

Physician Wife 3091

[My Sweet Physician Wife Calls The Shots](#)

Chapter 3091

3091 Successful research (3)

Nangong Nuannuan was a little touched by her reaction. Because Gu Xiaoli had always lived a simple life and was loyal. Even though she was not as outstanding as the people around her, Nangong Nuannuan believed that with her talent in medicine, she would have a bright future.

“So, we’ve finally finished our research?” Gu Xiaoli asked again with uncertainty.

Zhang Fang also wanted to know the answer to this question.

“Yup, I know. Nuannuan has calculated the formula to cause the destroyed genes to recombine. Those who have been burned will be able to repair their genes, nerves, and cells with different degrees of intensity according to the degree of the burn as long as they take the medicine that we will develop in the future. When the medicine works on the skin, it will be able to regrow the skin that has been burned and died.” He Zhi couldn’t stop smiling.

In fact, he had never thought that such a crazy project would succeed.

“Let’s go, let’s go. We must go out for a good meal this afternoon. Nuan Nuan is going home for dinner tonight. Let’s go to the restaurant outside the school and treat her to a good meal at noon.” Wei Yan suggested.

“Good, good, good, let’s go!”

How crazy was this project? what kind of shock would it bring to the world once it was confirmed to be successful? how much benefits and profits would the medicine named after the Research Institute of the medical administration University produce in the future? These were all things that made their hearts tremble just thinking about them.

most importantly, nangong nuannuan was the main person-in-charge of this project, but all of their names were recorded on the list of project personnel that had been submitted.

Especially Wei Yan and he Zhi, they were extremely glad that they had worked on this project with Nangong Nuannuan.

Wei Yan felt that this project could directly raise his professor rank from Level 3 to Level 5.

Not to mention he Zhi.

originally, he was only a first-level professor at the bottom of the research institute. however, after doing this project, he was confident that he could be promoted to a third-level professor.

This was all thanks to Nangong Nuannuan.

As for Wu Lingyun, Gu Xiaoli, Wu Zhi, and Zhang Fang, although they couldn’t be qualified as professors with their current medical knowledge, they were still participants of the project. once such a world-

renowned project was successful, it would be of great help to them in their future ph.d. exams and even be promoted to professors.

And after this project was successful, there would be a steady stream of projects waiting for them in the future.

Seeing that everyone was about to leave, Zhang Fang said, "Wu Zhi and I didn't do much. We just organized the information. You guys can go out and eat, we'll just organize the information here."

At this moment, Zhang Fang couldn't wait to steal the formula.

"Zhang Fang, what are you saying? Since Nuan Nuan has allowed you and Wu Zhi to enter, you're now a member of our group. The success of the project is the honor of our entire group. Come, let's go out together."

Wu Zhi also nodded. He didn't agree at all that Zhang Fang couldn't go out, but he even pulled him in.

Zhang Fang had no choice but to follow Nangong Nuannuan for dinner.

When she came back later, Nangong Nuannuan asked Gu Xiaoli to store the equation properly because the project had been completed.

Gu Xiaoli immediately saved the formula on her computer and then tore the paper document into pieces.

that night, zhang fang informed qi meixin of the success of the nangong nuannuan project.

He also told Qi Meixin that the item was in Gu Xiaoli's computer.

[My Sweet Physician Wife Calls The Shots](#)

Chapter 3092

3092 Regret (4)

Usually, when Gu Xiaoli didn't turn on her computer, he couldn't get the things inside. So, she wanted to ask Qi Meixin if she had a way to get someone to hack out the things inside.

Qi Meixin immediately reported the matter to Wang qiren.

On Wang qiren's side, although Shi Yalin had called the top researchers of the medical Association to help, the complexity of the research project, which was a mix of genes and nerves, was beyond their imagination.

Therefore, for more than a month, although Wang qiren's side had gathered everyone's wisdom, they had never been able to calculate the most critical step.

Originally, he signed up for this project because he thought that he would be able to calculate the most crucial step at the beginning of the selection.

Who knew that with the joint efforts of so many people, there was still more than a week left, but the final calculation of that crucial step was not valid.

This meant that the event he signed up for and passed would not even have a ranking.

A total of 50 projects passed the review this time. As long as they had tree-Building Research results, they would be ranked.

However, even though he proposed a project that could shock the world, he couldn't prove that his project was feasible. Then, this project would not have their name on it.

There were a total of 50 events. Not only did they not get into the top 20, but if they didn't even get a ranking, it would really be a slap in the face.

at this moment, he was informed that nangong nuannuan had calculated the equation and that the entire research had been successful.

This also meant that Nangong Nuannuan had not only found the formula to repair genes and nerves through genes, but she had also found the formula to drive the repair of nerves and cells through the repair of genes, eventually allowing the skin to regrow on its own.

The completion of the entire project was a complete blow to him.

wang qiren didn't want to believe it, but after spending some time with shi yalin, he had to believe that nangong nuannuan was indeed a powerful person.

He had not even completed a single step of this simple project, but Nangong Nuannuan had not only completed the steps, but had also completed the entire research.

Wang qiren had mixed feelings in his heart at this moment.

He was envious of Nangong Nuannuan's talent in medicine and also regretted not having Nangong Nuannuan in his project.

If Nangong Nuannuan had stayed behind instead of Shi Yalin, he would have been the one to complete the project. And he was the main person in charge of this project!

Unlike Wang qiren, who had mixed feelings, Shi Yalin was very happy to know. He felt that he had reached the peak of his life.

Although her ambition wasn't to win the award for the world Medical research project this time, why wouldn't she win the award if she could?

She also liked the feeling of being able to ride alongside Nangong Nuannuan.

Now that Feng Ji Mian had taken a fancy to her, as long as she could do something dazzling, she believed that Feng Ji Mian would see her use even more.

This was also the reason why she always liked to show off in front of Feng shengxuan and Feng jimian when she was a gentle girl.

She wanted Feng shengxuan to acknowledge her so badly.

As for Zhou Xianglin's suggestion to find a hacker to hack out the contents of Gu Xiaoli's computer, it was stopped by Shi Yalin.

” there’s still a week before we go to saibo, ” she said after a moment of silence. ” ask zhang fang to steal it from gu xiaoli when she’s not paying attention. ”

My Sweet Physician Wife Calls The Shots

Chapter 3093

3093 Shocking (5)

“Why don’t you hire a hacker?” zhou xianglin asked in confusion.

In his eyes, since Shi Yalin was so powerful, wouldn’t it be easy to solve the problem by hiring a hacker?

Shi Yalin sneered and said, ” “I have a hacker, but Nangong Nuannuan doesn’t? Do you think Gu Xiaoli wouldn’t know you touched her computer? If I could hire a hacker, would I still need Zhang Fang? Why don’t I just hack into Nangong Nuannuan’s computer and steal her research results every day?”

Zhou Xianglin was an old scholar, but he didn’t dare to refute Shi Yalin’s scolding in front of Wang qiren and the other two institute directors.

Although he felt that Shi Yalin was right, her attitude still made Wang qiren very uncomfortable.

He had not spent much time with Shi Yalin before, but after this period of time, Wang qiren felt that Nangong Nuannuan was a ruthless person, and this young lady of the Shi family was definitely not a kind person.

In short, the power of these two girls far exceeded the range of their age.

Shi Yalin had been waiting for a week.

Zhang Fang was like an idiot, unable to find an opportunity to extract the data from Gu Xiaoli. This made Wang qiren and the others extremely anxious.

this was because their calculations had failed, and their entire hypothesis was no longer valid.

wouldn’t it be a joke for such a result to be awarded at the world medical research conference?

To be honest, Shi Yalin wasn’t afraid at first. However, when it was time to leave, Zhang Fang still hadn’t managed to steal the item. This made Shi Yalin a little impatient.

Shi Yalin told Qi Meixin to give Zhang Fang a word that if he couldn’t get the data within a day, he would never be able to work in the Research Institute, or even the medical department University.

Zhang Fang was scared out of his wits and his entire person felt unwell.

He was really looking for an opportunity every day, but he was always timid. Even when Gu Xiaoli went out sometimes, he didn’t dare to make a move, for fear that she would suddenly come back and be caught on the spot.

for the past two days, wu zhi had been in charge of contacting the world medical research institute and taking care of their accommodation and plane tickets. wei yan and he zhi didn’t come often either. only gu xiaoli would come to learn some things every day.

With just the two of them, Zhang Fang still didn’t dare to make a move.

it wasn't until qi meixin gave her a warning that she got some medicine from the pharmacy and put it in gu xiaoli's glass.

After Gu Xiaoli drank it, her stomach started to feel uncomfortable. While she went to the toilet, Zhang Fang ran to Gu Xiaoli's computer in fear to look for something.

But that thing was hidden very well by Gu Xiaoli, so Zhang Fang couldn't find it after five minutes. He sat back down guiltily.

Gu Xiaoli only came back 15 minutes later. Not long after he returned, his stomach ached again and he ran out again. Zhang Fang then continued his search.

Finally, when he was about to give up for the second time, he found the data. She quickly copied it and returned to her seat.

By the time Shi Yalin and the others got their things, it was already night.

The group of people then hurriedly opened the data to study it.

After reading Nangong Nuannuan's entire research report, the directors of the three major research institutes-genetics, nerve, and cell research-were truly shocked.

They read Nangong Nuannuan's research report bit by bit, from the destruction of her skin to the destruction of her cells, to the destruction of her nerves, and finally, to the loss of a certain gene in her cells, making them unable to regenerate.

[My Sweet Physician Wife Calls The Shots](#)

Chapter 3094

3094 being scolded (1)

After that, the report used data to compare the data of the normal genes and the missing genes to find the differences. Then, it used thousands of chemical methods to form an equation to form a new molecular structure. These molecular structures were then listed and repaired according to the genetic order.

In the end, the verification was successful.

lang zhen, wang qiren, li dan, and zhou xianglin were all shocked.

They were medical professors. Although they would design chemical testing when they studied pathology, they never thought that chemistry could be so complicated. He also didn't think that medicine could be separated like this.

Nangong Nuannuan had really broken down the molecular structure of each chemical element and reassembled it according to the needs of the genes.

Although the genes they researched were also made up of molecular structures, in short, they were directly reconstructing existing molecular structures or chemical components. Nangong Nuannuan, on the other hand, had completely messed up these molecular structures and created new ones. She would

use complicated calculations to create new ones and then reassemble the new ones according to what they had previously thought.

Lang Zhen finally understood why he had failed so many years of trying to improve the human body's functional cells through genetic changes.

It wasn't that there was a problem with the gene splicing in the end.

There was no problem with the gene combination. The problem was that when the gene strands were pieced together, the molecules should not have used the original molecular structure.

The reason why they couldn't make any progress in Genetic Medicine for so many years was that Mathematics, Physics, Chemistry, and medicine were still separated. A medical professor wasn't a mathematics professor, a mathematics professor wasn't a physics professor, and a physics professor wasn't a chemistry professor. Yingluo, everyone had their own specialization. There was no way for a medical expert to calculate such a huge and almost perverted mathematical, physical, and chemical equation.

After receiving Nangong Nuannuan's report, the three directors' horizons were truly broadened.

The few people who had been afraid that Nangong Nuan would take advantage of them for no reason were now blushing.

"Then let's make a new copy of this report." Zhou Xianglin said hurriedly.

After all, this was Nangong Nuannuan's report. They were researching different things, and the report still needed to be sorted out.

The three directors immediately nodded.

After all, the Academic Exchange was going to start in three days. They needed to come up with their report in these three days and understand the general principles in it. Otherwise, if Nangong Nuannuan were to be dissatisfied with their actions and sue them, they would not only be embarrassed because they could not even answer the basic questions, but they would also be embarrassed for the rest of their lives.

"I'm not in a hurry to do the report."

The three directors, who had already started to work hard, raised their heads and looked at Shi Yalin, who was sitting with her legs crossed. They were somewhat dissatisfied with her.

After all, if they had accepted Nangong Nuannuan instead of her, how great would that have been?

Lang Zhen asked, "Miss Shi, do you have any questions?" If there is, we'll talk about it after we're done."

Shi Yalin also knew that the three leaders might not like her, but that didn't exist.

[My Sweet Physician Wife Calls The Shots](#)

Chapter 3095

3095 Squeezing (2)

she had lived for so long, when had she ever lived for anyone else? she was gentle. as long as she got what she wanted, she didn't care about their lives.

"Nangong Nuannuan has always been cunning. We don't know what's going on with Zhang Fang. In order to prevent Nangong Nuannuan from falsifying the data, it was better for everyone to do the experiment first. She wanted to see if her genes could be restored to normal. If it's possible, you can make the report."

The three police chiefs couldn't help but laugh when they heard that.

"do you know how long it will take to complete this experiment in a petri dish?" li dan asked.

"two days," shi yalin replied after some thought.

The three directors laughed again.

Li dan continued,"it's two days. I can do it in two days, but it will take at least 48 hours." The key was that there couldn't be any mistakes in the process. You can only write the report after the experiment. Let's not talk about whether you can finish the report in one day or even less. Even if you can, do you know how rushed it is?"

and this involves the three major subjects of genetics, nerves, and cells. We need to work together at the same time, which means that we won't be able to rest for the next three days! Lang Zhen said somewhat angrily.

After all, it was Shi Yalin who had caused this.

If they had followed their instructions and hacked Gu Xiaoli's computer, none of this would have happened.

Shi Yalin laughed at their words and snorted, " "Don't tell me you're going to sleep?"

The three professors couldn't even say a word, and their faces turned red.

"Miss Shi, if it wasn't for your lack of strength, would we have fallen to this point? Nangong Nuannuan had been planning to join my Institute from the very beginning. The principal had already told me about it, and I had agreed to it. If Zhou Xianglin had not come to the three of us and told us about you and provoked Nangong Nuannuan, we would not have made such a choice. If we had chosen Nangong Nuannuan back then, this situation would not have happened."

The thing Shi Yalin hated the most in her life was people comparing her to Nangong Nuannuan. she had always felt that nangong nuannuan was so powerful because she was born into a good family. that was why she was able to lead a life full of bugs. If it wasn't for her family background, Nangong Nuannuan wouldn't even be worth a fart.

Therefore, these three people had stepped on Shi Yalin's sore spot.

originally, she thought that since these three old men were old scholars, it would be better to let them work for her without complaint than to be forced. However, since they didn't want to give her face, she couldn't be blamed.

“What if?” “Professor lang, you’ve lived for so long, you should know that the most illusory thing in the world is what if.” Shi Yalin laughed and said sarcastically. There were only choices in this world, the right choice and the wrong choice, but there were no ‘if’s. Since you’re already on my ship, then shut your mouth and do your job. what i want is for you to work hard for me without complaint, not to say “if” to me. If you perform well in the future, I, Shi Yalin, will naturally not treat you unfairly.”

“Do your research? You won’t mistreat us?”

Lang Zhen laughed in anger at Shi Yalin. Wang qiren and Li Bei’s faces were also extremely ugly.

“Miss Shi, I think you might have some misunderstanding about us.” Li Fan couldn’t help but say-

[My Sweet Physician Wife Calls The Shots](#)

Chapter 3096

3096 Threat (3)

“You’re doing research with us on this project. You’re just one of the researchers involved. This research is the result of the three of us. We’re doing this research out of our own will, not for you. Not now, and not in the future.”

Wang qiren’s expression was not good, but he did not speak. He had a faint feeling that something was wrong.

“you three don’t think that you can get off my ship, do you?” shi yalin laughed.

“Shi Yalin, what do you mean?” Lang Zhen angrily asked.

“Isn’t my meaning clear? In order to achieve the results you wanted, you got Qi Meixin to hire someone to steal Nangong Nuannuan’s research results. If I were to tell Nangong Nuannuan or the media about this, how would you, as the leading figures of Kamino’s medical field, react?”

The three professors’ faces instantly turned red from anger. If they weren’t doctors and didn’t take good care of their skin, they would have probably suffered a stroke.

“shi yalin! You’re simply slandering me!” Li dan roared, “ it was you who asked us to contact Qi Meixin. You asked us to steal Nangong Nuannuan’s research results!

“What time?” Shi Yalin asked in surprise.

The three professors:

but I do have a video of professor li looking for Qi Meixin, and a video of Qi Meixin looking for Zhang Fang. There’s also a video of Zhang Fang drugging Gu Xiaoli and stealing the research report. Are you guys interested in watching it? ”

The three professors looked at Shi Yalin and then at Zhou Xianglin, who had a “it’s none of my business” look on his face. After a long time, lang Zhen said angrily, “ Shi Yalin, you’re a scum.

“Young man, don’t think that you can do whatever you want just because you have a few stinky money at home and a lot of people under you. Even though we fell into your hands, it doesn’t mean that you

won't fall into the hands of others." li fan, who had been recorded, was so angry that his blood was flowing.

shi yalin laughed like a dead pig that was not afraid of boiling water, " "It doesn't matter. I won't fall into your hands anyway. You guys do a good job on this project, and we'll all benefit. After all, this was a matter of success and fame. but if you don't do it well, i'll release your video.

I'm a businessman, and businessmen value profit. Even if you want to drag me down, I'm not afraid. There are so many professors in the medical Association and so many medicines. after i graduate, i'll enter the medical association directly.

But you guys are different. Since you were young, you've been so close to the people of the medical Association behind the principal's back. The principal can't tolerate you in his heart. "From a large perspective, if you don't do it well, you'll be embarrassing the combat Services Department and the Kamino Kingdom. What's more, if this kind of theft is proven to be true, then it's not just losing face, but also your character."

"Alright, you don't have to say anymore!" Lang Zhen couldn't bear to listen any longer and interrupted Shi Yalin's jabbering, " "The three of us admit defeat this time. We'll do a good job and guarantee that we'll hand in a satisfactory answer to the world Medical research project. But after this, I hope you can return the video to us."

Shi Yalin looked at lang Zhen in surprise and asked, " "you don't think that i didn't make a copy of the video just because i returned it to you, do you?"

Lang Zhen directly stood up in anger.

"shi yalin, what do you mean?"

"Professor lang, why are you so angry?"

[My Sweet Physician Wife Calls The Shots](#) **Chapter 3097**

3097 Still not sincere?(4)

"Even if I did return the video to you, would you think that I didn't make a copy? Since you've already made a copy, what's the point of me returning the video to you?"

Wang qiren slammed his fist on the laboratory table, his eyes almost spitting fire. "So, you mean that you'll never return this thing to us, and you're going to threaten us for the rest of your life?"

"How can this be a threat?" Shi Yalin did not agree with him and said, " "Let's take this matter as an example. After you succeed, you'll be promoted to professor and be praised by others, right? Even if I have a name, I'm just a first-year student, not the main creator of the project. To put it bluntly, this matter has little to do with me. in the future, i'll need to rely on the medical association to be promoted to professor.

Also, the medical Association has a lot of talents, even many experts and professors from abroad are willing to do research there. The salary is much higher than the medical department University's. Do you think it's a waste for you to go there?"

“Wait!” “From what you’re saying, you want us to leave the Shu Medical University and go to the medical Association?” Li Fan couldn’t help but ask.

“What else?” Shi Yalin asked with a smile.

“Shi Yalin, aren’t you going too far?”

“The three of us have treated you well for the sake of Zhou Xianglin. Why are you trying to harm us?”

you already have so many people in the medical Association, and you don’t need the three of us. Why did you use such a despicable method to force our Medical Association? ”

“How many things can our Medical Association Research in a year?” Shi Yalin asked with a smile. How much did the medical department manage to research in a year? You people who are still in the medical department University should have joined our Medical Association a long time ago. I’m still lacking some experts in the field of cells, nerves, and genes, so I’d like to sincerely invite you over.”

you gave us such a bad idea and made us execute it. You even took a video of us. Is this your so-called sincere invitation? ”

“Still not sincere?” you ... Shi Yalin’s eyes widened. as the young lady of the Shi family, I came to the Research Institute to look for you. How can you expect me to be sincere? ”

The three of them laughed out loud when they heard Shi Yalin’s words.

They regretted it!

They were extremely regretful!

The medical Association had looked for them many times, but they subconsciously felt that the place had changed and they couldn’t go, so they never agreed to go there. even though the other party had offered very good conditions, they did not agree.

But now, they were forced to go to the hospital of the medical Association because they did something shameful.

The few of them were so regretful that their intestines turned green.

the three of them had no choice but to settle the matter at hand first.

Shi Yalin saw that they were busy, so she stood up and said,”you guys go ahead, i’ll book the plane tickets. The meeting is in three days. Nangong Nuannuan and the others will be leaving tomorrow, and we will be leaving the day after. The experiment should have been verified by then. As for our research report, you can do it on the plane.”

Looking at Shi Yalin’s back as she walked out of the research room arrogantly, the three professors were filled with resentment.

However, just as Shi Yalin had said, compared to losing their reputation, they could only choose to endure the humiliation and live.

The celebration banquet for the world Medical research project Conference was four days later.

The previous week was the time for each research team to submit their research report at the designated location.

Every research group had to present their research report to the experts of the organizing committee on the spot. The entire process was recorded, and the experts would then grade and grade each research project.

[My Sweet Physician Wife Calls The Shots](#)

Chapter 3098

3098 the prestige of the chairman (5)

The 50 research projects would be ranked from first to last. however, not all the events could have a ranking.

most of the events that didn't have a ranking couldn't be researched and even the first step was wrong.

This kind of situation happened every year, and there were always a few of them.

At the celebration banquet, not only would the rankings be announced, but the research groups with rankings would also be interviewed by professional reporters.

Not only would this bring glory to the country, but it would also be an important milestone in raising his own status in the industry.

If one had to describe it, this project would be the Oscar award ceremony in the medical world.

Once they achieved success, many businesses would make reservations to invest in them. In this way, academia could develop into productivity. It was a win-win situation.

nangong nuannuan had brought a few of her research team to cyber nation.

As they were first-class passengers, they were the first to get off the plane. There were a total of 56 seats in business class. Due to the expensive ticket price, there were only about 20 people in business class.

Wei Yan and his group followed the business class passengers off the plane and prepared to go to the border inspection. However, as soon as he walked out of the passage, he was stopped by a group of people in black suits, sunglasses, and Bluetooth earpieces.

Wei Yan was startled, and his heart tightened.

It seemed to have happened before that some countries would use despicable means to harm other project teams in order to prevent themselves from falling behind in the competition.

When he saw the group of men in Black, Wei Yan's face instantly turned ugly.

because of nangong nuannuan's guarantee, there was no one in charge of the public relations crisis in their project team.

Just as he was about to speak, he heard the Men in Black call out in unison, " "Chairman."

With such a formation, not only Wei Yan and his group, but even the passengers who had just walked into the airport Hall frequently turned their heads to look at them.

However, Nangong Nuannuan was wearing a t-shirt, shorts, and sportswear. She also had a cap on, and the brim of the cap was quite low, so many people couldn't see her face. He only knew that she was a young girl with a very hot figure.

Just as the passengers stopped in their tracks, the airport staff had already quickly come over to clear the way and stop the passengers from continuing to crowd around them.

As for Nangong Nuannuan, she handed her limited luggage to one of the men in a suit.

The rest of the men in suits had changed from their frightening appearance to receiving the luggage for Wei Yan and his group with great enthusiasm.

The airport Executive, who had been waiting at the side, also introduced himself to Nangong Nuannuan. Then, he respectfully led the group into a VIP passage.

Because it was Wu Zhi, Zhang Fang, and Gu Xiaoli's first time going abroad, they asked Wei Yan and he Zhi to tell them what they had to do after the plane landed.

Therefore, they knew that not only did they have to go through the security check, but most importantly, they had to go through the border check.

Besides, the customs procedures in Saibo were extremely complicated, so everyone decided to speed up. After all, due to the time difference, it was already past nine when they got off the plane. By the time they passed the airport, it would be almost midnight.

Therefore, when the airport Executive led them through the VIP passage, then down the stairs through the VIP passage, and finally back to the pavilion airport, everyone was a little confused.

[My Sweet Physician Wife Calls The Shots](#)

Chapter 3099

3099 Special treatment (1)

After all, they had just come from the other side not far away. Looking up, the economy Class passengers of their plane had just begun to get off the plane.

Under the lead of a group of bodyguards in black suits and airport executives, the group got on the cable car and drove them all the way to the other side of the pavilion.

After they got out of the car, they saw two extended versions of Land Rovers parked there. Everyone's eyes widened, thinking that they could just leave without even going through the border inspection.

However, they only stopped the car in front of the Land Rover. After getting out of the car, the airport Executive led them to two red tourist helicopters.

They were all ordinary medical researchers. Except for Wu Lingyun, who had become the daughter of a noble family, the rest of them had to squeeze on the subway when they returned home from Kamino. They were already a little overwhelmed to see a group of people in black clothes that could only be seen

in movies. now that they saw two beautiful planes, even wei yan and he zhi were excited, let alone the young people.

He had lived for many years, but he had never been in a helicopter before.

The helicopter rose steadily and soon flew into the air and out of the airport.

In order to let everyone see the beautiful nightscape of the central city of Saibo, Nangong Nuannuan had the helicopter fly at a lower altitude.

“This is the first time I’m going overseas! It’s my first time overseas and I’m already basking in your glory. I’m getting such top treatment. I’ve never been in a helicopter before.”

Gu Xiaoli was so excited that she couldn’t take it anymore. She looked at the car and the scenery below. Then, she praised the Nangong family’s rich man without any pretense or exaggeration. Wu Lingyun laughed.

In fact, she had only been in a helicopter once. That time, Nangong Nuannuan had been in the helicopter to save Chi Yang and had observed the situation.

Because she had to save people that time, she didn’t even have the mood to experience whether it was fun to take a helicopter. Today, she finally experienced it.

I also feel so happy. It’s so beautiful! Wu Lingyun’s eyes were fixed on the colorful lights below, and his eyes were filled with a dream-like beauty.

Seeing that her two friends were so happy, Nangong Nuannuan was also very happy. She said, “It’s a three-hour drive from here to where we’re staying, and the helicopter is much faster.”

On the other plane, Wu Zhi was also very happy to see the scenery below. He couldn’t help but say, “We’re so lucky to be able to do research with miss Nangong.”

Compared to Wu Zhi’s pure happiness and excitement, Zhang Fang was already regretting so much that his intestines had turned green.

When he handed the research report to Qi Meixin yesterday, not only did she not praise him, but she also said that he was slow and useless for not being able to do such a small thing well.

Zhang Fang felt wronged.

If he had known this would happen, he would not have agreed to Qi Meixin’s request.

Seeing Wu Zhi’s current pure happiness, he was really envious.

He had heard of disheng before, and he knew what position it held among the world’s corporations.

However, he had always felt that this had nothing to do with him. No matter how much Nangong Nuannuan had, it was still hers. He would not be able to benefit from it.

But now, sitting in a helicopter and looking down at the night view of the city, Zhang Fang really felt like he had the entire city under his feet.

At this moment, he finally realized that Nangong Nuannuan was very good to her people. As long as they were her people, they could enjoy the convenience that others could not.

[My Sweet Physician Wife Calls The Shots](#)

Chapter 3100

3100 Home in cyber nation (2)

" yes, nuannuan is a very good child. she's young and promising, and she can see things very clearly. you're all young, so work hard for nuannuan. since she has already chosen you, as long as nothing major happens in the future, you'll definitely be able to live a smooth life. " Wei Yan stood at the side with a look of admiration and admiration.

After all, he was already so old. Even if he followed Nangong Nuannuan now, he wouldn't be able to work for many more years. However, Wu Zhi and Zhang Fang were different. They were still young and had a lot of time.

Wu Zhi nodded,"don't worry, professor Wei. I'll definitely do a good job with miss Nangong." After this project is over, as long as she still needs me, I'll always be with her. "

Wei Yan nodded. she promised the principal that she would stay in the medical department University for a year. She would do research non-stop during this year. You've been with her for two months and have been getting along well. She'll definitely call you on the next mission."

"Then, I'll have to ask professor Wei to help me and Zhang Fang put in a good word for us in front of miss Nangong."

"Although the two of you performed fairly well, you've also perfectly completed the task she gave you. Gu Xiaoli is not as good as you guys, but she is willing to help you. So don't worry, after this project, as long as she sets up another project, your names will be on it. "

Wei Yan was very clear about this point.

"Professor Wei is really a rare understanding person. Before this, I couldn't understand why you, a professor at a lung cancer research Institute, would be helping Nuannuan, a first-year student. Now I understand, professor Wei, you're the smartest person in the entire Research Institute." He Zhi was also in a good mood.

Everyone was in a good mood, except for Zhang Fang, who was filled with anxiety and disappointment.

The regret in her heart grew deeper.

Zhang Fang had always been the kind of person who kept to himself, so he didn't say anything along the way. No one felt that there was anything wrong with that. Moreover, everyone had taken out their phones to take pictures of the beautiful night scene, so they didn't have time to care about him.

Half an hour later, the helicopter landed in an extremely beautiful place.

From the sky, the place looked like a garden-style building in Kamino. In the middle of every beautiful garden was a villa.

when the plane stopped, wei yan and the others got off the plane. nangong nuannuan was already waiting for them not far away.

“Nuannuan, did you upgrade this beautiful villa-style hotel out of your own pocket again?” Wei Yan could not help but ask.

When they came over, Wu Zhi had already told him that their flight tickets had been privately funded by Nangong Nan to be upgraded to first-class. The original ticket was more than 4000 Yuan per person, but because there was no discount for the temporary upgrade, it was more than 60000 Yuan per person.

Now that they had arrived at such a picturesque place, it was obvious that Nangong Nuannuan had helped them level up again.

“When I first bought this place, I really wanted to build it into a hotel,” Nangong Nuan said with a smile. But later on, I fell in love with this place, so I turned it into a villa.”

A villa?

Everyone’s mind was in a daze.

Even though Wu Lingyun had returned to the Xiao family and had become a true heiress, he was still shocked when he saw Nangong Nuannuan’s residence in cybernation.

“This place is your home in Saibo?”

Such a large place with mountains and water on one side, not to mention the Nangong family, even the Peninsula Villa where the Nangong family was located was not inferior. It was almost the size of a Peninsula.

At least, that was what they saw from the plane.
