Chapter 3201 Two Hundred Thousand Deities

It was hard to find out the exact numbers in such a short amount of time.

However, there were rough estimates.

When Levi swung his sword, he killed about a hundred thousand Deities, which left about four hundred thousand of them left.

After that, about a hundred thousand Deities flanked him from the left, and another hundred thousand from the right.

Those two groups also covered him from behind.

Both sides completely surrounded him and didn't give him an opening to leave.

The front side still had the most troops with at least two hundred thousand Deities.

That meant a single punch from him took out more than two hundred thousand Deities!

A chill was sent down the spines of those who calculated the numbers.

No one could explain the result after it came out.

They all wondered how a punch could take out two hundred thousand Deities in an instant.

Those people began to cry.

No wonder there was nothing left in front of Levi because he wiped out the entire army.

hundred thousand Deities were gone in

Chapter 3202 Titan Lord Goes Crazy

A single swing of the sword killing one hundred thousand Deities was already enough to shake the world and silence it.

However, Levi shook the world once again only moments after by killing two hundred thousand Deities with a single punch.

The world was going super-duper crazy.

There were people all around the world dying because they were so shocked by the news of how awesome Levi's power was.

Even he himself didn't expect the news of his earth-shattering achievement would kill people because they were that shocked.

It was then everyone realized why he had the guts to challenge the entire Elterton Union.

They all thought they were super smart and knew how to analyze the situation.

However, they all forgot an important point about Levi, and that was he was well known for being a cunning person.

If those idiots could think of something, then Levi would certainly know about it and thought about it even more comprehensively.

There was only one reason why he acted so recklessly and why he brazenly ignored all danger.

That was because he was very confident in his capabilities.

From Zoey's and others' perspectives, Levi wasn't a reckless person at all.

Chapter 3203 Everyone Is Looking For Forlevia

The situation was similar to how things were when they were looking for the Five Great Wars Regiment—Azure Dragon, White Tiger, Phoenix, Black Tortoise and Kirin.
No matter how hard everyone looked, they were still nowhere to be found.
That was also why Levi went to Xyperia without worrying about anything.
He had already predicted that outcome.

His strength would definitely be revealed after the battle commenced.

That, in turn, would cause many hidden threats to emerge.

There were some who were after Forlevia because she was gifted. There were also people who wanted to attack Levi because they worried about him getting too strong.

The second group would, without a doubt, go after Levi's friends and families to weaken him.

That was why Levi struck preemptively by hiding his friends and families away.

He would not give his enemies any shot at hurting them.

His move prevented many issues from arising.

It was a smart move. If he hadn't prepared beforehand, things would surely spiral out of hand.

Naturally, there were many unforeseen circumstances. Azure Dragon and the others didn't listen to Levi's warning and had left their hiding spots. Consequently, they were conned immediately after.

Levi never predicted because he

The representative thought about it before saying, "Truth is, defeating Levi is not a difficult feat. It's just... This is one of those things that does not need a direct assault. I will issue a mission to you now. Shield is to start working on this mission right away. Your agents are to go to Erudia and kidnap Levi's wife or daughter. They must capture at least one. All we need is someone to hold Levi back."

The sudden order messed Shield up and made them fumble.

What the hell?

Black Hawk almost laughed aloud.

He claims that it is not a difficult task, but tells us to kidnap Levi's wife and daughter at the very next second.

The implicit message was too obvious.

It meant that the forces supporting them could not defeat Levi easily.

Black Hawk's analysis was simple. He thought that the forces supporting them definitely had the means to destroy Levi.

It didn't matter how strong Levi was. There was no way the guy could compete against an entire organization.

The only issue was that it would not be easy for the organization to crush Levi.

It was likely the organization would have to suffer a great loss.

At that moment, they weren't willing to endure that loss.

There was another possibility, though. The organization might be facing an entirely different challenge at the time.

That would explain why they weren't willing to redirect their resources to kill Levi.

Hence, they came up with another way to deal with Levi.

in question was to kidnap

Chapter 3205 Go Protect Them

Earlier, the Deities saw themselves as mighty and fearless warriors, but that view had changed.

Now, they felt as though they were just cannon fodder and were being sent to their deaths.

Statistics didn't carry any meaning when Levi was around.

It wouldn't matter how many Deities were there. Their death would still be inevitable.

The way the Deities were thinking proved that Levi's punch had sent their fighting spirit straight to hell.

"What's this? Why is no one talking? Are you going to stop me or not?"

Levi raised his voice, and it sounded as though a horn had gone off.

The powerful sound wave spread out and engulfed everyone.

One by one, they came back around.

Stop you? With what? You're like an actual celestial being. Heck, you're even more powerful than those so-called angels in the fairy tales. Who would dare to even get close to you?

"Ah!"

Many fighters that had regained their footing saw the look on Levi's face, and they screamed in absolute fear.

"Hahaha..."

Some fighters reacted differently. They laughed like a maniac.

"Boo hoo hoo..."

Another group of fighter cried aloud.

They were scared senseless.

Chapter 3206 Witnessed History Being Made

Some time ago, Levi said the same thing.
No one believed him at the time and thought that his words were nothing more than a fantasy.
They all thought that it was impossible for Levi to exact his revenge on Idrae that day.
It seemed so wild, and it was equivalent to seeing the sun rising from the West.
His words were going against all the statistics, sciences, and technology in the world.

It was akin to someone telling a scientist that the Earth wasn't round and was flat instead.

No one would ever believe in something that ridiculous.

Many even assumed that Levi only said those words because he was so frightened that he had gone insane.

To top it off, Elterton Union had formally made an announcement about how they would keep Idrae safe.

It was bad enough that Levi had to go through five hundred and seventy thousand Deities, but they also formed a perimeter of Super Deities right outside Idrae's place. It was basically an impossibly strong wall, and it was waiting for Levi.

At the time, they taunted Levi.

It was understandable since they thought that absolutely no one on the planet had what it took to defeat them. They firmly believed that Idrae was safe because the Deities were there to protect them.

It looked as though no one on the planet could threaten them.

However, that belief was squashed in about ten minutes.

Everything became a mess!

Chapter 3207 Levi Was Scarier Than Death

Everyone was turning more and more numb with every step Levi took toward the Idraen Sanctuary.

Thump!

Thump!

More and more fumbled and fell. Some even fainted.

"Ah!"

When Titan Lord saw that familiar face, he reacted as though he had just opened Pandora's Box.

He had gone completely insane, and he fell from the top.

A loud thump signaled him smashing into the ground.

He had completely lost his mind. His brain had basically gone on strike, and he was no longer in control of his body.

If his physical attributes weren't incredibly strong, he would've already fallen to his death.

The other high-rank officials were screaming and running fearfully as well.

Some of these people managed to remain sane. That didn't really matter, though. They wanted to flee just the same, but it felt as though their feet were made of lead, and they simply couldn't move.

Thump!

Thump!

Chapter 3208 Not Even Heaven Can Stop Me From Killing

Unfortunately, those Super Deities never showed up.

The three most powerful Super Deities hiding in the dark disappointed Levi the most.

That was understandable since he was there because there were many Deities and because there were rumors about powerful Super Deities stationed.

The top three Super Deities couldn't stay hidden after being called out like that.

All of them rushed out of their hiding spot right away and bowed down to Levi.

"Crown King, there is no way we'd have the guts to fight you. We've looked up to you ever since you were deemed the overlord of our generation, and you've only become stronger. We admire you from the bottom of our hearts."

All three of them were scared senseless.

They were so terrified of Levi attacking them that they would spew whatever nonsense they could think of.

Levi couldn't help sighing when he noted how those Super Deities were more cowardly than the others.

"Awh, this is no fun. It's so boring."

At first, Levi thought that he could satisfy his violent tendency by fighting the Super Deities, but those men surrendered before the battle even began. They refused to fight.

What's the point of it all? This is so disheartening.

"Move aside, then."

to

that, everything

had single-handedly defeated

an absolutely undeniable fact. The guy destroyed one of the most powerful organizations

to go after Idrae, so he turned to face the high-rank officials of Elterton Union. He scoffed before taunting, "Didn't you say that you'd keep them safe? Go

to prove to the entire world that no one will be able to hurt Idrae, so come on. Didn't you claim you are the strongest? I am standing right here, and I am not leaving, so why are you suddenly

Soon, all the attention fell onto Idrae.
None of the hundreds of men from Idrae had run away or attempted any sort of strange behavior.
All they did was stood there in unison.
Each and every one of them looked as if they had been frozen.
There was no movement from any of them!
Their bodies were still.
There was no change in their expressions.
They did not blink their eyes, and their hearts were not beating either!
Others might think they were stone statues.
In actual fact, they were all still alive.
After witnessing the shocking incident with their own eyes, they had temporarily gone into a self-isolation state.
It was a coincidence that they had gone into that same state.
In short, they were shocked beyond words and froze in fear.
It was difficult for them to process everything in such a short span of time.
Right now, Levi was standing in front of them all by himself.
That was not what they had expected.

With the protection of Xyperia and Elterton Union, no enemies would be able to come within a hundred meters from them.

That's right!

Didn't all of you challenge me to kill you?

Good!

Now, I'm here!

The lot of them from Idrae could only suffer in silence and say nothing.

He's right. We did say that.

But, none of us expects you to show up here!

They had thought that it would be impossible for Levi to make it. That was why they dared to challenge him.

Otherwise, they would not have the courage to do such a thing.

No one had expected Levi to really turn up in front of them!

At that moment, he was standing right there.

"All of you were very daring. Right?" sneered Levi.

None of them dared to look him in the eyes.

All of them had their heads bowed, and they were trembling. Their pants were wet with pee, and they were covered in cold sweat.

They felt very envious looking at those who had fainted.
