Chapter 1031: Taboo

As a chief official in Xinjiang, Situ Hao had his own news channels.

Because of confidentiality requirements, no one would actively disclose it to him.

But since he took the initiative to ask, there is nothing wrong with mentioning it!

Besides, he still got the news from Miracle Company.

After Situ Hao figured out the situation, there was also news that Qin Yu had arrived at the detention center.

"Secretary Wang, you are now typing a document, and I will send you the content, and you will send it to you personally after finishing it."

*

In the detention center, Yang Haodong, who was waiting for the meal, lay melancholy on the bed.

He thought he had a chance to be chic for a few days, but he planned to take down the student girl tonight.

This time, it is really hopeless!

If I had known this, I stopped playing ambiguously and went straight to the horse.

Nowadays, I don't know who is going to be cheaper for the tender cabbage?

In the other room, Iwahei Nishi was leaning against the wall to look through the "Criminal Law."

Zhang Jingwen was asleep on the upper bunk, and his mentality was so enviable.

When robbing the battlefield, opening mountains, and expanding business, I hadn't seen any scenes before, didn't it last two years!

As for Guo Shun, the bed kept creaking, creaking.

He was hooking his feet on the bed, pushing his hands on the ground and doing push-ups.

Even here, he can't let him give up fitness. This is the only way for him to stabilize his emotions and maintain self-discipline.

If you give up fitness, it is tantamount to giving up your long-term persistence.

Then, he will start to become indulgent and decadent.

Losing self-control and calmness, he becomes irritable and irritable, like an angry bull.

Clang~

There was a knock on the fence, and the voice of a guard came from outside the door: "41974, someone wants to see you."

Guo Shun turned his head to look out the door, frog jumped out of the bed, put on his shirt and left the room with the guards.

Compared with repeat offenders, the attitude of economic offenders and the degree of security of guards are much more relaxed.

Like Guo Shun, you don't need to wear a silver bracelet when you go out, unless you are leaving the detention center.

The guard's equipment also only has a rubber roller. When the prisoner here goes down, he will fall to the ground screaming.

Although Guo Shun's body is strong, it looks like a special case!

But the treatment received here is no different.

As long as he can stand by himself, don't do stabbing.

Everyone can live in peace and peace!

On the way to the reception room, Guo Shun suddenly saw a familiar shadow, Yang Haodong.

When he saw each other, Yang Haodong also saw him.

But before the two of them could figure out the situation, Yanpingxi and Zhang Jingwen appeared on the other side of the corridor.

But they finally stood in front of the same door, and the guard pushed open the door to signal them to enter.

"What's the situation?" The few people looked at each other silently, thinking that someone wanted to settle accounts after Autumn.

But is the problem so serious?

I was flustered for a while, but Yanpingxi walked into the room calmly.

It's not that he has a lot of experience and takes life and death down.

Instead, they clearly understand the current situation, and they simply cannot make their own choice.

Since it's here, why bother at the door.

What's going on inside, you will know as soon as you look inside.

A table, opposite to sit a handsome young man.

There are four chairs side by side by the door and four bottles of mineral water on the table.

It's just that the young man Yanpingxi didn't know him.

"Sit." Seeing a few people file in, Qin Yu raised his hand and invited them to take a seat.

"Are you?" Yanpingxi took the lead to sit across from him.

Then Zhang Jingwen, Guo Shun took the seats one after another, and finally it was Yang Haodong, whose face was uncertain.

From this point, it can be seen that Yanpingxi is the principal of several people more often.

However, the information shows that they all respect Zhang Jingwen, the big brother.

The other party can walk from a country with mud legs step by step to today.

Almost monopolizing the building materials market in the Sanqin area, the means, courage, brain and courage are indispensable!

If not for the sweetness of quick money in the past two years, I want to save more for the prodigal sons before I retire.

He won't end up like this...

But in the end, it was the greed deep inside.

The feeling of making quick money is really on the top!

Otherwise, there won't be so many girls and young women falling into the water every day.

"Are you?" Zhang Jingwen repeated his companion's question.

Qin Yu smiled at them and said, "Everyone, I'm from Miracle Company!"

10 minutes later, Yu Ge walked out of the room with the required contract.

It is not that difficult to get them to agree to this matter.

As long as the punishment is changed to reward, going to the subspace is not exile, but to create the future of mankind.

"This voyage will surely be remembered by history, and your names will be known through the ages."

The unknown does not mean fear, but opportunity!

"Think about it, if you discover a brand-new planet, a colony... what a benefit it would be."

Make another ready-made pie and let them eat it hungrily.

"Miracle Company will contact your current industry, and we will start a new cooperation to become an innovator in the industry!"

Does your transportation team need a comprehensive intelligent navigation and monitoring integrated control system?

If necessary, it can take over the entire fleet, as long as a small modification is made and an electronic power assist system is added.

Sports career, do you know the speed car?

Kuafu Research Institute can transform it into a hoverboard. Are you interested in becoming an agent?

Lending?

No, no, this industry has no future, and the risks are high, so it's better to put the money in Lixin investment.

It will obtain the license of the settlement center and become the only designated exchange business point in the abandoned city.

That's right, you can open business offices in fourth-tier cities, urban and rural areas, etc., and you can make money just by formalities.

And your fashion brand industry, too hard.

Do you want to obtain official authorization from Titan Heavy Industries to do mecha peripherals?

What, I don't know what Titan Heavy does.

It doesn't matter, you only need to remember the four words "Mecha Peripheral".

Therefore, without having to squat for two years, you can go to outer space to expand your career.

Become a miracle company partner and be lured by benefits such as agency management rights.

The four of Yang Haodong were easily taken by Brother Yu

In the end, let them do whatever they want without any unnecessary problems.

Except for one, "How long are we going to go?"

Two to five years, at most this time limit will not be exceeded.

Get the affirmative answer, the four no longer have any questions!

In five years, the reason why Qin Yu was so sure was because there were no accidents.

The fleet will return to Earth to rest, and at the same time fulfill his promise to He Wu.

Although the four of them are not important at present, they are just a random move.

But He Wu is different. He is the most loyal friend and a valuable asset of the company.

Brother Yu can ignore other people's opinions, but he must consider his mood and thoughts.

Because he is worth it!

However, Brother Yu still had expectations for the four of Yang Haodong.

Otherwise, they will not be allowed to taste the sweetness of the pie first, and let them know how sweet the pie is.

Then, I will describe another bigger and sweeter pie to them.

It's somewhere in the subspace!

However, they need their own hard work if they want to eat this pie.

But this time, Qin Yu was the one who was sitting on the pie.

And, he wants to eat the biggest and sweetest piece.

Battleships, navigators, force, supplies, staffing and [Assaulters] are all in place.

Including the cumbersome Titan, which was dismissed by Brother Yu, was also ready to go.

There is no reason to continue to delay, the subspace exploration project has officially entered the countdown!

Let the four of Yang Haodong leave the detention center first, and give them two days to deal with their private affairs.

Brother Yu also informed Shi Cui to prepare before departure.

Whether their navigator has been tamed, safe and reliable, it all depends on Shi Cui.

After learning that Shi Cui left cute little tentacles in them, after testing it was confirmed that they could not be dispelled.

Brother Yu just wanted to say: Nice job!

Although it is a bit nauseous to think about it, this is the most effective guarantee.

However, Brother Yu decided to take another insurance before they officially set off.

"Old Ho, there are two days left, remember to deal with family affairs."

After personally informing He Wu, everything can only come in time.

After finishing the day's work, Brother Yu feels comfortable when he gets home, because the subspace exploration project is finally about to start.

Then he heard the quarrel in the living room, "I don't agree, you are still just a kid."

"We are already dating, you promised."

"This is different from what I promised."

"But it was said on TV that only by moving out can you grow into a real man."

"That's not for you."

"Are you against our love?"

"Yes!"

"Wow, forbidden love that is opposed, it's great!"

"...Old Qin, bring your belt, just now."

Chapter 1032: moose

Lao Qin's seven wolves were too lethal, and before he had time to ask them out, Brother Yu went upstairs with a small pumpkin.

After a while, I heard howling upstairs.

Liang Chuyu felt both distressed and gratified.

This child is getting more and more disrespectful, who did he learn from?

No, starting today, the home will be disconnected from the internet.

All access to the Internet was cut off for him.

Including the terminal his brother gave him, as well as those comics, electronic watches, smart terminals, PSP, and so on.

In the room, Qin Yu patted the pillow rhythmically, yelling loudly every time he patted the little pumpkin: "Oh~"

"What the **** are you doing to make mom angry?" Brother Yu asked helplessly.

The boy is harsh, but he can't solve everything by hitting.

Sometimes it's more useful to keep the meal than to hit the body!

"I want to move out."

Little Pumpkin sniffed and said, "I want to live in a tree house outside, with Mumu."

It has a future, but it's a bit early.

"We don't have a tree house." Qin Yu vomited.

There is a small tree in the garden, not to mention the tree house, the bird's nest can't stand it.

When the wind blew, even the bird and the nest were lifted.

"Big Brother, I want a tree house." Little Pumpkin pulled him to act like a baby, and shouted "Aoao" without forgetting to cooperate.

"If you want a tree house, don't think about the others behind." Qin Yu agreed to help him build a tree house.

As for moving out with my little girlfriend...

Boy, I didn't have this idea in high school, you are so promising!

"Then, can Mumu come to play?" Little Pumpkin looked at him pitifully.

In this family, you can bargain with anyone.

Only the eldest brother, if he said no, he was no good.

Sapo's shame will only make her little **** suffer. This little pumpkin has a deep memory.

Therefore, he has no idea of bargaining at all.

"You have to ask Mu Mu's mother," Qin Yu said.

"My sister is so beautiful, she will definitely agree." Little Pumpkin said earnestly.

Gee...

This little mouth is sweet to death!

"Okay, squeeze some tears quickly."

Qin Yu threw the pillow to the head of the bed, and the eyes of Little Pumpkin instantly burst into tears.

With his big watery eyes, the little guy pouted his mouth and went out aggrievedly.

This acting skill is a hundred times better than Xiao Xianrou!

Since Xiao Pumpkin had agreed to build a tree house for him, Brother Yu would naturally not break his promise.

The next day, I would find someone to buy a tree, cedar, which is more than a hundred years old.

You can build a tree house, watch it, and eat pine nuts.

One morning, I contacted a few forest farmers, but the answer was no.

Cedars that are more than a hundred years old must be found in the wild.

Whoever cultivates the tree species will stay for more than a hundred years, let alone whether it can be fed, the key is that no one will buy it!

To cultivate is also an ornamental, and work **** styling.

"Then find wild ones, go abroad and let Elizabeth go."

BlackRock now controls the entire West Coast and the south, and finding a tree shouldn't be difficult for her.

After receiving a call from Secretary Xu, Elizabeth was on her private plane.

"Cedar? The diameter is more than 30cm, and there are no special requirements for the shape. The boss wants to build a tree house!"

Elizabeth was full of question marks when she heard Xu Meixin's request.

What's up, who am I?

Elizabeth Fink, acting executive officer of the BlackRock Southern Consortium.

Millions are credited in every minute, to find a tree? ? ?

"Okay, I will find it and ship it to the central area as soon as possible." Elizabeth responded from heart.

No matter how unhappy, she can only agree.

Not only because Qin Yu is a major shareholder of BlackRock, he annexed the Southern Consortium with his help.

It's also because the lives of my father and daughter are now all dependent on the Republic.

The **** decides the head, and there can be the BlackRock Southern Consortium of today.

Relying on the absolute force and support provided by Miracle Company, they have a stable and harmonious rear of the Republic.

So, whether you like it or not.

The current Fink family has gradually become an affiliate of the Miracle Company and is increasingly dependent on it.

In terms of the most realistic, once the military support of the miracle company is lost.

The stable development of the West Coast and the South will suddenly become fragmented.

Looking outside, the North is now in chaos.

Civilization regressed, industry and commerce completely stagnated, and the East Coast region barely maintained order.

Refugees from the north and east flood into the southwest area every day.

From time to time there will be 'bad news,' Rockefeller Plaza fell into ruins a week ago.

Broadway has also become history due to the battle with the rebel and changer organization.

The family members of the Morgan Low Saint Rose Consortium are under threat of death at all times.

According to the latest news received, important members have hid in the bunker for nuclear winter protection, remotely directing the operation of the consortium.

Elizabeth couldn't imagine what fun there could be in that kind of life.

Compared to their tragic experience, he is simply in heaven!

Tree, Elizabeth's thoughts turned, she remembered that Angel Oak was in Charleston, South Carolina.

Instead of staying there and waiting to decay, I don't know one day to be ruined by the aberrations or mutants.

It would be better to give Qin Yu a gift!

As for the request of "Pine Tree", she has been naturally ignored by her mind-blowing thinking.

She had seen that tree with her own eyes, and it was more than enough to build a dozen tree houses on it.

Doesn't this smell better than the scent of pine trees?

Boom~

The violent shaking awakened Elizabeth and looked out the window sideways.

The black smoke of the wings changed her expression dramatically: "What happened?"

"Miss Fink, the aircraft engine was attacked and damaged. We have to make an emergency landing."
The captain came to the cabin nervously.

"Where did the attack come from?"

Elizabeth couldn't understand why she was attacked here.

"I don't know, there is no indication on the radar." The deputy captain said.

At this moment, an electric arc appeared in the clear sky.

Then countless arcs flickered and collided like a swarm of snakes, and in Elizabeth's sight, the space was torn apart by purple lightning.

In Honolulu, Elizabeth's special plane made an emergency landing in the nearby waters and was quickly spotted by the cruising fleet.

On the deck, Elizabeth was soaked in no hurry to clean it up.

Looking up at the sky in the far north, the flashing thunder walks and jumps like life.

Very quickly disappeared from sight, but left a haze in Elizabeth's heart.

The attack was not directed at her, Elizabeth was only affected.

But now she desperately wants to know what is happening in the north?

Far North, Alaska.

In the gorge surrounded by snow-capped mountains, men and women in ragged clothes knelt on the ground, kneeling forward with their hands flat.

The low, hoarse, strange tone reverberated in the valley, as if it had a certain magical power that made people sink into deep depression.

They formed a circle spontaneously, surrounding the tall and thin man with a big beard in the middle.

His figure is as thin as a bamboo pole, skinny, as if a gust of wind could blow him to the ground.

With numbness on his body, he made a hole in the middle, and the clothes he put on his body shook in the raging wind of the canyon.

But he couldn't let him waver at all, his collapsing eye sockets and eyes closed tightly, and there was a word in his mouth.

Suddenly, the man opened his eyes and shouted: "Praise Chaos!"

The prostrate men and women straightened up, raised their hands high, and looked up at the sky, shouting: "Praise Chaos!"

Boom~

After a loud noise like the collapse of the sky, the purple arc jumped wildly above.

After the dazzling white light, a huge light gate with a diameter of five meters appeared above the head, tearing the air.

The terrible radiation tilted down, arms raised, and the men and women who raised their heads and reveled more fanatically chanting "Praise Chaos."

Pollution is pervasive, the ground begins to be distorted, the veins swell up, and the withered grass grows distortedly.

A twisted sarcoma grows on the hands raised up to the sky, and a sickly ashes appear on his fanatical face.

Bang~

The scrawny man standing in the center exploded like a 'bomb warrior'.

The stench of blood was sprayed on the believers, as if igniting a sacred fire.

The valley at this moment is like an explosive depot scorched by sparks.

A series of explosions sounded, the crowd on the ground disappeared one after another, and the blood in the air became more and more dense.

There were no signs of life until the place was still there, and the air was dyed into Feimi's eerie and glamorous pink.

The diameter of the light gate suddenly expanded outwards, and it didn't stop until fifty or sixty meters.

Then, the roar of fear that caused the soul came from the light gate.

Wow~

Twisted creatures like dumplings fell from the light gate, forming a waterfall of flesh and blood.

咚咚~

The twisted creatures with their feet on the ground will not have time to see the world in front of them.
UU Reading www.uukānshu.com

The comrade who was dumped from above stepped on her feet, and the continuous 'flowing' weight pressed the monster below into meatloaf.

The broken flesh and blood flowed upwards, intertwined and twisted and spread out, and the ground where it passed turned into dry and cracked gray-black.

The breath of death that all things died out spread out from the valley.

A lost moose stumbled into the valley, and the dangerous breath in the air stopped it suddenly.

Looking up into the valley, the invisible radiation between his breath penetrated the body.

The black pupils turned into scarlet, and the body moved forward uncontrollably.

As the elk walked into the valley step by step, its body was also undergoing amazing changes.

The limbs swelled and enlarged, the antlers grew wildly, and the balloon-like tumors burst open.

The splash of thick juice was sprayed on the antlers, making a corrosive sound of 'Zizi'.

The shape of the antlers becomes sharp and sharp under corrosion, as if the thorns are intertwined and spliced wildly.

When the moose came out from the other end of the valley, its size had expanded six or seven times.

The sarcoma-like muscles entangled all over his body, and the huge mutilated antlers alluded to the scarlet green.

There was only madness and chaos in the protruding red eyeballs, and he raised his hair with a terrible cry, and ran towards the distance.

"What?" Elizabeth fell into a daze when she heard the news from her underlings.

"Fairban, no more." The subordinate repeated in a trembling tone.

When the satellite passed above, it was found that Fairban had turned into a dead city, and everyone in front of the screen couldn't help shaking.

It is the second largest city in Alaska, with more than 30,000 people living in it.

Now, there are only dilapidated buildings and bloodstained on the ground, and there is no living life in the whole city.

Chapter 1033: escape

At the same time as the tragedy happened, the dark creeping valley of living creatures attracted more creatures to step into the black and twisted flesh and blood.

It is like a pool of evil flesh, hatching terrible monsters.

Among them, it also includes human beings who break in unintentionally.

*

*

Barrow Far East is a vast land with abundant resources and sparsely populated areas.

Oil companies are investigating new oil wells, and the bears who have been working hard all day gather together.

Take out food and spirits and gather together to discuss life in the city.

Woman is one of the eternal theme.

Some meaty jokes even arouse boiling laughter and make the atmosphere of the party more lively.

Until a strange howl sounded from the darkness: "What is it, bear?"

"Whoever has a weapon, I just need a new pair of boots." The stocky man with a big beard and flushed face stood up.

His height is less than 165cm, but his whole body is full of powerful muscles.

A pair of sturdy short legs reminds me of a rhino.

"Dear Gomarel, the black bear will smash your pumpkin head."

"Haha, Gomarel is about to show his clumsy power again."

"Do you want to help? Gomarel, we will hold it for you."

"Or hold him, Gomarel, I will be very gentle."

"Ho **** ho ho..."

"Go away, you idiots."

Gomarie smiled and cursed and walked to the side. He lifted the sledge hammer that stood in front of the toolbox.

The hammer, which was about to be as high as him, was slightly funny in Gomarel's hand.

Don't underestimate his power!

No one is worried about Gomarel's comfort, because the bear may not really come out.

Even if he rushed out, there was nothing to worry about.

Everyone here has hunted bears before, and in their eyes the terrible bears are just prey.

"Eeee..." a low growl from his throat interrupted the atmosphere of the party.

This sound is not a bear.

"Hey, be careful, there have been quite a few weird things recently." The reckless man with thunderous laughter stood up.

The lush beard makes it difficult to see his appearance, and he only wore a short-sleeved overall.

Exposed his arms full of muscles like steel bars, letting the biting cold wind blow unconsciously.

As long as you see him, you feel safe.

The big red pipe wrench in your hand provides extra guarantee for this safety!

Even an adult black bear can't hold the force of his pliers on his head.

"Jimpsey, there are only us and the brainless beasts, you are too nervous."

"After all, this is the first time Gimpxi has been the team leader, man, you should have a few more glasses."

"Yes, let us sing!"

Jin Pushi didn't care about the ridicule of his peers.

He just stood with Gomarel and looked sideways, only to find that the other's face was full of tension.

"Gomalie, what do you see?" Gimpsey held the pipe wrench with his right hand tightly.

But Gomarel didn't answer him, looking straight ahead, the pupils dilated and dilated.

"Gomarel, Gomarel?"

Jin Pushi touched him with an elbow, trying to wake up the absent companion.

But his body leaned back instantly under the slight collision, and fell to the ground with a thump.

"Damn it, Gomarel?" Gimpsey knelt on one knee, dropped the pipe wrench and grabbed his neckline.

Shouting vigorously and shaking, trying to wake him up.

The rest of the people also gave up their enjoyment one after another, rushing forward and asking what happened?

"There is something in the darkness, it takes Gomarel."

After discovering that he had lost his breath, Kim Pushy stood up holding the pipe wrench with a painful expression.

"What did it do, what is that?" someone pressed.

"I don't know, but something must happen." Jin Pushi put aside his pain and looked towards the dark night.

"Everyone, burn the bonfire, find the right weapon, and prepare for battle."

With the uncooled corpse of Gomarel lying in front of him, no one would question Kim Push's order.

But how did it kill Gomariel?

*

*

Run, run...

Jin Pushi numbly stepped his legs forward, his breath full of tears.

Every time he gasped, he was like sucking in countless tiny blades instead of the air on which he lived.

The sharp 'blade' pierced the throat, poured into the lungs, and shattered it.

Pain, every second is like torture.

But always reminds Kim Push that he is still alive...

At this moment, he was the only one to move forward alone in the wilderness.

On the way to escape, the companions died one by one.

Someone fell to the ground silently like Gomarel and never got up again.

Someone suddenly screamed 'monster' like crazy, waving the weapon in his hand and smashing his companion's brain.

Riding on him, smashed the whole head into a pool of jam.

There were seven or eight people who died in the hands of their mad companions alone.

In the end, the only three people left decided to run separately.

"I don't know how they are now?" There was a faint hope in Gimpxi's heart.

Someone can escape back to the company and bring the news to everyone.

...Bring people back and collect their bodies for them.

At least, don't let their corpses remain in the icy wilderness and become food for wild animals.

"Huh~huh~"

The burning sensation in the lungs became stronger and stronger, and Kim Push knew that this was the limit.

The fragile organs are on strike!

Under intense exercise and long-term cold current, I can no longer continue to work normally.

Kim Push's lungs are like a water tank in a car.

Too high temperature will cause the entire vehicle to break down and be scrapped!

Boom~

Jin Pushi, in a trance, failed to notice the crater under his feet, and his right foot was just stepping on it.

The body, which was already unable to maintain, lost its final balance.

Lying on his side on the ground, Kim Push no longer had the strength to stand up.

There was a tragic smile on his face. I didn't expect this to happen the first time I led the team.

Should it be God's favor or torture! !

"Eeee~"

The grotesque growl came to his ears again, and he knew the **** monsters were still there.

However, he no longer has the ability to resist, even if he escapes for his life.

The voice was getting closer and Jin Pushi used his last strength and opened his eyes wide.

He wants to see clearly what the **** are those **** monsters?

Bang bang~

The crisp sound of gunshot suddenly came, and the low roar instantly disappeared until it disappeared completely.

Jin Pushi tilted his head laboriously and looked up. The silhouette of a speeding car in the sound of the engine made him close his eyes with confidence.

Four hours later, Kim Push, who had escaped by chance, woke up on the operating table.

The strange face with yellow skin beside him made him feel uneasy.

There are also tied hands and feet, which is not the treatment that normal patients should have.

"Who are you? Let go of me, where is my man?"

"Hey, what do you want to do to me, don't poke me with a needle, **** bastard, I will crush your cute little face."

"MD, let go... let go..."

Gimpxi, who kept cursing, only felt that his eyelids became more and more sleepy, until he fell asleep again.

"His physique is amazing." Qin Yu, who saw this scene with his own eyes, smiled brightly in the observation room.

The amount of medicine enough to sleep two people for four hours only allowed him to sleep for half an hour.

Fortunately, he has been sent to the operating table, otherwise a conflict will be inevitable.

Those fragile researchers will not be opponents of Jin Pushi who is stronger than the bear.

Hearing his compliment, standing beside him, the slightly older old Joe laughed loudly: "He is the best guy under me."

"Are you really willing to hand people over to me?" Qin Yu looked at him.

I haven't seen him for many years. Old Qiao is still so hearty and funny, but the business is getting bigger and bigger.

Nowadays, it is not only engaged in financial, arms and other transactions.

Even energy is also plugged in. He is the first one to obtain an energy survey license in the Far East.

This is not something that can be done with money, it seems that he has not been idle for these years.

"Of course, as long as he can survive." Old Joe nodded seriously.

Although somewhat regretful, Old Joe knew that this was the only chance for Kim Push to survive.

Only here can he regain his life after organ failure.

Besides, compared to getting a corpse.

Old Qiao thinks that being alive is more important, and...

He needs to know what happened?

This time the loss was more than just casualties for Old Joe.

Before figuring out what happened, the Far East project was completely shut down indefinitely.

The money spent by Lao Qiao does not stop, machinery, labor, and materials are lost to millions of dollars every day.

This is more serious than what has already happened!

"Don't worry, he will survive." In Qin Yu's answer, the operation officially began.

Running, running, and tormenting with endless fear makes Jin Pushi unable to stop.

In the darkness, evil eyes followed in his footsteps.

No matter where you go, you can't get rid of it!

But Jin Pushi was unwilling and unwilling to give up, as long as there was a trace of strength in his body, he would never compromise.

The strange thing is that no matter how painful he is, there seems to be an inexhaustible power in his body.

Until Jin Pushi stopped and sat cross-legged and waited silently.

The gaze that followed him, but disappeared in an instant.

The pain became more real, and Kim Push opened his eyes at this time.

"Yeah~" Kim Pushi let out a muffled groan from the tearing pain.

Looking down, the twisted flesh and blood squirming in his chest made Jin Pushi panic and want to retreat.

Cang Dang!

The operating table shook violently, and the restraint band restrained his movements.

Jin Pushi opened her mouth to shout, but there was something blocked in her throat, and she could only make a meaningless 'ahhh'.

Then, the white wall opened inward.

A doctor in a white coat walked into the operating room, still muttering, "This guy is as strong as a cow. It should be a few hours before he wakes up. It seems that he has to increase the dose again."

The needle pushed the white liquid into the body, and Kim Pushy, who had just awakened, fell into a coma again.

When he was awake for the third time, the restraints that controlled his limbs finally disappeared.

Sitting up again, Jin Pushi saw the mysterious white coat again.

The body suddenly rushed forward, and Kim Pushy stretched out his hand to lock the opponent's throat, and said threateningly: "What did you do to me?"

Tilting his head and looking at the bear in front of him, Shi Cui smiled and said, "Can you let me down first? Thank you!"

The polite and gentle tone made Jin Pushi unable to refute, and he let go of the palm that was holding his throat.

Chapter 1034: ID

It took half an hour for Kim Push to understand that he was no longer the former self.

He now has a brand new codename: Fanatic.

And he is no longer an oil worker, "Am I fired?"

This was Kim Push's first reaction. With a lost expression, he thought he had lost his job.

"No, just change job. Now you are a member of Miracle Company." Shi Cui patted him on the shoulder.

"In addition, we need to solve a little trouble." Signaling Jin Pushi to come with him, Shi Cui took him to the small meeting room.

"Mr. Qiao Lie." Jin Pushi was a little excited when he saw his old boss.

He finally saw a familiar face, and everything strange here made him panic.

"Gimpsey, let's sit down and talk." Old Joe nodded with a smile.

Jin Pushi glanced at Qin Yu beside him, and waited quietly after sitting opposite the two.

"I need to know, what is going on there?" Old Qiao asked straightforwardly.

He needs the truth, no matter what is there, it needs to be resolved as soon as possible.

With millions of losses every day, even he couldn't bear it for long.

"I don't know." Kim Pushy looked complicated and recalled the experience that day.

So everything is like a nightmare.

From beginning to end, he didn't see anything, only that one of his companions fell to the ground.

Or madly smash his companion's head and insert the tool in his hand into his heart.

In short, everything is messed up.

It could be heard in Qin Yu's ears, but there was a familiar feeling.

Chaos, visual pollution!

"Boss, make an emergency call on the West Coast!" Shi Cui said with a weird expression while pressing the headset with his hand.

"Come in." Qin Yu listened to the news from the earphone, and his expression gradually matched that of Shi Cui.

A city with more than 30,000 people turned into a ghost town like this?

There are no traces of thermal weapons, no signs of life.

There is not even a corpse!

Only the incomplete ruined city was as eerie and terrifying as it had been washed by blood.

"Let Mark lead the team to find out what happened."

Mark is currently on the other side of the ocean, responsible for RRT daily training and personnel selection.

It must be impossible to conceal such a big matter.

Elizabeth didn't want to hide it. The public news on the West Coast and the South covered the incident that afternoon.

The murder of the city, panic spread among the crowd.

BlackRock announced at this time: recruiting special talents.

As long as you have a craft, you can enter the west coast and southern regions and obtain a temporary residence permit.

The old ID of the Bald Eagle has completely become a thing of the past.

The BlackRock Southern Consortium was the first force to publicly abolish ID.

All local citizens can take their old ID and go to the registration office to exchange for a new identity residence permit.

Outsiders who obtain residency qualifications can exchange for a temporary residency permit with a work certificate and old ID.

Those who fail to complete the replacement within 15 days will be expelled.

Rebel, die!

In troubled times, we use heavy codes, and any extra kindness is cruel and irresponsible to ourselves.

But before really realizing what happened, someone had a fluke.

Until a self-confessed benevolence, he offered help to free people who did not want to change their ID.

The staff who evaded inspection by the search team and arrested were reported, and the whole family was deprived of the right of residence after they were driven out.

The progress of the matter has become exceptionally smooth.

Next, there is the Morgan Lowe Saint Rose Consortium in the Big Apple City.

The old ID is also abolished, and a new identity certificate and residency registration are replaced.

At present, the two consortiums represent the strongest power in the country, occupying the west coast, south and east regions respectively.

The Midwest, North and Mid-south regions are in a state of chaos.

Local forces and financial groups are fighting each other, and the freedom fighters hold high the banners and become flat-headed brothers to see who is right.

Only strength is the standard for measuring rights, and various armed groups have become independent.

The most powerful of these is the Freedom and Glory Organization established by the former National Guard.

They were the first to explore the north.

When Mark was about to leave, their camp in the north had arrived at the scene.

Searching the whole city carefully, someone found a clue.

There was a **** footprint along the edge of the city towards the far north, and they decided to trace the footprint to find out the truth.

At this time, the RRT team led by Mark had just arrived in Fairban.

"Someone has been here." The chaotic new footprints on the ground are unpleasant.

They destroyed the integrity of the scene and made the search difficult.

However, they still found the **** footprints on the edge of the city smoothly.

"What does it look like?" Mark knelt on one knee, stroking the dents left by his footprints.

"Some are like deer hooves, but they are not the same." said the man with rich hunting experience.

"Are we going to catch up? Captain."

Mark raised his head and looked into the distance, thick clouds were brewing.

"You stay here, the assaulter will act with me." Mark said.

Because of time constraints, they did not wear [Xingtian] weapons.

Mark had a bad feeling about the mission, he smelled a familiar smell.

Therefore, to avoid unnecessary casualties.

He left the RRT members in Fairban, and he and two [Assaulters] went to track their footprints.

After they left, RRT members began to search the city carefully and build temporary camps.

"Guess, when will those tin cans take away our jobs?" Black brother grinned.

"Do your job! Phil, otherwise you will lose your job when you come back." Colaeno wiped the gun body expressionlessly.

"Don't you worry? We are the best, but now we can only stay here and carry sandbags."

Philip spit out, but the work in his hands did not stop.

In this **** world, it is everyone's dream to have a stable job and a safe residence.

No one wants to move out of the West Coast, let alone their families lose their bread and hot milk.

"Compared with the assaulter?" The little Bubo mocked.

Although he also didn't like those iron bumps, he knew that it was the existence of these robots that ensured the safety of the West Coast.

"Hey, I'm a mortal womb, how can it be compared with steel, don't forget that they are also created by humans."

Philip's point of view did not receive a response, everyone was busy with their own work.

Until night fell, Mark still failed to return.

"It seems that we are going to spend the night here." Fei Li started nagging again.

But his words were quickly interrupted, and a strange voice came from around.

Click, click!

It's like the sound of high heels hitting the ground, but there are only them, where are the women?

Coleno looked at Barber and Philip, the tension in his eyes was particularly obvious.

The palms holding the weapons tightened, and everyone crawled in front of the temporary position, staring in the direction of the sound.

The black shadow appeared in the darkness staggeringly, moving forward a little bit.

The body is like a jumbled pendulum clock, shaking around.

Then came the second shadow, the third, the fourth, fifth, and sixth...

Dense shadows came from the darkness, and when they approached, they finally saw their appearance.

With just a glance, Philip retracted his head, pale and wanted to vomit.

"Glasses, I need protective glasses." Philip said in a low voice.

"Damn it, it's radiation!" Seeing what he looked like, Barber quickly found his glasses and put them on.

The cold touch dispels the feeling of vomiting inside.

Barber and Coleno also wear glasses to combat visual pollution.

"It's an aberration body." Looking again, Colleno recognized the shaky shadows.

Distorted, distorted, irrational, and aberrant who only knows **** and gluttony.

It's just that the amount is scary.

Colino can't figure out where they came from.

Before leaving, they clearly searched the entire city. Although they weren't so careful, they didn't see any trace of aberrations.

Now, they just popped out so abruptly.

There are no signs or predictions!

"The sewer." Barber said, "I think they must have been hiding in the sewer before."

"I guess we found the missing bodies." Philip pointed to the deformed body passing by not far away.

The torn police uniform on the opponent carried the logo of the Fairban Police Department.

"Although there are many of them, they are not enough for 30,000 people," Colleno denied.

He didn't know why he didn't want to admit it, maybe it was the terrible consequence of the truth.

If the residents of Fairban really all become aberrations.

And what appeared in front of us was the only one left, so where did the rest go?

There is only one explanation. They left here and scattered all over the north.

"This is the worst news I've ever heard in my life." Philip murmured silently.

"What do you do now?" Barber looked at Coleno, just like everyone else.

As the interim captain in Mark's absence, they need Colleno's orders.

"Pass the news to the headquarters, and then... follow up." Colleno made a difficult decision.

He wants to take the risk to find out where the aberrations gather and find a way to catch them all in one go.

At the same time, Mark, a hundred kilometers away, also found his goal.

A weird creature with terrifying sharp horns like a magnified version of a buffalo.

It was standing on a pile of corpses, tearing the flesh and blood with sharp corners, as if looking for something.

The remaining clothing on the corpses indicated that their identities were the members of the Freedom and Glory Corps who had arrived earlier.

Chapter 1035: source

Perceiving someone showing up, the moose raised his distorted face.

fishing out of the eye socket, a nerve-dangling eyeball wobbled wildly.

Nerves are beating like living things, and the eyeballs turn in disorder.

The original position of the nose was knocked out by a crack full of granulation.

The mouth split upwards to the back of the head, making people wonder whether they can swallow an adult if they are opened to the extreme?

antlers flashing green fluorescence, giving people the illusion of sharp and decayed opposition, made Mark vigilant.

"Try it." Mark looked at [Assaulter] on the left.

The light of the electronic eyes bloomed, and the jet port pushed [Assaulter] to gallop forward, appearing in front of the moose instantly.

squeak~

The harsh metal friction sounded, and the next second [Assaulter] flew back.

Right in front of its chest, a bright green scratch exudes a coquettish light.

Its antlers actually scratched the titanium rhodium alloy?

"It's incredible." Looking down at the scratch on [Assaulter]'s chest, Mark suddenly discovered something new.

Those bright green luster is like living liquid, seeping deep into the cracks.

They are like a kind of unknown microorganisms that cannot be understood, scrambling to get into the body of [Assaulter] along the cracks.

But obviously, deer antlers can cut through the titanium rhodium alloy, which does not mean that the 'microbes' can do the same.

They can only struggle in vain in the rift, struggle...

A few seconds later, it withered and died like a lack of nutrients!

Mark heaved a sigh of relief when he saw this scene, at least it's dangerous but not fatal.

If those "green microorganisms" can really break through the titanium rhodium alloy, the problem will be troublesome.

After noticing that [Assaulter] was unscathed, the fallen moose seemed to become angry.

The front hooves covered with spore-like muscles plowed the ground restlessly, ploughing the soil in a mess.

At the same time, he lowered his crooked head and pointed the sly antlers forward.

da~

The fallen moose attacked the three of them, using their antlers to pierce their bodies thoroughly.

In the next second, the swooping body stagnates in place.

stepped on the hind hooves on the ground and was entangled by the tentacles covered with fleshy whiskers.

Mark's legs melted at this moment, and while his body fell, he entangled and clung through the tentacles of the moose bound underground.

a circle of tentacles covered with fleshy whiskers, from the hind hoof to the thigh, and then to the body, spreading towards its head.

At the same time, the fleshy whiskers on the skin are like countless small greedy mouths tearing apart the moose's skin.

They crazily pierce the front end of the fleshy whiskers into the wound, spreading and growing like roots.

The slender hair-like beard is tightly attached to the flesh and blood, devouring everything.

Flesh, energy, radiation, whatever...

Both legs disappeared in place, like Mark with a dwarf piled on the ground, his expression full of intoxicating enjoyment.

He could perceive that his strength was increasing, and the energy in the body of the fallen moose was constantly pouring in.

The most primitive pleasure makes him unable to control his sanity!
more and more.....

The entangled moose, from the initial angry resistance, to the quiet later.

Then his eyes stopped swaying dully, and he had to stay where he was like a puppet.

The only change was observed by the [Assaulter], a steady stream of invisible radiation passed through the ground into the moose.

was subsequently plundered and absorbed by Mark.

The radiation comes from behind the mountain, but no one notices it.

In the valley, the black ground veins squirmed faster, as if they were stimulated.

shuttles and twists between the surface and underground, sending the radiated energy into the moose.

Powerful makes Mark lost, and his consciousness floats under the thrill of unlimited growth of power.

The thoughts in his mind are getting weaker and weaker and stalemate.

Until the brain is about to lose its function, I just want to be immersed in this kind of pleasure that reaches the soul forever.

The source of the energy suddenly disappeared, and Mark suddenly opened his eyes and glared forward.

The head of the moose and the tentacles wrapped around it were cut off neatly and dropped to the ground.

The moose loses its head, and the energy in its body is quickly dissipated.

Until its twisted body, it dried up and cracked under the sucking of its fleshy whiskers, and only a fist-sized flesh ball fell to the ground.

Duangduangduang bounced a few times and rolled aside.

Looking at [Assaulter] not far away, Mark suppressed his inner anger.

He knew that his state was wrong, that kind of pleasure and endless power almost made him completely lost.

If it weren't for [Assaulter] to cut off the energy source in time, his thinking would be assimilated with radiation and he would lose consciousness completely.

At the same time, he also knew very well what the actions of [Assaulter] represented.

Don't forget, they are all controlled by the 'same person'.

"Captain Mark, please return to the Gold Coast for mental testing." The [Assaulter] on the right made a cold synthetic sound.

"Understand, I will bring back the body." Mark replied.

"Thank you for your dedication to the company and look forward to your return." The electronic eyes are dim, which means it has left.

Maybe not, and Mark can't figure it out.

Actually, it doesn't matter, because what the electronic eye sees will be recorded.

As long as the company needs, they can call it for viewing at any time.

He only knows that all he needs to do is bring the corpse...

The remaining corpse meatballs, return to the Gold Coast as soon as possible.

Because it takes too long, the higher the risk level of mental testing.

also means trouble, and trouble means more time.

In other words, he has to stay in the testing room longer, fill in more questions, and complete more tests...

Anyway, it sucks!

"Take it, let's leave."

Mark looked into the distance, as if there was something attracting him.

But his mind is all about returning to the company as soon as possible to complete the test.

So, Mark perfectly avoided the biggest gain!

After blocking the valley of vision, the fast-moving ground veins and flesh returned to their original sluggishness again.

The breathing-like contraction remains as it is, and it twitches slowly every few seconds.

As if the things that made it interested have disappeared.

*

*

Learned that Mark hunted an unseen deformed body, powerful and grotesque, capable of breaking through the defense of the titanium rhodium alloy.

Qin Yu immediately ordered them to return the body and the wounded [Assaulter] to Miracle Town.

"Boss, do you want to go out?"

Lying on the bed, Xu Wanwan, with pink complexion, rested his head lazily and elegantly with his hands.

She really remembered that, fighting for a better performance in front of Qin Yu.

But the legs are just like being injected with anesthetics. They don't need any strength at all. 'You should strengthen your endurance and physical strength!'

"Take a good rest, I will find time to come again." Qin Yu said with a smile and put on his shoes.

"Well, I'll wait for you." Xu Wanwan Nuonuo said: "Boss, love you!"

Finger pen refill, Xu Wanwan squinting one eye is full of sensibility.

Qin Yu, who was about to go out, hesitated, returned to the bedroom, and kissed her head before leaving again.

This kiss made Xu Wanwan happy.

The sweetness in my heart overflows, making the whole time become fresh and bright.

Inside the parking lot, strangely shaped and eye-catching ghosts are ignited.

The front headlights turned up and drove out under the roar of a violent engine.

"Fuck it~"

The guy who was parking was taken aback and shouted: "I'm sick!"

When the Lamborghini yellow ghost passed by him, the previous anger instantly turned into worship.

"Fuck, so handsome!"

Hearing the other party's whisper, he took out his phone pretending to be indifferent, and turned the camera to the rear of the car for continuous shooting.

Brother Yu in the cab shook his head and chuckled, stepping on the accelerator and driving into the exit.

Arrived in the brightly lit miracle town, the trails and parks are full of people walking and children's laughter.

This is the time for activities after dinner, and the whole town is more vibrant than during the day.

Only at this time, the town looks normal.

There is no one in the daytime.

A small town with countless machines running automatically, more like a machine factory under the intelligent control of AI.

Take the rail car to the Central Information Processing Center and enter the elevator down.

When Qin Yu rushed to the core experimental area, Shi Cui was already standing frantically in front of the 'meat ball'.

In his hand, the electric drill hummed.

Then, Qin Yu saw him aiming the electric drill at the 'meat ball,' splashing blood and meat foam on his body.

was blocked by the protective clothing and transparent mask he was wearing, and the upward arc of Shi Cui's mouth became more and more exaggerated.

Looks like... something has been discovered?

"Doctor, I want to know the latest development." Qin Yu said while pressing the pager on the wall.

"Carrier!" Shi Cui whispered.

"what?"

"The fallen moose was parasitized. It is the carrier of power, just like the core of the assaulter.

All sources of power come from it. I can feel, what is it hiding? "

After listening to Shi Cui's explanation Brother Yu asked with a bright expression: "You mean, the distortion has the core?"

The aberration they caught earlier is full of radiant power, but they can't find its source.

Even with the brain and the heart, nothing was gained!

"No, it was made, and the real source is not it." Shi Cui stood in place with frowning brows.

muttered in his mouth, 'what the **** is it, how does it transmit power, why is there no response now? '

"How are you sure?" Qin Yu asked again.

"Because it is too weak."

Shi Cui Duding raised his head and looked at Qin Yu in the observation room: "Moreover, there is no trace of residual energy in its body."

"Maybe it was absorbed by Mark." Qin Yu had read all the detailed records on the way there.

"Even if it is absorbed, it should leave an indelible mark as a source of energy, unless it is destroyed.

But it was neither destroyed nor left in the slightest sign, which shouldn't be. "

"Unless, energy is only transmitted through it, just like a relay station, which is only responsible for transferring and transmitting power to the parasitized person."

"If this is the case, Captain Mark's experience can also be explained. He is not absorbing the power in the moose."

Shi Cui once again regained the elegance of the past, pushing down the frame and said firmly: "Only the source can produce endless radiation."

Chapter 1036: asshole

After a lot of scrutiny and countless neurologically weird problems, Mark can finally leave this **** room.

Only when he opened the door and saw the person standing in front of him.

Mark suddenly felt that it would be better for him to go back again.

Shi Cui, He Wu, McKison, and Jin Pushi, who is in urgent need of actual combat experience and understanding of his own power shortly after the transformation.

Along with Mark, there are 20 [Assaulters] to go to the place where the battle took place.

Apparently everyone has forgotten that there is also an RRT team in Fairban.

At this moment, Coleno is leading his team members, lurking in a muddy puddle on either side of the entrance to the sewage pipe of the muddy city.

They arrived here by tracking the distortion. When Coleno saw the four or five meters high underground pipe, he couldn't help cursing FK secretly.

I really don't understand why such a huge sewage channel is built here.

A town of 30,000 people, are you serious?

"Head, what should we do?" At this moment, no one was joking and joking.

If it is discovered by the distortion inside, the only result is that the entire army is annihilated.

No one would make fun of his life...

"Can we blow up the exit?" Colleno asked.

"No way, we only have these." Barber raised the gun in his hand and smiled bitterly.

This is not the same as planned, their strongest 'firepower library' was taken away by Mark.

Until now, I haven't seen him.

"Have you contacted the headquarters?" Clino asked again.

"No, there is a strong interference here!" Philip, lying on the ground, shook his head gently.

The air is full of strange disturbances that he has never seen before.

Could it be that aberrations have also begun to learn to use the power of technology? ? ?

shook his head vigorously to drive away the absurd thoughts in his mind. Philip thought it was more like a trap.

"Is it possible that people from other forces did it? I remember that the people in the White House have been active in the north."

"Do you think it is them?"

"There is nothing wrong with imagining boldly."

Coleno is a little bit undecided if this tragedy is really man-made.

Then, the situation will only be worse than it is now.

And their situation has become precarious!

Because, before they knew it, they had already stepped into the trap arranged by each other.

"I came with a pretend if I knew it." Barber said regretfully.

If there is a [Xingtian] mecha here, they still need to worry about how to destroy the exit.

Just two shoulder cannons, or just a cannon fire to wash the ground!

All the problems and troubles are solved.

"Coleno, you need to decide quickly, shall we leave or continue the mission?"

Philip looked around and urged, he sensed the danger.

No matter what decision Coleno makes, just leave here quickly and let him do whatever he wants.

"Let's go in." After a few seconds of hesitation, Coleno decided to enter the sewer to find out.

As RRT, this is their duty!

Coleno is very clear that if you turn around and leave now, there will be loopholes in the report later.

Until then, all of them will not be able to escape being punished!

Slightly, wages were deducted, downgraded, and equipment recovered.

was driven out of the company and became an ordinary citizen for his own sake.

No matter which one it is, they cannot accept it.

Without wages and equipment, it means that they cannot maintain their original lives. The next task is their own death date.

drove out the company, it means that the high-end apartment currently living in will be taken back, and the family will once again live on the street.

From their continued point of view, if you want to buy a house of your own, you can only have the chance in the next life.

Because the house price is too high.

An apartment on the border, a house that no one wants to live in before the bald eagle disintegrates.

Current price: \$500,000! !

Also, there is no back garden.

Yes, not at all.

was supposed to be the location of the garden, and built another house for sale.

This place has become as crowded as the Big Apple City, with high-rise buildings rising from the ground, and it's thank goodness to be able to live in an apartment.

As RRT members, they are fortunate to be able to get a free high-end apartment.

24 hours hot water, room service, the strictest security system.

These are all benefits given by the company, and what they have to pay is loyalty and dedication.

Coleno can choose to escape, but he knows that the solution will not be easier.

There is always a way for the company to know what they have done.

Yes, every time is no exception!

"I agree, just let me leave here quickly."

As soon as Coleno gave the order, Philip rushed forward with his weapon in his arms.

The others only regarded him as impatient.

After all, Nico is famous for his anger and irritability.

Only Barber seemed to perceive something, and looked back nervously before entering the sewer channel.

Barber disappeared in the dark tunnel until someone urged him to keep up.

just a few minutes after the RRT team left.

Two men wearing full protective clothing appeared at the entrance of the tunnel, looking at the dark entrance and exit.

"They went in."

"Yes, although a little unexpected, it is more perfect than planned."

"Now we have more detailed experimental data, I hope they can hold on for longer."

"But they are from BlackRock."

"What does it matter? Who knows what they experienced, this is just a tragedy."

"Yes, it's just a tragedy!"

During the conversation, the two turned and walked in the direction they had come.

The tranquility was restored again before entering the water channel, but there was some inexplicable breath in the air.

Dangerous and fatal!

*

*

At the same time this happened, Yu Ge was being blocked in the corridor by Ya Lan.

"Do you know what special day is today?" Yalan embraced her arms and asked with a smile on the wall with the world in her mind.

Brother Yu only froze for about 0.1 seconds before he got the correct answer.

Tanabata, Valentine's Day!

So, damn, he forgot the gift.

This is unforgivable, why no one mentioned it to him.

I blame it for being too busy this time!

Actually, he has only half a day to rush to the moon base.

The Medusa is about to set sail. If it weren't for the sudden change of the Bald Eagle, he would have stood there now.

"Chinese Valentine's Day, Happy Holidays!" Qin Yu responded with a smile, full of confidence in his words.

"So, did you prepare a gift?" Yalan looked at him unexpectedly, with curiosity in her eyes.

"Of course, a 188cm strong man with a six-pack waist!" Qin Yu opened his hands.

Yalan was startled at first, then shook her head and exclaimed: "I didn't prepare for anything, but I can still be so confident and romantic."

After finished speaking, she rushed forward to save Qin Yu and sent a hot kiss.

The badness of this man is full of magic!

Even if he knew he had forgotten, he didn't prepare for anything.

But the smartness of adaptability is still a joy.

"I must have been a demon." Feeling the heat in his breath, Yalan gave up resisting to enjoy.

Brother Yu also feels good about himself, he is so talented.

can be when he sees a well-decorated room.

When parked in the garage with a brand new Lamborghini Estoque with a red bow tied to the front of the car.

The feeling of being well-being turned into "I'm such a bastard!"

It's too late to say anything at this time.

Brother Yu can only use actions to let her feel her love.

So, the dining table and food that Yalan spent three hours carefully arranged were destroyed.

But she got a wonderful night, better than she thought.

"Thank you for the present."

In the early morning, Qin Yu, who hugged farewell, shook the key in his hand and said with gratitude.

This is not just a gift, it contains Yalan's heart.

I remembered that I just said something in front of her, Estoque looks really good.

And she gave it as a gift to herself during the Chinese Valentine's Day.

This heart is far more valuable than Estoque!

Now, he is going to drive this car to work.

Because this is exactly what Yalan wants him to do...

"I should thank you." Hugging his waist, resting his head in his arms.

Listening to the strong heartbeat, Yalan said softly: "I should thank you, Qin Yu, you let me have my life again."

She used to live only for Tongtong and work.

What happened before her eyes and last night was the life she wanted.

"We still have a long time, trust me, it will be longer than you think."

Qin Yu smiled mysteriously, turned the key in his hand and walked out of the door.

bright silver metal paint body, beige elegant interior, with volcanic ash instrument panel.

This car is not a mass-produced model, but is specially customized by Yalan.

Although it has not been mass-produced, it still cannot change the uniqueness of this car.

Lamborghini has been emphasizing that it will launch the Estoque series.

time can be pushed again and again, Yu Ge believes that one day it will become a brand new mass-produced model.

is a more practical coupe series, just as it is positioned against Palamela and Light Field 7.

But even so, no one will look exactly like his car. U U Reading www.uukanshu.com

Because he was on both sides of the center console, he saw his name spelled: qinyu.

V10 engine, multiple control options, four doors and five seats.

Although it will be a bit crowded, because the middle seat size is limited to children.

However, it is still as handsome as Brother Yu thought.

Insert the key to activate.

Qin Yu reached out and pressed the ignition button of the fighter jets on the center console, buzzing...

The hot blood that comes with the V10 immediately ignited this cold machine.

Driving the brand-new Lamborghini Estoque, Yu Ge enjoys the usual super high rate of turning heads towards the town.

When he saw Hua Sen and others in the conference room, Brother Yu knew that bad news was waiting for him.

"What's the matter?" Qin Yu walked around the table to his place, and Qin Yu sat down calmly.

"...The RRT team going to Fairbank lost contact. It has been 20 hours so far."

"Ilibela sent people to find them and found two bodies in the city sewer..."

咚!

Qin Yu's fist hit the desktop hard, and said, "Why is this happening?"

If they died gloriously because of battle, nothing is wrong!

Brother Yu won't even blink his eyelids, because this is a duty and their due responsibility.

But when the problem arises from a mistake, it is much more complicated.

Chapter 1040: baptism

Why was there no support? Why was there no one to notify the team when Mark evacuated, and only sent someone to look for it after 20 hours of losing contact.

Looking for a corpse?

I found it and did a great job!

"Qin, it was my fault. I only paid attention to Mark's mission and forgot the team he led."

Fink appeared in the projection, confessing his mistake blankly.

But his plan to take all the responsibilities onto himself, I'm afraid he will fail.

"Responsible for the on-site command of this operation, Captain Mark was downgraded to one level and paid out his salary for the whole year as compensation.

The rear commander was downgraded to three levels, and the liaison officer and related personnel were deducted half a year's salary and down to two levels. "

At this moment, the commander who was staying in the meeting room with Fink, did not appear in the projection.

When he heard that the punishment for himself was to be downgraded to three levels, he almost collapsed and fainted.

three levels, which means that he has fallen from management to the level of ordinary staff.

Salary, treatment and permissions are greatly affected!

But he can only stand in place with his trembling body, expecting Fink to say something.

"I see." Fink's answer made him despair.

This mistake, he should have assumed the greatest responsibility.

As the commander-in-chief of the mission, every detail must be considered.

When Mark takes away [Assaulter] based on the situation, he should provide support for the RRT.

But he did not, because according to the feedback, Fairban is not dangerous.

Mark returned without notifying the RRT team.

Lost the signal and did not send a plane to check and restore contact.

Until 20 hours later, I still remembered this elite team under the reminder of the liaison officer.

A commander like this has been destroyed by a bullet when placed on the real battlefield.

MD, does he think he is having a party?

"Fink, RRT is the company's fist facing the outside world. Most of the time, it is used to solve problems with strength.

Don't treat it as dispensable, I am very optimistic about the development of RRT, and I hope you do the same. "

Fink knew that this was telling himself that he valued RRT and it was also a beating.

If he had just been rescued, Fink would yell "Watfak."

Now, "I understand, Qin, please rest assured that this kind of thing will never happen again."

Qin Yu nodded, and then issued a new order: "I want to see people when I live, and I want to see the dead when I die. If you turn Fairban upside down, you will have to find the others."

Also, no matter what kills them, anyone who dares to hurt RRT has to pay.

Fink agrees very much!

According to Qin Yu, RRT will be the front of the BlackRock Southern Consortium and Miracle Company in the future.

Now, the facade is rattling.

If they don't react a little, the outside world thinks that BlackRock is weak in swallowing the Southern Consortium.

As for those players, Fink will try his best to find them anyway.

Even if it's just a mutilated body.

protect short, but the characteristic style of Miracle Company.

"The follow-up progress of this matter will be handed over to Watson. Now let's talk about the source."

After dealing with the punishment and mistakes, Qin Yu wants to know the progress of Shi Cui and others.

The screen turns to the first angle of view.

This is an electronic record of a certain station [Assaulter]. What they see is a scene that has already happened.

straight along the mountain road, and soon came to a mountain.

Mark pointed to the front, indicating that this was the place where the moose was fighting.

Then, [Assaulter] spread out to find the target.

Soon, they were attacked by an aberrant body.

There are wildlife, humans, reptiles, and even marine life.

The impact here is far beyond everyone's expectation. Two big tongs with sarcoma are waving like a hammer.

The king crab the size of a calf is an eye-opener for everyone.

During the battle, two [Assaulters] were destroyed, including the sight they were watching.

The screen jumped instantly, and Qin Yu saw a deformed body inserting his hand into the back of [Assaulter], penetrating its power compartment.

These aberrations are stronger than those I have seen before.

is not one point, but a lot!

Those aberrations that transform under the energy storm, and the aberrations that are being observed in front of you.

The difference in strength is like a child and an elite warrior trained by the devil.

"Has this deformed body been caught?" Qin Yu asked.

"Caught it, on the way back to the base." Watson said.

The titanium rhodium alloy, which can resist any known weapon attack in theory, was penetrated by one hand.

This made Qin Yu full of curiosity about how it did it.

Regular attacks cannot be done by strength alone.

Therefore, this aberration must have its special place.

Plus the moose that scratched the surface of the titanium rhodium alloy, the power they used.

What is the difference between the radiant energy of the ordinary distortion body?

Qin Yu had a huge question in his heart, maybe finding the answer can help them better understand the subspace.

"Fast forward to the source of discovery." Qin Yu nodded and said.

The screen flickered rapidly until [Assaulter] climbed the mountain.

The mountain that blocked the view fell below the foot, and a disgusting and terrible scene appeared in the picture.

In the huge valley, the land is scorched and twisted.

I don't know if it is soil or flesh and blood thick glands.

is like the legendary earth dragon turning over and messing up the earth.

When Shi Cui and others appeared, Ben's still calm ground pulse moved frantically.

squirming quickly, spinning the shuttle up and down on the ground, like a mysterious machine running at full speed.

Zizi~

The screen flickered, [Assaulter] was affected by soaring radiation pollution.

At the same time, Mark's repressed panting came in the picture: "Leave here, it is trying to influence our thinking."

Ishichoi's voice appeared, "Stay back."

The screen flies, and when it slows down again, they have already retreated to their previous positions.

"To build a temporary camp, I need time to do research." Shi Cui said, spreading his palms.

In his palm, a black flake is breathing.

That was the sample deducted from the ground vein before he left.

The picture ends here, and Zhu Ying stepped forward and concluded: "Now, Dr. Shi Cui is still in the temporary camp, studying the nature and changes of the ground veins, and the rest are escorting the subject back on their way."

Valuable living aberrations, and those more common corpses, are all on the shipping list.

"...After returning, the subspace program will start as usual, and we need more information."

Passive beating is not Yu Ge's style. They need to take the initiative to win this war.

That's right, in his opinion this is the harbinger of a war.

Disorderly, chaotic radiation.

will only create destruction and killing, their meaning.

may be to purify the universe, who knows!

As a member who is unwilling to be purified, Brother Yu has no choice but to stand on the opposite side of the subspace.

Either win this war and find a way and strength to defeat radiation.

Either, be assimilated by radiation and become one of them.

became a chaotic and crazy beast, Yu brother didn't want to do that.

Before noon, He Wu and others returned to Miracle Town.

Before I had time to rest, I received a notice of departure.

Replaced the inner armor of the Qi body, a few people boarded the ship and went to the moon base with Qin Yu.

There they will complete the fission-class power armor dress, and then board the Medusa.

, together with the Star Moon and the Weeping Band, sail into the subspace to start a new journey!

When they arrived at the moon base, two neatly aligned rows of [Assaulters] were boarding the ship.

It's a pleasure to watch them walking in line, just like watching a military parade.

just lacked some cheers and music, and looked very quiet.

"I can only deliver it here." Next to the Medusa, which was so huge that the end was invisible.

Qin Yu pressed He Wu's shoulder and said, "Be careful, you must come back safely, and don't forget that someone is waiting for you at home."

"I will." He Wu nodded confidently.

During the conversation, McKison took Andrew and Anderson and walked from a distance: "My lord, good day."

Andrew and Anderson touched their hearts with their right hands, bowed and said respectfully, "My lord!"

...

The scene was a bit embarrassing. Brother Yu was still telling He Wu just now, "You must believe in science and know how to use the power of science and technology."

"Boss, I'll board the ship first." He Wu smiled and turned and walked towards the entrance.

McKison stared at his back indifferently, his eyes filled with dissatisfaction.

Damn mortals, they have no respect for our lord!

"Ahem." Interrupting McKison's conjecture, Qin Yu said: "Do you know what you are going to do?"

"Preach the doctrine and let all lives be surrendered to miracles." Andrew and Anderson said in unison.

After speaking, they didn't hear any response or compliment. The two raised their heads cautiously and saw Qin Yu's heart trembled.

Oh, I missed it.

This is McKeeson's indoctrination to them, so I shouldn't mention it here.

"Develop the company and believe in science." Anderson corrected it first.

Andrew nodded in cooperation with a sincere expression on his face.

Brother Yu only feels tired about this, it's too difficult for me.

"Your most important responsibility is to lead the fleet so that they can return safely and avoid a fatal crisis."

"If you encounter a big trouble that cannot be solved, open the star gate and return to the earth, understand?"

"Understood, my... boss." Andrew replied with nodding his head in the first place.

Archbishop MacKison said that whoever can get the praise of our lord can avoid the baptism of thunder and lightning. UU reading www.uukanshu.com

According to McKison, thunder and lightning are the purest and holy power in the world.

It can cleanse the filth in the mind and body, and make the faith firm and pious.

This is not just McKison's rhetoric, he really thinks so.

Because every time after baptism for two people.

He would walk into the lightning and thunder that he released with a face full of reverence, and accept the sublimation and baptism of himself.

At the same time, it is a kind of self-punishment!

Because McKison believes that there is still evil deep in his heart, and he is not religious enough.

only occasionally ran away, forgetting what happened to my master.

Therefore, when he baptized himself, the intensity of his power was even stronger.

Thunder and lightning at that level, Andrew and Anderson suspected that they could not even maintain their human form.

The moment entered, it would turn into two groups of twisted and convulsed nose mud.

But every time, Andrew and Anderson can see the enjoyment of his mouth rising.

This abnormality really makes them scared.

At the same time, the fear of Shi Cui reached its extreme.

You must know that this old man became what he is now after receiving his reformation and training.

As for the prolonged thunder and lightning baptism, the two of them are really going to be electric stupid.

As long as they can avoid being soaked in lightning and thunder again, let them recognize Qin Yu as a father.

My father, peace!
