Chapter 2731

Same Tactic

“Oh no! This is not looking good!”

Thirty seconds later, the Lab of Gods was in panic mode.

“The location they are at is...”

Before the tracker could finish his sentence, Mr. X suddenly thought of something and blurted out, “Don’t tell me it is the same area where the Leviathans disappeared?”

“You are right! It is the same location!” The tracker confirmed Mr. X’s biggest worry.

That terrible news stunned everyone momentarily, then they started to cry out loud.

“What? Levi is leading Great Void into that place as well?”

“That is terrible! Great Void is in deep trouble!”

Chapter 2732

He Knew The Secrets

The orders Mr. X issued were sadly his only option. There was nothing they could do for Great Void at that moment.

“Noted. I will see to that immediately. We will guard the place so they can forget about using it again!”

That was the only thing Lab of Gods could do.

Indeed, Levi was luring Void God to the area where Atlantis was.

He knew the Lab of Gods came fully prepared and would have some backup plans.

They sent Lucifer, Jester King, Hell Witch, and Kraken together as a team, and after they failed, the Lab of Gods would have sent a more powerful and better-equipped person.

He could not risk showing off his prowess in front of so many people on the island.

Before the appearance of Sacroria, he was not supposed to engage in any fights.

That was the reason he fled. He needed to lure Great Void to a deserted place to finish him off.

It would be regretful if Great Void was alert and realized where Levi was leading him, foiling his plan. However, if he did not, then Levi would have succeeded and could eliminate Great Void without anyone’s knowledge.

him emotional. That would cloud his judgment and make him give chase

Chapter 2733

Pray For A More Powerful Opponent

What caught Levi by surprise was that Great Void's devouring superpower was different from the power of the Divine Extraction Technique.

Since Great Void first displayed his prowess on the island, Levi knew he had devouring powers. He thought it was similar to the Divine Extraction Technique and would suck away some of his power and energy.

However, upon contact, he found out he was mistaken and was shaken by Great Void's power.

Great Void's devouring power was much more horrifying than expected. He could devour everything! That included one's energy, physical body, spirits, and soul as well!

The biggest challenge was the loss of consciousness that Levi felt as Great Void started taking in his spirits.

Nothing could escape from Great Void as he could take in anything and everything!

That was the major difference between Great Void's superpower and that of the Divine Extraction Technique.

If someone who mastered the highest level of the Divine Extraction Technique was there, he could suck out all the energy from the surrounding environment.

On the contrary, Great Void could do that plus devour the whole of the Atlantis infrastructure and everything around it.

time, Project Atlantis could disappear into Great Void's body once he unleashed

Chapter 2734

Expanding The Defense Barrier

"Argh!" Great Void felt a hair-raising destructive force coming toward him, and he gave his all to defend himself. He had never felt so threatened before.

Crack! Crack!

As he took on Levi's punch, he could see his armor cracking, then his body started to disintegrate into dust.

After eliminating Great Void, Levi let out a self-deprecating laugh and jested, "Looks like this is a good place for a duel. No one would find out who got killed."

After that, he started looking around for an alternative access route. He needed a backup. In the event the place was discovered, they would need to seal the original access leading to the site.

Levi left via the new exit, and when he went back to the main entry location, he saw the Lab of Gods' men were patrolling that region and seemed determined to guard that place.

They are quick!

He monitored them briefly, then openly made his way back to his own base.

Chapter 2735

Best Time To Attack

Their defense barrier was basically right in front of Diviniteria’s nose.

The funniest thing was that this incredibly wide defense barrier had split up every single one of the main powers that had surrendered to Diviniteria.

They were basically all caught up in Levi’s net.

The moment they opened fire, all of them would be right at Levi’s doorstep.

He could gobble them up at any second.

None of these powers were efficient enough to even come close to the Lab of Gods.

They would be rendered useless once the battle started.

Levi's defense barrier came as a shock to many people.

The cooperation with Xyperia was even more impressive.

They were really starting to feel like Levi deserved his place as Commander.

It was an amazing card to pull!

The moment he came onto the battlefield, he'd already gotten rid of all of Diviniteria's lackeys.

Chapter 2736

Attacking The Lab Of Gods

Right as everyone was starting to look hopeful and waiting for Levi to announce the official attack time as six hours when he suddenly said, "Wait! I don't think that's a good idea."

"What?" Everyone stared in shock.

None of them knew what Levi meant.

"To me, the best time to attack is right now."

The moment Levi said that, everyone was in shock.

"Spread the word. Attack the Lab of Gods immediately!"

Levi's command sent the whole room into another frenzy.

Immediately?

None of them even had time to react!

However, they soon realized what exactly he was trying to do.

He was solving a complicated problem with a very simple solution.

The more time they took, the more changes there were that could happen.

Even if the most suitable time was six hours later, they couldn't guarantee that nothing would change in that span of six hours.

For example, a possible undercover who could leak their information to the enemy and give the Lab of Gods enough time to prepare or ambush them.

The moment they had too much time in between, there were too many variables that could change everything.

That's why they had to move immediately to prevent anything from changing.

Sudden tactics impressed a lot of

Chapter 2737

Breaking Into Divinitaria

He was holding up a huge crossbow.

It was made from the remnants left behind after Levi created his divine tool.

These remnants wouldn't have been salvageable by even the Sacred Organization, but in Levi's hands, they were just as useful as his ancient metalsmithing skills.

Thus, he successfully created a giant crossbow almost a hundred times the size of a normal crossbow from those remnants.

Apart from being larger size-wise, it was also a hundred times more powerful.

Everyone stared in shock as he brought out the crossbow.

They were all simply taken aback.

After all, it was much larger than most heavy-duty weapons.

Since it was also created from materials from Restricted Area 76, it was even heavier to boot.

Because of that alone, it was extremely hard to transport.

Even with their utmost strength, most fighters couldn't even lift the crossbow, let alone use it properly.

Regular fighters would have to work together to even get it to work at maximum capacity.

However, Levi couldn't just show off his skills in front of so many people.

The Third Giant Arrow

After that command, the squadrons that were awaiting marched out.

Countless modern aircrafts flew out of every building.

They were ready to attack Levi with everything they had.

Suddenly, the third giant arrow flew toward them.

With three loud Shicks, all of the squadrons that the Lab of Gods had sent out got shot.

Both weapons and people got heavily injured.

The VIPs and the other surrendered powers all stared in surprise.

They didn’t know that these so-called gods were just like them.

They, too, could bleed, cry and scream. Most importantly, they could die.

They were just the same!

Gods? Are they really gods?

People were truly starting to suspect them, and they were beginning to wonder if they had been lied to.

Chapter 2739

The Anger Of The Lab Of Gods

Soon enough, they realized why Levi wanted to retreat from the main battle.

The Lab of God's frontline had arrived.

They were strong, extremely strong, whether in terms of their fighters or their weapons.

It was a terrifying sight to behold.

If they were still here, they would have suffered tremendous losses, and might even have lost up to half of their men.

Apart from that, the Lab of Gods had also sent out a team of animal soldiers and mechanical weapons.

It was beginning to look like they could rival Leviathan.

They began to attack with only one thought in mind, which was complete and utter destruction.

Yes, they were strong.

The combined army was surely strong, and the three giant arrows in succession were what angered the Lab of Gods.

That's why they sent out all of their most powerful weapons, prepared to get rid of any hope that their enemy had.

Still, to Levi, they were weak.

Chapter 2740

Retreat They had to retreat

Suddenly, Levi began to chuckle. "That's not what I meant by retreating! First, we make use of our smaller units to constantly interfere with the Lab of Gods and distract them enough that they can't make progress. Then, we won't actually retreat and escape. Instead, we'll simply stay here and block them no matter how much it takes, even if the Lab of Gods shows up... This whole plan is to retreat not to sacrifice Jipsdale, but to protect them. Let them know that everyone in Jipsdale is to escape by dawn tomorrow if they want to live!"

No one went against Levi's command.

After all, he was trying to protect them.

All they could do now was just listen to him.

They finally started to interfere with the Lab of Gods.

Even if they suffered a lot, they still had to go through with the plan.

As for Jipsdale, they began to retreat rapidly.

By now, everyone was beginning to see the good in Levi's plan to set up so much defense beforehand.

Setting up defense barriers in the majority of the world meant that almost all of those areas were in Levi's control.

For example, Jipsdale could escape anywhere they wanted now.

They were all allies anyway.

If Levi hadn't set them up beforehand, anyone could have become an enemy and Jipsdale wouldn't have had anywhere to escape to.
