[My Sweet Physician Wife Calls The Shots](#)

Chapter 3101

3101 our own people are everywhere (3)

“I have a lot of friends, so I built more small houses. They will live more comfortably.”

In fact, this place wasn't even her home. She usually lived in the Super luxurious Manor in Feng shengxuan. She had wanted to build a six-star hotel on this piece of land, but the height limit was too high. Therefore, she had turned this piece of land into a foothold. After all, cyber nation often held banquets. In fact, from the time it was built until now, the time she had lived here could be counted with her fingers. It would not be an exaggeration to say that it was a waste of resources.

However, Nangong Nuannuan was too embarrassed to say these things.

“Alright, you can choose your own house to live in. There are no outsiders here. If there's anything you don't know, ask the servants here.”

Everyone bid their farewells to Nangong Nuannuan after some small talk.

It was getting late. After the group had some rest, tomorrow was the first day to submit the report.

The next day, they went to the organizing committee.

The world Medical research project organizing committee's venue was set up in a five-star hotel with a relatively large outdoor area.

Almost all of the shortlisted researchers lived here.

The entire event was very Grand and Grand. Wei Yan and the others had all changed into suits.

Originally, the Kamino nation's team should have formed a team to come here. However, due to the bad relationship between the medical Association and the University, as well as the bad relationship between the Nangong family and the Shi family, the two projects of the Research Institute of the medical administration University, the medical Association and the angel research Institute, could not be formed.

In the end, the Kamino Kingdom's participants were divided into four teams.

When the medical department found out about this, they were also troubled by everyone's undisguised hatred.

Looking at the words “ a warm welcome to medical elites from all over the world ” displayed on the LED screen at the entrance of the hotel, everyone felt a sense of pride in their hearts.

When they entered the lobby, there was a special team from the organizing committee waiting to welcome them.

Just as Wei Yan was about to step forward and reveal his identity, he saw a woman who was giving instructions to the welcoming guests walk over to them enthusiastically.

Before he arrived, the woman couldn't help but say excitedly, "Miss Sunny, it's a great honor to meet you. I've been excited the whole morning when I heard you were coming."

When Nangong Nuannuan saw the woman, she smiled and hugged her naturally.

Then, he would introduce her to the members of his team one by one.

Everyone knew that Disheng had moved from Cyber Country to China, and Angel Hospital and Angel Research Institute had been second to none in Cyber Country. They knew a few staff members from the organizing committee, but they didn't think much of it. They all smiled and shook hands with each other.

Nangong Nuannuan introduced her team to the other party before introducing them to everyone, "This is the Vice President of the World Medical Research Association, Sylvia."

What?

Everyone's eyes widened.

He thought that the person who was in charge of the reception was the foreman, but he did not expect it to be the Vice President!

"Everyone, please don't feel so distant," Sylvia introduced herself, "I'm from the Angel Research Institute." If you follow Nuan Nuan, you'll be my boss. We're all on the same side. Let's go, I'll bring you in."

One of them was the boss.

Everyone was stunned!

It felt like they had entered a special organization.

With Sylvia leading the way, the greeters in the lobby could not come over to talk.

[My Sweet Physician Wife Calls The Shots](#)

Chapter 3102

3102 Nangong Nuannuan's status (4)

Wei Yan and his group felt that the welcoming guests were all looking at them with excitement.

Of course, they did not think that these people were looking at them. It was obvious that they were all excited about Nangong Nuannuan.

After all, he was the boss of the Angel Research Institute. He should be respected and worshipped by others.

Sylvia brought Nangong Nuannuan and the others directly to the 67th floor, where the main event was held.

"This place is divided into five sub-venues. The four of us and the Guild leader are each in charge of one venue. The person-in-charge of each project needs to bring his team members to elaborate on the project content and the feasibility of the process in detail for an hour."

“So which group am I in?” Nangong Nuannuan asked.

“The president’s group.”

“I thought I would be in your group.” Nangong Nuannuan said jokingly.

“I originally arranged for you to be in our group, but they said I was from the angel research Institute and were afraid that I would help you cheat. Hmph, why don’t they think about it? did our angel research Institute get to where we are today by cheating? I, Sylvia, have never admired anyone in my life, but you, boss, are the only one I truly admire.”

Nangong Nuannuan laughed at Sylvia’s flattery. Alright, alright, take it easy. Aren’t you afraid of being laughed at by others for flattering me like this? ”

“We’re all on the same side, what’s there to be afraid of?” Said Sylvia without a care.

When everyone heard this, they all laughed.

Only Zhang Fang, who was listening at the side, became more and more shocked.

As the Vice President, Sylvia would definitely know the specific situation of each event in this competition. Would the things that he handed to Qi Meixin be found out and then accused of theft?

Even if Qi Meixin had the means to settle this matter, would Nangong Nuannuan hate her for such obvious intellectual property plagiarism?

If Nangong Nuannuan hated him, with her strong background, would she ruin his reputation?

Thinking of the possible situation, not only did Zhang Fang regret it, but he was also scared to death.

Sylvia led Nangong Nuannuan and the others to the door of a large conference room. She knocked on the door and pushed it open. Everyone saw that the experts from the organizing committee were already seated in a circle.

When the experts from the organizing committee saw Nangong Nuannuan, they all stood up politely and greeted her, ” “Miss Sunny.”

One of the men, who looked to be in his 60s, stood up from his seat and walked over to Nangong Nuannuan. He gave her a hug and said, ” I’ve seen the news before. Sunny, I wish you and your lover a happy life.

“Thank you, President Devin.”

after the hug, devin looked at the woman who had obviously matured a lot compared to before. the sharpness between her brows had disappeared, and she was much gentler. he was pleased.

“I’m very happy that you’ve finally chosen this path. You’re the most talented genius I’ve ever seen in the field of medicine, and the medical world is honored to have a successor like you.”

“Thank you,” Nangong Nuannuan replied with a smile.

Then, Nangong Nuannuan introduced him to Dewen, ” “This is my team, Yingluo.”

Although everyone already knew Nangong Nuannuan's position in the world Medical research Association, when they heard with their own ears that this person was the president of the world Medical research Association and that the president had such a high opinion of Nangong Nuannuan, they couldn't help but be amazed.

[My Sweet Physician Wife Calls The Shots](#)

Chapter 3103

3103 A genius pharmacist (1)

It had been quite some time since Nangong Nuannuan had returned to the country. It was said that she had only been 17 years old when she returned. In other words, before Nangong Nuannuan had returned to the country, she had not even come of age, and the president had already taken a fancy to her potential.

just what was it that made the president look at such a young girl with such respect?

Everyone was puzzled.

Seeing their confusion, Sylvia whispered, "Boss is the genius pharmacist whose name has shocked the world."

They were all medical students, so they must have heard of the genius pharmacist. however, they were too far away from this genius.

Therefore, when they heard that Nangong Nuannuan was the genius who had spread throughout the medical world, everyone's eyes widened in shock and they said in unison, "What?"

They had thought that the genius pharmacist was a perverted old man with an unkempt beard, glasses, and thin muscles.

However, he did not expect that the genius pharmacist who was well-known all over the world was actually a young girl. Moreover, she was still a little girl at that time.

Nangong Nuannuan's team was warmly welcomed by the members of the world Medical research Association. The top medical experts from the world greeted Wei Yan and the others. Even Gu Xiaoli, who was only in her first year of University, was warmly welcomed by everyone. Gu Xiaoli was so excited that her face turned red.

To those who were excited.

The Guild Master was obviously very interested in Nangong Nuannuan. He continued to ask, "Sunny, I'm really curious about what made you choose medicine. After all, for someone like you who can succeed in anything, I thought you would find a way to make your business the best in the world."

"Because I don't have a degree."

President Devin was stunned for a moment. He could not help but hold his forehead and shout, "oh, Sunny, you must be joking with me."

President Devin's words made Wei Yan and the others laugh. This was because they could prove that Nangong Nuannuan was really trying to get a diploma.

"I'm not joking," Nangong Nuannuan replied with a smile. You also know that I'm currently in Kamino. I can't do well without a degree."

"Then why don't you go to Business School?" President Devin asked persistently.

"I'm already a successful businessman. do i still need to learn?"

"Then you're already very successful in the medical field." President Devin did not hide his praise for Nangong Nuannuan.

"no, it's just that i've developed more types of medicine than others in the pharmaceutical field. However, I didn't know much about medicine before."

Nangong Nuannuan didn't want to tease this old man anymore. After all, this was the man who had threatened to give her all his assets in order to persuade her to enter the medical system.

"i studied medicine because my husband is in a high-risk job. I don't want him to not receive the best treatment after he's injured, so I want to make myself the best doctor. I'm a first-year student at the medical department University. When I graduate, I'll be able to do whatever I want."

wu lingyun and gu xiaoli were aware of nangong nuannuan's ambition, but it was the first time for the others to hear about it. She had never understood why Nangong Nuannuan was so insistent on obtaining a diploma, but she finally understood now. Wei Yan and he Zhi suddenly felt a warm feeling in their eyes.

President Devin stared at Nangong Nuannuan for a moment, then reached out to hold her hand and said,

[My Sweet Physician Wife Calls The Shots](#)

Chapter 3104

3104 The most outstanding medical worker (2)

"Child, you will definitely become the best medical worker in the world."

"Thank you," he said. Nangong Nuannuan thanked him with a smile.

He looked at the experts from the organizing committee and asked, "I heard that you'll be listening to my project in person for an hour?"

the project you submitted only existed in a hypothesis, but I believe that you must have some results for you to be able to come to me.

Nangong Nuannuan didn't answer. She smiled and said, "then let's start now."

"Alright," he said.

As everyone was about to sit down, Gu Xiaoli said to Wu Zhi and Zhang Fang, "Then let's go out?"

Wu Zhi and Zhang Fang obviously wanted to stay and listen. Although they didn't understand what Nangong Nuannuan was saying, they really wanted to hear her explanation.

This was especially so for Zhang Fang. He wanted to listen to Nangong Nuannuan's explanation before going to director lang to tell him how she did it. This way, the other party could at least avoid the problem when they were explaining. Otherwise, if the process and the way of narration were the same, it would be easy to see through.

However, before Zhang Fang could say anything, Nangong Nuannuan said to them, " "Then you three can leave. We'll just gather outside in an hour."

"Alright," he said. Gu Xiaoli smiled and nodded, then whispered to Wu Zhi and Zhang Fang, " "I heard from Nuan Nuan that this is a hotel in the city center. Let's go shopping and buy something."

Wu Zhi:

Zhang Fang:

Were they here to buy something?

Zhang Fang was depressed, but it was clear that he had no right to say no.

in the end, he could only take out the printed materials from his bag and distribute them to the experts. only then did he follow gu xiaoli, the silly girl, out with an ugly expression.

All the way, he watched Gu Xiaoli pulling Wu Zhi to look at this and that, and he was so angry that he didn't even want to say a word.

The experts opened the project's research report. After reading a few pages, their eyes widened.

Everyone was shocked by Nangong Nuannuan's genius chemistry combination and mathematical calculation ability.

they were also medical students and were the top geniuses in the medical world. when they saw this godly calculation method and chemical combination mode, they could only worship it in their hearts.

Only President Devin, who was also a genius in medical research, would not have become a professor above level six at the age of 60.

because he had already exceeded level six, no one above him was qualified to give him a level, so devin's level had always been level six. However, only those who were close to him knew that after so many years, he was probably above level Seven.

Therefore, after the initial shock, only Devin showed a little doubt when he saw some of the data in the middle.

By then, Nangong Nuannuan had already finished setting up the projection and was starting to explain. Everyone's attention was quickly drawn to Nangong Nuannuan's explanation.

Very quickly, half an hour had passed. The experts who had just read the research report and had slightly better memory all realized that something was wrong.

He listened to Nangong Nuannuan's almost perfect explanation and looked at the research report. In the beginning, they had thought that the God-level research report was perfect and shocking. However, after listening to Nangong Nuannuan's explanation, he instantly realized the difference between them.

Soon, everyone began to listen attentively. They put down the research report that they treated like a treasure and looked at the big screen intently, not willing to miss a single detail.

[My Sweet Physician Wife Calls The Shots](#)

Chapter 3105

3105 Do you want my diploma (3)

An hour later, Nangong Nuannuan's report on the research project ended, as if she was stuck at a dead end.

The crowd was silent for a long time, and finally burst into a warm applause.

It was too exquisite!

It was too magical!

"Sunny, you're indeed the genius I acknowledged! With such complicated calculations and architecture, is this Kasaya something a human can create?"

After hearing President Devin's praise, the experts all stood up and applauded, congratulating Nangong Nuannuan.

Wei Yan, he Zhi, and Wu Lingyun followed Nangong Nuannuan as they stood up. The heroic spirit in their hearts was indescribable.

He was too excited!

Although they knew that this project would shock the world when it was completed, the three of them were still shocked and honored when the top experts stood up to greet them.

"Sunny, your research project has shaken the foundation of ordinary medical treatment. This is a milestone in the progress of human medicine.

I'll immediately help you apply for a special patent from our Association for your report. At that time, can you give a few speeches for us in important countries in the world?" Devin asked expectantly.

After all, he had dedicated his entire life to the medical industry, so he always felt that he should share good things with everyone. This was the result of Nangong Nuannuan's research. As long as she was given enough money and reputation, she was willing to do anything that would add to her status.

however, nangong nuannuan smiled and said, "I've already introduced you just now. This is my assistant, professor Wei Yan from the Cancer Center. This is also my assistant, professor he Zhi from the Dermatology Center. They've been researching with me, and they know the process of the research. In the future, let them be the ones to deliver the World Tour. You also know that I still have disheng to manage. I'm a businessman after all."

Devin's mouth twitched when he heard that.

Merchant?

To be honest, he had never seen such a lazy businessman.

who didn't know that the crown prince of NS group was helping her manage disheng?

This was something that all the businessmen in the world knew.

"You're really not going?"

"I really don't have the time. After all, I'm still a first-year student, and I still have to clock in for classes. Otherwise, our principal wouldn't have given me a graduation certificate."

"I'll send you a Ph.D. Certificate from the Saibo national medical school. Do you want it?" devin asked.

"After I graduate from Saibo's National Medical Institute, can I join Kamino's war service department and become a military doctor?"

Devin was so angry at Nangong Nuannuan's words that his face twitched.

Nangong Nuannuan was amused by his twitching white beard and asked, " "You're someone who looks down on me?"

Only then did Devin recover from his anger. He looked at Wei Yan and he Zhi's embarrassed expressions and quickly smiled,"No, no, how could that be? "your people, like sylvia, are not ordinary. I believe that they will be able to spread this project to medical workers all over the world."

Wei Yan and he Zhi were also very happy to hear Devin's words.

They knew that they wouldn't be at a disadvantage if they followed Nangong Nuannuan, but they didn't expect her to hand over such a matter to them.

The two of them were extremely grateful.

"If there's nothing else, I'll leave this place to other research teams. This is the research material."

Nangong Nuannuan personally handed a USB drive to Devin.

[My Sweet Physician Wife Calls The Shots](#)

Chapter 3106

3106 Someone is courting death (4)

"Yingying's materials are different from what you reported. This was the previous research report, right? I think I took the wrong one."

Nangong Nuannuan smiled and replied,"Oh, really?" Then he probably took the wrong one. After all, in order to research this project, we changed many types of thinking and calculations. It might be that our Data Officer printed out the previous research materials. This is the complete electronic document, you can use this."

"Alright," he said. Devin took the USB with both hands. It was as if he was holding the most precious treasure in his hands.

He Zhi felt a little embarrassed and said as soon as he left, " "Research materials are so important, Zhang Fang can actually make a mistake!"

Nangong Nuannuan smiled nonchalantly and said, "don't blame him. He probably didn't do it on purpose." It's all in the past now. Our reports and electronic documents are the most important to them."

" it's a good thing that you have a good relationship with the research society, " he zhi sighed. " otherwise, we'd definitely be laughed at today. "

Just then, Gu Xiaoli and Wu Zhi saw a group of people walking out and immediately came up to them.

"Nuannuan, how is it? Was it successful? What did they say?"

Nangong Nuannuan was clearly in a good mood. She said, " "It went smoothly. It's going very smoothly."

"That's true. Don't you know who started this project? By the way, Nuan Nuan, how are you so powerful? you're the mysterious genius pharmacist!"

"Yeah, I'm shocked too." Wu Lingyun nodded. Nuannuan, you're amazing."

"That's right! after all, he's the boss of my angel research institute. if he wasn't powerful, the angel research institute would have collapsed long ago." Sylvia, who had been waiting outside, also came over. Even though she was a shrewd woman, it was obvious that she truly respected Nangong Nuannuan.

"Devin's inside listening to the report. Why are you running around?" Nangong Nuannuan could not help but ask. After all, she represented the face of her angel research Institute, and she didn't want her to have an idle position here.

"Boss, I'm also very busy. I knew that you were coming, so I put down everything I was doing to accompany you."

"There's no need. I've already done the report and I'm ready to leave now. We'll meet again in three days."

Before leaving, Nangong Nuannuan whispered a few words into Sylvia's ear, and she raised her eyebrows.

In the end, Sylvia and a few experts from the angel research Institute, who had entered the organizing committee, respectfully saw Nangong Nuannuan and her group out of the hotel.

when the boss had walked away, everyone saw sylvia sneer and asked, " "Vice President, is there something you need?"

Sylvia's originally warm and gentle eyes were now sharp. She sneered, " "It's a small matter, someone is just courting death. Let's go, don't worry about it. "

In the three days that they had been in cyber nation, Nangong Nuannuan had brought her group to tour around the area. They had taken good care of everything, including eating, drinking, and playing.

Their group had always been United, and now that they had a group of people to play with, even professor Wei Yan and he Zhi seemed to have become more cheerful.

It was at the last time of the day that Wang qiren's group arrived.

Shi Yalin walked in with a smile on her face.

Originally, the person in charge of this project was Wang qiren, but because the final success was due to genetic changes, the person in charge of the project was lang Zhen. Lang Zhen was also the one who reported.

[My Sweet Physician Wife Calls The Shots](#)

Chapter 3107

3107 Are you satisfied (1)

A staff member of the organizing committee led the group into the conference room of the president's group.

Lang Zhen introduced his group, and President Devin said very happily, Nangong Nuannuan from the Research Institute of the medical administration University also gave a very exciting speech. I look forward to the success of your project.

After all, in addition to Nangong Nuannuan, Devin had also personally received the people from the angel research Institute and listened to reports on the five projects.

Although it was not as exciting as Nangong Nuannuan's, it was still very good compared to the medical research projects of other countries. Before the angel research Institute was moved to Kamino, it had been a treasure for cyber nation.

Therefore, Devin had high expectations for lang Zhen and his team, who were in the same Research Institute as Nangong Nuannuan. It was not only because they were in the same Research Institute as Nangong Nuannuan, but also because the project that Nangong Nuannuan was researching was essentially the same as the project that lang Zhen was researching.

However, when he heard Nangong Nuannuan's name, lang Zhen's confident smile stiffened.

"President Devin is a genius in the medical world, and I admire every project you've developed. The project we're studying today is nothing more than showing off our skills in front of an expert. If there's anything wrong, please correct us, President Devin."

"Professor lang, you're too modest. then please begin your story."

"Alright." Lang Zhen nodded.

Shi Yalin gave her assistant a look, and the assistant handed a beautifully printed booklet to the judges.

At this time, lang Zhen had already started to talk about their project.

In the beginning, the group of people listened with great interest. After all, this was a huge and complicated project.

As a result, the president and the judges' expressions changed.

Lang Zhen also saw everyone's expressions and felt a little guilty, but there was no other way. They had indeed plagiarized Nangong Nuannuan for this project, so they could only follow her train of thought to complete their own project. Therefore, the process was the same, and these people would definitely be suspicious.

However, just as Shi Yalin had said, so what if he knew? they could not get any evidence. This was stolen by Zhang Fang. Even if Zhang Fang admitted to it, they could choose not to admit it.

Therefore, even if the organizing committee knew that this was plagiarism, the research results were different due to the different projects. Only the process was the same. There was no way to judge this as plagiarism. After all, there was only one path to victory. It could only be said that Nangong Nuannuan had gone first, and they had gone later.

With Shi Yalin's almost shameless encouragement, lang Zhen continued to report with full confidence. He didn't have the timidity and fear of a plagiarist dog at all.

After an hour's report, lang Zhen looked at Devin, but the entire conference room was silent.

"President Devin, I wonder if you're satisfied with our research project?" Lang Zhen asked.

At this time, Devin's smiling face had completely disappeared.

The development of medicine required the joint efforts of all mankind. There would come a day when medical knowledge would be researched and used together. However, the person who succeeded in the research must be the beneficiary. This was a basic right of a researcher.

Over the years, the research content of countless medical researchers had been widely used by major hospitals and pharmaceutical manufacturers around the world.

[My Sweet Physician Wife Calls The Shots](#)

Chapter 3108

3108 Doubts (2)

But at least the people who created this medical research would benefit. It wasn't just about benefits, it was also about reputation.

Therefore, plagiarism was strictly prohibited in medical research projects.

This was the basic rule.

Devin had finished reading the document and put it on the table. He asked lang Zhen seriously, "Professor lang, can I ask you a question?"

"Please go ahead."

did you and your team members personally research this?"

"Yes." In the face of the question, lang Zhen, who had already made enough mental preparations, answered without hesitation.

“why would president devin ask this? Don’t you think we’re doing the research ourselves?” Zhou Xianglin asked. there was a hint of displeasure and aggression in his tone.

Devin was a refined scholar, so he naturally would not lower himself to the same level as Zhou Xianglin. He said, ” “There was a previous project, which was Nangong Nuannuan’s project from the Research Institute of the medical Bureau. The process of the verification process was the same as yours. So I want to ask, is this project your own research or is it a joint research?”

If the research was done together, then it would be normal for the project Verification process to be consistent. However, this would require a major vested interest. And the person who would benefit from this would become Nangong Nuannuan.

And why would Shi Yalin give such credit to Nangong Nuannuan?

Right now, Shi Yun group was short of money. As long as this project could win the award, there would definitely be a large influx of funds. She could take the opportunity to make money and use it to be her new experiment subject.

She believed that no matter how good Nangong Nuannuan’s research was, she could only regenerate her skin through genetic reconstruction. However, what they were researching was the use of genetic remodeling to allow the sick body to recover on its own.

This could be used in many ways. Even cancer.

For such an epoch-making project, he believed that funds from all over the world would be injected into it. After all, once such a drug was developed, it could fundamentally restore the human body’s health.

So even if they had doubts, at least their project was a success, and they didn’t have any evidence. This was because cameras were not allowed in the research room to prevent the project content from being stolen.

Since there was no evidence, their project should be the first.

“This project is our own research,” said lang Zhen.

then why is the process of your verification the same as the one that Nangong Nuannuan was in charge of? ” devin continued to ask.

Wang qiren responded,”President Devin, I’ve heard about Nangong Nuannuan’s project because I’m from a Research Institute.” not to mention that the starting point of our two research projects is the same, and the process of successful research is the same. let’s talk about the problem of submitting the paper first. i don’t think that if both of them get full marks, there will be a problem between them.

President Devin, we’re very unhappy with your doubts. Because your doubts have shamed our character. I hope that before you question me, you should at least show me some evidence.”

li dan nodded. ” i believe that anyone with a discerning eye can see that the content of our research is obviously more in-depth than that of nangong nuannuan and the others. it will benefit more people in the future. ” I firmly believe that our two projects are of completely different levels and depth.”

[My Sweet Physician Wife Calls The Shots](#)

Chapter 3109

3109 No explanation (3)

Even though they were still on bad terms before they arrived, at least the three of them were sensible. No one would lose their honor, face, and future money for the sake of character and integrity.

President Devin looked at the group of people who were talking with confidence and had no shame after plagiarizing and did not speak again.

An expert from the angel research Institute beside him was about to speak when he felt a kick on his leg.

The person who kicked him was on the right, and there was only President Devin on the right.

This person had a lot of questions to ask them, but in the end, he swallowed them.

"I apologize for my doubts just now." President Devin nodded. However, the process of your argument is similar to that of Nangong Nuannuan and the others, so we need to discuss it again."

Lang Zhen's face instantly darkened.

"So you insist that it's plagiarism? not even a basic evaluation?"

He had attended the world Medical research Association before, and he had attended it more than once before, so he knew that after each report, the expert group would have a preliminary evaluation of the participating teams.

However, Devin did not give them any.

professor lang, we still need to do some simulation research to know the final results of your report, so we can't make an evaluation for now. Sorry.

" but before we came, we heard from many members of the research team that nangong nuannuan's research report was highly recognized and evaluated by you, " lang zhen said with a smile.

"They are them, and you are you. Didn't the professor just say that your research is more in-depth, and you want to benefit more people, so it's normal that you can't make a judgment now, right?"

The faces of lang Zhen and the others darkened even more.

They felt that German was obviously accusing them of plagiarism.

However, Devin had a high status in the world's medicine. Devin was not qualified to accuse them of plagiarism, but they were not qualified to force Devin to give them affirmation at this time.

"Alright, since that's the case, we'll be leaving first. I hope that at tomorrow's dinner, when the whole world's eyes are on you, President Devin will not continue to use such an excuse to brush us off." Lang Zhen said.

no, I'll definitely give you an explanation at tomorrow's banquet. Devin laughed.

Then, the organizing committee sat on the stool and didn't get up. They just watched lang Zhen and his group leave.

Even for the most ordinary contestants, Devin would stand up and watch them leave, but for plagiarists, people he despised the most, he felt that there was no need for him to do such a polite thing.

Outside each meeting room was a small living room, and many pharmaceutical manufacturers and hospital leaders were already waiting there.

They would greet every research team in order to get first-hand medical research data.

Therefore, after lang Zhen and the others went out, they were immediately surrounded.

Even though Nangong Nuannuan had experienced the same thing before, the hospitals and pharmacies immediately dismissed the idea after knowing that the other party was Nangong Nuannuan.

because no matter what the other party had researched, it would not have anything to do with them. Nangong Nuannuan's Angel hospital and angel research Institute were so famous. Whether they were researching on medical treatment or Pharmaceutical Technology, the future had nothing to do with them.

[My Sweet Physician Wife Calls The Shots](#)

Chapter 3110

3110 Pulling sponsors (4)

however, lang zhen's group was different. no one knew them. Therefore, they all gathered around him.

"In fact, I think that whether it's medical skills or pharmaceuticals, we can all exchange what we need. After all, this is a matter that will benefit mankind. We are very willing to share our research results with everyone. for example, whether it's research or manufacturing, it requires a lot of energy and money. our medical association knows that money can't be earned all the time, so if you're interested, the medical association welcomes your cooperation.

In the beginning, when everyone heard that Shi Yalin was the niece of the head of the Camino National Medical Association, they immediately dispersed. However, after hearing Shi Yalin's words, everyone was very interested and surrounded her.

"Miss Shi, may I know what project your hospital is researching this time?"

with just a few words, shi yalin had already erased the name of the university of medicine. everyone had also subconsciously accepted that this project was a research project of the medical association.

then may I ask miss Shi, what project are you researching this time? "

"You'll definitely be interested in our research project."

"What is it? (What is it?)"

The merchants at the side immediately asked.

“It’s about the genetic repair for the human body. We’ve already found the chemical principles and chemical components that can repair genes. In the future, we’ll invest a large amount of money in research and development of these chemical components. “Once the research is successful, in the future, perhaps a bottle of medicine will be able to repair your genes.

Everyone here is a medical student, so you should know that the reason why the human body is sick is because of changes in the cells that cause damage to the nerves and even genes. Even cancer was caused by the large number of cancer cells devouring normal cells and producing tumors. Almost all cancer patients had their genes changed.

so, you can think about it. If one day, the medicine to reconstruct genes appears, it only takes one bottle of medicine to repair the genes. The cancer cells will be swallowed by a large number of new good cells. The cancer cells will not be able to survive, and the tumor will not form. Your illness will be cured by one bottle of our medicine, just like how we treat the cold. What effect will it have on us humans?”

When the merchants heard this, they were completely excited.

“Then may I ask miss Shi, is your research project a success?”

miss Shi, this originally only exists in theory and imagination. Have you really found a way? ”

miss Shi, we’re willing to cooperate with the medical Association. How much money do you lack for research and development? ”

miss Shi, we can also inject funds. We only need to get our country’s agent.

.....

The merchants were so excited that they almost carried Shi Yalin home and hid her. they fought to cooperate and get them to inject funds.

“If we didn’t succeed, why would we be here?” Shi Yalin smiled.

This time, the merchants were even more excited, and the noise was so loud that even President Devin in the conference room heard it.

He sent someone out to see what was going on, and after the man came back and explained the situation, President Devin’s face became even darker.

Outside, lang Zhen and the others didn’t look good.

Although they were going to be forced to work for the medical Association, they were still part of the Research Institute of the medical administration University, and they were the main researchers of this project.
