Chapter 1700

They remained in a daze, even as the entire army began advancing.

This is like a goddamn dream.

We're going to attack our enemies like this?

They're about a hundred times stronger than us.

They even have a whole bunch of villains backing them up.

And we're still going after them?

Everyone began to snap back to reality as they slowly approached the Ruling Union's headquarters.

They were about to do something absolutely unimaginable.

Meanwhile, nobody inside the headquarters of the Ruling Union paid any heed to the battle that had occurred at the West warzone.

What were a few thousand opponents to them, after all?

Yet, they froze upon hearing the commotion outside.

"Huh? That's fast. That didn't even take half an hour."

Everyone was puzzled.

Tobias only had several thousand men with him, but it still would've been a fairly long battle given how tenacious they were.

Half an hour to defeat them all was way too short.
