[My Sweet Physician Wife Calls The Shots](#)

Chapter 3131

3131 The results of hard work (2)

After saying that, he evilly stuffed the wine glass into lang Zhen's hand and then said to his team: "Let's go, I'll bring you guys to get to know some outstanding teams."

Wei Yan and the others were overwhelmed with emotions.

This was even more exciting than those Palace dramas.

After Nangong Nuannuan left, Shi Yalin still wanted to chase after her to ask about the situation. However, she was promptly stopped by the reporters from disheng group.

"Miss Shi, miss Sunny said that you stole something. Are you referring to the research project?"

"You and miss Sunny were researching about the same thing, so you stole from her?"

"You said that we should calculate it together, but miss Sunny said that's just a layman's way of saying things. So how did you calculate it?"

"I heard that you've already signed investment contracts with many companies. If the results are like what miss Sunny said, can your medicine be successfully put into research?"

Those merchants were also a little stunned. When they heard the reporters' questions, they were worried that their money would be scammed. They quickly grabbed Shi Yalin and didn't allow her to move a single step. The crowd was furious.

"Is what miss Sunny said true?"

"If your medicine can't be put into production, your contract will be invalid, and you'll have to pay us at least five times the compensation!"

"Yes, five times the compensation! If the project doesn't work out, then the medicine is a scam and you need to compensate!"

"Shut up!"

Shi Yalin was already feeling unwell after hearing Nangong Nuannuan's words. Now that she was being annoyed, her true nature was exposed.

Everyone felt a sudden pressure, and their breathing stopped for a moment.

The noisy scene instantly became as quiet as a chicken.

"Plagiarized? What a joke! Am I, Shi Yalin, the kind of person who plagiarizes? I'm representing the medical Association!"

Seeing that no one was speaking, these people were all intimidated by their own momentum, so they said, "Our project was painstakingly developed by 35 experts and professors for three years, but

Nangong Nuannuan only confirmed the project three months ago. Although I know that Nangong Nuannuan has the angel research Institute under her, even if she brings all the professors here, how can three months compare to three years? So, before you have any evidence, don't say that others plagiarized. After all, even I didn't say that she plagiarized!"

after saying that, shi yalin snorted coldly and left in anger.

The reporters were definitely on the side of their boss. They didn't have any moral integrity. Their boss was their moral. Since Devin had a good relationship with Nangong Nuannuan, almost all the media outlets were under disheng and NS group.

Therefore, he didn't say anything when he saw that Shi Yalin had left in anger.

previously, the media in charge of reporting were the gossip magazines outside. although they had built up the momentum, the specific situation still needed to be reported by the media inside.

Therefore, the reporters had a tacit understanding not to put up the last sentence that Shi Yalin said. Instead, they only asked the post-production crew to immediately edit out the first part of the video, which was the part where the boss slapped her in the face, and put it up.

After the media saw the confrontation between Nangong Nuannuan and Shi Yalin, it was not difficult for them to realize that Nangong Nuannuan was obviously more imposing. Shi Yalin was worried that she had really stolen Nangong Nuannuan's research materials. That would be too shameless.

At the banquet, Shi Yalin had clearly lost the first round. However, the results were not out yet. Moreover, the organizing committee had not given them an answer.

[My Sweet Physician Wife Calls The Shots](#)

Chapter 3132

3132 Is there any evidence (3)

In the beginning, Shi Yalin thought that since the organizing committee had invited them, they would definitely not be able to find any proof of their identity.

She had also planted a few flies, which were the new micro-camera developed by disheng, but they had been intercepted by Nangong Nuannuan's men. After monitoring them for a few days, she had nothing to monitor them with.

However, from the surveillance results, Nangong Nuannuan had no evidence that she had stolen anything.

Shi Yalin's face darkened as she tried to recall if she had been tricked by Nangong Nuannuan. After all, this woman's means were extraordinary, and she was an out-and-out slut.

However, no matter how much she thought about it, Shi Yalin still could not figure out what gave the other party the confidence to speak to her in such a manner.

After all, their research project was much more advanced. Once he admitted it, he would definitely be first.

Nangong Nuannuan's research project could only come in second.

Wouldn't that be a slap to her face?

Shi Yalin had been thinking about the situation in the middle, so much so that when many people came to greet her, she always had a heavy heart and ignored them.

Naturally, everyone gathered around Nangong Nuannuan.

Nangong Nuannuan's project team had very few researchers to begin with, so with Nangong Nuannuan's strong introduction, she quickly got along with many of the project team researchers, reporters, and businesses.

As the chairman of disheng, Nangong Nuannuan owned numerous mines and properties. Naturally, all the businesses present wanted to hug her golden thigh. In addition, at the world Medical research Association this time, although her research project was related to beauty, it was said that she also used genetic recombination to regenerate skin. It was the same research project as Shi Yalin and the others.

Moreover, there were so many people in the world who were troubled by scars. If such a drug was successfully developed, it would definitely cause a worldwide sensation.

Most importantly, this research was done by reconstructing genes to regrow skin. Therefore, once they delved deeper, they could still progress in the direction of curing cancer and other difficult diseases.

Therefore, those businessmen who had held back and refused to cooperate with Shi Yalin after hearing about the Nangong Nuannuan project were now surrounding Nangong Nuannuan and asking her about the research.

Finally, the LED screen in the banquet hall lit up. Devin, the president of the organizing committee, stood on the podium on the second floor of the banquet hall with the five vice presidents.

Devin welcomed the guests and especially thanked the team that had contributed to the world's medical cause.

regardless of whether the research is successful or not, the world Medical research organizing committee would like to extend our sincerest respect to anyone who has made a sincere contribution to the medical field.

After that, Devin and his team bowed deeply to the members of the project research group standing in front of the hall on the first floor.

The audience burst into warm applause.

Only Shi Yalin's team had a change of expression when they heard German's words " sincerely dedicated "

what was the meaning of this?

Shi Yalin did not think that Devin was talking about Nangong Nuannuan. From what she knew, Devin liked Nangong Nuannuan very much. In order to trick her into studying medicine in the future, he was even willing to give her all his assets.

so, he was talking about her?

Shi Yalin sneered.

So what if he criticized her?

Do you have any evidence?

Sensing something, Shi Yalin's sharp eyes turned around and saw a camera pointing at her face.

[My Sweet Physician Wife Calls The Shots](#)

Chapter 3133

3133 we're doomed (4)

Seeing the of disheng on the camera, Shi Yalin was so angry that she almost died.

A b * tch is a b * tch!

Looking at the reporter's camera with disdain, Shi Yalin revealed an elegant smile.

If he was suspicious, then he was suspicious. If he was unhappy, then he was unhappy. as long as there was no evidence, her project could continue.

what she urgently needed now was money!

"this time, a total of 50 projects from seven countries have entered the ranking after passing the primary, semi-final, and final selection. These researchers are from 50 project teams from seven countries. You are the top medical talents who stand at the top of today's medical field and bear the burden of changing the fate of mankind. Your contributions to mankind's progress will be remembered by the people.

However, everyone also knew that this was a competitive project. after the preliminary study of our organizing committee, we have evaluated the 50 events in the competition. among them, there are a total of 39 groups with rankings. There are 11 groups. Due to the feasibility of the research, we did not rank them. Now, let's congratulate the 39 research teams that have been ranked. Congratulations on the success of your research, or rather, you're one step closer to success. Now, let's take a look at the big screen."

With Devin's hand gesture, everyone's eyes turned to the big screen. Shi Yalin was also determined to win.

Because as long as Nangong Nuannuan won an award, she would also win an award. Her research was deeper than Nangong Nuannuan's, so she would definitely be first. Otherwise, don't even think about getting the award.

That was what Shi Yalin was thinking, so her lips curved into a smile.

All the cameras turned to the big screen.

When Nangong Nuannuan's research team's project appeared at the top of the list, Shi Yalin's pupils suddenly contracted.

Looking down, second place was actually a project from the angel research Institute.

Third place was a project from another Medical Research Institute in Saibo country.

Shi Yalin looked down, but the project that lang Zhen was in charge of was not there.

Some of the pharmacologists who had signed the contract with Shi Yalin and paid her money started to make a scene.

Everyone also looked at it from the beginning to the end several times in disbelief, but they didn't see lang Zhen's and Shi Yalin's names.

Only then did they realize that the organizing committee had not included Shi Yalin's team in the project at all.

the organizing committee was the world medical organization, recognized by all countries in the world, and the most authoritative.

no one was optimistic about a project that the organizing committee didn't recognize, and it couldn't be invested in research.

After all, even if you developed this medicine, without the approval of the organizing committee, you wouldn't be able to sell it in the future without a pass.

After all, no patient would dare to take such a Genetic Medicine without the approval of the organizing committee.

Even if they dared to eat it, they probably wouldn't be able to sell it for much.

This was because the drug was not recognized.

Shi Yalin looked at it twice and confirmed that their project had really been taken down by that old man Devin. She was so angry that her face turned red.

Lang Zhen, Wang Qi Ren, and Li Wan, who were standing on the side, were also dumbfounded. His face was filled with anger.

"Why aren't our names on it?" Lang Zhen looked at Shi Yalin and asked.

"Shi Yalin, why isn't your project on the list? Didn't you say that the research department has already taken over this project, and that we can start researching medicine after we go back?"

[My Sweet Physician Wife Calls The Shots](#)

Chapter 3134

3134 Slut (1)

that's right, I gave you 14 million. You said you wanted me to be your sales agent, but you haven't even approved the project yet. This contract is a fraud.

"Shi Yalin, we can Sue you for falsifying the contract! You have to compensate us 5 times the original price!"

When the pharmacists saw the situation, they couldn't help but shout in anger.

The originally high-end venue was immediately filled with curses and discussions.

the media under disheng, who had previously followed nangong nuannuan's instructions and promoted shi yalin, immediately broadcasted the farce live.

One must know that they had previously told the major media that they could report Shi Yalin's project without restraint. After all, this was a project that could shock the world.

Therefore, no matter how loud Shi Yalin's voice was, and how many people were willing to sign the contract with her in advance, now that she had rebounded, these people were very disappointed and angry.

shi yalin looked at the three people who didn't know how to ask german at this critical moment and instead came to question her. she asked them back angrily, " "You're the researchers of the project. Shouldn't you know why the project didn't get a ranking? Why are you asking me instead of reflecting or asking Devin? A bunch of trash!"

Lang Zhen, Wang qiren, and Li Wan were criticized again, and they didn't feel good.

The three men's eyes turned red as they looked at Wei Yan and he Zhi, who were standing beside Nangong Nuannuan and were being congratulated by the people around them.

after all, such glory should have belonged to them.

It was a pity that they had chosen Shi Yalin instead of Nangong Nuannuan. As a result, they had become a laughingstock and a dog in the eyes of others.

Not only did the medical department University no longer have a place for them, but it also felt like the entire world could no longer accommodate them.

At this moment, the drug dealers were all furious. All of them rushed towards Shi Yalin and demanded an explanation from her.

Shi Yalin could not display her martial arts in front of Nangong Nuannuan. On one hand, she was no match for Nangong Nuannuan in terms of martial arts, and even if she could, it was not the time to use martial arts. On the other hand, she was going to use her martial arts skills when Nangong Nuannuan was at her most vulnerable state. Therefore, she could only let her bodyguards block the anger of the shop owner.

At Nangong Nuannuan's signal, a few of Angel pharmaceutical's pharmacists pretended to have signed a contract with Shi Yalin and threw a glass at her.

Seeing this, Shi Yalin quickly dodged to the side. The other person seemed to have known this all along and immediately poured a large glass of red wine on her.

Initially, Shi Yalin could have dodged it. However, she realized that Nangong Nuannuan was looking at her with 'doubt'. She was afraid that Nangong Nuannuan would notice something was wrong. Facing the large glass of red wine, Shi Yalin could only grit her teeth and bear it.

She was wearing a blue fishtail dress and was very beautiful.

However, her blue fishtail dress was stained with red wine. It was blue and red. The colors were mixed together, and it looked really ugly.

Bitch!

Shi Yalin directly blamed Nangong Nuannuan for the red wine.

Because if it wasn't for this bitch, she wouldn't have been in such a sorry state.

[My Sweet Physician Wife Calls The Shots](#)

Chapter 3135

3135 I've heard of it 2

"President Devin!" Shi Yalin angrily shouted her German name and asked, "What do you mean by this? We are representing Kamino's researchers, and this is how you treat us? You can't even control the order of the scene? Are we just going to let them mess around like this?"

Devin looked at Shi Yalin, but he did not answer and asked, "Miss Shi, our organizing committee respects every team that has come to participate in the competition, and also respects every distinguished guest who has come to attend the banquet. Our organizing committee has a rule that before the project has been basically confirmed, it is not recommended that any project team sign a contract with pharmaceutical companies. Once there was any problem after the signing of the contract, any loss caused would have nothing to do with the organizing committee. As far as I know, the reason for the chaotic situation should be related to miss Shi's refusal to listen to the opinions of the organizing committee and her disrespect for the rules of the organizing committee. I haven't even accused miss Shi of bringing disharmony to our dinner, but miss Shi is already acting weird. Do you think it's the organizing committee's fault that the merchants came to find trouble with you?"

shi yalin sneered. "president devin, i heard from some sources that you have a very good relationship with miss nangong. Of course, I also know that miss Nangong is very impressive. After all, she was able to research a genetic problem within three months that even a lot of wisdom might not be able to solve for several years. But I would like to say, isn't President Devin being too biased? we and Nangong Nuannuan are both projects of the medical University, and the content of our research is the same. Why can her project get first place, but our project can't be on the list? If you don't let our project get on the list, I won't be able to explain it to the merchants. Isn't this the fault of the organizing committee?"

devin looked down at shi yalin. he had been saving people for many years, so he had a kind face. when he compared his appearance with shi yalin's in front of the audience, they really felt that shi yalin was the villain.

Regarding this issue, disheng's reporters also felt that the president was biased towards his boss. If they were to broadcast it live, it would be bad for the president and their boss 'reputation. However, their boss had personally ordered them to broadcast the entire process. They did not want the wild media outside to get any news and broadcast it indiscriminately. Therefore, these media outlets were also very depressed. He didn't know if the boss would turn around and slap him in the face if this was broadcasted.

However, considering the boss's reputation, he would not do anything to hurt him or President Devin.

In the face of Shi Yalin's question, President Devin smiled and said, " " miss shi, may i know what your research project is? "

"Our project is to restore the human body's health and even cure cancer through the reconstruction of genes. President Devin, don't you know this very well?"

do you know what miss Sunny's research project is? "

I've heard that her research project is to restore nerve cells and regenerate skin through genetic remodeling.

"Miss Shi is right. One of you is working on cancer and health, while the other is working on beauty. Is there a problem with me going through her but not you?"

Shi Yalin continued to sneer, but she was extremely angry in her heart.

The slut Nangong had expanded her business in Saibo, causing her to have many admirers and people who wanted to suck up to her.

[My Sweet Physician Wife Calls The Shots](#)

Chapter 3136

3136 Waiting for Wanwan (3)

Although she used to have many such subordinates, most of them lived in the dark and could not be exposed. In order to prevent Nangong Nuannuan from getting suspicious, she did not dare to involve these people.

As a result, she had become the target of public criticism, but no one had helped her.

"President Devin, when I was researching this project, I was very sure that the research was successful. Why didn't you pass it? Our research reports are all with you. You've read our reports but didn't approve them. Are you planning to pocket them?" Lang Zhen angrily asked.

He was already not tolerated by the medical department University. If he lost this project, he would no longer have a place to stand in the future.

Wang Qi Ren and Li Wan also stood up in time to support lang Zhen.

"President Devin, since you said that our research project was not approved, please tell us the reason. Otherwise, how are we going to survive in the medical world if the results of our three years of research are so easily denied by you?"

"it's for you to gain a foothold in the medical world in the future that we didn't publish your invalid research report," devin said."otherwise, it would expose the shortcomings of your research. I think it's better not to announce this kind of thing in front of everyone. You see, you're not the only one who didn't pass. The researchers of the other 10 projects didn't ask me to give a reason on the spot, but you did. if the results i give you later disappoint you, it will be bad for the reputation of camino national medical association."

"No, since I've gone to study it, even if I fail, I don't think it will embarrass me. so, president devin, can you tell us where we went wrong?"

"You really want me to say it? i'm afraid it won't be good for your camino national medical association if you tell me. "

The more he did not take out German, the more Shi Yalin and the rest felt that German was protecting Nangong Nuannuan.

Lang Zhen was already feeling a little guilty, but after he looked at Shi Yalin, she nodded at him, so lang Zhen straightened his back and said, " "It doesn't matter. Even if it's not good for us, we want to know why President Devin didn't let us pass."

Shi Yalin thought that Devin would hesitate or continue to find other excuses, but she didn't expect Devin to be waiting for lang Zhen here.

"Since they don't want it even when we've given them face, then let them go," he said to Sylvia.

"Yes."

Sylvia was already prepared. When she heard Devin's order, she immediately nodded.

Shi Yalin's back broke out in a cold sweat. She had a feeling that things were going to be bad the moment Devin agreed. Nangong Nuannuan had a backup plan indeed. This damned woman, she really knew everything. And she had been waiting for her here.

"Wait for Zhenzhen."

Shi Yalin was about to speak, but Sylvia had already changed the LED screen.

"Miss Shi, although you're the person in charge of the project, you may not understand it very well. However, I believe that with so many medical professors present, you should be able to understand what I'm going to question next. This was the research project that miss Shi was in charge of. By reconstructing genes, the body could be restored to health, and even cancer could be cured on its own.

[My Sweet Physician Wife Calls The Shots](#)

Chapter 3137

3137 That was a secret (4)

"as you can see in class, under the corrosion of cancer cells, the human body's genes have more or less undergone some changes. These changes were distributed in the following parts of the report.

The pictures that everyone is looking at right now are the genetic deficiencies caused by various types of cancer. They put up about a thousand pictures for comparison. "No matter what kind of cancer it is, through the comparison of the missing genes, we found that no matter where the gene is missing, and how badly it is missing, there will be an error in the number of the missing Gene's chain.

if we assume that if we want to repair the genes, we must repair the number of the bean chains. In this way, we need to completely split the genes and carry out molecular recombination. Professor lang Zhen,

I want to ask you, in Zone G G11, how do you calculate the ratio of A.DNA single-double-chain base pairing? Can you explain it to us?"

Lang Zhen looked at the red circle in German.

This position was very remote.

It could be said that if Devin had not circled it, he would not have been able to see this place at all.

This was because Zhang Fang had only stolen Nangong Nuannuan's research report three days ago. After all, Nangong Nuannuan was doing Skin Research. They still had to make the skin Research Part into a health or cancer part. Therefore, in these three days, they only had time to check if Nangong Nuannuan had restored the main genes.

If she had a way to restore the main gene stem, from the beginning to the end, then the possibility of mistakes in the branches would be very, very small.

therefore, out of the three days, they could only use two days to verify the main branch. there was no time to verify the branches at all, so they could only watch it from beginning to end. Such a complicated and lengthy calculation was not easy to understand, let alone verify. After all, it involved a lot of complicated chemistry and mathematical operations.

they were only medical experts, and they were only interested in chemical elements related to medicine. they had no idea what substitute elements were that were not related to medicine.

So now that Devin pointed it out, although lang Zhen's expression didn't change, he was shocked in his heart.

Could Nangong Nuannuan have done something to the branch?

however, what he didn't want happened.

Seeing that lang Zhen didn't speak, Devin still asked, " "Professor lang, can you tell me how you got the result of this chemical calculation? How did you get the results of this sophisticated research that has nearly 100 steps in design?"

Lang Zhen's expression turned extremely ugly. He was still thinking about how to answer when Zhou Xianglin said, " "President Devin, you said that there are more than 100 steps in this calculation. If we really explain it here and explain it to everyone, don't you think our research secrets will be exposed? This is what we have carefully researched and calculated. You can see it from the steps of the calculation. We can't explain the process in the middle because only we can understand it. You just need to see if there are any problems with the core that we have researched."

Lang Zhen was still embarrassed when he heard Zhou Xianglin's words. Although he felt that since Devin asked this, he must have seen something wrong, he could only answer this way.

alright, " Devin nodded. then, are the remaining places also your secrets? "

After that, German circled four more places.

[a new month. The main text is about to end. Please send me a monthly ticket before I finish. Look at the list of winners below!)

[My Sweet Physician Wife Calls The Shots](#)

Chapter 3138

3138 then you explain it (1)

There were more than 1000 complex equations that required more than 100 steps to calculate. Who would pay attention to the less obvious branch of calculation of the 4?

Therefore, they really didn't know how to answer any of the four places that the German had circled.

Under Devin's gaze, Lang Zhen could only nod. "That's right, this is our business secret. President Devin, you're not disqualifying us for this reason, are you? Or do you think that just because it's our research, we have to explain every step to you?"

Wang Qiren also said, "Who doesn't know that President Devin is a medical genius? Plus, Miss Nangong is the chairman of Disheng with a strong capital. We have explained it so clearly. Does it mean that Miss Nangong's later research results will also have to share half of the credit with us?"

"Didn't I already give you the credit?" In the face of Wang Qiren's provocation, Nangong Nuannuan did not give in.

Wang Qiren's face changed. Miss Nangong, what do you mean?" he asked.

"Don't you all know what I mean?" Nangong Nuannuan answered with a smile.

"We understand? Miss Nangong, with all due respect, you're saying that it's all thanks to you that we have such a research report. Is it like this?" Wang Qiren asked.

"Isn't that the case?" Nangong Nuannuan asked in return.

"What a joke!" "Our research team has a total of 35 medical professors who are level 4 and above. How many are there in your group?" Li Dan said sarcastically. But only two. Moreover, one of them was a third-grade professor while the other was a first-grade professor. We're already giving Miss Nangong face by not saying that the success of your research project was due to us, but you're still not letting it go. Nangong Nuannuan, don't you think you're going too far?"

I don't know if I'm going too far, but I just want to ask Professor Li, regarding this 'contribution' that I'm giving you, did you really not figure out what I'm giving?"

As soon as Nangong Nuannuan said that, Shi Yalin and the others' faces changed.

In fact, when Devin turned on the LED screen and confronted them, Shi Yalin already knew that things were going to be bad. Now, listening to their rebuttal, this feeling slowly turned from a deep one to a solid one.

Lang Zhen, Wang Qiren, Li Dan, and Zhou Xianglin had never fought with Nangong Nuan Nuan before, so they didn't know how ruthless she was. However, after hearing Nangong Nuannuan's words, they felt a sense of horror in their hearts.

the level 5 professors aren't saying anything. Don't you know what the four equations represent? "

then, miss Nangong, can you explain what these four equations represent? " Lang Zhen still wanted to save his last bit of face. He felt that only a pervert would come up with such a troublesome calculation for such a huge and complicated calculation project just to mess with them. After all, even if they didn't understand some of the calculations on the side, they could fully understand the main project. If they included the main project, the calculation on the side was correct.

Therefore, it would take an ordinary person at least one or two years to come up with such a calculation to frame them. Even if Nangong Nuannuan was a genius, she would still need at least a month or two, right? She only had a total of three months, but she had spent one or two months to create a pseudo-project. perverts weren't that crazy.

[My Sweet Physician Wife Calls The Shots](#)

Chapter 3139

3139 You don't understand me at all (2)

However, Nangong Nuannuan had perfectly proven that there were such perverts in the world who would undertake an unimaginably huge project just to frame someone and to see their enemy get slapped in the face.

Nangong Nuannuan smiled at President Devin and gave him a look. After President Devin understood, he said, " since everyone wants to see the 'hard work' that Sony has given you, let's take a look together.

"It's done," shi yalin stopped devin in time and said to nangong nuannuan, " "miss nangong, my dog's attitude isn't very good. in the future, i'll definitely chain them well and not let them come out and bark. I believe that harmony is the most important thing in the relationship between people. We are all from Kamino and come from the same place. I admit that the three professors 'attitude towards miss Nangong was not good and made miss Nangong unhappy. The two projects we're researching already have some foundations in some aspects, so it's normal to have some similarities. if miss nangong mind, i'll accept president devin's ranking. In the future, we'll be even more focused on genetic research. At the same time, I would also like to apologize to all of you. Our drug research may be delayed for some time, but within three months, we will definitely be able to produce the results and put them into drug research to give everyone a satisfactory answer."

Shi Yalin's words were already very embarrassing. Those who understood the situation would know that they had indeed plagiarized Nangong Nuannuan's project.

No matter how much she had plagiarized, it was still plagiarized. That was why Nangong Nuannuan had mentioned a few traps in the story, making them unable to answer.

It was already a slap in the face for her to be unable to answer a question that she was researching. Now, Shi Yalin had indirectly responded to the plagiarism incident. It could be said to be a double slap in the face. As a Kamino, Nangong Nuannuan should not be bothered by it. After all, it would be a disgrace to the Kamino Kingdom.

“Miss Shi, when you sent someone to kill me one day, I think I have already proved one thing to you with my actions-I, Nangong Nuannuan, am not a person who is used to swallowing insults. If you do one, I’ll do fifteen. It didn’t make sense that he couldn’t take revenge when he couldn’t send people to kill him. It also didn’t make sense that he had to watch him make money and reach a cooperation agreement with the merchants when he sent people to steal his research results. In the end, he had to let him go for the sake of the country.

I, Nangong Nuannuan, am a Kamino citizen, so the glory that I, Nangong Nuannuan, have won belongs to Kamino. In the field of Genetic Medicine, I’m the one who won glory for this country. if you want to win, then rely on your own abilities. You don’t have the ability to plagiarize, and now you’re trying to kidnap me, miss Xuanji, for the sake of the country. You don’t know me at all, I’ve never been a Saint who repays evil with good.”

Not only did Nangong Nuannuan not give Shi Yalin any face, but she also revealed everything about her past.

The guests and those watching the live broadcast on the Internet and TV exploded.

shi yalin had sent people to kill nangong nuannuan before?

and now, she was even copying other people’s work!

This was too cheap!

the media in charge of the domestic live broadcast was about to explode with comments below the live broadcast room, causing the technicians to quickly repair it.

The Shi Yalin of today was not the Shi Yalin of the past. She had almost forgotten that the real Shi Yalin was the one who had intercepted and killed people.

[My Sweet Physician Wife Calls The Shots](#)

Chapter 3140

3140 Shocking (3)

Now, Nangong Nuannuan had actually pushed the blame on her in front of the whole world. She was simply depressed.

While cursing Shi Yalin for being stupid in her heart, she also cursed Nangong Nuannuan for being like a fighting chicken, fighting wherever she went and not giving anyone a chance to live.

“Miss Shi, why aren’t you saying anything?” Nangong Nuannuan walked to Shi Yalin’s side. She was already much taller than Nangong Nuannuan, and at this moment, she was looking down at Shi Yalin from above.

“If you want me to let you go, can you admit to the media how you stole my research content? As long as you can tell me the truth about how you stole my research and apologize to me in front of all the guests, I will not pursue this matter.”

Shi Yalin was so angry that she almost laughed.

If she admitted to it, there would be no way to continue with the project. Then, what was the point of her apologizing?

She didn't believe that the changes in those four places could change all the results. The equation in her hand should be the problem with the calculation of these four areas. As long as she went back and studied it again, she could still start the drug research.

Those pharmacies had already invested money in her, so even if they knew that she was not legitimate, they would still support her.

miss Nangong, I only said that we were doing the same kind of research and that we might have some similarities after discussing it together. I never admitted that we plagiarized your work.

"Oh, I see. Since you don't want to admit it, then let's see what I can do for you."

This time, without giving Shi Yalin a chance to object, the big LED screen had already started to play.

"miss shi, this is a genetic reduction simulation experiment based on the content of your research. Everyone can take a look."

everyone stared at the big screen. on the big screen, due to the development of cancer, cancer cells had devoured normal cells and affected the nerves. in the end, it led to a problem with the genetic chain, resulting in a chemical element loss in the genes.

He filled in the chemical elements in Shi Yalin's research report one by one. Everyone's eyes were wide open as they saw the missing gene strands being restored, bit by bit.

In the beginning, Shi Yalin was still very nervous. She was afraid that Nangong Nuannuan would give her the wrong answer. If that happened, her reputation would be tarnished and she would not be able to get her hands on the item.

However, it turned out that Nangong Nuannuan had underestimated her.

she had already read half of the content, and the genes were still being repaired. in other words, even if she was wrong, she only needed to start from half.

When it was almost fully repaired, Shi Yalin's lips curled into a smile.

So, huhu

Was Nangong Nuannuan here to be a joke? She wouldn't only have problems with the last few steps, right?

Sure enough, just as Shi Yalin had expected, the genes were completely repaired in the end.

All the guests were in an uproar.

in fact, even if it was plagiarized, the restoration process was simply perfect.

These complicated and lengthy calculations were simply a stroke of genius. Every step could perfectly repair the genes. Everyone was a medical professor. Even if they were businessmen, many of them were

once medical experts. When they saw this demonstration, they could not help but exclaim in admiration.

Shi Yalin's smile grew wider and wider. The closer she was to success, the less she needed to change.

However, Yingluo

At the last step, until the genes were perfectly repaired, no problems were found.
