

## Physician Wife 2931

### [My Sweet Physician Wife Calls The Shots](#)

#### Chapter 2931

"I think so too," Chi zeyao nodded. However, Yingluo "

"What?" Master Chi looked at his son. It was rare to see such an expression on his calm face.

Nangong Nuannuan became the leader of the stabbing sect again. second aunt is angry with you and doesn't want to come anymore, right? "

how did you know? " Chi zeyao asked in surprise.

Nangong Nuannuan had an 'I knew it' expression on her face. She pouted and ignored her second uncle.

She felt that her second uncle was a big pig trotter!

"Chi Yang?" Chi zeyao looked at his nephew, his face filled with a thirst for knowledge and a slight sense of urgency.

However, Chi Yang, who had been taught by his wife before, was not so easy to talk to. He calmly picked up the napkin on the side, wiped the corner of his mouth gracefully, and put the napkin on the table, then looked at Chi zeyao.

second uncle, don't you realize why second aunt is ignoring you? "

Chi zeyao frowned slightly. is it because I didn't tell her about my surgery? "

Chi Yang did not say anything.

"But I'm just afraid that she'll be worried,"

Old master Chi nodded. yeah, you're just afraid that she'll be worried. So Ji Mian ignored you because of this? Not coming to Kamino? Then you should have a good talk with her!"

dad, I've already convinced them if I could, " Chi zeyao said helplessly. it wasn't easy for me to secure this collaboration project. I've also contacted Saibo through li Heyi. In the end, the families of cyber nation fought to the death, but she refused to come."

Old master Chi's face was filled with disbelief. hey, why is this girl so stubborn? I thought she had a good personality when I was with her!"

"Dad, Ji Mian has a bad temper. You might have some misunderstanding about her."

"Then you can do it again. I think she's very nice in front of you. Did you do something to make my daughter-in-law unhappy?"

Chi zeyao's head hurt. I didn't! I've already pampered her so much, why would I make her unhappy?"

Nangong Nuannuan looked at the men in the room, then at her grandfather and uncle. He felt that this group of men was really hopeless.

What exactly made her feel that the men from the Nangong and Chi families had very high emotional intelligence?

This misunderstanding was a little too much!

His second aunt couldn't stand it anymore and couldn't help but say, "Zeyao, I remember when chiyang was hospitalized in Shengzhou and Ji Mian came to accompany you, you seemed to have promised her that you would tell her everything in the future and would never lie to her again,"

Second uncle looked at his second aunt and said, "how can this be a lie?" Zeyao didn't want her to worry, did he?"

Second aunt looked at second uncle speechlessly. "So, if something bad happens to you, you're not going to tell me, are you? Are you planning to keep me in the dark?"

Second uncle was about to agree when Nangong Nuannuan, who was standing beside him, coughed. Second uncle glanced at his eldest niece, rolled his eyes, and said with a strong desire to live, "how is that possible? we're an old couple. Do I hide anything from you?"

His second aunt glanced at Nuan Nuan, who was drinking water with her head lowered, then at his second uncle and snorted. He let second uncle off.

Chi zeyao, old man Chi, and old man Nangong looked at this old couple and finally understood.

"It seems that Xuanji and Ji Mian are really angry at you because of this." Old master Chi concluded.

### [My Sweet Physician Wife Calls The Shots](#)

#### **Chapter 2932**

Chi zeyao looked at Nangong Nuannuan and humbly asked, "Nuannuan, is Yueyue's situation very serious?"

Chi Yang looked at his second uncle and said, "at that time, you asked Nuan Nuan to carry second aunt to perform the operation on you. When Nuan Nuan came back, she even lectured me. Second uncle, do you think this matter is serious?"

Nuan Nuan stretched out her leg and gently kicked brother chiyang.

Seeing that all the women in the room were saying that this was a serious matter, Chi zeyao and old master Chi finally took it seriously.

"I did promise not to lie to her in the future, but I was afraid that she would be worried. She's in cyber country and can't do it. I told you, she was still anxious during the operation. Now that I've recovered and told her about the situation, she should be happy."

"Second uncle," Chi Yang stopped his senior, who had the highest emotional intelligence, and said, "We got married to our other half so that we could support each other. Previously, you clearly remembered second aunt, but because you might be dying soon, you didn't contact second aunt. If second aunt forgives you, you must promise not to lie to her in the future. But you kept this operation a secret from him. You don't want her to worry, but no matter what surgery there is, there are risks. Why don't you think about what would happen to second aunt if something happened to you?"

Chizeyao:

After hearing Chi Yang's words, Chi zeyao seemed to understand why Feng Ji Mian was angry.

In fact, he knew why his wife was angry with him, but he really didn't think he was in the wrong. That was why he did not understand why his wife was so angry with him. She didn't even pick up his phone for the past two days.

"Second uncle, even if you recover after the surgery, even if you can live to 120 years old, won't you still die? Since you're going to die and second aunt will be sad in the future, why do you have to make second aunt so sad? Why don't we not be together?"

Chizeyao:

After taking a look at the old man and seeing his father's exasperated expression, Chi zeyao could only bury his head in his food.

"You're still in the mood to eat!" Old master Chi was afraid that his daughter-in-law would run away in anger, so he couldn't help but nag at him.

Chi zeyao, who was already upset enough, elegantly picked up a napkin and wiped his mouth. He stood up and said, "father, I've decided to make a trip to cyber nation myself.

After he finished speaking, he looked at Chi Yang. I'll leave the matters here to you. Recently, the people from little Xuan's side have been coming in one after another. Don't let them in too easily. It's better to stop them. Feng Kun is a very scheming person."

"Don't worry, second uncle, I'll take care of everything here." Chi Yang nodded.

Chi zeyao, who had originally planned to go to the underground factory, immediately decided to go to Saibo country to coax his wife back.

"Come back!" Old man Chi called out to Chi zeyao, who was about to leave.

"Dad?"

"Eat your food before you go!" Old man Chi looked at his son gloomily. In the end, he couldn't bear to see him go hungry.

The anxious Chi zeyao still looked refined on the surface. He responded and sat down to eat. However, Nangong Nuannuan realized that her second uncle ate much faster than usual.

After the meal, Chi zeyao left with his trusted assistant.

Old master Chi kept reminding second uncle to be careful of Feng Kun. Even after second uncle had left, he was still worried.

"Grandpa, don't worry. Second uncle's body had already completely recovered. He already has a special ability, and now all his joints have been replaced with the most advanced joints we've developed. I can guarantee that second uncle's strength now can be said to be even better than when he was young."

## My Sweet Physician Wife Calls The Shots

### **Chapter 2933**

“In addition to second uncle’s outfit, I feel that even if he were to go against Feng Luan, even if Feng Luan recognized him, even if Feng Luan doesn’t suffer a loss, the one who would suffer a loss would not be second uncle. Moreover, the aura on second uncle’s body was completely different from before, so it was impossible for Feng Luan to know. He would never pay attention to someone who had been sick in the Chi family for 17 years.”

With Nangong Nuannuan’s guidance, Grandpa Chi finally felt at ease.

In the afternoon, Nangong Nuannuan had to go back to school. The next day was the joint combat assessment for the students and soldiers of the medical University. She had to go to the training ground in the suburbs in advance.

In order to save time, Nangong Nuannuan arrived in disheng’s helicopter. When the helicopter landed on the tarmac, the students who were training thought that some Big Shot had arrived.

Although the person who came down was indeed a Big Shot, when they saw that it was the eldest miss of the Nangong family, everyone still had some opinions of this eldest miss.

Although she was the top scorer in the National College Entrance Examination, her family was indeed very rich, and she had already appeared on the news before she entered the medical department University, this was military training for Wanwan.

The instructor said that she was very strong and didn’t need to train. But no matter how strong she was, could she compare to those instructors? Wasn’t she just an 18-year-old girl?

The day’s training had just ended when Nangong Nuannuan returned to the team.

Instructor Wang’s eyes were filled with excitement when he saw the slender and tall Nangong Nuannuan walking over.

“Nangong Nuannuan, return to your team.”

Nangong Nuannuan nodded and sat down in front of Gu Xiaoli under the gazes of her classmates.

you came at the right time. The instructor was about to tell us about tomorrow’s cooperative combat plan.

Nangong Nuannuan nodded.

Because he was sitting on the side, he saw li xiangwang sitting next to Gu Xiaoli when he heard her talk.

Minister li saw Nangong Nuannuan looking over and nodded at her in a friendly manner.

Nangong Nuannuan saw that li xiangwang was smiling at her and nodded back.

When Shi Yalin, who was sitting in the back row, saw the interaction between the two of them, although her face was expressionless, a smile of success flashed in her eyes.

Starting tomorrow, the next two days will be the time to test the results of everyone's one-month military training. In the past month, all the students had performed very well. Everyone had made more than a tiny bit of progress compared to a month ago.

Tomorrow's test will be conducted in groups.

There were a total of 600 new students in the medical department University this year. Tomorrow, they would be divided into ten teams, with 60 people in each team, and they would join the army's battle.

This time, the Army had sent 10000 people for the exercise, and each team had 1000 people. Whoever could complete the first six stages, obtain the complete map, find the enemy's hiding spot, and obtain the enemy's team flag would win.

During this process, other than his own team, the other nine teams were all enemies.

Therefore, the first requirement was that every team must protect their base from being discovered and protect the team flag. This was the most important. Once another team got their flag, the other team would get 300 points. The team that obtained another team's flag could choose to continue to complete the quest or choose to end the quest.

[ requirement 2: protect your own team members. Those who are hit in a vital point will be directly eliminated. ] The injured would be taken care of by the new generation of the medical department University. In the end, it was time to count the number of people. Each team had 1000 people, and each person would get 1 point.

### [My Sweet Physician Wife Calls The Shots](#)

#### **Chapter 2934**

As long as they didn't die, even if they were seriously injured, they could still gain 0.5 points for their team, and one point for those who weren't injured. Those who were eliminated would not participate in the accumulation of points. Those who killed other members would gain 0.5 points.

The rules of actual combat were meant to inform the new students and recruits of the medical department University that battles were cruel, and with battles came sacrifices. The mission was also very important. A team's mission could not be accomplished without everyone's hard work. If you did not try your best, your team's mission might not be completed. However, in the process of carrying out a mission, talent was the most important. He couldn't make a fearless sacrifice for the sake of a mission.

This was why a team of 1000 people with 1000 points would only get 300 points after completing the mission.

After the rules of the battle were made clear, the new students of the medical department University were quickly assigned to different teams.

Nangong Nuannuan was assigned to team 6.

The 10 teams' bullets were divided into red, orange, yellow, green, cyan, blue, purple, black, white, and brown colors. Each team was assigned the same equipment, and the amount of ammunition was limited. If they were disarmed by another team, they could apply to change the remaining ammunition in their guns to the color of the other team's ammunition.

Nangong Nuannuan realized that she and Shi Yalin had been assigned to the same group. Gu Xiaoli and Li Xiangwang were assigned to the same group.

Nangong Nuannuan glanced at Shi Yalin. Shi Yalin's face was full of shyness. She smiled at Nangong Nuannuan and said, "Miss Nangong, it's all up to you now."

Shi Yalin's words attracted the attention of many students and new recruits.

There was no doubt that Nangong Nuannuan and Shi Yalin were highly anticipated. This was especially true for Nangong Nuannuan. There were already well-informed new recruits who had spread the news that Lieutenant General Chi's wife, the highly popular Miss Nangong, was one of the new students in the medical department.

Not only did she cure so many people with lung poisoning, but she also directed the excavators to rescue Lieutenant General Chi, who was buried deep underground. She probably even saved Lieutenant General Chi's life.

Everyone did not understand why she still wanted to study at the medical University when her medical skills were already so good. However, they were all happy to be on the same team as Nangong Nuannuan.

Sister-in-law, my big brother is from the Special Forces. He used to stay at Flying Eagle for a while. I heard from the members of Flying Eagle that you are not only good at medicine, but also very strong!

Nangong Nuannuan glanced at the new recruit and said with a smile, "But I'm a medic. I can only treat the wounded, right, instructor?"

Instructor Wang nodded.

Even though they knew that with someone like Nangong Nuannuan in their team, they would have a high chance of winning, it was impossible for them to have a human-shaped bug like Nangong Nuannuan in every future battle. Therefore, the request this time was that Nangong Nuannuan was not allowed to help. She couldn't do anything other than take care of the injured.

That night, the ten teams were in position. After they had assigned their respective strongholds, the leaders of each team divided the work and planned. Everyone's mission was to find, destroy, and take the enemy's flag within a 10 square kilometer radius after the actual combat training began.

The role of Nangong Nuannuan and the other students from the medical university was to find the injured members of their team and rescue them. During this process, if the medical staff were shot, they would also be eliminated.

The two girls, Nangong Nuannuan and Shi Yalin, were in the same team as the other 58 boys from the medical University. However, their team was further divided into seven teams, and six of these seven teams were to complete the six checkpoints.

### [My Sweet Physician Wife Calls The Shots](#)

#### **Chapter 2935: 16**

The remaining team needed to guard the stronghold, which was the flag of the blue team, so the medical staff were divided into seven groups.

Originally, each group could be divided into about eight people. However, because their group had Nangong Nuannuan, the higher-ups had requested that the team guarding the flag could only have Nangong Nuannuan as a medical staff.

Nangong Nuannuan followed the 100-man team of flag guards to the stronghold.

After seeing the stronghold, the team members were a little dumbfounded.

“Are you sure this is a stronghold?”

“Instructor, is there a mistake with the blue team’s base? Which team with a screw loose would set up their stronghold by the river?”

“That’s right! Any random team can find our team, right?”

“This is too unfair!”

“Our team doesn’t need them to gather six maps. As long as they want to drink water, we will be exposed at any time!”

The troublemakers in the team looked at the stronghold by the water, then turned their eyes to the drones in the air and complained angrily.

They didn’t believe that it would be so easy to find other people’s strongholds. This was the rhythm of their f \* cking team being wiped out!

Soon, they heard the voice from above.

“Nothing is fair and reasonable in this world. If you want to be fair and reasonable, then use your abilities to create fairness and reason.”

After that, the radio was cut off.

“F \* ck!”

The person with the most powerful martial strength cursed and kicked the grass beside him.

Nangong Nuannuan rubbed her nose as she looked at the angry crowd.

She felt that the combat Department was full of malice towards her!

In fact, if the combat Department could set up the stronghold in a more secretive way, she would really go easy on them and only do her part. However, with the combat Services Department doing this, wasn’t it embarrassing her?

She couldn’t just stand by and watch the officers of the combat service department bully her teammates, right?

It was completely impossible!

Seeing that her comrades were all in a bad mood, Nangong Nuannuan looked around to see where their base was.

The location was by the lakeside, surrounded by grass. The grass grew around the lake, and above the not-so-wide grass was a small cliff.

In other words, this lawn and the land above it were separated into two parts.

Nangong Nuannuan watched as her teammates moved the control panel and the team flag to the bottom of the cliff. She could only follow them.

This place was not a hiding place at all, because as long as people came down to get water, they would definitely see them.

Everyone was prepared to fight to the death. In order to prevent the team flag from being found, everyone simply hid the team flag.

This way, even if they were all eliminated, it would still take time to find the team flag.

If anything happened to them, they could immediately call for help. That way, when their people arrived, the team flag might not have been found yet.

The group had already started planning. The location of their stronghold was so obvious. On one hand, they needed to let all their members know so that they could return in time to defend. On the other hand, they still needed to find other people's strongholds.

They were the sixth team, but they didn't feel that way at all.

Every team had a Liaison Officer, and the liaison Officer was a Communications Officer. Through the stronghold's communication device, they could know the situation in the stronghold. The stronghold would also know the situation of each team.

### [My Sweet Physician Wife Calls The Shots](#)

#### **Chapter 2936**

The team leader would stay at the stronghold. The team leaders of each team could make their own decisions based on the actual situation, but they would also inform the main stronghold.

When the teams found out that their base was by the river and that they were not hiding, they were all furious.

Although what the higher-ups said wasn't wrong and there was no fairness in this kind of thing, this was too unfair. The leader of one of the teams was so angry that he smashed his communication device.

The lake was the only freshwater lake within a 10-kilometer radius. After two days of battle, everyone had to go there for water supplies. The higher-ups had actually arranged for Team 6's base to be at that place. What was the difference between this and asking them to die?

The other companions were also very angry, and they had no intention of picking up the communication device.

Shi Yalin walked over and picked up the communication device.

The communication device relied on frequency and password to send and contact information. Everyone saw that miss Shi had picked up the communication device and did not snatch it from her

hands. Since the matter had come to this, everyone had to discuss how to deal with the current tricky situation.

Just as everyone was discussing countermeasures, a voice suddenly came from the communicator.

“Team B, Team B, you guys go to the southeast to investigate. The mountain was hidden, and there was definitely a hidden stronghold there. Even if he didn’t, it would be good to get a few kill points. I’ve studied the terrain of the mountains and forests. You guys quietly go to the east side of Area B2, there must be someone there. If you encounter a large-scale attack, retreat from B2 to A1. That’s the best escape route. As long as you go down, it’s easy to defend and hard to attack, and you can even turn defeat into victory.”

“Got it, got it.”

Shi Yalin’s team members heard her words clearly and looked at her in disbelief.

“You’re a hacker?”

After all, every team had its own signalmen, and these signalmen usually learned this ability. However, the communication device was controlled by the headquarters. If he wanted to channel it, he had to hack the headquarters’ computer first and then enter the other party’s signal before he could hear.

“I’m pretty good with computers,” Shi Yalin replied with a smile.

“That’s great! You’ve done a great service.” After the team leader praised Shi Yalin, he immediately decided to break out of the encirclement.

“Let’s go there too. We’ll occupy area A1 first and ambush them there. Let them fight with the other teams first, and then we’ll be the Oriole behind them.”

In an instant, Shi Yalin had become the center of the group.

“Little Captain, should we inform the captain?” Someone asked.

“No need. The captain told us to do things as we please. We’ll go wherever there’s an advantage. Shi Yalin, you’ll be in charge of monitoring the movements of the other teams. At the same time, protect our rear. Otherwise, if the flag is taken, it will be difficult to get it back.”

Shi Yalin smiled, “sure, leave it to me.

Nangong Nuannuan was at the stronghold, so Shi Yalin did not waste any time to care about the matters at the stronghold.

Although she couldn’t reveal her martial arts skills, she wanted to see if she would score more points or Nangong Nuannuan would score more points even if she didn’t use them.

The reason why she led them to that mountain was because she could hack the positions of all the teams. For their team, she would start from the nearest place.

On Nangong Nuannuan’s side, everyone was on high alert because their base was too easily exposed. The team leader had sent ten people out in groups of two, hiding in different locations.

## [My Sweet Physician Wife Calls The Shots](#)

### **Chapter 2937**

As long as someone came, he would use a special secret signal to alert them.

Meanwhile, Nangong Nuannuan's team had just settled down in their base when another team that was closer to them sent a group of people over.

They thought that they would be the closest to the water source, so they sent 60 people to set up an ambush by the water source. In this way, those who came to the water source to get water would be easily ambushed.

With her x-ray vision, Nangong Nuannuan had already seen the person who was heading toward the source of the water. She looked at the knife on her body and did not understand why she was given a fake knife.

Captain, someone's coming from above. I'll go up.

Nangong Nuannuan stood up and prepared to leave.

This was the first time he had "cooperated" with someone else in battle. Nangong Nuannuan, who had always led the battle, acted as she pleased, and did everything according to her own thoughts, felt that it was already great that she could inform her Captain before the operation.

But the captain stopped her.

"Stop!"

Nangong Nuannuan stopped in her tracks and looked at the captain.

"Where are you going?"

"Stop them!"

"How do you know that someone is coming from above?"

Nangong Nuannuan took off her Bluetooth earpiece and plugged it into her communicator, turning on the speaker function. Thus, they heard someone talking about how to set up defenses by the river.

The captain looked at Nangong Nuannuan as if she was a monster. Yingluo, how did you do it? "

"It's Black," Nangong Nuannuan's reply was concise.

The captain coughed drily. He also knew that this was definitely black. However, the key was that he was also a computer expert. He knew everything that a signalman knew. However, even he had never thought that he would be able to get such a thing. He did not understand how Nangong Nuannuan had managed to do it.

Although he was curious, the captain didn't ask.

"Do you know how many people they have?"

"60?"

"It's too dangerous for you to go up alone. I'll send 50 people with you."

Nangong Nuannuan frowned. no need.

After all, she had sent 50 people, and she still had to protect them.

"What do you mean no need? This was a must! You can't possibly think that you can eliminate all 60 of them by yourself, right? Since you're a hacker, you're our treasure. We can all die, but you can't."

Back at home, Chi Yang, who had secretly watched the recruit drill of the combat service department, was in a bad mood when he heard that the captain had taken advantage of his wife.

What did he mean by 'you're our baby'? Shouldn't he be the one to say such things as a husband?

There were only men around him and his Nuannuan was the only girl. Many of the male soldiers were secretly looking at his wife's eyes. Chi Yang felt his scalp turn hot. He couldn't sit still anymore, so he disguised himself and disappeared from the Chi family.

She had wanted to reject Nangong Nuannuan's offer, but she gave up after some thought.

After all, this was the combat Department, and she had to listen to her team leader.

She had always been very accurate about her position, and that was to get a diploma.

She could only be transferred to Flying Eagle after she graduated.

Hence, the team leader sent out another 50 people, leaving only 30 people in the stronghold.

In order to let Nangong Nuannuan get first-hand information, he even asked her to bring her communicator.

"No, I have Bluetooth." Nangong Nuannuan refused, expressing that she did not want to bring such a big thing with her.

"It won't be good if the Bluetooth is 10 meters away. You!!!"

"My Bluetooth is fine even if I'm 10 miles away."

Team leader:

"Yingluo will do then. Please be careful."

[My Sweet Physician Wife Calls The Shots](#)

**Chapter 2938**

The other soldier, who had been trained by the Big Brother at Eagle, said, " "Captain, don't worry. I heard from my brother that sister-in-law is very strong!"

"Don't underestimate the enemy."

The captain still didn't listen.

After all, no matter how strong she was, she was still a girl.

No matter how strong he was, he was only 18 years old.

A group of people took out grappling ropes and threw nearly 10 ropes to hook on the rocks above.

Just as they were about to use the rope to climb up, they were dumbfounded to see Nangong Nuannuan look at them. Then, she stepped on a stone on the left, jumped onto a small stone on the right, stepped on a small tree on the left, and jumped up.

Everyone was speechless.

Looking at the height of the building from the ground to the top, which was at least three to four stories high, everyone swallowed a mouthful of saliva.

The soldier glanced at his Captain, and his expression said everything.

Team leader:

“Hurry up and follow.”

When he came back to his senses, the team leader immediately ordered all the team members to follow.

The first batch of team members took more than 20 seconds to climb up.

The first batch only had eight people.

Nangong Nuannuan waited for another batch. When she couldn't wait any longer, she said to her subordinates, “No need to come up, they're almost here.”

In other words, when all of you come up, the other party's main force will have arrived. Charging out like this is not an ambush, but walking into a trap.

The captain was a little embarrassed, but after seeing Nangong Nuannuan's skills, he tacitly agreed with her.

The 16 new recruits followed Nangong Nuannuan as fast as they could and headed in a certain direction. When they ran into the forest, Nangong Nuannuan had them split up and told them which tree to hide in.

This was how the combat Department was like. Strength was everything.

Although Nangong Nuannuan was only a medic in the team and had just entered the school, the skill she had just displayed was enough to crush all of them.

Hence, in the absence of their Captain, everyone subconsciously listened to her.

However, Nangong Nuannuan didn't tell them when they would be able to launch a surprise attack. However, they all felt that it was too early to say that they were going to launch a surprise attack. Everything depended on which direction the other party was coming from.

Perhaps they didn't come from this direction?

However, everyone soon realized that the spot Nangong Nuannuan had asked them to hide at was the perfect place for an ambush.

Seeing that the 60 people in front of them had already entered their ambush, even though there were only 16 of them, they all had the intention to charge.

The captain had given them the best weapons out of the 100 of them.

Everyone was waiting for Nangong Nuannuan's order to fire at each other.

Who knew, with a sudden " pfft pfft " sound, more than 20 of the 60 people had their helmets sent flying.

To everyone's surprise, a slender figure had already flown down. Before she even landed on the ground, she did a 720-degree difficult kick, directly sending more than 10 people flying.

Before anyone could react, over 30 of the 60 people had been "killed," leaving only 20-odd people.

The people on the tree were also shocked by Nangong Nuannuan's ferocity. In order to take her head, they began to shoot from the tree.

However, even though the trees were their best protection, they knew that the other party would definitely shoot at the trees. They would definitely have " sacrifices ". They only thought that it would be worth it if they could get more points for their team.

### [My Sweet Physician Wife Calls The Shots](#)

#### **Chapter 2939**

As they fired at each other, the other party fired back at them. However, every time they hit the other party, and every time the other party fired at them, Nangong Nuannuan would always be the first to kick the other party away.

In less than two minutes, all 60 players were dead.

The first 20 players who had been knocked out all stopped their attacks at once.

Although they were new soldiers, they were still official members of the combat service department. The opponent was able to pierce through the helmets of 20 people at the same time, leaving only a red mark on each person's forehead. It was enough to judge the strength and control of the opponent. If a stone had hit their hearts, what would it look like?

Although they weren't injured, it was clear that the other party just didn't want them to be injured.

If they did, they would probably die the moment they appeared, let alone get injured.

In the end, everyone simply did not have any courage to resist. This was because Nangong Nuannuan was simply too powerful. She was so powerful that even if she had a helper behind her, she had no way of dealing with her.

After all the enemies had " died ", the crowd looked at Nangong Nuannuan in silence.

"Student, you're from the medical department? Which Department are you from?"

"Hey, do you have a boyfriend? I'm Wang Zhao, what's your name?"

her name is Nangong Nuannuan. She's the wife of Lieutenant General Chi Yang, the Commander-in-Chief of the flying Eagles.

After the enemy recruit had asked two questions, the fangirl next to Nangong Nuannuan had already helped Lieutenant General Chi Yang sweep the peach blossoms.

Some of the enemy recruits took a closer look. Wasn't that the person they had seen on television before?

She was asking how she could be so beautiful.

"You're really Lieutenant General Chi's wife?"

"The young lady of the Nangong family?"

"The news said that you cured those people with lung poisoning!"

I've seen the video of your proposal to Lieutenant General Chi. It was so romantic!

"Can you guys not go off topic? Don't you guys think that not only is sister-in-law's medical skills amazing, but she's also extremely skilled?"

"Sister-in-law, who did you learn such powerful skills from? Lieutenant General Chi?"

Nangong Nuannuan was surrounded by a group of soldiers, and their eyes were like searchlights, making her feel a little embarrassed.

After finding out Nangong Nuannuan's identity, Nangong Nuannuan's own team members didn't even have the chance to talk to their idol's wife. Why were they surrounded by a group of "dead people" and not allowed to leave?

Those who were "beaten to death" did not complain or feel that the competition was unfair. Instead, they surrounded Nangong Nuannuan and asked her all sorts of questions as if they were fans of a celebrity.

This made the members of Nangong Nuan's team a little unhappy.

"Hey, hey, hey, we're still in the middle of a drill. If you have any questions, ask them after the drill is over! We still need to return to the stronghold."

"Quick, hand over all the good stuff you have!"

After hearing the words of the members of Team 6, everyone handed over all their items gloomily.

These 60 people had all brought guns. Although some of the guns were not very good and did not have many bullets in them, because they were an assault team in charge of the ambush, everyone had weapons in their hands.

This was Team 10. All the bullets were brown in color. Because there was a color adjustment, after everyone had cleared their guns, they changed the color to blue.

**Chapter 2940**

This time, they managed to get 60 guns for their comrades in the stronghold. Everyone had a handy weapon. On the way back to the stronghold, Nangong Nuannuan saw someone drawing water from the lake.

Since they were all enemies for the time being, and she was already here, there was no reason not to destroy them.

Therefore, Nangong Nuannuan pretended to have heard about the enemy's situation and led a group of people to Rob Group 1 of 10 people who were fetching water.

However, these 10 people only had three weapons. Seeing the 16 people rushing over, each of them looking like nouveau riche, each of them carrying four to five weapons, the entire team was in a bad state.

Before the ten of them could even start fighting, Nangong Nuannuan had already taken them down and removed their guns.

At first, his teammates were prepared to shoot each of them in the chest with a bullet that represented the blue team. However, Nangong Nuannuan refused to let him. She said that the bullet should be left on the blade.

The 10 members of team one said that if they were not hit in the chest, they would at most be injured.

Nangong Nuannuan was amused by them and immediately threw out the daggers she had found. Before they could even react, they were hit in the chest one by one.

This time, the other party's words were completely cut off.

The 10 players from Team 1 and the 60 players from Team 10 were taken care of just like that.

The exercise had just begun, and no one had done anything yet. Some teams had not even started to split up their work, but Nangong Nuannuan's team had already gotten 70 points.

This was because the combat department's unmanned cameras were everywhere in the air. The headquarters would know clearly which team had been eliminated.

Commander Lin of the recruit training Department of the Military service department of dizhou was a little dumbfounded when he saw Nangong Nuannuan, the human-shaped bug.

Although the drill had just begun, he had a feeling that he was going to die. What did this mean?

"Why is Nangong Nuannuan so powerful? She must have gone through special training, right?"

Commander Lin looked at the Vice commander of the new recruits 'training camp.

This time, the two of them were in charge of organizing the new recruits 'exercise.

"Would you believe me if I told you that she didn't go through any special training?" Vice commander Chang also had a headache.

"But wasn't this young lady from the Nangong family just found by the Nangong family not long ago? How can he be so powerful?"

“You don’t know?” Vice commander Chang looked at commander Lin as if he was looking at a primitive man.

Commander Lin felt that he was being looked down upon and immediately said, “I know that she’s very good at business. She’s the chairman of disheng and Tian Heng di. But she’s only 18 years old, and she’s already built up a business wealth that almost all humans can’t compare to. Where would she find the time to learn so many martial arts skills?”

Vice commander Chang thought about it seriously for a while, then looked at the commander with a look of realization.

The commander was also listening attentively.

“Then I think she might be a genius,” the Deputy commander said.

Commander:

“Hahahahahahaha!”

Leng Jinpeng remembered that today was the day of the new recruits ‘drill. At the same time, he also knew that today was the day that Nuan Nuan, as a new student of the medical department University, would experience the life of a J Camp with these new recruits.

Without even guessing, Leng Jinpeng knew that Nangong Nuannuan’s team would definitely win. Since the two commanders of the recruit command didn’t know Nangong Nuannuan well, he came over to check out the situation.

In the end, he had just walked to the central Command post when he heard the two commanders ‘amusing replies, causing Leng Jin Peng to burst out laughing.
