### [My Sweet Physician Wife Calls The Shots](#)

#### Chapter 3041

3041 The benefactor (3)

“Are your college entrance examination results as good as your sugar daddy? Are your martial strength as high as your sugar daddy? Can you enter the Research Institute? What’s there to compare? everyone had their own path of development. nangong nuannuan had become a financial backer with her own abilities, and that was something that everyone could learn from her. Can you become the chairman of the third largest Financial Group in the world at the age of 18?

Also, no matter how bad she was, she had made some achievements at a young age. Even if she was only in the most basic beauty research Institute, she was in charge of a research project alone. No matter how good Shi Yalin was, she was just following her professor around. One was to follow others and watch, while the other was to do his own project. The project was even recognized by the world Medical research organization and became a project to be evaluated.

What do you people who talk about others behind their backs have? Ha, to put it bluntly, when you’re transferred to another profession, won’t you all be begging to be admitted to Angel hospital?”

the group of students heard someone shouting at them from behind. they turned around and saw li xiangwang and gu xiaoli.

Gu Xiaoli was now a famous person in the medical department. After all, she was Nangong Nuannuan’s best friend.

so when they saw that it was gu xiaoli, everyone quickly buried their heads and scattered.

They were afraid that Gu Xiaoli would remember their faces and tell on them to Nangong Nuannuan in the future.

After the students left, Gu Xiaoli walked to li xiangwang and said, ” “xiangwang, thank you for protecting nuannuan.”

li xiangwang smiled indifferently. ” i should. ” I just can’t stand them always gossiping. To be honest, I didn’t think that Nangong Nuannuan was better than me before the military training. However, when I saw Nangong Nuannuan’s performance during the military training, I realized that I was a frog in the well. Nuan Nuan was really amazing. Xiaoli, you’re so lucky to be able to do research with her. ”

“Yeah,” Gu Xiaoli laughed. Nuan Nuan is the benefactor of my life. Without her, I wouldn’t have done so well in my college entrance examination. Without her, I wouldn’t have entered the Research Institute so smoothly.”

“Yes, Nuan Nuan is so nice. Although she didn’t like to talk much, she was a very trustworthy good friend. And from how she treats you, you can tell that she never looks at a friend’s identity when making friends. As long as it’s a friend she acknowledges, she’ll treat it with sincerity.”

“Yeah,” Gu Xiaoli smiled.

"I'm so happy to be able to enter the research institute. Then what kind of beauty research are you doing next to her? the world medical research organization has taken a liking to them."

"when we entered the research institute, the professor told us not to disclose the research content," gu xiaoli said with some difficulty.

li xiangwang was stunned and said embarrassedly, "So it's like this. I'm sorry, I don't know."

gu xiaoli shook her head and said, "it's nothing. after all, you don't know." Xiangwang, I think you've really changed a lot."

"don't talk about my past," said li xiangwang, embarrassed. I don't feel good about you being like this."

the two of them talked and laughed all the way back to the dormitory. just as they returned to the dormitory, they saw yu minzhen putting on a facial mask.

seeing li xiangwang walking in front, yu minzhen glared at her. but when she saw gu xiaoli behind her, her eyes suddenly lit up.

It had been a month since school started, but not only had she not been able to get close to Nangong Nuannuan, but she had also not been able to become good friends with Nangong Nuannuan's good friend, Yu minzhen.

### [My Sweet Physician Wife Calls The Shots](#)

#### **Chapter 3042**

3042 Thick-skinned (5)

Yu minzhen saw that small favors could not move Gu Xiaoli, and she knew that Gu Xiaoli might have received a lot of benefits from following Nangong Nuannuan. She took out a velvet box from her cabinet.

"Xiaoli, here you go."

Gu Xiaoli glanced at the red velvet box, but didn't open it. She blinked and asked, "What is this?"

Yu minzhen smiled as she opened the velvet box, revealing a trendy T brand K gold bracelet.

There were still two.

Yu minzhen pushed the things in front of Gu Xiaoli and said sincerely, "it's my big brother's birthday party this weekend. He asked me to invite my friends from University.

it's your brother's birthday party. Why didn't you buy something for your brother? why did you give me a bracelet from T family?" Gu Xiaoli's smile gradually faded.

"Don't misunderstand! This is the new bracelet I saw when I was shopping last weekend. I bought it because I liked it. I feel that good things should be shared with good friends, so I bought you a pair. do you like it?"

Gu Xiaoli pushed the bracelet to Yu minzhen and said, "yu minzhen, thank you, but this is too expensive. i can't take it. You should take it back."

Yu minzhen looked hurt. "Xiaoli, this may be very precious to you, but you know, it's nothing to me. this is just a small gift from me. if you reject it, i'll be sad."

"but your things are very precious to me. between friends, courtesy demands reciprocity. if one party always gave and the other always accepted, then the balance of friendship would one day tilt. Since you treat me as a friend, you don't have to be so particular. I really can't accept this."

Yu minzhen's eyes lit up when she got Gu Xiaoli's acknowledgment. "So you admit that we are friends? You must come to my brother's birthday party this weekend! i'll introduce my brother to you."

"I'm sorry, Yu minzhen. We're going to participate in the evaluation for our research project in two months and we're still trying our best to do our research. I'm afraid it'll be difficult for us to spend the weekends in the next two months. I'm sorry."

"But Yueyue, aren't you and Nuannuan going to senior Wu Lingyun's wedding next weekend?"

li xiangwang listened at the side and couldn't help but laugh.

"Yu minzhen, you're really thick-skinned. Can your relationship with Xiaoli be compared to Nuannuan's relationship with Xiaoli? What was the relationship between the Xiao family and the Nangong family? What was the relationship between senior Ling Yun and Nuannuan? How could Nuannuan not attend Wu Lingyun's wedding? Nuan Nuan was going to go, so how could Xiaoli stay in the laboratory alone? comparing your brother to wu lingyun, aren't you just asking to be humiliated? besides, do you have a good relationship with xiaoli? Why do I feel that she doesn't have any interaction with you other than staying in the same dormitory as you? don't you think it's very deliberate for you to randomly claim to be friends?"

"Li xiangwang, what does my conversation with Xiaoli have to do with you? Don't be a busybody! If you have the time to mock others, why don't you think about where you should work after you graduate!"

if it was in the past, yu minzhen's words would have hurt her, but now, she was stunned.

"you don't have to worry about this." li xiangwang sneered. You'd better worry about what you'll do if you can't hook up with Xiaoli and can't use her to get close to Nuannuan!"

### [My Sweet Physician Wife Calls The Shots](#)

#### **Chapter 3043**

##### 3043 Being beaten (1)

"xiaoli, can't you tell that she's just trying to use you to hook up with nuan nuan?" she said to gu xiaoli.

Gu Xiaoli looked at the two of them quarreling. Ever since Nuan Nuan's identity had been exposed, she had experienced a lot of such things. I'm going to the lab, " he said with a smile. I won't be back for dinner tonight.

after saying that, he took the book he had found in the library and left.

Seeing that Gu Xiaoli had left, li xiangwang smiled at Yu minzhen provocatively.

Yu minzhen slammed the book on the table and glared at li xiangwang. She shouted, " "what do you mean, li xiangwang?"

li xiangwang looked innocent. " i don't mean anything. i just can't bear to see you use gu xiaoli's pure friendship to get close to nangong nuannuan. "

"Stop your nonsense! Are you not?"

"Of course not," said li xiangwang with a smile. i don't come from any family, so i don't need to get close to nangong nuannuan."

"So you came to ruin my plan?"

"who asked you to have such impure intentions and be so annoying?"

looking at li xiangwang's infuriating face, yu minzhen finally couldn't bear it anymore. she picked up a small pot of plants at the side and directly smashed it at li xiangwang.

However, li xiangwang only moved slightly and easily dodged.

The potted plant hit the wall and bounced back. It landed on li xiangwang's desk, covering the book with soil.

Minister li glanced at her and walked to Yu minzhen's side unhurriedly. He looked down at her. looking at li xiangwang's somewhat terrifying eyes, yu minzhen was a little afraid. however, she thought that li xiangwang had no background. why should she be afraid of him?

although they had very few sisters in clinical medicine, many of their friends in the nursing profession lived in this building. she did not believe that she would be bullied.

"why are you looking at me with such a fierce expression? I'm warning you, li xiangwang--"

without a word, li xiangwang punched yu minzhen in the chest.

yu minzhen only felt a sharp pain in her chest. her face instantly turned pale, and sweat poured down like rain.

" remember, don't act like a rich young lady in front of me in the future. otherwise, you'll be in deep trouble. "

with that, li xiangwang turned and left. he went downstairs and found the dormitory manager, telling her that yu minzhen had hit her with something.

After the dormitory manager came up and saw that the wall on li xiangwang's side was dirty, she immediately called Yu minzhen's class instructor over.

yu minzhen felt extremely aggrieved. her chest hurt so much from being hit by li xiangwang that she immediately complained.

However, when the instructor brought Yu minzhen to the infirmary for a checkup, she was not injured at all.

however, the evidence of her attack on li xiangwang was there. in the end, she had no choice but to apologize to li xiangwang, which quelled the farce.

Yu minzhen was in excruciating pain, but the infirmary couldn't find anything. yu minzhen could only go to the affiliated hospital for a checkup, but the results showed that there was no problem.

yu minzhen felt that she was in great pain. she had no choice but to call her family, who then negotiated with the school. after all, it was the medical department university, and without permission, one could not go out. The Yu family had to use many connections to get Yu minzhen to go for an inspection outside the school.

However, the results of the examination were the same as the hospital's examination results.

He was fine!

however, yu minzhen was in so much pain that she could not stand up at all. It wasn't until two days later that this feeling slowly dissipated.

### [My Sweet Physician Wife Calls The Shots](#)

#### **Chapter 3044**

3044 Nangong Nuannuan's group 2

Because she had failed to invite Gu Xiaoli, and because she had not been able to hook up with Nangong Nuannuan and Wu Lingyun, the Yu family was very dissatisfied with minzhen's actions. Yu minzhen's father was currently fighting with a few of his brothers for the position of the head of the Yu family. Because of Yu minzhen's defeat, the other branches of the Yu family had an excuse.

The head of the Yu family could only pressure Yu minzhen to bring Nangong Nuannuan to the Yu Residence as a guest within three months of school reopening, or Yu minzhen could attend the Nangong family's banquet. Otherwise, father Yu and Yu minzhen's elder brother, who had almost taken over the position of the head of the Yu family, would not be able to touch it.

Yu minzhen had been scolded and she had suffered so much this time, so she pushed all the blame to li xiangwang.

Nangong Nuan Nuan and Gu Xiaoli didn't know any of this.

Nangong Nuannuan had obtained the principal's approval and had always been a day student. Therefore, she didn't spend much time in school. Other than taking the exam, she spent most of her time in the laboratory.

Other laboratories had at least ten members. Even the beauty research Institute had more than ten people in each research project. After all, it was not easy to come up with a new project to benefit mankind. If there were too few people, the project couldn't be researched, and there wouldn't be any results.

However, Nangong Nuannuan's group had the least number of researchers. There were only five people.

Other than Nangong Nuannuan herself, the rest were Wei Yan, a professor from the Cancer Research Institute, he Zhi, a first-class professor from the beauty salon, Wei Yan's apprentice Wu Lingyun, and Gu Xiaoli, whom Nangong Nuannuan had invited.

Gu Xiaoli had just entered the school and didn't know much about medicine, so she was only responsible for organizing the information and learning from it.

Although Wu Lingyun was only a third-year student, her ability to understand and learn was stronger than the average person due to her special ability. This was also the reason why Wu Lingyun had been so impressive in school before Nangong Nuannuan had entered the medical University.

As for professor Wei, he had been paying attention to Nangong Nuannuan and had been completely attracted by her medical history, which no one knew about. It could be said that he had become a fan of Nangong Nuannuan's, and that was why he had been willing to follow her. A professor had become her assistant.

Including Nangong Nuannuan, who was the person in charge of the research project, none of the four of them were really skin Researchers.

As a result, in order to succeed in a research project, they had to consult the professor at the beauty salon if they encountered any problems.

But this was a slap in the face.

This was because Nangong Nuannuan's research was more in-depth than her research on superficial things like skin. Therefore, the questions they asked were the most basic things for the professors in the beauty research Institute.

This led to dissatisfaction from the beauty clinic and even the other research institutes of the medical department.

After all, only two of the university's projects were selected for the world medical research topics, and Nangong Nuannuan's research project had taken up one of them.

Back then, no one was optimistic about Nangong Nuannuan's project. They felt that no matter how good a freshman was, he would not be able to develop his own project. Most importantly, this project was not her specialty. Therefore, when Nangong Nuannuan was forming the team, no one was willing to participate.

The only first-class professor at the beauty research Institute was a kind person. When Nangong Nuannuan asked a question and the other professors ignored her, he helped her answer it.

### **[My Sweet Physician Wife Calls The Shots](#)**

#### **Chapter 3045**

3045 A bold idea (3)

who knew that he would be ostracized by the others because of this.

he zhi was more casual and open-minded. he didn't like to work with those professors who ostracized him.

He had originally planned to start a research project himself, but he was invited by Nangong Nuannuan. he zhi thought that this was the boss of the angel research institute. he would not lose out if he followed her. hence, she happily agreed to become the last member of nangong nuannuan's group.

However, after joining the group, he Zhi realized that Nangong Nuannuan was a genius.

Those people who said that she had relied on capital to get the world Medical organization to accept her research project, he only wanted to say that the frog at the bottom of the well could not measure the size of the world.

Regardless of whether their project would be successful, he Zhi felt that Nangong Nuannuan was a wise person just from the fact that she dared to come and study this project.

Nangong Nuannuan's research wasn't just about beauty, but about how to restore the skin to its original state after it was severely burned.

When general medical cosmetic surgery was performed on skin that was completely burned, most of the methods used were skin transplants. Then, the fat in the body would be extracted from the collapsed area and injected to fill it up.

However, after Nangong Nuannuan had asked him about the basic principles of the skin, she had walked the path of changing the genetic strands to repair the cells and nerves, and in turn, regrow the skin.

He Zhi felt that this was impossible.

wei yan also felt the same way.

However, Nangong Nuannuan only asked, " how did the baby's skin form when it was in the mother's womb?

Everyone thought that their research topic was beauty.

although they were indeed researching on beauty, and they were researching on the beauty of burns. However, their research direction was on how to promote skin regeneration.

skin burns, especially severe ones, would leave ugly scars even if they were healed. in the worst case, it could even lead to disability. It was due to the damage to the nerves and cells below the dermis.

however, when a baby was in a mother's body, he would go from a cell to a fetus. it was precisely because of the formation of his gene strands that countless nerves were gradually produced. through continuous differentiation, bones, flesh, and blood were eventually formed. skin was also gradually formed.

Thus, it could be inferred that as long as the genetic chain could be reconstructed and the nerves could regrow, new skin would gradually form after the cells were repaired.

such an idea could be said to be a fantasy in the field of human medical beauty. it was not that no one had thought of it before, but who could reshape genes? who could recover those invisible and untouchable nerves? who could regrow cells?

However, Nangong Nuannuan had really cultivated new skin in a petri dish in front of everyone.

Although the skin was still in a crooked shape, Yingying's skin was grown by herself through genetic changes and the reconstruction of her nerves and cells!

this was completely different from a skin transplant!

The public always said that Nangong Nuannuan was shameless and that she had used her capital to force the medical organization to accept her research project.

But in reality, everyone knew what kind of organization the medical organization was. it was an official organization formed by top medical experts from different countries.

It was not something that any capital could control.

Even though the investors had a higher say, once this research project won an award, it would have to be published through various channels.

### [My Sweet Physician Wife Calls The Shots](#)

#### **Chapter 3046**

3046 caught (4)

therefore, while everyone was ridiculing nangong nuannuan, they also wanted to know what she was researching. how could she use such a low-end medical field like medical beauty to research on a subject that was jointly researched by the three major research institutes of genetics, nervous system, and cell technology?

even the director of the neurology department couldn't help but come to the first floor to ask the director of the beauty salon.

however, at that time, the professor at the beauty salon, including the director, looked down on nangong nuannuan. they felt that the questions she had asked at the beginning were laymen, so they didn't want to associate with her. Therefore, the director of the beauty salon was very curious that Nangong Nuannuan's research project had been selected. However, it wasn't good to ask again.

"xiaoli, this is the dinner you ordered."

"Thank you, senior Wu. Thank you, senior Zhang."

In the Research Institute, some university students or graduate students wanted to enter the Research Institute, but because their qualifications did not meet the requirements, they had the qualifications to enter. However, the professors were not willing to take them, so they could only enter the Research Institute by delivering food, sending things, and helping out.

The two seniors, Wu Zhi and Zhang Fang, who were delivering meals to Nangong Nuannuan and the others, were doing odd jobs at the Research Institute.

Although they had missed the best opportunity to enter the Research Institute, they could at least do odd jobs. Sometimes, when the professors were interested in them, they would ask them to help organize the information. Over time, they could participate in the leftovers of the research.

this is the list of your orders. Confirm it. If there are no problems, we'll send it to another research room.

gu xiaoli confirmed and nodded. " yes, that's right. thank you, senior. "

"you're welcome," wu zhi smiled slightly and followed zhang fang to the next research room with the dining cart.

" wu zhi, now that gu xiaoli has also entered the research institute, do you think we still have hope? " Zhang Fang could not help but ask.

The Research Institute only had a limited quota every year. Now that Nangong Nuannuan had inserted a quota, it meant that they would have one less quota.

Wu Zhi was silent. Then, he said, " forget it. Don't think so much. Do what we should do. The rest will depend on luck.

"That Nangong Nuannuan is such a bully," Zhang Fang snorted coldly. Just because he had money, he didn't put anyone in his eyes. Do you see how many people in the Research Institute hate her? She really did not understand why the principal had to let such a person in. Was it because he had a strong background?

"There's clearly an angel research Institute, and her Research Institute even takes up five spots. I really don't understand why she still wants to take up a spot in the medical administration University."

Although the Research Institute was large and there were few people, Wu Zhi still patted his shoulder and kindly reminded him, " "Don't forget that the principal told us to talk less and do more when we came in."

When Zhang Fang heard this, he felt even more indignant.

"We've been doing odd jobs like this for a year. Look at Cao Xuehua and the others, they've already been selected by the Cancer Research Institute, while we're still in the unrated beauty research Institute. Did we really enter the Research Institute just to do odd jobs?"

"don't you know what kind of person the principal is? He thought so highly of Nangong Nuannuan, and the fact that she had been nominated for a beauty research project was enough to prove her capabilities. as the person in charge of the project, it was normal for her to bring her own people. There are so many research rooms in the beauty center, who knows when it'll be our turn."

"Hehe, you're dreaming! I think it's impossible for people like you and me who have no background or status to enter the research room."

zhang fang was still talking when he saw the director of the beauty salon, qi meixin, around the corner.

### [My Sweet Physician Wife Calls The Shots](#)

#### **Chapter 3047**

3047 a teachable child (1)

qi meixin was a woman in her 50s, but she had taken good care of herself and was very elegant. She just stood there, and the two of them instantly felt that their auras had become much shorter.

“director qi, qi zhengqi.”

“what are you gossiping about behind my back?”

Qi Meixin asked with a serious face. Wu Zhi and Zhang Fang were so scared that their faces turned pale. They were afraid that Qi Meixin would ask them to leave the Research Institute.

“You’re called Zhang Fang?” qi meixin asked.

Zhang Fang’s face turned pale with fear as he nodded.

“Come with me.”

Then, Qi Meixin said to Wu Zhi, “You can go and do your work.”

Wu Zhi looked at Zhang Fang with some worry and then went to deliver the food.

Zhang Fang was so scared that his legs turned to jelly. He followed behind Qi Meixin and couldn’t help but explain, “Director Qi, I know my mistake. He would never make such a mistake again. Please give me another chance.”

However, Qi Meixin walked in front and ignored him.

It was only when they arrived at the director’s office and closed the door that Qi Meixin turned to Zhang Fang, “You’ve been at the beauty salon for a long time, right?”

“Yeah, it’s been almost a year and a half.” Zhang Fang nodded.

Do you want to become a real researcher? ”

zhang fang’s eyes lit up and he nodded, “Yes, I do.”

“Which research room do you want to enter?” Qi Meixin asked.

“I want to do research with you, but I know it’s impossible. so, other than you, the person i respect the most is professor fang.”

Qi Meixin nodded. professor Fang is the only third-grade professor in our beauty center. You’ll have a bright future if you follow him. However, if you’re willing, it’s not like I can’t bring you along.”

Zhang Fang’s eyes lit up.

If he was still trying to sound her out just now, he finally understood what Qi Meixin meant.

“director qi, if there’s anything you need me to do, i’ll definitely do my best.”

qi meixin nodded in satisfaction and said, “You’re always bringing food to Nangong Nuannuan and the others, so you’ll have a lot of time with them. You just need to help me find out what project she’s working on. ”

Zhang Fang nodded in understanding and immediately changed to a friendly tone, that's easy, director Qi. Don't worry, I'll definitely help you find out the contents of their research project.

Qi Meixin nodded, looking like a promising student. She patted Zhang Fang's shoulder and said, " alright, you can go out first. Only you and I know about this."

"Don't worry, director Qi, you can completely trust me."

Qi Meixin wasn't afraid that Zhang Fang would spread the news. After all, this wasn't something to be proud of, and Yingying didn't have any evidence, right?

After Zhang Fang went out, he quickly met Wu Zhi.

Wu Zhi's face couldn't hide his surprise as he asked, " "How was it? did director Qi make things difficult for you when you went in?"

zhang fang snorted,"you didn't make things difficult for me." What's wrong with you? Why are you so happy that I'm in trouble?"

"Look at what you're saying!" Wu Zhi frowned a little unhappily,"am I such a person?" i'm telling you, when i went to another laboratory to deliver food, gu xiaoli came to find me. Can you guess what she said?"

"What?" Zhang Fang's eyes flashed.

"She said that there are too few people in their group. She's the only one helping them organize the information so far. If we're willing, we can help them organize the information." Wu Zhi was so happy that his face was a little red.

### [My Sweet Physician Wife Calls The Shots](#)

#### **Chapter 3048**

3048 Smoothly joined (2)

"No matter what they say, Nangong Nuannuan is the founder of the angel research Institute. Since the principal valued her so much, she must have her own special abilities. If we can get her appreciation, not only can we participate in the research projects of the Research Institute in the future, but we might even be able to come into contact with the research projects of the angel research Institute."

zhang fang felt that he had suddenly hit the jackpot. he was really just about to doze off when the other party handed him a pillow.

Zhang Fang was a little embarrassed as he said,"That ran ran, what I said just now, ran ran"

"Alright, don't say it again. You see, there are so many research labs that didn't let us in to help, but Nangong Nuannuan has only been here for a month and she has already let us in. We should be grateful for this, shouldn't we?"

"yes."

zhang fang nodded and smiled at wu zhi,"thanks brother."

"We're all classmates. I'm very happy to be able to do research with you."

zhang fang and wu zhi arrived at nangong nuannuan's laboratory. nangong nuannuan, wei yan, and he zhi were doing experiments inside.

wei yan and he zhi were using the most advanced microscope to conduct their experiments, while nangong nuannuan had a petri dish placed in front of her. she sat in front of the computer, glancing at the petri dish from time to time while quickly tapping on the computer.

"Nuan Nuan, Wu Zhi and Zhang Fang are here."

Nangong Nuannuan raised her head and glanced at the two of them. After she finished tapping the remaining items, she stood up and walked out.

Nangong Nuannuan greeted them politely when she saw them.

"Senior Wu, senior Zhang."

"Miss Nangong, you're too polite. You're the person in charge of the laboratory. We're only here to learn. We should be calling you teacher." Wu Zhi said with a smile.

zhang fang quickly nodded. "yes, although you're younger than us, you're already at the forefront of the medical field. we should learn from you."

Nangong Nuannuan couldn't bear to hear these compliments and said, " " don't stand on ceremony then. you guys call me nangong nuannuan, so i'll call you guys by your names. "

The few of them exchanged a few words and prepared to eat dinner.

At this time, professor Wei, professor he, and Wu Lingyun also came out. Professor he was more familiar with the two of them, so he said, " "Zhang Fang, Wu Zhi, the two of you have been in the Research Institute for a long time, but you haven't been able to enter the laboratory. This time, Nuan Nuan let you in on account of your help for a month. I hope you will cherish this opportunity."

"Professor he, don't worry. Wu Zhi and I will definitely do our part well." Zhang Fang quickly said.

he zhi nodded. " gu xiaoli is a freshman. she doesn't know a lot of medical knowledge. she can't organize some information. help her. "

"alright, don't worry." Zhang Fang immediately responded.

After that, Nangong Nuannuan invited everyone to sit down and eat together. they familiarized themselves with each other during dinner. after dinner, nangong nuannuan continued with her experiment.

because chi yang was still waiting at home, no matter how tight the schedule for the research project was, nangong nuannuan would always finish work before 8:30 pm. chi yang would pick her up at the school gate.

So, after dinner, Nangong Nuannuan quickly threw herself back into work, in a hurry.

After all, he had promised the director that he would come up with a project for him.

this project couldn't be completed directly with x-ray vision. after all, she had to participate in the selection, so she needed to use x-ray vision to record the genetic changes after the burn.

### [My Sweet Physician Wife Calls The Shots](#)

#### **Chapter 3049**

3049 mixed equation 3

due to the different burns, the degree of genetic changes and damage to the nerves and cells were different. therefore, she still needed to record the data of each genetic change through the repair experiment. after the calculation, she could re-convert the obtained equation.

This was quite a challenge for Nangong Nuannuan.

After all, on one hand, she had never learned about skin medicine. On the other hand, many things that were very straightforward to her needed to be replaced by extremely cumbersome equations.

This equation involved medicine, mathematics, physics, and chemistry.

fortunately, other people's experiments were done step by step. once one step was wrong, it meant that all the experiments had to be repeated.

But she was different. Through x-ray vision, she was already familiar with the genetic chain, so all she needed to do was find a way to restore the genetic chain and neurons.

This restoration process was a chemical reaction process. As long as the chemical elements of each neuron could be done correctly, once the molecular matching was successful, the gene strands would start to function normally again, and the research would be successful.

Everyone thought that the skin in Nangong Nuannuan's petri dish was intact, but only Nangong Nuannuan knew that her petri dish had always been used for burnt skin.

At 8:30 pm, Nangong Nuannuan got up on time, not caring about the progress of the experiment or the breakthrough.

seeing nangong nuan nuan stand up, wei yan and he zhi also stood up. " nuan nuan, are you leaving? "

"yes." Nangong Nuannuan nodded. I'll be leaving with senior first.

Even though the experiment had not been successful, the two professors were impressed by Nangong Nuannuan from the bottom of their hearts.

Nangong Nuannuan's achievements in this field within a month were shocking. They dared to say that even they would not be able to produce results like Nangong Nuannuan's in a year.

the main thing was that although they were doing a beauty research project, it was actually just a beauty research project. it involved four topics, which were cells, nerves, and genes.

Even for them, they were only slightly useful for the skin and cells. The rest was up to Nangong Nuannuan.

Seeing the two professors see Nangong Nuannuan off, Zhang an was quite shocked. However, on second thought, he understood.

After all, Nangong Nuannuan was disheng's Chairman and had the world's most famous angel research Institute under her.

Both of them were not highly regarded professors in the Research Institute of the medical department University, so it would be difficult for them to level up again. It was better for them to follow Nangong Nuannuan. No matter whether her research was successful or not, as long as they managed to impress Nangong Nuannuan, she might not mistreat them in the future.

Thinking of this, although Zhang Fang was envious, he knew that Nangong Nuannuan was too far away from him.

rather than following nangong nuannuan around and having unrealistic dreams about the angel research institute, it was better to follow qi meixin.

"alright, it's almost time for today. professor he and i will be leaving first. the rest of you can leave after you've organized the information here."

After Nangong Nuannuan and Wu Lingyun left, there was no point for Wei Yan and he Zhi to stay in the laboratory. After all, they were only responsible for a very small part of the experiment. They were not of much use, not to mention Gu Xiaoli, Wu Zhi, and Zhang Fang who were outside.

### [My Sweet Physician Wife Calls The Shots](#)

#### **Chapter 3050**

3050 crazy experiment (4)

The two professors said their goodbyes to the three of them and left.

Their laboratory was the most relaxed of all the laboratories. Other laboratories that had not been selected were still doing experiments with lights on. Only this laboratory not only qualified for the world Medical research project, but also turned off the lights before nine every day.

This was also one of the reasons why everyone was not optimistic about their chances.

After the two professors left, Gu Xiaoli, Wu Zhi, and Zhang Fang still had to organize the documents.

Previously, it was the two professors who were in charge of tidying up the place, but now that Wu Zhi and Zhang Fang were here, this kind of thing naturally fell to the two of them.

"Junior, it's getting late. You should go back to the dormitory first. Wu Zhi and I will tidy this place up."

Gu Xiaoli was also learning from them, but she really couldn't understand the genetic chain, neurons, and cell equations at all, and couldn't help. The most she could learn was from Wei Yan and he Zhi. For an ordinary freshman like her, this was already a very impressive learning experience.

because she couldn't help, gu xiaoli thanked the two seniors and went back to the dormitory.

The longer she stayed in the laboratory, the more she could discover Nangong Nuannuan's excellence. Even if she did not compare herself to Nangong Nuannuan, she still felt that she was far inferior to Wu Lingyun.

She hoped that she would be at Wu Lingyun's level when she was in her third year. Therefore, Gu Xiaoli was also very hardworking in her studies.

Soon, only Zhang Fangye Wuzhi was left in the laboratory. Both of them cherished their time in the laboratory. While they were sorting out the data, they could also see the contents of Nangong Nuannuan's experiment openly.

However, when they entered the laboratory today, Gu Xiaoli asked them to sign a confidentiality agreement.

they could study openly, but the research content and results could not be disclosed to the outside world.

After all, Wu Zhi and Zhang Fang were both people who wanted to take the Ph.D., So they quickly sorted out today's files and uploaded them to the computer. Then, they took out the previous files from the computer.

today's files were all equations that they couldn't understand, so the two of them were just surprised that there were such complicated equations.

However, when they saw the topic that Nangong Nuannuan was currently researching, they couldn't help but gasp.

Oh my God, she's actually researching genes! Wu Zhi's eyes widened.

zhang fang was also shocked and said,"not just genes." She wants to rebuild her genes, recover her neurons, and reconstruct her cells so that her skin can regenerate naturally."

"This is crazy." Wu Zhi was shocked for a long time before he spat out a sentence.

"Even director Lang's research is said to only try to improve the body by improving the genes. They only said that their research topic involved a little element of nerves and cells. however, 80% of them were related to genes. Our research project is the true ensemble of four." Zhang Fang was also extremely shocked.

"Yup, I know. As long as there was a problem in any part, the research project would fail. wasn't she too daring? Can such an experiment really be successful?" Wu Zhi was deeply suspicious.

this idea has been proposed before, but that was many years ago. What he proposed was only a preliminary idea, and no one has ever thought that it could be studied.

Wu Zhi nodded.

After that, the two of them started to check their daily records on the computer.
