Chapter 2691 Reinforcements From Enemy Nations

At that moment, the two thousand two hundred Leviathans were rampaging through Erudia in groups of a hundred.

Even though their forces weren't concentrated together, an individual group of one hundred Leviathans was still extremely difficult to deal with.

Suffering critical damage, the Erudian forces had their lines of defense broken through one by one.

Fortunately, reinforcements from The Cardinal Hall and the ancient Garrison clan arrived in the nick of time.

They spread out and supported Chandler's covert troops in maintaining their defense.

Just when the Leviathans were unleashing their most intense attacks, loud roars suddenly rang out from behind them.

Subsequently, a massive bombardment began to hit the Leviathans in their rear.

Soon, the attackers behind the Leviathans grew in number as jets began to swarm the skies.

From the flags the troops were flying, one could see that some were from Keerea. More importantly, Sammy had led the Triple Group and other powerful factions to join the battle.

Also, there were fighters from Raysonia, Ibica, Xyperia, Waldan, etc.

Chapter 2692 Levi Emerges

The voice belonged to Levi.

All this while, he had sealed himself away in solitary training.

Nonetheless, he picked a place that was particularly close to Lab of Gods' base.

That was how he ended up below Dragonites' base.

At that moment, Levis' basic technique had evolved past physical training. In fact, he was at the level where he was sharpening his mental tenacity.

As he didn't need to move, there was no way anyone could detect his presence.

On the contrary, he could monitor everything that was going on within Lab of Gods.

After all, he had made it his mission to keep tabs on them and focus all his efforts on Sacroria.

From his perspective, Sacroria was definitely present at the base in Oakland City.

As a result, he delegated everything else to the others while he concentrated on watching the base in Oakland City.

Therefore, the main reason why he had confined himself in solitary training there was that no one could find him.

Chapter 2693 Brilliant Levi

As for Sacred Organization and Maya Industries' reinforcements, they were due to Levi's instructions that had been given ahead of time.

He had told them to go all out to face any disaster by unleashing all the trump cards they had.

As for The Cardinal Hall and the ancient Garrison clan's ambush of the enemy, it was all part of their plan.

After all, Daxon and DG Leo were aware of the spies in Carigrey Academy.

In relation to the reinforcements from the allied nations across the world, that was also arranged by Levi on very short notice.

Given that the Fearsome Four were robots connected electronically, Levi had sent a message through them to all the world leaders.

He gathered them for a meeting where he explained the situation.

He told them that hordes of Warmachines of unknown origins had arrived and were extremely powerful.

Even though they were attacking Erudia, they would inadvertently threaten other countries once they had conquered it.

However, the circumstances pressured go against the crowd, and neither would was the most reluctant, as they didn't fear of the rest of the world, they had no choice but to

Chapter 2694 Where Is Sacroria

Even though he was training in the same technique and knew that there wasn't a limit to it, he still assumed that Levi's level was where the ceiling was.

Thus, he kept working hard to get to Levi's level.

However, he was overwhelmed when he heard that Levi had made a giant leap in terms of skill.

Ever since Levi had sealed himself away, he put Lab of Gods' base under surveillance, waiting for them to make a move, especially Sacroria.

Also, he had long wanted to meet Dr. Erebus.

Finally, the opportunity arrived when the doors to the base opened.

Mr. X led the main troops of Lab of Gods out together with all their armaments.

Meanwhile, Levi watched on from his hiding spot. He was filled with anticipation to see how strong Sacroria actually was.

Will his strength live up to that of a God?

Ready to strike, Levi could feel how bloodthirsty God Crusher was in his hand.

Chapter 2695 Leveling Oakland City

"Oh no!" Widening his eyes in shock, Levi felt his hair stand on end.
Inside the command center, he saw what looked like a bomb with a countdown clock.
Lab of Gods had abandoned the place. In order not to leave any tracks, they intended to blow it up.
"They're going to destroy the place!" The fact quickly dawned upon Levi.
However, he had realized it too late. There was no time left on the clock and neither was there any place
for him to hide.
"No, they're planning to blow up Oakland City!"
Just before detonation, Levi saw through the plan.
After Lab of Gods' army had left, they not only needed to erase their tracks but also blast Oakland City
into oblivion.
That was the reason why they left a timebomb behind.

Given how advanced the explosive device was, Levi could sense that it had the power to level the entire city.

Boom!

Chapter 2696 Where Is Sacroria

At the crucial moment, Levi discovered what Lab of Gods' plot was.

Given that the countdown clock was ticking, he had no time to hide.

Upon realizing that the bomb was powerful enough to take out the city, he knew he couldn't back down.

The moment the bomb exploded, Levi unleashed God's Wrath.

With a terrifying punch, he smashed the explosive force back into the ground, dissipating its power.

Even then, it wasn't enough. Part of the force generated came back up and destroyed Lab of Gods' base, causing the city to tremble and smoke to fill the skies.

Nevertheless, most of its destructive power was neutralized by Levi's punch while the rest of it was directed back into the ground. Consequently, a disaster was averted.

That explained the second shockwave felt across the city. In fact, it was significantly stronger than the first and had caused the cracks to appear.

Due to Levi's actions, he had avoided a massive loss of life in the city despite the panic that spread.

In fact, he alone had saved the entire city.

Levi had conducted his solitary training someplace else, Oakland City would have forward their plan to abandon their base and

Chapter 2697 The Hidden Attribute Of Leviathans

By then, three thousand Leviathans had already gathered in Eastford.

They received their new order there and began working on it.

Voom! Voom! Voom!

The waves of energy they emitted healed Leviathans' wounds quickly.

Their severed heads and limbs miraculously regrew as well.

It only took a blink of an eye for all three thousand Leviathans to recover.

No one saw that coming.

The fact that those Leviathans could heal themselves and instantly recover was why Dr. Erebus was that powerful. He already knew how important that trait was when he created them.

That was why he used unique materials, genetic coding, and advanced technology to give his creation that ability.

Those Leviathans could instantly recover so long as those energy capsules kept emitting energy waves.

There was more to that as well.

These Leviathans could help to heal each other.

Hence, the healthy Leviathans could help the wounded Leviathans even while they were on the battlefield.

Everything would remain fine so long as the energy capsules were operating well.

recover quickly, no matter how much they had

Chapter 2698 The Most Terrifying Part Of A Leviathan

There was dead silence when the leaders received the report.

They couldn’t believe that those Leviathans had already recovered.

It was bad enough that their wounds had healed, but their severed limbs were regrowing as well!

That was simply too terrifying.

It made it so that everything they had done so far was all for naught.

“They can heal themselves?”

“If so, then our mission to destroy them is a lot more difficult than we anticipated.”

“It’s already ridiculously difficult to reach its fatal point, and this new information has shown us that the task is even more difficult than we anticipated.”

Craig and the others seemed grim.

Nicholas turned to the others and pointed out, “This will be an extremely difficult task, despite us joining forces.”

“That’s true, but it doesn’t matter what they can do. We must still go all out to destroy them.”

“Yeah! At worst, we’ll just get more weapons over and coordinate our attacks against those Warmachines. I’m sure we can crush them.”

The army from Zarain had arrived ahead of schedule.

Earlier, they were forced to help out and weren’t there willingly.

They had since thought things out and realized that both Erudia and Lab of Gods were their enemies.

It didn't matter who won that war.

Chapter 2699 Evolved

Leviathans started morphing on a cellular level.

Their scales miraculously melted into their skin and become a part of it.

In a way, Leviathans had developed another layer of mucous protection.

Slowly but surely, that mucus started glowing in bright blue as it swirled around and covered itself completely.

All Leviathans also grew exponentially larger at a speed that was discernible to the naked eye.

Their height rose to about one hundred and twenty meters while their length increased by forty to fifty meters!

They looked so much bigger than they used to be.

Even from a distance, everyone could see the changes in Leviathans, and that prompted them to inhale sharply.

Immense fear oozed out of their eyes.

It was simply too terrifying.

Leviathans had grown to be physically bigger, and that meant that their combat prowess had also increased.

Those Leviathans had leveled up and were even more dangerous.

They didn't just become physically stronger.

No one had predicted the transformation, but those Leviathans' scales could actually ooze a terrifying substance that would turn into a protective mucus.

mucus had the power to corrode everything. A single touch could kill the person that came

mucus showed its

Chapter 2700 Undefeatable

In a way, Leviathans were undefeatable.

They were untouchable and had regenerative abilities that allowed them to heal themselves should anyone hurt them.

There was also the fact that they were enormous, and their combat prowess had just increased exponentially.

Hence, it was virtually impossible to stop their invasion!

What do we do?

Everyone started panicking.

"Oh, no! This mucus is similar to the materials used by Maya Industries' weapons, but it is more potent."

A chemist was there to run the tests quickly and share the findings with everyone.

“What?”

Everyone was stunned to the core once more.

At that point, they hadn’t even finished learning all about the poison used by Maya Industries.

All they knew was that the deep sea material from Archulea could somehow cure those poisoned by Maya Industries’ weapon.

Now, they were ambushed with an upgraded version of the poison.

Is this a sick joke from heaven?

“Retreat! Retreat immediately.”

The situation at the time demanded a retreat. Staying and fighting would just mean sacrificing lives unnecessarily.

The army began retreating one after another, but Leviathans kept chasing after them.
