

Physician Wife 2441

[My Sweet Physician Wife Calls The Shots](#)

Chapter 2441

When Nangong Nuannuan had first analyzed the genetic structure of the drug, she had felt that the drug that she did not know about was definitely not from this world.

However, when she really drew out the genes of the medicine and saw that they were completely different from the genes of any medicine, plant, or synthetic medicine, Nangong Nuannuan was still shocked.

Yingying believed that there were other life forms in this universe. She even believed that there might be a world on the same glory planet that was completely parallel to their world. However, imagination was just imagination. When a link that did not belong to this planet suddenly appeared in her field of vision, Nangong Nuannuan felt that this world was really a fantasy.

Feng shengxuan suddenly received a call from Saibo country in the early hours of the morning.

The call was from the old man in an encrypted form.

"Hello," he said. Feng shengxuan picked up the phone lazily.

"Little Xuan, I heard that Chi Yuan Cheng was attacked the day before yesterday? Did you do this?"

"No." Feng shengxuan denied it without a second thought.

Feng Kun:

After sighing, Feng Luan continued, "Xiao Xuan, I know you've always been on guard against me. You're afraid that one day I'll take your place as King. But, Xiao Xuan, I'm your uncle, your biological uncle. If I really wanted the position of King, I wouldn't have let your father become King back then, and I wouldn't have supported you for the past 17 years after your father's death. Can't you have a little more trust in Big Uncle?"

"What's the matter?" Feng shengxuan still didn't admit that he was the one who had done it. he felt that the more he acted this way, the more natural his expression would be.

In any case, his own forces were already mixed with his people. When he launched the attack and who he had lost, the other party should be very clear.

Hearing the obvious annoyance and impatience in Feng shengxuan's tone, Feng Luan said, "Nothing, I was just worried about you and wanted to give you a call. You didn't manage to kill him, so be it. There'll definitely be more chances in the future, but after you did it, it's very likely that you've already alerted the enemy. Why don't you come back to Saibo and think about it again? What if Chi Yang suspects you, and you're right under his nose? wouldn't that be very dangerous?"

"No need. I know what I'm doing."

After that, Feng shengxuan hung up the phone.

Hearing the beeping sound from the other end of the phone, Feng Kun's lips curled up into a smile.

Only when Feng shengxuan and Chi Yang killed each other would there be true death. Otherwise, it would all be in vain!

Now, it was only the beginning of their killing!

After Feng shengxuan hung up, he smiled coldly.

Playing dirty with him and Chi Yang?

Let's see who's the one to die!

This old man probably really didn't take him seriously, so he let him place his spies around him and didn't touch him.

However, he did not know that his grandfather and father had already seen through his intentions. Therefore, when he said that he didn't want to eat lunch and wanted to rest in his room, he knew that he wasn't in his room at all.

However, he still did not understand why this person would suddenly appear in Kamino, and how he could suddenly return to Saibo from Kamino.

The two countries were so close to each other. What did he do? What was he?

Was he an alien?

If they were aliens, why did they have to go against the Chi family?

[My Sweet Physician Wife Calls The Shots](#)

Chapter 2442

As she was deep in thought, she suddenly received a call from Nangong Nuannuan, who asked her to come down to the basement.

feng shengxuan quickly put on his clothes and went to the basement.

"Why aren't you sleeping? Haven't you finished your research?"

Feng shengxuan knew that Nangong Nuannuan was researching a new type of medicine that the medical Association had just sent to the disaster area that day. He had thought that they had already developed it and that it was genetic modification. After all, when he found out that Wen Wan had been possessed by that old geezer after her death, Feng shengxuan had lost all hope that the medicine was not genetically modified. He had not expected Nangong Nuannuan to have spent so much time researching it.

When he reached Nangong Nuannuan's side and saw that she was still in shock, Feng shengxuan asked again, "Is there a problem with this medicine? Could it be that it's not genetic modification?"

That's impossible! After all, all the experiments Wen Wan had done at KE were genetic experiments.

Furthermore, it was a genetic experiment that shaped people into humanoid machines. And he had succeeded.

"I'll show you a few things."

"Yes." Feng shengxuan nodded.

After she found out that Feng shengxuan was King and that he was a child of the Chi family, the barrier between Nangong Nuannuan and Feng shengxuan had been completely broken. The two of them had become very close friends.

Nangong Nuannuan was nice to Feng shengxuan because he was the one who had grown up with her.

And the fact that Feng shengxuan and Nangong Nuannuan were not estranged made Chi zeyao's teeth hurt.

This thing with no emotional intelligence. She clearly knew that she was hypnotized, but she still wanted to steal someone's girlfriend.

Although he said that he wouldn't fight with Chi Yang, as the Father of this thing with no emotional intelligence, he could clearly feel that this unreliable son of his was using his own way to compete with Chi Yang.

Chi Yang was good to Nuannuan, so he had to think of ways to be even better to Nuannuan. Since Chi Yang couldn't be by Nuannuan's side, he would be by her side almost all the time.

Even Chi zeyao was depressed for Chi Yang.

Nangong Nuannuan gave Feng shengxuan the items she had come up with.

here, look. This is your rough genetic chain I saw when I treated you.

Feng shengxuan:

"This is big brother chiyang's."

"This is my big brother's."

"This is your dad's."

Feng shengxuan looked at the almost identical items and felt his head throb. "Why are you showing me this? Aren't these the same?"

"It's different." Nangong Nuannuan pointed at two of them and said, "You see, this is what you look like, but big brother chiyang is like this. You see, this is what you're doing here, but big brother chiyang is like this. Look at your dad and my brother, they're having fun here!"

Feng shengxuan listened to Nangong Nuannuan's explanation for a long time. "Nuan Nuan, I'm not very professional when it comes to these Yingluo."

Nangong Nuannuan smacked his hand and said, "don't joke around. You call that unprofessional? You don't understand at all, okay?"

Feng shengxuan thought, "since Yingluo doesn't like me, why did you show it to me?"

"Here, look at this. This was a cat's genetic chain. This is the genetic chain of a dog."

Feng shengxuan:

Seeing that he wanted to say something but was hesitating to go back to sleep, Nangong Nuannuan said, "do you see anything?"

"No," Feng shengxuan replied.

Nangong Nuannuan rolled her eyes at him and said, "don't you think that human genes are different from the genes of cats and dogs?" However, even though there are some differences between humans, the entire genetic chain is roughly the same."

[My Sweet Physician Wife Calls The Shots](#)

Chapter 2443

Feng shengxuan's handsome features were twisted by Nangong Nuannuan's words.

"You called me down so late at night just to tell me this? The things you mentioned should be mentioned in the genetic books, right?" This wasn't how Nangong Nuannuan would act!

"Of course I'm not telling you this. However, I want you to understand that every species is connected, especially those of the same species. As for the classification of species, on a smaller scale, for example, the genetic chain between humans was almost exactly the same at first glance, but each of them was different when they were further subdivided. however, on a larger scale, species could also be classified as moving, living objects, and living but immobile objects. To put it bluntly, it was like the difference between an animal and a plant. You see, the human genetic chain and the genetic chain of cats and dogs have this part. And this part of the genetic chain was in charge of their mind, thoughts, and actions. however, the plants did not have this area. that's why the genetic chain of plants looks much simpler than that of humans and animals."

Nangong Nuannuan placed the genetic chain diagram of the plant in front of Feng shengxuan. Feng shengxuan compared the gene strands of humans and animals, then looked at the gene strands of plants. He was surprised to find that, as expected, when he removed the gene strands that represented thought and action, the gene strands of humans and animals looked very similar to the gene strands of plants.

"Here, take a look. This is the genetic chain of a plant. This is the genetic chain of various medicinal plants. This is the chemical link in Western medicine. although the chemical links in Western medicine are all artificial, you see, no matter what kind of medicine is combined, every chemical link has the same outline and direction as the genetic chain of plants. This is because only when the genetic chain or chemical chain works in the human body can the damaged parts of the human body be repaired."

Feng shengxuan looked at the maps that Nangong Nuannuan had passed to him, and he gradually realized the secret behind them.

"Look again. This is the internal structure of wood, stone, gems, and diamonds. The so-called structure was the molecular structure of an inanimate object. After all, everything on our planet has the same basic characteristics as this planet. You see, even the wood with the lowest density and the diamond with the highest density have the same general structure."

Nangong Nuannuan then used a red pen to sketch out the structure of the objects.

look at these things with life. The genes represent the connection and control of life. If you remove this big piece, only this small piece is left. You can enlarge this small piece and see if it's the same structure as these non-living things.

Feng shengxuan's eyes almost popped out of his head.

It could even be like this?

"What about the human body? Where is this part of the human body?"

"This is the genetic chain in charge of the human body's head thinking and action. Remove it. This is the part that is responsible for the human body's life. Look, not only you have it, big brother chiyang, my big brother and second uncle also have it. If you Zoom in on this small piece, will it be roughly the same as the basic molecular structure of the object?"

Feng shengxuan looked at Nangong Nuannuan in shock and said sincerely, "Nuannuan, you're a genius!"

"I've always been a genius!"

[My Sweet Physician Wife Calls The Shots](#)

Chapter 2444

Nangong Nuannuan giggled, not at all trying to be humble.

"What's the result? What kind of genetic chain did the medicine developed by the medical Association have? Or a chemical chain?" Feng shengxuan was getting impatient.

"See for yourself!"

Nangong Nuannuan printed out the things she had drawn on the computer many times and handed them to Feng shengxuan.

Feng shengxuan took a closer look and raised his head in shock.

this Kasaya doesn't seem to have any basic molecular structure! Feng shengxuan was a little confused as he looked at the things printed on the paper, which were completely different from all the objects, biology, chemical chains, and genetic chains.

After clearing his mind, Feng shengxuan's eyes widened in disbelief.

"Nuan Nuan, I remember you saying that everything on our planet has the same basic characteristics as this planet."

Nangong Nuannuan nodded and said, "No matter what it was, it was either born from this planet or developed after birth. No matter how they change in the end, the only thing that will never change is the molecular structure that the planet gave them when they first existed on this planet."

but the chemical chain or the molecular structure of this drug is completely different from the molecular structure of our planet! Feng shengxuan's expression had turned into one of shock.

yes, that's why I wanted to ask you. Did you live with two aliens for 28 years? "

feng shengxuan:

“Otherwise, how could such a foreign object appear in their hands?”

This really could be considered a foreign object.

If there wasn't so much evidence, Feng shengxuan might not have believed it. But now, he had no choice but to.

He thought about Feng SU's calmness after Wen Wan was killed, and how he brought Wen Wan's soul back to life in Shi Yalin's body. Feng shengxuan couldn't figure out how this person could travel so easily between countries that took more than ten hours to fly to and from in the morning, to Kamino, and then back to SIBO in the afternoon. He didn't even leave the castle. But now, he was suddenly enlightened.

“Feng Luan and Wen Wan are both aliens, so Feng Luan knows the soul resurrection spell and can travel between the two countries freely?”

“I think so.” Nangong Nuannuan nodded seriously.

Feng shengxuan:

After a long while, Feng shengxuan couldn't help but ask, “ “Since they're aliens, how could they have a grudge against the Chi family?”

“It's not the Chi family, didn't second uncle say so? Feng Luan actually has a grudge against you and brother chiyang, and he wants you to kill each other.”

“Chi Yang and I haven't been to any other planets, nor have we dug up his ancestral grave. Is he crazy? Why do you have to do everything you can to make us kill each other?”

Nangong Nuannuan shook her head.

She wasn't sure about this either.

Seeing that Feng shengxuan was still thinking about it, Nangong Nuannuan said, “ “Alright, stop thinking about it. Wasn't there a saying that perverted thinking couldn't be guessed? If you really think you can guess why he's doing this, then you're a pervert.”

Feng shengxuan:

After being speechless for a while, Feng shengxuan asked, “ ” how do you plan to reply to the president?
”

Nangong Nuannuan smiled and whispered something into Feng shengxuan's ear.

Feng shengxuan glanced at her but didn't say anything.

[My Sweet Physician Wife Calls The Shots](#)

Chapter 2445

This little girl had long grown to the point where she could completely take charge of an area on her own. In the future, it would not only be him helping her one-sided. In the future, they would be real siblings and comrades.

However, he still wanted to carry her back to his home. What should he do?

the next day, after nangong nuannuan had set a time with the president, the president invited her to the same villa they had been in before.

The president's men had seen Nangong Nuannuan before, so no one stopped her when she entered. However, the bodyguards stopped Nangong Nuannuan's employees.

Nangong Nuannuan glanced at the bodyguard and asked, " "Why did you stop her?"

I'm sorry, miss Nangong. Because the president came out to see you in secret, he didn't bring many people with him. In order to ensure his safety, you can only go in alone.

Nangong Nuannuan thought for a moment, then nodded and said to the male assistant, " "Then you can wait for me here."

"Yes."

The head of the bodyguards heaved a sigh of relief when he saw Nangong Nuannuan let his assistant out without any hesitation, even though he knew that nothing would happen.

When Nangong Nuannuan arrived at the villa, a bodyguard led her there.

When the president saw Nangong Nuannuan, he smiled warmly.

"Nuannuan, you're here?"

"yes." Nangong Nuannuan nodded.

"Have the results of the examination I asked you to do yesterday come out?"

"Yes." nangong nuannuan nodded again.

"what's the result?" The president asked unhurriedly.

Nangong Nuannuan glanced at the president's bodyguard and said, " Mr. President, can we have a private talk in the room? "

The president nodded and said, " sure.

He stood up and brought Nangong Nuannuan to his study.

At the door of the study, the president said to the two bodyguards beside him, " "You guys can stay outside."

The bodyguard didn't reply, obviously still a little worried.

They didn't follow him yesterday, but after the president went back, they felt that something was wrong. He couldn't tell what was wrong. But yesterday, the president only came out to see Nangong Nuannuan. However, after meeting her, she brought back four people, and those four people's positions were obviously higher than theirs.

if you think that they are completely trustworthy and won't spread any rumors, you can come in.

"We won't say anything." The bodyguard immediately expressed his loyalty.

However, the president waved his hand and said, "no need." You guys just stand guard outside."

the two bodyguards' eyes darkened slightly. they looked at nangong nuannuan with annoyance and malice, then closed the door.

They felt that the president's sudden return of four people and his trust in them was all because of Nangong Nuannuan.

The president had already treated her so well. What else did she want?

The president led Nangong Nuannuan into his study. He sat down at his desk and gestured for her to sit down.

"So, what are the results of this examination?"

the results of this examination were surprisingly good.

"Oh?" The president was surprised by Nangong Nuannuan's answer. after all, shi yalin was so worried yesterday that he thought there was really something wrong with the medicine.

"no problem at all?"

"it's a very good medicine."

"It can be mass produced?" the president asked.

[My Sweet Physician Wife Calls The Shots](#)

Chapter 2446

"Yes."

The president looked at Nangong Nuannuan and nodded.

"Then you can go back if there's nothing else, Yueyue."

"there's one more thing," nangong nuannuan said with a smile.

"What?" The president kept looking into Nangong Nuannuan's eyes, trying to figure out something from her deep gaze.

"I'm going to remove your hypnosis."

The president was shocked. He was about to get up, but there were vortexes in the depths of his eyes. The vortex directly pulled him into the unfathomably deep sea.

The president felt like he was in the middle of the ocean and couldn't breathe. He struggled with all his might, but when he couldn't hold it in anymore, he finally lost all his breath.

A large amount of seawater poured into his nose and mouth, but the feeling of near death did not come. Instead, he found that he could actually breathe freely in the sea.

However, at this moment, he was at the bottom of the sea and was suppressed by the water above. He could not move freely.

Although he could breathe freely in the sea, he was still a human. So, the president decided to return to the shore.

however, no matter how he swam upwards, no matter how fast he swam, he could not see the surface of the sea above his head.

Suddenly, two people sank down from above. They were more than ten meters away from him and were silently sinking into the abyss.

And those two people were none other than his wife and son!

In the distance, his wife and son were sinking with their eyes closed.

The president was shocked and wanted to swim over to help his wife and child.

However, when he was about seven to eight meters away from his wife and children, Nangong Nuannuan swam from the opposite side to his wife and children.

The president was shocked and his face changed. He shouted, "Nangong Nuannuan, you're not allowed to hurt my wife and children. Otherwise, I'll definitely kill your entire Nangong family!"

"Oh, really? Then you must have the ability to do so."

Nangong Nuannuan's words reached the president's ears clearly, and he even flashed a strange smile at him.

no! the president shouted in shock, "I won't deal with the Nangong family anymore! Don't hurt my wife and children! Otherwise, I won't let you off!"

however, he realized that nangong nuannuan would not listen to him. she pulled out her dagger and slashed it across his son's neck.

In an instant, blood flowed freely, soaking the sea and dyeing the entire bottom of the sea red.

The president glared at Nangong Nuannuan, who had killed his son, and cried out in grief, "ah! Nangong Nuannuan, I'm going to kill you!"

At this moment, he had already swum to Nangong Nuannuan's side. He pulled out a self-defense gun from his bag and shot Nangong Nuannuan without mercy.

However, due to the water resistance, the speed and range of the bullet in the water were limited.

Nangong Nuannuan had a strange smile on her face as she easily dodged the president's attack.

The 16 bullets were quickly used up by the president. However, to his despair, he realized that Nangong Nuannuan was not injured at all. No matter which direction he shot from, she was not affected at all.

"President, say goodbye to your wife!" After Nangong Nuannuan finished speaking, she stabbed the knife into the artery on the president's wife's throat.

“Stop!”

The president shouted, but there was nothing he could do to stop the powerful Nangong Nuannuan.

As long as he didn't move his hands, his body would sink. He couldn't even steady himself, let alone fight Nangong Nuannuan, who was in the water as if she was walking on flat ground.

[My Sweet Physician Wife Calls The Shots](#)

Chapter 2447: 50

The dagger was about to pierce into the artery on the president's wife's neck. The president could even see the skin of his wife's artery being cut open.

However, at this critical moment, his wife suddenly opened her eyes.

Just as she was about to open her eyes, her hand had already turned into a knife, and one of her hands was slashing toward Nangong Nuannuan's neck.

At the same time, he took out a pistol from his bag with his other hand. He was about to pull the trigger and severely injure Nangong Nuannuan, who was close at hand.

Nangong Nuannuan, who was caught off guard, was going to die. However, the dagger that was originally aimed at the president's wife's neck suddenly changed direction. The moment the president's wife was about to slash at her, she stabbed her with lightning speed.

The president's wife had not expected Nangong Nuannuan's dagger to suddenly change direction. After her hand was stabbed, she screamed and pulled the trigger with her other hand.

Who knew that her wrist would suddenly feel like it had been pricked by a needle, producing a sharp pain.

The president's wife screamed again, and her angry eyes suddenly emitted a blue ripple.

The ripples shook, and the entire sea set off a violent storm. The president subconsciously wanted to hold the object beside him tightly, but he found that there was nothing he could hold.

The giant vortex wrapped itself tightly around the president, his wife, and Nangong Nuannuan, as if it was going to swallow them up in the next moment.

But at this time, the president's wife once again burst out with a hoarse roar without warning.

Her eyes were red and her arms were wide open. It was as if she was embracing the ocean as she confronted Nangong Nuannuan.

Nangong Nuannuan, who was standing beside her, opened her arms and made the same gesture as her. Her cheeks were gradually turning red because she had used too much force.

The whirlpool in the sea began to slow down at this moment. The whirlpool began to shrink gradually, and the sea water in the entire space began to distort under the force of the two sides.

One moment to the left, and the next moment to the right.

Bubbles gradually rose in the sea, and the entire sea area was extremely depressing.

“Ah!”

The president realized that his wife was still being attacked. Seeing her cry out in pain, the president felt as if a knife was being twisted in his heart. He shouted, “Nangong Nuannuan, what do you want? You say it! As long as it’s something you need, I’ll do my best to help you.”

However, Nangong Nuannuan ignored him and continued to fight with his wife.

“Ah!”

Suddenly, his wife screamed again. Two streams of blood slowly oozed out of her eyes, and the blood that flowed out even had a strange light.

The president’s eyes were filled with fear. He couldn’t care about anything else and tried to swim over to hug Nangong Nuannuan to free his wife.

The moment he exerted his strength, the president’s foot suddenly slammed into the ground with a loud thud.

The two bodyguards standing outside the door had thought that the president and Nangong Nuannuan had been quiet since they entered. Even if the door was soundproof, they should have made some small talk or walked around after they entered.

but there was none!

There had been no sound since the president went in.

The president seemed to have changed into a different person after meeting Nangong Nuannuan the day before. He was here to meet Nangong Nuannuan again today.

They didn’t know the relationship between the president and Nangong Nuannuan, but they felt that it was wrong for the president to meet Nangong Nuannuan. Now that they had met again, they couldn’t help but feel that something was wrong.

[My Sweet Physician Wife Calls The Shots](#)

Chapter 2448

At this moment, she finally heard a sound from inside the door. It was the sound of a foot kicking the floor.

There were only two people inside. One was the president and the other was Nangong Nuannuan. Nangong Nuannuan was wearing high-heeled female shoes from a famous brand. The front was slightly pointed, so there was no way she could kick with such a loud sound.

It was obvious that the sound was from the president.

The two of them looked at each other, and there was almost no discussion. He opened the door and went in.

nangong nuannuan had locked the door when she closed it, but the two bodyguards had locks on them, so they opened the door very quickly.

The moment the door was opened, the other one had already aimed his gun inside.

however,

What the two bodyguards had imagined did not happen.

in the study, the president sat in front of his desk, and nangong nuannuan sat opposite him.

The door suddenly opened, and Nangong Nuannuan turned to look at the two armed bodyguards, her eyes filled with confusion.

The president's face darkened.

Even if he didn't say or do anything, his aura was extremely powerful just by sitting there, and the eyes that he cast at them were also extremely sharp.

Only people in high positions could have such sharp eyes.

The two bodyguards knew that they had been dissatisfied with the president's arrangements for them since yesterday. The president was already very dissatisfied with them.

just now, the president didn't let them in, but they disobeyed his orders and pointed their guns at the people inside without greeting him. the president was angry.

The two of them immediately stood up straight and put their guns back on their waists, ready to accept the president's punishment.

However, the president only said one word.

"Get lost!"

their hearts trembled, and they quickly rolled out of the study. then, they closed the door and locked the inner lock with the key.

The two of them stood outside the door again and looked at each other. They both saw each other's faces covered in sweat.

Yingying was really too terrifying.

"what's going on? What's the problem?"

As soon as the two of them stood still, the new security Captain came up and asked.

"It's nothing. We just heard the president's shoe kick the desk. We thought something happened to the president inside, so we rushed in without permission. The result is ..."

Looking at the other party's expression, the bodyguard Captain knew that there was no problem in the end.

"Be more careful in the future. The president hired you as his bodyguards because he trusts you. Don't get too cocky."

Then, he turned around and left.

He knew from the president that these two people were the president's most trusted people. However, they had been sent out on another mission yesterday, so they did not come with the president.

They had already replaced eight of their people with the president. If all the people around the president were replaced at once, it would be easy to arouse suspicion even if the president protected them.

Therefore, they didn't kill these two. on the one hand, it was to better cover for himself. on the other hand, the president was only under hypnosis in some aspects, so he still trusted the two of them. they definitely couldn't kill him just because they said so. After all, the president only wanted to mess with Nangong Nuannuan, not become their puppet.

after the captain left, the two remaining bodyguards looked at each other and saw the helplessness and confusion in each other's eyes.

after all, they had been with the president for so many years and they knew what kind of person he was. Captain of the bodyguards, the president would definitely not be changed randomly, but what went wrong in the middle?

[My Sweet Physician Wife Calls The Shots](#)

Chapter 2449

2449 High-tech (2)

The two people outside the door were deep in thought, while the two people inside the door looked at each other and then turned their heads to the side.

The two people behind the door were none other than Feng shengxuan, who was dressed as the president, and Baili Yue, who was dressed as the third Nangong Nuannuan.

three meters behind the president was not the real bookshelf in the study room. there were no books on it, but a 3D paper as thin as a cicada's wings.

yesterday, after nangong nuannuan spoke to the president on the phone, she realized that shi yalin might have her eyes on the president and that the other party might have done something to the president before she did.

She had wanted to rush to the president's side to protect him, but she could not. As long as the other party was determined to make a move, she would probably be able to get the president no matter what. After all, this person was the venomous snake that had taken her and Chi Yang's lives in her previous life.

So, on second thought, she delayed the time to see the president. In order to prevent being discovered by the poisonous snakes, she not only changed her appearance, but also used the technique that Bai Liyue taught her to change her bones and armor. Even her voice, pupils, and fingerprints were all changed to prevent the cunning enemy from discovering her.

he even drank a cup of self-made water that could change the taste of his body before he left. After drinking this water, the body would regain a new taste and completely cover up the original aura.

So when she saw someone upstairs with her x-ray vision yesterday, and not only was there someone, but that person was Feng Kun, she was shocked beyond words. At the same time, he was glad that he had made full preparations.

Nangong Nuannuan didn't know that her attentiveness would be of great help to them in the future.

Because to Feng Kun, no disguise could hide from his eyes. Unless he changed his aura completely. Otherwise, he would have been able to determine who he had met based on their auras.

Nangong Nuannuan was so meticulous that she had even taken precautions against this.

It was a lucky hit!

When she had disguised herself as an employee of Disheng to meet the president yesterday, Nangong Nuannuan had taken a good look at the entire villa's structure, area, size, the distribution of each room, what was placed in each room, where to start, and everything else.

With her photographic memory, Nangong Nuannuan managed to create a 3D image.

Although the picture was just a piece of paper as thin as a cicada's wing, when it was placed 50 centimeters behind Feng Shengxuan and stretched from the left side of the wall to the right side, the 3D effect came into play.

Looking in from the door, or even standing 1.5 meters away from Feng Shengxuan, no matter how one looked, the bookshelf was just three meters behind Feng Shengxuan. There were books on it.

However, if one stood within 1.5 meters, the visual deception of the 3D rendering would be reduced, and the flaws would be exposed.

In reality, the 3D paper was 50 centimeters behind Feng Shengxuan, and the real space of the study was behind the paper. The bookshelf was against the wall.

At that moment, the president was lying on a chair behind a piece of paper. Beside him was Huang Ziyu, who had already entered his dream realm. On the other side was Nangong Nuannuan.

However, Huang Ziyu had disguised himself as Nangong Nuannuan, so visually, there were two Nangong Nuannuan standing beside the president. Outside, there was a third Bai Liyue, who was impersonating Nangong Nuannuan, and a second president, who was impersonated by Feng Shengxuan.

[My Sweet Physician Wife Calls The Shots](#)

Chapter 2450

In the dream space, the president was extremely worried when he saw his wife being attacked. He plunged into the distorted water curtain, trying to dispel the spell.

Who knew that the distorted sea water seemed to form a space of its own, and his body was unable to move forward even a step after colliding into this space.

"Ah!"

The president's wife screamed again. Her ears and nose were bleeding rapidly.

the blood that flowed out was the same as the blood that flowed out of his eyes, with a little bit of light.

the entire ocean was still shaking violently, as if a virtual space was about to shatter.

the president's wife suddenly retracted her hand, and the violently shaking and twisted seawater gushed toward her.

The huge waves crashed into her body, piercing through her skin and leaving at least 30 small holes in her body.

It was not blood that flowed out of those holes, but thin rays of light.

A force that came out of nowhere was still attacking the president's wife, but she no longer screamed. Instead, she used all her strength in the sea.

the seawater that was crashing toward her and piercing her body receded rapidly like the tide with her as the center. The entire space quickly turned into a black hole that seemed to be able to swallow everything.

The president stood in the black hole, completely dumbfounded.

On the other hand, Nangong Nuannuan's expression was grave as she tried to control the receding sea water.

However, the woman's strength seemed to have suddenly increased, making her unable to hold back the seawater.

Nangong Nuannuan could only concentrate her power and be prepared to be attacked by the retreating sea water at any time.

The seawater that had suddenly receded suddenly rose slowly from the ground, forming a tough wall around everyone.

The wall slowly condensed into sharp spikes, each of which could easily penetrate a person's body.

There were hundreds of thousands of spikes on the wall like porcupines. It was as if a ferocious monster had opened its bloody mouth at Nangong Nuannuan.

'Nangong Nuannuan's' eyes were filled with fear. She knew that if she left the dream realm now, she would be unscathed. However, once she left, the attempt to remove the hypnosis would fail.

When the president woke up, not only would he put his sister-in-law and company on his blacklist, but it would also be impossible for him to get so close to brother President in the future. The biggest problem was that the Nangong family would be put on the president's blacklist and might even become public Enemies under the control of certain forces.

looking at the sharp spikes on the wall formed by the seawater that were about to become the best weapon, Huang Ziyu, who had transformed into Nangong Nuannuan, realized that he could not control the seawater no matter what.

Feng Kun's strength was really much, much higher than hers.

At this moment, Huang Ziyu could only be on high alert and think of a way to not let himself suffer too heavy an injury. Whether or not it would succeed, he could only leave it to Nangong Nuannuan.

In the president's office, there were two Nangong Nuannuan other than the president who was sleeping on the chair.

One of them was Huang Ziyu in Nangong Nuannuan's form, who had just entered through the main entrance and had been modified by Selina's high-tech means from his appearance to his figure, his voice to his aura, his eye membrane to his fingerprints. The other was the real Nangong Nuannuan, who had already entered the building through the slightly weaker defense at the back before Huang Ziyu had even entered.
