

## **Pinnacle 2261**

Chapter 2261 He Is The New Dark Emperor

Even the Alliance of Kings was under the control of the Sacred Organization.

It was necessary as the Sacred Organization had been operating under the guise of darkness, they required the capacity and resources to carry out its operations.

The Alliance of Kings was one of the Sacred Organization's strongest allies.

Besides, the top four strongest forces in Erudia, including the Erudian Alliance, were also under the influence of the Sacred Organization.

Aside from that, their influence stretched in all directions throughout the continent.

Nearly the entire world bore traces of the Sacred Organization's operations.

This is simply too powerful!

Though the Lab of Gods was in charge of constructing training bases of a wide variety, the true power lay in the hands of the Sacred Organization.

Levi did not know much about Maya Industries.

A lot of people talked about how Maya Industries had replaced the Lab of Gods.

However, it seemed more probable that it was the Sacred Organization that had replaced the Lab of Gods.

How incredulous.

Chapter 2262 Maya Industries Is Not Worthy

As the Sacred Organization operated from the shadows, the location of its headquarters was irrelevant.

Why does it need to be moved all of a sudden? Something does not seem right.

Levi had been undergoing solitary training during the period of detention. The Prison of Darkness cut him completely out of the outside world.

“We don’t actually know,” Death Fiend admitted. “But based on what we assumed, the headquarters had to be moved because it was discovered.”

“That’s right!” the others chimed in. “The Dark Emperor ordered for it to be moved after someone found out about it!”

The rest nodded eagerly.

“I have a feeling that the person who discovered it was Daxon,” Death Fiend added.

“It’s most likely him!” the others agreed. “The Dark Emperor did not suspect one bit when you mentioned Daxon’s name, Master!”

That means that the Dark Emperor would not be surprised at all by the fact that Daxon had discovered the Prison of Darkness! This points to the irrefutable fact that the headquarters had been discovered by Daxon!

“There’s more!” Death Fiend cried. “Erudia has long been a target of the Dark Emperor. She has been constantly pushing the limits of her power with the intention of merging Skyward Sword and Terra Blade to invade Erudia! Hence, gaining control of the top four forces in Erudia was the beginning!”

Chapter 2263 Tartarus

Initially, the experiments were started by Maya Industries.

Humans and other animals were injected with the experimental serum and the effects was observed.

After the Triple Group took over the project, many mutants began to emerge from their laboratory. They were the result of experiments that had gone horribly wrong.

The small town in Keerea where the Triple Group deposited the mutants was known as Tartarus.

In order to prevent the mutants from running amok into the cities, the Triple Group had built an enclosure made of specialized metal of a hundred feet tall to seal off the entire town.

From a distance, the structure appeared like a fortress.

It was built at great expense to the Triple Group as a means to contain the mutants.

If they were allowed to escape, the entire nation of Keerea would be plunged into chaos.

As a side effect of the experiments, the mutants were not killable and their martial abilities were greatly enhanced.

Chapter 2264 Levi Enters The Fortress

Over the past three years, the Triple Group had evolved to such an extent that their headquarters looked sleek and futuristic with technology never seen anywhere else in the world.

“Levi Garrison is here to pay us a visit!” shouted an excited voice. Soon, the entire building was aware of Levi’s presence.

Many crowded around the lobby for a glimpse of their famous enemy.

“A rare honor this is, Levi!”

“Hah! Are you here for Sammy?”

“What a loyal guy you are. Here to rescue her, are you?”

It is hard to believe that they were terrified of me just three years ago. They would have run and hidden at the sound of my arrival back then.

Levi looked around at the smug faces.

After only three years, we are now the most powerful corporation in the world. Levi is still stuck in the past.

“That’s right, I am here for her!” Levi answered coldly. “I am here to take her away. Hand her over!”

The employees of the Triple Group burst out laughing.

## Chapter 2265 Fright Of The Divine Leaderboard Fighters

Levi listened silently while they made their arrangements. He was aware of the town which held the experimental subjects.

The secretive project conducted by Maya Industries was mostly carried out by the Triple Group.

Levi was not concerned as he felt confident that the Triple Group was no match for his abilities.

However, he was rather curious and wanted to see what the mutants looked like.

What the hell is Maya Industries up to? Do they have anything to do with the Lab of Gods?

Levi waited without raising any objections allowing them to make the arrangements.

Sammy did not have a clue about what lay behind those walls, nor did she care. To her, it was her only hope for salvation.

For the sake of our survival, I am going to try my best.

Earlier, she had heard talk of Levi's arrival to the Triple Group's headquarters and his weakened powers.

His arrival is a sign. I must not let this opportunity slip by without giving it a try.

## Chapter 2266 Cruelty Of The Rules

Out of the entire group, there were several dozen of them who were survivors of Tartarus.

Mace, the fighter on the Divine Leaderboard, had entered multiple times.

Those veterans were most familiar with the brutality.

The other hundred or so of the party was there for the first time. At the sight of Mace's fear, they too began to panic.

Standing on shaky knees, they turned their anxious and clammy faces to Mace for reassurance.

Being the most experienced member of the party, Mace addressed the party with some last-minute tips.

"Remember, if you can't hold on any longer, press the button to call for help when you run toward the four doors. It's your only hope in getting out of there alive."

The fighters who entered Tartarus to train were allowed to call for help with a push of the button.

The staff of the Triple Group would then either open the doors for the fighters to exit or lure the mutants away.

survival. Though they would provide assistance when called for, the chances of survival were slim as no one

#### Chapter 2267 Monsters

However, Levi smiled.

This rule set by Triple Group sounded very exciting and effective.

To open a gate within the hour was unthinkable.

It is the survival of the fittest!

It could maximize the fruits of training!

Way better than the shortcuts these days.

Only the strong could escape and survive.

There was no such thing as fair competition!

It was about who was stronger!

But of course, a small part of it came down to luck.

A few people might be lucky enough to be in the location of the gate and escape quickly.

But it was only a few out of the many few.

Ninety-nine percent of the challenge depended on their strength!

Chapter 2268 Formidable Mutants

"Guys..."

As they felt the breath hitting the back of their heads and the stench penetrating their nasal cavities, the thirteen people finally realized that there was something behind them.

Everyone's body stiffened and broke out in a cold sweat. Their souls left their bodies out of fear.

They slowly turned around and laid eyes on some terrifying figures.

"Argh!"

Everyone screamed in horror.

These people in front could be considered monsters. Their eyes were blood red, and their faces were almost monochromatic with no traces of bloodshot. The most distinct feature was that their bodies had doubled in size. Their arms and legs were as hefty as tree trunks.

They exuded a menacing aura.

After having been injected with drugs, these people appeared like mutants.

They were ultimately terrifying!

Otherwise, Triple Group would have been able to keep them under control.

## Chapter 2269 The Maya Industries Conspiracy

Mace was very experienced. He always managed to navigate his way around groups of monsters or encounter few monsters that everyone could handle.

But the others were not as lucky.

Despite having a fighter from the Divine Leaderboard, they always encountered monsters.

In the beginning, they might have encountered dozens; then, hundreds and even thousands at the end.

Even the fighters of the Divine Leaderboard had to steer clear of endangerment, not daring to challenge the monsters head-on.

Hence, they tried their best to avoid the larger groups of monsters.

However, the others were not so lucky. They encountered a group of monsters and got surrounded. If they couldn't escape in time, their only fate would be death.

The number of mutants would only increase. There could even be thousands in the end.

There was no way to keep them under control!

Even the newbies witnessed the terror of the monsters.

All kinds of attacks connected to the monsters had no effects, let alone damage them. Thus, destroying them was out of the question.

Their bodies would expand and become indestructible. Nobody knew what sort of drug Maya Industries used to produce such superhuman effects.

#### Chapter 2270 Levi The Scapegoat

“Levi, it’s the three-hour mark! If we rush out of here, we’ll be safe! They will let us go!” Sammy announced with excitement.

Her parents arranged everything impeccably.

As long as she followed Mace, she could easily survive for three hours.

The inexperienced immediately rushed to the north gate upon the three-hour mark.

But before that, Sammy also gave the rest of her drug to Levi so he could use the drug to become superlatively powerful in times of crisis.

“Let’s go! Follow me to the north gate!”

Mace led the way, and Sammy followed him while dragging Levi along.

About ten minutes later, everyone arrived at the north gate. However, the gate only cracked a narrow opening, wide enough for only one person to pass through at a time.

“We’ll leave first!”

Seven to eight people immediately rushed out of the gate.

To them, three hours was more than enough.

Of course, they benefited from this. If it weren’t for Mace, they would have been dead long ago.

“You leave too!” Mace told Sammy. “Go!”

Sammy eagerly ran out.

Bang!
