Chapter 2901 We Do Not Want To Fight

Levi had repeated his request for three times.

Alas, it was no use, for they couldn't stop Levi from advancing.

Many people were already dead before they realized what he came for.

They had no idea why Levi was killing everyone in his sight.

"The Poison Handbook?"

Right then, a few fighters finally realized what Levi meant.

They remembered how word of the Poison Handbook got out when the palace was damaged a while ago.

Turns out this killing machine came here for the Poison Handbook!

An important member of the imperial family was about to say something when someone roared out behind him. "You must have a death wish, huh?"

A Deity from the imperial family had arrived.

Boom! Boom!

Apart from that one Deity, deadly auras had started to appear all around Levi.

It was as if Hades himself had made his appearance.

Chapter 2902 The Opposite

“We came here for the Poison Handbook. If you give that to us, we’ll leave right away,” Dr. Erebus announced with a chuckle.

However, his chuckle sounded odd to everyone.

Is it really that simple? All they want is the Poison Handbook?

Similar looks of disbelief were on everyone’s faces.

Even the Deities were doubting Dr. Erebus’ words.

Suddenly, something occurred to Dr. Erebus. His lips curled up as he said, “Oh, right. We didn’t come empty-handed. Here’s a gift in exchange for the Poison Handbook.”

Pfft!

Hearing his words, everyone tutted silently in exasperation.

Usually, people would approach in a diplomatic manner before resorting to brute force.

However, it was the opposite for Levi and Dr. Erebus.

Levi had slaughtered everyone who tried to stop him before trying to reason things out.

“A gift?” someone blurted out.

“Yes!” Dr. Erebus answered.

Chapter 2903 Humiliation

It simply wasn't worth it to take a chance just to keep the Poison Handbook to themselves.
Besides, it had been at least forty years since someone lay a hand on the Poison Handbook.
All the while, it was simply kept hidden within the imperial palace of Raysonia.

Evidently, it wasn't that valuable to them.

Since it could save their lives, they were willing to hand it out.

After Levi took over the Poison Handbook, the wooden box burst into a million pieces and disappeared into thin air.

Even the Deities didn't manage to see what happened clearly.

The person who gave Levi the wooden box had the shock of his life, for he saw how the box vanished into thin air before his eyes.

It... it just disappeared without a trace!

Is he an immortal? He seemed more like a Deity compared to our Deities!

Levi flipped through the Poison Handbook and confirmed it was the real thing before pocketing it.

"If you had agreed to give it to me earlier, those people wouldn't have died," Levi uttered before he turned to leave.

Chapter 2904 The Horrible Poison Handbook

Back then, Raysonians lived to outdo Erudians.

Now, from this generation on, they had another mission—to kill Levi.

It would never change, ever.

“It won’t be easy to kill Levi. We saw how strong he was.”

“After earth’s environment changed, it is said that Deities are the strongest beings alive. If word gets out that someone has slaughtered a Deity so easily, it will create an uproar.”

The prince declared icily, “We have no choice but to combine forces. If he can kill ten Deities, we’ll gather twenty Deities. If he can kill twenty, we’ll gather fifty. I’m sure he isn’t capable of wiping out hundreds of Deities in one go!”

“Yes, Levi has to die! We’ll gather fighters and take action together. Levi won’t be able to defend himself.”

“There might be hundreds of Deities in Raysonia, but we can’t risk our country. We need to collaborate with other forces or find someone else to do our dirty work to rid of Levi.”

“That sounds great. That way, we can conserve the talents in our country while taking revenge against Levi at the same time!”

They came up with a plan to assassinate Levi.

Levi and the other two didn’t leave Raysonia at

Dr. Erebus was widening his eyes in anticipation.

I can't wait to find out the solution to all poisons in the world and the name of the strongest poison in the world! What could it be? Is the strongest poison better than Final Malice? That sounds impossible!

When Levi flipped to the last page, both of them slumped in disappointment.

Levi, especially, nearly cursed out loud in fury.

It felt like fate had played a cruel joke on him.

Turns out, the last page of the Poison Handbook had no content.

Its purpose was to explain that there was a volume two of the Poison Handbook.

The crucial information that they needed so desperately was recorded in volume two.

The first volume of the Poison Handbook recorded the various kinds of poisons around the world, and the second volume was the core of the Poison Handbook.

The solution to neutralize all kinds of toxins and medicines was recorded in the second volume.

Of course, the Poison Handbook would also have a record of the most poisonous substance in the world.

One could find the information in the second volume.

Apart from that, the solution was to fight poison with poison.

To be exact, the medical skills written in the Poison Handbook were in fact poison skills.

Chapter 2906 The Search

They knew what the consequences were—Levi would begin a killing spree.

It was possible that he would kill everyone in sight.

The Raysonian prince sighed and shot Levi a fearful look. "You might not believe us, but we don't have the second volume of the Poison Handbook."

The others chimed in timidly, "Yes, we only have volume one of the Poison Handbook. Volume two doesn't exist!"

They were afraid that Levi would kill them out of fury.

Hearing that, Levi was taken aback.

After all, he had killed two Deities to intimidate them.

As such, he was sure that they weren't lying.

The prince continued, "Your Highness, both volumes of the Poison Handbook differed greatly. The first volume is astonishing, but one could tell a human had recorded it. The second volume is far more astonishing than the first volume. It seemed like immortals had created it. We've been looking for the second volume all the while. We got the first volume from Erudia, but the second volume was nowhere to be found. There were no traces of it as though it didn't even exist. If we have the second volume, we would've given it to you. We wouldn't have risked our lives just to keep it with us."

Hearing that, Levi knew that it was the truth.

Chapter 2907 Breaking News

The chances were slim, so Levi grew increasingly antsy.

He knew Forlevia's condition better than anyone.

Despite keeping it under control, he had no idea what would happen during the next relapse.

Levi didn't even know where he should go next.

Before Levi and his group could leave Raysonia, a piece of breaking news spread all over the world.

Xyperia announced that they had discovered a way to create Deities.

The moment the news spread, everyone was gripped by shock.

After the environmental change, every country and force was in need of Deities.

The more Deities a country had, the stronger it would be.

After all, Deities represented power.

Alas, the event of spiritual energy revival had passed, and the number of Deities had been fixed.

There was no way to create more Deities.

Thus, many countries and forces started wondering how they could create more Deities.

However, they were at a loss.

It would only happen if the light emitted radiation once again.

Chapter 2908 Sleepiness

According to the rumors, the solution provided by Idrae could not only create man-made Deities, but it could also make the original Deities even stronger, allowing them to use the spiritual energy they absorbed to the max.

This news was as terrifying as the one about the man-made Deities.

After all, everyone knew the Deities had achieved the highest level.

No one expected that their powers could still be increased.

Most people might not know it, but the Deities were well aware of their own abilities.

Although they had an abundance of spiritual energy and were gifted with all kinds of talents, they were still unable to unleash the maximum power of their spiritual energy.

The fact that they were aware they had the potential to become stronger but had no idea how to do it was the root of the problem.

Meanwhile, there were some Deities who had mastered the advanced techniques that could maximize the power of their spiritual energy.

Hence, they were more powerful than the others.

The Deities were divided into various stages; not all of them were equally powerful.

Chapter 2909 Midnight Visitors

“Since you’re already here. Just come on in,” Levi said coldly.

With that, five people could be seen walking into the room.

They were a mixture of faces that had features of people from Adrune and Bayview.

All of them were extremely tall and muscular, though they were not from the Deity class.

What made Levi puzzled was the fact that he couldn’t sense any hostility from them. After all, these people had made a visit in the dead of night. Anyone would have thought that they came with bad intentions.

What are they here for?

“Who are you? And what are your intentions?” Levi asked.

“That’s easy. We are the enemies of Idrae. However, we’re not the only ones. There are thousands and even millions of people who are just like us. We have only one motive, that is to destroy Idrae,” said one of them.

of Idrae, eh?” Levi

has done countless evil crimes. They have too many enemies in every corner of the world, and the numbers have been accumulating for a long time. Many people have been trying to hunt them down, but Idrae has always acted in secret. Hence, it’s difficult to even start a search. If it wasn’t because they had sought refuge from Xyperia, we wouldn’t have been able to find them. Recently, we’ve been making some calculations. If we’re to count the number of forces that are enemies of Idrae, there are probably at least fifty to sixty thousand around the world. As for the number of people, well, the number is too large to calculate. Meanwhile, there are at least four thousand and

Chapter 2910 I Am Enough

All they're giving me is a ton of explanations instead of their motive.

Levi lifted his head to look at the visitors. "So? Your reason for seeing me is..."

In truth, he already had a rough idea of their intentions.

"It's very simple. We want you to join us to go against Idrae together," the leader of the group said.

The others chimed in, "We know you have a grudge against Idrae because they poisoned your daughter with the most powerful poison. Don't you want to take your revenge?"

Levi scoffed, "Of course I do! They don't deserve to live. I'm going to kill all of them."

"Exactly. That's what we're thinking too! We want all of Idrae's people dead. However, getting our revenge on them is too difficult right now. It's basically impossible. The probability of eliminating them is just zero. It's even more impossible to do it alone or with just an organization. And now, many people understand this truth and have given up on taking revenge. Can you believe it? They're not planning to seek revenge against Idrae, nor do they want to bring up their grudge for fear of bringing trouble upon themselves in the future. The problem is, it's not just a few people who're doing this. Ninety percent of the forces have given up on the idea of seeking revenge. How could they give up on such an irreconcilable grudge? We must get our revenge! Since we can't do it alone, we've decided to unite. We can take our revenge as long as we're powerful enough," one of them said.

Levi finally understood the situation.
