

Physician Wife 2971

[My Sweet Physician Wife Calls The Shots](#)

Chapter 2971

2971 Never thought about it (2)

It was very impolite for the three professors to say such things. It was even a loss of their etiquette.

Although Nangong Nuannuan wanted to argue with the three old men, she thought about it. This was Dean Qin's territory. Even if she promised to help the Research Institute, she wouldn't make any conclusions before she figured out everyone's character and nature.

Qin MUYANG, on the other hand, was very disappointed with the three directors when he saw the three-on-one situation. He said, "So this is what the three of you think of me as the principal."

The three professors were stunned for a moment before they reacted.

In terms of professionalism, the principal, Qin MUYANG, was not only a skilled military officer, but also the principal of the medical department University. He was also a level 4 professor in the Research Institute and was in charge of the entire Research Institute.

At his age and with his current achievements, no one could be better than him, be it in professional or administration.

Qin MUYANG was respected by at least three people. After being embarrassed on the spot by Qin MUYANG, the three of them didn't say anything.

Lang Zhen, the director of the Institute of Genetics, could tell that Qin MUYANG was truly angry. After weighing the pros and cons, he said, "Principal Qin, we were in the wrong just now. In fact, we also welcome miss Nangong to our Institute."

He then looked at Nangong Nuannuan and said, "miss Nangong, you've become the chairman of disheng group at such a young age. You're also in charge of the angel research Institute." Our Institute will definitely welcome a talent like you. I only said those words because I was afraid that miss Nangong would look down on our current research.

If miss Nangong is really interested in our research project, we welcome you to re-confirm a new research project or join our existing research project. After all, miss Nangong still had a huge team in the angel research Institute. If we really encounter some difficulties in the research project, we can help each other."

The two people from the Institute of cell and nervous Sciences immediately reacted when they heard this.

That's right. Even if Nangong Nuannuan couldn't do it, she still had the angel research Institute behind her, which was even more powerful than the Research Institute of the medical administration University. It was a world-famous Research Institute, which was even more famous than the medical Association.

Nangong Nuannuan was the Chairman of the Board. As long as she gave the order, the more people there were, the more powerful they would be. Furthermore, the other party was a very capable professor. Perhaps their bottleneck could be easily solved.

They could only blame themselves for being too narrow-minded and almost ruining the big plan.

that's right, miss Nangong, " Wang qiren said. it was inappropriate for us to say that just now. We were just afraid that you would suffer a loss if you participated in the project with us. But if you're interested in our project, we welcome you and your team to join us."

"Yes, yes, our cell research Institute is the same."

Qin MUYANG:

Nangong Nuannuan smiled and said,"thank you for your kind intentions, professors." However, I've never thought of merging disheng group's Angel research Institute with the medical department University."

Seeing the three's faces darken, Nangong Nuannuan continued to smile and said, " "After all, the medical researchers in the angel research Institute come from all over the world. They are paid according to their working hours. If you come here, I'm afraid you will be dissatisfied with their salary requirements. After all, they didn't have a heart of sincerity like everyone else. They only recognized money. If we don't give them enough money, they won't come and help with the research."

[My Sweet Physician Wife Calls The Shots](#)

Chapter 2972

2972 Beauty (3)

He had made it very clear that he was the one who gave the money, so why should he pay the salary and let them benefit? It wasn't impossible to invite them, but he could pay for it himself!

The three professors naturally understood the meaning behind Nangong Nuan's words, and their expressions turned unsightly.

Although they had their own thoughts, they couldn't say it out loud. If you pay them, they'll come here to do research.

With Qin MUYANG's understanding of Nangong Nuannuan, he knew that she would definitely not choose any of the three. He was extremely disappointed.

He had originally thought that he would bring research that might shock the entire world's medical organization for the three of them, but who knew that they would be so short-sighted?

"That's enough. Since you're not willing to choose any of the three, you can choose another one."

After saying that, Qin MUYANG glanced at Wei Yan, who was looking at Nangong Nuannuan with a longing expression, and said,"Professor Wei is a researcher at the Institute of lung disease. If you're willing, I can bring you to the Institute to meet their person in charge."

it's fine if Nuan Nuan doesn't want to go to the Institute of pulmonary disease," Wei Yan replied immediately. I have full confidence in her medical skills. So, no matter what kind of research she does, I can bring Ling Yun to the Institute.

Wu Lingyun nodded immediately. that's right. Nuannuan has already promised me that she'll bring me along.

Qin MUYANG didn't expect that these two people would go all out. He said in surprise, " "Professor Wei, what about your previous research?"

we can do research on those in our spare time. After all, those topics can't be completed in a short time.

Qin MUYANG thought about it and felt that it made sense. He nodded and looked at Nangong Nuannuan. "Then you can choose one that you're interested in."

When the three directors heard Wei Yan's words, they started to feel regret.

Wei Yan had even put aside his own research. Was Nangong Nuannuan really that powerful?

They felt that it was impossible. After all, he was only 18 years old.

Even the three people in charge were looking at Nangong Nuannuan, wondering what subject she would choose.

If he didn't choose the lungs, would he choose the heart?

Nangong Nuannuan turned around and said as she walked, " "Principal Qin, I saw a Beauty Research Center on the first floor when I came in. I'll go there."

Qin MUYANG:

Wei Yan:

The three directors stood at the back, looked at each other, and laughed.

They could see the mockery in each other's eyes.

Beauty research Institute?

That place might really be the most suitable for her.

The three people in charge returned to their respective research institutes, and Zhou Xianglin and Shi Yalin walked out.

professor lang, which Research Institute did Nangong Nuannuan choose? "

Lang Zhen sneered, " beauty.

"What?" Zhou Xianglin was stunned and looked at Shi Yalin.

Shi Yalin furrowed her brows and wondered why the Vixen Nangong Nuannuan would choose such an insignificant Research Institute.

"Is this the young lady of the Shi family you were talking about?" Lang Zhen asked.

Zhou Xianglin immediately smiled. that's right. This is Yaling. Yaling, this is professor lang, the person in charge of the genetic research Institute.

Shi Yalin's face was full of smiles. professor lang, how are you? I'm shi Yalin. Please take care of me in the future.

Whether it was Shi Yalin or Nangong Nuannuan, lang Zhen didn't really like either of them.

On one hand, they felt that these aristocratic families were forcibly planting people and interfering with the Research Institute's Affairs.

My Sweet Physician Wife Calls The Shots

Chapter 2973

2973 You're causing trouble (4)

Secondly, he felt that these rich young ladies were either extremely powerful or arrogant like Shi Yalin. They probably got in the college entrance examination through some connections with their families to get good scores. He didn't believe that they could understand Zhou Xianglin's research project.

Unfortunately, Shi Yalin was Zhou Xianglin's disciple. If even Qin MUYANG couldn't say anything about Shi Yalin entering the Research Institute, then there was no way he could say anything.

Lang Zhen nodded indifferently, "since you're here, study hard." I won't ask for anything else, but you're not allowed to spread anything about the Research Institute. You'll have to sign a confidentiality agreement."

Of course, Shi Yalin knew that the other party was looking down on her. She was not angry. After all, she did not really come here to do research. okay, professor lang, " he said. Oh, by the way, my second uncle is the president of the medical Association. If professor lang encounters any bottleneck and needs help from the medical Association, I can ask my second uncle to help."

Lang Zhen's eyes widened. He didn't expect Shi Yalin, a mere daughter of the Shi family, to have so much power over someone even the chairman of disheng group, Nangong Nuannuan, was unwilling to give.

Zhou Xianglin immediately said, "professor lang, you don't know this, but Yaling is the Shi family's favorite. The family dotes on her a lot." I can be a witness to Yaling's ability to help us link up the matter of the medical Association's professor. This was personally said by Dean Shi."

Lang Zhen's eyes brightened. The disdain in his eyes when he looked at Shi Yalin was no longer there. Instead, there was a touch of joy that could not be hidden.

"Really?"

"Yes." Shi Yalin nodded. "Although they're all from the medical Association, they can still help us."

then, the research funding ...

the Internal Affairs Bureau only gave us half of the funds. The remaining half and the various rewards were given by the Shi family.

Lang Zhen's eyes instantly lit up, "that's great. Yaling, I won't hide it from you, but the Research Institute has been stuck in a bottleneck for a project. Can your people help to discuss it?"

"Of course," Shi Yalin smiled. It's all beneficial to Kamino, so our Medical Association should also help."

Because he had to exchange information with the medical Association, lang Zhen never mentioned that he wanted Shi Yalin to sign a confidentiality agreement.

After all, this medical research project belonged to the Research Institute, and it was indeed inappropriate to ask the professors from the medical Association to help. Principal Qin would definitely be furious if he found out.

However, lang Zhen was confident that once the bottleneck of this project was broken through, it would usher in a major breakthrough in the history of genes.

In the elevator, Qin MUYANG looked at Nangong Nuannuan. He looked like he wanted to say something, but he hesitated.

"What's wrong, principal Qin? Are you having a toothache?"

Wu Lingyun couldn't help but burst out laughing at her cheeky behavior. Qin MUYANG also had an expression that said, "girl, you're up to no good."

"Nuannuan, I didn't call you here to study basic medicine. You're the person in charge of the angel research Institute, Yingluo."

"I'm not!" "I'm just a businessman," Nangong Nuannuan quickly denied. "The angel research Institute is mine, but I'm not in charge. The person in charge of our angel research Institute's technology is a level 6 professor. I don't even have a university degree!"

Qin MUYANG, [****=_=!]

He felt that it was really tiring to talk to this girl.

then I'll tell you. If you do research in the Research Institute, once it's done, you have to take it to the world Medical Research Institute for identification.

[My Sweet Physician Wife Calls The Shots](#)

Chapter 2974

2974 Taking it out on Feng Kun (5)

"They will rank you as a professor based on your research. Our floor distribution is based on levels. The beauty research Institute was on the first floor. In other words, even if you developed the best hyaluronic acid to shape the face, you would only be qualified as a first-class professor at most.

"However, if you were to choose the level of internal organs, once the research is completed, the evaluation would be at least level two or above. However, if you can choose from the three main categories of cells, nerves, and genes, once you complete a special research, you will be at least level three. If you choose to study something that is in-depth and makes a great contribution to the development of mankind, you will be at least level five or above. Do you understand?"

Nangong Nuannuan nodded and said, " But I can't just eat a big fatty the moment I come!"

Qin MUYANG:

He took a deep breath and continued,"but you have such talent. Since you're already here, you should strive for a higher level." &Nbsp;

"President, is the Research Institute lacking professors?"

although the Research Institute doesn't lack professors, it lacks high-level professors.

Nangong Nuannuan glanced at principal Qin. "But I'm only staying for a year. You said that as long as I can finish all the exams within a year, you'll give me a diploma."

Principal Qin was so angry that he could barely breathe.

That's right, a specialized research project could not be completed without three to five years of research. Nangong Nuannuan had come to study at the medical University to get a diploma and get an admission ticket to Flying Eagle. Her goal was to get a graduation certificate.

This was something he knew from the start.

So, huhu

As expected, he couldn't think too much.

Nangong Nuannuan looked at professor Wei and asked, " "Professor Wei, if I stay at the beauty research Institute, will you still let senior come with me?"

"Of course!" Although professor Wei was also slightly disappointed, after his archaeology, he inexplicably felt that Nangong Nuannuan was amazing. He felt that he would definitely benefit greatly from following Nangong Nuannuan. His sixth sense was very strong, so there was nothing to be disappointed about. "Ling Yun won't be the only one following you. I'll be doing the research with you too. However, I really don't have much knowledge in the area of skin. It seems that I can only be your assistant this time."

Nangong Nuan Nuan smiled. you're too kind, professor Wei. You're a leading professor in the medical world. I'm just a college student who just entered the University.

"Aiya, we don't have to be so polite. Hahahaha!"

Seeing Wei Yan's happy smile, Qin MUYANG could only suppress the sour bubbles in his heart.

To be honest, he really felt that it was a waste of Nangong Nuannuan's talent to go to the beauty research Institute.

Saibo.

On a remote road on the West Coast, Feng Ji Mian had just finished negotiating a project and was about to return to the nice family with five cars.

For the past two days, Feng Jimian had been in a very bad mood, and the reason was, of course, Chi Zeyao.

He had told her that he would inform her when he had the surgery, but he only informed her after the surgery was completed and he had almost recovered.

It's really ...

What did he take her for?

Feng Ji Mian decided that she would ignore this evil man for at least half a year.

If she couldn't do it within half a year, she would have to ignore this man for at least three months.

It was simply too vile!

It was extremely vile!

He hadn't died before, and he still remembered her, so he had been hiding. Now that he had promised her something, he had broken his promise again.

Because of this, Feng Ji Mian was so angry that she couldn't sleep well for a few days.

After settling a project contract today, Feng Jimian decided to vent her anger on that old man, Feng Luan.

[My Sweet Physician Wife Calls The Shots](#)

Chapter 2975

2975 Supersonic speed (1)

As a result, when the car of the nice family drove to this sparsely populated road, they suddenly heard the sound of a landslide.

The bodyguards of the nice family had all been chosen by Feng Ji Mian herself, and they were all very loyal to her. The moment he heard the sound, he immediately reacted. Instead of braking, he desperately stepped on the accelerator and rushed forward.

The sound was obviously coming from above them. If they stepped on the brakes now, they could tell from the sound that those things would definitely hit their car.

The car had been modified, and the comfort-oriented old Silva had also been incorporated with the functions of a supersonic racing car. The moment he stepped on the gas pedal and accelerated at full speed, a loud roar suddenly came from the back of the car.

Two Balls of Fire shot out from the huge exhaust of the Silva. At the critical moment, the Silva instantly turned into a shadow and rushed to a kilometer away, then slowed down after two kilometers.

The mercenary in charge of killing Feng Jimian was dumbfounded. They had never seen such a powerful car before. What the f * ck?

"Where's the car?"

The people on the mountain knew that the car had sped away, but it disappeared in the blink of an eye.

The leader immediately picked up his binoculars and saw that the old white car was already three kilometers away.

Fortunately, they were on the interstate highway, which was straight and wide, and could be seen at a glance.

The leader cursed and immediately used the communication device in his hand to call, " "Helicopter, go!"

After the order was given, the modified military helicopters that had been arranged on the side of the hill instantly roared and flew toward the old white car.

The leader heaved a sigh of relief when he saw the helicopter fly away.

"Boss, what the hell is that woman's car? Can Sylphy have such explosive power?"

One had to know. If Feng Ji Mian's car was just an ordinary supercar, or even a very powerful supercar, they could have buried her here today.

Looking down at the boulders and explosives that had blown up the entire interstate highway, it was truly a pity.

The leader looked at the car in the distance and sneered, " "In this world, other than the top supercars, there are also supersonic sports cars. However, these cars were still in the concept stage. I really didn't think that Feng Ji Mian would actually make a supersonic transmission for her unremarkable master syre bei."

"Supersonic mayfly!" The people at the side were speechless.

He had heard of supersonic vehicles before. It was said that they could reach speeds of 1200 to 1678 kilometers per hour.

The man's eyes were filled with greed as he watched the car drive a few kilometers away in just a few seconds.

"Boss, this woman's car is the fastest one, right? Can you please not let them destroy that car?"

As soon as he finished speaking, the modified Army fired a missile.

The man on the side opened his mouth and was about to express his pity when he saw the White silbery also launch a missile.

One hit the missile that had just been launched, while the other hit the other modified military helicopter.

The helicopter that had just launched the missile was blown away by the huge air wave. The propellers were bent and deformed. After a deafening roar in the air, it exploded with a " boom ".

[My Sweet Physician Wife Calls The Shots](#)

Chapter 2976

2976 Flying in the sky (2)

The other helicopter had exploded after being hit by the missile.

“?!”

The leader of the mercenary group threw away the cigarette in his mouth and shouted with his eyes wide open.

Furious that the woman had destroyed something so valuable, he took out his communication device and shouted, “Do you all eat shit? Motherf * cker! Hurry up and go!”

Two fuel tank cars were coming from the state Highway, and they suddenly accelerated when they saw Silbe.

Although the driver had been specially trained, Feng Ji Mian wasn’t willing to put her life in the other person’s hands.

Feng Ji Mian, who had been operating the computer in the back seat, nimbly jumped from the back seat to the front. When the driver noticed her, he immediately jumped away and pulled out the front drawer. A computer page appeared in the front.

Just as the two fuel tank cars sped up, Feng jimian also accelerated.

Although it didn’t accelerate at supersonic speed again, this car was an old version of the supercar.

When the two fuel tank cars were about to approach Silbe, they suddenly shook their trunks.

The two Fuel Tank Trucks staggered a little distance from each other, and after moving their trunks, they instantly blocked the wide road.

The tank truck was very tall, and it was impossible for them to fly over it after Silbe suddenly accelerated.

The bottom of the tank truck had been specially modified, so it was very shallow. It was impossible for the old car from Silbe to pass through.

Who knew that just as boss, who was holding onto his computer and watching the situation ahead through the unmanned camera, smiled and thought that Feng Ji Mian was dead for sure, the other party’s car deformed in the process of accelerating at a moderate speed.

“F * ck, f * ck, f * ck, f * ck!”

It was not until the top of the car suddenly opened and the body of the car elongated, turning the old car into a four-wheeled supercar, and the tank truck successfully got under the low ground, that the man next to the boss let out a complete “f * ck”.

However, before he could even finish sighing, another missile was fired from behind him, which directly hit the tank truck’s oil tank.

“BOOM!”

The two fuel trucks, including the fuel inside, exploded together with the bomb, and another long section of the interstate highway was destroyed.

The blazing fire illuminated the sunny coastline, turning it red.

The deafening explosion told them how wild the woman they were going to kill was.

The leader of the mercenaries was stunned.

He didn't understand how a small old car could have so many bombs that seemed to be endless.

fourth echelon, Youyou, go!!! The boss ordered through gritted teeth.

Damn it, he only had a total of four teams. He thought that the first team would be able to settle the matter, but in the end, he let that woman escape again and again.

However, it was impossible for the woman to be as lucky as before in the last step.

More than 20 modified off-road vehicles were rushing toward Silbe from a distance.

there were four people in each off-road vehicle.

One of them was in charge of driving, while the other three were in charge of shooting. There were more than 20 cars, they should be enough to turn that b * tch into a sieve!

"Boss, the other party has 23 vehicles, all of which are filled with heavy weapons. We don't have enough ammunition in our car."

"What are you afraid of?" feng ji mian's expression was calm.

[My Sweet Physician Wife Calls The Shots](#)

Chapter 2977

2977 Flashy car (3)

The driver at the side was operating the computer, and his extremely skilled hacking skills allowed him to attack the car in the middle in an instant.

The control panel of the off-road vehicle suddenly activated. Under the control of the system, before the driver could react in time, the car tilted and hit the off-road vehicle at the side with a " Dong ".

At the same time, the driver fired the last two bombs, which hit the two cars in the front.

Although a few cars had been attacked, the advantage of the drivers was that they were separated from each other. In addition, the drivers were all powerful international mercenaries. None of them were weak.

Therefore, the last attack only destroyed a small number of cars, but most of the cars stopped at the back and did not move forward.

The off-road vehicle in front of him was on fire, and the fuel truck behind him was on fire. On the left was a mountain, on the right was a cliff, and below the cliff was the sea.

There were strange rocks at the bottom of the cliff. If a person jumped down from the cliff, he would definitely be killed by the rocks before he could reach the sea.

The off-road soldiers in front also knew the result, so they gave the other party some time to catch their breath like a cat catching a mouse.

However, just when they thought Hao Zi was at his wit's end, the Silbe charged into the sea without any burden.

"Boss!"

Even the driver beside him was shocked. Seeing Silbe rush towards the boss in the sea, he smiled.

No matter how this woman would die, it was fine as long as she was dead.

However, after the car rushed down the cliff, they didn't hear the roar, nor did they fall.

The image captured by the drone shocked the leader of the mercenary group.

Because the car that had been sent flying actually flew up when it was about to fall to the bottom of the cliff.

The top of the White Silva car was suddenly opened when the fuel truck was passing by, and it was flattened to both sides of the car.

And now, the two sides of the roof had passed through the overlapping pieces and turned into a spiral wing.

They had seen modified cars before, but they had never seen a car that was modified to such an extent!

This f * cking Kasaya can fly!

I wonder which f * cking awesome person did it.

The leader of the mercenaries was furious.

Just because of Silbe's old car, he had easily broken through the attack of four of his ladder teams?

Simply ...

"Shoot! Shoot that car into a sieve! That b * tch doesn't have any more missiles!"

he didn't believe that no matter how powerful this woman's car was and how fast it was, her propeller couldn't suddenly reach supersonic speed, right?

Even at supersonic speed, his missiles would be able to locate her!

"Swish Swish-"

Two missiles were launched from the land-based car and reached the front of the flying car in the blink of an eye.

When the enemy fired the missile, Feng Ji Mian had already jumped into the sea with an unsightly expression.

It wasn't too far from the sea, and her car had flown quite a distance. There was a chance of survival if she jumped into the sea now.

When the missiles were fired, the mercenaries had already prepared missiles and guns. The moment Feng Ji Mian jumped into the sea, they would use their bullets and missiles to bombard her.

He was not afraid that he could not kill her.

The moment the missile hit, Feng Ji Mian Guo jumped into the sea. She had no more bullets in her car.

however, the moment she jumped out, she held a machine gun in her hand and fired at the shore without hesitation.

Although the other side had also suffered heavy casualties, they could not fight against the enemy's numbers.

[My Sweet Physician Wife Calls The Shots](#)

Chapter 2978

2978 Reversal (4)

At this moment, the missile had already hit the plane, and the huge explosion and shock wave were heading towards Feng Jimian.

Feng Ji Mian flipped, and the gravity shifted to her head, attempting to rush into the sea.

But how could the people on the shore let her go?

The leader of the mercenaries was about to kill Feng Ji Mian, how could he give up the chance to kill her? When Feng Ji Mian's car was rushing down the cliff, he had already turned around and got into his military helicopter. The helicopter was already hovering in the air. When the missile hit the Silbe, he had ordered the plane to fly over.

He didn't believe that if he threw a few mines underwater, the woman would not die. However, when he flew the plane over, he found that the woman was caught by a blue light wave.

At the same time, an air shield of the same color protected her from the great damage caused by the shock wave.

"Beat him up, beat him up!"

The leader of the mercenaries thought that this thing also belonged to Feng Ji Mian. While he was surprised that she had so many strange life-saving things, he was also very angry at this woman's tenacity.

However,

By the time the mercenary leader's bullets reached Feng Ji Mian, countless blue ripples appeared in front of her.

It was as if the surface of the water was being attacked by countless raindrops, causing circles of ripples.

The leader of the mercenaries was dumbfounded to find that not only the bullets, but even the missiles they fired couldn't destroy the blue shell that protected Feng Ji Mian.

Feng Ji Mian was shocked as well.

as the saying goes, a boat capsized in an easy ditch. because she was angry with chi zeyao these two days, she had forgotten to personally check the defense of the trip, and had fallen into such a lousy ambush.

More importantly, she had not checked for a day and had fallen into the trap of the mole.

She had thought that she would be seriously injured or even killed today, but the sudden protection made her a little confused.

What kind of advanced technology is this? it can actually block the attack of a missile?

Although he felt that this thing was about to crack, it could even defend against a missile attack. This was very impressive!

Suddenly, Feng jimian thought of someone.

However, Yingluo

Impossible!

She was clearly on the verge of death, but when she thought of that person, even though she was still angry, even though she was on the line between life and death, Feng Ji Mian started to look around.

She felt that if he came, she would be saved today. If it wasn't for him, she might have lost today.

"Boom boom boom boom boom--"

With a deafening explosion, the mercenary leader was shocked.

he was getting his men to continue bombarding the blue line of defense. he could already see the blue room loosening up.

But on the other side, his last group of brothers, the group of mercenaries driving the off-road vehicles on the Intercontinental road, had all died!

The mercenary leader looked at the explosion on the land and the flames that rose to the sky. He had no hope of any survivors.

Although he had yet to see where the enemy was, as a natural Hunter, he had his own unique judgment of danger.

"Let's go," he said. The leader of the mercenaries shouted.

however, as soon as he finished speaking, the modified military helicopter made a beeping sound.

The helicopter's hatch was open, and the moment the beeping sound was heard, the mercenary leader jumped out of the hatch without any delay.

[My Sweet Physician Wife Calls The Shots](#)

Chapter 2979

2979 Fortunately,(5)

He jumped out of the plane so quickly that he didn't even have time to shout at his subordinates.

The Lackey, who was constantly refreshed by the White Silva, looked at the display screen half a beat later.

He saw that the display screen showed that their plane had been locked on.

“BOOM!”

Before the underlings could move, the plane exploded.

The huge shock wave severely injured the mercenary leader who had just jumped out of the cabin, and he was sent flying into the sea.

He took a deep breath and swam to a remote place before he was rushed in.

Although it was a little far from here, he believed that the other party must not know that he was very good at swimming and that he could hold his breath in the water for more than seven minutes. If he was in good condition, he could basically hold his breath for 15 minutes. Although this wasn't the world's longest time to hold his breath, for a life-saving skill, this amount of time was enough for him to escape underwater.

On the surface of the sea, Feng Ji Mian was dumbfounded as she watched all her enemies being wiped out. Her people were all dead, and she was just sitting on a Blue Light Shield.

He reached out to touch it, but he had no idea what material it was made of.

“You're still not coming out?”

As soon as she finished speaking, Feng Ji Mian felt a gust of wind beside her, and then a robot-like thing in black armor appeared in front of her.

Feng Ji Mian's eyes were wide open as she looked at the robot in front of her. It didn't even have a fire-breathing device. Even when it suddenly flew in front of her, it only brought with it the wind. There was no sound of an engine at all. She felt as if her world view was going to be overturned.

The robot's head opened silently, just like those sci-fi films she had seen before. It was embedded into the body, revealing Feng shengxuan's face.

His face was dark and angry.

“We haven't seen each other for many years, and this is how you treat your own safety?”

Only God knew how shocked he was when he arrived in cyber country and easily located her whereabouts without even encountering a basic encryption lock.

Although the people of the nice family had long been tamed by her, this was a world where interests were the most important. Even those seemingly loyal dogs would one day turn against their Masters. Not to mention the enemy.

That was why Chi zeyao was so angry.

He had thought that after all these years, this woman had become very powerful. At least, other than Feng Luan, no one in Saibo country was her match.

However, she had made such a childish mistake.

Fortunately,

This old white Silva car was a hidden supersonic sports car that his company had just developed. He had only gotten someone to transport the car over while she was in the Kamino Kingdom.

In the end, it only took a few days? A supersonic Tri-use vehicle that he had personally designed and improved was destroyed by her just like that.

It was not a problem to destroy the car. The most important thing was that you had to be able to save your life if you destroyed the car!

She couldn't imagine what would have happened to her if he had appeared five minutes later.

At this moment, Chi zeyao suddenly realized how selfish he had been.

Life was fragile, and no one knew when it would be destroyed and dissipated. People were not born to die. In a life that was neither short nor long, emotions were the most normal needs of humans.

However, he had missed the person he loved again and again because of the possibility of his death and the possibility of problems.

What was the meaning of human emotions?

[My Sweet Physician Wife Calls The Shots](#)

Chapter 2980

2980 A little higher (1)

Wasn't everyone working so hard to pursue feelings so that they could have someone to talk to and rely on when they were sleepy, tired, tired, injured, or met with difficulties?

Feng Ji Mian wasn't a little girl. On the contrary, she was known in Saibo for being a ruthless and capable woman.

But now, seeing Chi zeyao's dark expression, Feng Ji Mian instantly felt wronged.

She hadn't even finished quarreling with him, and he actually yelled at her?

Feng Ji Mian simply didn't want to talk to this man anymore. She jumped up angrily, but with a "bang," she crashed into the blue light barrier above her, causing her to cry out in pain.

Chi zeyao's expression changed. With a wave of his hand, the blue light Shield that was protecting Feng jimian immediately disappeared.

Chi zeyao was just about to ask his wife if she was hurt when Feng jimian pushed him away and threw him into the sea.

Looking at his wife, who had jumped into the sea in anger, Chi zeyao touched his sharp nose, put on his helmet again, and jumped in with his wife.

Feng Ji Mian didn't understand why she jumped into the water in her professional dress and high heels.

In any case, she just didn't want to see the man who made her angry.

Feng Ji Mian had just swum two meters when a black robot blocked her way.

She was frustrated, so she changed to another path and swam another two meters. Then, she saw that the robot was actually running in front of her again as if it was in the air.

Feng Ji Mian continued to change lanes, and only after she had changed all four lanes did she resurface in a Huff. As soon as she surfaced, she felt herself fall into a hard embrace, and then her entire body flew up.

"Let me go!" At this moment, Feng jimian didn't really want to talk to Chi zeyao.

Although they were separated by thick armor, this embrace was something she had missed for 17 years, and she was extremely attached to it. But,

she was very angry now and did not want to hug him.

Chi zeyao's helmet opened up again, revealing his warm and gentle face. He smiled and said, "We're in the air. If I let you go, you'll fall."

Feng Ji Mian's eyes widened. so what if I fell down? it's water down there anyway, I won't die from the fall.

"But it'll hurt if you fall from such a high height."

"It won't hurt at such a low altitude!"

Chi zeyao glanced at his wife and silently raised their altitude by 50 meters.

Feng Ji Mian:

"Why aren't you saying anything? you haven't answered my question yet. With you like this, how can I leave you alone in Saibo?"

"What's there to worry about? Anyway, I've been alone for the past 17 years. This person paid particular attention to a kind of fate. Sometimes, it was destined to be there, but there was no point in forcing it. It's the same for humans and lives."

feng jimian was a little sad when she said this.

She knew that the man in front of her could only 'share wealth' with her, but not 'poverty' with her. Every time something happened to him, she would definitely be the one who was excluded.

He knew that his wife was angry because he had performed the surgery on her without her knowledge. Chi zeyao felt that he had not done a good job. As a result, second uncle Chi, who had a high EQ, immediately apologized.

"I'm sorry, I misspoke. i didn't care about your feelings. Although I promised you that I would let you know about the surgery, I still can't help but feel nervous before the surgery."
