is prepared to donate 1 billion more than disheng, but don't you think it's a bit too high-profile and unwise to blindly pursue other people's praise without caring about the development of the group?"

In the face of elder ning's sarcasm, elder Shi was not angry at all. He laughed and said, " "We have no other choice. You also know that LAN weisong was arrested a few days ago. He's a very influential figure in Haizhou. Even though this matter was LAN weisong's own doing, no matter where he went, people would say that the Shi family wanted to cover up the truth.

We're also very angry that such a hat was placed on our Shi family! So we can only take advantage of this disaster to let the people of the country see the true nature of our Shi family. Our Shi family is dedicated to the country and its people, but we can't do anything about it. There will always be people who will insult our reputation. But overall, our Shi family's intentions are no different from the Nangong and Xiao families."

Elder ning: " ran ran, so you're saying that the ning family's original intentions have changed? or that they're not on the same page as them at all? "

Elder ning had already been angered by the attitudes of the other three first-rate noble families.

He really couldn't bear to listen anymore and said, " "Since you're so rich, then go and donate."

He was about to hang up the phone.

"Elder ning."

Just as she was about to hang up, she heard elder Shi's voice.

"Is there anything else, elder Shi?"

"Elder ning, I know why you're looking for me. You mean you want the Shi family to donate less like your family? after all, there are differences in wealth among the first-class families. when they were ranked as a first-class family, wealth was only one of the factors. it was more dependent on the family's status in kamino. But now, the first-class families seemed to be more focused on money. They want everyone to think that a first-class family's wealth can be compared to the Nangong family."

Elder ning's anger subsided a little after hearing elder Shi's words. Elder Shi continued, " "It's just as you said, how can the pressure on our Shi family not be great?"

### **[My Sweet Physician Wife Calls The Shots](#)**

#### **Chapter 2423**

"Aiyaya, this is all the Nangong family's doing. In order to become the leader of Kamino, they actually joined forces with disheng, Shengyang, and Hawkeye to set the donation threshold too high. It's simply too despicable."

"Sheng Yang is also related to the Nangong family?"

“Hehe, we could tell from the last auction for the land in Chengnan that the bosses of Shengyang and Hawkeye were behind the scenes. However, Sheng Yang had hidden it a little deeper, while Hawkeye was too lazy to even hide it. However, he was certain that Sheng Yang and Hawkeye were related to the young lady of the Nangong family. The boss behind Hawkeye was Chi Yang. But the boss of Shengyang is very powerful, and we can’t find him no matter how hard we try.”

Elder ning’s negative mood immediately reached its peak.

“What is Nangong Nuannuan and the Nangong family trying to do? It was their business if they had money. Why did they have to be so ruthless and force everyone to donate to higher prices? If we donate less than 2 billion now, we’ll be laughed at. Will we still have a place in Kamino in the future?”

“Ah! Elder ning, what you’re angry about is also what we’re angry about. Just look at how much our Shi family has suffered in order to compete with the Nangong family. We’ve learned our lesson this time. 3 billion it is then, even if it is scraped off a layer of skin, at least it won’t drown in saliva. Don’t you agree?”

Elder ning: “ran ran, what about the ning family?”

At that thought, elder ning wanted to kill Nangong Nuannuan.

How detestable!

“But then again, elder ning, if I remember correctly, one of your family’s branch members is the chairman of the charity Association, right? Although he has the president above him, can’t the chairman help to coordinate things?”

Elder Shi’s words were like an epiphany, making elder ning’s eyes light up.

Elder Shi continued, “elder ning, I think that the donation should be done according to the individual’s will. However, ever since disheng, led by Nangong Nuannuan, donated the two billion Yuan, the other aristocratic families seemed to be led by the nose. Whoever doesn’t donate that much money will be letting down the entire country. What do you think this is? did our families’ enterprises develop to this day by stealing and robbing? We didn’t pay less taxes, and we didn’t get anyone’s help when the group was in trouble. We relied on confidants. why do we have to throw away our hard-earned money just because of an earthquake? If you don’t donate 2 billion, you’ll be letting down the country and the people. How can you say that?”

“it is! This Nangong Nuan Nuan and the Nangong family are simply outrageous!” Elder ning also felt the same way from the bottom of his heart.

“It’s not that she’s outrageous, she’s just too big-hearted! I dare say that disheng, Imperial Palace, Shengyang, and Hawkeye are all closely related to her. She’s preparing to squeeze the Shi family and the ning family out of the ranks of the first-class families. You didn’t appear?”

Elder ning’s face darkened, “I found out.” Then what should we do? Elder Shi, we’re all in the same boat now!”

“Ah, your ning family is still fine! At least he had a reliable grandson like ning Wenhao. Ning Wenhao had a good relationship with Chi Yang, so he should also be one of the directors of the Eagle Eye group,

right? Even if the ning family fell, at least there was still the Eagle Eye group. But what does the Shi family have?”

### My Sweet Physician Wife Calls The Shots

#### **Chapter 2424**

“Back then, I wanted to introduce my Yalin to chiyang, but I didn’t expect Nangong Nuannuan to bear a grudge against me. Ever since she found out about Yalin, she has been suppressing my Shi family. I really can’t afford to be hurt!”

Elder ning also sighed and said to elder Shi, ” “We have ning Wenhao in our family, but he’s never been close to the nings. If the ning family really falls, can I count on him?”

After saying that, Shi Heng and ning Zhennan fell silent for a long time. Finally, it was old master ning who spoke.

“Anyway, I’m grateful for elder Shi’s advice on today’s matter. Don’t worry, although my reputation is not as good as that Fox Nangong Renyi, I’m also a person who values loyalty. Since Nangong Nuannuan wanted to attack both of our families, we should stick together. I don’t believe that Nangong Nuannuan will be able to do anything to us if the Shi family and the ning family join forces.”

“Alright!” Old master Shi immediately agreed.

“But elder ning, you have to be careful. If this matter is found out, it’s no small matter.” Old master Shi reminded him like an older brother.

“Don’t worry, I’ll definitely do this flawlessly. Since we’re all wearing one, then your family should stop donating 3 billion. Isn’t that silly?”

Elder Shi’s lips curled into a smile. This was what he had wanted to discuss with elder ning before he called.

It was difficult to get the Shi family to fork out 3 billion, but with the help of elder ning, it was easy.

But he couldn’t say it himself. He needed old man ning to say it, so that the ning family wouldn’t give the Shi family any additional conditions.

hearing elder ning’s suggestion, elder shi sighed, ” “Ah, the Shi family and the ning family are different. Nangong Nuannuan has been keeping an eye on the Shi family. She’ll probably find out if she donated 3 billion after a quick check. It was the same to donate together now or to donate later after they had raised the money. He’ll be stabbed sooner or later.”

“Elder Shi, just listen to me on this. The Shi family really doesn’t need to donate 3 billion! Just think about it, this earthquake was the largest and most terrifying earthquake in Kamino’s history. After the media’s hype, everyone’s emotions were stirred up in one morning. Who knew how this would develop in the future? Just look at the shelves in the supermarket this morning, they were almost cleared out. It was enough to show that there were still many people working for this. Although a company’s donation is large, it’s limited. However, if a, B, C, D, and D donate one to two hundred, two to three hundred, or even a few billion, wouldn’t it be easy to gather them?”

Old master Shi looked bewildered, " "Will this Yingluo work? Shouldn't this kind of donation be recorded?"

"Don't worry, I'll get someone to do this. anything that comes through my shi family will be a mess. Speaking of which, no matter how powerful the judicial Department was, how could they know when and where someone had donated so much? The money of the individual investors is often the most terrifying."

"Ah, elder ning, you've really saved the Shi family's life! I, I, I, I, if this matter really succeeds, my Shi family will owe you a big favor!"

Elder ning laughed out loud. After thinking it through, his mood instantly brightened.

"Elder Shi, you're too polite. Since we're allies, we should help each other!"

### [My Sweet Physician Wife Calls The Shots](#)

#### **Chapter 2425**

In short, he had made the Shi family owe him a big favor.

"Yes, yes. We'll be of the same breath and branch in the future, it's not too much to say that we're a family, hahahahaha!"

Elder ning and elder Shi reached an agreement and hung up the phone happily.

"Grandpa, is it done?" Shi Yalin asked happily.

"It's done."

"I knew that Grandpa is the best." shi yalin was not stingy with her praise, " "then i'll ask my father and second uncle to hold a joint press conference immediately. on one hand, we'll announce that the medical association has found foreign researchers who have violated the rules by studying something related to human genetic modification. on the other hand, we'll announce that the shi family will be donating 3 billion yuan. It just so happens that there will be many injured people during the earthquake, and we can also take the opportunity to sell the newly developed ointment for bruises and falls. This way, not only can we wipe out the negative influence the Shi family has on the people, but we can also take the opportunity to earn a sum of money."

old master shi looked at his granddaughter, his eyes full of admiration.

"Are you sure there won't be any side effects? Yaling, the earthquake this time has attracted a lot of attention. The medication used on the injured must have gone through strict monitoring and examination. Once it's over "

"Don't worry, Grandpa. I've received my master's inheritance, and the things in my mind are not comparable to those idiotic professors. This medicine would not cause harm to the human body, but after using it, it would have a restraining effect on other ordinary medicines that treated injuries caused by falls. In other words, as long as they use the medicine produced by our Medical Association, their wounds will heal faster. However, if they think that our medicine is expensive and don't buy it, then they will probably use other medicines in the future, and it will be useless.

It just so happened that this medicine had already passed Inspection and Quarantine. The drug Administration had already positioned this medicine as a 2S grade medicine. Because it had not been put into the market yet, there was no time to set a price. we can set the price of this medicine at the highest price of the 2S grade. After this investment, we can first use a large amount of it during the earthquake.

No matter if it was the disaster victims or the rescue personnel from the combat Department, the injured were the most numerous. As long as the effect was good and the people in the disaster area felt that it was useful, there was no need to worry that the enthusiastic masses outside would not come to buy. When the time comes, they will think that our medicine is effective, but if they use other medicine after using our medicine, it won't be so effective. Then this medicine will definitely be bought back infinitely. This way, we can make as much money as we want."

When Grandpa Shi heard Shi Yalin's words, he was so happy that his eyes were almost squinted.

"Hahahaha, you look down on others who are giving up their wealth in an earthquake, but we're amassing wealth in an earthquake, and in such a reasonable and Noble way. When this earthquake is over, our Shi family will be the one to make a fortune. I really didn't expect that our Yalin could develop such a drug before he even went to university. You're really our family's Lucky Star!"

Shi Yalin smiled. Grandpa, after I've developed the medicine to improve the genes, it'll be the time for the Shi family to control the entire Kamino Kingdom.

"good! Good, good, good! With a granddaughter like you, our Shi family will definitely reach an unprecedented peak!"

Shi Yalin also smiled.

When the Shi family became the leader of the entire Kamino Kingdom, killing Chi Yang and Nangong Nuannuan would be a piece of cake!

### [My Sweet Physician Wife Calls The Shots](#)

#### **Chapter 2426**

Now that she no longer had her ability, she could only rely on things that these ignorant humans had never seen before. It was said that when the heavens closed a door, they would definitely open a window for you.

Although Feng shengxuan had killed her, no one knew that Wen Wan was still alive, and that she was living right under their noses.

And this cover of darkness would definitely accompany her to the peak of her life.

She would definitely think of a way to kill them.

While Shi Yalin and old master Shi were reveling in their joy, Shi MAODE and Shi maocheng immediately invited the most influential media representatives to hold a press conference at the Shi Yun group's headquarters after receiving news from old master Shi.

At the press conference, Shi maocheng first announced that they had discovered that someone had secretly used the resources of the medical Association to research genetic transfer drugs.

The entire globe was against the research of genetically modified drugs. Because with the development of human science, once the research and development of the genetically modified drugs were successful, it was likely to change the pattern of the whole world and the purpose of the harmonious development of the globe. Therefore, when the president of the world Alliance took the oath, he clearly forbade any country from researching the genetically modified drugs with any excuse. Those who violate this will be punished by the world Alliance.

As a National Medical Research Institute supported by Kamino, the medical Association had to take the lead in upholding the rules of the world Alliance.

Therefore, even if they had only discovered someone doing genetic research yesterday, they would make all the information about this person public today. What awaited him was the punishment of the law.

However, the earthquake had just occurred, so the media's focus was not on the medical personnel who carried out genetic modification research. What everyone was concerned about was how much the Shi family was going to donate. Would they donate 2 billion Yuan like Disheng Group, Digong Group, and other top corporations?

If the Shi family couldn't donate 2 billion, then the news would blow up.

Therefore, when the Shi family said that something like this had happened to the medical association during the earthquake, in addition to the incident with Lan Weisong in Haizhou, the Shi family felt deeply apologetic.

Because of the family's huge business and lack of management, there were many parasites in the Shi family. The Shi family announced here that they had let down everyone's trust, including the president's. However, the Shi family's original intention had never changed. The Shi family's intention to contribute to Kamino had never changed.

So this time, the Shi family decided to donate 3 billion Yuan to Shengzhou for disaster relief and post-disaster reconstruction.

The media exploded in an instant.

After all, the Nangong family-led Imperial Group had only donated 2 billion Yuan. However, even though the financial resources of Shi Yun Group were not as good as Imperial Group, they had actually donated 3 billion Yuan!

3 billion! Not 300,000, 3 million, or 30 million! It was 3 billion! What kind of concept was this? If 100 million Yuan could be used to build 10,000 square meters worth of houses, then 217.46 square meters worth of houses could be built.

3 billion, that's 6,500 one-unit houses!

Oh my God!

It had to be said that even though the Shi family had always been able to do as they pleased in the various states just because they had someone in the Internal Affairs Bureau, causing the Shi family's

reputation in the entire Kamino Kingdom to be bad, their actions this time had truly earned them a thumbs up from everyone.

### [My Sweet Physician Wife Calls The Shots](#)

#### **Chapter 2427**

The reporters took out their cameras to record and broadcast it on the news.

After Shi MAODE revealed the amount of the Shi family's donation and answered the reporters' questions, he shifted the main battlefield to Shi maocheng.

As the director of the medical Association, Shi maocheng explained to everyone what the injured people in the disaster area might face after the earthquake.

Then, he introduced the 2S grade ointment for bruises and injuries that the medical Association had just developed.

"As everyone knows, according to its function and effect, medicine is divided from the lowest to the highest into A, B, C, S, 2S, and the highest 3S. In the past few years, the medical Association had not developed many 3s-grade drugs. It wasn't that the medicine from the medical Association wasn't good, but that many medicines had different effects. Only those medicines that could cure major diseases or those that could control major diseases could have a chance to reach 3S.

As everyone knows, the common medicines on the market for injuries from falls and bruises are evaluated to be between A and C rank, not even S rank. But this time, the medicine developed by the medical Association to treat injuries from falls had reached 2S grade after a strict review by the drug Administration.

what did this mean? This means that a drug with only a C-rank treatment effect is so amazing that the drug Administration thinks it's more effective than the C-rank treatment, which is why it's given a 2S rank."

Shi maocheng took out the ointment developed by Shi Yalin and said to the reporters below the stage, "i wonder if anyone at the scene is injured? Although we've also arranged for external injury patients, in order to prevent everyone from feeling that we've hired a doctor, if there's anyone in the audience with injuries, please come up on stage. This way, not only can your injuries be treated, but the effect of our medicine can also be immediately displayed."

after shi maocheng finished speaking, someone actually raised his hand.

"I'm a reporter from dizhou's news channel. I accidentally hurt my knee on the way here. Does it count?"

"Is it bleeding? Did you break it?" Shi maocheng asked.

it's broken and bleeding. Can I use ointment? "

Shi maocheng laughed and said,"that's great!" I can't show you if you're not bleeding. this reporter, please come up."

After that, the female reporter limped up.

It could be seen that the injury on her knee was caused by the fall. There was still black dust and red blood stains on her knee.

“everyone has seen her wound. this reporter is from the dizhou news channel and has nothing to do with the shi family. Everyone can take a good shot of the wound on her knee to see if it’s real.”

After the reporters were done taking close-up shots, Shi maocheng asked a staff member to bring a bottle of water over and said, “everyone, take a look. this bottle in my hand is just an ordinary hydrogen peroxide that you can buy in any pharmacy.

Hydrogen peroxide had a good cleaning effect on anaerobic bacteria, necrotic tissue, and pus. As long as it’s a wound with pus, blood, dirt, or bacteria, we can use cheap hydrogen peroxide to disinfect it. ”

After that, Shi maocheng personally disinfected the female reporter’s knee.

The hydrogen peroxide touched her wound, and the female reporter couldn’t help but scream in pain. She held it in, and her face turned red.

### [My Sweet Physician Wife Calls The Shots](#)

#### **Chapter 2428: 31**

This further proved that the female reporter’s injury was really painful.

“Alright, the disinfection is complete now. Everyone looked at her wound and saw that blood was starting to ooze out again. But we’re not afraid, because we have the ointment from the time Fortune Group that can treat bruises. Everyone looked at the bottle and saw that it was filled with water. They shook it and could even hear the sound of water. But why do we call it ointment? This was because once the medicine inside was sprayed on the wound, it would become a cream-like substance. Everyone, come and take a look.”

After saying that, Shi maocheng shook the medicine in his hand and sprayed it on the female reporter’s knee three times.

All the cameras were focused on the female reporter’s wound. The water that was initially transparent began to coagulate rapidly and turned into a milky white substance the moment it was sprayed on the reporter’s wound. After spraying it again, the wound that could still be seen earlier was now almost completely covered in a layer of ointment. After the third spray, the wound was completely covered with a milky white cream.

The reporters were a little dumbfounded.

A reporter found this novel and wanted to ask a question, but was stopped by Shi maocheng.

“Please take a look at her wound before you ask any questions. Right now, her wound has been completely covered by our ointment for bruises. as the reporter’s wound wasn’t deep and there wasn’t much blood, we could remove the cream in half an hour at most. Now, please wait patiently.”

In half an hour, Shi maocheng allowed the reporters to tour around the Shiyun group. There was a special person who took the reporters to the headquarters of the Shiyun group and explained it to them. It could be said that he did not hold back on what he knew. only the people from the time fortune group avoided talking about the hospital of the medical association, which everyone was interested in.

Half an hour later, Shi maocheng smiled at the reporters and said, " "Now, it's time to witness a miracle. I believe everyone's cameras have recorded the injury on this reporter's knee, so we won't repeat it. Next, we'll just show everyone her current wound, and you should be able to understand how magical our ointment is."

Shi maocheng took the hydrogen peroxide from the helper's hand and said, "Everyone, take a look. The bottle in my hand is still the same bottle of hydrogen peroxide that I just used. I've used this bottle of water to clean her wound before. Now, you just need to spray some water on her wound and this ointment will immediately dissolve by itself."

After that, Shi maocheng sprayed hydrogen peroxide on the reporter's knees.

Everyone saw that the ointment that had quickly solidified on the female reporter's knee began to slide down at a speed visible to the naked eye.

Shi maocheng sprayed hydrogen peroxide on her knee about seven or eight times, and the ointment on the female reporter's knee slid off.

As he could not see it very clearly at the moment, Shi maocheng asked his assistant to get him a wet tissue and said, " "This is a sterilized wet tissue. Let's see the results."

After saying that, he wiped his wound with a wet tissue-

The entire venue was instantly filled with gasps.

Everyone pointed their cameras at the wound that was still bleeding.

In just half an hour, the patient's wounds had all healed!

All of them were healed!

"As you can see, although there is still a little scratch on the reporter's knee, it is really not important anymore. Because her wound has completely healed within half an hour."

### [My Sweet Physician Wife Calls The Shots](#)

#### **Chapter 2429: 32**

"This reporter, can you move your leg now and see if it hurts anywhere? Try squatting down a few more times and see if you feel uncomfortable anywhere."

Under everyone's dumbfounded gazes, the female reporter tried to bend her legs and kick them. After she felt no pain at all, she squatted on the spot and jumped a few times, her eyes wide open.

"It doesn't hurt anymore! It really did not hurt anymore! Not only does it look better on the outside, but it also doesn't hurt on the inside."

Everyone was stunned!

"How is it? Now do you know why the ointment, which can only be classified as C-grade, got a 2S grade evaluation from the Food and Drug Administration?"

Even without Shi maocheng's explanation, the reporters could already smell the huge commercial value in this.

The human body was made of flesh, and injuries from falling and hitting were simply the norm in the world! The most common case was when children accidentally fell while walking. Some mischievous children's legs and arms basically didn't have a good time throughout their childhood.

As the saying goes, "the pain is in the mother's heart when the child is injured." Once this kind of ointment was introduced, it would definitely be shot to nothing!

"Dean Shi, can you tell us the principle behind this ointment?"

Dean Shi, Chairman Shi just said that the medical Association absolutely doesn't allow the existence of genetically modified drugs. Your bottle of ointment for traumatic injuries has such a heaven-defying effect. May I ask if it was also genetically modified? "

"Dean Shi, there's a physiological process from the start of a wound to the end of its healing. How did this ointment make a person recover in half an hour? Are there any side effects?"

"Dean Shi, may I ask if this heaven-defying medicine in your hand was specially developed for this earthquake? can you guarantee the long-lasting effects of this product that was developed in such a short time? Will it be effective for the wounded in the disaster area?"

The reporters were shocked. It was supposed to be a press conference, but at this moment, they were asking questions one after another.

Shi maocheng gestured for everyone to be quiet. When all the cameras were pointed at him, he said, "

"I've listened to everyone's questions just now. Now, I'll give an answer to your questions. This ointment for traumatic injuries was developed by our Medical Association's medical research team of experts who worked hard day and night. Its healing principle is also part of our intellectual property rights, so please understand that I can't comment on the healing principle of the ointment.

First, this drug is definitely not a genetically modified drug, because it doesn't repair human genes, but human tissues. Everyone should know the difference between human genes and human tissues, right? Although these two terms both referred to the inside of the human body, they were completely unrelated concepts. genes were genes. genes were the foundation to forge a person. changing genes would change a person's foundation.

However, tissue referred to the internal structure of the human body, such as bones, blood channels, and skin. These were all called human tissues. This ointment was targeted at the human body's tissues. It could repair the human body's injuries from the root. For example, the skin tissue would rupture and bleed when falling, soft tissue contusions caused by damaged meridians, and fractures caused by bone injuries. The more serious the injury, the more medicine you need to apply and the longer the recovery time."

[My Sweet Physician Wife Calls The Shots](#)

**Chapter 2430: 33**

“But as you all saw, the reporter’s knee has completely recovered in less than half an hour. compared to the young people who need two to three days to recover from a knee injury, and the older people need at least a week to recover, there’s no need to say much about the effects of our medicine! The reason why our medicine is so magical is because our medicine works by repairing tissue.

Of course, many people would also wonder if such a magical medicine was a little heaven-defying. Would the side effects be great? Would it cause harm to the human body? I only have one answer to everyone’s questions in this regard. Our drug has passed the strict review of the drug Administration Department. The review proves that our drug is completely harmless to the human body! Everyone, remember, it’s completely harmless!”

Shi maocheng’s words caused the audience to explode.

If such a good medicine was completely harmless to the human body, wouldn’t it be a divine medicine?

as expected, shi maocheng continued, “it wouldn’t be an exaggeration to call our medicine divine.” This is also the first medicine that our Medical Association has developed so far to repair human tissue. This is the hard work of many medical research doctors from the medical Association. It has also passed the strict review of the drug Administration Department, so you can use it without worry.

I can understand everyone’s doubts about this medicine, but please believe that our society is progressing and the times are developing. In the past, people didn’t dare to imagine things like surgery. They thought that their bodies were inherited from their parents. It was unfilial to cut their hair and move their bodies. Who would have thought that thousands of years later, surgery was already a normal thing for ordinary people? perhaps everyone would now think that this medicine’s efficacy was amazing and doubt its harm to the human body. However, as the president of the medical Association, I can tell everyone with great responsibility that the medical Association is a place that specializes in the research of high-grade drugs. In the future, we will also develop drugs with better efficacy!”

Shi maocheng’s words drew a round of enthusiastic applause from the audience. if the public and the media had some negative feelings about the shi family and the medical association because of some previous events, then today, whether it was to find the person who researched the genetic modification and bring him to justice, donate 3 billion yuan, or take out the heaven-defying medicine, it would be a major bonus for the shi family and the medical association.

“Then may I ask principal Shi, can this medicine be used in earthquake-stricken areas? You also know that there are a lot of injured people there, and most of them were smashed or cut.” A reporter asked.

“Of course!” Shi maocheng nodded and said firmly, “When we first developed this medicine, on one hand, we felt that it was often needed, and on the other hand, the investment in this kind of research was relatively smaller. Even so, whether it was human, financial, or material resources, the research of this medicine cost tens of billions. however, the heavens were still watching. they allowed us to develop the drug right before the earthquake and passed through the layers of inspection by the drug administration. I hereby announce that the latest SC-1 drug developed by the medical Association is officially on the market. The first batch of 100000 boxes worth 40 million will be donated to the earthquake-stricken area in the name of the Shi family.”

Shi maocheng’s words drew another round of enthusiastic applause from the audience.
