

Pinnacle 1021

Chapter 1021: Job transfer

Miracle town, parking lot.

Looking at the cars parked in the open space, Brother Yu said speechlessly, "What the hell?"

What's the situation, where did these cars emerge from?

"Boss, morning!" Watson greeted him in the morning walk along the trail.

"Wait." Qin Yu closed the car door, ran after him and asked, "Where did these cars come from?"

"They are all employees' cars, and the company's commuting business reception needs." Watson said as he ran.

"Why don't I remember there are so many people?" Qin Yu asked.

"That's because they are newcomers who have just joined the company. There are also talents sent from headquarters and recommended by various regions."

Brother Yu is even more confused when he hears this. What is a regional recommendation? Why doesn't he remember this one!

"Baro, Seoul, and geniuses from various regions including Neon.

They are all talents with high IQ, and they have special talents in a certain field. We need talents. "

"But will it be too much." Yu Ge pointed to the congested parking lot.

"Actually, there are more people than cars. After all, some people don't have a car or don't like to drive."

Watson likes to see him slumped, the boss always looks very cute at this time.

people can't wait to hold him in their arms and love him!

"Don't, don't look at me with that kind of eyes." Brother Yu stepped back and waved his hand, refusing to say.

"Damn, can't you let me succeed once?" Watson said disappointedly.

"You know my principles!" Yu Ge emphasized.

"Principle?" Watson smiled playfully: "Like Secretary Xu and Secretary Yan?"

"Seriously speaking, I was your first secretary. Why did they only get you, but I didn't?"

Watson pressed harder step by step, looked at him and said: "Is I not beautiful enough, or my body is not spicy enough?"

Feeling the elasticity that clings to his chest, Brother Yu suddenly retreated: "I remember that Shi Cui has something to do with me, see you later!"

Watching him turn around and escape, Watson joked and shouted, "What about the newcomers?"

"Whatever, you can handle it." Jumped on the rail car, Yu Ge sat down and wiped the cold sweat on his forehead.

This woman is getting more and more goblins.

If this continues, Brother Yu is worried that one day he can't help but eat her.

"Sure enough..." Brother Yu patted his forehead and smiled bitterly.

Once the principle is broken, it will collapse like a bank. He would never think so before.

At least I have never admitted that I have similar thoughts.

But look now, he has begun to consider the consequences of doing this.

"Boss, good morning."

Someone on the rail car greeted Brother Yu, smiled and nodded, he was pretty sure he didn't know each other.

"New here." Seeing the other's sunken eye sockets and hooked nose, I knew he was from Barrow.

"Yes, I just got here today, it's amazing, it's incredible!" The other party said excitedly.

Looking at Brother Yu, his eyes are full of admiration. He is the idol of all nerds.

and cool kids...

Because he created a miracle, but he was unrestrained and unrestrained.

Those love affairs circulating on the Internet are enviable drooling.

If you want to choose one of the most admired idols born in the 20s.

Qin Yu must be on the list!

is handsome, talented and handsome, worth hundreds of billions...

Actually, this is just a speculation, no one knows how much wealth he has.

But no matter what, he is a model of success.

The most important thing, attention, is the most important thing, all of this is his own creation.

Some people think this is chicken soup. He is just another prominent descendant with countless resources and contacts.

Able to accumulate experience from failure after failure until a great success.

But people are willing to believe in miracles, and they are willing to take all this as real, at least before being dismantled.

And so far, no one has been able to expose his lie. '

Therefore, the young man worshipped him crazily.

Before Qin Yu appeared, they never believed that there would be a perfect person in the world.

Now, he appeared!

"Boss, can you sign a name for me?" Facing the expectant look of the new employees, it is really hard for Yu Ge to say no.

So, after someone started, the whole car became a private signing event.

signed the last name, Yu Ge smiled and said: "I'm here, I wish you a happy stay here."

decisively turned around and got out of the car, Brother Yu couldn't help but breathe a sigh of relief.

It feels good to be admired, but it obviously interrupts his schedule.

Therefore, it is better to keep a low profile.

When he came to the hive, Qin Yu saw the Titan who was transforming and debugging. '

The heavy armor weighing several tons was dismantled and placed aside, exposing the steel barrier with the still strong internal defense.

The current Titan can be described as 'iron bump'.

is made of pure metal from the inside out. There is no better adjective than it.

If you want to completely destroy the Titan, you must smash its surface armor, internal armor, power cabin protective shell and inner shell.

When the time comes, it will be a gorgeous explosion to greet the other party.

Its power is roughly equivalent to the simultaneous eruption of 10 large Ivans, accompanied by strong radiation and pollution.

is not only chaotic radiation!

The world that the Titan has been in contact with, the various energies that exist will be absorbed by the 'Advanced Energy Crystal'.

The terrible hybrid radiation is enough to kill any enemy.

At least in Yu Ge's cognition, no creature can survive such an explosion.

Maybe, someone will survive...

small cans.

The shadow of death he created by himself, the highest combat power of the Church of Miracle Science.

No one knows where her limit is!

So far, the battle process that death has gone through is very simple.

When she shot, the enemy was already dead.

Even the leader of a high-level monster is as vulnerable as a reptile in front of her.

Just open your hand and press down.

The huge monster will be crushed into meat sauce by the terrible gravity, or it will be pulled upwards using gravity.

Just as the little anchor saw before, the head of the high-level monster leader was easily pulled out by her and thrown on the ground like trash.

And it was as simple as breathing for her.

With the passage of time, her power has also grown stronger.

No one can be like her, no matter eating or sleeping.

Even if he does nothing, his strength is growing rapidly.

The higher her mastery of the core, the stronger her strength, mastering, becoming stronger, mastering, becoming stronger...

keep doing this until the limit is reached!

But where is her limit, no one knows, even the 'Creator' of Brother Yu doesn't know.

A compressed blue dwarf star, which completely subverts the definition of science.

So, there is no explanation, no doubt, nothing.

As long as she is allowed to develop naturally, she will eventually get the answer she wants.

Although it will take longer, Brother Yu has enough patience to wait!

The fact is that even if he doesn't want to wait, he can't do anything about it...

Otherwise, what can he do to bring the compressed blue dwarf core back to Earth for study?

Let's not talk about the current human technology, what means can be used to detect and analyze such technology.

A humble negligence can destroy all mankind.

If its mass is large enough, it will not be difficult to take away the solar system.

Research? What a joke!

From this point of view, would he save the solar system from the side? ? ?

"How long will it take to transform?" Qin Yu asked.

"About 24 hours, we need to build a new neural network to make it move flexibly."

The chief person in charge of this project is Qi He, the deputy chief engineer under Zhang Wei.

graduated from Harbin Institute of Technology with a Ph.D. in mechanical engineering, control science and engineering. Since childhood, he likes to DIY various robots, automobiles and other mechanical products.

Senior engineering talents, but also the first batch of advanced talents introduced by Vulcan.

After communicating with Qi He about the detailed progress of Titan, Qin Yu suddenly mentioned his arrangement, "I want you to be the chief engineer of Titan."

"Me?" Qi He pointed at himself unexpectedly. He didn't expect that he would be important so soon.

You must know that he has been in the company for less than two years, and it is incredible to be promoted to deputy chief engineer.

But now, the boss has to be responsible for a project on his own!

"It is not a project, but Titan Heavy Industries, which belongs to a wholly-owned subsidiary of the headquarters." Qin Yu is not as long as he is responsible for a project.

Although it sounds no different, Titan Heavy Industries is responsible for the same products.

Mecha!

Various mechas, including all models including [Xing Tian] [Creator] [Assaulter] [Titan].

All of them will be included under the umbrella of Titan Heavy Industries and become the company's star products.

Brother Yu doesn't want to take charge of these things personally anymore, they are no longer a secret.

With the pre-sale of household robots, the [Creator] and [Assault] that West Coast has invested in, they are no longer a secret.

No need to keep confidential Brother Yu doesn't need to hold them in the palm of his hand.

In addition to wasting more time and making things more cumbersome, there is no benefit to him and the company.

Professional work is entrusted to professional people to do the best, and the best solution is to make the best use of it!

"I can." Qi He said confidently.

Of course he wants to be on his own. No one wants to be a life-long deputy.

Unless the other party's performance is too good, so good that people can't promote the idea of surpassing him, because that's impossible!

"Very good, when the Titan debugging is over, Secretary Xu will tell you what to do."

Qin Yu patted him on the shoulder and said, "Good luck!"

"Wait, boss." Qi He stopped him and said in surprise: "Well, when will you notify Chief Zhang?"

"When?" Qin Yu responded: "You can decide for yourself. If you can, I hope you will inform him now."

"Me? Do you want me to inform?" Qi He's expression was a little weird.

He thought the company would issue an administrative notice to tell Zhang Wei that he was transferred.

Why did he need to inform Zhang Wei himself? This sounds like betrayal, as if he stepped on him to climb up, abandoning existing jobs and positions.

"Yes, you, inform him personally."

Qin Yu kindly reminded: "It's better not to be too long, you know, this kind of thing will spread quickly, it would be better for you to tell him in person."

Chapter 1022: face

In mid-June, Qin Yu returned to the headquarters by speeding.

Today is the day when the currency settlement center officially signed the contract. As the chairman and the top leader of the company, he needs to attend this signing ceremony.

Of course, it's in the auditorium below.

This is an attitude, which not only maintains his usual low-key style, but also shows the importance of this cooperation.

For the court and Qin Yu, both sides got what they wanted.

The signing of the contract is progressing smoothly, and both the representatives of the two parties and the media are very satisfied.

After taking a group photo, Qin Yu stood up and applauded like everyone else, and sent blessings and applause without hesitation.

"Good job!" Qin Yu patted Xu Hao on the back.

"It's just signing, it's nothing." Xu Hao said dubiously.

"Really? You look very confident on it, really beautiful!" Qin Yu said again.

"Can you talk about something else?" Xu Hao changed the subject and asked, "Do you know how much influence and attention the settlement center has brought?"

"Waste is about to be squeezed. Numerous investors waved their banknotes and wanted to get on this bus."

"106 companies, after the news spread, 106 financial institutions opened offices and branches here, they were crazy."

Qin Yu took his shoulders and walked forward, "It's the same with me."

A brand new economic market, who is not crazy?

If a financial institution does not act accordingly, then it must not be far from bankruptcy.

Because even leather bag companies and fraudsters are eyeing this piece of fat.

The settlement center project has not officially landed, but the contract has been signed.

Numerous derivatives, bundled investments, high-priced recovery of virtual currencies, and even concept stocks have appeared on the market.

Although it is not legal and has not been listed in any sector, it still explodes on the Internet.

Yamen are also stepping up crackdowns, and any related publicity and investment projects will be punished and shut down.

At the same time, another concern of people is.

Where will the settlement center be located? Speculators have already prepared a lot of funds.

eagerly waiting for the opportunity, once the site is finalized.

They will wave their banknotes, invade the surrounding areas aggressively, and take down all the items.

Whether it is used for investment or building a commercial complex, tourism, hotel, leisure and business integration.

Everything makes money, this is an unquestionable fact.

A group of experienced speculators has begun to draw circles on the map.

There are people watching and wandering every day wherever they think is possible.

If you want to master first-hand information, you have to work hard.

Are there any people surveying and mapping on the streets, what gossip news about the neighborhood committee, and whether there are cars staying in the city to observe.

These are all pieces of information, which can enable them to lock their targets faster and narrow the scope.

It's not an exaggeration to get started when necessary.

This is a game, the bigger the bet, the more you earn.

" Recently, many plots have been taken away at a high price, including several villages close to the city, as well as those old houses.

Brother Yu, do you honestly have a choice? "

Xu Hao stopped and looked at him earnestly to get an answer.

The fact of was really torturing.

Until now, even his president has not received any news.

Regardless of those speculators and investment groups, they think they have gotten some first-hand news.

Xu Hao can tell them responsibly: "Not really!"

"Yes, the address has been selected." Qin Yu responded with a smile, "The reason why it was not announced is for confidentiality."

"Where? Third Ring Road, or the new city, or the outer city mentioned in the rumors, which will be incorporated into the city?"

Seeing how impatient he was, Qin Yu shook his head and said, "Neither!"

"Neither, don't you really want to choose Gu Changan, right?" Xu Hao thought of the rumor that was extremely unreliable before.

Ancient Chang'an, although its history is glorious. But the distance is too far, four hours back and forth from the city.

This is inconvenient for the positioning of the settlement center. To do so will undoubtedly add burden to future work.

"Nanhu." Qin Yu gave the truth.

Nanhu, not where Nanhu is, it is on Nanhu.

Settlement Center is a water building.

There are four main roads from east, west, south, north to the work hall, and vehicles can only be parked outside.

Opening the map, Qin Yu pointed to the location of Nanhu Lake: "On both sides of the Liuqiao Bridge, a large parking lot will be built along with the North Ermen."

"This is the cargo loading and unloading area. After the transmission materials are tested, they will be delivered to the door by the courier appointed by the company."

"Traffic can achieve a fully automatic intelligent speed car, and the subsystem that manages the settlement center will be responsible for traffic, transportation, cargo inspection, classification, custody, and express delivery."

"Wait, fully automated management, just like a miracle town?"

Xu Hao is a little puzzled, this is not the same as in the contract.

"The contract is only for those who need it. Without the assistance of the subsystem, the staff alone can fill it up."

Sorting, testing, dispatching and custody work, who can be fairer than the subsystem.

It is also the most suitable candidate to replace the workload of thousands of people at one time, reducing the burden and cost.

The most important thing is to make the settlement center operate normally, otherwise, they need to build a city within a city to meet the demand.

"You are the boss, you have the final say." Xu Hao sat on the sofa tired.

It turned out that in the previous negotiations, the treaty in it was just a cover.

No wonder Qin Yu agreed so readily, so that he didn't need to fight for the main points, UU reading www.uukanshu.com only needed to finalize the details.

They reached an agreement long before the signing!

All the key points that need attention, all...

"Don't be discouraged, 90% of the plan I just mentioned was finalized by you."

Qin Yu poured a glass of whiskey and handed him comfort: "Without you, the project could not have landed so quickly."

"But the most important thing is the remaining 10%." Xu Hao had no choice but to complain.

then slammed the whiskey in the quilt, pursing his mouth and inhaling: "Whatever, it doesn't take much time anyway!"

"This cooperation is different from the past, and some cannot be announced."

Xu Hao knew what he meant, to take into account the face of the Supreme Council.

The technology and everything are provided by Miracle Company, and the Supreme Council is responsible for the management and operation.

This, in the eyes of any normal person, is picking peaches.

The fact is true, but the rules are like this, you have to accept if you don't accept it.

Since it is destined to cooperate, why have to be ugly to each other.

Make cooperation more friendly, more like a win-win for each other, wouldn't it be more perfect.

Therefore, some relevant details do not need to be announced.

As long as the tense goes well, it is enough to achieve the desired goal with each other.

In the follow-up, there will be more opportunities for cooperation.

Qin Yu hopes that the relationship between each other will always remain harmonious, just as it is now.

Chapter 1023: Do not disturb

"Open the mall."

Found the column of 'Material Conveyor' and looked at the price of 10,000/units behind, Yu Ge was heartbroken.

At least four in order to meet the needs of the settlement center.

This is just the beginning. As the transaction volume increases, investment will continue.

And his plan to 'play the big one' at one time was obviously lost.

The number 61351 in the upper right corner represents Yu Ge's last stubbornness.

Among them, 40,000 purchased the "Material Conveyor," and the remaining 20,000 can be used to purchase "Kwangto Basic Architecture 1.0".

This is the knowledge that Yu brother has been struggling with all the time. In the system, knowledge classification is the most precious.

But with the current technology tree, can this technology be illuminated?

Yu is deeply suspicious of this!

"Exchange..."

Seeing 61351 flashing to 1386, Yu Ge's heart began to bleed again.

Fortunately, the devout believers of the church are continuously providing him with faith values.

As the light of miracle envelopes more colonial stars, it brings new hope to the desperate races.

The belief value will increase faster and faster, and he will be further away from his new goal.

"The item has been distributed, the coordinates..."

Looking at the "Basic Architecture of Light Gate 1.1" replaced in the mall, Brother Yu had an unknown premonition.

*

*

*

Let the Kirin send the creator to get things and store them in the warehouse first.

Qin Yu's work that day was successfully completed, and now he is going to receive delegations and supervisors from Shangdu.

Ms. Ye Jinlan!

In front of the airport.

The white sweetheart neckline with lace on the front and buttons in the middle, a pair of pencil trousers on the lower body, and Ye Jinlan with simple white shoes, are still so beautiful.

"Jin Lan." Qin Yu looked at the men and women behind her and hugged her.

Ye Jinlan restrained his inner thoughts and said with a chuckle: "I'll introduce you, this is Huang He, this is Guyi, and the two of them are responsible for the specific work.

"Gu Yi?" Qin Yu's tone rose.

This name is domineering!

Guy with long hair shawl, tall body, oval face and delicate features smiled lightly: "Hello, Qin Dong, it's Yiren in Shuiyiren."

"Just kidding, welcome." Qin Yu held the other's hand.

is soft and tender, without calluses, it seems to be a full-time clerk.

shook hands with Huang He again. His hands were callused and his mouth was rough. At first glance, he was a master of gun play.

"Let's go to the hotel first, take a break and then discuss business matters."

Qin Yu invited the two to get in the car, and he took Ye Jinlan to Rafa.

"What's the situation with these two people?" Qin Yu asked casually when he got into the car.

"What is the situation, don't you understand?" Ye Jinlan teased.

"People from the ancient family?" Qin Yu asked rhetorically.

Ye Jinlan nodded, and said bitterly and helplessly: "You are a very hot sweet pastry now."

The car started, and in the canopy that followed, Guy was also talking about him: "What do you think of him?"

"can not read!"

Huang He groaned: "It looks mild and lazy, with a bit of bohemianness, especially the look in your eyes...similar to his style of behavior!"

Guyi smiled and asked, "Didn't you say you don't understand?"

Huang He thought for a while, and said, "It's too obvious, besides, the things he did secretly are not very gentle."

"You said, if I **** him from Ye Jinlan, will she hate me to death?"

Guyi put his hand on his cheek and looked out the window, and said in a mischievous tone.

Huang He thought for a while, but decided to tell the truth: "I'm afraid there is no such possibility."

"You mean I can't beat Ye Jinlan?" Gu Yi looked back at him.

Huang He shook his head and said: "It's not who, but he can't give up the entire forest for a tree."

"...It's still men who know men better." Guy said sarcastically.

Huang He smiled bitterly, and said to his heart, "What's up to me, you have to ask yourself."

However, he also understands Guy's helplessness and distress!

"A good daughter of a wealthy family in Shangdu, she was suddenly given to the door as a gift by the family. Can she feel good in her heart?"

Lafa, Ye Jinlan said mockingly, "Hearing this, is my heart broken?"

"How is it possible, am I that kind of person?" Yu Ge denied it.

He couldn't understand a word of delivery to the door!

"Hmph." Tsundere snorted, Ye Jinlan turned her head and looked out the window, her eyes full of helplessness.

He is now like a tiger breaking into the mountain. After demonstrating his strength, he attracts the flattery of the animals entrenched on the mountain.

What about yourself... Fox fake vixen?

"What are you thinking about?" Qin Yu asked when she was silent, holding her hand.

"I wonder how many foxes you have." Ye Jinlan's cheeks flushed, dispelling the conjecture in his mind.

What kind of vixen, I am not.

If it had to be Guy in the car behind, that would be a serious vixen, a canary.

"Qin, chess, calligraphy and painting, singing, dancing and musical instruments are omnipotent, you can ride horses up and dive down.

It is said that he has also studied **** surgery. "

"Am I such a superficial person?" Yu Ge said righteously and secretly called 'scan. '

Scan data:

Guy:

Age: 20.

Height: 175cm.

Weight: 62kg.

Specialty: Eighteen musical instruments, singing and dancing, ingenuity, specialization in ink and wash painting, specialization in traditional Chinese painting, specialization in riding skills, water spirit, thirty-six styles of imperial house.

Face value: 96↑ [face value 90] [temperament 95] [wealth 7]

Body: 86↑ 【Development potential***】

Mood value: 71↑↓ [beauties have been sad since ancient times]

Favorability: 70↓ 【This is not scientific】

Freshness: 95↑ [Health starts from the doll]

Brother Yu rubbed his chin, wondering what Yufang 36-style is.

sounds so advanced, palace secret skills?

Waiting for the car to drive to the hotel, and then looking at Guy, Yu's eyes are a little more curious.

This made Gu Yi secretly guess whether Ye Jinlan said something.

"Let's eat first, and the restaurant box can just see the location of the settlement center in the future."

took a few people to the pre-determined restaurant. While waiting for the waiter to serve the food, Qin Yu stood in front of the floor-to-ceiling window and introduced the project details.

The lake in front is shimmering, and tourists shuttle between the pavilions and arch bridges, and the scenery is beautiful.

"The overall building is a square tower with a total height of 59 meters and a usable area of 29,000 square meters.

has a business hall, a private reception room, a transmission room, a testing room..."

"Where is the vault?" Guy asked.

Qin Yu thought for a while, turned around and went to the dining table, tapping a few fingers on his wrist.

There was a blue projection immediately before his eyes, and a magnificent 3D image of an antique building came into view.

includes a panoramic view of the lake below it, and a cylindrical passage connecting the center of the building to the disc building at the bottom of the lake.

"The central elevator goes directly to the transfer room and the vault at the bottom. A total of eight elevators operate at the same time and are fully automated."

"Is this what the outside world says about non-media projection?" Guy's attention was focused on the technology in front of him.

"Yes, Miss Guy is interested, I'll send you a terminal before leaving." Qin Yu said.

"Then I would like to thank Dong Qin in advance." Gu Yiyi smiled.

"Dong Qin, the treasury and the transfer room all use your company's robots?" Huang He interjected.

"Yes, there are robots standing in front of the elevator up and down, responsible for handover and transportation."

"I heard that your company will provide an AI system management center operation." Huang He said.

"Yes, I'm still waiting for the name on it!" Qin Yu said.

"We already have it." Guyi smiled and said, "Pangu."

"Pangu?" Brother Yu was shocked, is she serious?

What kind of existence is Pangu in mythology? Would it be too exaggerated to be named after him?

Finally, the subsystem of the settlement center confirmed the name: Pangu.

implies a brand-new future world, full of vitality and expectation.

Satiated with wine and food, Qin Yu asked Guyi and Huang He to rest. After the two had left, he pulled Ye Jinlan upstairs.

哐当!

The door was slammed and closed, and the electronic lock lit up with four words: Do not disturb!

I haven't seen it for a long time, Ye Jinlan seemed to vent all his thoughts and grievances.

From night to morning, toss for a night!

Until the driver called to ask when to leave, she blew the drums to retreat.

"I won't go today, I will go to sleep..." Ye Jinlan fell into a dream and turned over while yawning.

Leaving Yu brother with a wry smile, is he taken advantage of?

If you put two stacks of red tickets on the bed, wouldn't Brother Yu change careers successfully?

Shaking his head to dispel the distracting thoughts in his mind, Brother Yu walked to the bathroom: "Although we are handsome, we have to rely on our ability to eat."

After washing, he kissed Ye Jinlan, who was sleeping, and Qin Yu took the door to leave the room.

When he arrived at the restaurant, Guy and Huang He had already had breakfast.

"The two have eaten, let's set off now." Qin Yu stepped forward and said.

"Dong Qin might as well have breakfast first, the visit is not in a hurry!" Gu Yi responded with a smile.

"No, time is tight, no delay!"

Brother Yu has arranged all day long, so there is no time to waste.

After taking them on the field tour, they have to rush to pick up the pumpkin.

I have to take him on a date in the afternoon I don't know how long I will be busy.

Mother Shang-sama and Lao Qin were on a business trip today, and it would take three days at the earliest to come back.

During this period, he was a part-time dad + nanny + dating partner.

In other words, who did this kid date with?

drove around Nanhu in a big circle, and paused at each marked point, like four entrances and exits, parking lot, speed window and so on.

"I know that miracle has many amazing advanced technologies. Has Qin Dong ever thought that these facilities will be eliminated after the popularization of speed cars?"

"No, no."

Qin Yu pointed to the parking lot and said: "By then, you only need to build a box-type pipe network road, and the problem can be solved perfectly!"

"Air highway?" Gu Yi's eyes were flying.

"Yes, personal terminals and speed cars will be introduced to the market in the next two years."

This was planned a long time ago, and the planning of the air highway has been done.

The data acceptance and debugging of the terminal have also been completed, and it is only waiting for mass production to go on the market.

Gu Yi's eyes flowed, what she saw and heard for half a day completely subverted her cognition of technology.

When did super science fiction move from movie to reality?

Only four or five years, he created all this...

Gu Yi suddenly understood why those women knew that he was so romantic and still rushed!

Miracle Company, at this moment, Gu Yi suddenly believed in the existence of miracles.

He is a miracle in itself! ! !

Chapter 1024: Dating

"I think today's journey will come to an end. At noon, Xu will entertain you all. Abandoned is an ancient capital with a long history. You can stroll around and take a walk."

Give Guyi and Huang He to Xu Hao, and Qin Yu intends to slip the number.

"Dong Qin, can I have dinner at night?" Gu Yi stopped him and said softly, "I want to talk about the details!"

"Details? If you don't mind multiple people." Brother Yu obviously couldn't get rid of the little pumpkin these past two days.

Leaving him at home alone, Brother Yu is happy to do so.

The consequence is that Little Pumpkin will sue his mother, and Brother Yu can't force him to swear!

Because of the vows.

Brother Yu would never want to see it verified on Little Pumpkin! !

Obviously, his words misunderstood Guy.

She thought that Qin Yu was going to bring a female companion, which was obviously disrespectful to herself.

Or, he has no interest in himself?

"Okay, see you tonight." Reluctantly smiling, Gu Yi was already regretting it in his heart.

Why do you want to be so reckless to take the initiative to invite a man, or a man who is not interested in yourself.

No more interest in talking, Gu Yi returned to the sky, lying on the massage seat, closing his eyes and sleeping for a while.

"He is not interested in me? Huh???"

"Did I do something wrong? Or does he not care at all?"

"I'm not as good as his women...ha, what a joke."

"Shoo...no, I'm not angry!"

If Guyi had a chance to meet Xu Yue, she would have learned that she was not the first woman to be struck by him to doubt herself.

Seeing that she was disappointed, she sat back in the car sullenly.

Brother Yu was a little confused, but after thinking about it, he decided to give up.

Woman, it's really elusive!

was thinking about the roar of the locomotive coming into his ears, Qin Yu looked back, it was his beloved Z

H2.

The roar of also attracted the entangled Guy, and the moment she opened her eyes and looked at it, the breathing light just turned on.

The red halo extends forward from under the driver's seat, and finally forms the shape of a scabbard, and the halo gets stronger and stronger.

The bright red beauty is amazing, and it goes out in no time!

lights up again but looks dim, like a tamed beast waiting for its owner.

"This breathing light is so smart." Gu Yi thought in surprise.

Taking the locomotive from the driver, Qin Yu said "Thank you," and sat on it straddling his legs.

straighten the body and raise the pedals.

Brother Yu ignites and puts into gear, lowers the mask and twists the throttle.

hum~

Amid the low and obedient restlessness, the locomotive slowly drove towards the main street.

again roared, the body suddenly ejected and started, and disappeared at the end of the corner while speeding through the shuttle.

Maintaining the speed limit all the way, Qin Yu smoothly rushed to the school gate before the get out of class bell.

Let go of the feet, take off the helmet and put it on the hood.

Qin Yu politely nodded to the reception teacher who greeted him: "I'll pick up Qin Luo."

"Hello Mr. Qin, the children are standing in line, would you like to go in and sit down." Seeing the room pointed by the other party.

Several older brothers were chatting happily with the reception teacher inside. Brother Yu shook his head dumbly: "No, I have something else!"

This kind of socialization of the promotion course, or leave it to my mother to handle it.

He just needs to ensure the health and safety of the little pumpkin.

In layman's terms: Just stay alive!

"Brother, my elder brother came to pick me up."

There will be a little pumpkin who will be four years old in one month. His words are much clearer than before, and he will never call his eldest brother a big pot again.

Unless he did it on purpose...

Now, he is about to show off to his friends, the most handsome and coolest in the world, his own brother.

At this time, how could he shoot himself in the foot?

"My eldest brother's motorcycle is super handsome, he is the fastest when he rides, hey~ all the cars are left behind by him.

He can ride the same way as an airplane, faster than an airplane, do you know? "

"Whhhh, we will overtake the plane..." Seeing the little pumpkin dancing and dancing, he described how he drove the locomotive to overtake the plane.

Brother Yu's eyebrows have already risen with a black 'well' pattern.

Let him continue talking for two more minutes, do you want to ride this locomotive to eject and take off, break through the atmosphere, and go straight to Mars? ? ?

By the way, come back and forth with another bend, flying life!

"Okay, little clever ghost."

Qin Yu leaned over and picked him up, put him in his arms and sat down, covering his mouth by the way.

"We should go home, there is a date, see you next time."

Under the gaze of the blind worship of the little kids, Brother Yu was about to die on the spot, turning the throttle and fleeing in embarrassment.

Believe it, they believe it!

These little **** kids, can't they have their own thoughts?

Doesn't mean that children nowadays are very precocious, what about their mature thoughts?

The little pumpkin, with his hands gripped and his mouth finally free, waved excitedly: "Goodbye, we are about to take off."

"..." Brother Yu really wants to take off right now.

Because it is not far away, the parents of the child are staring at him with a kind of "self-experience" eyes.

So that, Yu brother even gave up his biggest hobby.

That is to appreciate the fashionable hot moms who come to pick up the babies during school time.

Before left, he heard a hot mom bend over and whisper to the cute little girl next to her.

"Baby, is that little fool the boy you like?"

"...Well, I admit he is a bit stupid, but you can't kill the child's innocent love."

"Oh, baby, of course I won't do this, but can you introduce his brother to me?"

"You already have a dad..."

Finally, Brother Yu saw the mature side of their generation.

Obviously, girls who are naturally sensual are more mature than dull silly boys.

It's just that the figure doesn't look like Han Jia.

This kid, cheated? ? ?

When I got home, Brother Yu asked about this during dinner, "Isn't Yaoyao your favorite?"

"Big Brother, how can a man like only one person, that would be too shabby." Little Pumpkin replied confidently.

"Do you know what Xun is?" Qin Yu was speechless.

shook his head, Little Pumpkin said solemnly: "Everyone does this, and Yaoyao and I are breaking up."

"...Why?" Yu Ge was speechless X2.

"Because she can't stand other girls giving me gifts, they have to like me, and I'm so helpless!"

Little Pumpkin shook his head with an innocent expression, and sighed heavily: "Hey, it's really distressing to be so charming."

The topic ends here, and Brother Yu is worried that he will continue talking.

Waiting for a meeting is not going on a date, but being hung from the beam of the house and smoking.

After lunch, Little Pumpkin began to slap herself in the room.

First use father's hair gel to style her hair, and then use mother's foundation to make herself a face.

In the end, he wore a funny suit and boat shoes that could fit him.

Click, click~

"Brother, do I look handsome?"

Little Pumpkin dragged his suit and costume, and put his head on his hips in a hot-eyed posture.

"Go back, wash it off in 10 minutes, and put on your little jacket." Qin Yu said blankly.

Click, click, click...

Failed to act handsome.

10 minutes later, Little Pumpkin walked out of the room wearing a small shirt, handsome denim jacket and jeans, and a pair of simple joint sneakers.

"Go." When he came to the garage, Qin Yu straddled Z

H2.

"Big Brother, can I drive my own car?" Little Pumpkin pointed to the mini G in the corner, and said with a look of anticipation.

Qin Yu watched him silently, Xiao Pumpkin lowered his head and said aggrieved: "I promise her that I will drive her for a drive."

"I can promise you, but I must take you away." Qin Yu picked up a safety rope from the tool rack next to it.

Little Pumpkin lowered his head dejectedly, and asked after a moment: "Then, can I take her for a drive in the park?"

"Can."

"Yeah, brother is the best."

Hugging Qin Yu's thigh happily, Little Pumpkin took the initiative to help him connect the two cars together.

Then, I sat in my mini G and waved happily: "Handsome guy, let's go."

took a small pumpkin along the road to "Lin Yin Jia Yuan," which is the most romantic dating cafe nearby.

Even on weekdays, it is full of girls with fashionable dresses and delicate makeup.

Waiting for the prince charming in his mind to appear, please drink a cup of sweet love coffee.

The cheapest is 58/cup, and the price of sweetness is a bit expensive.

Actually, as long as a lot of saccharin, any taste is sweet!

Obviously girls don't think so, and there is nothing wrong with occasionally being romantic and extravagant.

"Mu Mu." Pulled by the brother's motorcycle to the entrance of the cafe, the little pumpkin waved excitedly through the window.

"Mom, look, he has a car." Mu Chuci happily pointed to Pumpkin's car.

"Yes, he is so amazing!" Chen Yujiao said with a smile.

parked the car and asked the receptionist at the door to temporarily take care of the small pumpkin's mini G, and Qin Yu led him into the cafe.

Chen Yujiao and their daughter Mu Chuci have stood up, smiling and waving to the little pumpkin in greeting: "Hello, Qin Luo."

"Hello, sister."

Little Pumpkin's mouth is like smeared with honey, and one elder sister in one mouthful, called Chen Yujiao, is full of heart. U U Reading www.uukanshu.com

Qin Yu also smiled and greeted Mu Chuci, who was wearing a princess tutu and wearing a crown, exquisitely like a fairy princess: "Hello, Mu Mu."

"Hello, brother." Mu Chuci greeted him shyly.

Seeing her cute and cute look, Qin Yu was proud of her heart, "No loss is my old Qin family, this vision, this choice, this..."

Where's the little pumpkin?

looked forward, Qin Yu saw him in Chen Yujiao's arms.

The little guy was lying in Chen Yujiao's arms, saying happily: "Sister, you are so beautiful, I like you so much!"

"Haha, you little guy, your mouth is too sweet." Chen Yujiao smiled from ear to ear.

"Sister, if I can grow up quickly, I will marry you as a bride."

"That won't work, I'm already married."

"It doesn't matter, I can **** you over, excellent talents are worthy of you."

"Haha~" Chen Yujiao was going crazy.

How this child was born is so good at talking, he will definitely be a dead man who saddens countless little girls in the future.

But even so, Chen Yujiao still likes him so much. Who can refuse sweet talk?

Chapter 1025: Lake tour

The little pumpkin lies in Chen Yujiao's arms, as if forgetting that his "girlfriend" is by her side.

Before the atmosphere became more embarrassing, Qin Yu almost forcibly took him from Chen Yujiao's arms.

"Little pumpkin, Mu Mu is still waiting for you, don't you want to take her to the park for a ride?"

Forcibly~

pushed him in front of his little girlfriend, and Xiao Pumpkin finally moved away from the 'ripe fruits' that did not fit his age.

"Hehe, he is so cute." Chen Yujiao picked up the coffee and took a sip.

There were some milk foam on the pink lip glaze, and Chen Yujiao licked it with the tip of her tongue.

"Little pumpkin, I think you should go now."

Brother Yu, who saw this scene in his eyes, doubted what would happen if he waited any longer.

enchanting, charming, sexy, elegant, gentle...

All temperaments are mixed together, exuding fatal temptation.

The whole cafe was quiet, and everyone was attracted by the scene of licking red lips.

The elite man in the suit at the table next door, with crystal water stains shining on the corners of his mouth.

If it wasn't for Yu Ge's rich experience, she would have to take away her consciousness for everything she said.

"What's wrong?" Chen Yujiao obviously didn't realize what she had done.

Qin Yu tilted his head to the next door and smiled: "What do you mean?"

his eyes turned, he saw the pig brother-like appearance of the other party, his eyes met when he was greedy and possessive.

Chen Yujiao's face was reddish, and she hurriedly picked up coffee to hide her embarrassment.

The housewife living around her children and family makes her almost forget how attractive she is!

"Cough~"

Chen Yujiao was choked by coffee and put the cup on the table, coughing.

reached out to grab the tissue, someone already handed the tissue to the front.

"It's okay!" Qin Yu said with a light smile as she covered her mouth with a tissue and raised her head.

"It's okay, thank you."

Chen Yujiao shook her head, thought about it and suggested: "Why don't you go to the park now, what do you think?"

"It depends on what the little protagonist said today." Qin Yu cast his eyes on the little pumpkin and Mu Mu.

Knowing that he can go to the park now and take a drive, Mu Mu happily wielded his princess magic wand.

Little Pumpkin is also very happy because he likes to drive.

Especially with his little girlfriend. Just now, Mu Mu has agreed to his marriage proposal. '

After , they will be lovers.

But what should lovers do?

The little pumpkin driving the car is confused. He can't figure out the difference between a lover and a friend!

A few seconds later, Little Pumpkin gave up pursuing the truth.

Anyway, now he is taking his little girlfriend for a ride by the lake, they are very happy.

Keep a safe distance of two or three meters between each other, Qin Yu and Chen Yujiao followed side by side.

"Children's world is so good!" Chen Yujiao looked at the children in the car enviously.

innocent and simple.

You can feel the happiness from the heart and get happiness in one sentence!

"Even if you let you go back, you wouldn't like playing rubber bands with a bunch of little kids, wooden people."

Hearing him say this, Chen Yujiao smiled lightly: "It is because I can't get it, so it looks precious, doesn't it?"

"That's right." Qin Yu nodded in agreement.

Looking at his face value sealed by the mask, Chen Yujiao curiously asked, "Where is Mr. Qin, in the entertainment industry?"

"Why do you ask?" Qin Yu asked back.

"Because, most people are not like you." Chen Yujiao pointed to his mask and smiled.

Qin Yu pinched the mask and glanced, and said with a laugh, "I only brought this if I felt too annoying."

"Come on, the little girls will definitely find you to strike up a conversation." Chen Yujiao smiled.

"It's not just the little girl who strikes up a conversation." Brother Yu said with lingering fear.

The past is too unbearable to look back, so it's better not to mention it.

"You haven't answered my question yet." Chen Yujiao asked again, she always felt that Qin Yu was familiar.

But I suspected that he had admitted wrong, a handsome guy like him.

If you have seen it in entertainment gossip or celebrity magazines, you will definitely not forget it.

"Miracle Company, I work there." Qin Yu said frankly.

He has nothing to pretend to be poor, and he has a special hobby to find true love.

When someone asks, he will speak out!

only for women.

90+ women...clean women...

"Wow, it turns out to be a big man." Chen Yujiao clasped her fists in a weird way and nodded: "Disrespect and disrespect!"

"Where, where." Brother Yu clasped his fists in reply, jokingly: "Is it my turn now?"

"Haha, I am a full-time housewife, responsible for taking care of the children at home."

In Chen Yujiao's smiling expression, a trace of loneliness flashes fleetingly.

Had it not been for Brother Yu who had been staring at her, he would have not noticed this unwilling loneliness.

"Family and career are equally important. Being a housewife is in neon, but it is the dream of all women."

Qin Yu said with a serious expression: "Only if you marry well can you be qualified to be a housewife."

"Yes?"

Chen Yujiao said funnyly: "So, the housewife is the winner in life?"

"At least you win at the center line, and you don't know the end point."

"Why?" Chen Yujiao asked.

"No one knows if this car will break down halfway, turn into another track, and pull other players, what do you think!"

Seeing the flustered and sad in Chen Yujiao's eyes, Brother Yu knew that he was right.

In this age of impetuous people, housewives, where is such a good time.

When I meet a man who doesn't go home, no matter how much hope and enthusiasm he has, he will be exhausted.

It seems that Chen Yujiao is about to run out of energy.

"Stop talking about this, the little guys have gone far, I'll take a look."

Qin Yu hurried forward, leaving her space to calm down by herself.

caught up with the little lover in front, Qin Yu stopped the car and said, "Does anyone want to row a boat?"

"Me." The two little guys raised their hands and cheered in unison.

"Okay, let's go buy tickets now." Taking them to the ticket booth, Qin Yu asked for a manpower boat.

The electric boat is very convenient, but I can't experience the fun of boating at all.

When Chen Yujiao caught up, Qin Yu had already completed the formalities and only waited for her to board the ship.

"I'm a little afraid of water." Standing on the shore, Chen Yujiao hesitated and said, "Why don't you take Xiao Luo to play? Mumu and I are waiting here."

"Mom, I also want to row a boat." Mumu held her hand, grievously suffocating tears.

Qin Yu said: "Actually, it's not that dangerous. I have a life jacket, and I am very water-based."

"Big brother is super powerful, he can catch big fish in the sea, so big."

Little Pumpkin stretched his arms to the limit, and the exaggerated description made Chen Yujiao relax.

Look at her daughter's tearful appearance, wanting but not daring to speak.

"Well, then you have to be obedient, you can't move, you know?" Chen Yujiao exhorted.

Mu Chuci nodded obediently, put on a life jacket with his mother, and boarded the boat with the help of Pumpkin.

Let two little guys sit in the middle, Chen Yujiao sits on the bow, and Brother Yu sits alone on the stern.

"Okay, let's go!" Qin Yu shouted with the oar in his hand.

"Yeah, let's go." The little pumpkin stood up excitedly and made a 'rush' gesture.

The hull shook slightly, and Chen Yujiao clung to the boat gangs on both sides with an 'ah': "Xiao Luo, be careful, be careful."

"Sister, my name is Little Pumpkin, not Xiao Luo." Little Pumpkin turned and knelt on the seat, looking at her and said seriously.

"Okay, I see, Little Pumpkin, sit down quickly." Chen Yujiao said nervously.

"Sit down."

Hearing the sound coming from behind, the little pumpkin instantly turned and sat in a position, putting his hands on his legs and straightening his waist.

looked forward, like a pacesetter who heard the command.

Qin Yu, with an expressionless face, smiled again: "Okay, everyone relax, I will paddle very slowly."

Single person with one oar, Qin Yu controlled the wooden boat to swing into the lake.

Halfway through the journey, the nervous Chen Yujiao finally relaxed and let go of the boat that seemed to be caught by her to deform.

In fact, her fingers can't stand the intense exercise for such a long time.

She can't stand her new Kodan Crystal Nail Art too!

"How do you feel?" Qin Yu asked with a smile.

"Not bad." Chen Yujiao looked around with enjoyment. On the fluttering lake, the boat swayed with the ripples.

A refreshing breeze blowing across the waves, blowing away all day's fatigue and sorrow.

Taking a deep breath, Chen Yujiao suddenly liked the feeling of boating. Why did she never want to try before?

Once a woman thinks about it, the problem becomes extremely serious.

Because, no one has ever tried it with her.

When she mentioned being afraid of boating, her most trusted husband just told her, "In this case, we can go home early."

He never tried to encourage himself, to be brave to try, or to give himself support and courage to let her overcome fear.

The good mood was crushed by bad memories, but it was deeply suppressed in a certain corner.

Wait for fermentation until it swells...explodes!

Bang~

The little pumpkin shot at everyone in a gesture of firing with his hand, "Bangbang, you are dead."

"I have a fairy magic wand that can resist your bullets and watch me turn you into a little ant."

Mumu waved her beautiful and exquisite magic wand, UU reading [www. uukānshu.com](http://www.uukānshu.com) gave out a crisp, happy smile.

The laughter of the child is the most contagious, and soon the laughter on the boat changed.

Qin Yu has been taking them around the entire lake, docking on the shore, fiddled with the wicker with a paddle.

Enjoying cool in the shade of the trees, splashing in the center of the lake, and applauding excitedly at the splashes that are lined up by the oars.

Until they saw a group of ornamental fish, they gathered in a crowd to swim away.

"Big brother, big brother, fish, fish, chase, I want to watch fish." Little Pumpkin pointed to the school of fish and kept urging.

"Okay, hurry up."

Qin Yu raised the oars, and yelled in the second form: "No one can stop me, realize it!"

Raise the pulp, fall, and lean back.

switch sides!

Raise the pulp, fall, and lean back.

switch sides!

At first, Chen Yujiao thought he was just comforting her brother, trying to chase those fishes.

But soon she discovered that the boat was flying straight toward the school of fish like an arrow.

Whenever the school of fish adjusts its direction, the bow of the boat will also adjust accordingly.

Always keep a straight line between the two until it catches up with the fish, the little pumpkin happily raised his hands and shouted: "Big brother is great~"

"Brother is great." Mumu, the little lady sitting obediently, clapped her magic wand happily.

Little hands are red, and I don't want to stop...

Chapter 1026: conversation

The feeling of visiting the lake is very good, and the relationship between Little Pumpkin and the magic princess Mumu rapidly heats up.

But no matter how pleasant it is, there is an end!

Now, it's time to say "bye bye", Yu Ge still has an appointment tonight.

business!

Back to the cafe, Qin Yu reconnected with Pumpkin's car

H2 is connected together.

waved goodbye to Chen Yujiao and the little princess Mu Mu, "Goodbye, we will play together next time."

"Goodbye, brother!" Mumu waved cutely.

"Mu Mu, next time I invite you to my house, my house has a big garden, so big."

Little Pumpkin stretched his hands to the limit again, exaggerating.

Chen Yujiao and Mu Mu have become accustomed to this.

Maybe this is the pumpkin feature!

pulled him back home first. Brother Yu changed to a big G and came with a small pumpkin.

restaurant is located in the garden, quiet in the noisy, the Nordic cool style decoration makes people feel calm.

The terrace dining table connected to the lawn provides excellent privacy.

Guy was already in position when they arrived.

"Am I late?" Qin Yu took the pumpkin to the table.

"I arrived early, so cute little guy." Gu Yixian was very happy to see the little pumpkin.

"My brother, Qin Luo." Qin Yu said with a smile.

"Hello, little pumpkin." Without waiting for him to introduce himself, Guy had already called out his nickname intimately.

Little Pumpkin was not shy, and ran to her and sat down: "Sister, do you know me?"

"I don't know, but I heard many people mention you, they said you are super cute." Guyi said and looked at Qin Yu.

It turned out that many of the people he was talking about were little pumpkins, which caused him to worry for nothing all afternoon.

However, Guy is still super happy now.

The feeling that reality exceeds expectations is also great!

Guy knows Little Pumpkin, and there is nothing to be surprised.

Believe in the information around them, they have long been fully grasped by them.

Just like Yu Ge also launched some investigations into Guy's origin.

A wealthy family in the upper capital, and the Zhou family are called the pillars of the court, the pillar of the country, and the family of meritorious deeds.

Although the ancient family passed away due to illness a few years ago, the second generation of the ancient family carried the banner, and Zhou Lao took care of it.

Therefore, even if you lose the Optimus Prime at home, you will still stand tall in the court, but will be full of life.

Nowadays, the third generation has also stepped onto the stage and performed well.

Among the first batch of fanatics, two of them were surnamed Gu.

Ancient Ao and Ancient Plastic.

If it hadn't been for Guyi's appearance, Qin Yu hadn't really noticed the two of them.

In addition to them, there are four other trainees in the training camp who are also sponsored by the Gu family, and they use the Gu family's quota to join the selection.

is just a poor performance, still not up to the graduation standard.

"Miss Gu, are you ready to serve?" the waiter asked.

"Yes, what do you like little pumpkin?"

"I'm not picky eaters..." Little Pumpkin would have no intention of picking food, and all his eyes fell on Guy.

Sister is so good-looking, she speaks softly, she can't move her eyes at all!

In the end, he still asked Qin Yu to pull him back to his side.

As a Michelin restaurant, luxury ingredients are inevitable.

Truffle, caviar, king crab.

Chocolate plays with flowers, foie gras must be served.

The quantity and the seasoning are the key to a good dish.

As for the appearance, there is no need to worry about this.

Each dish is beautiful and delicious, which is a standard that Michelin must have.

In short, it is rare to be unpalatable!

But if you want to talk about how delicious it is, Brother Yu didn't even notice it. The ingredients are fresh and luxurious.

Starter, main course, dessert, one dish after another, withdrawn.

At the end of the meal, Brother Yu was still empty.

I didn't drink less cocktails, and I didn't order them specially. I just told the waiter to have a different taste each time.

"Dong Qin drinks so fast, isn't he afraid of getting drunk?" Gu Yi teased and asked as he watched him drink one drink after another.

"I drink well." Qin Yu responded.

"That's why I didn't entertain me well?"

"You are a guest. If you say that the hospitality is not good, it should be me."

Qin Yu toasted and touched, "Formally welcome Miss Gu, cheers!"

"Chels." Guy looked up and drank, revealing his skinny collarbone.

Putting down the cup, Gu Yi's cheeks became more flushed, and his eyes flickered and asked, "Dong Qin, do you know how the Shangdu family evaluates you?"

"Fuck you shit?" Qin Yu joked.

Guy smiled dumbly and pursed his lips: "I'm a lucky guy."

"Lucky is also strength, I remember someone said it." Who said this.

Lu Xun, it's him!

"Yes, luck is also a kind of strength."

Guy nodded and said, "What's more, the miracle has that strength alone is not enough today."

"Qin Dong must be very hard, for a miracle."

Facing her admiring gaze, Brother Yu rubbed his chin vacantly: "It's worth the hard work!"

To be able to have today, Brother Yu also worked hard to get it.

Sometimes it's four or five hours to be busy, or else just work day and night, how can it not be hard?

The hard work is for sure, but it is also worth it.

"Actually, Qin Dong doesn't have to work so hard at all. Just looking for the right method can easily develop the miracle."

"Listed." Qin Yu looked at Gu Yi with profound meaning.

Even though Gu Yi's eyes were uncomfortable, she nodded and said, "Yes, it's listed.

Modern enterprise management, stressing efficiency and mutual benefit! "

"Only by going public, letting more talents join in, and seeing the rising channels and hopes, can we attract more talents and make the company develop better."

"Stay complacent, just stay in place, not in line with the development of the company and the interests of shareholders."

Qin Yu leaned back and found a comfortable posture. Then he responded calmly: "Do you think miracles are needed?"

do you need?

Guyi doesn't know, but the answer is definitely "needed."

Because this is in line with the interests she pursues.

As for whether miracles are really needed, it is not that important.

The important thing is to let the miracle let go of the restrictions and open the door.

Let more people come in and get a share of the pie!

"Miracle has no plans to go public for the time being. We are not short of money, let alone technology."

"But you lack talent."

"Talents can be introduced and cultivated, and cooperation with universities is aimed at cultivating professional talents."

"They join the company and lose their passion without seeing hope."

"No, Miracle has a perfect promotion system, and we also have share awards, but it's not listed." is listed, this is a huge pit.

How many pairs of eyes are staring at the miracle outside.

Once listed, various rules will restrict his decision-making freedom.

The board of directors will become a vanity fair for power and power, and the development of miracles will also be fettered!

He won't become a cocoon and add a burden to his good life.

Going public will not go public, and the parent company will never go public.

As for the subsidiary, it can be considered if necessary, but it must be guaranteed that the equity is in hand.

Shares can be given, but equity is not.

The miracle must be in his hands, and only in his hands.

It is not that Brother Yu is arrogant, no one can do better than him.

Because of all the achievements of the miracle so far.

It can be said that it is all based on the products and knowledge provided by Qin Yu alone.

Without him, the miracle is no longer a miracle.

is just an ordinary company waiting to be surpassed, then to mediocrity, and finally eliminated.

Can't persuade Qin Yu even after talking, Gu Yi was a little unwilling to hold up the wine glass, her throat was about to burst into flames.

"Qin Dong, why are you so resistant to listing?"

Putting down the wine glass again, Guy wanted to find the key point of the problem.

Although there are various risks in going public, it is generally beneficial to the company.

Whether it is circulation, communication, or flexibility and funding, all can get benign feedback.

But he was full of resistance to going public, as if someone would take his company by doing so.

To tell the truth, this kind of petty spirit surprised Gu Yi secretly.

A leader who can develop miracles to the size of today should not be so cautious!

and stubbornness, this word is tailored for him.

"It's not resistance, but rejection from the beginning." Qin Yu corrected her opinion.

"There is no need to do something, why do you have to choose it?" Qin Yu asked back.

The miracle is that I need to make money, or I can't stand the pressure and I need to divide the cake.

The cakes have been divided, Bai Ze, Ye family, Li family, Xu family, Yang family.

Especially the 20% that Bai Ze took away, that's a big head.

Why is Brother Yu willing to sell these shares to Bai Ze?

is not to avoid coping with this situation again and again.

leaned back against the big tree to enjoy the coolness, but it was no fun to come and talk to myself.

Someone wants to put pressure on, then throw the pot to Bai Ze and talk to him.

As the company's second largest shareholder, he has the obligation to solve problems and pave the way for the company's development!

Yu brother neither need to spend time on this, nor need to waste energy.

He just needs to do what he wants to do, what he should do.

What, Bai Ze did not hold a position, just pays dividends?

Hmm It seems to be correct.

Let's talk about the ultra violet lithography machine, the fool-like control system of the lathe, the technical support of Xingtian and the purchase of VR equipment.

Price, order and delivery time have to be rescheduled.

that...

The delivery of Vulcan ships has to be delayed, and the company's order needs should be prioritized.

Between Brother Yu and Bai Ze, it has long been unclear.

Nowadays, the two sides are comrades-in-arms on the same line.

Just go wherever you are, and no one will jump out to tear down the stage.

Doing that will only make others look at jokes and ruin the current good situation.

Seeing that he doesn't get in the oil and salt, Gu Yi was a little discouraged and drank the cocktail he had just delivered with a straw.

The biggest purpose of her coming this time is to persuade Qin Yu that the Gu family can stand in the miracle company.

But now, she obviously can't convince each other.

Just now the other party has said very clearly that it is impossible to go public. If you have any questions, go to Bai Ze.

But this matter can't make it to the table at all, and the ancient family is not here to make trouble.

On the contrary, they wanted to make friends with Qin Yu and stand on the united front.

This is also doomed, Guyi can't be messed up by his temper.

But she still couldn't let go of her airs, put on a weak attitude to get Qin Yu's approval.

So the conversation is deadlocked!

And Yu brother, also feels that today's meeting should be over.

Chapter 1027: against

"and many more!"

Gu Yi stopped him and said calmly: "The Gu family wants to stand by your side, what needs to be done?"

"It depends on what the Gu family is willing to give." He picked up the little pumpkin that was busy eating desserts, and walked out of the restaurant with a smile.

*

*

*

What is the ancient family willing to give, or is it willing?

Brother Yu didn't care at all, because he was not the one who was in need from the beginning.

If the Gu family can come up with a bargaining chip that tempts him.

This will become a mutually beneficial transaction.

On the contrary, there is nothing!

A miracle, there is no need to find a new backer.

The next morning, Qin Yu went out for a run early in the morning, and then vented his energy in the gym for half an hour after returning.

When he walked out of the gym, a faint sweat came out on his forehead.

Removed the bandage from his hand, Qin Yu said to Auntie: "Auntie, the sandbag is broken, call someone to replace it with a new one."

"Okay, little sir." Auntie was very calm.

In this home, she is also very knowledgeable.

For example, every time the little gentleman comes back, the sandbag will be broken within three days and needs to be replaced with a brand new one.

cowhide, four layers, with a center of gravity iron, the kind of professional grade.

There is also an intelligent voice system in the home that can control almost all electrical appliances.

projection, always provide the audio service you want.

That is the aunt's favorite change. While she can learn from the people in the projection, she can cook delicious dishes that she has never learned before.

There are also two domestic robots, trial products...

They have not been produced in the market yet, so the young man specially told them not to talk nonsense when they were asked to go out.

Although, it's painful not to be able to talk gossip with grandpas and aunts.

can be seen for the salary of 50,000 per month, let the pain come more intense!

When he came to the restaurant, the little pumpkin was tilting his head and delivering food in his mouth little by little.

Qin Yu coughed deliberately.

"Morning, big brother." Little Pumpkin was clever and said hello immediately.

The rules and politeness that should be there must be, and the child must set the rules from an early age, so that he can describe it as an instinctive habit.

When he develops various bad ailments and wants to correct it.

is much harder than setting the rules from the beginning!

"Morning." Qin Yu sat in her seat, "Kirin, open the empty net."

A complex interlaced network of pipes appeared in front of him, and the seemingly tangled network expanded and enlarged under the fluctuation of the fingers.

The seemingly dense lines, like countless parallel lines that will never intersect, maintain their own fixed track.

"How about the autopilot and safety performance test of the speeding car?" Qin Yu asked.

"Already passed the evaluation!" Kirin.

"Monthly output." Qin Yu.

"121 stations." Kirin.

"Cost?" Qin Yu.

"1267319.63 yuan/unit." Kirin.

"Has the qualification certificate of Kongwang approved?" Qin Yu.

"Under review, expected within 3 working days." Kylin.

1.26 million, the cost price of the speed car is not too high.

But if you want mass production, it will change human travel habits and traffic. The price of 1.26 million is not good news.

We still have to continue to beat the price down, at least three-quarters.

30,000~400,000/unit, this price is reliable!

The cost of flying cars remains high, and the biggest problem comes from power.

is a controllable nuclear fusion engine, using safe and harmless helium-3 as raw material.

And the raw materials need to be transported back from the moon, and their use is added to the controllable nuclear fusion engine, which also costs a huge price.

That's why, the cost of each speed car is as high as 1.26 million yuan.

But, this problem is not unsolvable!

Reduction in distribution and power reduction are all effective ways to reduce costs.

Beggar Edition, Fashion Edition, Deluxe Edition, Platinum Edition...

Or, platinum limited edition?

Various thoughts flashed in his mind, Qin Yu put down the dishes and decided to wait for a meeting with the company and various departments.

Let's discuss this matter together, solicit opinions from all parties, and see what everyone thinks.

"Notify Secretary Yang, at 10:05 in the morning, I want to see all the executives in the conference room."

After receiving Kylin's feedback, Qin Yu turned his attention to another matter.

"The Basic Architecture of Light Gate 1.0", flipping through the pages of a book like a horse and a flower.

The fact is, just as Brother Yu thought, it is a huge pit of infinite matryoshka.

But this pit...

really fragrant!

Who should give this book, Yu Ge has a suitable person at the moment when he thinks of the problem.

"Leader Cui, I gave you something, pay attention to check it."

took the little pumpkin to the office, and handed "The Basic Architecture of Light Gate 1.0" to Xu Meixin.

Qin Yu sent a private email to Cui Geng in his own name, reminding him to remember to receive gifts.

Jingyuan has too many projects, and he has to be responsible for the most important 'nano-engineering', but also start to take over the reverse engineering of the 'material conveyor'.

With her current physique, even if she increases her workload, it won't be a problem.

But she will be trapped to death in the laboratory, don't try to remove her **** from the chair for a minute.

Shi Cui, now also has his own position.

Department of Human Engineering and Biochemistry, so don't think he can free his 'brain' from this vast project.

The only suitable candidate is Cui Geng.

Brother Yu felt it was time to put more pressure on him. His current job is indeed too easy.

Moreover, Cui Geng himself is very dissatisfied with this.

As a senior management of Kuafu Research Institute, he hopes that he can be reused again.

instead of like now, like a small character shrunk to the edge, dispensable.

Give him such an important project as the "Interstellar Portal", Cui Geng will definitely be happy.

"Boss, it's time to meet for a meeting." Xu Meixin knocked on the door and came in to remind him that it was time to go to the meeting.

"Are everyone here?" Qin Yu got up and walked out.

"Yes, President Hua and Director Zhu are also online." Xu Meixin responded.

When Qin Yu came to the meeting room, the oval meeting table was full of people.

"Well, everyone, let's discuss the specific details of the empty net and speeding project!"

The door of the meeting room is automatically closed, and the [Creator] outside the door is activated.

Xu Meixin is responsible for recording the abstract with pen and paper, while the electronic version is automatically recorded by Kylin.

Devices connected to the company's intranet can become its eyes and hands.

The core point of the meeting ultimately revolved around the topic of whether to reduce the allocation.

Reduction!

I don't know when it started, it seems to have become 'have you eaten?' Such simple daily greetings.

Whether the miracle company wants to continue this 'bad habit,' remains to be discussed!

They have become accustomed to the quality and standards of excellence, and suddenly they want to reduce the perfect product to 'tattered'.

No, Zhang Wei couldn't accept it first: "I don't accept this plan, I firmly oppose it!"

"Boss, even if you want me to go out, I will reserve my opinion and oppose it."

Qin Yu smiled silently, looked at the others and waited for their response.

"Boss, I personally oppose it." Tang Guo was the first to stand up after him.

"What does a miracle represent? It is a boutique, high standard, Daxia conscience, responsible for products, customers, and a socially responsible enterprise."

"If we do the same, what is the difference with those businesses that are ridiculed by consumers?"

"However, if this is the company's final decision, I choose to obey." Tang Guo's speech was much more gentle.

Although it is said that Datong, the last sentence is the most important.

If an individual expresses a protest, the company's order can be respected, which means that the company is superior to the individual.

Hmm~ The boss's most admired good employee!

The old fox is the old fox, and he is not guilty of both ends, and he also shows his loyalty to Qin Yu by the way.

Tang Xin's Qiqiao and Exquisite Heart comes from him, right?

"I agree with Mr. Tang's statement." Watson answered: "However, what I am worried about is the reaction of consumers."

"The higher the expectations, the disappointment caused by the gap will arouse more serious anger."

"We have always been a benchmark and a conscience enterprise."

"If this image is destroyed, will consumers turn their fans into black and drive the road to black?"

"If someone incites at this time, it will easily cause a serious public relations crisis to the company's other products!"

Watson looked around, no one denies this. This is what everyone is most proud of.

Working here is not only a high salary, but also people's respect, admiration and gratitude.

A good reputation and a sense of accomplishment when you are satisfied are occasionally more valuable than money!

Occasionally~

"Is anyone else wanting to say anything?" Qin Yu looked around and waited for the next speaker with a constant smile.

After waiting for a long time, no one spoke again, "Is there anymore?"

"Boss, since no one has said anything, let me say a few words." Xu Hao stood up suddenly, holding the table with both hands and nodding in greeting.

Then, he said casually: "Everyone, are you making a mistake?"

? ? ?

Everyone's expressions are surprised, they are wrong, what are they wrong?

Facts are facts. The problems mentioned by UU Reading www.uukahnsu.com before are all worth noting.

You know, the embankment of a thousand miles was destroyed by an ant colony.

"I know your concerns, I won't object to any company, but..."

Like everyone said, 'but' the previous ones were all bullshit.

"This is a miracle company. Every product we produce is irreplaceable. It is something people can't chase after crazily."

"Moreover, we are talking about speed cars, flying cars." Xu Hao looked at everyone with sarcasm.

"You think it can only fly in the sky, no, it is changing the world and affecting the entire age!"

"Only by reducing the distribution and cost, can the speeding car be popularized to thousands of households, and the human travel will undergo a tremendous change."

"Exaggerate the description, it is the fuse of the world change!" Xu Hao opened his hands and described the future with passion.

What the miracle company does seems to become great in an instant.

is unparalleled, it is not just an ordinary company, it is changing the world and creating the future...

"That's all I have to say. If you still feel that the reduction is a wrong choice, I hope you have a good reason to convince everyone."

Xu Hao looked at the other executives, and when he sat down, his eyes deliberately stayed on Watson for two seconds.

The corners of his mouth were tilted back, with a somewhat triumphant ridicule, but the intention was obvious.

Chapter 1028: acting

The door to the meeting room opened, and everyone left in groups.

It's just that before leaving, their eyes couldn't help but glanced at Xu Hao who was aside, "They are here for real?"

Xu Hao's previous speech against Watson, and the provocative look in his eyes after the end.

and later Watson interrupted the opponent's behavior rudely during the speech.

is undoubtedly explaining that he and Watson are not right!

After Xu Hao pointed out the contradiction, the progress of the meeting was extremely smooth.

For some reason, the executives were relieved, as if this was exactly what they expected to see.

Sometimes, excessive harmony does not mean everything is fine.

On the contrary, it makes people worry about whether I can still be myself, or always wear a mask of hypocrisy.

Everyone has their own three different views, aesthetics, personality and so on.

How can it be possible to maintain a close and friendly relationship?

So, now they finally don't need to maintain a 'friendly' personality.

This makes the inside of the company filled with the pungent smell of gunpowder, and it also arouses the greedy desires of everyone.

The previous 'peaceful development' can no longer keep up with the demand for miracles. Now they need a stronger and faster wolf culture.

It's not a group of people standing on stage and licking their mouths. It's called NT, and it has nothing to do with wolfishness.

Wolf is a united, cruel, sensible creature that worships the strong.

The true wolf culture is that a wolf takes its own wolf pack, attacking the city, and tearing up the enemy bit by bit.

Then, enjoy the delicious harvest and joy together!

Unity, coldness, and full of aggressiveness, this is the so-called wolfishness.

As for those who crawl on the ground and mouth, they seem to be training dogs!

After everyone disappeared, the meeting room door closed again.

Five minutes later, Qin Yu walked out of the meeting room with a black face.

"The boss is very angry because Mr. Xu and Mr. Hua are at odds!" The news spread throughout the company within a few minutes.

But the atmosphere of the company is more harmonious in the smoke of gunpowder! !

Therefore, there are some things that cannot be treated rationally.

In the chairman's office, the projections of Xu Hao and Watson appeared on the sofa, while Qin Yu was sitting in the office shaking a thick-bottomed cup.

The amber whiskey swirled in the glass like a whirlpool, exuding a beautiful translucent luster.

"Brother Yu, how did I act?" Xu Hao said with winking eyebrows.

"You did not go to the film and television industry, it is the biggest loss of the film and television industry." Qin Yu joked.

Watson embraced his arms and said with his legs crossed: "Next time this kind of thing is changed to someone else, I hate this feeling!"

"Except you, who can make him angry?" Qin Yu smiled.

Watson thought for a while, it was indeed true.

He robbed the Xu family's business from him, and the Xu family is still complaining today.

Although he never showed it in front of her, it was because Watson stood on the opposite of Xu Hao's. '

She represents 'enemy. '

Today, Xu Hao's 'targeting' is believed to make certain people in the Xu family drink three cups and laugh happily.

can also give him an explanation, without having to endure some cynicism every time he goes back.

Now, Xu Hao almost doesn't want to go back to that home.

"Get married early, you will be free if you have a wife." Watson sneered.

In order to help him solve the trouble, he must become a victim.

If it weren't for Qin Yu to ask her for help, Watson wouldn't do it.

This will obviously affect her authority within the company. I believe that soon someone will jump out and try to provoke her prestige.

"When the chicken jumps out, kill it." Qin Yu said lightly.

"This is what you said, I will get off first." Watson laughed and went offline.

Seeing that only himself and Qin Yu are left, Xu Hao said abruptly: "Brother Yu, the subspace exploration project, can Xiaoxiao not go?"

"I know that I did not comply with the rules, but you also know that the relationship is unreasonable, and I am really worried about her accident."

"It's not me that you want to convince, it's her." Qin Yu said.

Xu Hao gave a startled expression and said, "You mean, she insists on going?"

Qin Yu nodded, Xu Hao arched his waist like an eggplant beaten by Shuang and sighed helplessly: "I knew..."

"Or you can emotionalize her with love and let her stay." Qin Yu joked.

Xu Hao laughed at himself and shook his head, and said bitterly: "If I can, I won't use it to ask you to intercede."

Three days later, the plan to designate the abandoned capital as a 'pilot city for the speeding car project' was approved.

Airnet is officially launched. Starting today, all aircraft passing through Sanqin will be taken over by Kirin.

After leaving the territory of Sanqin, it will be taken over by the Aviation Administration again.

Although the speeding car has not been officially put into operation, it does not hinder the feasibility of each other to try the plan first.

Before Speeding is officially launched, if there are any hidden dangers that are overlooked, they also have enough time to make adjustments.

Vulcan Command Center, the second command center was transformed into an air network monitoring command center.

Kirin is responsible for coordination, and the staff is responsible for assisting his work.

For example, notify the crew to go to a designated altitude and fixed channel to conduct a simulation strategy.

On the big screen in front of them, the network that looked like a complex pipe kept lighting up and extinguishing.

That means that the road is in use or idle, and the entire dispatching work is busy and chaotic.

The staff are still adapting to this heart-to-heart work, although Kirin is in charge of dispatching and commanding.

Most drivers will also choose the autopilot takeover mode, but there are always a few guys who don't trust intelligence will choose manual operation.

Then, the entire network will become a mess.

This made Zhang Wei's mood continue to deteriorate, and his face became ugly day by day.

"Old Zhang, I heard that you are in a bad mood recently." During lunch, Qin Yu sat beside Zhang Wei with a dinner plate.

"Why didn't anyone tell me about Titan Heavy Industries?" Zhang Wei tried to suppress his emotions.

He is very upset now because of his right-hand man.

Without his knowledge, he was transferred from his current position and became the head and chief engineer of Titan Heavy Industries.

And all his previous plans were disrupted.

had to spend several weeks to rearrange arrangements and appoint a new reliable deputy chief engineer.

Actually, there is no...

He didn't have any suitable candidates, Qi He was able to dig out and cultivated himself.

"You know, there is a shortage of people everywhere in the company, and other departments are also partially mobilized."

Qin Yu said with a smile, picking up the braised eggplant and putting it in his mouth.

Um~

is still so authentic. He likes the popular taste of the staff canteen, which is especially satisfying.

"But Vulcan is also short of manpower. The people under me are already spinning." Zhang Wei complained helplessly.

The person in front of me is my boss or my mentor.

Although he has never admitted, it is all his credit for Vulcan to be there today.

He provided the theory and laid a good foundation!

Only above this, they can develop Vulcan to the point it is today.

No one can deny this!

What's more, he is full of trust in himself, no matter what kind of request, the amount of money that needs to be spent is huge.

As long as it is legitimate investment and expenditure, unconditional support.

Facing such a boss + mentor, what can Zhang Wei do? ? ?

He is also desperate, but he can only bear the despair silently in his heart.

The baby feels bitter, but the baby can't say...

"Don't be so depressed, new people will not come one after another in the past two months, this time Vulcan will be selected first."

"real?"

Zhang Wei looked astonished, then laughed wildly: "That's it, boss, it's hard to chase after a word."

"It's up to you." Qin Yu amusedly solved the lunch in front of him.

It is shameful to waste food, regardless of status, rich or not, this will never change for Brother Yu.

In the next few days, the company has been busy with the interviews of fresh graduates and related matters of the speed car production line!

Qin Yu also became more and more busy, until Xiaoyuan fainted on her desk due to long hours of work.

"How's the situation?" Qin Yu was still processing documents in the office after receiving a call from Xu Meixin.

"It's okay, the doctor said it was overworked and needs proper rest." Xu Meixin said.

"Let her rest assured and get paid!" Qin Yu responded.

"I'll tell her, Boss, whether you want to pick another secretary. Now the workload is getting heavier and it's hard for Madoka to handle it alone."

"You come to make arrangements, don't forget, you are the first secretary." When the question was handed over to Xu Meixin, Qin Yu devoted himself to work again.

Meeting, meeting, signing, signing...

It wasn't until 11:33 in the morning that Qin Yu finished his day's work.

Throwing the pen on the table, Brother Yu stretched out and said: "Damn, this is not the life I want at all."

At this point in time, he should be at home, or on a date, or else he is playing games with his little sister.

Anyway, you shouldn't be in the office with a mountain of files.

This is totally inconsistent with his definition of life!

No matter how much you complain, it can't change the facts in front of you.

Close the cap and turn off the computer.

Brother Yu turned his neck, picked up the handbag and the key on the table and opened the office door.

"Hao Qin Dong." A voice suddenly came from the secretary's position.

Brother Yu was taken aback. UU read www.uukanshu.com and turned his head to look. There was a surprised look in his eyes: "Is it you?"

"It's me, Dong Qin, and I'm your new assistant secretary." Beiyi bowed and smiled, standing in place with his weak legs.

When was selected by Xu Meixin, she thought about the scene when the two met.

nervous, surprised, relaxed, or talking about Lu Qing, school...

But until he really faced this moment, Beiyi realized that all his previous exercises were in vain.

Her legs were weak, her heart was up and down, her body involuntarily warmed up, getting hotter and hotter, causing a layer of sweat to appear on her forehead.

"Is it Secretary Xu?" Qin Yu smiled deliberately at her nervous expression that pretended to be calm.

"Yes, Secretary Xu interviewed me this afternoon." Bei Yi responded.

"Do it well, don't underestimate the secretary's position, you will be so busy in the future that you don't even have time to eat, are you afraid?"

"I can do it, Qin Dong." Bei Yi suddenly raised his head, looking straight into his eyes resolutely.

Bei Yi at this moment put aside the tension and panic.

I just want to tell Qin Yu that I have the confidence to do this job well.

Because this is something she had never dreamed of before, being able to get in touch with him up close and repay him for the best post!

As long as he stays in this position, then he will be able to repay his kindness in saving him.

... Even if she can't do it, at least, at least she can do something, can't she!

Chapter 1029: overheat

In July, Pumpkin's birthday is approaching.

But no one took him out this time, so he could only stay at home and celebrate with a group of kids.

actually fulfilled the promise he made to Mumu last time and asked her to come and play at home.

Early in the morning, the garden was decorated with colorful, slides, sand castles, puppets, and clowns.

The little bear who is tall with flowers, and the little pumpkin pulls out all his carts to bask in the horse!

style and balloon, as the theme of the party, it is natural to be indispensable.

The entire banquet was in charge of Han Jialai, and Yaoyao was also brought by her. This will be playing with Little Pumpkin in the room.

It's not quite right to say that. It should be that Little Pumpkin is showing off her toys and collectibles to Yaoyao.

Various limited edition car models, limited edition bear toy, keychain inlaid on the cabinet outside the wall.

That's right, Pumpkin's hobby includes collecting keychains.

are all cartoons and colorful styles.

However, there are indeed many co-branded models, such as LV's dice, Fadou keychain, and tokidoki's fruit keychain.

The kaws family, the joint name of Shu Uemura One Piece, all kinds of street fashion, cartoon joint names...

placed a wall full, hung on it shining brightly.

Yaoyao, who has no interest in car models, loves these keychains.

Especially those fruits, trendy brand co-branded diamonds and gems, she likes each of them.

There is also a colored diamond bear about the size of a small pumpkin.

Yaoyao put her face on the cabinet door, her eyes shining not far away from her eyes.

Until Mu Mu broke into the room, breaking the balance between the two little guys.

"I hate you." Yaoyao said angrily, and ran out of the room in tears.

In the room, Mu Mu, who was holding a brand new magic wand, was full of grievances, and his tears were tapping on the floor.

"Hey, woman, so troublesome!" Little Pumpkin shook his head helplessly, and sighed earnestly.

Then, his ears were twisted 90 degrees by one hand.

"Ah, mom, mom hurts, awk, awk..." Little Pumpkin cried and was brought out of the room by Liang Chuyu.

This birthday party, the opening is extremely hot!

Brother Yu came back at noon, and Gu Yi came with him.

These days, she stayed in the abandoned city and stayed on!

It looked like he was waiting for news, but he never mentioned the shares to Qin Yu again.

Presumably she is still in distress, what kind of bargaining chip should she use to impress herself.

Today, she took the initiative to call Brother Yu and said that she wanted to participate in the birthday party of Little Pumpkin.

Brother Yu did not refuse either, the more people who came, the more he would pay it back.

Little Pumpkin has liked to be noticed since he was a child. Naturally, the more people there are on his birthday, the happier he is!

"Big Brother, Big Brother, gift." When Qin Yu was discovered, Little Pumpkin rushed up first.

spread his hands and looked up at him with **** eyes.

"Give you."

Qin Yu put a transparent and flawless crystal ball in his hand, about the size of a goose egg.

"What is this?" The little pumpkin happily held the crystal ball.

Although I don't know what it is, it looks so beautiful.

"Crystal ball, you don't always want a crystal ball that can make a wish."

"Can it come true?" Little Pumpkin looked at him in surprise.

"Yes, as long as you write your wish on paper and stick it on it, it will come true in a few days!"

Qin Yu rubbed his head and looked inside the room with a smile.

Chen Yujiao, Han Jia... Brother Yu knows both of them.

Where did the others come from?

*

*

*

Nanqu Club, several big guys worth more than 100 million yuan, are discussing the location of the settlement center.

They have all made heavy bets on their respective optimistic sectors. Nowadays, housing prices in those places keep rising, which is exciting.

"I said everyone, it's time for the yamen to make a new announcement recently. What should we do next? Who has an idea?"

The trendy dad with a big back and earrings, dressed in fashion, interrupted the whispering whispers.

"Lao Yang, what do you think?" Iwahira Nishi smiled with a gentle-looking, glasses-like look like a professor.

"I mean, whoever wins, other people will sell the project, withdraw the funds, and take a piece of money to do things around.

We can connect with Yamen and Miracles to strive for the best interests. "Fashion dad Yang Haodong said.

He is in the street fashion business, and he does what he does in any project.

Today, there is a big coffee who wants to make money with fashionable shoes, and Yang Haodong can immediately help find the right big-name designer and team.

The whole set of propaganda plan keeps up, the Internet celebrity traffic, and the platform all have access.

You just need to put up a name, follow-up sales, hype, channels, and popularity, he can give you everything.

The cost is naturally not low, but making money is really making money.

If you push yourself, you can cut a wave of diehard fans.

Give it to him, you can create a brand series for you, and immediately hit the market.

In the words of Yang Haodong: As long as you understand the packaging and hype, no matter how ugly design is, some people will pay for it. This is an age of aesthetic distortions. You can believe what the trend says!

Who is the trend? Dealers like him are the trend.

"I'm fine, money is always available." Iwairasi pushed the frame and smiled.

Sitting next to him, the fat man with a big belly said: "That is, who doesn't know that you Laoyan has the most cash."

Just looking at the appearance, Iwahei Nishi is the most gentle among all the people present.

is personable, slender and stylish, giving people a very knowledgeable sense of sight.

But who would have thought that such a person turned out to be lending money.

is even more familiar with the law, and when it comes to the law, it's the best way.

People like them occasionally have private consultations and legal issues, and they all ask him to solve them.

Nothing else, Iwahiroshi is definitely a good one to take advantage of the loopholes.

However, he also has his own rules.

One does not do student business, and the other does not do private business.

Like some student loans in the early years, he never touched it when he made the most crazy money.

Iwa Pingxi is a long-term business, not a one-off deal.

He said at the time, how crazy this market is now, how miserable it will be to die in the end!

Participate in it, the more you earn, the faster you die.

At that time, some people didn't believe it, and some couldn't stand the temptation, and they all plunged into it.

, including his two little brothers, also went out to do it alone, buying a car in two months, and a luxury house for half a year.

At that time, it was really beautiful, and there were people holding it everywhere.

Now, people go in and squat inside!

Iwa Pingxi sat here, talking and laughing happily with the big guys.

He only provides loans to companies, even if you are a leather bag company, he can do it.

Moreover, the interest charge is even worse!

The liar will not disappear because of himself, so instead of letting others eat meat, it is better to catch it all by himself.

Don't pay back the money?

Iwa Pingxi is a gentleman who is engaged in business and trading.

You can't even see a tattoo all over the body.

can do his job, how can there be no one under his hand.

Besides, the law contract is clear to him.

In trouble, let's go to the court!

Ordinary people are judged by the court, and sometimes even no one can be found.

I found it, but the other party couldn't do anything about it.

Two years in the last year, two years in three years, people are stupid.

But this is not a problem for Nishi Iwahira.

Can't find anyone, I'll look for it.

Shame, I have a verdict in one hand and a big iron chain in one hand. Choose which one you want.

"Lao Zhang, what do you mean?" Yang Haodong looked at the fat man, wondering what he thought.

"What ideas can I have, let's do it with everyone!"

Zhang Jingwen smiled like Maitreya Buddha, his eyes narrowed and he couldn't see anything.

With two big flowered arms, his body is full of flesh, the beer belly stretches his clothes tightly, and his face is always smiling.

Anyone who saw it felt joyful.

This is Zhang Jingwen, Sanqin's largest building material dealer.

Under the name of , there are hundreds of mixing stations alone, with thousands of construction vehicles of various types, semi-trailers.

If Zhang Jingwen's fleet is stopped today, at least 50% of Sanqin's construction projects will be suspended.

If even the mixing station, the battlefield, and the gravel plant are all shut down.

Everyone can go home and rest, or just switch jobs!

"How to calculate?" The burly muscular man sat quietly on one side and asked calmly.

"The old rule is that the people in the middle take the big head, and the rest share it equally." Yang Haodong said.

"Guo Zi, what do you think?" Everyone looked at the muscular man.

Guo Shun, doing sports, fitness and health projects.

is a fitness maniac himself, just look at his tendons.

People look fierce and taciturn, but they are actually very righteous, cold on the outside and hot on the inside.

"Good." Guo Shun agreed.

In a few words, the four of them agreed on the details of the next cooperation.

Until Guo Shun said: "What if you miss it?"

"Hurry up, then!" Iwahiroshi said calmly, "The price of the land we hold is too hot."

"60,000/m², are these people crazy?" Upon hearing the news, Brother Yu was shocked.

just celebrated his birthday for Little Pumpkin, and gave him such a big surprise.

Ye Jinlan also called in to convey the above opinions. UU Reading www.uukahnsu.com

Stability is overriding everything, it is the unchanging tone!

It seems that you can't wait any longer, you must announce the result immediately.

If this continues, the bubble will only get bigger and bigger, and the old buildings 20 years ago can also be noisy at this price.

Also, there are countless people throwing their life savings into it.

Those self-built houses that were encouraged to think that their homes might be selected were even more crazy and stamped.

I only hope that we can get a share of the pie during the demolition!

On the afternoon of the same day, Miracle Company and the Preparatory Office of the Settlement Center jointly issued an announcement.

and hung up design sketches and addresses on their respective official websites.

When they saw the design sketch of the frame in the middle of the lake, everyone was blinded.

At the same time, in the Nanqu Clubhouse, the four of Yang Haodong immediately picked up the phone and began to sell their houses and shops.

House prices that continued to rise fell by 3,000 yuan/m² that day.

Next, it continued to fall for a week until the price returned to the range of 22,000-25,000/m².

is higher than expected, thanks to the influx of foreign capital.

They are optimistic about the future of Abandoned City, thinking that the price is acceptable, so they are entering the market one after another.

This has also temporarily delayed the market's decline, allowing prices to rise again.

Also, the increase this time is very unreasonable!

A large number of abnormal transaction records have attracted the attention of relevant departments.

Chapter 1030: VIP

At the Nanqu Club, the four gathered together again.

It's just that the expression is not as easy as it was before, and the look full of thoughts is disturbing.

"We seem to be eyeing people!" Yang Haodong said with a haggard face that all the trend elements on his body disappeared.

These days, he didn't bother to dispose of the house in his hands.

In order to increase prices, the four people bought and sold each other, frequently making false transactions, and making a lot of money in fear.

Yes, although the price has collapsed!

The four of them did not have any losses, but made a fortune.

Because the initial purchase price was low enough, even the crash did not affect their profits.

It's just that, just sell it.

Obviously, the profitability did not meet their psychological expectations.

As a result, under the suggestion of Iwahei Nishi, they made false transactions and other minor actions.

This is not the first time this kind of thing has been done. They are very careful and carefully control the price fluctuation area.

Let it not be so conspicuous, but also can remain in the high price area.

Ensure that each other's benefits are maximized...

But this time, Iwahiroshi miscalculated.

"The regulatory authorities are watching very closely this time. It is completely different from usual. My people can't find out the news."

"It seems that the above is really going to vigorously develop Sanqin. Anyway... I'm afraid to be serious!"

This sentence is too true. In the Central District, people are always afraid to be serious.

As long as you are serious, someone will suffer!

Now, the four of them were at gunpoint, and they took the initiative to deliver them to the door.

The previous transaction Iwahira Nishi has been careful enough, but in this era when everything must be handled through the Internet.

No matter what you do, it will leave traces in the end!

What hackers, there are not so many hackers in this world.

Especially in the territory of the Republic!

Therefore, now that the traces have been left, it is impossible to eliminate them.

They have only two options, either run off the road or actively cooperate.

There is no way to hide, hundreds of thousands of hands, such a large transaction volume, all related to the four of them.

No matter how you explain it, it doesn't make sense!

"I think it's better to run away and go to the corrupt country." Yang Haodong suggested.

Trendy people, when it comes to playing, it is a good hand.

But it's the turn to resist pressure and courage, which is still a bit worse than the others.

"I'm not going to leave." Zhang Jingwen shook his head. "My foundation is here. Go to the corrupt country, what are you doing, waiting to die?"

"I agree with what Lao Zhang said. It's not that I don't know how messy it is outside. One day I might be smashed to death when I sit at home."

Yang Haodong turned his attention to Guo Shun, wanting his support.

"I'm not going." Guo Shun shook his head, and resolutely rejected his proposal.

Yang Haodong was a little desperate and gave up on himself: "Okay, then go take the initiative to explain, I will go now."

"and many more."

Iwa Pingxi called to him, "What is the urgency, maybe I scared myself?"

"Furthermore, this kind of thing is less than three years at most and a fine of 1 to 5 times is imposed. Doesn't it want you to die?"

Hearing what he said, Yang Haodong's heart was bleeding as he relaxed: "1~5 times, it's better to just kill me."

"Don't worry, how about letting a lawyer help you fight for the death penalty and depriving you of all your property?"

Seeing that Yanpingxi was still in the mood for joking, Zhang Jingwen and Guo Shun also relaxed.

Compared with fate, money seems less important.

The meat hurts back to the meat hurts, but if you really want them to go abroad, a few people are really willing to admit punishment.

There are now all monsters and monsters outside, and the group of demons dances around, reporting two or three digit deaths every day.

Run off?

It's not running away, it's going to die...

Just as they discussed how to deal with it, the door of the clubhouse was suddenly opened.

"Everyone, check the water meter!" Men and women in formal suits filed in, controlling the whole situation in an instant.

*

"A few of them?"

Seeing several people who were prosecuted and fined for illegal market manipulation in the news, Brother Yu suddenly became interested.

Judging from the information at hand, the four of them were just good at playing sideballs and were caught by bad luck.

Be measured and never touch the bottom line.

With strong self-control and rich management experience, they have been partners for many years.

Isn't this the right person you are looking for?

McKison is about to set sail with the fleet. This exploration requires not only force, but also mind and greed.

It is McKison's task to spread the seeds of miracles to the subspace.

But he is now a lonely man.

There is no one who can use...

The fact is that McKison wanted to choose a few right-hand men for the consortium, but Qin Yu refused.

It is important to preach miracles, and it is equally important to maintain the normal operation of the consortium.

As the man at the helm, McKison has left the Southern Consortium, and then transferred the most capable elites away.

The entire consortium will immediately fall into chaos!

The current BlackRock Southern Consortium needs chaos the last thing.

The problem was caused by oneself, and naturally needs Brother Yu to solve it.

He has been paying attention to the right candidates, the talents who can enter the company, and the miracle company itself is not enough to allocate.

Where can I get McKison...

Until he saw this news, financial criminals! !

Taking an adventure in an unknown universe is equivalent to a punishment of exile, and it happens to be able to use their experience and abilities.

Win-win!

Who should I call for this kind of thing? After thinking about it, Qin Yu decided to call Situ Hao himself.

In the Office of Government Affairs, Situ Hao is planning to attend the afternoon meeting.

Settlement center, speed car production plant, air network pilot, and the establishment of Titan Heavy Industries.

Each pile, piece by piece, requires the cooperation, coordination and communication of Yamen.

The miracle company is busy, and the yamen are not busy.

The past two years have been the busiest two years in Situ Hao's career.

But he didn't feel tired at all. Instead, he was full of energy. The whole person was like 10 years younger, full of vitality!

Looking at Sanqin Dadi in its own plan, with the support of Miracle Company, it is radiating new vitality.

The joy of that achievement kept pushing him forward.

Ringling~

As soon as I got up and walked to the door, the phone on the desk rang suddenly.

It was his private number, Situ Hao hesitated, turned back and picked up the phone.

Seeing the caller ID above, Situ Hao immediately dispelled the idea of going out.

"Secretary Wang, the meeting is temporarily postponed. Tell them I have an important call. Please be patient!"

After explaining, Situ Hao adjusted his emotions and pressed the answer button: "Haha, Qin Dong..."

Listening to Situ Hao's iconic bold laughter, Qin Yu also echoed a few nonsense.

"You are a very busy person. I don't dare to waste your time if there is nothing wrong with you."

"Dong Qin said so, it's a big deal. The development of Sanqin cannot be separated from the concerted efforts of you and me. We are a family."

"If you say that, I have to say, or I will invite you to dinner tonight."

"Qin Dong invited me, I will definitely be there." Situ Hao said quickly.

After a greeting, Qin Yu mentioned formally: "I am not going to the Three Treasures Palace without any problems, please help me."

"Dong Qin, if you have anything to say, it's my job to solve problems for the company." Situ Hao narrowed his smile.

"I just watched the news. Several people who illegally manipulated house prices were caught. I want some of them."

Listening to what Qin Yu said, Situ Hao had countless possibilities in his mind.

How many of them are related to Qin Yu, the other party is here to intercede?

According to the clues I have, there is no business relationship between the four of them and Miracle Company.

This is a bit weird, could it be someone else begged him.

This is the only possibility Situ Hao can think of.

Otherwise, what did Qin Yu suddenly find four economic criminals to do?

Should they be allowed to manage the company...

Haha, this joke is so funny!

"Dong Qin wants to protect them?"

Situ Hao pondered to get to the bottom and figure out the connection between them.

"It's not a guarantee, it's for other purposes."

While talking and laughing, Qin Yu told Situ Hao about his plan.

"This matter is not a secret in the company, and a team will be sent to join at that time.

I am not that no one is available. Just seeing the news and thinking about making the best use of everything is just a kind of punishment. "

Hearing his explanation, Situ Hao only felt that his five flavors were mixed, and for a moment he didn't know whether to cry or laugh.

Your method of making the best use of this thing is too cruel!

You have been sentenced to a two-year economic offender, and you directly distribute people to the outer galaxy...

No, the outer universe is gone.

Whether or not they can come back alive is a question, can they agree?

"Qin Dong, this can be done, but you have to seek their personal consent." Situ Hao thought for a while and decided to help him once.

Yang Haodong didn't commit a serious crime, but just happened to hit the eye-catcher. UU Reading www.uukanshu.com

Therefore, since he is useful, it is not a big deal to sell them a way of 'serving the sentence'.

Sent directly onto the ship and thrown into the outer space.

This punishment is more serious than being in jail for two years, that is, he must first seek the consent of the person involved.

Although the four are currently wearing the body of sin, it does not mean that they have lost their rights as citizens.

Even if Situ Hao is the highest official in the Sanqin region, it does not mean that he can decide the future, life and death of citizens casually.

Nowadays, the regional integration is in an eventful period!

The development trend of Sanqin was surprisingly good, and he didn't want to make any troubles at this time and give others a handle.

Even if it proves to be nothing, if the reputation is bad, you have to go to Qingshui Yamen for retirement.

The procedures that should be followed must have formal formalities.

Qin Yu must personally solicit their opinions, and leave audio videos and written certifications.

Finally, Situ Hao had to report to the inspection team at this time for filing.

Although I don't know whether this process is compliant or not, there is no such precedent before.

However, Situ Hao still had the courage to take on this controllable risk.

However, he must first verify the authenticity of what Qin Yu said between the subspace exploration projects.

At any rate, he is also an official in Xinjiang, he hasn't received any news before?

After reaching an agreement with Qin Yu, Situ Hao hung up and fell into deep thought behind his desk.

When he woke up again, it was already 10 minutes later.

The secretary came to remind him that everyone else was still waiting in the conference room.

"Today's meeting is cancelled and it is scheduled for tomorrow morning... By the way, let the Minister of Armed Forces come."

At this time, Qin Yu was already on his way to the detention center, he had to figure out the truth before the two sides met!
