### Chapter 3901 The Spooky Atmosphere

“That thing is impenetrable! How crazy is that?” Cheriette was blown away.

She had used nearly eighty percent of her power to strike the bone. Such intense power would have shattered an iron piece reinforced by the spiritual ley line into bits.

Yet, it did not have any effect on the unpleasant-looking charred bone. This is going to be an excellent material for a midrange weapon!

All of a sudden, Larissa’s voice emerged from the back. “Look at those bones! Quick!” Cheriette looked in the direction Larissa pointed and noticed a crystal-like bone with a yellow hue.

Larissa picked up the bone, and out of curiosity, she knocked it against the charred bone. Click! Following a crisp sound that came from the collision, the charred bone was smashed into pieces.

Cheriette was thunderstruck. Did the yellow bone turn the charred bone I failed to destroy into dust?

“The luster of the two bones looks different, so their hardness is also vastly different,” Larissa deduced. She immediately took a sidelong glance at the surroundings, hoping to find the other bones with a similar luster.

## **Chapter 3902**

The two women stopped in their tracks. The baffling sight before them made them gasp in response.

Arctic Lake was completely different when observed up close than at some distance away. Previously, the oddity of the lake's surface caught their attention, while the uneasiness and fear they felt when approaching the lake were due to Heavenly Thunder.

However, both Cherie and Larissa were stunned by the astonishing sight after they managed to get a closer look.

Zzz! The seemingly calm and peaceful surface of the lake, though dark as obsidian when observed from afar, was actually buzzing with electricity.

This was no ordinary lake. It was a lake of thunder! "The water of the lake looked black from afar, but it now seems it was all an optical illusion!" Cherie lamented.

Upon closer scrutiny, however, the water was actually see-through, and one could clearly discern about three meters beneath the surface.

ascertain what was further below that as the lake ran deep. "Not only that, the temperature of the lake is unusually low. This is going against the law of nature," Larissa

## **Chapter 3903 Cannot Get Near Divine Bones**

Cherie grew even more excited after Larissa confirmed her surmise. Seeing as they had completed  
Levi's order, they could finally leave the dangerous place.

The two women hurriedly approached the Divine Bone. However, the electric clouds on the surface of the lake buzzed erratically as soon as they took a few steps toward it.

Then, a terrifying blaze of thunder struck their energy shield. Kaboom! The surface of the energy shield cracked open, and the outer layers shattered.

Not only that, but the purple blaze of thunder was also able to penetrate through their shield and shoot right at Larissa and Cherieette.

The two women hurriedly used their techniques to defend themselves. Still, they were sent hurtling off into the distance before smashing heavily on the ground.

Both Larissa and Cherieette coughed out mouthfuls of blood as their breaths weakened.

Luckily, they were able to patch up their energy shield in time and did not suffer further injuries. Otherwise, they wouldn't have survived.

Chapter 3904 Someone In Hiding

Larissa's delicate frame was trembling all over as she watched Levi intently. At that moment, the matter of her life and death depended on him bringing them through this attack.

If she were being honest with herself, Larissa had little confidence in Levi.

Although Levi had extraordinary fighting skills, the giant lightning orb floating in the sky had drawn all the lightning energy from Dragon's Grave Valley.

It was enough lightning energy to destroy the entire world.

Even the armor forged from the hardest material from Kenfort would be turned into ashes in an instant, let alone their soft human flesh.

"You two go and mark the locations of the Divine Bones and the magical herbs. Don't worry about how we're going to get them. Go now! Quick!" Levi ordered.

Levi was completely focused, his eyebrows tightly knitted in concentration. All his attention was channeled into the present moment.

The stray crackles of energy released by the giant lightning orb felt dangerously violent, and Levi knew he had to be very cautious.

The two women did not question Levi and hurried to search for the Divine Bones and magical herbs as he had requested.

Cheriette and Larissa did not dare to enter the Arctic Lake. They only

Chapter 3905 Let Me See Your Strength

It was as if Levi was trapped in a world devoid of color. All he could see around him were the white flashes of lightning, scorching hot and blindingly bright.

Even the very fabric of space where the Heavenly Thunder was attacking was distorting. "What potent lightning energy!"

Levi was alarmed when he realized that he felt a sharp tingling sensation that turned into numbness whenever the lightning touched his skin.

Although the sensation only lasted for a split second, it had never happened before in any other Heavenly Thunder attack.

This was enough to show that the Heavenly Thunder unleashed by the giant lightning orb was purer and more powerful than any other ordinary Heavenly Thunder.

No wonder it took so long to gather all that lightning! It must have taken all that time to refine and purify the power of the Heavenly Thunder to make it that much more lethal!

Crack!

Lightning sparks danced across Levi's skin, emitting high-pitched crackles.

Chapter 3906 The Real Secret

The two women fled until they were about thirty meters away from Levi. Only then did the pressure from the earth ley line reduce.

Of course, its energy was still present, but it was not powerful enough to harm their bodies.

"I wonder how Master is doing," said Larissa with concern.

Cheriette was silent for a moment before she remarked, "There's no Heavenly Thunder here, so Lord Garrison is still safe for now."

With that, they glanced toward the massive ball of lightning in the distance.

The white light from the electricity looked like an upside-down milky way, and Levi was completely covered in it.

Despite being so far from the source, they could still feel its power.

Hopefully he can get out of this safely.

They prayed the same prayer in their hearts, partially to reassure themselves that Levi would be fine.

Chapter 3907 Their Survival Depends On Levi

Meanwhile, Floyd was also advancing forward at great speed. However, he was confounded as he did not encounter any obstacles at all.

Before coming here, Floyd had learned that Dragon's Grave Valley was unusually dangerous, and the Heavenly Thunder could strike randomly. That was the reason many fighters never returned once they went there.

"Is Dragon's Grave Valley really as scary as the rumors describe it to be?"

He scoffed in his heart. At that very moment, all he could feel was the slight energy restraint from the ground. Even so, that energy restraint was something negligible for Floyd.

Right then, a violent wave of energy swept past the area. "How powerful! What on earth is happening in there?" he asked himself.

Floyd was shocked to the core. Even though he had released his energy to resist the force, he was still sent flying into the distance.

"How could it be so powerful when I'm so far from it? Exactly how powerful will it be if I'm near it?"

Floyd could not snap out of the shock. Just then, he saw dazzling lights bursting out of the giant ball of lightning in the distance.

Immediately, a terrifying surge of energy spilled out and assaulted an area in the distance.

Chapter 3908 I Am Going To Kill You

A horrifying pressure from the thunder permeated the entire space, leaving a deathly silence around the Arctic Lake.

Like the quiet before the storm, it filled everyone's hearts with anxiousness and fear.

Following that was a violent trembling beneath their feet. Although the women did their best to balance themselves, they could not withstand the force and crashed to the ground.

Thankfully, the earth ley line's force holding them to the ground was gone. Otherwise, they would be panicking about getting sucked into the ground.

That was when Cheriette and Larissa finally understood how those Divine Bones ended up in the ground.

They were most likely pulled into the ground due to the earth ley line's restraining force. And with the strikes from the Heavenly Thunder, it was only natural for something like that to happen.

The thought of that scared them out of their wits and left them panting heavily.

In that short period, about seventy percent of their energy shields were already shattered by the Heavenly Thunder's pressure.

The remaining sections were still holding on. If not for most of the lightning energy aiming for Levi, the women would have been crushed long ago.

Chapter 3909 The Most Powerful Attack

Suddenly, an ear-piercing sound could be heard as the giant lightning orb fell and hit Levi’s body directly.

At that moment, all Levi could hear was a ringing. He heard nothing else from his surroundings.

Right then, a bolt of Heavenly Thunder so hot and powerful it seemed to burn everything it hit struck Levi. It was as though it wanted to rip him into pieces.

The earth ley line was not making Levi’s situation any easier, either. Just as his legs had finally broken free from the ground, the earth ley line quickly restrained them.

“Oh, what perfect timing.”

Left without a choice, Levi could only shift his attention to deal with the earth ley line’s force that was pulling him downward.

Crack!

Just then, the space seemed to be tearing apart. Even Levi was starting to feel a slight pain.

Coupled with the lightning orb’s most powerful attack earlier, he was beginning to feel numb all over his body, and the intensity was still increasing.

Dragon’s Grave Valley’s Heavenly Thunder is really like no other. It can actually work with the earth ley line and Arctic Lake to make such a powerful attack, Levi exclaimed inwardly, impressed

the basic techniques to the

Chapter 3910 Returned To Normal

The surge of powerful energy and the immense force of Heavenly Thunder struck at the same spot.

Rumble! Following the deafening booms, the black rock beneath Levi’s feet shattered, allowing him to break free from the force restraining him instantly.

At the same time, he stomped the ground with his feet and propelled himself upward like an arrow toward the remnant of the half-gigantic lightning orb in the air.

Swoosh! The violent buzzing sound of electricity rumbled continuously as electric arcs enveloped Levi’s body.

However, the insignificant electric attack could no longer inflict substantial harm on him. The clash lasted for some time. Ultimately, the enormous lightning orb gave up and gradually dispersed.

Levi floated upright in mid-air like an ancient war god gazing down at his subjects. He radiated an air of dominance and regality with his every move. “Is it finally over?” he muttered and lightly balled his fists.

At once, energy churned within him in response, but the moment he loosened his clenched hands, the energy dissipated immediately as if it was never there.
