### Chapter 3051 The Invincible Cyrus

Levi was getting tired of all the farce he had to go through.

If he had to teach every small fry that comes his way a lesson, he reckoned he would die of exhaustion.

Even Parasite King, who could end a Deity with a flick of his wrist, was nothing to Levi. So it was only natural that Levi had zero interest in those weaker than Parasite King.

He didn't move from his position as he watched the scene.

I don't have to worry since many here can deal with them. I could finally take the nap that I so deserved.

In contrast to Levi's carefree attitude, the members of Black Sky Union and other organizations were in a confused state.

They were at a loss for what to do after being surrounded by powerful opponents.

They had no way of escaping.

When they came for Levi with nefarious intentions, it never crossed their mind that they would be the ones who ended up surrounded instead.

The scenario was too unbelievable.

Moreover, the combat prowess of their opponents surrounding them was equivalent to a Deity.

As for those that were Deities, to begin with, they were much stronger than a common Deity.

How are we supposed to fight back?

"Hmm? I think there's still some of our people that haven't arrived yet." Levi sighed.

“Pfft! None of you are any better than Parasite King! Don’t forget that you’ve committed all kinds of heinous acts all this while! Aren’t you well aware of how many people had met their end tragically because of you?”

“Yeah! They’re all ruthless murderers who take others’ lives brutally. Don’t be fooled by them. They’re indeed wolves in sheep’s clothing!”

“Let’s eradicate all of them so nobody will fall victim to them again!”

Troy and the others lambasted and vowed to put an end to everything.

Cyrus, who stood in front of them, snapped coldly, “Everyone, let me take charge of them. I’ll make all of them pay the price for what they’ve done today!”

The others got all fired up and yelled out reluctantly.

“No way! Count us in! Everyone should play a part in that!”

“How could Xyperia took Idrae’s side?”

Troy and the others flared up. They could barely wait to strike against Idrae and Xyperia, and skin them  
alive.

“Not only that, even the mysterious force is going after those who dare to take up the bounty! Not to  
mention, there is more than one mysterious force. I have a hunch their subordinates might even  
outnumber those assigned by Idrae! Thus, all those thinking of taking up the bounty are eradicated. As a  
result, it scares the wits out of the others,” Digital God explained further.

Only then did they realize that the current circumstance was a lot worse than expected. Idrae, Xperia,  
and the mysterious forces were seemingly in sync with each other, leaving no stones unturned.

They joined hands to ensure whoever tended to take up the bounty would be gotten rid of. In the worst-

Everyone could barely wait to witness the mind-boggling scene of an upcoming intense battle and the victorious moment when Levi vanquished Xyperia.

They happened to know that Xyperia was creating Deities maniacally with newfound resources and Idrae's method. Ah! The more, the merrier! They should have tens of thousands of Deities for Levi to vent his anger!

However, Digital God could not resist wailing, "But those insolent fellows boast that they'll get rid of anyone curing Evie's poison. Be it Rodunst or Terrandya, they will get rid of those standing in their way!"

Even though they foresaw it was just a matter of time for Levi to pay the latter back in their coin, they flipped out at their foes' haughtiness.

Hitting the roof, Troy and the others gritted their teeth and rebuked, "D\*mn it! I can't stand those fellows' impudence!"

Dr. Erebus asked quizzically, "Mr. Garrison, isn't there anything we can do at the moment? After all, Evie's poison must be cured as soon as possible. But if they continue to stand in our way, I'm worried chances of Evie being cured will be very slim."

"Of course not! I still need your help to keep an eye on them. Since others don't dare to take up the bounty openly, why not send it to their doorsteps?" Levi stated casually.

#### Chapter 3055 The Internal Dispute

"Oh yeah! How's Hydron doing at the moment? Why haven't they made any move even after assembling for quite a while? They haven't even sought Idrae for payback, have they?" Levi asked in bafflement when he suddenly remembered the organization taking the same stance as them.

"We're clueless about that as we haven't gotten any news from them," someone replied Levi.

On the other hand, Hydron had a conflict among themselves.

As the whole organization was targeting to stop anyone from curing Forlevia's poison, they assigned assassins to get rid of everyone taking up Levi's bounty.

On top of that, they were in sync with Idrae and the mysterious forces discreetly. At the same time, their organization was gradually expanding.

As time elapsed, some of the members started to voice their doubts. They had joined the organization with the intention of seeking vengeance against Idrae. Nevertheless, they found out the organization had not mentioned a single word about it.

"No! Are you trying to use the straw man's argument here? Since when are we allied with Idrae? Have  
you seen us getting in contact with them? I suppose not! As of now, it is nothing but a coincidence that  
we have the same objective as they do. However, we are not collaborating with them! Idrae remains our  
enemy, and we are strengthening ourselves every day just so that we can exact revenge on them!"

"However, how can you tolerate sharing the same goals as your enemy? Aren't you supposed to protect  
what your enemy hates? I feel that we should be protecting Levi and his daughter instead of harming  
them, especially since Idrae is trying to do them in. As of now, how are our actions any different than  
that of Idrae's?"

Those men hated Idrae to the core and couldn't wait to exact their revenge.

Consequently, they would get all worked up as long as anything related to Idrae was brought up.

To them, an enemy's enemy was their friend.

Meanwhile, Cyrus, who was more powerful, finally found the magical medicine in three days' time.

As a result, Chad was impressed by his efficiency.

Unfortunately, he was still too late, as someone had moved the magical medicine away.

In spite of that, no one could deny how effective Cyrus was.

Subsequently, Cyrus continued to discover more of them and almost exposed the mysterious faction.

Having been pushed to desperation, the organization held an auction to sell Chad's magical medicine on a nameless island located in the eastern sea of Erudia.

The moment news of the auction spread, everyone was shocked.

Even Cyrus looked at Levi fearfully.

Despite the calm look on Levi's face, Cyrus could recognize how terrifying it actually was.

In other words, if one wanted to obtain the magical medicine whole, one had to cooperate with the masked men and get them to unlock the box with a secret code.

From Idrae's perspective, their goal was to win the bid for the magical medicine, for it was a highly coveted magical herb after all.

In the event they failed to win the bid, they didn't mind letting someone else have it as long as it wasn't Levi.

Worse comes to worst, they would destroy the magical medicine within the box.

At the same time, Hydron too had the same strategy.

Meanwhile, a massive crowd had turned up for the auction due to the value and attraction of the magical medicine.

Evidently, the mysterious faction intended to make a fortune by also accepting spiritual energy crystals and magical herbs for the auction.

Soon, Levi and his entourage arrived at the island.

Prior to his arrival, he had already made some arrangements.

By hook or by crook, he was going to unravel the mysterious faction's identity.

Chapter 3059 Another Enemy Of Levi

Right when they were about to call out their bid, a voice rang out, "Five hundred pieces of high-grade spiritual energy crystals!"

Both Idrae and Hydron were stunned because it was someone else who did so.

Is that another enemy of Levi's?

They weren't the only ones who felt that way.

Even the host of the auction reacted with surprise under his mask.

Is someone else trying to stop Levi too?

Other than, Idrae, Hydron, and the mysterious organization controlling Chad, he was surprised to learn that someone else was out to undermine Levi.

Not only did the turn of events surprise everyone, but that person also cried out his bid in a confident manner, as if he wasn't afraid of Levi at all.

"Just as expected, they're here!"

Since Levi couldn't recognize those that were present, he had no idea the bidder that appeared wasn't from one of the three suspected factions.

Given Levi's unlimited resources, he wasn't threatened by anyone at all.

Hence, Dr. Erebus doubled the bid right away. “A thousand pieces of high-grade spiritual energy crystals!”

The earlier bidder continued, “Two thousand pieces of high-grade spiritual energy crystals!”

Everyone was completely flabbergasted.

Even Idrae and the auction organizer were stunned by the knowledge that there was someone who could go head to head with Levi in terms of his resources.

In fact, that person was more ruthless than Levi when it came to their bids.

"Should we continue?" Dr. Erebus asked.

Just like Levi, he too was shocked.

"No. His objective is just to get in our way," Levi replied as he planned to observe further.
