

## **Pinnacle 2451**

Chapter 2451 Because I Am The One Who Rescued Her

Levi tilted his head and turned to Zoey before replying, "Evie is safe, so where should I be, if not home?"

"Huh? How did you know that the danger had passed?" asked Zoey, who was a little stunned.

"Because I was the one who rescued her," replied Levi calmly.

"Bullsh\*t!"

The Lopez and Black families blurted simultaneously.

"Zoey's master, Dark Emperor, was the one who rescued everyone. What does his accomplishment have anything to do with you?"

The others were quick to dismiss his claims.

Levi chuckled. He looked right into Zoey's eyes and asked, "You don't actually think that your previous master actually has what it takes to do that, do you?"

"Huh?"

Zoey suddenly felt a little lost.

Why is everyone asking this question? And why am I also feeling a little unconvinced?

Everyone clenched their fists.

Chapter 2452 Maya Industries And Its Devious Plan

Levi hung out with Forlevia for a while.

The latter described everything she went through. She shared, "Daddy, those Gods are so powerful! Every single weapon in their possession has some sort of unique power..."

Forlevia's words reminded Levi of the ample resources, such as the armors and the staff stacked there.

Everything they had was exquisite, and even their blood was unique.

It is likely that one would gain insurmountable power if they drink that blood. It might even awaken one's dormant skills... I guess I will have to make another trip over.

It'd be such a waste to leave all those precious resources there, and others might steal it if I am late.

On the other side.

Maya Industries paid more attention to the incident than anyone did.

They were especially concerned about how Forlevia and the elders weren't injured.

"We double-checked everything, but they weren't hurt at all, not even a little!"

Chapter 2453 The Dark Emperor Will Fall

Maya Industries might be working with Dark Emperor, but they were forced into that cooperation.

Hence, Dark Emperor had been a pain to them the entire time, and their greatest fantasy was to kill the guy.

They publicly worked together, but underneath the table, Maya Industries had been scheming to kill the guy.

Unfortunately, Dark Emperor was too strong, so they couldn’t do anything about him.

The sudden emergence of Restricted Area 76 and the secrets revealed by the recently discovered file changed things, though. They were given the perfect opportunity.

How can we possibly let this slip past our fingers? We must take advantage of the situation and have them kill Dark Emperor for us!

“Hurry up, then! You guys make a fake folder while we contact Dark Emperor. Let’s pray that he bites the bait!”

It didn’t take long before Levi received an encrypted message from Maya Industries.

They asked him to drop by.

Levi wanted to go to Restricted Area 76 anyway, so he agreed to meet up.

The two parties met up in a random spot in Adrune.

At the meeting.

#### Chapter 2454 From Sacrifices To Free Muscles

Members of Maya Industries who were aware of the truth were all waiting for the news about Levi's death.

Naturally, they were unaware of how Restricted Area 76 had actually turned into the safest place on Earth.

Yep, the absolute safest place on Earth.

The Gods had all been crushed, after all.

Levi chuckled when he saw the men with him.

He was better acquainted with the place than anyone else. Not even Forlevia nor the elders knew the place that well.

Levi marched on with ease and followed the trail of energy displayed on the radars to find the resources.

Some of the items there had more energy and were even more powerful than the sunstone.

A small piece of stone had the power to annihilate a small town.

That got everyone stunned in place.

The energy exuded is a hundred... if not a thousand times more powerful than that of the sunstone.

It was beyond their imagination.

It was no wonder the clan that used to live there was so strong. In addition to the biological strength they inherited, the Gods also created their weapons using the incredible resources offered by their lands.

That made them at least ten thousand times more powerful than the others!

#### Chapter 2455 Their Blood Is The Treasure

The change is too drastic!

Every plant in the surrounding area had withered, and the leaves on the trees had all fallen.

It might even be right to say that the place was a haunted and abandoned wasteland.

There were even burnt marks on the plants, and it was as if they had been exposed to insane radiation the entire time.

But everything was fine just some time ago. It wasn't in a state as terrible as this!

Wait... the blood!

Levi instantly understood what was going on.

The gods' blood has incredible power and exudes terrifying energy. This is the place where their blood spilled, and the plants absorbed the blood. It is likely that the energy in the blood was too aggressive.

The energy was not something the plants could handle, and that burned the plants.

That is why everything turned this way...

"Huh? Why is a thick golden liquid all over the place?" blurted the Death Fiend in surprise.

Everyone was checking the place out when they realized that the golden blood was all over.

There were some spots where the blood gathered.

The strangest bit was that the blood had bubbles all over and wouldn't evaporate. It barely seeped into the ground as it was.

Chapter 2456 A Being That Could Even Pressure Levi

Just then, Levi sensed a change in his surroundings.

A massive surge of energy rippled from some distance away.

This energy is similar to the ones exuded by the Gods I dealt with earlier, but this person is stronger than the strongest God I fought.

Did someone survive and slip out of my view?

If I use their ranking system, this energy means that its owner is at least ranked at level twelve.

“T-That energy surge is so strong...”

Everyone panicked when they sensed the trembling Earth.

They weren’t the only ones on edge. The high-rank officials of Maya Industries were waiting outside, and they were all excited when they sensed the energy surge.

The monitors showed them just how strong the energy surge was.

“Yes, finally! They ran into a God.”

“Hah, I’d like to see how you get out of this alive, Levi Garrison.”

The high-rank official of Maya Industries was energized instantly.

They were so excited that they could faint.

On the other side.

Levi had his guard up and was slowly making his way to the center of the energy surge.

When he got near and took a closer look, he learned that it was not a god.

#### Chapter 2457 Making A Weapon

A weapon! I can use the crystal to create the most powerful weapon. That would fully utilize the  
crystal’s energy!

They didn’t even need to look for the right resources to make that weapon. The metal they just  
extracted would do.

This type of metal is the only material that can withstand its recoil, anyway.

Anything else will probably be overwhelmed and broken down as soon as it is assembled.

This new weapon will be the most powerful device on Earth!

No one will even give another thought about Skyward Sword or Terra Blade again. They will all bow  
down to this new weapon.

If this weapon is developed successfully and if there is someone powerful enough to wield it... It might  
break through Level Nine Iron Golem Technique!

That means that it will benefit me greatly if I wield this new weapon.

It will surely add to my strength!

I can also give it to Zoey and Evie.

They can use it and keep themselves safe.

There simply is no downside!

Levi had read up on the ancient manual that his mentor left him and learned a unique way to build weapons.

I can build it right here and now!

"I have all the material I need, but regular fire won't do. It's not hot enough to melt the metal... Wait, the Holy Flame!"

Levi recalled how one of the gods had a weapon that spewed fire.

terrifying energy pulse rippled out and caused an unnatural

Chapter 2458 God Crusher

It's so freaking powerful!

The weapon was stronger than Levi anticipated.

On top of that, the weapon inherited the metal's unique properties and could be turned into a liquid  
mush.

It could also allow light to pass right through it and become invisible!

It's almost too easy to hide it, and it's so practical!

The only downside is that it couldn't contain the remaining twenty percent of the crystal's energy.

It could've been even more powerful.

Gah, never mind. I'm sure I can find a way to utilize the remaining crystal. At worst, I will just use it to  
create another weapon for Evie.

"What should I name this masterpiece? I'll be using it to fight against Lab of Gods, so it will crush them...  
I'll call it the God Crusher.

"Yep, this will be the weapon for slaughtering Gods!" announced Levi firmly.

He truly wanted to try the weapon out at that moment, but there were no opponents on site.

His only possible foe were the gods, but he had already killed all of them.

Naturally, if he couldn't find an opponent there, then it was even less likely that he'd find an opponent  
outside the restricted area.

This weapon can probably kill Daxon.

Chapter 2459 Rude

Hearing that commotion got the high-rank officials to stop walking.

They instinctively turned around and squint to try to look into the forest.

Vroom! Vroom!

It was getting louder and louder.

The Earth was grumbling, and the pebbles on the ground were jumping.

Behind them, the entire forest was trembling so much that even the naked eye could see their trunk swaying.

It signaled the beginning of a massive earthquake.

Everyone was shaking so much that they were going out of their minds.

“What is going on?”

The first thought that came to high-rank officials of Maya Industries was that the Gods of Restricted Area 76 were emerging.

For a moment there, everyone had a single unified thought—they wanted to flee.

Unfortunately, their legs suddenly felt as heavy as lead, and they couldn’t budge at all.

The only thing they could do was watch while being dumbstruck.

All they saw was how countless figures started showing up in the forest.

It was incredible. An army that stretched for over several meters had emerged.

This is shocking!

"Is there nothing dangerous in there at all?" asked a high-rank official, who simply couldn't contain his curiosity.

"Not at all. No one's in there, and even wild animals are nowhere to be seen. At first, we thought that we might get into some trouble, but turned out, there was absolutely nothing."

The men that Maya Industries sent in agreed, "Yeah, there's nothing dangerous in there."

"These past week has been so uneventful and nothing dangerous ever happened. I wonder why Lab of Gods never tapped into the resources in there."

Many were curious and wondered what was going on.

"Alright then, we'll leave now."

Levi led his army and left with his head up high.

He was leaving to prep Sacred Organization so that they could occupy the place entirely.

We will have to get bigger machinery over to extract the resources and will need to set up a security system.

In a way, their true mission for the past ten days was to locate all the sites where the resources were and ensure that they didn't miss anything.

The high-rank officials of Maya Industries never left the place, though.
