

## Pinnacle 1061

### Chapter 1061: Sack

"The polluted area is spreading?" Bai Ze, who got the news, couldn't sit still.

said that he arrived at the scene soon.

"You can't change anything when you come here. You should sit down in the headquarters honestly and take care of the overall situation!"

Qin Yu discouraged: "Also, take care of the people below you."

"What happened?" Bai Ze asked curiously.

"Ask my brother, I am very busy now." Qin Yu hung up the call, he now needs to deal with the mess in front of him.

The RRT emergency team is assisting the staff of Miracle Company to build the wall.

The four engineering teams started at the same time, digging the ground and digging a gap.

Enough isolation wall from soil pollution, deep enough, and strong enough.

Seven meters underground, eight meters above the ground, a total of fifteen meters high, a separation wall painted with titanium and rhodium alloy.

Silver ink to prevent the spread of radiation is naturally indispensable.

As for how much it can play, it can only be determined after the construction is completed.

In short, they are rushing to finish the work day and night.

At the same time, the [Assaulters] who entered the contaminated area have been withdrawn, and they have to return to the town for a second repair.

The concentration of radiation is too strong, and the armor of [Assaulter] can only last for 6 hours.

If the time limit is exceeded, the 'Advanced Energy Crystal' as a power source may be contaminated.

So, they have to go back to rest every six hours.

Replace the outer armor and clean up the radiation pollution!

has a certain effect on low-level radiation and high-temperature gas.

Except for the rest time, there are 12 hours left, and they clean up the distortion inside and search for clues.

So far, the only thing that can be verified is one point.

There is no survivor, this only clue is accurate.

This is not enough. The Lingang Committee has considered the plan to use in the most serious case.

Lingang split plan!

To put it simply, it is to draw an L lying on its side along the coastline to blow up the land that contains the contaminated area.

Remove it from the plot like a shell.

Throw it into the sea, or blow it up directly, anyway, separate it from the land.

The fact that the contaminated area spreads is not the worst. The worst is that this spread may not stop.

It will always expand outward, one inch, one meter, one mile...

After finalizing all the plans, he asked Yuri to stay.

Staying here is just waiting for news. Brother Yu will not waste time on unnecessary waiting.

Also, JK needs his help.

cool Z

H2 was shuttled in the traffic, and the lights outside Lingang seemed to be unaffected.

Even if this city is sick, it is still full of vitality.

But people's hurried footsteps and worried look on their faces indicate that something has indeed changed.

Following the guidance of the navigation, Qin Yu successfully found Jia Jingsi.

It's just that the existing situation looks a bit out of control.

A group of young men and women surrounded Jia Jingsi, arguing with her.

And she was holding onto a girl with a reluctant face, just wanting to leave as soon as possible.

There is a row of road races parked beside them, which is the kind of entry-level little toy.

"She said she didn't want to leave."

"I am her sister."

"Are you not her mother?"

The young man confronting Jia Jingsi said impatiently: "She is 16 years old and can make her own decision."

"Yes, you are not my mother, let me go." The girl who was caught by Jia Jingsi threw her away.

Jia Jingsi grabbed her wrist again and scolded: "Your mother asked me to look at you. You should be honest with me."

It seemed that it was another family conflict. Brother Yu took off his helmet a little helplessly, and was going to take a look.

On the sidewalk, there was a roar of motorcycles.

The boy with Moxigan's head shape and the trendy dress twisted the accelerator forcefully, swinging to drive the crowd in front of him.

made a strange cry of "Woo" in his mouth, just so intimidating passers-by to run rampant on the sidewalk towards Jia Jingsi and his group.

Hearing the panic screams of passers-by, a group of people turned their heads to see the original author, shouting, applauding and cheering.

"Wow, handsome."

"too handsome."

"Haha, cool, ooh!"

The little girl caught by Jia Jingsi looked at Mo Xigan with excitement and admiration, and shouted: "I love you to death."

At the same time struggling hard to get rid of the nosy cousin, "Let go of me, you are so annoying."

"Don't think about it." Jia Jingsi said angrily and worried.

Faced with so many people alone, she would be afraid.

But thinking of my sister-in-law's entrustment, I cried helplessly on the phone.

There are cousins who hang out with these people all day long, Jia Jingsi told herself "Calm down, calm down, just wait for the uncle to come."

Parked the car in front of his friends, Mohigan lowered his feet, folded his hands on the front of the car.

smiled as he thought it was cool: "Sister, where do you want to take my girlfriend?"

Wow, it turned out to be the woman of the eldest brother.

It seems that the eyes of the little JK cousin are not bad.

At least mixing with a big sister-in-law Dangdang is better than following a small bastard.

Just look at their virtues and equipment.

In general: Sack!

"Let's let, let's let trouble." Smiling politely, Qin Yu burst into the crowd abruptly.

"Who are you?" The boy raised his head horizontally.

Qin Yu gently pushed outwards with the back of his hand, and directly broke into the encirclement circle: "Okay, enough trouble, it's time to break up!"

"Uncle." Jia Jingsi, who saw Qin Yu, was already excited and wanted to jump up.

But this will face a group of little kids, or in front of cousins.

Jia Jingsi insisted on her majesty, "You can't let the kids look down upon yourself, come on!"

"Oh, there is another uncle here, what do you do for the elderly?"

Mo Xigan looked at him arrogantly, showing off his masculine charm.

immature, ridiculous and a little cute...

Okay, only ridiculous!

"Uncle, do I need to help you move a chair?"

"Uncle, do you want me to help you?"

"Uncle, haha..."

Jia Jingsi looked at Qin Yu worriedly, this worry even made her forget her cousin and let go of her hand.

"Uncle." Jia Jingsi held his hand.

In the face of ridicule and provocation, Qin Yu smiled calmly: "It's okay, wait for me."

Letting go of Jia Jingsi, Qin Yu stood in front of Mo Xigan with a smile on his face.

"What's the matter? Uncle?" Moxigan asked defiantly with a laugh.

Then, he burst into laughter with his companions.

Qin Yu didn't say anything, just stood in front of the car and looked at him.

just watching, watching...

The look in his eyes is getting colder and colder, with an inexplicable aura, as if a lot of mountains are falling.

Mohigan was still laughing, he wanted to continue laughing at each other.

But why his laughter is getting dry, full of guilty conscience and hesitation.

The other person's eyes look like a needle piercing the heart.

And all his secrets are exposed in front of the opponent.

What are the unbearable things, and what he would never mention...

When Moxigan was choked by saliva, he coughed violently.

Other people stopped laughing unconsciously, becoming embarrassed and uneasy.

Qin Yu put his hand on his shoulder, patted and said, "That's right, you have to be polite to your elders."

"In the future, stay away from her and her." Let go of his shoulders, and his palms fell naturally on the handlebars.

Before Mo Xigan, who wanted to find his face, spoke, the handlebar made a weird noise.

Under everyone's questioning gaze, Brother Yu released his palm.

Plastic shards jingle bells and fell on the ground, and the steel twisted into pancakes was exposed to sight.

Hesitation and doubts become fear!

Everyone backs away unconsciously and wants to keep themselves as far away as possible.

Except Jia Jingsi!

At this moment, her face was full of pride and confidence, and she happily held Qin Yu's hand: "Uncle, let's go."

looked back at the scared cousin, Jia Jingsi's face sank: "Will you not leave?"

Seeing her face, Wang Shanshan instinctively wanted to refute.

Then, another gaze was cast to let her dismiss all thoughts and follow her obediently with her head down.

"Have you finished eating?" Taking the two of them away, Brother Yu suddenly found that he was hungry.

Thinking again, he seems to have not eaten for a day.

I have been busy with the separation wall and various plans this day, and I don't remember that people need to eat.

"No!"

Jia Jingsi looked at the night market stall in front and said happily: "Uncle, I want to eat fried noodles, that."

"Good." Qin Yu agreed.

Jia Jingsi ran to fry the noodles, Qin Yu and Wang Shanshan stood there, thinking about what they wanted to eat.

He should only be thinking about it, because Wang Shanshan has been looking down at the ground.

"Did you lose something?" Qin Yu took the initiative to speak when she saw her desperate look. "what?"

Wang Shanshan raised his head, glanced at him and lowered hurriedly: "No, I...I'm not hungry."

She was just terrified!

Someone crushed the motorcycle handle in front of her, even the steel pipe inside was crushed.

Is this something normal people can do?

And he is still his nosy cousin...

Uncle       !

They must have a leg, so he will definitely listen to his cousin.

In this case.....

"He won't beat me?" The conjecture in his mind made Wang Shanshan more and more afraid.

Qin Yu understood this fear, and said amusedly: "You don't have to be afraid of me, I don't eat people."

"Ah...oh, okay." Wang Shanshan responded nervously.

"What do you want to eat?" Qin Yu asked.

"emmm, whatever... the noodles, the fried noodles are ready." Wang Shanshan, who was at a loss, happened to see the fried noodles carried by his cousin.

So, use whatever you see, right!

Fortunately, she is in the snack street.

"Then go buy it, do you have money?" Qin Yu said and went to dig his pocket.

"No, I just have to eat this." Wang Shanshan directly snatched the meal from his cousin.

"Hey, that's mine." Jia Jingsi said.

"It's mine now." Wang Shanshan said proudly, and found Qin Yu staring at him.

I jumped in my heart, and cautiously said: "Yes...Yes, okay?"

Stir-fried noodles, spicy tang, soup and side dishes, as well as a bunch of various snacks.

When they were all resolved, Wang Shanshan had completely changed.

looked at Qin Yu, full of worship!

From now on, he is his idol...

There is also a cousin, she unexpectedly is with the chairman of the miracle company, the miracle maker, Qin Yu.

They are in love, which is so cool!

**Chapter 1062: Wild**

"Actually, you should really teach them a lesson, they are really too much sometimes."

Wang Shanshan bit the soup dumpling, inhaling while talking about the excessive things they did.

"They always like to scare people. They think this is handsome, but they are actually stupid."

looked at Wang Shanshan, who was unwilling to leave one second, and complained about all kinds of bad things they had done the next second.

Jia Jingsi rolled his eyes and vomited: "They are not your friends, don't you like to mix with them?"

"I..." Wang Shanshan opened her mouth to refute, holding back.

glanced at Qin Yu, and said with a complex expression: "Actually, I don't like being with them at all."

"But they are the coolest kids in school."

Faced with Qin Yu's gaze, Wang Shanshan panicked and explained: "You know, speed... locomotive... paying attention."

"Everyone will think you are cool, and they are willing to please you and play with you."

Wang Shanshan said more and more quietly, because after waking up.

She suddenly realized how stupid she was, she was so stupid.

"You can use this time to study and enrich yourself. Sister-in-law sent you to school not to be cool..."

Jia Jingsi was complaining, Qin Yu held her hand.

looked up at his shaking his head, Jia Jingsi looked across.

found that Wang Shanshan lowered his head and said nothing, and did not seem to talk back at all.

"She already knows." Qin Yu said softly.

What else does Jia Jingsi want to say, to see how she knows her mistakes... She curls her lips and continues to eat.

Found that both of them were silent, Qin Yu took the initiative to speak: "Actually, you did nothing wrong."

"Uncle." Jia Jingsi couldn't believe he would encourage.

Wang Shanshan also raised his head in astonishment, "Why, at this age, I want to be handsome and cool, and be noticed. What's wrong with it?"

Qin Yu smiled and looked at Jia Jingsi, and said, "Aren't you? I remember your dancing very well."

She is always the focus in the bar, never exception!

Jia Jingsi was speechless, and continued to eat.

She gave up!

"It's just being stupid, there is nothing to be guilty of." Qin Yu's comfort made Wang Shanshan feel much better.

laughed dumbly, Wang Shanshan laughed at herself: "It's quite stupid."

"Since you already know, I believe you won't waste time on these things."

"The outside world is very exciting, much more exciting than a locomotive and a group of children who are handsome but actually stupid."

Looking at the smile on his face, Wang Shanshan laughed brilliantly: "You really look like an uncle like this, haha..."

"Hey, Wang Shanshan."

Jia Jingsi put down his chopsticks and looked at her seriously, "Only I can be called Uncle."  
"what!"

Wang Shanshan, who came out of depression, will not let her go.

Besides, she is so nervous!

Why are you making such a fuss? Isn't it just one name?

"I said, only I can be called Uncle, understand?" Jia Jingsi stared at her severely.

Facing the cousin's glaring, Wang Shanshan knew she was serious.

So, she is very smart to compromise!

"Okay, I see." Wang Shanshan curled his mouth unwillingly.

Seeing the hostility of the two, Yu Ge took them to succeed and put them together.

"You are sisters, take care of each other." Qin Yu smiled.

From what he just learned, there are only two sisters in Hudu.

They have no relatives here, and no one else can take care of them.

But the two sisters are totally out of sync!

Not only now, it's been like this since childhood...

Looking at each other is not pleasing to the eye, hostile, and then to endless quarrels and unreasonable opposition.

The two sisters rarely meet each other except necessary.

let alone take care of each other!

Therefore, Brother Yu wants to strike while the iron is hot, so that the two sisters will turn embarrassment into jade silk.

"I don't think she will agree." Jia Jingsi poked the food with his chopsticks and said reluctantly.

But she didn't even notice the urgency and expectation in her heart.

The more mature, the more you understand the trade-offs and compromises.

She wants a cousin who can say everything, care about herself, and will take care of her cousin when necessary.

, not a stranger who doesn't look at each other and just thinks of quarrels and cold wars.

The friendship between girls is really too weak.

At least that is true for Jia Jingsi, she hopes that there can be someone who can touch her heart.

I hope this person is her.

"I do." Wang Shanshan's decisive answer made Jia Jingsi stupid.

See her staying in place, staring at her with her mouth wide open.

Wang Shanshan thought she was scared stupid, and explained quickly: "I think, I really want to, I just..."

"I just don't know what to do, what to do!" At this moment, Wang Shanshan showed her shy and kind side.

At this moment, she looks so beautiful.

even made Qin Yu's eyes shine, including Jia Jingsi.

She has never seen her cousin's kind side. To be precise, she has never shown herself to herself.

So, the change in this scene made her very uncomfortable.

"Sour and sour." Qin Yu looked at Jia Jingsi.

Now is the time for her to express kindness.

If you want to change your relationship, now is the best time.

"Well, I am willing." Wang Shanshan said.

Ten fingers clasped tightly, eyes facing each other, there was an ambiguity between the two.

Brother Yu almost shouted the slogan "Together".

Jia Jingsi and Wang Shanshan also noticed this strange breath, and let go of each other's hands like lightning.

turned his head away and quickly said, "I'm done."

"Me too."

Brother Yu got up to pay the bill, smiled and said, "That's right."

By the roadside, Qin Yu crossed ZH

2. Picking up the helmet and saying: "I really don't need me to send you?"

Jia Jingsi shook his head and happily said, "I'll take a taxi and go back...you, don't fool around with those people in the future."

"I'm just playing in the car, how can I..." Wang Shanshan said with a weakened voice, "Is there a fool."

She is still adapting to this new sister relationship, and always find it more interesting to argue with each other.

Seeing Wang Shanshan's restrained expression, Jia Jingsi also didn't want to mess things up.

But she must dispel her cousin's mind, if she continues to mix with those people.

Jia Jingsi doubts how long the promise she made today will last.

After receiving little JK's look for help, Qin Yu turned around and smiled: "I want to play in the car, come to me, do you want to join the club?"

"Really, can I join the club?" Wang Shanshan asked in surprise.

Putting on the helmet, Qin Yu gave little JK a relieved look, turned the accelerator and said, "Of course, I will take you to see my car another day."

Although Tang Xin's motorcycle club is in the abandoned city, it does not mean that they have no activities in Hudu.

Qin Yu also made a special trip to the company to purchase a series of locomotives for him to use in Hudu.

Otherwise, he is driving ZH

Where did 2 come from?

Wang Shanshan was sent to the school smoothly. Qin Yu looked at the school gate in surprise and said, "Are you going to school here?"

East China Second Middle School, she really goes to school here.

"Why, don't I look like a good student?" Wang Shanshan smiled and stood by the roadside.

Facing Qin Yu's questioning gaze, Wang Shanshan smiled bitterly and said, "It doesn't seem to be the same."

"However, I won't be like that anymore from today."

Taking a deep breath, Wang Shanshan seemed to be determined, and said: "But you must take me to play in the car, you promised."

"I promised." Qin Yu held his helmet and said: "If you don't go back, you will stay overnight."

"Uncle, you are inviting me and you..." Wang Shanshan pointed at herself with a teasing expression.

Qin Yu put on his helmet, and said, "I will convey this sentence to the acid."

"No, don't~"

Watching him ride away, Wang Shanshan jumped and shouted: "I was wrong, don't tell her."

Under the helmet, the corners of Yu Ge's mouth rose naturally.

Today is another happy day.

After this time lasted only 20 minutes, Yu Ge was called back to the hive by a phone call.

"Do you know that I haven't slept for more than 50 hours?" Qin Yu walked into the laboratory quickly, wanting to know what they had discovered.

"I found the truth!" Shi Cui stared at the jar in front of him without turning his head.

"In fact, I found the truth." Jing Yuan's figure came from behind, and she also rushed to the biochemical zone.

"What is the truth, the polluted area?" Qin Yu asked curiously.

"Lichang." The two said in unison.

Seeing the electric lights in the church where the two were looking, Qin Yu was very satisfied with the competition.

"So, who is it that solved it?" Qin Yu's tone was relaxed, ready to select the champion.

"Me." Jing Yuan.

"...she, but me." Shi Cui then wanted to emphasize his efforts in the experiment.

He determined the direction first, and Jing Yuan just reached the end one step faster than himself.

"Alright, Team Leader Jing stay."

"Leader Shi, you can continue to work."

Shi Cui looked dazed, and instantly put on his old good man mask again, "Okay, I'll leave it to you here, Team Leader Jing."

Hearing his deliberately aggravated tone, Jing Yuan smiled gracefully at UU reading [www.uukanshu.com](http://www.uukanshu.com): "Of course, and it will definitely do better than you."

"Haha!" Shi Cui smiled and turned and left.

looks so calm, if his fingers are not constantly twisted and deformed.

"Okay, now explain to me, what is the situation?" Qin Yu said.

"Gene, aberrant gene." Jing Yuan said.

"It is smarter, stronger, and more comprehensive than what we have seen and imagined."

"In short, we are using a gold mountain as a copper mine."

"...Is this description too exaggerated?" Qin Yu rubbed his chin.

treats Jinshan as a copper mine, so are they all idiots?

In Jing Yuan's description, Shi Cui just put the genes together roughly.

Of course, this is already quite remarkable in the eyes of others.

but...

At this moment, it is like a shoddy handicraft, worthless!

The power of        aberrant gene lies in its chaos.

is the characteristics of the gene itself, such as radiation, pollution, chaos, etc.

eliminates and suppresses these characteristics, so that the aberrant gene cannot show its strongest side.

is like a tiger in a cage, it is confined inside and has nowhere to go.

Only by letting it out can the wildness in its body be stimulated.

The force field exists in this wildness.

### **Chapter 1063: Summer flower**

"Have you considered the risk?"

"Of course, risks always exist, and any progress is accompanied by countless risks. We can only find ways to control..."

"Control, how to control radiation pollution?"

"Yinmo, we can build a city...like a miracle town."

"Funding! The company's income is considerable, but it can spend money... No, it is burning money. The research institute is like a melting pot.

Carriage of money was poured in, but I couldn't fill it up! "

"Then we will change to a safe place, an overseas island, no man's land, or Mars."

"No, no, Mars can't work, it's a retreat..."

In the multifunctional conference room, watching the quarreling executives and researchers, Yu Ge ate takeaway with relish.

This is not the first time they are facing each other, and it will not be the last.

Today's Miracle Company is a real behemoth.

An unprecedented monster, no company can match it.

Different factions and groups are naturally born within.

Although he tried his best to prevent this from happening, it is a biological instinct to be close to people similar to himself.

They are human beings with their own ideas.

Growth environment, cognition, opinions, ideals and persistence.

Qin Yu couldn't brainwash them and turn them into clockwork.

Therefore, things like pulling the mountain top still cannot be eliminated.

Currently, there are three major factions within Miracle Company.

Kuafu Research Institute, surrounded by an academic school headed by Jing Yuan.

Within the company, we support Xu Hao's aristocratic school.

Feel the threat, worry about being suppressed by aristocratic family and technical staff, and spontaneously gather together.

These labels are set by Yuge, and no one in the company will recognize them.

They just rely on each other, support, and hug each other.

Because, anyone who stands on the top of the mountain with a clear banner will be invited to drink tea by the Ministry of Supervision.

The process is not very pleasant!

At this time, it is the academic school and the aristocratic school who are arguing.

One party only cares about the project itself and believes that the risks and investment are controllable and worthwhile.

One party believes that the company does not need to take huge risks and invest huge amounts of money to support a project.

One is just one project.

Maybe it will succeed, let them understand the gene... the force field...

may even master these technologies to enhance individual combat effectiveness, or apply them to more fields.

may be great, no one denies it!

But once it fails, the whole world is ruined.

Everything they care about and cherish will all disappear.

Compared with the unattainable results, the risk taken is too great.

Not to mention, how much money will be invested during the period.

The cold sects are mostly front-line workers and middle-level managers, and this kind of directional decision-making cannot be heard.

But it does not mean that their opinions are not important. They are inseparable from the preparations before R&D, laboratory construction, maintenance and operation, manufacturing and production and ensuring everything is normal.

However, this will not be when they speak.

Xu Meixin sat behind Qin Yu and asked a little worried: "Boss, don't you need to stop it?"

Amusingly turning around, Qin Yu asked, "Why stop it? They'll be fine."

Bang, "I said no."

Yang Chengjun in the projection patted the table and stood up.

"It's not you who have the final say, you have no right to order me." Jing Yuan sat on the spot with a cold face.

A heavy aura gushes out, the projection begins to shake, and the signal is disturbed by energy.

"Is this all right?" Xu Meixin asked again with a stiff smile.

Brother Yu wanted to say it was okay, but the solid smile on his face had already given a clear answer.

The farce is over!

"Cough."

put down the takeaway, and when everyone looked over, Brother Yu couldn't help but took another bite.

He is too hungry. This is the second meal he ate in two days.

"Why can't I have a good meal? Being angry is not conducive to digestion, you know."

Qin Yu jokingly swallowed the food and crossed his hands forward.

His behavior is to show a kind of initiative, that he wants to join the conversation.

is also a warning!

From now on, everyone had better restrain their emotions, and it was time to discuss a result!

"I want to hear the opinions of the engineering, logistics, and equipment department."

"We will discuss all the previous plans. Is it possible to build an isolated city or a small island?

If possible, how much money is needed and how to do it. "

"Place the laboratory on Mars, how big the risk is, the difficulty of construction and transportation, and the pollution response plan."

"Abandoning the entire project will bring Deng risks and impacts. We know that Decker is already doing it."

"There are also possible benefits after the project is successful, and the benefits of extended extension projects are cross-compared."

looked at the executives, technicians, and middle-level managers sitting at the wrap-around conference table.

Qin Yu said sincerely: "I think after comparing these data, the answer will appear."

"Boss, I have all the data here."

"The engineering department's budget and design draft have been completed, do you want to show it to everyone now?"

"Boss, if we do this, our capital chain will be very tight, which is not good for the company's development!"

"Please, don't we still have those orders, each of them can bring a lot of revenue."

"Hey, that is Vulcan's funds. We have our own plan."

"Your plan can be postponed, Vulcan is also a company, don't forget this."

The quarrel began again, and Qin Yu leaned back in his chair and continued to enjoy the good show.

If you want to find a good way, you should let them express their opinions.

With the constant debate, the correct plan and choice will emerge.

So, this meeting lasted four days in the end.

The result was obtained in the quarrel, and the experiment site was in the middle and south-central bald eagles.

Perhaps the most dangerous one can be placed in North State.

Anyway, it has been heavily polluted and has become a hotbed of radiation.

is another person's territory, no matter how bad it is, it can't be worse.

Mars will still be an alternative to retreat, not threatened.

The investment of funds will depend on the progress of the research.

The initial budget is 500 million US dollars, which is enough to purchase equipment and do experiments.

As for the land, please, this is the most important thing.

The wild dog gang supported by BlackRock will set aside enough territory for them to use.

Wild Dog Gang, the name sounds neither scary nor cool.

But what is called is not the main concern of BlackRock.

BlackRock only cares about how much 'it' can play when needed.

This is the only reason for the existence of 'it'.

As for dingo, big dog, puppy, licking dog...

does not matter!

The plan is finalized in this way, and subsequent experiments with a hazard index of three and above will be completed in the new laboratory.

At the same time, the penetration of Fort Decker continued.

This task is in charge of Mark, after the failure of the last invasion task.

Qin Yu changed his strategy, he wanted to figure out what the other party knew.

It's not difficult to destroy Fort Decker!

If he wanted to, the Thousands of Fallen Magic Pestle would tear the Fort Dekker apart like a scorching sun.

Then, a large-yield bomb was placed inside.

Boom!

The entire Fort Decker will be sent to the sky, as will the precious research materials.

This is not the result he wanted, so he has to change the way.

infiltrate, try every means to get the information you want.

is difficult, but worth trying!

The company is also stepping up the production of Titans.

If you really want to attack next time, they will become the main force in the front row, opening a channel with a shower of gunfire.

Finalize the plan, and there is one last item that needs to be confirmed.

Who is worried about the person in charge of Beizhou.

This position has a heavy responsibility, and its rights are, to some extent, more important than the miracle town that Watson is responsible for.

Therefore, one must be a trustworthy person.

Although at the meeting, the executives have their own candidates recommended.

But there are only two names in the list that Qin Yu considered.

Jingyuan.

Shi Cui.

'S own strength can ensure safety, professionalism, know the experiment well and have prestige!

Loyalty, this is very important.

Therefore, they are the best choice, and Qin Yu can't think of a more suitable person than them.

But who to send it to, it remains to be considered...

These questions can wait a while, he can wait for the base to be built before deciding.

Now, he wants to go home first and have a good sleep with the lazy cat.

"I'm back." Putting the key on the shoe cabinet, Qin Yu didn't hear the sound inside the house.

Is it going out?

walking into the living room with doubts, Qin Yu saw the figure curled up on the sofa.

is a cute girl who is sleeping soundly with her body shrunk under a blanket.

squatted in front of the sofa, looking at her lovely and peaceful face.

Brother Yu couldn't help but kissed her forehead, and also woke up the lazy cat who was sleeping very lightly.

"Welcome home, what time is it." Seeing that it was him, the lazy cat's sober brain was dizzy for a moment.

lay lazily in his arms, arching his head cutely.

She just fell asleep, this would not have enough sleep at all.

"At 11 o'clock at night, go to sleep!" Qin Yu touched his head and smiled lightly.

"Um..."

His muscles were completely relaxed, and the lazy cat whispered: "Sister Shanshan made the food...on the table..."

naturally embraced his wolf waist with both hands, and the lazy cat arched upwards, pressing most of his body in his arms.

The eyes and the corners of the mouth rise at the same time That is a signal of peace of mind.

Squeak!

The door to the guest room opened, and Jiang Xiaoshan in her pajamas walked out.

The moment he saw him, his expression was indifferent, but the joy in his eyes was choppy.

"I'll heat up the food." Jiang Xiaoshan said and walked to the restaurant.

"Whatever you want..."

Brother Yu hasn't finished speaking, she has already walked into the kitchen.

wanted to get up, but was held tightly by the lazy cat.

didn't want to wake her brother Yu again, so she could only sit down and let Jiang Xiaoshan go in and out.

Bringing all the dishes to the coffee table, Jiang Xiaoshan glanced at the lazy cat in his arms and said, "Just eat here!"

"She has to wait until the early hours of the morning, and she has to go to various parties during the day, and she is exhausted."

It is obviously a vacation, but Jiang Xiaoshan feels that the lazy cat is more tired than dancing.

After all, she is very happy when dancing.

And those unavoidable entertainment...

For the lazy cat, it's all kind of torture.

"No wonder she looks tired." Qin Yu touched her face distressedly.

The lazy cat in his dream smiled happily.

She dreamed that she was standing on the central stage, showing her dancing alone on the stage.

There was only one spectator in the empty auditorium below the stage.

The loving eyes and the brilliant smile make Lanyue bloom like summer flowers, brilliant and beautiful!

## **Chapter 1064: clever**

High-intensity morning exercises make life bright and bright!

It also made Lazy Cat and Jiang Xiaoshan's daily routine all obsolete, they don't have the energy of Superman Qin Yu.

Driving ZH2 to the town, the employee who was parking saw his locomotive and smiled and gave a thumbs up.

Nodding his greetings, Yu Ge took the rail car to the information building.

Only this time, instead of going down, he went up...

Coming to the VR center, there are no signs or decorations, and the bright silver metallic game cabin is full of enclosed spaces.

Surrounded by projection equipment, you can access the picture seen by the equipment.

On the projection panel at the front of the game cabin, the detailed data of the players can be monitored at all times.

Now, these data are not so good.

When Qin Yu entered through the security door, Jing Yuan was checking the player's mental condition in front of the game cabin.

"What's the progress?" After receiving authorization, Qin Yu's personal terminal was connected to Eve.

"Good news, I think in a few days, he will be able to return to normal and wake up."

Jing Yuan placed the chip with a large palm on the forehead of the unconscious player.

The characteristics of high-level energy crystals can absorb a small amount of pollution from these players' spirits.

Exploring the contaminated area will cause a great mental burden to the manipulator behind the [Assaulter].

Not only is the machine itself contaminated, but the player's own spirit is also slightly contaminated.

The longer the time, the greater the possibility of contamination.

Therefore, when someone does not obey the command, they operate overtime without authorization and stay in the contaminated area.

It became like this, mentally comatose, wandering in the whispers of chaos.

"After he is sober, terminate the contract, sign a non-disclosure agreement, and let him go."

Qin Yu said that he was leaving, but was stopped by Jing Yuan: "Wait, Teacher Qin, please take a look at this first."

Jing Yuan cast a video screen on the surround projection.

The first perspective is [Assaulter].

"On the 13th, return now." This is the voice of the command center.

"Wait, soon, I swear I just saw a living person, he is here."

Qin Yu turned his gaze to Jing Yuan, and the other party pointed to the unconscious player in the game cabin. He must be correct.

So, is this the audio record that he defied the order and forcibly stayed in the contaminated area?

"On the thirteenth, the will reaches the critical point, the light is turned on, do you hear it? Return immediately."

"I know, they are right there, I..." The angle of view was aimed at a gray and dead school building.

He thought he saw a living person in the school building.

"Now, otherwise you will be disqualified and will be liable for damages."

"Understand, leave now."

"Stop." Qin Yu said this sentence.

At the moment when he turned his head, there seemed to be a blurry image flashing in the distance of the angle of view.

"Go back 2 seconds." Qin Yu said with a serious expression.

The screen goes backwards, "Play...Stop!"

"enlarge."

Looking at the blurred image at the corner of the eye at the moment of turning around, the picture is magnified.

Qin Yu's expression became weird and serious. On the second floor window, there was a small face of horror.

The action of raising her arms for help proved that she was still alive.

Really people, living people!

"Is the information confirmed? Has anyone else watched this video?" Qin Yu asked hurriedly.

"No, the command center reported to me as soon as possible, and I ordered it to be sealed, and the confidentiality level was adjusted to the highest level."

"Good job, Qilin, contact Bai Ze, I want to talk to him."

Qin Yu hurriedly turned and left, he needed to talk to Bai Ze alone.

"Boss, are people going to be fired?" Jing Yuan asked with a smile.

"Leave it to you." Qin Yu said without looking back.

This matter must be handled low-key.

With one carelessness, these last survivors may become monsters isolated by hatred.

reason?

Everyone died, only he or them survived.

Isn't this reason enough to survive this unexplainable, treacherous and evil disaster?

"Survivor?" Bai Ze stood in front of him after only an hour.

In front of the magnificent towering, shiny metal isolation wall, Bai Ze's face was ugly and terrifying.

He was not angry with the survivors, but angry at his dereliction of duty.

There is guilt.

How could no survivors be found for so long.

Why do you believe Yang Xiao's one-sided words!

Of course, this is not his fault, he is a hero.

Although there is no public recognition and publicity, it cannot obliterate the fact that he is a hero.

This is Bai Ze's own mistake. As a leader, he shouldn't believe in the message Yang Xiao personally conveyed.

Because of the risk, he did not want to lose more manpower and other factors, so he gave up the follow-up investigation.

It is so determined that everyone has fallen or died.

Proceed with caution and learn your lesson!

The Disturbance Bureau and the RRT cooperate, and the [Assaulter] is responsible for covering and opening the way.

There is only one goal, to save the survivors.

Go to the teaching building, find the survivors, and bring them back safely.

This is the plan!

The details are much more complicated, route, time, troubles and difficulties that may be encountered.

Alternatives and communication guarantees, as well as the most important on-site command.

On this point, the two sides failed to reach an agreement.

The Distortion Bureau requires command power, and RRT is also emphasizing command power.

Neither Li Zixin nor Mark was willing to give in, but Qin Yu and Bai Ze were watching the show.

"There are still 3 minutes to go. Who do you think will win?" Bai Ze asked, looking at his watch.

"Of course it is mine." Qin Yu believes.

"I think it is Hanshuang, her strength is stronger." Bai Ze retorted.

He thought that Qin Yu would be humble, but he seemed to think too much.

"Really, do you really think that Hanshuang is stronger than Mark?" Qin Yu looked at him incredulously.

He seriously suspected that Bai Ze had a misunderstanding about the genetic modification project.

"Innate is stronger than acquired." Bai Ze smiled.

"There is no headquarters building of the Bureau of Abnormalities, and the four characters of believing in science should be added."

Brother Yu shook his head speechlessly, and the previous competition also began.

The two decided to use their wrists to decide whether to win or lose.

The volley breaks the wrist, and the other party will win if the elbow moves or is overwhelmed.

"Come on, Chief!" The people in the abnormal situation were very excited, and Lightning chanted cheering for the director.

On the RRT side, everyone was silent, and even their expressions were covered by the mask.

The match lasted only 3 seconds and Li Zixin won.

At the beginning of the game, she cunningly focused on the next game.

Unexpectedly, a layer of ice was created under Mark's feet, and his feet slipped and he lost his balance.

Although Mark stabilized in time, his elbow moved.

Very cunning, but also very smart!

No wonder she asked to add "the elbow can't move" this point, and emphasized it several times.

From the beginning, she planned it.

Willing to accept the bet, Mark voluntarily backed down and said that he would obey her command.

A group of people entered the contaminated area under the mutual delivery of 60 [Creators] and 100 [Assaulters].

Among them, two [Titans] follow as killers, which are already the vast majority of forces that the headquarters can mobilize.

If that is not enough, you can only shake people from the west coast and the moon base.

He will not mobilize the defense forces of the headquarters, or reduce the security level of the laboratory, computer room, warehouse, and hive.

The abstract aberration appeared in the town last time, and who can be sure that it won't do it again.

Appears in warehouses, headquarters or other places.

"Check the signal."

"The picture signal is normal."

"Satellite positioning and tracking signals are normal."

"Communication test...Communication is normal."

"Everything is normal. Please place a relay device 2000 meters away to ensure a good signal transfer."

"receive."

The team quickly moved in the direction of the target, and Li Zixin, who obtained the miracle standard equipment.

For the first time, I realized how big the technological gap between the outside world and the company was.

Like the abyss!

The so-called black technology is nothing more than the standard equipment of the other party.

It's like the jumping backpack she is using.

Not to mention the individual combat uniforms worn on the body, the electronic system onboard besides assisting in combat.

It integrates protection, information display, control and communication.

It can also monitor its own data at all times, and perform self-diagnosis and battlefield first aid in emergency situations.

They also have adrenaline and life-saving medicine.

When you have a fatal trauma, a life-saving medicine may save your life.

This kind of digital individual soldier standard assembly makes Li Zixin hate RRT even more.

Why does one's own team members have to go into battle in 'red outfits', while the other party is fully armed to the teeth.

Jealousy makes people crazy and also brings courage.

After Li Zixin decided to go back this time, he filed an application to request to upgrade his equipment.

## **Chapter 1065: hero**

"Here." On the gray wall, the air exudes a decadent breath.

The silent campus is full of the smell of death.

Empty playground, dilapidated corridor, rusty facilities, door handles.

Every signal        sees makes people nervous spontaneously.

Fear, in my heart!

arrived at the destination smoothly, but it didn't make them feel better.

But, now is the time to save people.

Without any difficulty, they found the only classroom with the door closed.

and through the window, I saw the children inside.

At this moment, the children looked terrible, leaning back on the table and chairs, as if they were in a coma.

is hung under the ceiling in the middle of the classroom, and is a heart singing songs with weird accents.

"What should I do now?" After confirming all the information, everyone waited for Li Zixin's order.

According to the picture I saw, the children in the room were not infected.

The walls are covered with twisted strips of flesh and blood, like lush wall climbing tigers all around.

Floor, wall, ceiling are everywhere.

And the center that connects these flesh and blood strips is the bare beating heart hanging in the center.

is also it, isolating all radiation outside the classroom.

"The current situation is that the heart blocks radiation. It may be protecting the child or for other purposes."

"Break open the classroom, it will definitely be alarmed, what will be the consequences, whether it will drive it crazy, no one knows."

"Therefore, we must be prepared for its possible runaway, and if necessary, subdue or clean it up."

"While breaking in, how to prevent radiation from pouring into the classroom and letting the children fall."

Li Zixin turned his gaze to Mark, obviously wanting to hear his opinion.

Although I don't want to admit that, the technology and resources of Miracle Company are far beyond the control of the Anomaly Bureau.

"We have prepared a portable barrier." Mark called for a soldier to come over.

The opponent took off the "schoolbag" behind him, and took out a compressed air bag from inside.

Pull and inflate, instantly forming a mobile isolation layer with double protection.

Then, its size just fits on the wooden door of the classroom.

The edge of the outer isolation layer, self-priming to grasp the door frame, forming an effective channel.

"Perfect." Seeing the closed classroom door, Li Zixin was shocked to speak.

is so beautiful, they are already prepared.

I didn't prepare, only the out-of-tune game!

This makes Li Zixin very upset, very, very upset.

This was supposed to be their job, and what they had to do was now solved by a company.

Frustration, frustration, anger, jealousy...

Li Zixin doesn't know how to describe himself, how he feels at the moment.

Wuwei Chenza, maybe it is this.

If possible, Li Zixin hopes to \*\*\*\* things over now and poke all over the LOGO of the different game.

"Director Hanshuang, can you start?" Mark asked, looking at the absent-minded Li Zixin.

"Huh?" Li Zixin looked back, everything was ready.

"Yes, yes, we can start." Li Zixin took a deep breath and focused on the matter in front of her.  
boom!

With a sound, the closed classroom door fell down.

\*

\*

Seven hours later, the rescue team returned to the wall.

"There are 37 children, not a few of them." Mark is reporting to Qin Yu.

"Why can that classroom be cut off from radiation?" Qin Yu was very concerned about this.

Although he watched the live broadcast of the entire operation, he still wanted to know more details.

"Heart, that heart." Shi Cui suddenly broke into the office, looking excited as if he was hi.

"Can you imagine it? When the radiation spreads, a person will automatically decompose into a protective layer.

Wow~ It's incredible, how did he control his own distortion, controllable, it turned out to be controllable. "

"At the moment of being radiated, it is his brain that determines the direction of the distortion."

"Do you understand? Understand? It is controllable, and distortion is controllable."

"And him." Shi Cui pointed down, which was the direction of the laboratory.

"He chose to disassemble his distorted flesh and blood to form an effective shield, like the wall of separation, which protects everyone."

"But this is not the point, the point is that the distortion is controllable."

Listening to Shi Cui's crazy words, Qin Yu raised his hand and interrupted him: "Group leader Shi, leader Shi, stop."

"What's the matter?" Shi Cui stopped, with fanatical excitement still on his face.

"I don't want to hear what I said just now."

Qin Yu solemnly said: "No matter when or where, I don't want to hear it again, understand?"

"What?" Shi Cui was stunned.

He doesn't know what he said wrong? ? ?

That's right, he saved the lives of 37 children so that they could avoid pollution and degeneration.

Except for malnutrition and dehydration, they did not suffer any harm.

However, controllable distortion is the most important thing.

isn't it? ? ?

Silently looking at Shi Cui who thought there was nothing wrong with him, Qin Yu felt that he should reduce his time in the research room appropriately.

Go out and walk more, communicate with ordinary people, experience laughter and...

Forget it, if it makes him feel pain.

Qin Yu is not sure whether the other party can live without incident.

"It's okay, stay in your laboratory." Qin Yu pointed at the door, indicating that he could leave.

"Boss, I want to apply for a new project, I need funds to purchase equipment to complete..."

"Look for Mr. Hua, she has the final say here." Qin Yu pointed to the door again, "Go, hurry up, I don't want to see you now."

Shi Cui spread out his hands innocently, and walked out of the room with countless questions.

Who am I, where am I, what am I doing wrong? ? ?

"Boss, do I still need to report?"

Mark, who was waiting in the same place, thought that everything that should be said had already been explained.

"No, you can go out." Qin Yu needs to digest it.

Then, go see the children.

They are temporarily arranged in a small town, which is hidden enough to provide them with the best conditions.

Bai Ze and Yi Tiao Ju are watching the children, and he will go there in person later.

As far as we know, when the radiation spreads rapidly, covering the entire contaminated area.

The owner of that heart is the teacher who is in the classroom.

was the first to be exposed to radiation, distorted and corrupted.

But he eventually became the children's savior, an umbrella.

protected all the children in the classroom and used 'singing' to appease them.

Yes, the weird accent of the heart has a soothing effect.

is amazing, it's incredible!

Now, he is going to visit the children, hoping to learn the complete truth from them.

Then, decide how to solve the beating heart.

"Is the child awake?" He met Bai Ze at the entrance of the hospital. He had just finished talking with someone.

"Some of them are already awake, they are in a very good condition, their physical signs and various indicators are stable.

Except for some surprises, other aspects are good... incredible. "

Bai Ze said with a surprised expression, and he was also shocked by it.

As far as he knows, this is a miracle!

"I thought that only you were good at creating miracles. Now, we have found another one."

Bai Ze embraced his arms and said as if jokingly: "Now, I am a little beginning to believe that there are miracles in this world."

Qin Yu smiled lightly: "I told you a long time ago that miracles exist."

Four hours later, Qin Yu walked out of the hospital building.

Now, he is sure that this is a miracle, a real miracle that happens around people.

The children dispelled Qin Yu's doubts in a positive tone.

Liang Desheng, children's favorite and beloved teacher.

At the moment when the radiation came, and the moment he fell and deformed, he turned into the last barrier.

Use his own life and will to protect all children.

His singing not only has the effect of soothing the soul, but also has a hypnotic function.

"We have been sleeping for a long time."

"Then, I woke up one day, and a voice asked me to go to the window."

"I walked to the window, and then, I saw the robot outside, and then I waved to it for help... I was scared!"

The horrified expression in that freeze-frame photo is not because of his environment.

The virtual flesh and blood on the wall and the beating heart in the middle.

Yes, they were frightened at first.

But when they realized what it was, what was happening outside, and they were protected.

All the fears disappeared, and what he was afraid of was actually [Assaulter].

"I thought, I thought it was aliens, they attacked our world, and Teacher Liang is protecting us."

Thinking back to his expression when he mentioned this incident in his mind, Qin Yu couldn't help but want to laugh.

bitter smile!

But his heart is very complicated, he, the owner of that heart.

is the real hero.

What kind of teacher is , who can still be recognized and loved by children even when he becomes a 'monster'. UU Reading [www.uukanshu.com](http://www.uukanshu.com)

The flesh and blood hanging on the walls, the squirming tumors, the heart hanging from the ceiling.

weird singing, any normal person.

Adults will be scared when they see it.

After experiencing the initial panic, the children instinctively choose to rely on and trust.

Such a person shouldn't just die like this.

"Eve, connect with Dr. Shi Cui."

Activate the nanoworm, and Qin Yu rushes towards the administration building like a gust of wind.

At this time, the speed of the rail car is too slow for him.

Chief Executive Office, Shi Cui is reporting his new project to Watson.

"This project will give us a deeper understanding of aberrations. Maybe I can figure out the nature of aberrant genes."

"It is controllable. Will... Will is the key. It has always been. I may have looked in the wrong direction before."

"It is like a clear thread. If I can figure out what is happening to it, I can link all the clues together."

Watching Shi Cui describe his plan passionately, Watson also recognized the feasibility of the project in his heart.

If, this can allow them to completely grasp the aberrant gene.

Then, no matter how much investment it is, it is worth it.

"I..."

The door was pushed open without warning, and a voice interrupted her decision: "Leader Shi, your application is forbidden."

#### **Chapter 1066: Drunk**

"What?" Seeing Qin Yu who suddenly broke into the office, Shi Cui was stunned.

What happened? He supported his decision just a few hours ago.

Why, the whole project is going to be stopped now?

"I want you to find a way to save him, he is worth it." Qin Yu looked at Shi Cui seriously.

He is not discussing with the other party, this is an order!

\*

\*

On the way to the miracle town, a fierce quarrel was taking place in the Land Rover.

"So, you just refused." Li Xiao felt absurd.

He has prepared everything, but the other party says she is not ready, what's the joke?

If you are not ready, you can speak earlier, instead of waiting for him to do everyone's work.

and then said no!

"I'm still young, I don't want to marry now, consider children, family."

Ye Mingzhu's attitude is very firm, she doesn't want to get engaged now.

"Then tell me earlier, when I ask you, you should just refuse."

"I, I don't know, I thought I could."

"Do you know the consequences of doing this?" Li Xiao said with an ugly face.

The family didn't approve of his relationship with Ye Mingzhu. The previous meetings were very unpleasant.

When he finally solved the problem, Ye Mingzhu backed away.

Now, how does he explain to the family?

What made Li Xiao even more angry was that this relationship made him feel that he was the only one trying to get closer to her.

But she kept backing away, whenever she was about to catch her.

She will slip away cunningly, always at a safe distance.

This exhausted Li Xiao, he was too tired.

If he were the former, he would clearly realize that it is time to stop the loss in time.

But now, he seems to be lost.

can't make a sensible judgment, let alone break up.

In his body, there are like two selves.

Whenever I want to express my true inner thoughts, I say something different.

This is his first time, almost completely involved in a relationship.

Too much investment made him hesitant, blind and crazy.

Like a person who has changed, Li Xiao almost doesn't recognize himself.

Putting her down at the subway station, Li Xiao slapped the steering wheel hard.

took a few deep breaths and calmed down before driving to the town again.

When I saw Qin Yu, Li Xiao was like an eggplant beaten by frost.

is full of "mourning funeral..."

"Are you let someone cook it?" Brother Yu poured him a glass of wine funny and placed it in front of him.

"I'm driving!" Li Xiao said, picking up the drink.

"I'll let the driver see you off." Before he could say anything, he raised his head and did it.

Putting down the cup, Li Xiao took the initiative to pick up the crystal bottle, "Brother Yu, am I not bad, right?"

"The appearance is not bad, the figure is also good, the career is successful, the family background... My Li family is also famous."

"Why make her look down on her, how high a vision she has, I am also responsive to her..."

One cup after another, Li Xiao, who opened the chatterbox, drank half a bottle of whiskey in a while.

"Where am I? You say, Brother Yu!" Qin Yu grabbed the crystal bottle when he saw that he was about to pour himself wine again.

Put the bottle back in the tray, Brother Yu said dubiously: "You are no worse than anyone, you are all very good."

"Then why did she disagree, saying that she was young and didn't want to be stable... just didn't play enough!"

"almost."

"But she doesn't want to think about how old I am this year. Besides, she is not young anymore."

"Really have to wait until thirty before considering these questions?"

After Qin Yu returned to the desk, he continued to review the documents.

Anyway, he just wants to talk, it is enough for Brother Yu to be an honest listener.

The stamina came up, Li Xiao nagging and talking about the process of the two people's interaction.

Those unpleasant, happy and happy, "Brother Yu, what do you think?"

Looking at his drunk eyes, Qin Yu said calmly: "At the right time, when you meet the wrong person, she is not for you."

For so long, Brother Yu has been listening to him complaining about it.

hardly heard a few happy things.

The most mentioned sentence in it was "I want to be responsible to her, she will regret it if she leaves me."

This doesn't sound like love, but like responsibility and the Virgin.

He reached the age of taking responsibility and wanted to start a family, and Ye Mingzhu appeared at this time.

Li Xiao put a lot of emotions into her, including the sense of responsibility he ignited.

still has a bit of pity, thinking that he brought her back to a normal life.

If she leaves herself, she will change back to the way she used to be.

She is also responsible for this and cannot let her fall.

Everything is what he thought, and he never asked what he wanted.

The typical mentality of Our Lady of the Savior, as if Ye Mingzhu couldn't live without him.

The fact is, even if the other party leaves him.

Even if you can't marry into a wealthy family, you still have enough chips to make yourself safe.

Find a rich and honest man to marry and be a rich woman.

is simply a search for easy thieves!

Everyone says that the one who invests the most in a relationship is the loser.

The best thing is to go both ways.

In this relationship, Li Xiao, who put too much emotion into it, lost terribly.

Compared with money and time, emotion is Li Xiao's most precious asset.

And he, before he can figure out the opponent's hole cards.

Stud!

But he can't be blamed, it's just that he happened to meet Ye Mingzhu just during the transition period.

Perhaps, this is the sharpening he needs to go through.

"Yes, she is, she is my stumbling block." Li Xiao said staggeringly.

couldn't open his eyes for a while, and kept yelling "One more cup."

Hearing the movement, Yan Xue came in and wanted to see if they had any needs.

"Get him a bottle of water." Qin Yu said silently.

"I don't, don't want water, wine, drink." Li Xiao shouted.

Seeing that he was so drunk, Qin Yu stepped forward and took the mineral water.

motioned to Yan Xue to leave first, sitting beside him, twisting the water and saying, "It's wine, Mao Xiong's vodka."

Li Xiao picked up the cup posted it in front of her eyes, looked at it, and then drank it.

smashed his mouth, his eyes were in a daze and asked curiously: "This, this wine... enjoyable!"

"It's fun, you continue to drink, and you have enough." Brother Yu filled him up again.

咚咚, drank two bottles of water.

Alcohol stamina came up, Li Xiao lay on the sofa with his head tilted and fell asleep.

Brother Yu didn't need to continue to comfort him anymore, and went back to work after returning to his desk.

After sleeping until dark, Li Xiao sat up with his head on his head.

"I drank too much?" Rubbing his temples, my brother was embarrassed this time.

After so many years he hasn't drunk so drunk, his head hurts terribly.

"I have someone cook a hangover soup, drink some first, and then discuss business later."

"Okay." Li Xiao frowned, letting go of his hands kneading his temples.

looked at Qin Yu, embarrassed and laughed at himself: "This time I am embarrassed."

"It's nothing, it's just the two of us." Qin Yu said without looking up.

"You didn't do anything strange, did you?" Li Xiao picked up the soup and looked at Qin Yu uncertainly.

looked up at his gaze, Qin Yu shook his head and said: "Nothing, I promise."

"Thank you." Li Xiaogang relieved.

Then, he saw Qin Yu standing up on the table, picking up his mobile phone with his back to him.

changed a spare battery, jokingly said: "Except for this interesting video."

#### **Chapter 1067: reverse**

"Brother, everything is easy to discuss, can we delete the video." Li Xiao chased him all the way.

"I uploaded it." Qin Yu pointed to the terminal.

"Kylin, help me delete the video." Li Xiao quickly turned on the terminal, and he knew that Kirin could do it.

Because, as far as he knows, Kirin is the cloud terminal of the entire Miracle Company.

is like the mother of AI intelligence.

"Insufficient permissions!" Kylin.

"Please, help." Li Xiao pleaded.

"Do I need to repeat it again? In colloquialism." Qilin.

"What is that?" Li Xiao was surprised.

"Are you confused about the situation, where to cool down and where to play." Qilin.

Li Xiao said silently: "Very well, the conversation is very pleasant."

"Yes, very pleasant." Kirin.

"You can leave now." Li Xiao closed the terminal decisively.

Seeing Qin Yu's suffocation, Li Xiao asked with a full face: "Whoever sets the program, shouldn't it be honest and friendly?"

"This is a sign of honesty." Qin Yu smiled and said, "Mr. Can't figure out the situation?"

"Ah, let's talk about the imitation ecological center."

Li Xiao chooses to change the topic: "The equipment has been entered and is being debugged. When will your people arrive?"

"Tomorrow, didn't my secretary notify you?" Qin Yu asked.

"I was notified, so I came to see you... The admission time may be delayed." Li Xiao was helpless.

"What's wrong?" Qin Yu was surprised.

"The above thinks it's too dangerous, I want to wait..."

This is the purpose of Li Xiaolai. He is here to inform Qin Yu of the postponement of the project.

"Is it the idea above, or yours?" Qin Yu asked.

"Of course it is above." Li Xiao said in surprise: "Why do you think it is my idea?"

"You are the county magistrate, and I will definitely ask for your opinion."

"So, you are asking me what I think?"

"Yes, what do you think?"

"I think miracles are capable of dealing with various crises!"

"Is this your idea?"

"Yes, my thoughts." Li Xiao replied affirmatively.

"Yes?"

Qin Yu went through the various possibilities in his mind, and had an idea in his mind: "Just do it... enter the venue as planned."

"How do I tell the above?" Li Xiao needs a reasonable explanation.

"The answer is not already there, you said just now."

Qin Yu smiled, and said: "The miracle can handle it, no matter what the risk, we can handle it."

"Well, I hope it can be heard from above." Li Xiao regretted what he said just now.

He should be more tactful, maybe Qin Yu would consider it more thoroughly.

Now, he will be busy in the next few days.

Having made a decision, Li Xiao didn't stay any more, he wanted to rush to report to work.

also to ensure that everything goes smoothly for admission tomorrow, the follow-up handover and detailed arrangements.

Finalize the list of the first batch of immigrants, qualification review, and notification time.

Transportation, accommodation, safety, etc.

Li Xiao likes this kind of busy feeling, which allows him to dedicate himself to it and stop worrying about the messy things in life.

Just, should I call her?

sent away Li Xiao, Qin Yu called Yang Chengjun's number.

After setting up a communication relay station between the Earth and Mars, the cost and signal have been optimized.

It is also more convenient and stable to make interstellar long distance.

"Hey, Brother Yu, is there any fun to share?" The pen crossed the paper, and Yang Chengjun was working on the document.

Recently, the two have often talked to each other to eliminate the long and boring signing time.

"Brother is about to lick the dog, forget it?" Qin Yu put on the headphones and chatted with him about gossip.

"Really, is he really drunk and complain to you?"

"Yes, it's like a girlfriend who complains about a woman on TV, I can't believe it."

"I can't believe it, he has always been like a big brother..."

"I always think so."

"Should you have some fun for him?"

"Do you think it is reliable?"

Talking about gossip can let Yang Chengjun understand the current situation and relieve his irritability caused by the boring and boring work of Mars!

is like an emotional channel, ingesting positive energy and pouring negative energy.

This will keep him normal, and Mars' work requires him to stay normal.

After the gossip, the topic naturally talks about work.

A description and exploration of the whole picture of Mars.

Resource collection, analysis, marking, construction progress of weapons and robot factories...

They have a lot of work to do, including an underground lake under the Antarctic ice.

"We found algae in the underground lake. Although only a small amount, it ignited the hope of scientists..."

The catharsis of inner emotions made Yang Chengjun no longer feel resisted and bored with work. was full of smiles in his tone, as if he were having an interesting chat.

"Where is the livable place?" Qin Yu asked.

After surveying the underground lake and obtaining accurate data.

The Mars Committee decided to build the largest ecologically livable place in history near the Antarctic ice underground lake.

The Mars Committee is a government-led democratic parliament, and all members are voted by immigrants.

The chairman of the parliament is appointed by the government and is responsible for the normal operation and coordination of the committee.

On the surface, the committee is the highest authority on Mars.

In fact, leaving the support of the company, they even have problems eating.

Therefore, the livable place is actually a company project.

It's just that, nominally, it is led by the committee, and it is the force of unity of the whole people.

From the establishment of the project to the start of construction, it is the common will of all immigrants.

Use honor and solidarity in exchange for low-cost labor.

to create their own homes for immigrants, but the right to use this home does not belong to them.

Even if it is the right of residence, they can't let them have the final say.

Participation belongs to participation, rights belong to rights and interests.

The right of interpretation belongs to the Mars Committee...

"The project is divided into four stages, each stage can accommodate 10 million people. It took six years..."

After completion, it can accommodate 50 million people, four large-scale R&D centers, and hundreds of commercial blocks.

36 controllable nuclear fusion is arranged in the center of the ring umbrella to provide energy for livable places. "

This is a huge project, the whole project is like a ring umbrella doll.

is surrounded by rings, from top to bottom, from the inside to the outside.

To put it simply, countless five rings are stretched upwards into a tower-shaped fragrance.

"Have you considered the potential risks of nuclear power plants? In the event of an accident, it is a bomb in the heart."

Placing nuclear power plants in a central location is conducive to line layout and energy supply, reducing losses.

can also be tantamount to planting a time bomb in the middle of the city.

"The institute has designed a four-layer protection mechanism to ensure that it is foolproof.

It can also be operated manually in times of crisis. Both the main valve and the backup valve can shut down the nuclear power plant. "

Yang Chengjun can only guarantee the ultimate, absolute security is impossible.

"When will work start?" Qin Yu asked.

"At the beginning of the month, the groundwater pipeline layout must be completed first, and the foundation must be laid first!"

"Well, the information is communicated at any time, I will let Secretary Xu follow up and call me directly if you have any problems."

"No problem, I won't talk to you anymore, I have to get off work."

"OK, remember to have a drink, you deserve it..."

was about to hang up, Qin Yu suddenly thought of something, "Do you think we should open up interstellar commerce?"

Let Vulcan products flow to the market for commercial use, develop interstellar trade, and let more people join in.

"Do you think it's time?" Yang Chengjun asked back.

"Is it time?" Qin Yu asked back, he had too many projects on hand to execute.

There is also a big stall in the polluted area, Qin Yu is considering whether he can handle it.

Actually, I was thinking about whether the people below could cope with it.

As far as he knows, Xu Hao now has the company in charge.

Other executives are similar.

Watson is not much better, he is responsible for the operation of the town, the coordinated operation of the hive and all aspects.

There is also the management and control of the contaminated area, the docking, the transportation and coordination of materials, and I can't wait for a person to be countless.

As bosses, the two of them are already busy.

One can imagine how busy the people below are, the high-load work intensity, and the long time will cause trouble.

"Wait! Wait until the settlement center and the project on hand are over, stop for a while."

"Okay, listen to you." Yang Chengjun said.

"Always contact!" Qin Yu said.

"Now I really want to have a drink." Yang Chengjun smiled and ended the call.

Honeycomb, Qin Yu saw that heart for the first time.

In other words, he should be called Teacher Liang.

"Is there a way for him to survive?" Qin Yu asked.

"He is alive now, only to become a heart and... a pile of flesh and blood."

Shi Cui pointed to the aberrant flesh and blood that grew and clung to the heart. This is him.

"I'm talking about consciousness." Qin Yu observed this mass of flesh and blood.

"impossible."

Shi Cui said very firmly: "This is like a format, he has been fixed."

" " is like removing all redundant functions and developing one of them to the extreme.

For this extreme, he must devote everything, everything. "

Moreover, this change is irreversible. UU reading [www. uukānshu.com](http://www.uukānshu.com)

Shi Cui couldn't think of a way to regain consciousness, just like a brain-dead patient.

Only the body is alive, and the radiant energy gives him the ability to function by faith and instinct.

In other words, it was his strong belief that he wanted to protect the children before he died.

In some way that is incomprehensible, it changes the aberrant flesh and blood.

not only prevents him from harming the children in the 'body', but also isolates and absorbs radiation from the outside world.

The more radiant energy absorbs, the stronger it is.

"He is like a natural growth guardian barrier. If it absorbs enough radiation, it might cover a city."

Flesh and blood barrier, is this okay?

Imagine that the entire city is enveloped by a net of flesh and blood, and people live below.

In the middle of the sky, a huge beating heart hangs.

This feels so weird, Qin Yu shook his head to disperse the picture, he had to calm down first.

Seeing that he didn't speak, Shi Cui knew he didn't want to give up yet.

Out of loyalty, he expressed his conjecture: "Boss, I have an idea."

"Say." Qin Yu was also thinking, and thought of a possibility.

"The super \*\*\*\* gene, if it is the kind of gene used for group leader Jingyuan, even if the change cannot be reversed."

"Maybe, there can be other developments."

Mention of Shi Cui, who is a super \*\*\*\* gene, no one knows the enthusiasm in his eyes.

## **Chapter 1068: loyalty**

The second-generation Super God Gene Primarch is worth 50,000 beliefs.

For Brother Yu, this is not a small sum.

Moreover, he also...

"Watt?" Looking at the number 61532 above the mall.

Brother Yu is stupid!

Where did this belief value come from...

\*

\*

In subspace, the huge Medusa flagship is anchored above the orbit of a super giant planet.

This planet is 300 earth-sized, with volcanoes all over it, and a hostile environment.

It became the temporary resident of the exploratory team and was completely occupied.

In fact, it is not accurate to say that full-scale encroachment.

There are only a few intelligent creatures on this planet, shrouded in long-term radiation.

The morphological development of intelligent creatures has also become strange and strange.

There are human-standing creatures like lizards, and crawling creatures with wisdom, language and social forms.

There are also distorted, evil, and sometimes chaotic and \*\*\*\* chaotic holy artifacts.

The exploration team just conquered these class-ruled races on this distorted planet.

The volcanoes that can be seen everywhere look like large tracts of sores, with jagged rocks, and the stone pillars like spears are inserted diagonally into the ground.

Observing this planet from deep space is like a fireball about to go out.

But in fact, full of vitality!

The biological race here has long been accustomed to the harsh environment of subspace.

A volcano that is always active has a special substance in its eruption.

In the process of volatilization, it will react with the elements in the air.

A natural barrier is formed in the upper strata of the planet to block the strong direct radiation of radiation.

At the same time, it also shelters the creatures living here.

This is why He Wuhui chose this planet as his base.

Survey, analysis, collection, observation, utilization...

The entire fleet is fully operational, with the exception of Jefferson.

He wants to control the attached races from He Wu's hands.

Then, I took them to a towering volcano and started building construction projects at the foot of the mountain.

A city built entirely of stones rises from the ground at the foot of the mountain.

In order to avoid the destruction of the city by the molten eruption, they dug a complicated drainage canal in the mid-levels.

Let the hot magma flow along the sides of the city towards the bottomless plate faults, forming a natural barrier.

In the center of the city, a hundred-meter-high megalithic statue stands on the Quartet altar.

At this moment, Jefferson was standing in front of the Quartet.

Wearing a white bronzing robe, he looked solemnly at the prostrate sub-race.

"We are guided by the emperor and come from the ancestral land far away in the deep space."

The loud voice resounded everywhere, and the densely packed intelligent creatures on the ground listened quietly.

Until a loud shout rang, "Show our loyalty to the emperor."

"Offer our loyalty to the emperor."

The head clinging to the ground is high, and the deafening cry penetrates the clouds, announcing the existence of the emperor to the world.

\*

\*

Where did the faith come from? Brother Yu was completely confused.

But he knew that he had the right to choose.

Should I redeem the second-generation supernatural gene and spend a huge price trying to save Teacher Liang?

"Wait for a while." Looking at the beating heart again, Brother Yu had a decision in his heart.

save!

He doesn't know whether the second-generation super \*\*\*\* gene can play a role.

He only knows that if he doesn't do it, he will never pass the hurdle in his heart.

He will feel guilty and blame himself for it.

This incident will always accompany him and become a lifelong regret.

So when he returned to the laboratory again.

There was an extra suitcase in his hand, which contained the second-generation supernatural gene.

"Let's start!" Qin Yu handed the box to Shi Cui.

Opening the box, Shi Cui saw the Gene Primarch stored inside and felt the terrifying power contained in it.

He wants to take it as his own desperately, and the loyalty rooted in the soul makes him loyal to the command.

When he came to the heart, Shi Cui's fingers twisted and transformed into tentacles, piercing the epidermis to form gaps.

Subsequently, he implanted the gene progenitor into the heart.

After doing all this, Shi Cui returned to Qin Yu and said, "Super God Gene, do I have a chance to get it?"

"Yes, do it well." Qin Yu patted him on the shoulder.

Shi Cui straightened his waist, as if he was encouraged and said, "I will not let you down."

During the conversation, the crack on the surface of the heart healed.

The second generation of super \*\*\*\* gene progenitor is completely wrapped in the body by the heart.

The surface also began to change, with a faint golden halo illuminating the heart.

The beating rhythm is slow and heavy.

Boom, boom...

Like a drum beat, it hits the atria of Qin Yu and Shi Cui.

Before you know it, the beating frequencies of the three are exactly the same.

The surface of the heart is shining and translucent, like a lampshade made of crystal, and the light condensed inside is a bulb.

The dazzling golden light seems to symbolize hope.

Subsequently, the golden light spreads outward along the hyperplastic flesh and blood.

The wall was illuminated, and then the whole room, everything was covered with a golden coat.

The serene and comfortable atmosphere makes people drowsy.

Qin Yu opened his mouth wide and yawned tiredly in his eyes.

The same is true for Shi Cui, if he can, he will go to sleep for three days and three nights now.

"Wake up." Qin Yu grabbed Shi Cui's arm and shook it vigorously to keep him awake.

Shaking his body, he walked quickly out of the laboratory.

Out of the laboratory, close the door.

That kind of eyelid fights, the dizziness of the mind disappeared.

"What a terrible ability. UU reading [www.uukanshu.com](http://www.uukanshu.com)" Through the isolation window, Shi Cuixin observed his heart with lingering fears.

Outside, the radiation floating above the contaminated area seems to be called invisible.

A few minutes later, a low-level radiation threat appeared in Miracle Town, and the alarm sounded!

Confirm that the radiation is pulled by the heart and absorbed and swallowed.

Qin Yu ordered the alarm bell to be turned off and the blockade continued.

"We have to send it away." Qin Yu looked at the alarmed executives.

"The contaminated area, how about putting it back into the contaminated area?" Zhu Ying made an opinion after understanding the situation.

"I agree." Watson stated.

She just wants to ensure the safety of the small town, where the researchers' family members live here.

Once an accident occurs, the damage caused is immeasurable.

In any case, that heart cannot stay here.

"I agree." Shi Cui also agreed, which surprised Qin Yu a bit.

I thought he would refuse, and forcibly leave the heart for research use.

After most people agreed, the whereabouts of the heart came to a conclusion.

Before the meeting was disbanded, Qin Yu asked again: "Are you sure, he has no signs of regaining consciousness?"

Shi Cui, who walked outside the door, stopped and definitely responded: "I'm sure, he can't come back again."

This news made Brother Yu feel heartbroken, 50,000 faith points, just so much trouble?

With a helpless sigh, Brother Yu could only comfort him in his heart: "At least, I have tried my best."

"Just do it!" Nodding to everyone, Qin Yu left the deserted closed town.

That's all for today's work, and it's time for him to go home from work.

Soon after, a team of RRT team escorted the heart away, and the town was once again lifted from the blockade and returned to normal.

## **Chapter 1069: Cool down**

The existence of polluted areas has caused chaos in the nearby neighborhoods.

Although it will not develop to burn, kill and plunder, it can also cause frequent violence.

Like fighting and robbery, this kind of incident is normal.

The most classic is nothing more than blockade and robbery.

There are often vehicles, and they are blocked by vehicles rushing out of the road in the middle of the night.

or obstacles arranged in advance!

Xu Lao San is a veteran in this industry, he has a professional team.

Besides, they are all my own...

It was his brother-in-law who drove, and the members of the robbery were his two brother-in-laws and two nephews, and he himself was the commander-in-chief.

He likes the title 'commander in chief', which sounds very tall.

Xu Lao San has lived at the bottom all his life. Only when he was a robber, he felt that he was at the top of society.

The top layer...

This is the site of the government and the pollution area management association during the day.

At night, the ten li before heading to the control zone were his site.

Today is no exception, Xu Laosan is hiding in a dark alley.

is holding kebabs in one hand and beer in the other.

There is no need to be nervous at all in this job, just wait for the fat sheep to come.

So, before the fat sheep comes.

He can eat meat, drink a big bowl, and don't let himself go drunk.

buzzing~

The roar of the engine sounded, which means there is a job.

At the turning point ahead, a small truck with a solid black body and no signs on it is moving forward.

The lights behind        showed that more than one car had arrived.

"Brother, come to live." The brother-in-law who watched the wind at the alley jumped up and put the native hand in his hand against his shoulder.

The robbery is full of flavor!

"Hey, one, two, three."

"Three cars, come to a big job." Xu Laosan rubbed the oily hands on his body roughly.

got up and grabbed the hand guns at his feet, Xu Lao walked out three big steps.

Other people spontaneously clustered around him, a bossy Xu Laosan sitting in the alley with a big horse.

Next, just wait.

waited for the three trucks to drive across the marked line, and the torn bread in the opposite alley suddenly rushed out across the middle of the road.

Three minivans with pure black glass, which could not be seen through, stopped in the middle of the road.

"Ha, got it!" Xu Lao's three-step meteor led people to rush up.

found that there was no movement in the car, so he knocked on the window with his hand arrogantly.

"What's so special, come out for Lao Tzu, or I will kill you with one shot." Xu Laosan yelled.

The others scattered spontaneously and pointed at the cab with their hands or watermelon knife.

Zizi~

The car window fell, and the corner of Xu Laosan's upward mouth suddenly froze.

Because what appeared inside was not the face full of horror he expected.

is a pitch-black muzzle, and the metallic luster reflects fear in his eyes.

Xu Lao San doesn't understand guns, and the guns in his hand were bought from the old man in his hometown.

I'm not sure if Xu Lao San can be used, he just wants to take the opportunity to get a vote!

But he can say with certainty that the muzzle sticking out of the car window and pointing to his face will definitely work.

Automatic...semi-automatic...

DaDaDa, it became a corpse full of flowers.

Now, Xu Laosan is very sure.

He won the lottery!

"The guy in his hand looks good, take me to see." In the cab, the heavily armed Yuri hooked his finger.

Xu Lao San was very acquainted with the gun, and pointed his gun at the ground.

Put down the finger on the trigger and pinch the handle of the gun with \*\*\*\* to make sure that there is no misunderstanding.

just so cautiously, bang~

Someone shot.

Xu Laosan's legs shook, and the hand between his fingers fell to the ground.

咚~

The gun didn't go off, but the gun fell heavily on his toe.

can be used to display the old objects in the history museum, the weight is not light at all.

Xu Lao San bit his lower lip, tears came out.

can still keep his hands up, to say, 'I'm not threatening.'

Because he has clearly seen that one of his brother-in-law is lying on the ground quietly.

The little red dot on the center of his eyebrows was bleeding out, and his finger was on the trigger position.

is obvious, very obvious.

The pupil seems to be a focused lens at this moment, enlarging every detail in my mind.

Xu Lao San doesn't want to die.

So, he uses the best way he can think of to show cooperation.

"Good performance, guys, make room for our new friend."

Yuri patted the car door, and Xu Laosan and his accomplice got into the car obediently.

The three cars started again.

The leading car directly smashed the small torn bread across the middle of the road, leaving no scratches on the bumper.

spinning the broken bread that was parked on the side of the road, but it was about to be knocked apart.

Xu Laosan and others were handed over to the guard post in the control area, and the convoy started again.

In front of the separation wall, the team has undergone the most stringent inspections.

Through the opened steel gate, he entered the contaminated area again and drove to the destination.

They are here to place the 'Healing Heart'.

The name , someone heard the boss mentioned it, so everyone called it.

"Attention, leave things at the destination and withdraw, don't do unnecessary things, understand?"

"clear."

The car behind came an affirmative answer over the radio.

However, the ground bulged in the next second, and the whole car was overturned into the sky. circling and smashing into a tree, a twisted Roshan climbed out of the ground.

"Damn, the RRT team was attacked, repeat, we were attacked."

"This is the command center. I received it. Please describe the characteristics of the attacker."

"The \*\*\*\* characteristic, that is, a group of lumps of Roshan."

The call ended, and there was a fierce firefight on the other side.

"At 4 o'clock, new distortion."

"Be careful, there is another one at 9 o'clock."

"Cover, protect the No. 2 car, and ensure the safety of the cargo."

"Captain Yuri, do you need to send support?" The contact person in the command center is waiting for his reply.

"Captain?" The operator who did not get a response asked again.

"No need, we can handle it." Yuri's voice sounded.

The sound of the firefight became short, and it was obvious that the battle had already come to an end.

They are just cleaning the battlefield or solving the remaining aberrations.

"Can you continue the mission?"

"Yes, we can, I'm checking the vehicle..."

"Please reply after confirmation."

"No problem, the mission continues."

"I will bring back gifts, many, many gifts!"

"I wish you all the best, Captain Yuri."

"thanks."

Seeing the two cars land on four wheels again, Yuri slapped the doors and shouted, "Clean the battlefield, check the cargo, and move faster."

"Head, I'm done."

All the deformed flesh and blood were contained and loaded into the truck. This situation had long been expected.

Otherwise, why would Yuri bring three cars.

The degree of danger and the frequency of fighting in the contaminated area are far more serious than the outside world knows.

Here, battle takes place every second.

is not only an outsider, but also more frequent battles between aberrant bodies, aberrant bodies, and unknown creatures.

To this day, everyone is grateful for the idea of the wall.

Without this wall, no one would know how bad the situation could be.

Maybe the pollution will stop, but no one can guarantee that the aberrations and unknown creatures will not run out to threaten human survival.

Look at the bald eagle on the other side, what has become of misfortune.

The place where RRT is going is the core area of the polluted area.

is the central area, and they want to place the 'Healing Heart' at the central coordinate point.

Also, you must clean up to make sure there are no threats around before you can leave.

\*

\*

"Is everything going well?" Jiang Xiaoshan came out of the kitchen and put the washed dishes on the table.

"Everything is going well now." Qin Yu turned off the terminal.

It's family time now, so let other people worry about these things.

It's not a good habit to take work home!

Especially when there are four women in the same room...

Since Lazy Cat came back, the four fairies have been together much longer than before.

Because they all know that there is a chance for a lazy cat to wait for the bed.

Qin Yu will stay with her as long as she is still there.

If they do not take the initiative, they can only guard the empty nest and let themselves dry up!

Women, how can you wither?

So, as long as everything is okay, Li Wanxing and Wen Yaxuan will come to eat.

As for Jiang Xiaoshan, she captured the lazy cat's stomach with her good cooking skills.

asked Lazy Cat to agree to live with her for the entire vacation.

Waiting for work with ease, this round relies on his own craftsmanship.

Jiang Xiaoshan wins!

Today's dinner is no exception, Jiang Xiaoshan personally performs it.

The bottom of the pot is all fried by herself.

If the cost of materials is not taken into consideration, if it costs more than 2,000 yuan, this hot pot is undoubtedly super successful.

"Wow, Shanshan, the bottom of this pot is delicious." After a taste of the soup, Lazy Cat gave up the dip.

She wants to eat the original flavor of the bottom of the pot directly, the dipping sauce is not worth her time.

The lazy cat, who omitted the dipping sauce, delivered the hot lettuce directly to his mouth.

"and many more."

"do not."

"Ahhhhhh, it's hot~"

Tongue sticking out, UU reading [www.uukanshu.com](http://www.uukanshu.com). The lazy cat that com cools with the palm of his hand, jumps his feet hot by the soup absorbed by the lettuce.

"Hahaha, Yueyue, haha..." Wen Yaxuan leaned forward and closed with a smile, but did not forget to pinch the \*\*\*\* off.

Wipe it in the dipping sauce and put it in the mouth.

During this process, she can still laugh at the lazy cat with her finger, making fun of her funny behavior.

Speaking of eating, Wen Yaxuan is absolutely amazing!

No one noticed that Qin Yu entered the kitchen and came back again.

Then, he put his arms around the lazy cat's waist in public, and kissed her hot red tongue with his mouth.

The ice cube in it instantly calmed the lazy cat.

The coolness dispelled the hot burning sensation and made her feel soft.

In the next second, his eyes turned to the sisters.

Six eyes, staring at her without blinking.

It seems that she is a rare protected animal that is endangered, full of novelty.

With the beating of the second hand, his face became redder and redder.

Lazy Cat wants to push him away with his hands, but puts his hands on his chest, when he wants to use force.

found that he couldn't do it anyway, and instead posted closer to him.

Wen Yaxuan, who was still laughing at the lazy cat before, gradually disappeared.

was eating his favorite shrimp ball in his mouth, but it would be like chewing a wax ball.

In an instant, there was heat in front of my eyes, and the bottom of the pot that was fried with more than 2,000 yuan was not fragrant!

## **Chapter 1070:**

After dinner, Jiang Xiaoshan is going to wash the dishes.

Wen Yaxuan and Li Wanxing took the initiative to take the initiative, and the lazy cat ran in and squeezed in between the two to make trouble.

Jiang Xiaoshan was left alone, and Qin Yu stayed on the sofa in the living room.

This is a small tacit understanding that belongs to the sisters alone.

Jiang Xiaoshan is always the hardest and the one who does the most work.

Whether it is housework, daily tidying, washing and cooking, she is the one who does the most and is the most handy.

Besides, she will not refuse anyone who needs help.

So, always give her some extra rewards, just like now.

leaves her cleaning time alone so that she can enjoy the short two-person world.

"Would you like fruit?" Just a few minutes after sitting down, Jiang Xiaoshan couldn't be idle anymore.

The oranges in the melon compote looked delicious, and she planned to peel them and wait for everyone to eat together.

"Come here." Qin Yu patted the position beside him.

Wait for Jiang Xiaoshan to sit down, grab the orange from her hand, and peel it off.

drew the white silk off the top, broke a flap and brought it to her mouth: "Ah!"

"Ah~" Jiang Xiaoshan opened her mouth and held the orange in her mouth.

The slightly sour oranges taste sweet as honey to her.

She is such an easily satisfied woman, a little care can make her miss and move for a long time.

Low positioning, dissatisfaction, no contention, peace of mind!

Therefore, Jiang Xiaoshan is the happiest one.

Even a lazy cat sometimes has distress and worries.

Jiang Xiaoshan alone, Qin Yu feels that she is sensible and modest, always taking care of the feelings of others.

I feel guilty, so I always take care of her time and emotions.

Li Wanxing and Wen Yaxuan, eating and drinking, are not qualified to speak...

Lazy cat~

She has been completely captured by Jiang Xiaoshan's almighty and cooking, so she can do anything.

Besides, she is always the one who supports herself the most.

No matter when and where, Lazy Cat will never hear her retort.

Maybe the lazy cat never realized it, but this is true.

And this fact makes them intimate.

Unknowingly, Jiang Xiaoshan actually hit a beautiful home run.

Besides, nobody noticed all of this.

Maybe, she really did what she wanted.

Become that woman!

When they finish cleaning up, they walk out of the kitchen.

On the sofa, Qin Yu was pinching Jiang Xiaoshan's backbone, slender and white feet.

is like playing with a beautiful crystal handle, squeezing it in the palm of his hand.

"We were exhausted inside, and Shanshan actually had a foot massage." Li Wanxing angrily threw the apron on the back of the chair.

"I want too, I want too." Wen Yaxuan rushed directly to the sofa and squeezed between the two.

"Go away, sour." Qin Yu pushed him away with disgust.

"Where is it?"

Wen Yaxuan's face blushed slightly, and she raised her hand to hit him: "Let you talk nonsense, people's feet are not sour, hate, hate!"

"Oh."

Li Wanxing turned his head and retched, still learning from her previous delicate coquettish voice, "Hate, hate, vomit~~"

Lazy Cat folded the removed apron and put it on the coffee table.

naturally shrank his body into Qin Yu's arms, wrapped his hands around his calves, and watched the advertisement on TV quietly.

A pair of beautiful eyes, raised and slightly closed, just fell asleep peacefully in his arms.

This is what life should be like!

Four years in university, she has been spent amidst the noise of her sisters.

Their quarrel and conversation are like a lullaby to the lazy cat.

This feeling is nostalgic!

"I want to squeeze my feet, hurry up, little sex." Li Wanxing shook off her slippers.

put the legs on Wen Yaxuan and Jiang Xiaoshan's, and put them in front of Qin Yu.

Holding the lazy cat in one hand, Qin Yu kneaded the soles of her feet with his hands.

"Hey, did you make a mistake?"

Wen Yaxuan was about to explode with faint tears in her eyes.

Why can't you get special services only by yourself, and you also say that people have stinky feet, how can it be? Where is it?

People don't have sore feet, woo woo woo~~

"Okay, okay, take it over." Qin Yu reached out and held her foot in his hand, kneading it gently.

This caused Li Wanxing's dissatisfaction, "Hey, can't jump in the queue, I just enjoyed it for a few minutes."

"You jumped in the line, I was the first." Wen Yaxuan.

"I am first, I am first." Li Wanxing.

Seeing the childish performance of the two, Jiang Xiaoshan escaped from between them.

She has to prepare toiletries, Qin Yu's change of clothes and bath towels, underwear, and bathtub cleaning.

Oh, right!

I also want to order an aromatherapy, which can effectively relieve fatigue and make him relax and enjoy.

When everything is ready, go back to the living room.

The fight has ended, and the lazy cat that was supposed to be in Qin Yu's arms is gone.

change to~

Anyway, she didn't want to join the battle of the sofa before her.

I'd better go to wash up first.

It seems that they still need some time.

\*

\*

The next day, Brother Yu withdrew from the muddy battlefield.

After eating the exquisite breakfast prepared by Jiang Xiaoshan, he went to the company for a meeting.

Today is a routine executive meeting, and everyone will attend.

First of all, Xu Hao made a speech on the company's recent strategic development decisions and various issues.

"I believe everyone knows that the company has already started a war with Penguin.

There is an uncoordinated conflict of interest between each other, which involves the foundation of survival. "

"So, the Penguins are wooing the alliance and exaggerating the threat. And they did it."

"The instant messaging giants of various countries, upstream and downstream, R&D platforms and profit-makers, almost all stand in the opposing camp."

Looking at the executives at the meeting, Xu Hao said with a serious expression: "This battle is not easy to fight!"

Miracle Company is very profitable, except for a few micro and small enterprises that are vertically managed by the Republic.

There is no company that can make more money than it. It is still an unlisted company.

But it is better at spending money, and the unit of measurement has always been 'billion' for settlement.

is often hundreds of millions or billions of expenditures.

The budgets of some large-scale projects reached a staggering 11 figures at the beginning.

If you really want to head-to-head with the Penguin Alliance, it will undoubtedly slow the progress of Miracle Company.

This miraculous battle can be won, but how to win is a problem!

Killing one thousand enemies and self-defeating eight hundred, this is not outstanding.

In this matter, the alliance that Penguin has won is very strong.

Everyone is worried about whether everything they own will be eliminated by the personal terminal, an epoch-making technology product.

Under the influence of Penguin's wooing and threat theory, more and more companies are standing on the opposite side of the miracle.

These forces are tied together, even Qin Yu will have a headache.

"In terms of technology, there is a century of gap between the other party and us, but we lack an open platform.

There is no engineer to develop a pan-entertainment APP, the operation is too official, monotonous and boring..."

Positioning, the definition of personal terminal is comprehensive or singular.

Whether to develop in many aspects, these are still unconfirmed.

The company needs to decide as soon as possible to determine who is the enemy and who is the friend.

If the personal terminal does not affect the survival of the current mobile terminal, I believe that more people are willing to choose to cooperate with Miracle Company.

Reversing history will eventually have to pay a price.

If it doesn't involve survival, no one wants to do it.

"In terms of energy, the Supreme Council announced that within the next five years, 50% of coal and nuclear power in the territory will be shut down.

Using new energy technologies, such as water power, wind power, solar power and biological power generation. "

"Environmental issues are still the focus of the world, and the Arctic Iceberg Reconstruction Project has gained attention.

Boss, I heard that this project is supported by you? "

"Yes." Qin Yu responded.

"This is extremely beneficial to the positive image of the company. I suggest that the company's senior management should organize more personal charity projects."

"Seconded."

"Seconded."

Most people agree with this. Naturally, others will not disagree on this matter.

Carrying out more charitable activities is not only beneficial to the company, but also very helpful to the personal reputation and status.

Even if it's for a show, as long as the money is actually spent, it will eventually provide some help.

"I only have one thing to say about charity. You can donate less or don't do it.

However, donations must not be fraudulently committed. Once a similar situation is discovered, it will be immediately expelled and held accountable. "

The impact of fraudulent donation is extremely bad, involving integrity, which can be fatal to a company.

After everyone digested, Xu Hao went on to say: "I don't have time, or I don't know about charity.

You can choose to donate to the company's charitable organization. The monthly donation list will be publicized to the whole society, so don't worry about taking up too much time for you. "

After Xu Hao finished his speech, Yang Chengjun began to introduce the development details and future plans of Mars.

The livable land project is naturally the top priority. "The construction of livable land is inseparable from the support of the headquarters and everyone.

Here, on behalf of the committee, I would like to extend an invitation to everyone. Welcome to visit Mars at any time. It's a vacation. "

"Mr. Yang, what's so nice about it all is dust."

"You may be wrong about that, we live on Mars, but beautiful clouds, haha..."

A joke is a joke, and there is no lack of support at all.

Livable place is the escape route for everyone, UU reading [www.uukanshu.com](http://www.uukanshu.com) is panic caused by radiation pollution.

Which one of you here, never thought that one day he might actually be retreating to Mars to live.

No one will deliberately make things difficult for Yang Chengjun in this matter.

Vigorously develop the Mars project, unanimously approved!

Then, it was the reporting time of the research institute, the company's largest expenditure department.

The progress, data, results, future market benefits and prospects of each project.

The importance, strategic significance and value of the company!

Watson, Zhu Ying, Jing Yuan, Cui Geng and Shi Cui took turns to explain the details of the project.

Later, some projects will be cut.

Many projects will also receive more financial support to speed up the progress of research and development.

Previously, the focus was on Jing Yuan.

She manages the most group projects, the most expensive, and many of them are long-term projects.

There is only constant investment in the early stage, and there is no money at all.

This is very much criticized!

But today, she is no longer the only protagonist.

The biochemical project involved in management under Shi Cui's name was questioned by most executives.

Are there too many research projects on radiation and aberrations?

The Beizhou laboratory construction plan passed last time was questioned by some executives.

Do they really need to spend such a large amount of time and money on radiation?
