

## **Pinnacle 1251**

### **Chapter 1251: controlled repatriation**

Nico, a confusing question!

One of the important indicators in the ranking of world famous schools is 'international students. '

If there are not enough international students applying to the school each year, the ranking will drop.

This indicator greatly affects the order of ranking.

Therefore, for the selection of 'world famous international schools', domestic colleges and universities with conditions are eager to recruit international students.

In the beginning, there was a 'Han'er there, and the written test had to be pretentious.

Later, even the written test was waived, as long as the application was submitted.

Not only various deductions and exemptions, but also help with passports and landing.

There are also various scholarships, just apply directly.

Yes, there are no conditions, just apply.

...It should be said that the only condition is 'international students. '

In developed countries, the white-skinned ones look down on us, and there are not enough places.

Then find Nico and look at Africa.

"Classmate, do you want to go to a prestigious school? The renewal fee is free, and there is still money!"

"Graduation package distribution!"

If they are for the purpose of learning, to develop together and create personal value and social value.

As a very inclusive country, it will naturally welcome this.

But the fact is, these people are all here to be the 'Lady Lord'.

Lying down and earning money, there is still someone waiting for the uncle.

In his own country, a thing that even dogs disliked, was packaged by a famous school and transformed into a social elite.

Let's get some acting skills, get a trophy that I don't even know what it is, and shoot a few videos.

Small money and identity are all in hand.

Then, you can lie down to make money and pick up girls.

Don't worry anymore, walking down the street and being hit by a stray bullet will make you a dead dog.

It's so outrageous!

So far, the number of Nicolas in China is increasing.

Even in the developed coastal areas, a large-scale 'Nego community' is formed. '

These people get together, do not engage in labor, and create value!

All day long, using his identity as an 'international friend', he cheated to eat, drink, and deceive P.

There is a saying to describe them very aptly: everything can be rubbed, and you can rub it.

But there are still people who think that this is advanced thinking, superior!

Protecting him all day long without saying anything, but instead encourages the other party's arrogance.

So much so that it has developed to the current level of omnipotence, causing a lot of turmoil in coastal cities.

These guys actually entered the game cabin during the gap period at the master's house.

Sneak into the home to commit various crimes.

There are also people who live in the other party's house as their own.

At first, domestic robots did not have the function of 'strangers'.

Found out that there are outsiders, and they will also treat them as friends of the owner. This is out of a kind attitude.

Unexpectedly, so passively became an 'accomplice,' serving these people with delicious food and drink every day.

It was still Kirin who discovered this situation by accident.

This year, only one window city received more than 20,000 related cases.

Illegal intrusion and financial misappropriation have been reduced by the so-called 'friendly people' with loud thunder and little rain.

The repeated behavior has attracted the attention of the company.

Calling up relevant cases in the background, watching those Negos showing off their 'illegal and good moral' behavior in front of the camera of home robots.

Qin Yu's disgust for these people reached its peak.

"Secretary Xu, come in."

Calling Xu Meixin to the office, Qin Yu pointed to the picture in the video: "These people, who filed a lawsuit for them?"

After a simple search, Xu Meixin found the answer: "It's an organization called the International Friendship Association."

"Among them, several women formed a small judicial communication circle and used their abilities in the judicial circle to shelter them."

"With the help of international law and the particularity of identity, evasion and sophistry of their behavior."

Passing through the photos that appeared in the projection, I saw the spades tattoos on the navel.

Brother Yu's expression was stunned, is there such a thing in reality?

"I sent a note to the yamen in Window City. The radiation was found in Window City, and the concentration is about to reach the warning line. The source is here."

Qin Yu pointed it out, it was the center of the 'Nigo Community'.

"From today, the window will be under military control, and the demons will be under semi-military control. RRT will be sent over to repatriate all Nego."

The voice paused, Qin Yu five fingers grabbed forward, the owners in those photos were put into the same file by him.

"And these women, send them off with them."

Since I like licking so much, I will send you to my hometown to lick slowly.

"Understood." Xu Meixin nodded and left.

For her, the boss's words are the imperial edict, just listen to it.

As for bringing the window city into control, it doesn't seem to be difficult.

Radiation value.

It's there when the company needs it.

Now is the time when it is needed.

woohoo~

A piercing empty alarm sounded above the window city.

Subsequently, a regulation statement appeared in news, radio, public channels and various network communication channels.

"From now on, the window market will be under full control, and the demons will be on alert."

"The outsourced military agency RRT will clean up the city and eliminate the source of pollution."

"Please cooperate with everyone, stay at home and don't go out."

As soon as the notice was issued, the city immediately plunged into riots.

Many people followed the instructions and started to return home, passing the supermarket on the way, and then snapped up some supplies.

And some people want to escape control.

Among them, there is Nico who is doing shameful things with spades.

"F-K, \*\*\*\* bitch, take me out quickly, I don't want to stay here and go to jail."

Not free, would rather...

Death is impossible, anyway, hurry up and let this \*\*\*\* take me out.

I also have to go to a nightclub to be happy and find a girl to be happy.

How can you be stuck at home, how boring!

"Okay, baby, I'll take you out now."

The spade, who was still smiling when she was called a bitch, obediently took her big baby out of the room.

Sitting on the brand-new private flying car, Spade showed off to her baby: "Miracle's most advanced flying car, no one dares to stop it."

"It's great, let's set off quickly and go to Hudu. I'm going to find Niujiang."

"Departure, destination, Hudu."

"Received, departed, destination Shanghai... The highest authority covered."

"The new destination is being set up, search for the nearest patrol house... 403 meters away, locked, set off."

"Cancel, don't go to the patrol room, cancel..."

"F-K, smack, stinky bitch~"

"Ah, baby, I love you~"

"Waldorf, let me out, bang bang..."

The patrol house 400 meters away welcomed its new guests.

Two 'fake citizens' who tried to escape from the restricted area during the martial law. '

After verification, spades have already changed their nationality many years ago.

## **Chapter 1252: garbage recycling**

Garbage, just misplaced resources.

Before, Qin Yu thought that his understanding of this sentence was in place.

But after Feng Shuyi's interpretation, he had a new insight.

It turns out that 'garbage' can still be used in this way.

"Boss, why don't you throw these Negos into the battlefield?"

Looking at the arrest farce that took place thousands of miles away through the projection, Feng Shuyi offered different opinions.

Qin Yu's expression brightened, "Battlefield?"

Feng Shuyi nodded, tapped a few times on her terminal, and a new set of data appeared in front of her eyes.

"We can build a complete scoring system on the African continent, and then use the scoring to divide the grades.

In the end, the unqualified Nego will be forced to enlist and sent to the warp battlefield. "

"There's an increased population depletion there, and they're just the kind of warriors who can be on the front foot."

Warriors, are you talking about cannon fodder?

However, I like the idea too much.

Turning the chair to face Feng Shuyi, Brother Yu patted his thigh and decided to reward her.

Ge You sat paralyzed in the chair, and Qin Yu got in touch with Mark, who was commanding on the front line.

"Don't send them back, send them to the greenskin battlefield."

"Boss, do you want them to join the team?"

The battle group composed of ordinary people and the battle group composed of genetic warriors are two different departments.

Mark thought that he wanted to let these people join the army of ordinary people.

Then, they will have simple individual armor, standard weapons and basic rations.

And, three months of professional training.

This is better than being sent back home, at least Mark thinks so.

In the next second, he knew he was thinking too much.

No individual armour, no training, no rationing.

Just a bolt gun and send them in.

run away?

Anyone want a head? There is fast hand, no hand is slow.

Looking sympathetically towards Nico, who didn't know his fate was doomed yet, Mark readily took over the task.

Mark, who has long been homogenized by culture, is a firm 'value' doctrine.

Only those who create value are the same in his eyes.

Those manure machines that cannot create value and only waste resources.

No matter how much he dies, he doesn't blink.

And like this, he is happy to accept this head.

Unfortunately, there are more important tasks in the future that he needs to perform.

Credit score, class division, mandatory enlistment.

Without corrupt countries and the European Union as stumbling blocks, the continent would be completely naked to the company.

As for the inability to resist, the orbital space station was completed and officially put into operation.

Beizhou has completely fallen, and the so-called resistance is no longer there.

If I hadn't ignored it before, I wouldn't have paid attention to it at all.

It has long been in the company's pocket.

"Kylin, I need your cooperation." Mark turned on the headset and asked Qilin for help.

"Man, you have found the right person, the third fleet is coming, prepare for a big fight!"

"...The Third Fleet, do you need it?" Mark was stunned.

A Medusa flagship, a fleet of 20 Falcon-class cruisers, used for such trivial matters.

You - Qinglong Yanyue clean room?

"Cough cough~ The third fleet Huiyue, the eighth and sixteenth squadrons of the mobile unit."

"..." Mark was dumbfounded.

Above the sky, a huge starship broke through the clouds and sailed into the distance under the gaze of the world.

Mark led his own team to reach the landing ship that came to pick them up and chased in the direction the starship left.

The command of the scene will be transferred to Yuri later.

The two have worked together countless times over the years.

For this kind of thing, it's no surprise.

However, compared to staying in the demon, they are responsible for on-site control.

Yuri is more willing to replace Mark's task to complete the conquest of a continent.

Although it is only in the sense of situation, the earth has no power to stop the footsteps of the Republic.

But this must be an important moment that will go down in history.

As for the historical record, is it favorable?

What a joke, even a foreigner like him knows that history is written by the victors.

Could it be that there are still people who criticize themselves and choose to be the Virgin? idiot? !

However, wait until the 'source of pollution' here is resolved.

He will also go with reinforcements, but it is not too late.

The starship descended gradually and remained at an altitude of 2000 meters after entering land.

The city below fell into a confrontation between jubilation and panic.

Someone threw stones from the ground into the sky, as if to drive the starship away.

Or knock it down and prove your mettle.

The next moment, two notches were cracked under the starship, and the two landing ships separated from the main body and landed towards the city.

At the same time, the two power armors fell freely and fell on the open space on the edge of the city.

"Please note this is the RRT joint force, we are about to take over the city, please stay home and stay calm.

All actions that may cause misunderstandings will be regarded as provocations and rebellions, and we will take action back..."

Dangdang~

Bullets bounced off the surface of the power armor, and sporadic sparks reminded the Gene Warriors that they were under attack.

In the next second, the rotating muzzle attached to the robotic arm is aimed at the target.

buzz~

The earth wall collapsed, and the enemies behind disappeared.

Together with the armed off-road vehicle preparing for a sneak attack, it was scrapped and collapsed in a 'click'.

Landing ships patrol the sky above the city, and from time to time they will drop 1-2 soldiers at predetermined locations.

Their duty is to set up the line of defense and wait for the arrival of the follow-up troops.

Force is not an end, but a means.

Once the situation is under control to a certain extent, someone will go to the local yamen to negotiate with those in power.

Then, disarmament, disarmament, layoffs, and universal registration.

Then comprehensively score all the nationals, and then select the 'qualified' targets and send them to the subspace.

What awaits them will be a new life full of 'hope and glory'.

As for those who lost the election, they continued to stay at home.

Engaged in planting, handicraft, animal husbandry...

And all kinds of "low" jobs, relying on labor to get higher scores.

Only in this way can they go to another world and start a new life like those selected "excellent talents".

It's just that the place where the former goes is called the 'subspace', and the place where the latter goes is called the 'game cabin.' '

There's another name: The Demon.

Armed resistance was inevitable, and the starship came under intense artillery fire.

Then, the starship rose into the clouds and disappeared from sight of the naked eye.

Just when those in power thought that they had bought enough time to seek help from the white-skinned father.

Above the sky, the bright beam of fireworks fell silently.

All resistance, secret military bases, arsenals...

All disappeared under the beam and turned into ashes.

Also gone are the last flukes and ambitions of those in power.

### **Chapter 1253: D two hundred and forty-three, freshmen**

A full-scale campaign against the mainland ended in less than 4 hours.

No one thought of such a lightning strike.

But after it happened, it made people feel that things should unfold in this way.

It's normal to end at such a speed!

The gunpowder smoke and firelight soaring into the sky swept up and disappeared after the teams in individual armors passed by.

The landing ships maintaining order hovered over the city, playing the latest recorded announcements repeatedly.

"Everyone is requested to go to the nearest registration point, record their identity, and obtain brand-new personal information of citizens."

"We will make the best placement for all citizens according to the scores, the Galactic Republic welcomes you to join..."

Whether the heart is excited, disdainful, or full of anger.

At this moment, they all went to the registration point in silence.

There are also people who want to resist stubbornly and play hide-and-seek with RRT.

Once caught, its score will be pulled directly into the blacklist.

It's just that people can't understand why those who were pulled into the 'blacklist' also boarded the landing ship.

Doesn't it say that only outstanding people can be selected?

"He's just aboard. When he gets there, his treatment will let you understand."

The first landing ship set off and returned to the starship, followed by the second and third ships.

When all the landing ships returned, the starship parked above slowly pulled up, breaking through the clouds and heading for the moon.

"Look, that's the orbital space station."

Pointing to the orbiting space station that revolves around the earth outside the window, the close-up cannons on it move back and forth on the chain track.

The muzzle is raised and lowered from time to time to automatically identify the approaching target.

When the muzzle was pointed at the starship, everyone's hearts were raised.

However, the muzzle was pressed down in the next second.

The near-anti-artillery swiped to the other side, and the buddies chatted excitedly again.

If you can stay in the orbiting space station, it is much better than going to be a soldier.

Unfortunately, the admission criteria for the space station are extremely strict.

"Maybe we can protest, knowing that we are all chosen, the best..."

"If we protest together, as an important talent, it will definitely attract the attention of the company."

"Just do it, I've already thought of a slogan..."

When they heard his so-called slogan, everyone's expressions lit up.

So, they walked towards the front cockpit together.

"We want to talk to the captain, get out of the way quickly."

"That's right, I'm a top-ranking citizen with a high-quality rating, and maybe I'll be your boss soon, so you'd better listen to me..."

The next moment, the muzzle of the gun in the hands of the individual soldier in front pressed against his head.

A drop of cold sweat left, and the cold voice of the individual soldier sounded: "If you don't want to die, just return to your position."

"Okay, let's go now." The buddies who thought they were "important" before returned to their seats immediately.

When the individual soldiers came to patrol, they put their hands on their thighs like good babies.

Bending down and shrugging his head.

"This is the Ice Fist, apply for passing the light gate, code..."

"Welcome back, Ice Fist, the application is under review, please be patient."

"Your application has been approved... A new order has been issued, please be patient."

"A guest with special status needs to take the Ice Fist to Planet D243, please pay attention to protect his safety."

"The detailed information has been sent, and the guest will arrive within 10 minutes. I wish you a smooth journey in advance."

When the exchange was over, the captain clicked on the screen in front of him.

After seeing the identity of the so-called passenger, his eyes narrowed slightly: "Please help me find the captain, I want to talk to him about safety issues!"

Below the starship, Yang Chengjun, who had been waiting in the base for many days, finally came to the Shunfeng ship.

The planet he is in charge of, D243, is a life star full of primitive features.

The vegetation there is dense and has extremely high research value.

At present, no civilization has appeared, so his responsibility is mainly to ensure the smooth development of research.

The research team sent by the company will arrive within fifteen days after he officially takes over the planet.

At that time, he will be responsible for anything that goes wrong.

In this regard, Yang Chengjun is not panic at all!

Because he is not alone, the people on this starship are his assistants.

At the same time, the company dispatched an RRT combat team.

Assist him in his work and be responsible for keeping him safe.

In addition, the necessary supplies and equipment will also be sent to D243 as soon as possible.

After successfully boarding the ship, Yang Chengjun met the captain and the military attache on board.

"The order I received is to deliver you safely to D243, and the captain will stay there and lead his team to assist you."

"Thank you, I want to meet the guests on this ship."

Yang Chengjun wanted to see his 'labourers', but he didn't know what their physical fitness was.

If it was a group of old, weak, sick and disabled, he would not agree.

When he saw the young buddies in the cabin, Yang Chengjun showed a satisfied smile: "Captain, I think we can set off."

In front of the huge light curtain stargate, the Ice Fist is slowly losing its energy layer towards the center.

"Please maintain a fixed speed, everyone is ready for shocks..."

"The protective cover has been opened, and the silver ink coating has been tested normally, with no omissions!"

"In the communication connection, the connection with the base camp to obtain the star map."

"Everyone, welcome to the subspace."

The boundless space is like a colorful fairy tale world.

Those energy layers that present various energy stripes and float like a veil are full of temptation.

The starship has to carefully avoid it, to prevent it from being distorted by pollution.

"Radiation value detection: 5500. At normal value, the energy shield consumes 0.2%."

"Goal setting...setting coordinates..."

When the starship's energy cover dropped to 92 percent, they successfully reached the D243 star.

From outside the planet, the entire planet looks like a ball with green hair.

The water coverage rate reaches 97%, and only 3% of the land is connected.

Yang Chengjun and his people are just above the highest peak in the land.

They will build a base here and start a new life.

Yang Chengjun is very much looking forward to this, but Nico, who can be driven off the landing ship by individual soldiers.

However, they found that the truth seems to be different from what they imagined.

Bang!

All kinds of tools were loaded and unloaded and placed in front of the Negos.

"Dig it!"

The individual soldier with the bolter rifle pointed to the tool, "Before it gets dark, lay the foundation first."

The brothers looked at each other in dismay. Someone picked up a tool and threw it to the ground angrily.

"We are selected high-quality citizens who are here to enjoy the life of the upper class. I want to tell the company..."

boom!

He jumped up and down, and stepped on Nico's face with his black armored feet.

Trample him under his feet and twist his toes hard.

Colorful, nutrient-rich soil is full of vitality.

Others, as if stung, picked up their tools by jumping, and worked hard to do their homework as required.

#### **Chapter 1254: Current status and future**

for half a year.

Batches will not be able to create value, and the lazy Nigo will be sent to the subspace.

In the battle, there were a few fighting heroes.

It has to be said that Nico's natural motor nerves are well developed, making them very suitable for work that has nothing to do with brain power.

Under the operation of several war heroes, a death squad led by Nego appeared under the Warp Space Exploration Fleet.

If you want to get better treatment, honor and respect, you have to fight with your life.

Every time the landing battle was the first to descend quickly, it was the landing troops headed by the death squad.

And they also obtained equipment and rations that they could never imagine, and officially became a member of the fleet.

The disappearance of these people has changed the face of the mainland.

Resources are no longer subject to uncontrolled exploitation and plunder, and people begin to create wealth with their own hands.

The new order and rule bring hope to the hard-working people here.

It also made them full of recognition for their new identity.

In the second year of the selection mechanism, whenever a vehicle with the flag of the Republic passes by.

The hard-working people on both sides of the road will shout, 'Long live, long live.'

The popularization of lingua franca and the reform of education have accelerated ideological transformation and recognition.

Everyone is proud of their identity as a republic, and proud of their work to create wealth.

Any act of cheating or cheating will be ostracized and despised by the public due to the real-name report of others.

Once such a person appears in a family, the whole family will be criticized.

Every day, someone punishes lazy people in various ways.

Such as throwing feces on their door, smashing glass, insulting, etc.

For a time, the entire continent was thriving, and a huge amount of energy erupted.

The labor value created has completely made up for the social pressure caused by the previous population shortage.

In 1941, the European Union was merged into the Galactic Republic by way of 'dissolution', obtaining the last 'special zone' quota.

In the same year, the earth ushered in a great unification.

This year is also designated as 'the first year of the Milky Way.'

The rest of the small countries were simply ignored.

They didn't even have the chance to join the republic on their own initiative, so they could only choose to contact the SAR chief.

Trying to incorporate himself into the territory of the Republic.

Because, once they are isolated, the only thing that awaits them is their demise.

The Galactic Republic is divided into four special zones: Central, Barrow, Rome, and Mali.

The four major regions each govern hundreds of subordinate provinces and manage this huge country.

At the same time, the number of members of the Supreme Council expanded to 603.

Not only do they govern the Republic, but also the Habitable Mars, the Moon, the Warp, and the Greenskin Battlefield.

Compared with the territory it rules, the management organization of this number can be described as streamlined.

This is thanks to the assistance of the "brain brain", and now the whole society can't get rid of its dependence on it.

The company occupies 201 seats in the parliament.

In fact, no one believes this number at all.

To the outside world, companies have an absolute right to speak in parliament.

The so-called 201 is just a low-key consolation.

Who doesn't want to stay close to the company and get its support and recognition.

Not only that it has the most advanced technology in the world, it also controls the resources and order that human beings rely on for survival.

Also because the force in its hands is enough to pacify all the rebels.

What's more, three-quarters of the population today has been immersed in evil for a long time.

The world is no longer what it used to be. Those machines that fill every corner have replaced the human figure.

The only thing they have in common: MU.

Whether this is right or wrong, only time will tell.

But now, no one can deny the convenience it brings.

Today, the company is a veritable behemoth.

The word "company" has become the endorsement of 'powerful'.

Ordinary organizations can only describe themselves as companies.

The company has become an exclusive synonym for miracles.

As long as these two words are mentioned, they represent absolute authority and power.

And its tentacles are also found in all industries, from as small as a screw to as big as an interstellar war, all of which have its shadow.

Ninety-nine percent of companies in the world are inextricably linked to it.

Those who choose to resist rather than cooperate or compromise.

Successful completion of self-elimination!

The miracle town has also become a holy place in the eyes of mankind.

There you can get 'eternal life,' to be able to realize all your desires and dreams.

Whether you want great power, long life, supreme power, or... everything.

All can be satisfied there, but there is one thing.

What can you pay for this? !

In a secluded town, Qin Yu was walking in the garden with a woman with a bulging belly.

Whenever someone passed by, he would nod and smile at the two of them, but he didn't mean to come forward to disturb them.

Qin Yu also smiled back and kept a polite distance from each other.

"When are we going?" Yalan stroked her lower abdomen with her hands, exuding the brilliance of a loving mother.

After years of hard work, I have strengthened my physical fitness.

Ya Lan got her wish to conceive a child, and she is also the third person to conceive a child.

The first two are Lazy Cat and Lu Qing.

Unlike her, the two were able to conceive a child because Qin Yu helped them cheat.

The injection of the second-generation supernatural gene caused the two people's physiques to undergo earth-shaking changes.

It produces...

Naturally, she was able to withstand Qin Yu's life intensity and successfully conceived.

Yalan is different. She achieved this step with her years of hard work.

In fact, she was the first of all women to do it.

It's just that she doesn't know it herself!

"Wait until you give birth, then set off." Qin Yu responded with a smile.

After several renovations and expansions of the town.

Now all the women around him live here.

However, there is no possibility of meeting between different living areas.

After all, some things are still hard to explain.

For example, Teacher Shen...

And he will also take all the women to the subspace after Yalan's successful delivery.

After years of development, the exploration fleet has laid a huge territory in the warp.

The sect developed by McKison guides people's minds when this force develops to the point of imminent qualitative change.

They need a real leader, a god.

This time, he is going to sit on the golden throne made by McKison and accept the so-called 'appointment of gods. '

Become the will and incarnation of the vast territory, unite all powers and exert stronger power.

Otherwise, continue to develop.

This force that no one can lead and develop freely will eventually get out of control.

As a result, it will only be a backlash against itself.

The power of the company in the warp is terrifying, only Qin Yu, who created him, knows best.

That power cannot be resisted by the Galactic Empire.

The environment they live in is too superior, and the races of the warp are struggling every day on the edge of life and death.

Not only to fight the radiation pollution that exists all the time.

At the same time, we must also face the dangers and complex environments brought about by war and disaster.

Living, every moment is a test.

How can the flowers in the greenhouse win over the lush thorns beside the sewer.

#### **Chapter 1255: discover patterns**

Small town, area B.

In a four-storey detached house, the women are busy preparing a sumptuous dinner.

Lu Qing, Tang Xin, Song Yuqiao, Talyssa, and Xiao Caiyan gathered together.

Several women are from the waste capital.

Now living in the No. 1 courtyard in District B, it can be regarded as a small group.

Here, Lu Qing is the most powerful.

From the very beginning, Qin Yu made it clear.

She is the queen of the palace in this courtyard No. 1.

All the others will follow her lead.

This is also the case, Lu Qing will accept the reality in front of him and live in this No. 1 courtyard.

Otherwise, she has to settle accounts with Qin Yu.

Although I always knew in my heart that he would definitely not be honest outside.

But I didn't expect that there would be so many.

At the beginning, I was still a little uncomfortable.

But after being beaten hard by Qin Yu, she understood in her heart.

In the face of this non-human being, a person can't stand it at all.

If she was really alone, she would be overwhelmed sooner or later!

And one more, these women have their own merits.

No one is worse than the other, and it is really interesting to be with them.

To paraphrase Teacher Song: Why do women make trouble for women?

Form a group of best friends, when Qin Yu is away.

Go shopping, go shopping, play games, play mahjong, drink tea, take pictures, go diving.

Don't live your life too casually, everyone is their own.

There is no need to hide and tuck, and get along with each other frankly.

It's really comfortable!

So, Lu Qing became addicted.

Originally, she was more open-minded, but now...

Brother Yu felt that she had a tendency to take it all.

Teacher Song was eaten to death by her, and there was even a secret affair between her and Talyssa, and the two of them struggled together.

Everything is difficult at the beginning, after getting used to and starting to enjoy this way of getting along.

After knowing that there are other districts in the town, I heard rumors that there are other small courtyards inside.

Lu Qing, like a normal person, occasionally pestered him and asked, "How about we have a friendship and let the sisters get to know each other!"

"..." Seeing her twinkling eyes, Brother Yu just felt tired.

Are you trying to make friends? You want to open a harem.

If you open a harem in my harem, are you afraid that you won't be floating?

After being rejected several times, Lu Qing still did not give up.

No, today is a rare day to get together. Before dinner, I pestered him to talk about it again: "See you once, just once!"

"I also want to know if the sisters in other courtyards are as good as them."

"If not, I won't agree." Lu Qing said arrogantly.

Without the shackles of age, she behaved more and more childishly, and she acted more coquettishly than children.

Brother Yu rubbed his temples with a headache and said, "I'm afraid you guys will fight."

"???"

As his thoughts turned, Lu Qing's expression gradually cooled down: "Why, do you have other princesses in the palace?"

Look, you know it will be like this.

hey~

Being a sun, shining brightly, why is it so tiring!

He stretched out his arms and put her in his arms, his big mouth directly covering it.

When she waited for the other women who were busy cooking in the kitchen to come out and prepare for the two of them to eat.

Seeing the scene on the sofa, he was helpless in an instant: "It seems that today's lunch is going to be dinner."

A preaching put Lu Qing into sleeping clothes, turning all her protests into non-threatening hums.

Qin Yu still told her about the situation in several other hospitals, "Lanyue, the youngest of the four fairies, she and the four fairies, the little anchor, are in area A."

"It's the anchor who gets it right away every time the company has a new product, right Cheng Xiyu?" Song Yuqiao.

"I knew for a long time that you had an affair with her." Lu Qing rolled his eyes.

"I guessed it right, yeah!" Thalyssra clenched her fists excitedly.

Seeing the performance of several people, Brother Yu reluctantly complained: "Do you still want to listen?"

After they all quieted down, Brother Yu continued: "The rest are Xixi, which I met at the Conservatory of Music."

"Sister Yalan, the current president of Luheng..."

"That beautiful CEO?" Lu Qing couldn't help interrupting again, looking at her suspiciously: "The news said that she seems to be pregnant."

"...Those are all speculations by the media. Don't you understand the virtues of dogs? She just got tired recently and is resting."

"Really?" Lu Qing looked in disbelief.

"Cough, Shaman, a talented painter."

"I know, I know, I like her very much." Song Yuqiao's face collapsed in vain after being excited.

"She is too, ah, she hates it to death, what should I do when we meet in the future?" Teacher Song's idol image collapsed.

"...Jing Si, a senior researcher in the biological laboratory. Zhu Ying, the top person in charge of the base research institute."

"Xu Wanwan, the anchor of Doubi, the host of Wanwan's live radio station."

One name after another, passed into their ears through Qin Yu's mouth.

After listening, the girls suddenly discovered a fact.

None of the people he mentioned were unfamiliar.

Xu Xixi, one of the company's largest agents.

At the previous annual meeting, she also took the stage to give a speech and won several awards.

Yalan, one of the deadliest beauty entrepreneurs.

Shaman, a talented painter, her works can be sold for up to 80 million US dollars.

Now think about it, is there a company operating behind this?

Yan Xue, chief secretary of the company's Hudu branch.

It is also regarded as one of Qin Yu's shadows by the outside world, a typical position and weight.

Jia Jingsi, a medical genius, has published a number of medical achievements, and is the company's most trusted senior researcher.

He is also one of the members of the "Higher Talents Cultivation Program".

Zhu Ying...

After staying here, she was the first person to come to the door.

At that time, several women kept complimenting her on how attractive she was and how good she was.

Xu Wanwan, currently the most popular live radio host.

None, her live talk show.

She is regarded as an emotional outlet by countless young people, and some even regard the show she hosts as a spiritual pillar.

Every day, I have to stay in front of the live broadcast, waiting for her to go online to give a speech.

Of course, there are also company operations here.

Because she is the only anchor who can conduct a live radio broadcast in "Devil" by speaking face-to-face.

none of them!

"I suddenly understand now why there are some special cases in them."

Lu Qing rolled her eyes and began to guess who the other women were.

"Those acting actresses of the company will not..."

When I think of the four regions, there are many popular actress endorsement groups.

Lu Qing's heart trembled involuntarily.

If this guess is true, then...

The number of people is not limited to two digits, at least it has to start with three digits.

"Haha, it's cold, eat first, and we'll talk after eating."

Qin Yu got up and walked towards the restaurant, the women behind him looked at each other.

They shouted "Don't go, say it clearly" and rushed towards him.

Good lunch, postponed again.

Night supper, we have it!

### **Chapter 1256: Tour the Harem**

In the end, they couldn't get a clear answer either.

Instead, they were beaten again, and they were almost scrapped on the spot.

Under the suppression of the Great Demon King Qin Yu, several people could only shut their mouths aggrieved.

However, he already had a guess in his heart.

I'm afraid, those actresses who have taken over the company's endorsement will not be able to escape his clutches.

Rice, Anadi, Guna, Song Tie, Jin Hee, Li Xin...

Some time ago, Sister Jing suddenly became the spokesperson of the company.

That Bai Yueguang is what many women want to be.

Now, has she fallen too?

Ah~

So angry!

Thinking that these are only domestic, Lu Qing felt depressed.

She decided, from today until before departure.

She doesn't even bother with that big radish...

No, his heart is empty, a big radish with a hollow heart.

No matter how many people there are, they can't fill his empty heart.

While Lu Qing was full of helplessness and grief, Qin Yu had just ended an exchange with the person she guessed.

"Sister Jing, have everyone who needs to be notified have been notified?"

Looking at Sister Jing's fair and smooth back, Qin Yu's fingers swam gently on it.

"Don't move, keep it up." A gentle smiling face came towards him and put his head in his arms.

Sister Jing said softly, "I don't have so many burdens. My parents decided to stay here. The others... I'll do it alone."

She was not the first to decide, she went with Qin Yu alone.

Many women's families have decided to stay.

Even Liang Chuyu, Lao Qin, and Qin Luo decided to stay here.

"Life is still long, five or six hundred years, there will always be a chance to see you again."

"Besides, what can we do when we go?"

Thinking of all the fighting over there, Liang Chuyu was full of resistance.

Besides, her decision to stay here has another meaning.

Give Qin Yu a tie.

Let him always remember that he still has a home on earth.

Where is his roots, he can always choose to go home and have a look at any time.

After persuading several times, Liang Chuyu insisted, and Qin Yu also gave up.

He was already making the final preparations before leaving, and he gave everything to his younger brother Qin Luo.

Among them, including the wealth and rights of the company to stay on the earth, as well as all the technology.

This time, he will take everything he needs.

The rest are all left to Qin Luo.

Here, it will also become his kingdom.

Qin Luo actually resisted this...

But he also knew that he couldn't change his brother's decision.

And as a Qin family member, while enjoying the privilege, he also has to bear this weight.

If he doesn't accept his brother's kindness, after he leaves...

Whether the life of the Qin family is as stable as it is now is still unknown.

"Alright, after all, it's too dangerous over there, and it's not like you can't come back in the past."

Hearing what he said, Sister Jing nodded as if to comfort herself.

"By the way, what about the others?"

Sister Jing was a little curious, it was too quiet in the building today.

This small building with a total height of eight floors occupies a large area.

There are more people living in it, and she and Dami are the building managers of this building. '

Responsible for coordinating conflicts between everyone, arranging work, going out and other trivial matters.

Boom, boom~

The strong vibration sounded with the powerful rhythm, and the two looked at each other, finally knowing where everyone went.

Go to the terrace and open the window.

On the lawn in front of the small building, Taylor Swift is holding a 'Girlfriends' concert.

Gu </span> "Hi, how are you?"

"Ah ah ah~ Swift..."

After the exaggerated screams, everyone laughed and rolled to the ground on the spot.

Lisa and Jenny were lying on the lawn and rolling.

Haha, the Ernies are too funny.

If I had known that they were so interesting, I and my companions should have come earlier.

The gentle and elegant lady beside her noticed the gaze above.

Raising his head, he saw Qin Yu and Sister Jing who were looking out the window.

The beauty waved her hand and said, "O'Neill, come and join us!"

As for Qin Yu, how could he miss the carnival party in front of him.

Every time this time, he is the most excited.

Because tonight is doomed to be crazy!

For several days, the party in front of the small building was endless.

Until everyone was paralyzed on the lawn and no longer had the energy to cheer.

This crazy party has come to an end!

Brother Yu, also came to the penultimate stop before leaving, Area D.

The quiet old courtyard house completely copied the architectural specifications of Shangdu.

Even the bricks used for reconstruction were left over from the renovation of other courtyard houses.

Pushing open the door, the old tree was still in the courtyard.

Under the tree, there is a familiar reclining chair, a low bamboo table, and the tea cups on it are still steaming slightly hot.

"Is Xiaoyu here?" Aunt Ye's voice came from inside the room.

"It's me." Qin Yu replied.

Ye Zhiqiu opened the door and waved to him with a bright smile: "Come on, we are making dumplings!"

"How do you eat dumplings today?"

Qin Yu entered the room, Ye Jinlan, Xing Lu, Zhou Xue, and Shen Bing gathered around the long mahogany table, chatting lively.

There are various kinds of dumplings on the table, green dumplings with spinach and red dumplings with carrot juice.

There are also 'fruit dumplings' made with orange juice, filled with various diced fruits.

The most outrageous is the diced durian. Is this meant to be boiled?

"Don't you think it's fun?"

Xing Lu raised her head and said excitedly, "We are trying the most impossible dumplings."

Qin Yu's face was speechless, he wanted to say that this was purely a waste of food.

However, since they are happy, let them go.

Anyway, don't think about him eating those fruit dumplings later.

"Xiaoyu, look who makes the best dumplings." Zhou Xue was also inspired to compare.

Ye Jinlan raised her head and said, "Look at me first."

A faint murderous aura floated in the air, Brother Yu was not false at all.

Going up to glance, complained, "These dumplings are full of fillings."

Ye Jinlan smiled shyly and kicked her leg angrily.

Brother Yu deftly turned around and came to Xing Lu's side.

No filling, intact skin and beautiful texture.

Just as she was about to nod her head, when she saw that she was about to wrap the skin in her hand, she was instantly stunned: "Are you sure you are making dumplings, not buns?"

The dumpling skin behind the half finger, are you kidding me?

"Yeah, I hate it." Xing Lu stomped her feet angrily, urging him to leave quickly.

"Don't want to eat the dumplings I made later."

Brother Yu just pretended not to hear, and leaned behind Zhou Xue with a smile.

She stretched out her hands, wrapped her waist in her arms, put her chin on her shoulders and looked forward.

"How is it?" Zhou Xue asked while holding the dumpling in his hand.

Qin Yu nodded in approval: "The skin is full of stuffing, just like Mr. Zhou, you are beautiful and smart, it must be delicious."

Zhou Xue spat at him, "As long as you can talk, go."

But in that heart, beauty bubbling.

She squeezed the dumplings proudly, and said in her heart, 'My craftsmanship really doesn't have anything to say...'

### **Chapter 1257: happy farewell**

Genius to remember the address of this site in one second: [New] <https://The fastest update! No ads!>

Seeing that they were about to leave, the women became more and more clingy.

I don't know if it's because of anxiety about the future, and I want to determine my position in Qin Yu's heart.

For them, it was a completely unknown world after all.

Everything is understood through projection and description.

And Qin Yu is the only one that most people rely on.

Except for Lazy Cat and Lu Qing, such special cases...

The two not only affirmed their position in his heart, but also possessed the strength to resist all risks.

No matter where they are, they can ensure their own safety.

As for the spiritual...

Having a strong strength helps to strengthen the psychological construction.

As for absolute self-security, it takes a long time to build up.

Filling the hearts of the women, Qin Yu went to the last stop.

Since the other courtyards have all gone, we can't favor one over the other, and forget the main palace lady of the No. 1 courtyard in Area A.

"Yo, our uncle is here." As soon as he entered the room, he heard Li Wanxing's yin and yang anger.

She is still the same, always likes to fight against Qin Yu.

But every time it was cleaned up miserably.

After begging for mercy, after a while, he forgot the painful lesson before, and bravely jumped out again.

I have to say that Li Wanxing is really brave.

No matter how hard she beat her head, she couldn't remember the lesson.

"Do you want to eat a stick again?" Qin Yu said with a smile.

Li Wanxing raised her eyebrows, hummed with disdain, and turned to go to the kitchen.

Although the head is iron, I have learned enough lessons over the years.

In any case, don't be provocative when you're alone.

The dead are not scary, the fear is that they will live and die...

She was eating ice cream on the sofa when she saw Lazy Cat.

Little confused eyes stared at the screen, not even noticing the cream on the tip of his nose.

This girl, her heart is getting bigger and bigger.

Since the injection of the second generation of supernatural genes, her performance has become more and more confused.

After learning that she was leaving, her dance career was in a semi-'retired' state.

The situation began to intensify, and the reflex arc was even longer.

But the strength, but the growth is amazing!

Compared with her Lu Qing of the same period, Lazy Cat can hit two.

"Yueyue." When he came to her side, Qin Yu called out first before approaching her.

Last time, suddenly sat next to her.

Before moving, the man left a hole in the wall and disappeared directly into the house.

If it wasn't for triggering the extreme nanoworm, this time he would have to lie in bed for at least two years.

Since then, Qin Yu has had the habit of saying hello before getting started.

"Huh... huh?" Blinking, Lazy Cat came back to see him.

The small eyes narrowed for a moment, and there was no trace, and he tilted his head and fell into his arms.

He didn't speak, digging ice cream for him to eat, happy little feet expressing joy little by little.

"I'm leaving, are you ready?" Qin Yu asked about her current situation.

It's up to the women to decide who to take with them before they leave.

The secretary is responsible for keeping records, arranging travel and accommodation, etc.

Finally, report to Xu Meixin and make a unified arrangement.

"Mom isn't going, and dad isn't going either." Lazy Cat was a little disappointed, raised his head and said, "When will we be back?"

"It can be anytime." Qin Yu smiled.

"Then...it's all right." Lazy Cat resumed his bright smile and kicked his feet little by little.

"Where are Xuanxuan and Shanshan?" Qin Yu asked with a smile.

The lazy cat's twisting body stopped, and invisible fluctuations appeared in the air in the next second.

Qin Yu shook his head helplessly, she was really getting lazy.

"Xuanxuan is taking a shower in the room, and Sister Wanxing is there, discussing with her how to deal with you."

"Shanshan is doing maintenance in the room."

Lazy Cat's eyes lit up and sat up: "Let's go too, I want it too."

"Okay." Accompanying her upstairs, Qin Yu didn't come down again.

Until the little anchor came back from the outside and completed the last collection of his live broadcast career.

Standing at the entrance of the town, Cheng Xiyu waved goodbye to the audience in the live broadcast room: "Okay, our journey ends here."

"I hope that in the future, I will have the opportunity to meet you again. I think I will."

The live broadcast room was full of blessings, and some people kept swiping "Don't go."

After years of down-to-earth development, Cheng Xiyu is now a well-deserved national goddess.

Beautiful, kind-hearted, consistent in appearance, love life, and keen on charity.

The water tower project at the two poles has accumulated a lot of prestige and honor for her.

It can be said that her current influence is global.

However, the whole world is one family, and it doesn't make sense to talk about it now.

In reluctance, Cheng Xiyu withdrew from the live broadcast room.

Looking at the open door ahead, he took a deep breath: "Let's go."

Back in the small courtyard, Cheng Xiyu heard the movement upstairs.

Silently rolled his eyes, threw off his shoes and ran upstairs along the stairs.

Keng Keng ~

"Boss, I'm back." Cheng Xiyu smiled and ran away.

When the damper opened a slit, someone yearned to look.

Only seeing the empty corridor, Qin Yu not only laughed dumbly and shouted towards the stairs:  
"Tomorrow, don't even think about going out."

"If you don't go out, you won't go out, anyway, I've finished broadcasting, hahaha..."

At night, the small courtyard, which was still somewhat cold, became lively.

The women gathered in the courtyard to prepare for a bonfire barbecue meeting.

Charcoal fire, food and needed tools are all provided by domestic robots.

Even the barbecue is done by 'people', they just need to sing, dance, chat and drink.

It is enough to enjoy this quiet and beautiful night.

"When will Beizhou's problem be resolved?" Jiang Xiaoshan leaned on his shoulder and looked at the sisters dancing around the bonfire.

She prefers quiet solitude more than anything else.

I've gotten used to it over the years!

"One more week and it should be fine."

Qin Yu put his arms around her and smiled: "When the time comes, I'll go home again, and we can set off."

"Well." Jiang Xiaoshan nodded and said, "Are the family members going too?"

She wants to take her mother away and leave her here alone. Jiang Xiaoshan is worried.

As for the father and that woman...

Jiang Xiaoshan, by virtue of her own identity, obtained the qualification to buy 'injection' for them.

In this way, even in return for their kindness.

After all, no matter what.

Their childhood misfortunes were caused by them.

This is not one person's fault, but Jiang Xiaoshan has no one to blame anymore.

And she also achieves the limit of what she can do, satisfied!

She no longer needs answers.

"Yes, then we will take Medusa and leave together."

After getting a positive answer, Jiang Xiaoshan's last question was completely put down.

Looking at the starry sky again, Jiang Xiaoshan said, 'I will definitely miss this beauty.'

The next moment, she was pulled up by Xuanxuan who rushed over: "Shanshan, come together quickly, and you, hahaha..."

Follow her strength to the bonfire, everyone dances and sings!

It's like a celebration, and it's like a happy farewell!

### **Chapter 1258: final arrangement**

Genius to remember the address of this site in one second: [New] <https://>The fastest update! No ads!

In Beizhou, the ground eroded by radiation pollution is recovering.

Above the sky, connected to the golden film at the end of the sea level, included the entire continent.

After several years of offerings, after thinking that the 'healing heart' is strong enough to resist the impact of radiation.

The company transferred it to the North Continent to curb the erosion of the planet by radiation pollution.

And this decision worked!

At first, only the core urban area of Angel City on the west coast was included in the purification zone.

With the continuous growth and expansion of the "healing heart".

The area it covers is getting wider and wider, until today, half the ocean and the North Continent are included in the purification.

However, the land up and down Beizhou is still being slowly eroded by radiation.

The 'Healing Heart' needs to grow again, expand, and purify the entire North Continent.

I hope its growth rate can keep up with the spread of radiation.

In short, everything is only a matter of time!

Qin Yu did not wait any longer, and the entire company began to make final preparations for the relocation and mobilization.

All the core materials and equipment are packaged and sent to the spacecraft.

According to different needs, classify, mark and place them.

The executives either said goodbye to their families, or went somewhere to take pictures, wanting to add more memories to themselves.

The RRT is also frequently dispatched to assist and ensure the recovery of the company's assets.

At this point, there's no time to scoff.

All those on the list will be forcibly recycled no matter what obstacles they encounter.

If necessary, the RRT will use force to resolve conflicts.

or those who cause conflict.

If the problem cannot be solved, use a more direct and thorough method.

The imminent departure of this world makes some people appear presumptuous and arrogant.

But he forgot that he has a pair of 'eyes' on his body. '

Looking at the screen playing in the projection, Xu Meixin asked calmly, "Boss, what should I do!"

"Let it be handled by the internal affairs!" Qin Yu's mind was not on this.

He was thinking more about what to keep and what to take away.

Li Xiao wants to stay, and now he is the leader of the Supreme Council.

With high authority, the Galactic Republic will tremble when you stamp your feet.

Let him give up his rights, his family and everything he owns, and go to another world to start over.

Li Xiao was reluctant and unwilling to take risks.

He is very satisfied with his current life, just like Xu Hao.

Yes, he also chose to stay!

Qin Yu also decided to let him continue to serve as the company's CEO.

Although, he transferred a large number of researchers, technologies, equipment and armed forces.

But the power left to the company is still awesome!

Qin Yu hopes that he can continue to lead the company and cooperate with Qin Luo to let him gradually take over the control of the company.

In this regard, Xu Hao personally expressed no opinion.

In fact, he already wanted to step down and live his own life.

Compared with power, he now hopes to live a plain life.

Power, desire, wealth, he has experienced these, and stands at the top of the pyramid.

He also has a deep understanding of why the heights are so cold.

Therefore, now Xu Hao is obviously no longer interested in this.

Reluctance to take risks does not mean that he is not willing to take power.

But because he wanted a peaceful life.

Xu Hao promised him that he would cooperate with Qin Luo and fully hand over the rights of the company to him.

And his only request is to 'let go' of Xiao Xiao.

The Gene Warrior is one of the company's most valuable possessions, and anyone who completes the transformation will be added to it.

If you want to leave, you have to lie down and enter the laboratory.

Xu Hao is very clear about the inside story.

As the company's CEO, he recognizes the company's security measures to ensure technology.

But as a man, he wanted his woman to return to him safely.

In this regard, Qin Yu's answer is also very straightforward: "As long as she wants, it can be."

Today, genetic engineering has developed into the thirteenth generation.

The early gene seeds have long lost value to the company.

The reason for keeping it strictly confidential is just to ensure that its market value will not be shaken.

Now, the company is leaving, and all forces are withdrawn.

The seeds left behind will lose their final value.

Besides, that was Xu Hao's request to him.

Qin Yu is still very concerned about his own people.

Even if the genes on her are still worth a toast, after collecting the genetic seeds, he will let the other party leave.

He is not a cold-blooded monster, although in the eyes of some people, it is more terrifying than this.

As the laboratories were completely emptied everywhere, the spacecraft began to escape gravity and return to the moon.

The countdown to the final parting begins.

Qin Yu went to Shangdu first and met with several major families.

Talking to them, of course, is about the legacy of the company.

As he leaves, the company's deterrent power drops to the cordon.

Some small people may jump out.

Qin Yu didn't want something unpleasant to happen.

Let him have to return again, and the scene will not be so peaceful.

He then went to the Supreme Council.

There, in addition to Li Xiao, there was also Qin Luo, who looked immature but already had the appearance of an adult.

"How is it, little brother is a good person to get along with. I believe you had a good time talking?"

Walking side by side between the stone corridors of the magnificent and solemn parliament hall, one could hear the reluctance in his voice.

"Brother, do you really want to leave?" Qin Luo was also full of reluctance.

He had no interest in the power and wealth he had received.

In fact, before Qin Yu decided to leave, he had been in the Shennongjia training camp.

Not in training, but in the company of wild animals and feeling nature.

Who would have thought that he was a nature lover.

Maybe it was because of the psionic closeness to nature, or something he felt from it.

In short, it is very wrong!

But at Qin Yu's request, he came back and chose to shoulder the responsibility and burden of being a trumpeter.

"It's not a goodbye, what are you doing with such a mother-in-law?"

Raised his hand and patted him on the back, Qin Yu comforted: "If you think of me, you can go there for vacation too!"

Qin Luo smiled bitterly and raised his head to find the exact position of the moon.

In his eyes, there is deep fear.

Even at such a distance, he could still feel the terrifying energy emanating from the door of light.

That energy disturbed him and created a great sense of fear.

In fact, he wanted his brother to stay.

It is precisely because of the inexplicable anxiety and fear in his heart that Qin Luo thinks that something bad is happening.

It's just that they didn't realize the danger.

"Don't worry, it'll be fine." The hand on the shoulder pressed down, Qin Yu explained a few more things.

Take care of your family, someone you can trust, and some of the back-up and strength he left behind.

"The RRT team in the habitable place on Mars is your last resort." Qin Yu's expression was extraordinarily serious when he said this.

That was the strongest support he left to his younger brother.

Because, the entire team was not injected with genetic medicine.

Instead, the second generation of super \*\*\*\* genes!

### **Chapter 1259: sailing to a new world**

Genius to remember the address of this site in one second: [New] <https://The fastest update! No ads!>

woo~

Air defense sirens echoed over the Republic, hundreds of Falcon cruisers.

At a fifty-degree angle, the bow of the ship sailed up to the sky.

At the orbiting space station, a large number of commands were continuously issued: "Xingyu, allow to pass."

"Blue Galaxy, approved."

The adjutant standing on the side of the command platform looked surprised: "Sir, how many warships are going to leave?"

The commander said in a deep voice, "All."

The adjutant was dumbfounded, "What about Earth?"

The commander glanced at him, shook his head and did not speak.

I have already decided in my heart to replace him when I go back.

The company decided to take away all the warships, the greenskin battlefield was completely sealed, and all the power was put into the warp. Remember the URL [m.xbegge.com](https://m.xbegge.com)

What other danger is there that the orbital defense belt can't prevent?

Besides, that door is on the moon.

This huge force can be withdrawn at any time.

What about the earth, the whole people enter the 'dormant world' of the second world, what do you say?

Such a stupid adjutant will kill him sooner or later.

Standing on the overlord-class Medusa flagship bridge that integrates all technologies and transforms itself.

Through the scanning projection, look at the earth that is almost completely covered with green.

Qin Yu's heart was full of pride.

The recovery of the parent star has progressed successfully, and radiation has brought harm, and it has also brought new life and nutrients after the ashes.

Now, with the influx of the population into the hideous devil.

All things on the earth are recovering, the vegetation is lush, and a large number of animals and plants that are endangered or thought to be extinct have appeared one after another.

Without the destruction of natural resources by human beings, the overall ecology has recovered and reproduced at a speed visible to the naked eye.

Under Qin Yu's suggestion, the future Supreme Council and the company.

It will gradually shrink the scope of human existence, and try to reduce the area to a minimum.

Ideally, all ecoregions would fall within the 'core shaded area'.

Give up the rest of the living space to nature.

Wild animals and plants have made the earth's ecology flourish since then.

As for the result of this, I believe it will be under the joint supervision of the orbiting space station, the Supreme Council, the company and the "brain".

It will achieve a certain degree of win-win, and make the earth truly become the mother planet of mankind.

Not just a group of wanton children, a playground for mischief.

"Boss, it's time for us to set off." Xu Meixin entered the bridge and reported to him the progress of the fleet.

All the ships are ready, and the vanguard is heading for the 'Gate of Light'.

At the same time, the opposing warp space exploration fleet sent two main fleets to \*\*\*\* them.

"Well, according to the set order, let's enter the countdown!" He waved his hand to close the projection in front of him, and Qin Yu sat on the captain's chair.

Seen from space, between the earth and the moon, there seems to be a black line slowly flowing forward.

After getting closer, I found out that it was the main fleet lining up to enter the 'Gate of Light'.

At the center of the fleet is a flagship flagship that is more majestic than all warships and full of deterrence.

The bow is covered with launch ports, like Medusa's serpent hair.

On both sides of the hull, seemingly smooth surfaces.

Only when you get close, you will find that it is full of hidden doors of various sizes.

Below the hull are two close-range anti-aircraft guns.

The close-up guns embedded in the chain freely roam back and forth between the bow and stern of the ship.

It's a pity that the stable and calm space did not give it a chance to show its majesty.

The fleet that flowed forward like a stream disappeared little by little within the gate of light. Qin Yu's main flagship was getting closer and closer to the gate of light.

"Are they all arranged?" Qin Yu turned to look at the secretaries beside him.

Xu Meixin, Xiao Yuan, Feng Shuyi, Bei Yi, Yan Xue, Tang Jiaqian...

The original Xu Meixin had been with him for more than ten years.

"The ladies have all been placed properly, and there will be no possibility of meeting for the time being."

Each deck has strict blocking standards and requirements.

Want to pass, not by virtue of who you are now.

It is the identity authentication entered into the flagship central computer to determine the scope and area of the activity.

They all only have the activity rights in their respective regions, and naturally there is no possibility of encountering them.

"Secretary Xu, is there anything you want?"

About to leave this world completely and enter a new universe, Qin Yu wondered if they had any regrets.

"...I want to take another look at the waste capital." Xu Meixin said softly.

"Kirin."

The projection appeared, and the picture quickly stretched, first the earth, then Asia, and then to the central area, freezing Sanqin.

In the end, the waste capital was finally enlarged to the front.

Seeing the place where she has lived for nearly 40 years again, Xu Mei's eyes are full of reluctance.

"Reluctant?"

"Ok."

"what about you?"

"Hmm~"

The goddesses are of different colors, but they all carry some memories of the past.

All the memories so far are on this blue planet.

Now, to leave.

The complexity of the heart cannot be expressed in words at all.

Qin Yu got up, held Xu Meixin and Yan Xue's hands, and led them forward.

"Look, over there."

Through the bow ahead, you can already see the scenery behind the light gate.

It was a colorful new world, in which the ferocious and thorny planet looked like a virus cell magnified hundreds of millions of times.

To be honest, they didn't see a reassuring picture from there.

Until two huge fleets appeared in the space on both sides of the light door as the line of sight extended.

"I know everyone is nervous."

"But I promise this migration has enough power to keep everyone safe."

"The company will be here in the future, with a new look and a new path."

"You, too."

There is still time to imagine the future and the new path he said.

The door of the central control room opened, and a group of Yingying Yanyan stood outside the door, looking at Qin Yu, who turned back sluggishly.

Lazy Cat, Ye Jinlan, Lu Qing, Ya Lan, Teacher Zhou, Teacher Shen, Sister Jing, Rice, Li Zhen, Rune, Zhixiu, Meimei, Talyssa...

Well, it's all here.

"Kirin~" You don't have to ask to know, besides it, who else can give them the highest authority enough to travel freely on the ship.

"Hey, I just helped you, you don't have to thank me." Kirin's strange laugh came into his mind.

At this moment, it must be a treacherous and wretched smile.

If there is a chance, Qin Yu must 'pull' it out and beat it hard.

Lazy Cat took the lead, surrounded by Lazy Cat, Ye Jinlan, Taylor and others.

The united front formed by the women made the secretariat retreat quietly.

This is the boss's family background, or let him solve it by himself.

"Husband, don't you realize, should you give us an explanation?" Lazy Cat put his arms around his chest, trying to open his eyes wide, trying to show a fierce side.

But she didn't know how cute she was.

After a moment of silence, Brother Yu suddenly raised his head and opened his arms with raised corners of his mouth: "Of course, my explanation is that you don't even want to run away, I want all of them."

"go to hell!"

"Scumbag~"

"Bah~"

"Bastard Uncle Bastard~"

Embracing left and right, in the midst of a coquettish rant, Qin Yu Zhang Yang laughed as he watched the bow of the ship crash into the gate of light.

There, a new righteous path is about to set sail.

season finale.
