

Pill Maker 911

Chapter 911: The Lowest Of The Low

Jiang Mingyue apologized sincerely. No matter how angry people might get, it was only natural for them to ease up in such situations.

Liu Qian looked at Jiang Mingyue. In reality, it was common for people to have differing opinions in research, so he simply sighed and waved his hand. Just as he was about to let it go, Huo Yao interrupted him.

"My bad. I shouldn't have said that." Huo Yao leaned against the edge of the table languidly as she sighed gently.

The moment everyone heard this, everyone automatically thought Huo Yao felt embarrassed by herself and was about to apologize, including Jiang Mingyue.

Jiang Mingyue pursed her lips as she pondered. Wasn't Huo Yao very full of herself when she commented on the revised experiment plan?

Did she want to apologize now?

It was too late. She did not care about forgiving someone as stupid as Huo Yao.

Jiang Mingyue was thinking to herself smugly when she heard Huo Yao's laughter.

"If trash came with grades, then your experiment plan is..." Huo Yao crossed her arms and smiled as she said airily, "...the lowest of the low."

The lowest of the low?

Jiang Mingyue opened her eyes wide. She could not believe what she had just heard. How could she call their experiment plan trash?

Was Huo Yao crazy?

Even though the atmosphere had finally eased up, it quickly became utterly cold.

Jiang Mingyue laughed angrily. She walked up in front of Huo Yao and raised the experiment plan in mid-air as she pointed at Huo Yao's face with it and said, "How dare you say that? How can you be so cocky?"

It was the first time someone pointed to Huo Yao's nose as she spoke.

Huo Yao tilted her head and looked at Jiang Mingyue solemnly. "You don't even know how to calculate the molecular variant using integration factor. How could this be a worthy experiment plan?"

Jiang Mingyue found it even more hilarious when Huo Yao brought up the integration factor. "You are just an Arts student. Are you talking to me about the integration factor? Are you sure you want to show off about it?"

The moment Huo Yao heard what Jiang Mingyue said, she looked at Jiang Mingyue strangely. "Isn't this Math? Isn't Math a compulsory subject? Does it have anything to do with my course?"

Jiang Mingyue instantly realized that Huo Yao was right and blushed. Even though her hand was still in mid-air, it looked a little awkward now.

A long while later, Jiang Mingyue bit her lip and said, "Since you claim that I don't understand integration factor, does this mean you are an expert? Do you even know what second year integration factor equations look like?"

Huo Yao nodded. "Uh huh. In fact, I do! The steps in the experiment are too long-winded and messy. Even though a DNA model can be rendered, it will never pass comparative testing."

Jiang Mingyue had already gotten the basics wrong. How could she study gene variation from this?

Huo Yao pursed her lips.

Jiang Mingyue sneered coldly when she heard what Huo Yao said. "If the simulation is a success, why would the comparative testing fail?"

Did Huo Yao think she was good simply because she was good at Math?

Huo Yao shrugged and looked at the computer. "In that case, why don't you try?"

"If I manage to succeed, are you going to apologize to my team?" Jiang Mingyue did not feel intimidated by Huo Yao simply because Huo Yao knew some Math. Instead, she was even more certain that Huo Yao was just showing off.

She had to defeat Huo Yao and remind her she was in Tsing University and not middle school.

Every single person on campus was an elite student. Huo Yao had to stop swaggering around as though she was a genius.

Chapter 912: She Was A Potential Troublemaker

Huo Yao walked to the side lazily and gestured that she could go ahead and start the comparative testing the moment she heard what Jiang Mingyue said.

Jiang Mingyue glanced at Huo Yao and sneered in her heart. She was certain Huo Yao was simply pretending to be calm.

She could not let a freshman who was the complete layman mock her after all the efforts she put into the experiment.

Moreover, Mu Qing had helped her with the experiment, so it was impossible for things to go wrong.

Jiang Mingyue inhaled deeply and turned to look at Liu Qian as she said in a serious tone, "Mr. Liu, since this is between us, I hope you will be fair."

Although Liu Qian might feel offended, she had to say it. After all, Huo Yao was Liu Qian's student. If he went easy on Huo Yao, it would do Jiang Mingyue great injustice.

Sure enough, Liu Qian looked solemn as he pursed his lips and said deeply, "That goes without saying."

“Perfect.” Jiang Mingyue felt relieved. She turned and walked up to the computer and started to simulate the experiment and create a DNA model.

After the DNA model was rendered, the data could be extrapolated and loaded onto another computer. Then it would be analyzed using special software and comparative testing could be done.

The DNA model rendering was a crucial step and more time was required. Since Jiang Mingyue was determined to teach Huo Yao a lesson, she was particularly serious when she did the simulation.

In comparison to Jiang Mingyue, Huo Yao was a lot calmer. She simply pulled up a chair and sat down.

She thought about how long Jiang Mingyue took to do this previously, so she pulled up another chair and placed it in front of Liu Qian. “Mr. Liu, have a seat.”

Liu Qian was worried that his student might end up bullied by Jiang Mingyue, so he was flabbergasted by Huo Yao’s reaction.

Wasn’t she acting a little too confident?

Huo Yao noticed the shock on his face, so she explained. “It will take at least 30 minutes before there is any work for you.”

Liu Qian’s lips twitched upon hearing this.

Jiang Mingyue was holding the mouse working diligently on the simulation when she heard what Huo Yao said and her hand trembled slightly.

Liu Qian eventually sat down in the chair. He thought about Jiang Mingyue’s revised experiment plan. Judging from his experience, she would probably reach 85 to 90% levels of accuracy during the comparative test.

Jiang Mingyue needed to score 99% for this experiment to be considered a success, but once it was more than 60%, it implied that her work was in the right direction and entirely plausible.

Liu Qian cleared his throat gently before he said to Huo Yao softly, “Why did you have to lose your cool? Even if there was something wrong with the equations, you should have kept it to yourself.”

Jiang Mingyue was a rising star in Biology, so she was undoubtedly talented. If she had the confidence to pick a fight, then she must be confident about the outcome of the simulation.

Even though there was something wrong with her steps, she could always fix it later as long as it did not affect the direction of the outcome.

Liu Qian did not expect Huo Yao to be such a potential troublemaker since she always looked good-natured.

Liu Qian rubbed his forehead before he said softly, “Don’t feel too lousy about it later. Just suck it up and apologize. With me around, I won’t allow her to take things too far.”

Huo Yao listened as Liu Qian spoke to her earnestly and did not know whether she should cry or laugh. She looked sideways at him and sighed slightly before she said, “Mr. Liu, I think... it should be fine for us to be a little bit more confident about this.”

Liu Qian's lips twitched hard. Could sheer confidence save her?

How could Huo Yao be so oblivious at a time like this?

Chapter 913: Apologize!

"No matter what happens, I will be on your side. Even if you have to apologize, it is no big deal. People make mistakes all the time when they are doing experiments," said Liu Qian earnestly after he completely disregarded what Huo Yao had said.

Huo Yao went quiet.

It seemed he completely did not understand what she was driving at.

Liu Qian failed to notice the look on Huo Yao's face. Instead, he was already thinking about how to minimize the damage later and protect her dignity.

Huo Yao did not know what Liu Qian was thinking, but she did not continue to convince him otherwise. Instead, she leaned into the seat lazily, looking completely relaxed and even bored, so she took out her phone and played with it.

Liu Qian's blood pressure instantly skyrocketed when he saw her reaction.

He finally caught on to the fact that she was not a potential troublemaker. Instead, she was the perfect troublemaker. Even though she ought to be worried now, she was absolutely relaxed and enjoying herself.

For some strange reason, he did not find her actions ridiculous.

Liu Qian felt that he must be possessed.

Jiang Mingyue and her team members suppressed their anger and felt absolutely triggered by what Huo Yao had said.

She could claim that the experiment would not work out, but they could not take it lying down when she called it trash.

There were serious looks on their faces as they created the DNA model along with Jiang Mingyue. They checked every step repeatedly before moving on to the next.

The DNA model finally appeared on Jiang Mingyue's computer 30 minutes later. She looked at the computer screen and inhaled deeply before she clicked on the top left corner of the screen to generate the data.

"Mr. Liu, please go ahead and conduct comparative testing." Jiang Mingyue had already uploaded the results of the simulation to the biological computer beside her.

She could not wait to see the results.

Liu Qian got up from his seat and walked over to the computer. Just as he was about to start testing, he looked at Huo Yao. She remained completely calm, so he could not help but sigh in his heart.

Before long, he clicked on the application and uploaded the data onto it. After he clicked confirm, the computer promptly started to do its job.

The chip in the biological computer was over 10 000 times faster than the high-end computers on the market, so the numbers were jumping swiftly on the computer screen as it tested the results.

Jiang Mingyue raised her head to see Huo Yao sitting calmly with a confident expression on her face and a look of contempt swept across Jiang Mingyue's eyes.

Huo Yao could pretend all she wanted for now. This could not go on forever.

Jiang Mingyue veered her eyes and looked at the computer screen fixedly.

A faint blue light was flickering on the computer screen as she waited for the results anxiously.

Time passed second by second. Two minutes later, the results were finally out.

Just as Liu Qian expected, there was an 86% level of accuracy. This meant that the experiment plan worked.

Jiang Mingyue looked at the results on the computer screen. She was clenching her fists by this side of her body, but she finally relaxed. This meant this experiment had worked!

Jiang Mingyue sighed in relief in her heart. She stood where she was without moving as she raised her chin and looked at Huo Yao triumphantly. She said unhurriedly, "Apologize."

Chapter 914: How Could She Have 100% Success?

The moment Jiang Mingyue insisted on an apology, a serious look emerged on Liu Qian's face. He looked at Jiang Mingyue and wanted to speak up for Huo Yao, but Jiang Mingyue beat him to it.

"Mr. Liu, I understand Huo Yao is your student, so it is only natural for you to defend her. However, she started it and everyone has to be held accountable for their words and actions. I don't want to be difficult. I just need her to apologize to my team."

Jiang Mingyue spoke in a magnanimous tone and made sense. Liu Qian was never an aggressive man to begin with. The moment he heard what Jiang Mingyue said, he did not know how to respond for quite some time.

Before long, even his face turned red.

In reality, Jiang Mingyue was slapping both Liu Qian and Huo Yao on the face.

Huo Yao leaned against the seat lazily as she turned her phone nonchalantly. She tilted her head sideways and looked at Jiang Mingyue. "All you have is 86% accuracy. Are you fit to accept my apology?"

The moment she finished her sentence, Liu Qian raised his head in shock.

Then again, how did the troublemaker know that the comparative test result was 86% accuracy?

Wasn't she playing with her phone the entire time?

He did not recall anyone mentioning the result out loud earlier.

Jiang Mingyue did not stop to think how Huo Yao managed to say the numbers so accurately. “Are you a sore loser? 86% accuracy means the experiment plan is viable.”

Jiang Mingyue shook her head speechlessly. For the first time in her life, she had witnessed firsthand how there was no point in reasoning with a fool. She contemplated before nodding as she said mockingly, “That’s right. Since you don’t even know what is going on, how would you know what those numbers mean?”

Huo Yao raised her brow and replied airily. “That’s right. I only understand what it means to have 100% accuracy.”

Liu Qian’s lips twitched. She was at it again, trying to make trouble.

“100%?” Jiang Mingyue laughed softly. Sure enough, Huo Yao was a fool. “If you don’t want to apologize to us, just say so. We won’t die if you don’t apologize.”

“Are you saying you don’t believe in 100% accuracy? Is that what you mean?” Huo Yao uncrossed her leg and sat up straight for once.

“People can only get 100% comparative test results after countless trial and error. Does anyone ever get 100% success during the first simulation? Are you joking?” sneered Jiang Mingyue.

Jiang Mingyue was able to achieve over 80% for the comparative test during her second try. Hardly anyone else in the Biology department could achieve such success.

“I see. Is that your excuse for being stupid? That was quite an eye-opener.” Huo Yao nodded, sounding absolutely annoying.

Liu Qian cleared his throat uneasily. Although he was caught by surprise when the troublemaker was able to say the test results with such accuracy, he kept looking at her and hinted at her to stop talking.

After all, Jiang Mingyue was Qi Hui’s favorite student. If Huo Yao offended Jiang Mingyue, it was as good as offending Qi Hui. Huo Yao was just a freshman with no background. If Qi Hui wanted to make things difficult for Huo Yao, she will end up having a hard time at school. Also, she could forget about having any future.

Liu Qian knew Qi Hui’s personality well. He was a vindictive man and once, two students were forced to quit school altogether due to him.

Chapter 915: Would I Have Any Problem Completing This Stupid Experiment?

Huo Yao simply smiled when Liu Qian kept hinting at her. She raised her brow lazily with a slightly proud look in her eyes and did not seem worried at all.

Liu Qian raised his hand and rubbed his forehead. He decided to let the troublemaker have her way.

It would not be his first time offending Qi Hui anyway.

Now that things had already gone so far, Liu Qian decided to disregard the consequences.

Jiang Mingyue was completely infuriated by Huo Yao's words. Huo Yao must be the most annoying person she had ever encountered in her life.

How could anyone be as pretentious as her?

"Since you think I am stupid, are you saying you are better? Fine. Why don't you give it a shot then? I wonder what 100% accuracy looks like." Jiang Mingyue usually hardly threw a temper, but her voice sounded particularly cold this time.

The moment she finished her sentence, she made way for Huo Yao. She was worried that the annoying girl would end up making an excuse, so she walked over to the table nearby and retrieved the preliminary draft of her article.

Jiang Mingyue slammed the preliminary draft on the table next to Huo Yao. "I am a magnanimous person, so I don't like to bully freshmen."

The A4 papers contained complicated equations of the key concepts of Genetic Mutation. It was the refined version of Jiang Mingyue's thesis which she intended to use for her journal submission.

Liu Qian frowned when he saw this. It was human nature to speak rashly. Jiang Mingyue knew Huo Yao was a freshman from a different division, but Jiang Mingyue kept deliberately making things difficult for Huo Yao. Now, she was clearly trying to set up Huo Yao and bully her.

Moreover, Huo Yao was expected to achieve 100% success.

Liu Qian instantly stood up. "Jiang Mingyue, can you let it go on account of me? After all, she is just a freshman, so she has limited knowledge of Biology. Since you plan on submitting that article to the journal, it should be kept confidential."

Jiang Mingyue just knew Liu Qian would stand up for Huo Yao again. Then again, Huo Yao probably knew Liu Qian would speak up for her, so she did not think twice when she had challenged her.

Sure enough, she was a scheming woman.

Jiang Mingyue pursed her lips and said, "Mr. Liu, I think Huo Yao is very knowledgeable. Since she is the top scholar, I am sure this experiment is easy as pie for her."

Did he want her to let it go? He could forget about it!

Jiang Mingyue paused before she turned to look at Huo Yao. "Don't you agree?"

Liu Qian did not expect Jiang Mingyue to use this against Huo Yao. He frowned as he said, "That's a completely different matter. How could you..."

"Yes, she is right." Huo Yao stood up unhurriedly and interrupted Liu Qian airily. "I am the top scholar. Would I have any problem completing this stupid experiment?"

Liu Qian went speechless when he heard her annoying tone of voice.

His blood pressure skyrocketed once more.

“Humph! In that case, I will be waiting to see your results,” sneered Jiang Mingyue before she turned to walk off.

Who did she think she was?

Huo Yao squeezed her wrist before walking up to the computer and sat down without even glancing at Jiang Mingyue’s preliminary draft on the table or writing down any equations.

The smile on Jiang Mingyue’s face was absolutely cold.

Liu Qian got worried, so he hurriedly went over to Huo Yao and stood beside her. Even though the troublemaker looked very confident and seemed to know what she was talking about... she must be very worried inside!

Chapter 916: Who Says She Can’t Do It?

Jiang Mingyue glanced at Liu Qian and noticed how anxious he was and could not help pursing her lips. she could not be bothered to wait and see what Huo Yao was doing on the computer. Instead, she headed to the side and lowered her head to organize her experiment plan.

In her opinion, Huo Yao was simply sitting in front of the computer and pretending to work as though she were an expert. Before an hour was through, she was confident that Huo Yao would cry and admit defeat!

Huo Yao was moving her fingers across the keyboard swiftly while Jiang Mingyue assumed that she was putting up an act.

She did not need an experiment plan. She had already automatically calculated everything. With every stroke of the keys, the 3D rendering started appearing on the screen in just a matter of seconds.

In reality, Jiang Mingyue’s so-called thesis about Genetic Mutation simply involved using formula and computer software to come up with genetic factors which were reasonable yet beyond the scope of conventional genetic factors.

It was very stupid and had no scientific value to speak of.

It was so bad that it was a waste of Huo Yao’s saliva to complain about it.

Huo Yao leaned into the seat three minutes later. The 3D rendering was complete.

On close scrutiny, it was clear the data was completely different from Jiang Mingyue’s work.

Liu Qian watched dumbstruck the entire time. “Is that it? Are you done?”

He did not even get a close look at what she had done!

“Then what else should I do?” Huo Yao placed her toes on the ground and slid the chair back slightly and asked Liu Qian rhetorically.

Liu Qian’s face twitched slightly. Jiang Mingyue had spent approximately 30 minutes completing the 3D rendering. However, Huo Yao was done in three minutes.

He wasn't so sure if they were using the same computer and doing the same experiment anymore.

Since Liu Qian was a teacher, he was starting to severely doubt his professionalism.

Even though Jiang Mingyue was sorting through her documents, she had been paying attention to Huo Yao and Liu Qian's conversation. The moment she heard them, her hand froze. She raised her head to look at Huo Yao in disbelief.

Barely a few minutes had passed. Was the 3D rendering ready?

She must be acting.

Even Qi Hui needed at least 15 minutes to complete this task at his best speed.

Jiang Mingyue could not believe it. Judging from the shock on Liu Qian's face, it was true. Also, her fellow team members had been watching Huo Yao while she worked on the computer. Jiang Mingyue suddenly had trouble keeping her cool.

Jiang Mingyue squeezed her hands slightly. She was no longer in the mood to organize her documents. Instead, she walked straight up to the computer and looked at the 3D rendering on the screen, and was instantly stunned.

It was surprisingly true.

"Did you complete the 3D rendering in a matter of minutes? That's absurd," muttered Jiang Mingyue and shook her head.

The moment Liu Qian heard Jiang Mingyue's doubtful voice, he looked at her calmly and spoke with a lot more confidence suddenly. "You might not be able to do it, but it doesn't mean she can't."

Jiang Mingyue's eyes turned red. She remained skeptical about it. "It takes a certain amount of time just to enter the formula and commands alone. Moreover, she did not list the calculations ahead of time. How could she complete the 3D rendering in a matter of minutes?"

A thought crossed Jiang Mingyue's mind, so she stepped forward and picked up the mouse and said, "Did you use my 3D model directly?"

She was too distracted while arguing with Huo Yao and demanding an apology from her that she forgot about deleting her data. It made sense finally.

Other than the values of the points on the 3D rendering and a slight difference in the gene arrangement, models typically looked the same at a quick glance.

Jiang Mingyue looked at the 3D model which resembled hers a lot and threw the mouse on the table mockingly. "Are you sure that you came up with this yourself?"

Chapter 917: Is This The Same As Yours?

Translator: Henyee Translations **Editor:** Henyee Translations

How could Huo Yao blatantly copy her work? How could she be so repulsive?

Jiang Mingyue wanted to throw up just thinking about it. Even if Huo Yao wanted to steal credit, anyone with brains would pretend to work on it for about 20 minutes first, right?

Jiang Mingyue inhaled deeply and suppressed her fury. She turned to look at Liu Qian. "Mr. Liu, your student copied my model and called it her own.

A serious look emerged on Liu Qian's face. Jiang Mingyue was truly being overly confident.

Huo Yao was fast, so Jiang Mingyue accused her of copying.

He had watched Huo Yao while she worked the entire time. Although she was too fast for him to see clearly, one thing was certain, Huo Yao did not copy Jiang Mingyue's 3D model.

After all, anyone with brains would not use stolen work in front of the original owner.

"Jiang Mingyue, I think you should look more carefully. Is this really your model?" asked Liu Qian in a serious tone.

Jiang Mingyue laughed mockingly and said without looking at the computer, "What is there to see? Have you seen anyone doing this in a matter of minutes? Even my teacher needs 15 minutes to complete 3D rendering. Moreover, you are a teacher as well. Shouldn't you know best whether this is possible?"

In her opinion, Liu Qian was a useless teacher teaching a dumb student.

Liu Qian laughed softly the moment he heard what Jiang Mingyue said. He asked. "Are you saying Huo Yao has stolen your work simply because she was capable of completing the 3D model in three minutes?"

Jiang Mingyue pursed her lips without answering. Judging from the look on her face, it was clear what she was implying.

Liu Qian shook his head speechlessly. He used to have a pretty decent impression of Jiang Mingyue and felt she was a sensible and polite young woman. However, he could only say that she was blinded by jealousy today.

"This isn't your 3D model," said Liu Qian mildly.

Fury instantly surged in Jiang Mingyue's heart and she narrowed her eyes.

Jiang Mingyue's team members quickly pulled her by the arm and wanted to talk to her, but she ignored them and pulled her hand away. Instead, she picked up the mouse and clicked on the 3D model. "Do you think you can disguise the fact it is my work by changing a few steps and equations?"

Jiang Mingyue looked at Huo Yao and said sternly, "Don't you have any real talent? Can you stop pretending already? Do we look like idiots to you?"

Huo Yao put her elbows on the armrest and looked at Jiang Mingyue coolly as though she were looking at a fool. "You are the only idiot around here."

Jiang Mingyue trembled when she heard Huo Yao calling her names. She turned particularly angry.

Huo Yao slowly slid her chair in front of the computer and gently took the mouse from Jiang Mingyue. She clicked on the conversion data and said unhurriedly, "Take a look at this. Is the data the same as yours?"

After Jiang Mingyue took a look at the data, her eyes instantly opened wide. Why... why was it not the same?

Meanwhile, Huo Yao clicked on the 3D model and clicked on the process, showing it to Jiang Mingyue. "Is this part the same as yours as well?"

"Also, this part with the metabolic processes between the genome and RNA simulation. Do you have it in your stupid experiment plan?"

Huo Yao clicked on the mouse slowly. With every word Huo Yao said, Jiang Mingyue's face turned increasingly pale.

After Huo Yao was done breaking down her work for Jiang Mingyue, she put down the mouse.

Huo Yao tilted her head sideways before she looked at Jiang Mingyue and uttered each word slowly. "Do you still insist this 3D model was created using your experiment plan?"

Chapter 918: Regret

Jiang Mingyue went into a daze and staggered a few steps back after she looked at the data on the computer screen. She could not believe her eyes.

Why was Huo Yao's model different from hers?

Huo Yao was clearly just a freshman. Also, she did not belong to the division. How could she complete the 3D rendering in a matter of minutes without writing any calculations?

Also, her calculations for the integrations seemed to only contain a few major steps.

Jiang Mingyue's hands hung from the side of her body and trembled slightly as these questions kept running through her head.

Before she could wrap her mind around it, Huo Yao said, "Didn't you want to see 100% success? You should get ready for a real eye-opener now."

Jiang Mingyue raised her head hastily.

Huo Yao had already lazily pushed her chair to sit in front of the other computer. The results of the comparative testing done on Jiang Mingyue's previous try were still on the screen.

She looked at Jiang Mingyue and said airily, "Do you want to delete the data personally?"

Jiang Mingyue instantly felt her ears growing warm. She had openly questioned Huo Yao's ability previously, so she felt particularly embarrassed now.

Since Jiang Mingyue said nothing, Huo Yao tutted and said, "From the looks of it, I have to do it myself."

The moment she finished her sentence, she clicked a couple of times on the keyboard and all the data in the software promptly got cleared.

Liu Qian was watching from the side with complicated emotions flooding his heart.

He had been using the software for over a decade, but he did not know he could clear all the data with a shortcut key.

For a moment, it felt as though he was using a completely different computer from Huo Yao.

Before long, Huo Yao uploaded the data deftly. Just as she was about to click confirm with the mouse and proceed with the analysis, a thought crossed her mind and her index finger froze. She pulled her hand back and stood up. "Mr. Liu, can you help me with this? I am not familiar with the software."

Liu Qian was stunned to hear this.

Who was this troublemaker trying to fool?

Huo Yao pushed his chair with a serious expression on her face. "You can't take sides. I don't want any misunderstandings to ruin your reputation as a teacher."

The moment Liu Qian heard what Huo Yao said, he quietly glanced at Jiang Mingyue and cleared his throat.

He walked over without hesitation and sat down in the chair. After squeezing his hands slightly, he picked up the mouse to quietly complete the last step and clicked confirm.

Liu Qian quickly put down the mouse after clicking confirm. He seemed worried about clicking something by accident and affecting the final result.

Nothing could go wrong since it was a matter of pride now.

Jiang Mingyue squeezed her fists tightly while she looked at the computer screen. Numbers kept jumping on the monitor making her increasingly tense.

She genuinely did not believe that Huo Yao's work could have a 100% success rate... but just what if?

Wouldn't she end up being a laughingstock if Huo Yao succeeded?

She was a publicly acknowledged genius in the faculty. If word got out she was outdone by a freshman, how could she ever hold her head up high in the future?

What would her teachers think of her?

In an instant, Jiang Mingyue regretted her actions. She was too impulsive. Even if she did not like Huo Yao, she did not have to lower herself to teach Huo Yao a lesson.

Before long, the numbers on the screen finally stopped jumping and a pop-up appeared.

Comparative test results: 100%.

Chapter 919: Do You Still Need An Apology?

It was no surprise for 100% accuracy to exist in the scientific field. After all, this was the industry goal.

However, even senior members of the research institute could only achieve this after countless tries.

Huo Yao was a freshman with an Arts background. She did not do any rough calculations and did not know the thesis well, but she got 100% on the first try. Everyone could not help feeling superbly impressed.

Liu Qian looked at the results on the computer screen and did not have the words to describe how he was feeling now.

He inhaled deeply. After suppressing the curiosity in his heart, he glanced at Huo Yao before looking at Jiang Mingyue mildly. "Do you still need an apology from her?"

Jiang Mingyue looked at the computer fixedly. She clenched her fists so tightly that they dug into her flesh, but she was completely numb.

100%.

She astonishingly got 100% accuracy in the comparative testing. How could she have succeeded at the first go?

This did not make sense at all!

Jiang Mingyue's mind was in chaos. She did not know how to answer Liu Qian since it was impossible for the comparative test to lie.

Jiang Mingyue could not believe someone could achieve 100% accuracy in the first try. She did not think this way for no reason. Countless predecessors in the scientific field had proven this time and time again.

There was only one reason why Huo Yao could have achieved such fantastic results. She must have secretly researched her thesis ahead of time.

Jiang Mingyue pondered and vaguely recalled Liu Qian showing Huo Yao her thesis the first time Huo Yao came in to observe them. Jiang Mingyue did not think much of it at that time. Huo Yao was a freshman with an Arts background, so only an idiot would bother showing the thesis to her.

In hindsight, considering what she had accomplished today, everything suddenly made sense.

No wonder Huo Yao looked calm when she was asked to run the experiment herself.

Huo Yao was just pretending all along so that she could embarrass Jiang Mingyue.

Jiang Mingyue instantly realized what was going on. It was only natural for her to be angry.

She did not answer Liu Qian right away. Instead, she looked at Huo Yao and said sarcastically, "Not bad. You must have done a lot of homework so that you could show off, right?"

Huo Yao looked at Jiang Mingyue sideways teasingly. "Are you again trying to display how stupid you are?"

Jiang Mingyue smiled gently and seemed unaffected by Huo Yao's words. Instead, she said coldly, "It's no use researching my thesis. I have already submitted it to my teacher ages ago."

She was implying Huo Yao could forget about moving up using her thesis.

Huo Yao raised her brow. "Does your thesis have any scientific value to speak of? Do you mean in terms of Genetic Mutation? Or do you mean in terms of genetic factors? Perhaps you are talking about the basic theory and application of Genetic Mutation?"

"Why should I tell you the direction of my thesis?" sneered Jiang Mingyue.

Huo Yao shrugged. "Then again, you couldn't even get the transposable factor right. How could you grasp the scientific value of deciphering the genetic code?"

"Ha. Why are you still putting up a pretense?" scoffed Jiang Mingyue. Did Huo Yao think she was a genius just because she knew a few professional terminologies?

"Do you know why you were able to render a 3D model but did badly in the comparative test?" asked Huo Yao coldly with her hands behind her back, looking utterly laid back.

Jiang Mingyue pursed her lips and looked at Huo Yao.

Chapter 920: A Slap In The Face

"You were wrong about the genetic factors from the beginning. You made the mistake of lumping the calculation of genetic code and genetic factors together. Even though a DNA model can be rendered, it will never pass comparative testing, so it is pointless," said Huo Yao mildly.

From the moment she laid eyes on Jiang Mingyue's thesis, she knew it would never pass comparative testing no matter how many times she tried.

The more Jiang Mingyue heard what Huo Yao said, the more she felt that Huo Yao was just pretending to be smart. After all, Qi Hui felt the thesis was on the right track. How could Huo Yao know more than her teacher?

Before she could say a word, one of her team members pulled her over and shook his head before walking over to the computer.

The best way to confirm Huo Yao's theory was to conduct another test.

Jiang Mingyue naturally knew what her team member was suggesting. She bit her lip without saying a word as her team member accessed their original experiment plan to let Huo Yao make the necessary adjustments on the computer immediately.

After slightly over ten minutes, she had already created the first draft of her 3D model.

The other team member generated the data report. Since he did not know how to do comparative testing, he asked Liu Qian to help do it.

In about 2 minutes, the results were out. It achieved 92% in the comparative test.

It did not get 100% comparative testing, but it was expected since it was the first time Huo Yao was trying it. However, it certainly went to show that Huo Yao was on the right track.

Moreover, this was better than the revised experiment plan which Mu Qing had helped them with.

In an instant, Jiang Mingyue's teammates saw Huo Yao in a whole new light.

The moment Jiang Mingyue saw the statistics, she looked even more shocked than when she saw Huo Yao's 100% score.

She kept convincing herself that Huo Yao was just talking big. She must be showing off without knowing better.

However, this 92% success seemed to have made her a laughing stock and was a cruel slap in her face.

Liu Qian glanced at Jiang Mingyue and got to his point. "Jiang Mingyue, now that you have witnessed the truth first-hand, do you still think Huo Yao owes you an apology?"

Jiang Mingyue's face instantly blushed crimson and wanted to find somewhere to hide.

The atmosphere in the laboratory instantly became awkward. Jiang Mingyue's fellow team member helped to lighten up the atmosphere. "I am sorry, Mr. Liu. We were just stressed out from working on the experiment, so we might have sounded a little harsh. I hope you don't take it to heart."

The other team members sincerely apologized to Huo Yao on behalf of Jiang Mingyue.

Only Jiang Mingyue stood where she was without saying a word the entire time. Despite the embarrassment, she could not bring herself to offer an apology.

Huo Yao did not care about Jiang Mingyue's attitude and simply said, "Are you still going to go on with the experiment now?"

Since things have gotten ugly, it was impossible for them to carry on with the experiment. Jiang Mingyue's teammates glanced at Jiang Mingyue and hurriedly said, "Let's call it a day."

"Okay." Huo Yao turned to look at Liu Qian. "Mr. Liu, shall we go?"

Liu Qian snapped out of his thoughts and nodded.

Before long, the two of them left the laboratory.

After leaving the laboratory block, Liu Qian raised his head to glance at Huo Yao every now and then on their way back to the Biology department with complicated emotions in his heart. However, he was hesitant to speak up.

Huo Yao rubbed her temples. She wanted to ignore his strange looks, but it was impossible, so she halted and turned to look at him. "If you have anything to ask, why don't you just get it off your chest?"
