Chapter 3891 Let Us Not Go In

Levi focused his gaze on the bright flash of light. The three colors of Heavenly Thunder confirmed his suspicion. The entire Dragon's Grave Valley did, in fact, achieve a kind of energy equilibrium.

Three people entering the core area abruptly would introduce three bodies of energy into the area, thereby disrupting the energy equilibrium.

As a result, the Heavenly Thunder would need to destroy the abrupt energy bodies to maintain equilibrium. As expected, the Heavenly Thunder follows the rule of some kind of energy law between heaven and earth.

Levi didn't dare to underestimate the power behind the phenomena at the thought, as he could sense that the energy behind the three bolts of Heavenly Thunder was more intense than the purple Heavenly Thunder.

"I'll see how powerful and lethal you are."

Levi immediately started channeling the basic technique within his body to draw the three bolts of Heavenly Thunder to him.

He chose to face them instead of retreating.

The protective energy shield in front of him was smashed into smithereens in a split second, and the three bolts of Heavenly Thunder tightly enveloped him.

Crackle!

Arctic Lake was like a massive sea of lightning.

Chapter 3892 Those Rumors Are False

The three followed the sound and saw a dark purple Heavenly Thunder of around thirty meters strike down and hit the center of the Arctic Lake.

At the moment of impact, the water in the Arctic Lake acted as if it was boiling. Very soon, a water tornado shot up into the sky and beyond.

As for the center of the Arctic Lake where the large Heavenly Thunder had hit, wild bolts of lightning started spreading everywhere and formed a terrifying lightning firework.

The sizzling sounds were deafening. Just looking at it would cause chills to run up and down anybody's spine.

Boom! Boom! Boom!

Just then, a smaller Heavenly Thunder started striking the surface of the Arctic Lake.

It seemed as if they were trying to calm the imbalance that had been created by the large Heavenly Thunder.

Chapter 3893 Cursing The Heavenly Thunder

"Are the both of you done talking?" asked Levi with a grin. The two women nodded in bafflement. For some strange reason, they had a bad feeling about this.

True enough, before the two women could react, they felt an invisible energy wrapping around them before they entered the core area uncontrollably.

Just as they stepped into the core area of the Dragon's Grave Valley, the calm waters in the Arctic Lake began to shimmer again.

Looking carefully, they noticed that they were not ripples. Instead, they were electric currents that had accumulated over the years.

Boom!

The very next second, the rumbling thunder reverberated across the dark clouds again.

Lightning started flashing like a crazy wild beast who had been agitated out of the blue. It was as if the sky was going to tear apart.

"Stay close behind me. Don't use your energy shield unless you have no other options," instructed Levi in a deep voice.

Both Cheriette and Larissa had yet to recover from the initial shock, so they nodded out of instinct.

Chapter 3894 Destroy The Balance Of Energy

Both women never thought that the Heavenly Thunder would go for sneak attacks. Although both bolts of Heavenly Thunder did not have two different colors, they were far more powerful than the Heavenly Thunders in the non-core areas.

"We're doomed!" The two women were devastated, for Levi had yet to finish using up the energy of the bicolor Heavenly Thunder. He was still preoccupied with it.

It was clear that their cultivation and energy shield would not be able to resist the two terrifying bolts of Heavenly Thunder.

"Focus. I'll take on most of the power from the two bolts of Heavenly Thunder. The two of you should try to meld with these two bolts of Heavenly Thunder. Don't think of resisting it. These two bolts of Heavenly Thunder are targeting you. They're the harbingers of your doom, but they're also the harbingers of chance for you."

Immediately after saying that, Levi activated his basic techniques.

As if sensing a massive lightning rod, the two bolts of Heavenly Thunder that had been going after the two women promptly went toward the top of Levi's head instead.

The two women were dumbfounded, and they did not fully understand what Levi had told them.

Chapter 3895 They Must Be Dead

As Levi and the others had barged into Dragon's Grave Valley's core area and were metamorphosing using Heavenly Thunder, the entire Dragon's Grave Valley started quaking intensely as energy shockwaves spread everywhere.

Seemingly affected by that, the Heavenly Thunder in the non-core areas became far more intense than usual.

The lightning energy erupted and frightened the members of various sects who were trapped in Dragon's Grave Valley.

"What's going on?"

"Is this happening because of that robber?"

"I doubt it. Although he's powerful, he will be turned into ashes by a bolt of Heavenly Thunder of this caliber. I'm glad we didn't continue inward rashly, or else we won't be able to escape that place."

The fighters of smaller sects were petrified to see the dark clouds and the bolts of Heavenly Thunder from afar.

Chapter 3896 Do Its Worst

To get into Eclipse's good books, Geraint inched closer to the sect leaders any time he had the chance to do that so that he could remind them of his presence. "Lords, do you think the robber is still alive?" Geraint asked respectfully.

"With what that madman showed us, he can likely survive the attacks of the Heavenly Thunder in the non-core areas. However, the commotion earlier must have been caused by the core area's Heavenly Thunder. We're feeling the effects of it even though we're so far away from the core area. What kinds of mighty bolts of Heavenly Thunder do you think those people who are within the area are withstanding?" Then, in a determined voice, the sect leader of Eclipse uttered, "They must be dead by now."

"Poor Larissa," the deputy sect leader lamented. Larissa excelled in cultivation, and the two of them valued her. In fact, they were even about to train her as their successor.

Alas, the madman stole her away, and she died with him in Dragon's Grave Valley.

"Darn him. Even if he escapes Dragon's Grave Valley alive, I'm going to murder him!" the sect leader said through gritted teeth.

"Lords, please be at ease. Void Sect will certainly end his life to avenge the many Paladins of the sect," Geraint quickly said to express his loyalty to them.

Chapter 3897 Earthquake

Crack! The lightning pierced the sky and made a gap between the dark clouds.

Rumble! Then, the sound of thunder came. Even Levi shuddered in response. The sound of Heavenly Thunder was soul-piercing, and it could temporarily stun anyone who heard it.

The Heavenly Thunder here is really one of a kind! Levi was elated, but he soon noticed that something was amiss. When he tilted his head back to look at the sky, he noticed the gloomy clouds above Arctic Lake shifting as if some kind of gigantic beast was about to appear out of it.

In the next second, the blinding rays of electricity connected to form a humongous electric web. The bolts of Heavenly Thunder leaped around in it, seemingly about to strike at any time.

Bolts of electricity crossed each other like thunder serpents entangling around one another. It was a horrifying sight to behold.

Chapter 3898 Several Dozen Times Stronger

The two ladies were confused. "What's an earth ley line?" "I've only heard about the dragon ley line and the holy ley line. Is it a spiritual ley line of a higher level?"

The women expressed their confusion. Levi explained, "You can look at it that way. The ground of the core area in Dragon's Grave Valley is struck by Heavenly Thunder all year round. To a certain extent, its geological features have reached a special degree where they possess the incomparable power of those thunderbolts.

In this current situation where the presence of the Heavenly Thunder is noticeable, it's natural for the earth ley line to respond to it. Haven't you noticed that the force holding us to the ground has gotten stronger again?"

It suddenly dawned on them that there was indeed a kind of energy holding onto their legs, making it hard for them to walk.

Not long ago, Levi had purposely increased the strength of their energy shields and created another energy layer to separate their legs from the ground.

Only then were they able to move around more conveniently. But now, the force that restrained their movements had appeared again. "Take care of yourself. I may not be able to protect you after this." Levi's voice was exceptionally solemn.

Chapter 3899 Why Did Levi Do That

Sylvan and the council members were at Prime Association's branch. They had just received the news
about Levi. "Why did Levi do that?"

"Although Divine Bones are a must-have to forge a premium ultimate weapon, he didn't have to venture
into Dragon's Grave Valley!"

"Dragon's Grave Valley is indeed the utmost dangerous place. Even someone like Levi, who possessed
high cultivation, couldn't escape death. This is terrifying."

"Back then, most of Prime Association's branches also went to Dragon's Grave Valley, but it didn't turn
out well. Our members either ended up dead or grievously injured."

"We didn't enter the core area. Levi only had himself to blame. This is the price for being too arrogant."
Everyone was engaged in the discussion except Sylvan.

"Do you have other thoughts, Mr. Webber?" someone asked.

Chapter 3900 The Legendary Divine Bone

Meanwhile, watching the gigantic lightning orb expand above Arctic Lake made Levi even more excited.

That was because he knew how terrifying the lightning orb could be. He believed it would be more daunting than ten large dragon ley lines combined.

If he managed to pull through, he could advance to the next cultivation level.

Likewise, it would be the same for Chierette and Larissa. As long as they could overcome the attack of Heavenly Thunder, they could complete their transformation.

"I'll continue to strengthen your energy shield. After this, keep a distance from me because I don't want you two to get hurt. Once the Heavenly Thunder shatters the energy shield, you must fight with all your might. This will help you with your cultivation," Levi said.

With that, he gathered his power and enveloped the two women in the energy shield miles away. Chierette and Larissa had been worried that the Heavenly Thunder would strike, but nothing happened.
