

Pinnacle 1161

Chapter 1161

Tang He thought for a while and said, "In this way, let's add a friend, I want your power arm."

"Brother, are you serious?" Big brother's excited eyes were red.

"Well, as long as you don't fool me." Tang He joked.

I happen to have to buy a power arm to modify the exoskeleton mecha, it doesn't matter where I buy it.

According to him, that power arm is really good.

Satisfy your own needs while creating value, helping others, and getting satisfaction, why not do it?

"Definitely not, you know when you see something."

"If it wasn't for treating my daughter, I would definitely keep it for myself."

"Okay, add a friend!" Exchange electronic business cards, Tang He went to the station and took the car home

The eldest brother also hurried to the hospital and ran into his daughter's attending doctor in the corridor.

"Mr. Ho, how is your money together?"

"Doctor, no surprise, I can hand it in this afternoon."

"That's good, Xiaoxiao can't wait anymore."

The eldest brother nodded, his tone of voice was slightly choked and said: "But... this money is only enough to pay the previous debt, the operation..."

"Don't worry about the rest, as long as you pay the arrears, I will arrange the operation."

"Thank you, thank you doctor."

The eldest brother held the opponent's hand in tears and shook it up and down vigorously.

"You're welcome, this is my job." The doctor nodded slightly and left.

Wiping away the tears, rubbed his eye sockets vigorously.

The eldest brother controlled his emotions and opened the door of the ward: "Xiaoxiao, Dad is back."

The bald girl lying on the single hospital bed sat up happily: "Dad."

She was pale, but her eyes were full of expression, Xiaoxiao has become accustomed to life in the hospital.

As long as she can be with her father, she is not afraid of anything.

"Xiaoxiao is hungry?"

The eldest brother hugged his daughter, feeling sad, and almost burst into tears again.

"Dad, the nurse aunt praised Xiaoxiao, saying I am brave!"

"Really? We Xiaoxiao are the best behaved."

"Well, Xiaoxiao needs to be strong and don't cry for injections."

I can't help but burst into tears.

The eldest brother patted his daughter on the back: "Xiaoxiao, my father will definitely heal you."

"You will definitely be cured. When the disease is cured, we will go home together, go home, woo woo..."

After so many years of hard work, give up everything.

He finally saw a glimmer of hope, and his hollow heart felt fulfilled again.

"Yeah~"

Xiaoxiao nodded vigorously, and said with a gloomy little face: "Then, where's mom? Will mom come back?"

"Mom!"

The eldest brother wiped his tears and squeezed an ugly smile to comfort him: "Mom is going to make money and treat Xiaoxiao's illness."

"When we are cured, will we go to my mother again, okay?"

Looking up at her father, Xiaoxiao knew her mother was gone.

Because she is sick, mother doesn't want Xiaoxiao and father anymore.

She accidentally heard this when the nurse sister was talking with the doctor.

However, facing her father's comfort, Xiaoxiao smiled brightly: "Well, go with father."

As long as you are with Dad, you can do anything...

Once he got home, Tang He landed in the game first.

The eldest brother is already online, and the data of the power arm has also been sent.

The power is increased by 20 times, equipped with intelligent assistance, and six external slots are available for modification.

The movable detachable port avoids the risk of not being able to match the exoskeleton model.

"I want it, 230,000." Tang He gave the price.

This price is not the highest price in reality, but it is already a sky-high price in the game.

Before him, the highest offer the eldest brother received was 130,000.

"Okay, thank you brother." The eldest brother is not a hypocritical person.

He wrote down this kindness, and he will repay it if he has a chance in the future.

Give things to the planet, the stronghold of the Church of Science.

Tang He, who received the news, also put the money into the other party's actual account.

This saves him from redeeming and saves a fee.

Informed the location of the planet where he was, and learned that it would take half a month to get things.

Tang He got off the game and went to the kitchen to cook dinner with his girlfriend.

"Xiaoya, my mother is urging again, when will we get married!"

Put the washed vegetables in the basket to control the water, and Tanghe took the fish out to clean up, and marinated the flower knife with the ingredients.

"My parents are also urging, every day they say waiting to hold their grandson." Xu Ya said speechlessly.

They think about the world of two people for a few years, and then consider the matter of getting married and having children, can't they?

My parents talked all day, let myself hurry up and get the marriage done.

Such a good man, don't miss it...

Tang He is quite good, but he is not bad, right!

I really don't know what my parents are worried about, they are feeling better!

"If we don't do it this year, we can wait for the child's affairs."

Tang He knew that she didn't want to have a child so early, and he did the same.

I'm still a child, and I haven't made myself clear or qualitative.

How to teach children to grow savagely, just to live?

To do this, Tang He would rather not have children.

"I told my mother the same, and the child is not just raising it."

"You have to teach him how to behave in the world, be responsible for the future, and make him a useful person."

Tang He put the marinated fish on a plate and put it in the steamer.

"As I thought, in any case, let's have the final say on this matter, and wait until we are ready to rebirth."

"If you can't explain, just push it on me and say I don't want it now."

Seeing how he giggled, Xu Ya gave him a charming look.

"Forget it, I have to really say that, my mother should talk to you."

"Just talk!"

Tang He hugged her happily and confidently said, "Auntie likes me a lot."

"That's normal, and it's not enough when it comes to grandsons."

Even her dear daughter has to stand aside in front of her grandson.

There are fish and meat, Xu Ya opened a bottle of red wine from a friend and placed two white candles.

A sumptuous and romantic dinner, that's it.

"By the way, I just received a piece of equipment, 230,000 yuan, let me talk to you."

Tang He remembered the previous transfer and habitually greeted Xu Ya.

"You decide the game, but I don't understand it!"

Picked him a piece of fish and put it in a bowl, Xu Ya mentioned about the house.

"Recently, the surrounding housing prices have risen again. Do we want to buy another set?"

The community they live in belongs to the best school district, and the next door is the No. 1 Middle School in the South District, one of the best middle schools in the Northwest.

Even many well-established famous schools are incomparable. Those who are rich and those who have relationships send their children there.

Moreover, the learning atmosphere is particularly good, and no one plays with you when you are poor in study. Xu Ya thinks this is quite good.

In case they want to have more children in the future, no more places will be enough to go to school.

The boss can't go to a prestigious school, and the second and third can make arbitrary arrangements.

"How many are you planning to give birth?" Tang He raised a glass and touched her, feeling very happy in his heart.

No matter how many more, he is the only child.

It is true that a person is a bit lonely, especially in the current environment, and I have not known the door to door or the door to door for ten years.

You said that you don't have a partner, just like him and Xu Ya.

What's the matter at home, there is not even a negotiator.

The two of them are pretty good, they have a company with each other, and they also have reliable friends.

If social relations become more indifferent in the future, it will be much harder for the child to be alone.

"It's always good to prepare first, be prepared!" Xu Ya said with a chuckle.

"Okay, then buy another set. I remember there are still vacancies in the real estate east of the school."

"Then you go and have a look tomorrow, I will ask for leave if there is something suitable."

Xu Ya still has to go to work, this kind of thing is naturally handed over to Tang He.

"Row."

After a meal, the two of them packed the dishes to the kitchen together.

Xu Ya put on her apron and cleaned, but Tang He was a little restless.

Easy to think...

So what.

He hugged her from behind, shaking his hands restlessly.

Xu Ya's cheeks flushed and wanted to push him away, but her hands were occupied.

"Don't move, I have to wash the dishes!"

"You wash yours, you are the most attractive like this."

Snapped.

The kitchen lights went out, and the mosquitoes lying on the ceiling heard the ping-pong sound.

Then the house began to shake, and there was a strange and terrifying moan.

Buzzing~

The panicked mosquitoes tried to find an exit, but headless flies flew around.

Suddenly a strange stone fell from the sky, covering the sky and the sun.

When Kistler left, only a small pool of blood and mosquitoes crushed corpses were left on the table.

Chapter 1162: Be a dead man

Lying on the sofa with his head resting on Tang He's soft belly.

Xu Ya put the freshly peeled orange in his mouth, and Tang He's expression brightened: "Well, sweet!"

"Really?" Xu Ya broke off a flap, put it in her mouth and tasted it.

"Well, it's really sweet."

"Next time I will buy this one at the fruit and vegetable shop next door downstairs."

"That store is really fresh."

Touching Xu Ya's hair with his hand, Tang He smiled like a Maitreya Buddha.

There are so many psychological thoughts, I don't know how to express it!

There was one thing he didn't tell Xu Ya about the purpose of exchanging exoskeleton armor.

He wants to join the 'Genetic Modification' project and become a genetic warrior.

At present, it is just an idea.

The specifics can only be decided after discussing with Qin Yu.

However, the gene warriors reported on TV are all rags with muscles and golden wheels.

Tang He was a little worried that Xu Ya would not be able to accept her new image.

*

*

What people are most afraid of is neither up nor down.

It's not going up and down, being hung in the air...

Ilibera is like this now, the question in her heart is like a cat's claw.

Hanging up and down, there is a kind of irritability to enter menopause early.

That man asked her to find Jing Yuan.

I can see that the human Ilibera touched the dust of her nose.

"Did the company really lose three power armors?"

"Um."

"what is the problem?"

"You don't need to know."

"I want to know, the boss asked me to come to you."

"Hehe~"

Ilibera panted out of breath at the thought of the other person seeing herself as air.

Pressing her right hand on her chest and kneading it vigorously, Ilibera murmured: "I am angry, I am angry."

For a while, Shinobu thought more and more angry, and took a step back and died on the spot.

"No, I can't just forget it."

Don't do it, don't stop.

"Miko, pick up Qin." Ilibela's patience reached its limit, and she was going crazy.

Buzz, buzz~

The terminal vibrated, and Qin Yu, who was working hard, glanced at it.

Just pick it off and throw it aside.

Buzz, buzz~

Buzz, buzz~

Amusedly pushed him, Yalan picked up the terminal, "Hurry up and pick it up, I'll wait for you to come back."

With a helpless sigh, Brother Yu grabbed the towel from the side.

Wiping her sweat, grabbing the terminal and walking, she said, "If there is nothing serious, she will be dead, she will be dead..."

Hum!

The projection appeared, and Qin Yu was sitting in the living room wearing a pair of big pants.

"what's up?"

Seeing that he was only wearing a pair of big pants, Ilibera realized afterwards that the time she chose didn't seem to be right.

But when the madness came up, she couldn't control herself.

"Boss, I want to change the person in charge of Beizhou Lab."

"reason!"

"We can't get along, if this continues, I'm afraid it will cause serious impact."

"What effect?"

Qin Yu raised his eyebrows and chuckled, he was really curious about the impact.

"I'm afraid I can't help but kill her, that woman is too arrogant."

It was crazy to say that, there is nothing Ilibela dared to say.

But her words made Qin Yu laugh out loud: "Haha, kill her."

"If you want, do it!" Qin Yu shut down the communication without waiting for Ilibera to speak again.

Then, turn off the terminal directly.

If she is able to do so, she should be taught a lesson!

After thinking about it, I thought to myself, "It's better to mention to Jing Yuan, tell her not to make too much effort, Bella is still very useful."

"Okay, is this okay?" Qilin.

A strange picture appeared in his mind, and the faceless model dummy was tied into a strange look with rope.

On the next table, there are candles, whips, sticks...

"Go away." Qin Yu.

Since letting go of the restrictions on the unicorn, it has become more and more irrelevant.

Is it to restrict it again and let it be honest?

Brother Yu gave up again after thinking about it, it was all dirty, and it couldn't be clean no matter what!

Let it roll away and fend for itself.

Going back to the room happily, Brother Yu left the towel on the table.

Just about to continue, take a closer look.

The Yalan people were already asleep, and a mosquito-like tired snoring came from their breath.

"I..."

Standing by the bed stunned, Brother Yu looked up at the sky, wanting to cry without tears.

How can he sleep like this?

With dark circles under his eyes, Qin Yu went for a run early in the morning, and Tongtong was with him.

"Uncle, hurry up uncle, run faster." Tongtong with the little gray ran all the way.

He laughed and waved to Qin Yu, letting him chase him.

Keeping his pace, following him unhurriedly, Yu Ge's inner resentment has not disappeared.

"When she wakes up, I..."

Muttering in confusion, the two of them ran until Tongtong had no energy.

He picked him up and carried him on his shoulders, Xiao Huihui circled Qin Yu's legs and walked home like this.

Back home, Yalan hadn't gotten up yet.

It seemed that she was really exhausted during this time, and Qin Yu didn't call her either.

Squatting down and looking at Tongtong, Qin Yu agreed with him not to disturb her mother, and waited for her to wake up naturally.

Breakfast is just a problem for Brother Yu!

Bake the bun slices on an electric baking pan. Bake them directly without oil, sprinkle salt on both sides of golden brown.

Next door...

Forget it, there is no children in the woods next door.

Tongtong was greedy and swallowed, and then he had a cup of hot milk and hard-boiled eggs.

The food was fragrant, and Ya Lan went down the stairs.

"What do you eat, it smells good!"

"Mum, the breakfast made by uncle is super delicious."

Tongtong turned around and yelled, shaking the steamed piece in his hand.

This child is so satisfying!

"Yes?"

Yalan picked up a slice with a smile, bit her mouth and praised: "Um~ it's really delicious!"

Seeing her teasing smiling face, Brother Yu stretched out his hand and pulled her into his arms.

"Ah~"

Ya Lan screamed, blushing and glanced at Tongtong: "The child is still there!"

Pinch the bun with two fingers, and cover his eyes with the palm of his hand.

Tongtong shouted, "I can't see, I can't see anything."

The look of an adult who pretended not to understand made Yalan laugh out loud: "This kid..."

After eating, Tongtong and Xiao Hui went to play in the yard.

Yalan and Qin Yu looked at him from the terrace: "Have you thought of which way Tongtong will go in the future?"

Yalan thought about it hesitantly, and said, "I don't know, he prefers physical training."

"but I..."

"Worried about his safety?"

You don't need to ask to know what the mother is thinking.

They care more about their children's health than their future.

It is said that the physical fitness road is at the end, is all going to be a mecha division.

But in Yalan's view, it was no different from the big head soldier.

But it just changed the name. It sounds taller, but it's actually trying to fight!

Their family is not short of money, so why do they do such a dangerous thing.

"Bigger, he will have his own ideas, and he can't help you."

Qin Yu told the truth that as children grow older, their ideas will become complicated, and they will establish their own three views and dreams.

This cannot be changed by intervention, unless someone forces him down.

Turn him into an echo bug, Mabao giant baby.

"I didn't want him to be a mommy. In the future, I still want him to live by himself!"

"Then don't interfere with his hobby, just guide it correctly."

"Besides, there is not only one way out for physical fitness!"

Chapter 1163: trap

I mentioned this because Tongtong complained to him in the morning.

Therefore, Brother Yu will specifically talk to her.

But the best way to convince a mother is to make her feel at ease.

Brother Yu is doing this, telling her that physical fitness is not the only way to go.

"The flight base that Lantian is building is for training qualified spacecraft pilots, that is, the captain."

"Although it cannot be said to be absolutely safe, it is better than mecha."

"Also, if he really wants to go this way in the future, I will arrange the safest flagship for him."

The last sentence is Qin Yu's guarantee for her peace of mind.

The existence of Medusa is no secret.

Astronomy enthusiasts have long posted photos of it on the Internet.

Humans all over the world can see its majestic long hull, full of deterrent artillery devices.

The hull armor as thick as a city wall, I'm afraid nothing can penetrate it.

And the fact that it easily destroyed the main Pacific fleet is enough to prove its strength.

Although until now-the company has never admitted.

Being able to pilot such a capital ship is safe even in the face of future wars.

Qin Yu also made a special trip to explain to her what Medusa's actual combat effectiveness represents.

"A spacecraft like the Immigration, even if there are thousands or hundreds, is just a target in front of it."

"Their heavy artillery can't even penetrate the armor."

If it weren't for worrying about the truth being too exaggerated, it would make Yalan question her.

Qin Yu directly told her that the King Kong-class dispatched tens of thousands of ships, and that it was not the opponent of the Medusa flagship.

Unless, Medusa made a mistake and fell into the encirclement by accident.

The next moment, Jing Yuan opened the door of the bar.

The small Qingba was full of people, and each of them looked cold and looked scary.

The bartender in the bar also changed, but Jing Yuan wanted to sit in front of the bar without realizing it.

"A glass of plum wine."

Ordering the money, Jing Yuan cocked Erlang's legs, waiting absent-mindedly for her wine.

Snapped.

A glass of plum wine was placed in front of him, returning Jing Yuan's distracted eyes to focus.

Pick up the wine glass and take a sip on the side of your mouth.

The bartender who wiped the cups at the bar turned to face the wine cabinet, his mouth raised slightly, showing a triumphant smile.

After tasting, Jing Yuan put down the wine glass and continued to hold her head to empty her thoughts.

Until, her arm lost strength.

He lay his head down on the table and passed out.

Wow!

Everyone in the bar stood up, and the door to the warehouse corridor reopened.

Illibela took a brisk step, turning her toes in a circle little by little, humming cheerful music in her mouth.

Woman, how arrogant you are!

"Miss, something is wrong outside." The bodyguard in front of the window said with a grim expression in her ear.

"What's wrong?" Illibela was in a good mood.

"Someone is trying to surround the bar."

Hearing him say this, a bodyguard opened the terminal and wanted to contact people outside.

Then, his face changed.

"Miss, the signal is blocked." The bodyguard looked nervous.

This is not good news, what is going on outside?

Illibera's face sank and she opened her terminal.

Then it was discovered that the signal was also blocked, which made her expression more gloomy.

No one can see that she is in a bad mood now, and they make people overcast.

The other party came prepared, "We have a traitor!"

Except for this, there is no reason why they will be surrounded by people at this time.

"Find a way to get out and go to the laboratory for help."

At the same time, Ilibera patted Jingyuan's face, trying to wake her up.

The next second, the bartender in the bar rushed to the nearest window facing the street.

Pala~

The glass shattered and the bartender rushed out of the bar.

The bodyguard inside reacted immediately, raising the gun and shooting.

The torrential rain fell like bullets and enveloped the entire bar.

Buzzing...

White steam came out of the runner, and the muzzle burned red.

The whole bar is full of bullet holes, dense like honeycombs.

Smoke and dust flew, and dozens of mutants broke in at the same time.

The expected movement did not appear.

"What's the matter?" Fati, who was in charge of the command, changed his expression slightly and turned his gaze to the bartender.

"I'm sure she drank it. People have been in a coma." The bartender explained hurriedly.

He didn't dare to deceive himself if he wanted to come, he who betrayed BlackRock, then deceived himself.

There is no place in this world where he can hide and live.

"Go and see." Fati nodded to the mutant behind him.

This burly, giant-shaped mutant is the trump card of the base.

It is also the most perfect experiment in her handBoulder.

With him, even if there is an accident, Fati is confident to deal with it.

Besides, she is still there.

The most outstanding and successful perfect experimenter in the entire base.

It was Fati himself.

Boom, boom...

With heavy steps, the boulder stood in front of the bar.

Make a fist, raise your arms, and slam forward.

Boom!

The ground shook wildly, and the wall that was about to collapse was hammered into a big gap by him. Boulder rudely peeled open the broken wall with his hands, exposing the entire bar in sight. It also allowed Fati to see the scene clearly, and his eyes suddenly shrank and condensed into needles. Damn-how could this be?

Chapter 1164: Wipe out

In the bar shot into a hornet's nest, the light blue photomask was upside down on the ground. Jing Yuan, who was supposed to be in a coma, stood in front of the mask, behind which were Ilibera and her bodyguards.

Except for the bartender who broke the glass and escaped, everyone else was here.

"You~"

The bartender who saw this scene pointed his finger at what he wanted to say incredible.

Why is it so, she obviously wants to teach that woman severely.

To retaliate for the opponent's ignorance, and even prepare for a long time.

Including how to arrange, transfer Jing Yuan's security forces away, and escape the surveillance of the laboratory.

Step by step, a lot of plans were designed, and it took a lot of effort to achieve it.

But now, the facts tell him that these are all false.

How can it be? impossible!

"Ah~"

Yilibe stretched a big lazy waist, mocking with a bad expression: "You are too slow, it makes people boring for so long."

Haw~ haw~

A large number of [Assaulters] appeared on the periphery, surrounding the entire street.

Not only this street, perhaps the entire town is surrounded.

This is a good game for the opponent, please enter the urn!

I am the turtle in the urn.

Fati, who has carefully studied the culture of the Republic, believes that these two idioms are very suitable for his own situation.

However, she did not panic because of this.

It was not the first time she was in desperate situation, as long as she wanted to leave, no one could keep it.

"When did you find out?" Fati was curious, how did the other party discover his arrangement.

"Find what?"

Ilibera tilted her head and smirked: "We didn't find anything, we were just bored, so we decided to find something to do."

She wouldn't admit that she secretly attacked Jing Yuan a few days ago.

Was caught by the opponent, hung on the beam and hit...

Then, Ilibera told her all of her plans.

And promised her that she would never do it again in the future!

But Jingyuan wanted her to continue, and she would cooperate with her plan and show up at the bar on time.

So, there is something that happened before.

In order to allow the enemy to appear boldly and confidently, the communication department of the laboratory cooperated to cut off the terminal communication after discovering the interfering radio waves.

Otherwise, rely on the technology that the other party has, and want to shield the terminal signal?

This is also the loss of illiteracy, but whenever the other party can buy a terminal, test it in advance.

You will find that the so-called shielding method is of no use to it.

Ilibera didn't figure it out, where did they come from?

But it doesn't matter, no matter where they came from, it doesn't matter...

Can't be surprised by Jingyuan, she can't be surprised by a bitch?

Fati's cool dress made her define the other party as a wasteful.

I didn't realize it at all. My little vest, black silk, and miniskirt were not much better.

"Grab her."

Since Jingyuan doesn't like to give orders, let her do it.

Ilibera didn't mind being the one who ordered her to be arrested.

"Get out." After finishing speaking, Fati turned into a cloud of black mist and rushed towards the bar.

At the same time, the giant standing at the door.

Boulder stepped his legs apart and slammed his shoulders away from the obstacle in front of him like mountains and rivers.

Whether it was a table, chair or a wall pillar, he was smashed by his steel-like strong shoulders.

The black mist hovered behind the boulder, waiting for the opportunity...

Capture the thief first, capture the king, shoot the man first, shoot the horse.

As long as Jing Yuan is captured, what is the predicament in front of him?

Ilibera was taken aback by the opponent's behavior, and quickly stepped back and hid behind the bodyguard.

Looking out from the gap between the shoulders of a few people, there was a bad smirk in the eyes.

"Come on, beat her, beat her hard." Illibela whispered softly, becoming a melon-eating crowd.

She doesn't have superpowers, just wait and see the show.

For Fati's courage, Ilibera is full of admiration.

And hope that the opponent's strength is strong enough, it is best to beat Jing Yuan hard.

She was hanged upside down in the room by that woman for two days.

That taste...

Now that I think about it, I feel terrified.

If anyone can avenge herself, Ilibera doesn't mind giving her spiritual encouragement.

Looking at the boulder rushing towards him, the ground violently shakes under the tramp of the opponent running.

Jing Yuan stretched out her right hand expressionlessly, palms facing outwards.

push down!

Boom~

The unstoppable boulder crashed to the ground.

The whole body seemed to be under the force of a mighty force, sinking a little bit, embedded in the ground.

'impossible. Fati, who was still confident before.

At this moment, the heart is broken, the breath that the other party exudes when he starts.

Let her feel the fear of the abyss, as if she was not facing a person.

Hei Mist retreated quickly as he fell on the boulder, trying to get away from Jing Yuan.

The next moment, the black mist suddenly freezes in the air.

Fati's figure reunited, looking at Jing Yuan in front of him in fear.

"No...impossible, I..." Struggling desperately, my sanity disappeared a little bit.

His sight gradually fell into darkness, and Fati was about to fall into a coma.

In her mind, Ilibera's sly smile quickly enlarged, 'It turns out that she was laughing at me...'

The sight completely turned into darkness, only Ilibera's sly smile got closer and collided with it. '

Outside, hundreds of [Assaulters] launched a fierce attack, with bullets raining everywhere.

The airtight bullet net has sealed all escape routes.

Bloody figures appeared in the air from time to time, and as soon as they appeared, they were locked by [Assaulter].

The bullets fell wildly, and people shook like a convulsion.

When the new target appeared, the corpse that had been screened fell to the ground slantingly.

The corpse was smoking white smoke, the thief was hot!

The battle lasted for 5 minutes, and all the people Fati had brought were annihilated.

Jing Yuan lifted the unconscious Fati with an indifferent expression, and then dragged her step by step towards the laboratory.

Ilibera followed behind, grinning grimace.

Jing Yuan in front suddenly stopped and looked back at her.

The grimace disappeared, and a flattering smile hung on his face: "Jing, is there any problem?"

"Tell them, it's time to start."

The slightly dull tone made Ilibera's heart tremble.

Nodding her head, her heart said, 'she's becoming more and more like a machine. '

Ilibera knows about the company's mechanical transformation.

So, the company's technology, won't even the heart be replaced with cold metal, right?

Ilibera was a little worried. When I first saw her, it wasn't like that!

Now, Jing Yuan's popularity is getting less and less.

Seeing her is like facing a technological product with superb craftsmanship.

It looks like a human being, but inside is full of cold metal and intricate lines.

Should I tell the boss about this matter, Ilibera's eyes wandered.

After that day, the boss blacklisted her communication.

Ilibera felt that she could rescue it again!

*

*

After finishing work, it was midnight.

Qin Yu turned off the projection, opened the door and walked out.

"I will report to the boss... OK, thank you for calling... Goodbye, Ms. Fink."

After she hung up the phone, Qin Yu stepped forward: "Let's go, let's go for a supper together?"

"Boss, you just came here, Ilibela has something to report."

Yan Xue passed the record to him, and Qin Yu pulled her up.

"I'll eat first, I'm hungry!" Yan Xue held her hand and walked forward, and Yan Xue shook her head helplessly.

Who could have imagined that he, who created a miracle company in one hand, would also show a childish side.

In the communications of Rahei Ilibela, everything depends on the secretary to convey.

Is he not afraid of violating the yin and yang of others and abusing his private power?

"For you, what can't you worry about?" Qin Yu looked at her with a smile, and continued to drink soup.

In the big night, a bowl of hot soup is really comfortable!

"Boss, you'd better listen to Ilibera first, I think it's very important."

"Really?" Qin Yu was shocked.

Since Yan Xue said it is important, let's take a look first.

After reading the communication records of the two, Qin Yu's face sank.

Not surprisingly, Jing Yuan was losing her humanity.

Closed in the laboratory for a long time, coupled with a cold and arrogant personality, seldom communicate with others normally.

Her heart is getting calmer and calmer, but she is also losing the ability to feel emotions.

The calmer the heart, the more serious her condition.

Until he completely loses his emotions, he becomes an instrumental life form of reason.

"Send someone to..."

I wanted to send someone to bring Jing Yuan back, but he gave up after thinking about it.

It is more reliable to go there by yourself.

Otherwise, take her back in case there is a problem, it's awful but ordinary people.

As for Beizhou, it was not his family who died...

Three or two to settle the supper, Qin Yu looked at Yan Xue and said, "I'm going to visit the Bald Eagle."

Yan Xue hurriedly put down the spoon and arranged a car for him.

After confirming 15 minutes to set off, Yan Xue speeded up eating.

Ride the Xihe ship to reach the Beizhou laboratory as quickly as possible, without disturbing anyone.

Seeing Jing Yuan, she was performing an autopsy in the laboratory.

Fati's body and abilities are very rare and valuable experimental products, with extremely high research value!

Therefore, Jing Yuan is also extra careful when using it.

He was fully absorbed in it, completely unaware of the extra figure in the observation room behind him.

Qin Yu also observed her during the operation.

The technique is precise and decisive, and the performance is calm and composed, during which Fati wakes up abruptly.

Jing Yuan still cut off half of her lung calmly, and by the way an elbow made her push it over.

This 'anesthesia' is both convenient and economical.

Jing Yuan, who was intoxicated in the operation, raised the corners of her mouth, acting clean and elegant, Every step of com is as smooth as it should be.

But Qin Yu's brows gradually tightened because of this.

Jing Yuan's situation was worse than he thought, so he should have found out earlier.

"Kirin, why didn't you notify me?"

"Team leader Jing believes that she is evolving to perfection according to the development of super **** genes, and she wants to complete the experiment." Qilin.

"If you lose your humanity, what's the point of being perfect?"

"This only represents your personal opinion. Different life forms have different pursuits. You can't represent everyone." Qilin.

"Do you agree with her doing this?"

"...I only obey the instructions. Team Leader Jing has high-level authority." Qilin.

"At this time, you should be more emotional."

Ending the conversation with Qilin, Qin Yu said to the researcher on the side: "Wait for Team Leader Jing to finish, let her come to see me alone."

Chapter 1165: black market

"How did you know?"

In Jing Yuan's office, Qin Yu sat on the engineering chair behind the desk, spinning back and forth in all kinds of boredom.

"do not know."

Jing Yuan said calmly: "I just made the corresponding arrangements based on my assumptions!"

She was not sure that someone would come, but it was a rare opportunity.

Beizhou is the territory of the bald eagle!

Even if the living space is compressed again and again, it doesn't mean that the other party can't even arrange eyeliners.

Really think so-to look down upon the bald eagle.

Besides, she is the same as Shi Cui.

As soon as I arrived in Beizhou, I felt like being spied on.

It's just that the other party is very cautious and never approaches...

Jing Yuan also let it go. The poisonous snake hiding in the dark is more threatening than the tiger in the light.

But Ilibera made childish actions to confuse herself.

Let Jingyuan see the opportunity to draw the enemy out of the dark.

So, she made some arrangements along the way.

Concealing the fact that Ilibera was taught by herself, let her continue the 'disguised action'.

Then, no one expected to catch such a big fish.

"The chief scientist of Fort Decker is a good big fish."

Qin Yu smiled and said, "Do you know who is behind the other party?"

Jingyuan's expression was taken aback, as if she was saying, 'what is that? '

Is the main messenger behind Fort Decker?

This kind of thing should not be handed over to Ilibela, RRT is responsible.

Her responsibility should not be to figure out how her strength and abilities came from.

The ability to fully energize the body is worthy of her time to study in depth.

At this time, the genetic map should have come out.

Will there be any difference in the section analysis of visceral tissue?

Jing Yuan's pupils gradually diminished, "She was distracted?"

Brother Yu was dumbfounded, rubbed his chin, wondering if his charm has declined?

Sunlight value is 96-no problem!

With a snap of his fingers, Jing Yuan's pupils condensed in an instant, "I will hand the person to Bella."

She has everything she wants, and the rest is useless.

Just hand her to Ilibera and let her figure out the answer the teacher wants.

"Um."

Qin Yu nodded and hesitated: "Jing Yuan, do you think your current state... is not very good?"

"Do you mean feelings?" Jing Yuan asked calmly.

"right."

"This is the only way to evolve. Emotional use is not a good thing."

"Do you think that absolute sanity is right?"

"Life has a temperature, and it is what a living body should look like when it lingers between rationality and sensibility."

"What is the difference between absolute sanity and those robots outside?"

Jing Yuan's head drooped, her eyes contracted and enlarged, obviously also tangled.

Qin Yu, who saw this scene, was thankful that she had just entered this state not long ago.

If she has lost her emotions, she will not question her simple words.

"Think about it, even Kylin is looking for sensibility, and learning emotion makes it evolve."

"It is feelings that make everyone unique."

"If everyone maintains absolute rationality and decides everything according to right and wrong, such a world will definitely be destroyed."

"why?"

Looking at Jingyuan, Qin Yu laughed blankly: "Are you asking me?"

Jing Yuan was silent, of course she knew the reason.

Absolute reason will make society fall into self-destruction.

Because, in the end, they will find that the existence of the ego race is harmful to the world.

At that time, according to rational judgment.

Self-extinction, by the way, destroying all living organisms will be the best solution.

Although it is only one of countless possibilities.

but...

It is sufficient to prove that her decision is not 100% correct.

"No one can do it absolutely right."

Jing Yuan wanted to say that she just made a choice.

She wanted to try whether this path would work. Before no one had walked, who could say that there must be a desperate situation ahead?

"You shouldn't make this kind of attempt by yourself, don't you understand the reason why it is easy to go forward and turn back?"

Upon hearing the teacher's retort, Jing Yuan bowed her head and said nothing, expressing her attitude in silence.

Seeing her stubborn performance, Qin Yu shook his head helplessly.

He got up and walked in front of Jing Yuan, he really didn't want to take this step.

But now it seems that there is no choice!

*

*

Keng Keng~

Knocked on the door and found that no one inside responded.

Gao Zhanbo sticks to the door, wanting to hear the movement inside.

Then he tried to unlock the door, "What's the matter, is this going out?"

The eyebrows were tightly closed, and Gao Zhanbo walked in the direction where he had come.

He also wanted to report to Jing Yuan on the progress and current situation of the offensive against Fort Decker.

Now it seems that she should have something more important.

"We can only find Director Zhu and President Hua." Gao Zhanbo muttered to the administrative level.

He prefers staying with researchers rather than dealing with the administration department.

However, only Jing Yuan is the leader of Beizhou Lab.

If people are not there, he can only report one after another!

The attack on Deckerberg went well, but accidents are always inevitable.

Three power armors are gone.

The power armor that was originally used as a bait to send the 'Raging Nanoworm' into it.

It should have been recovered after this attack.

Whether it is disassembled into parts or destroyed, it should always exist.

But now, not even a single screw can be found.

Eder Hogg, the chief engineer of the Department of Biomechanics, also disappeared with them.

No one knows where they went, in fact, the people at Fort Decker base were also looking for him.

He quietly left the base the day after Fati left.

At the same time, it took away the most important valuable asset in the base, the power armor.

Rebellion, or the other party discovered the company's actions in advance?

*

*

North Island, East Coast, Doudou City.

In the 14th block along the coast, in the back alley of the abandoned bar, Edel is walking towards the end.

Standing in front of the patina-covered iron door, Edel knocked on the door.

The observation window in front of him was opened, revealing a pair of cold eyes, cruelty is an indifference to life.

"Edel."

"it's me."

The observation window was closed and the iron door opened from the inside.

"Look at it, the best exoskeleton armor."

"Come and see, here are the best individual combat uniforms."

"Miracle Company produces power arms, which are 70% new, and there is only one. Come and take a look."

At the end of the narrow corridor, the line of sight suddenly opened up.

The dark and dark space was illuminated by dim lights, and on both sides stood countless black market merchants selling various materials.

However, most of them still have an identity.

fraud!

What exoskeleton outfit Aki, individual combat uniform...

If this kind of thing flows into the black market, it will be 'buy' away by big forces immediately.

There is no way to live on the streets, there are only fools holding 'I'm the Son of Destiny', or rookies who have just made their debut.

Only then will I believe the nonsense of those people, and buy back the useless figures to dream.

Walking towards the end, Elder turned right and walked into an old shop in the lobby.

The whole shop is made of wooden boards, which looks simple and fragile, as if it would shatter with the touch of it.

The table in the house is full of scratches, proving that it has experienced the torture of several generations of owners.

Obviously, none of these masters is a cherished fellow who understands.

However, these are not the main points.

The woman sitting behind the table is the key to Edel's coming here.

He wore a blood-red big flower cheongsam, with flowing golden waves and long curly hair, and his lips were like flames.

There is a pair of equally bright red high heels on her feet. It can be seen that she really likes red.

"Oh, look at who this is, Edel, how come you are here."

The woman lifted Erlang's legs and said jokingly, "Is there anything I can take care of? Lord Edel."

"I'll sell something." Edel sat calmly on the wooden chair opposite.

She was not interested in the snow-white thighs exposed to the roots of the thighs at the split ends of a woman's cheongsam.

In the face of life and death, a woman will only be a burden!

"What is it?" the woman asked curiously.

"Power armor, made by Miracle Company, brand new." Edel said calmly.

boom.

The woman stood up with her hands on the table, and the table made a painful "creak" sound, as if it was about to collapse in the next second.

"What are you kidding?" The woman widened her eyes.

Miracle Company produces power armor, which is what the whole world wants.

How did he get it? If Deckerberg really got the power armor, how could he get it?

"You don't need to worry about it, do you want it or not?" Of course it is impossible for Edel to tell the other party that he defected from the White House.

He also needs a white house as a backer to shock the forces behind the woman.

If he knew he was alone, the **** blonde in front of him would swallow him with the goods without hesitation.

And, there is no need to spend a penny.

"Yes, of course." The woman's eyes flickered, guessing the reason behind it.

She thought of the possibility of Edel defecting, but she couldn't easily be sure.

For behemoths such as BlackRock and the Morgan Lost Consortium, Fort Dekker is just an opponent.

But for these forces that are in the black market and can't see the light, Fort Decker is a behemoth that must not be provoked.

Besides, they are just looking for money.

For a power armor, it is not worth the risk of turning over with Deckerberg.

"what do you want?"

The woman returned to her previous cynicism and sat down again, waiting for him to speak with her legs folded.

"500 million, this is what I want." Edel said his asking price.

"200 million, I can only give so much." The woman responded.

"500 million, no discussion." Edel said coldly: "You are not the only family in the black market."

The woman was silent, and she was indeed not the only one who wanted power armor.

However, the starting price that can be offered is something you dare to ask for.

Except for her, there are only one or two.

It's not that she can bargain at will.

In their families, who can get the power armor first, who will have the final say in this black market in the future.

"Which one am I?" the woman asked.

"The first one." Edel said.

Upon hearing the other's answer, the woman smiled with satisfaction: "Okay, just as you said, 500 million."

The woman at the moment didn't know. Just half an hour ago, he said the same thing to a bald head in the black market next door.

In short, don't ask, ask is the first one.

Chapter 1166: Edel's fate

Three power armors were replaced by three black markets.

With the prestige of his old club, Edel successfully got a huge sum of 1.5 billion.

Send the address to the three as quickly as possible, and Edel went to the flea room as soon as possible.

The flea house is not for raising fleas.

It's because there are all kinds of inconspicuous little people gathered here, all of which are doing things like whining and stealing.

Like a flea, small and inconspicuous!

Therefore, it is called a flea house.

In a dark room full of **** with a strange smell.

A dilapidated computer screen was lit, and the case lying next to it was full of messy wires.

There was a fat mouse lying on it, squeaking curiously.

"What do I want?" Edel looked at the tramp lying in a pile of garbage.

"On the table."

The homeless man murmured, clutching his clothes and curling inward to make himself warmer.

Turned over and said weakly, "Remember to put the money on the table."

"good."

Picking up the brand-new ID that was out of place on the table, Edel stretched his hand to his waist.

"Ah ~ backup, backup, you must remember to keep a backup."

"Where did I pass your backup? It seems that some cloud... forgot."

"Next time you have business, remember to take care of me. Just tell me the address..."

He couldn't hear the babble, but Edel's hand on his waist froze.

After a while, he moved his hand up.

From the pocket inside the jacket, take out a wad of cash and place it in the position of the previous ID.

"thanks."

"Yeah~"

Amid the indistinct grunt, Edel turned and left the flea room.

No one wants to set foot in this dirty place unless it is necessary.

Not to mention, stay here for a while!

*

*

In front of the pier, a group of mysterious people wearing simple gray cloaks stood quietly on the pontoon.

The body is upright and the head is drooping.

The figure was completely shrouded in a gray cloak...

From a distance, it looks like a statue standing on a pontoon and drifting with the flow.

Edel also felt nervous when he saw these strangely dressed cloaked men.

However, this is his only way out.

If you don't leave now, you will never be able to leave again.

Therefore, even if he perceives the danger from the cloak man, Edel walked onto the dock without hesitation.

At the same time, a high-speed kayak approached the sea in the distance.

A small smile appeared at the corner of Edel's mouth, it was the ship that came to pick him up.

As long as he gets on the boat, he is free!

The next moment, the mysterious man in the cloak moved.

Looking at the man in the cloak who spread out in front of him, completely blocking his way.

Edel frowned and said, "Please let me, I don't want to cause trouble."

As he spoke, his hand was already on his back.

As the chief engineer of the Biomechanical Department, he takes a few guns to defend himself when he goes out.

This is not too much!

As the chief engineer of the Biomechanical Department, do some of his own work.

For example, mechanical transformation of one's own arm to decorate it with something.

Isn't it reasonable to use large-caliber grenades to hunt and experience life through the barrel of the arm?

Therefore, Edel is not at all worried that someone will make trouble.

It was also the reason why he noticed something was wrong with the man in the cloak and still had the courage to set foot on the dock.

"Sorry, someone wants to see you."

The leader standing at the forefront lifted his hood, revealing a beautiful face with a bright smile.

"you?"

The moment he saw the other person's appearance, Edel seemed to see a nightmare.

Pointing at her in horror, Edel staggered back, wishing to disappear from the spot in an instant.

"Insect...female!"

Edel, who had stepped back a few meters, drew his gun forward, pointed at Daisy in horror and shouted, "Don't come here!"

"Huh, do you know me?" Daisy was surprised at first.

But when I thought of what I had done, the origin of the other party, I was relieved.

As a member of the White House, Edel, how could he not know her.

"Since you know me, should I go with me, or should I do it?"

The corners of Daisy's mouth rise, rise, rise...

When it was opened to the ear, a horrible gap was formed, with a grinning smile.

*

*

The Power Armor fell into the black market, and was quickly split into countless accessories and resold to major forces.

The black market merchant found out that his opponent also had power armor, and he was fooled.

Crazy as if he wanted to dig out Edel's traces, but he couldn't find any traces of him again.

Even if they dig out the trash in the flea room and find his new identity.

Also nothing!

Edel, as if completely disappeared in this world.

Some people speculate that he went to the Martian colony, but he could only curse angrily.

Little did he know that Edel at this time was waiting for the verdict of fate in the dark room.

It's life, it's death, whatever is good.

As long as you don't leave him so, let him speculate wildly, wandering in fear.

"Hey, let me out, damn, you monsters, God will punish..."

The sound of footsteps outside the iron gate made him swallow the curse back.

The door opened, and the metal body bent over and walked into the cell.

Edel was escorted onto a strangely shaped spacecraft and sailed to an unknown direction.

When he landed again, the environment he was in had turned into a majestic dome.

This is a huge building complex, as can be seen from the internal structure.

But Edel did not have a chance to continue to appreciate, he was escorted into a passage.

At the end, a thick circular gate blocked the way.

The eyes of the [Assaulter] guarding the door flickered, and the red light swept towards Edel.

Subsequently, the gate was opened.

A magical vast space opens up in front of it, with a roof that is tens of meters high.

Surrounded by mechanical tracks, the swarms of drones staggered in the sky resemble busy swarms of bees in summer.

There are countless [creators] on the ground, working hard and busy in their own posts.

On conveyor belts of different sizes, all kinds of strange objects are placed.

There are magical plants, weird machinery, exoskeleton armor, power arms, locomotives.

There are also fishes that have never been seen before, strange-looking reptiles and shiny gems.

In short, Edel was dazzled.

Walking along the conveyor belt to the end, the strange 'altar-like' architecture comes into view.

It's just that it is made of metal.

Edel finally saw a living person again, a gentle scientific researcher wearing a white coat and glasses.

The other person looked very gentle, with signs of 'I am a good person' written all over his body.

Edel decided to try to communicate, maybe he could find a way out.

Even if there is no way to escape, at least they have to figure out where this is and what are they going to do to themselves?

"Hi, friend, can you hear me?"

"I'm Edel, don't worry, I'm not a bad person."

"Don't be nervous, friend, I just want to ask a few questions!"

[Assaulter] Turned and left, leaving Edel in place.

Only him and Mr. Haohao were left on the scene. Edel was ecstatic in his heart and his chance came.

Raising his hands to show that he was not threatening, Edel approached the opponent a little bit.

He didn't notice at all, just in the moving corridor above the two of them.

Two people were looking at him like a fool, "Are you sure he is a Doctor of Biomechanics?"

"Yes, boss, I think... it should be... yes."

The performance of the other party made Tang Jiaqian's tone full of guilty conscience.

Is this kind of nasty criticism really an engineering boss?

He never thought, why would [Assaulter] leave without worry, leaving him with the precious researchers?

Does he have a brain?

Shi Cui was also very curious, and wanted to open his mind to take a look.

Looking back, I saw Qin Yu and Tang Jiaqian.

Shi Cui suppressed his bloodthirsty impulse, pushed his glasses and smiled, "Welcome to the settlement center, Mr. Hogg."

"The settlement center, am I in the Republic?" Edel was stunned.

"Yes, can I invite you to go up and stand in the middle now?"

Shi Cui politely invited him to walk on the material teleporter, but his lovely performance made him unbearable to hurt him.

"what is this?"

Edel stepped back vigilantly, keeping himself away from the "Altar".

Although it is not clear what it is, since the enemy wants to make it do it.

Rebellion-that's it!

"A magical machine that will bring you a new life. Would you please go up there?"

Shi Cui pushed the frame again and smiled brighter.

"No, take me away, I don't want to hurt you." Edel looked at him coldly.

A weak researcher, it must be very simple to hold him hostage.

Ten seconds later, his limbs twisted backward, and Edel, who was pouting his **** upwards, crouched on the teleporter crookedly.

Unknown fear is written in the rolling eyes.

Monster, **** monster!

Where did they come from? Only science is the truth.

This unscientific!

The next moment, the conveyor began to rotate.

"Wait, what are you going to do?" Edel yelled with anxiety.

Unfortunately, no one cares about his opinion.

Testing whether the conveyor is capable of human body transmission is his only current value!

If he is lucky enough to survive, the scientist will be very happy.

Above, Qin Yu clutched the iron railing with both hands, staring at Edel in the center of the machine.
call out!

When everything was blurred, his figure disappeared in the middle.

Crunch~

The railing was twisted and deformed by Qin Yu's grip, and time passed by.

Tang Jiaqian kept looking at the terminal, her heart also anxious.

When the green light came on, Tang Jiaqian hurriedly switched on, and said: "Boss, there is news...He is here."

Hearing the exact answer, Qin Yu suddenly released both hands holding the railing.

"What about the inspection report?" Qin Yu asked.

With a flick of his finger forward, a brand-new medical report appeared in front of him.

Everything was normal, and the material conveyor really sent people over.

"Data is sealed, all files are archived, listed as top secret, and the authority is transferred...M12."

As Qin Yu's voice landed, the projection in front of him disappeared.

Tang Jiaqian found that all the information related to this matter was being erased in her terminal.

The firewall that Guanghe Terminal claims to be impossible to break is useless before this force.

Tang Jiaqian knew that it was Qilin who made the shot.

As the host of all electronic products, the mother of AI intelligence.

This is too simple for it.

"Do you know what to do?"

Facing the boss's question, Tang Jiaqian replied decisively: "What are you talking about? I'm here to report to you the summary of the month."

Taking a deep look at her, Qin Yu didn't expect her to have such a consciousness.

The clever and capable performance couldn't overlap with Tie Hanhan who was holding his feet in his head.

Is it really alone? Wouldn't they be twins?

Are you twins? ?

Chapter 1167: Crystal column matrix

Beizhou, laboratory.

Jing Yuan hummed a small tune sitting on the chair, turning back and forth.

Hum...

"Come in."

Yuri opened the door and was about to walk in, humming tunes sounded in his ears.

Click.

Yuri closed the door and paused suspiciously for a few seconds.

Open again.

"Huh, uh..."

It was still a clear and audible singing, no hallucinations.

So, what's wrong with her?

"Leader Jing."

Yuri looked at Jing Yuan suspiciously, as if to determine if she was replaced.

The abilities of the mutants are all sorts of weird, and perhaps some can be transformed.

"Is there anything wrong?" Jing Yuan seemed to be aware of his appearance.

The smile gradually diminished, wanting to maintain the indifference of the past.

But the corners of the mouth rose uncontrollably...

"Fort Decker, it's over." Yuri is here to report on the battle.

In Fort Decker, hundreds of potholes the size of oil barrels appeared on the ground, leading directly to the base underneath.

It was through these tunnels that the genetic warriors entered the Fort Dekker base and launched a fierce massacre.

As for those who wanted to escape, they were also beaten into meat by the [Assaulter] and the heavy machine [Titan] who were left behind.

The enemy who was baptized with heavy artillery from [Titan] could not even leave a complete body.

"All the corpses are sealed up so that they can be used for experimentation and discarded for destruction. What about the data?"

Jing Yuan returned to her former composure and calmness. What she cared about was the technology that Deckerberg mastered.

"All have been downloaded and destroyed!" Yuri responded.

Jing Yuan opened her personal terminal and nodded with satisfaction when she saw the data backed up on the host: "Notify Leader Shi, he will thank you."

The biological research of Fort Decker is in a different direction from Shi Cui.

Especially the extended pre-research on radiation has been done very well.

Just looking at the photos in the experiment log, you know that there are countless evils hidden in it.

However, knowledge is innocent!

On this point, Jing Yuan and Shi Cui agree.

"I heard the boss is coming."

Yuli did not see Qin Yu himself because he led the team to attack Fort Dekker.

"Well, the teacher came to inspect and has already left." Jing Yuan's face rose with a light flush.

She was immediately depressed by her, but involuntarily, a shameful image appeared in her mind.

It made her body feel hot and hot.

When Jing Yuan recovered, Yuri had already left.

In front of her, there was a glass of ice water filled with ice cubes.

*

*

After losing the fleet and Fort Decker one after another, the White House lost its military support.

The jubilant spokesperson who had danced the last two weeks-dumb.

According to the latest reports, he has been hiding in his home in the Special Administrative Region, reluctant to go out.

The outside was full of reporters, and they all wanted to hear the thoughts of these spokespersons.

Unfortunately, the other party just kept communicating with the outside world on the phone, and stood in front of the floor-to-ceiling window and gave the reporter his middle finger.

If you go out, you won't go out, and you won't go out if you are killed!

Looking at the screen of the reporter pointing his **** to the reporter through the floor-to-ceiling window on the TV, Mo Mo leaned back.

Helping his forehead vomited: "It's too embarrassing."

The various operations of the bald eagle have gradually destroyed the goodwill of the people towards it.

This is not the first day, the bald eagle will fall to the point where it is today, and it is entirely made by itself.

Continuing several presidents, all sorts of show operations.

The big bosses behind are playing games, only caring about their own interests, and completely disregarding the interests of the country and the public.

The local authority is in control, splitting and struggling.

The side who supports each other and brings their own benefits has become more and more ignorant of the white house, even openly contemptuous.

freedom of speech...

But it was the accumulation of these little things that ruined the bald eagle's last hope and caused it to split!

Each lobby is strong and strong, with bosses behind them, full of wings.

Talking people's brains are pretty funny, fancy death.

Such a society will inevitably split if it is barely maintained.

Today, there are still people in the "Ma Tsai" below who are thinking about the good of the club, but you can see the performance of the people.

The only good feelings in my heart are almost exhausted.

Mildew is just a typical example. There are countless people like her all over the world who are extremely disappointed with the White House.

This country is out of help!

Tired, destroy it!

Completely lost hope, but my heart was relieved.

Mildew even asked him, can he join the Republic?

On the one hand, it is a joke and temptation, on the other hand, it also expresses the helplessness of a law-abiding citizen like her.

Their current identities are embarrassing!

The ID issued by the Bald Eagle is becoming invalid, and many countries no longer recognize the ID and passport issued by it.

The West Coast also prohibits former citizens from entering their territories.

Her previous concerts on the West Coast were postponed for two months because of the need to apply for a temporary ID.

The tour, which was originally planned to end in eight months, was dragged to the end of fifteen months.

Half of the time is stuck on identity issues.

The opposite is the certificate of the Republic.

In territories other than the White House, it is basically unimpeded.

Occasionally making things difficult is also because of problems with their own reputation or criminal records, so that the other party will seize the excuse.

"Of course." Your own woman must of course take extra care.

The identity issue is just a trivial matter for Qin Yu.

The difficulties encountered in the longevity project are the first problems that need to be solved.

The thought pollution caused by radiation began to show signs on the experimental subjects.

Confusion of thinking, auditory hallucinations, hallucinations, and increased tendency of violent destruction.

Sometimes talking to oneself, sometimes crying with a headache...

The whole person is crazy and can only rely on external force to intervene to live.

In this case, there is no way to carry out the next phase of the experiment.

Is it the limit eight times?

But in this way, the whole experiment failed again.

Qin Yu thought of a possible solution.

"Ding!"

"Congratulations to the host for fulfilling his long-cherished goals, fulfilling his duties, promoting miracles, creating inheritance, and triggering special rewards!"

"Reward: Advanced Energy Crystal Column Matrix*3."

【Advanced energy crystal column matrix: It can cover a certain area, produce pure energy, and has a magical effect. 】

Jing Yuan's reward was the crystal column matrix he had obtained before.

According to the introduction, the crystal column matrix can release pure energy within the coverage area.

Since the high-level energy crystal has the effect of resisting pollution, it has a higher-level crystal column matrix.

Can it play a better role in suppressing or curing the pollution caused by radiation?

Qin Yu decided to verify this in person.

The two experimenters were connected to the headquarters, and the crystal column matrix escorted by 12 robots entered the company building.

Six diamond-shaped crystal columns, a group of 12 in total.

It looks like a gold and a jade base, with 11 slots on the edge of the outer ring, and a single slot in the middle.

Inserting 12 crystal columns into the base, Qin Yu stepped back slowly.

At the next moment, the 11 crystal pillars in the outer ring lit up with white light.

Then, a bright white light beam was shot from the top to the crystal column in the center.

The energy of the 11 crystal columns is concentrated on the top of the 12th crystal column in the center.

The gloss on the top is getting stronger and stronger, burning like looking directly at the sun, making it impossible for ordinary people to look directly.

Qin Yu activated the nanoworms, and his pupils lit up with a dark red luster.

The light cluster at the top condenses and compresses, the moment it reaches its limit.

Suddenly expand outwards, through objects and walls, nothing can stop its spread.

Qin Yu walked quickly to the window and looked at the sky outside the building.

An invisible barrier in the air expands outwards, and still does not stop until the end of the line of sight.

"Kirin." Qin Yu wanted to know its limits.

Could it be that such a matrix can cover a city?

Downstairs of the company, the RTT team set off with an energy detector.

They have to go east, south, west, and north respectively to confirm the detailed coverage of the crystal column matrix.

Qin Yu also retracted his gaze and began to observe the experimenter's reaction through the monitoring screen.

Through the feedback of nanoworms, Qin Yu can clearly perceive the pure energy emitted in the air.

It's as if the whole person is soaked in the atomization of melting high-level energy crystal, comfortable, strong, and full of energy.

This is something you can't feel with snacks...

Maybe it will be different if you eat a crystal column.

But considering its length and thickness, Brother Yu gave up decisively.

When there is no one, try again.

Now, whether the longevity project can continue depends on the performance of the experimenter.

The experimenter curled up in the corner, calmed down after the matrix was activated.

His body no longer trembles, nor will he violently grab into the air, as if to drive something away.

The mad yelling did not appear again.

After about ten minutes, the hands holding the head dropped naturally.

With his drooping head raised, looked blankly, staring at the camera in the corner: "I'm hungry, give me food."

The bloodshot pupils, rarely appear clear.

This shows that the matrix is really effective, and the pure energy ubiquitous in the air dissipates the effects of radiation.

As for whether it is a complete cure or a short-term suppression.

To be proved by time!

But at least, it allows everyone to see the hope of success again.

After three hours, the conversation with the experimenter was ended.

Qin Yu received the survey feedback from RRT, and the coverage of the matrix is estimated to be 10,000 square kilometers.

It is equivalent to enough to cover the entire abandoned capital within the scope.

However, because the matrix diffusion is centered on the base, it is inevitable that there will be corners that cannot be taken care of.

After all, the city is not drawn with compasses.

Chapter 1168: This one is good

"Energy Matrix, brother, you won't create a group of mutants, will you?"

Knowing the new changes in the abandoned city, Bai Ze couldn't help scratching his head.

This is energy again, and it is covered by the matrix.

Sounds a bit big!

In short, just like a special magnetic field, people who stay in this area will enjoy the collateral effects of the 'magnetic field'?

"Almost the same thing."

Qin Yu was not sure whether there would be any genetic mutations.

It can be seen from the model demonstration that the biggest effect is to strengthen the body and strengthen the body and will.

The advantages are still many.

There is definitely a risk. Drinking water may cause choking. Can I not drink it?

"You just toss it hard!" Bai Ze smiled bitterly.

"Next time we can speak in advance?"

Lao Bai is really tired. If this goes on, his microphone should be useless.

If you don't cut it first and then play it like this, it's me who is backing the pot, Soul Dan!

"I didn't expect it to cover such a large area."

Qin Yu did not expect to know that the coverage area would reach 10,000 square kilometers.

Then he had to say hello to Lao Bai.

However, it is not too late!

"I plan to set up a set in Hudu, and the training camp and Star Aviation Academy are the same."

Three sets of rewards for in-depth exchanges with Jing Yuan.

There is another set before, and all four sets of matrices have been arranged.

With the matrix, the students of the training camp will be strengthened.

The same is true for Star Air Academy. What Hudu says is mainly selfish.

So many women, and the company's cutting-edge laboratory.

It's good, of course, you can't forget it!

Another, he wanted to see if the matrix could neutralize the radiation diffusion in the polluted area.

The healing heart is effective, and the visible effect is too slow.

So far, it has only reduced the radiation range by 10 cm.

Relying on it to purify contaminated areas, I am afraid it will take decades.

At that time, whether that piece of land will be usable or not, how much damage it will cause to the geology is unknown.

If there is a better and more efficient way, why not use it?

Bai Ze's answer is not unexpected, please ask!

In any case, the process should go or go.

Qin Yu made preparations first, sent the matrix and the crystal column to the town, waiting for the order...

He also raised a mouth with Lao Bai about the naturalization.

"Brother, from my Department of Defense...Should you change someone to ask?"

"No one else, I don't want to preach about this."

If it's not for keeping secret, why should Brother Yu look for him? Just tell Ye Jinlan.

"...Okay, you are a big brother." Bai Ze took it.

I am becoming more and more like a tool man, which is simply outrageous!

Is there any more human rights? Don't use soldiers as cadres, right?

Complaints belong to complaints, and what should be done still has to be done.

It's just that the situation is really like what Qin Yu said, is it true for Shangdu?

The position of the political center cannot be shaken.

However, once the news spreads, the housing prices in the abandoned city will probably explode.

*

*

After looking at the house for a week, Tanghe finally made a decision.

As for the residential area he mentioned before, the Chinese-style detached house has an area of 496 square meters and a total area of 801.3 square meters.

Gardens, swimming pools, and garages are all standard equipment, and there is an independent elevated platform at the door, which is also convenient for people to park and car.

In addition, Tang He also bought two flats in the next building.

There are only two villas in the entire villa area, which are built for customers who don't like villas and love flat floors.

It has a total height of six floors, a single-family house, and direct elevator access.

Because there is only one household in one building, the area is naturally not small.

The large flat floor of 650 square meters is perfect for both office and home.

It is a person who comes from home, and it is easy to get lost.

"Husband, will we buy too much at once?" Standing in the empty living room, Xu Ya looked dazed.

This is too big, and there is a monthly payment...

More than 200,000 yuan a month, settled in 10 years.

The burden on the shoulders, why the sudden pressure on the person is a bit out of breath.

"Don't be afraid, no, you still have the equipment at home, and you will pay off after selling a few pieces."

Tang He had a big heart and didn't worry at all.

In fact, he is really not worried.

If you really can't turn it on, it's a big deal to sell that exoskeleton armor.

It's okay if you change it for ten million...

However, he said so.

It's really troublesome to sell!

It's not that if you have money, you are eligible to buy it.

Of course, if Tang He is willing to put it on the black market, these problems will not exist.

The risks that can be taken are much larger.

If someone really wants to do something with it, he will definitely be held accountable in the end.

Trading contraband privately in violation of regulations, days may have a contract!

"so."

Xu Ya didn't take it seriously, because she also knew the value of those equipment.

Besides, Tang He relies on these for food.

Sell the guy who eats, good guy...

Even if he agrees, Xu Ya does not agree.

But with her comforting, I had an idea in my heart.

In the future, save a little bit of expenses, and it will pass.

After paying the down payment, Tang He still has more than two million yuan.

One million is a reserve fund, to prevent him from having any accidents in the game, he needs to supplement equipment, weapons and materials.

The 500,000 yuan is the family reserve fund, which is used as an emergency reserve.

The remaining 500,000 is all that can be used, so don't even think about it for temporary decoration.

In the past, Xu Ya was responsible for the daily expenses of the family.

It also spends a lot of miscellaneous things like water and electricity, internet, gas, and property fees.

She didn't save much money after including daily commuting and the like.

The total is less than 200,000, which is 700,000 in total.

Enough to pay for a three-month loan and food and drink, "I really have to work hard to make money."

Seeing her writing and drawing on the small ledger, Tang He hugged her with a smile and said, "If you work harder, we can't see each other every month?"

"No, at most a week." Xu Ya whispered.

"A week?"

Tang He snickered, "Your man is a young man, are you trying to die me in a hurry?"

"I hate it, I think about that kind of thing one day." Xu Ya slapped him angrily, but she was a little expectant in her heart.

It is the age when the hormones are getting mature. How can you not want to know the taste of the marrow?

"Hey, I don't just want to, but I have to do it." Tang He glanced into the room.

Close the door with your feet, "My wife, let's mark the new house, or let someone take it!"

Seeing that the dry wood was about to burn, Tang He's phone rang.

"I'm going, who is so punctual?"

Picking it up, Tang He smiled on the spot: "It's Brother Yu."

"Brother Yu, are you free to see the room?"

When seeing the house before, Tang He raised a mouth in the WeChat group.

Qin Yu asked him to take a look, saying that he had always wanted to buy a house, and was always delayed because of other things.

This time it happened to be watched by Tang He Gang first, and waited for him to take a moment to see it in person.

Tang He bought everything, and didn't see him having time, and thought he would not buy it!

"Let you get it right, how about it, is there a suitable one?"

Brother Yu's people have all gone to the Southern District, and he came to see the room specially today.

It's very comfortable to live at home, but sometimes I still want a private space that belongs only to me.

"Really, then I will send you the location. I have bought everything. It is a six-storey large flat with more than 600 square meters. The elevator enters the house."

"There is a garden in the room, let me tell you..."

Tang He walked around the room, introducing him to the house he had just bought.

Six-storey, six-hundred-square-meter single-family house.

Qin Yu was very excited, not bad!

Following the navigation to find the door, Qin Yu didn't say to buy a house, but reported Tang He's name and house number.

"You see where your car is parked, both outside and in the underground garage, but it's closer to the underground."

"Then stop, thank you master."

The other party saluted, Qin Yu drove the car into the underground garage.

"Brother Yu."

As soon as he was on the parking lot, he saw Tang He coming over.

"I guess you must come in, how much do you know brother."

Coming up to punch him in the chest, Tang He shook his fists and ankles in a punching posture.

Brother Yu frowned, and said with a smile, "Why do you want to practice?"

Tang He was honest in an instant, and practiced a der!

Just like a bull, he couldn't beat me to death.

But you can't admit defeat, and lose without losing the battle.

"Don't think I'm afraid of you, I'm mainly looking for you. If you come with this punch, you have to kneel down and beg me not to die!"

"..."

You TM are poisonous!

Slapped him on the shoulder, Qin Yu said with a smile: "It's okay, I deserve it."

The corners of Tang He's mouth twitched, "Fuck, careless, no flashes."

"Brother Yu, look at what you said, what's the relationship between us, can you do it?"

"I think I can, and I look forward to it."

"Look at you, joking with me again, hahaha..."

"Walk around, let's go up and see the house."

Taking Qin Yu around in his new house, Tang He returned to the living room and said happily, "What's the matter, right?"

Xu Ya snickered and said, "Look at him..."

"really not bad."

Qin Yu really likes the layout of the house, and the environment in the entire community is also good.

There are mountains and waters, and the green area reaches 83.6%.

The property company also checked, the reputation is good, there are no lawsuits and disputes, and overall, it meets his needs.

The price is also cheap, 650 square meters, the price is less than 17 million.

It's only 25 thousand and six and one level. It's a good deal!

"That is, during this period of time, we started at least 40,000 last year. Those who bought a house in the first two years were really at a loss."

Speaking of falling house prices, Qin Yu knew more about the inside story than he did.

After all, the four of Yang Haodong were sent away by him.

"The building next door is the same type?" Qin Yu asked actively when he saw the building next door.

"Same, I've seen it."

"Just next to the lake, the unit price is a bit more expensive."

"Go and see, are there any sales calls?"

"Keep it, I'll call someone for you."

"Don't you ask to wait for dinner?"

When the two walked by the side bars, Tang He also notified him of the sale of the house.

After they went around the building and looked at the surrounding environment, the sales arrived.

"Mr. Tang, Ms. Xu." Xiaoxin greeted the two first.

Then he looked at Qin Yu and smiled politely: "Are these two friends who want to buy a house? Sir, how do you call you?"

"My name is Qin."

"Hello, Mr. Qin, this is Li Xin, and your name is Xiaoxin."

After introducing himself, Li Xin did not delay and invited a few people upstairs to inspect the house.

"Mr. Qin, do you have any floor you are interested in?"

"Because of the newly opened real estate, most customers look at the villa. No one has decided on this one. You can choose the floor at will!"

Hearing what the other party said, the thought in my heart blurted out: "That's great, I think this building is pretty good."

Chapter 1169: Difficulties of Manager Xiao

Stay~

Not only Xiaoxin was stunned, Tang He and Xu Ya looked at each other, staring at each other.

Silly!

This building, this building...

Damn~

Is this a giant?

It turned out that when he said on the phone that he wanted to buy a flat, he really wanted to buy a flat.

Hasty, hasty!

"Qin, Mr. Qin, are you talking about this building...?"

Xiaoxin's stumbling tone represented the mood of the two Tang He.

"Yes, the whole building."

Qin Yu pointed up and down with his finger, "Isn't it said that this building has not been sold, can't it be sold as a whole?"

"No, it's not."

Xiaoxin waved his hand again and again, and hurriedly said: "Yes, of course...I am too...too..."

"Happy." Tang He reminded her by looking at her appearance.

"Yes, so happy, so happy."

Xiaoxin patted his hands and said happily: "I am so happy, Shao Qin, how many floors shall we look at first?"

"Why don't you start from the top layer and look slowly layer by layer?"

Xiaoxin decided to spend it here today and devote himself to providing service to the boss.

As long as you can satisfy the boss, you can do whatever you want her to do.

There is also the young couple Tang He.

If this order can be achieved, they will be their benefactors and great benefactors in the future.

"Okay, then watch it slowly."

Brother Yu is not in a hurry, he is here to visit the house today.

"You two have nothing to do, nothing to do together, I will treat you tonight."

Qin Yu asked Tang He and Xu Ya on the side.

"It's okay, it must be okay!" Tang He decisively pulled Xu Ya to follow the rise.

I think I am also a negative man of tens of millions, living in a large villa, and a large flat of more than 600 square meters.

No matter what, you should be considered a successful person, a member of the rich class, right?
this will...

I'm just a fart! -Tang He.

When you buy one house at a time, this kind of thing is bragging, and it has appeared in film and television works.

Where is the opportunity in reality...

If Brother Yu wants to buy it, it will be enough for him to talk about it for a lifetime.

Of the two buildings, this one belongs to the West Building!

The room type is almost the same as the east building, only the details have been changed.

Like the position of the bay window, the shape of the groove at the corner of the corridor, and the orientation of the restaurant.

No harm! !

"Let's go, go and see the next floor."

The decoration style downstairs is similar, and the layout is exactly the same.

So after visiting the fifth floor, Qin Yu asked Xiaoxin to take them to the next floor, "Let's talk about the price!"

"I will apply to the leader now, Mr. Qin, wait."

Seeing that she was going to call, Qin Yu reminded: "Don't talk to the team leader and supervisor, please find your boss!"

There are nearly 100 million orders, and a single discount is hundreds or tens of millions.

The people below really can't be the masters!

"Ah, oh, good." Xiaoxin turned into a wooden man and went to call obediently.

It's just that she didn't have the boss' phone number either.

I can only find my boss, the sales manager first.

"Manager Xiao, this is Li Xin from the sales department... I'm sorry to bother you. I have a big customer, and you may need to come and talk in person."

"He wants the entire Jade Pavilion... Yes, it's one, all for the first to sixth floors."

"The person is in the Jade Pavilion... It was introduced by my previous client, um, Tang He, Mr. Tang."

Explain and let the other party understand that it is not an unreliable customer.

The sales manager instructed her to stabilize the customer first, and pass now.

"Qin Shao, the boss of our sales department will come over right away. This is the biggest leader I can contact."

Li Xin was up and down, since she gave her hope, don't let the result turn into disappointment.

She was afraid that she would not be able to stand it, nearly a billion yuan!

This is how people are.

There is no direct connection with myself, no matter how much it is, it is just a number.

Smile, the past is over!

But once there is a chance to get it, it will become more and more troublesome, even if the chance is only one in several hundred thousand.

The simplest example, winning!

"This golden egg will definitely be hit!"

"Bought for so many years, it should be hit too!"

Which rule says that the longer you buy, the better.

Then the odds of each draw are lowered according to the age? ? ?

No draws, no points in my heart.

Didn't look at the headgear, but the work clothes inside...

Don't ask, ask is to be cautious!

"Brother Yu, if you really want to buy this, we will be neighbors from now on."

Tang He glanced at Xu Ya next to him, winked his eyes and said, "I'll come to Yu brother's house to eat a meal if nothing is wrong, the food must be better than ours."

"roll."

Qin Yu scolded with a smile: "Why do I regret a little bit and don't want to buy it anymore."

Hiccup~

Li Xin's toes were buckled inward, his heels lifted, and his toes touched the ground, and he almost floated.

Brother, brother...

dad!

"Don't, brother, I'm still waiting to eat and drink!"

"Little new."

"Here." Li Xin stood at attention as he heard the boss call himself.

This showed that Qin Yu and Tang He were stunned. They looked at each other and smiled, and said jokingly: "Relax, this is your place."

"Hey~"

Li Xin grinned, embarrassed and polite.

My territory?

Dad, please turn it into your territory, I am willing to be a cow and a horse for you.

"I just want to ask, I want to install a security system in the building, right?"

"no problem."

What's the problem, you just demolished the eighth floor...

It's too late!

Except for demolishing, you can do whatever you want.

"Ding."

The elevator rang, and Li Xin's eyes lit up, "Our manager is here, Manager Xiao."

"Haha, this is Shao Qin!" Manager Xiao just came in and recognized the master at a glance.

Qin Yu's momentum makes it hard for him to ignore it.

At the same time, a question flashed in my mind, 'how does this face seem to be seen somewhere? '

"Manager Xiao is polite, shall we discuss business directly?"

Although it is doubtful, it is not allowed to refuse. Manager Xiao nodded and said: "Okay, I wonder if Qin Shao has the right price in his heart."

"Haha, Manager Xiao laughed."

Letting go of the opponent's hand, and tapping his finger on him, Qin Yu smiled at Tang He and said, "Buyer, which one doesn't want the cheaper the better."

"Qin Shao was right, I was abrupt." Manager Xiao nodded and smiled, thinking quickly about what offer to give.

The other party will definitely bargain, so you can't give it to the end once.

"Manager Xiao, don't think about it."

Qin Yu interrupted his thoughts and said: "I am very happy to do things. You can give me a low price, yes, sign, no, let's talk about it."

Brother Yu always hates Moji when buying things, as long as the price offered by the other party is reasonable.

More or less, it's not that important.

What price is reasonable?

If you think it is reasonable, it is reasonable.

You came to me and paid half a day price, and finally got the price you wanted, and felt that there was still room for the other party to agree readily.

I lost hundreds of millions, ah~ so tangled, so uncomfortable.

Can't eat for days, can't sleep...

It's really unnecessary, just talk about it directly.

Seeing that he didn't seem to be cheating, Manager Xiao hesitated in his heart.

He is also considered to have seen the world, and if the rich say, it is really good to have a point.

Shouldn't you believe what the other party said, it's very tangled!

However, the young and newly rich people do things differently than before.

Then...

"Shao Qin, seeing that you are also a young man and you are quick and easy, then I will give you a reserve price directly."

"You want to take a loan, 15% off, and 10% off the full amount."

"When the boss comes, he only discounts this position, and even more discounts will owe you."

It is definitely impossible to owe a debt, and it is really not much to earn.

They are also unlucky, they came in when the market was hot.

Various materials, transportation, and labor have doubled, and the price is ridiculously high!

But looking at housing prices soaring online every day, all kinds of good news prove that there is a lot of room for growth.

Click~

The price almost slashed.

If it weren't for a steady stream of students, job seekers, and talent introductions, the market would just need it.

I don't know how many bosses are going to the rooftop to pick up the number and line up.

High cost, low unit price!

If you want to make a fortune, it's pure death, it would be good if you can sell it to recover the cost.

After all, the speculators are all in.

Now ninety-nine percent of customers are just in need, can afford a luxury house, and have bought everything that should be bought.

Incorporated into other parts of the Republic, except for a few top chaebols.

Others want to buy but they are not standard enough, so they can only take the money and do it in a hurry.

Individual investors in the Chuo District will not choose to start at this time.

Didn't see the "chicken" just entered, the monkey jumped out anxiously to death?

Besides, the cycle of buying up and not buying down will never be broken for many years.

After all, diving in the property market is a special case, too rare.

Let most people fail to understand future trends and become cautious.

Chapter 1170: Self-cultivation of King Juan

"Manager Xiao, you are not sincere!"

Sword eyebrows and star eyes, with a smile but not a smile, as if to see through himself at a glance.

"How come, Qin Shao, how about you?" Manager Xiao was polite.

Since the other party invited again, Brother Yu was also welcome.

"15% off, cash."

Qin Yu knocked on the desktop with his hand and said, "Now sign the contract and the money will be paid immediately."

The refreshing attitude made Manager Xiao a little uncomfortable.

He could hear "Money arrives in seconds," the face immediately burst into laughter.

"Shao Qin, refreshing."

Thumbs up and praised, Manager Xiao said to Li Xin behind him: "Xiaoxin, don't prepare the contract yet."

"Okay, then I..." Li Xin wanted to leave, but was reluctant to leave.

Such a big customer, what if you lose it!

Before signing, everything can happen.

"Go, I'll come with Shao Qin later."

With the words of the boss, Li Xin left, and ran all the way when he went out.

Go straight to the sales department, "Sister, help me prepare six contracts."

The legal counsel was taken aback when he heard it, and asked: "Six copies, did you come across group buying?"

"Which unit is not bad, you have to treat me this month."

"Please, definitely please."

Li Xin nodded happily, pointed to the screen and said, "It's not a group purchase, this, Jade Pavilion."

"Emerald Pavilion, you can..."

His expression changed, and he asked in a changing color: "Six copies, all of them are Jade Pavilion? Have you rounded up the whole building?"

The last sentence was called very loudly because of surprise.

The people in the office heard everything, looked up at Li Xin, and started to ask her what's going on.

"According to an old customer, I bought one directly."

"Luck, it's all luck."

Li Xin was particularly humble, but couldn't help but impress on his face the pride in his heart.

At this time, she should be proud...

One building, even if it is discounted at eighty to five, will cost more than 80 million.

"Xiaoxin, this year's sales are stable!"

"New sister treats me, I want a big meal."

"Yes, treat, you can't escape this time."

They are all insiders, how much can Li Xin earn with this single.

As soon as I turn my mind, I know it roughly.

There must be 600,000 yuan, and the discount is no more than 15% off.

This is a red line, and you will really lose money further down.

Therefore, envy is certain.

A single bill of 600,000 yuan, there are a few that can be done.

In the second quarter, the tasks for the whole year were overfulfilled, and departmental awards and year-end awards could not escape.

The sales crown can also be contended, no surprises are stable!

Calculating this way, the small half year will be accounted for eight or nine hundred thousand...

Which one is not envious, is there a mine at home?

No-the key is wormwood!

With the printed contract, he hurried back to the hall.

The sightseeing car just stopped outside, and Manager Xiao personally accompanied Qin Yu and the three of them to go inside.

Holding the contract in one hand, Li Xin stepped forward and opened the door, "Qin Shao, please come inside."

"thanks."

Following Tang He joked, "Xiaoxin, only Qin Shao is the only one in the eyes of this meeting."

"How come, Mr. Tang."

"When the contract is signed, I will invite you and my sister-in-law to dinner, is Shao Qin free?"

Tang He pointed at her amusedly: "Look, please, I'm going to pass by, and it must be Qin Shao."

Nothing is right, Li Xin simply laughed and said nothing.

It was Xu Ya who took a picture of Tang He, who was addicted to playing, and said out of anger: "Don't be cute, hurry up and do business."

For standard contracts, there are only a few points to look at, and the five certificates have also been read.

The land was acquired four years ago, which is a normal period for commercial housing development.

Calculated at a 15% discount, the total price of Jade Pavilion: 86,931,570 yuan.

"Manager Xiao, what we said just now is okay?" Qin Yu looked at Manager Xiao.

Li Xin did the same, looking at his boss with questioning eyes.

What did you just say, boss, don't mess with me!

"No problem, Xiaoxin."

"Manager Xiao, you say."

Li Xin is sitting in distress, waiting for instructions, 'it's good news, good news, good news...'

"Qin Shao is the customer introduced by Mr. Tang, our old customer introduces the new customer policy, you remember to do it."

Li Xinsuo was taken aback, and said, 'this is it? '

"Okay, manager, I'll apply later."

Li Xin actually still has a question, whether this should be counted as one client or six suites.

The policy is also to give food to people, so foolish customers, just say something nice and let it go.

If he can't give a small gift, he feels he has made it!

But in the face of knowledgeable customers, you have to make them feel sincere.

Because the other party understands, fooling around at will is purely using the other party as a fool.

Don't talk about the list, it's good if you don't become an enemy...

But as a company employee, she also has to think about the company. If 10 yuan can solve it, it costs 100 yuan. How can she do this work?

Fortunately, Manager Xiao told her directly and counted according to the number of transactions.

This was also specifically requested by Qin Yu, and the two 'quasi-old husbands' were both real estate agents.

If Brother Yu doesn't even know this trickiness, wouldn't he be ashamed of setting up his prospective son-in-law, a real estate tycoon?

After signing the contract here, Qin Yu and Li Xin went to the financial office to transfer money.

Manager Xiao chatted with Tang He and Xu Ya in the lobby, but Yu Guang kept looking at the office area.

More than 80 million orders are stimulating even the sales manager.

Such big singles are really rare, and they are still in the 'depression' period.

When Qin Yu came out again, Li Xin, who followed him, made an OK gesture to himself.

Manager Xiao's heart hung up in an instant.

"congratulations."

Taking the initiative to greet him, Manager Xiao suggested that he borrow flowers to present the Buddha, as the host to celebrate Qin Shaoxi's new building.

However, this proposal was politely declined by Qin Yu.

"We still have business, another day, another day."

"Well, Qin Shao, when do you move in, I will arrange for Xiaoxin to help. Just give instructions if you need it!"

When the other party mentioned it, Brother Yu really remembered.

"Don't change the elevator first. I'll let people bring things here in the past two days, and then someone will have to help open the door."

Li Xinyi quickly handed over his business card, which was a good opportunity to hold his thigh.

My own company is not just doing this one project, and I think the big guys will not just buy this building.

"Shao Qin, if you have any instructions, you are on call, just grab me and use it hard. I'm very capable."

"Haha, good job."

Xu Ya stood by, looking at the chatting and laughing people with weird expressions.

What are these tiger and wolf words?

She was dirty and wanted to be crooked.

Or is the other party deliberately a pun, meaning something?

Qin Yu has a girlfriend. Will he move here? What should I say when we meet?

Today's conversation is not to be said! ?

Leaving the sales center, Tang He hit him with his arm, "Thanks, Brother Yu."

The feedback that introduced the customer was not a small surprise.

He didn't know it himself, and he didn't see any publicity.

If it hadn't been for Qin Yu to mention it, Tang He wouldn't have thought of it.

No wonder he didn't look for a salesman, so he had to help him introduce the previous sales.

The developer's feedback alone saved him 120,000.

Saving is earning, "I have to ask for it today, let's talk, it's okay to eat anything..."

"How about some dragon meat?"

"Grass, I'll give you a dragon fart, puff!"

"I Gan, are you serious? Sun thief... don't run..."

After discussing for a long time, I didn't think of a suitable place. Finally, Xu Ya suggested that she should do it at home.

So, went straight to the supermarket and bought a lot of things.

The big bag and the small bag brought six bags and returned to their home in the neighbouring community together.

"I'll call A Le and ask where he is!"

"Then I will ask the doctor to see if he is there."

The two contacted their friends and planned to have a reunion.

It went well in Tanghe, and A Le was in the store, and he would come over when he was busy.

Gao Bo is not working anymore. People are in Demon City, so they can only come back another day and get together again.

"What can I do for help." Putting down the phone, Brother Yu rolled his sleeves and walked to the kitchen.

"Go go, I need your help when I am here."

Tang He rushed him out, and Xu Ya also cooperated and said, "Baozi, you accompany Brother Yu, I will get some cold dishes first."

After a short while, four cold dishes were put on the table, and Xu Ya brought a bottle that hadn't been opened for six years.

"You drink first, I will prepare something else."

Looking at Xu Ya's back, Qin Yu stood up the sow to the bun: "Bun, you really earned it."

In this way, gentle and virtuous, the woman who goes to the hall will make money for everyone.

Tang He grinned silly, "That is, the two great blessings in life, confidant and confidante, I take it all."

The arrogant tone made Brother Yu want to kick him.

No, I have to show Shanshan someday.

As the contemporary king of scrolls, Jiang Xiaoshan is definitely a model among women.

Take care of housework, cook, and be proficient in everything.

The image is fashionable and avant-garde, generous and dignified, playful and cute, and can control any style, impeccable.

Not to mention the appearance, one in a million, just a lot more.

The temper is even more gentle and obedient to him.

You are just a trash when you wait, you don't even have to lift your hands.

Every time I was alone with her, Qin Yu felt that it would be good to be trash.

If she publishes "The Self-cultivation of Contemporary Scroll King", she will definitely be popular.

"When are you two going to work?" Qin Yu asked casually after a drink.

"Brother, why are you like my parents, can we talk about something else?" Tang He was tired.

Why are people asking him this, don't we have anything else to talk about?

"No, your relationship is stable and your income is objective. What will you do next without getting married?"

Brother Yu was also puzzled, this is not a matter of course.

"As for you, you have a successful career and a fiancée. I heard that my aunt has even set Feng Guanzia."

"I lost it, you know that too?"

"I went to see Auntie before, don't you know?"

"My mom didn't say it!"

Qin Yu was stunned, he didn't know what was going on in the family, was it the old Qin family?

It really is abandoned, abandoned the account?

"Your brother in the family, tut..." Tang He shook his head straight.

However, Tang He had a bigger head when he thought of his trumpet.

That kid, how do you feel that your practice is crooked?

"Fuck off, my old Qin family has a romantic and unruly nature."

Tang He's hand holding the wine glass stopped in the air, shook his thumbs up, and drank it in one fell swoop.

It's so unruly, the old Qin's family is about to open up its branches and leaves.

"But Brother Yu, you really haven't considered getting married?" Tang He is also really curious, what he plans to do with so many women.

It's okay to be young, how old is it?

None of those women are making trouble, shouldn't they?

"Chill, don't worry, brother can do it." Brother Yu gritted his teeth and picked up another cup.

Shit, it's choking!
