

## Pinnacle 3921

### Chapter 3921 Large Sects

As it turned out, Levi's method of draining the Arctic Lake was by using it to metamorphose.

He absorbed the lightning energy, the earth ley line's power, and even the subarctic elements imbued in the water before channeling his basic techniques to evaporate the rest of the water.

Alas, the moment Levi entered his elementary stage of metamorphosis, Heavenly Thunder began to put up resistance and struck him continuously.

After all, Levi was disrupting the new energy balance he had achieved only a while ago. However, given his tremendous power, Heavenly Thunder's attack felt nothing more than an itch that he could scratch and shrug off.

After a long, futile struggle, Heavenly Thunder finally gave up and allowed the water in Arctic Lake to be drained at an alarming rate.

Swoosh! As lightning energy in the water sent sparks flying, Levi quickly absorbed them into his meridians.

Since he had previously metamorphosed with the lightning energy in Dragon's Grave Valley, the effect of Arctic Lake on him was almost negligible.

"Master has possessed so many top-notch materials and with the addition of such a unique forging environment. I believe the forged ultimate weapon would be at a top-tier level within Kenfort. I'm

genuinely looking forward to the moment when the premium ultimate weapon takes shape!” Larissa was overwhelmed with mixed emotions and looking forward to that.

The resources that she had when she was with Levi were far more eye-opening to her as compared to the time when she was still an Empyrean in Eclipse.

After the baptism of the power of Heavenly Thunder, as well as the metamorphosis when diving deep into the Arctic Lake, Larissa’s cultivation level improved greatly.

If she kept staying in Eclipse, she would have to spend several years to reach her current cultivation level.

Cheriette also exclaimed, “Indeed, Lord Garrison’s forging technique had similarly reached its peak, and I wonder what kind of terrifying level the forged ultimate weapon would be at?”

“According to the specifications of the previously forged ultimate weapons, they were forged using top-grade magical herbs with the addition of the natural power of Heavenly Thunder and Earthfire. I’m afraid that truly could forge an ultimate premium weapon that would even be regarded as the strongest ultimate weapon by the hidden sects,” Larissa presumed.

Levi had a succession of shocking moves, and Larissa had almost gotten used to it.

If someone told her that Levi could forge a real premium ultimate weapon previously, she would think it was a pipe dream. However, she had an inexplicable trust in him now.

### **Chapter 3923 Most Critical Step**

With the deliberate traction of the power released by Levi, the imminent loss of the raw liquid of the materials instantly condensed into a crystal.

But it could clearly be seen that the sparks of the Earthfire and the Heavenly Thunder were in a constant stalemate. Then, a mass of white fog was released from the surface of the crystal.

The fog similarly contained the material power of the star metal and the fire stone, but there were obviously many impurities in it.

If not controlled in time and the power of impurities was allowed to intrude into the pure crystal, the purity of the ultimate weapon would be significantly reduced.

Once the invasion of the power of impurities was excessive, the toughness of the future forged ultimate weapon would be greatly compromised.

However, it was currently not a good time to abruptly dispel the impurities energy fog as the impurities' gas energy would constantly appear in the crystal through continuous refining.

Also, it would affect the quality of the ultimate weapon if an action was taken before it was completely purified.

Also, accurately grasping the timing and the strength of a move was the key to determining whether one's forging technique was advanced.

intensely, as though a criminal was being sentenced to severe punishment. There was even surprising that such a scene could

Chapter 3924 Worth Staying By His Side

Crack! The dark clouds had been suffocating. Then, a streak of lightning arched across the sky as if signaling the end of the world.

Cheriette and Larissa could not help but take a step back as fear became visible in their eyes.

They were both long impressed by forging technique, but they never thought that the Heavenly Thunder's power would grow exponentially.

"Look at the cloud! This bolt of Heavenly Thunder seems to be a nine-colored Heavenly Thunder!" Cheriette exclaimed.

Larissa looked in the direction she was pointing to see the nine-colored Heavenly Thunder striking right at the newly formed sword.

Clang! Sparks flew everywhere, and the sword trembled as the ear-piercing sound of reverberating metal rushed into Cheriette's and Larissa's eardrums, making them ache.

However, they could see the sword turning even more crystalline after metamorphosing with the nine-colored Heavenly Thunder.

## Chapter 3925 Successful Forge Of The Ultimate Weapon

Prime Association's Super Fighters' informants soon returned with the news. Even Sylvan had given up hope—he had previously hoped that Levi would be alive. After all, Levi had displayed great power previously.

Of course, the most intense emotion he felt was a sense of pity. He believed that Levi could have been a master forger.

It would be Prime Association's greatest luck if Levi made it out of there alive to work with them.

Alas, all traces of hope were gone. Sylvan then sent out the order for the informants' retreat. There was no point for them to keep wasting their time on Dragon's Grave Valley anymore.

Of everyone, Void Sect stuck around the place the longest. Naturally, it was so that they could show Eclipse their loyalty.

When a week went past, and there was still no sign of Levi, Geraint and the others gave up.

"The robber must be dead, and there's no need for us to keep wasting our time on him anymore. Let's retreat," Geraint ordered.

Other sects followed suit when Void Sect departed Dragon's Grave Valley.

Chapter 3926 The Name Of The Ultimate Weapon

Whoosh! A flash of light appeared, and the sound of thunder echoed in the air. In the next second, a fissure opened up on the solid Arctic Lake surface.

Swoosh! A beat later, water seeped out of the fissure but was soon frozen by the iciness of the sword attack.

“As expected of a premium ultimate weapon! It’s truly terrifying! This surface has withstood countless strikes of Heavenly Thunder over the years, and even a normal ultimate weapon would have trouble leaving a mark on it! Moreover, Master hasn’t used any techniques. In other words, this fissure is an indicator of the sword’s power.”

Hearing that, Cherieette felt her jaw drop. She hadn’t noticed that earlier. Even someone who was not a cultivator would be able to deal a devastating blow with the sword.

If a sword cultivator were to use the sword, they would be able to use the sword even better. “Not bad.” Levi was rather satisfied with the sword. In comparison with the new sword, God Crusher now felt like a piece of trash.

“Lord Garrison, why don’t you give this ultimate weapon a name?” Cherieette suggested. Levi inclined his head. After a moment of silence, he said, “I’ll call it Dragon’s Grave.”

“What a good name!” Cherieette and Larissa quickly agreed to it. It was clear that Levi named it to commemorate the journey to Dragon’s Grave Valley, and it was also a name that would strike terror into people’s hearts.

#### Chapter 3927 Empyrean Election

There was a large arena with a thick and even surface at Eclipse, and it was made with a polished black meteorite that could reflect as well as a mirror could.

Around the arena were four observation decks around the arena, and in one of them were the important elders of Eclipse.

They were the judges for the election, and they had come to witness the various candidates' cultivation talents.

Below the arena was the bustling crowd. There were hundreds of sects who had come to join the Empyrean election, though most of them were small sects.

Most of the time, these sects would never get the chance to interact with a large sect like Eclipse. Hence, they were eager to seize the opportunity to rise to the top.

Even if their sect members were unable to become Eclipse's Empyrean, getting a chance to join Eclipse Academy would be good too.

"The Empyrean of Cloudblade Sect has passed the preliminaries and is now a candidate for Eclipse's Empyrean election."

"The Empyrean of Redsea Alliance isn't talented enough but is accepted into Eclipse Academy for further training."

"The Empyrean of Blueflame Sect is average. A reward of five high-quality spiritual energy crystals will be given to her as encouragement."

#### Chapter 3928 How Thunder Slaughterer Got Its Name

Gloria was bursting with pride as she became the center of attention in Kenfort, especially since Eclipse was a super sect. All those other Emphyreans are nothing but a bunch of clowns! None of them are capable of taking me on! I've been observing the other participants closely. None of them pose a threat to me at all.

Sure, there were a few from medium-sized sects that are pretty strong, but they're still nothing compared to me! At this point, it's safe to say that I will surely become the Emphyrean of Eclipse.

All I have to do is ascend the ranks in Eclipse, and I'll practically rule over Kenfort! After all, Eclipse is at least a hundred times more powerful than Void Sect. Even so, I won't stop at Eclipse. Whatever sect that robber belongs to has got to be the most powerful one in Kenfort. Now that I'm going to become the Emphyrean of Eclipse, I can easily crush people like Levi and Floyd beneath my heel!

Meanwhile, within the Earthfire of Arctic Lake at Dragon's Grave Valley, an ancient dagger had taken shape. It had a much wider blade than most other ancient daggers and emitted a blindingly bright blue glow.

The dagger possessed an aura similar to that of Dragon's Grave, albeit sacrificing sharpness for more weight. With the sword in his hand, Levi slashed at the Heavenly Thunder in the distance.

sliced it in half.

it 'Thunder Slaughterer'!"

Thunder's energy to forge two ultimate weapons changed the energy balance in the surrounding a new energy balance, which led to it going all sources surge toward them. Naturally, that on the two premium ultimate

Chapter 3929 Willowbank

Meanwhile, in the outer areas of Dragon's Grave Valley, a group of bounty hunters was roaming about. Not long ago, they detected the energy level fluctuations coming from the Heavenly Thunder in Dragon's Grave Valley.

One of the Heavenly Thunder's beams even struck a tree on the outside of Dragon's Grave Valley, reducing it to ashes on the spot.

Fortunately, the bounty hunters were standing at a safe distance from the tree when that happened. Otherwise, they, too, would've been turned to ashes along with it.

Even so, the Heavenly Thunder's shockwave alone was enough to cause internal injuries to those with lower cultivation levels. The bounty hunters were all shocked to the core as they had never seen anything like this before.

That wasn't the end of it, though. The group also noticed the sparks and bright light in the sky above the core area of Dragon's Grave Valley. The Heavenly Thunder crackled in the sky like fireworks, but it never struck the ground.

In addition to that, a slight vibration could be felt in the ground all over Dragon's Grave Valley. The vibration was rhythmic and resembled the beating of a drum.

Naturally, the bounty hunters had noticed all of those changes in the environment. "What's going on here?"

## Chapter 3930 Struck Gold

"I doubt we'll find any treasures in a place like this. It's probably just a natural phenomenon resulting from having Heavenly Thunder in the area for too long.

There's no need to go check it out. Only bounty hunters would treat Dragon's Grave Valley as a gold mine. We should just continue on our journey," said one of the Cordierite Association's fighters with a disdainful expression. It seemed like he didn't take Dragon's Grave Valley seriously.

Being a large business conglomerate, Cordierite Association would pay huge sums of money to hire elite fighters as bodyguards whenever they transported cultivation resources.

As most of them were from medium to large sects, they were very experienced and arrogant. "All right, enough chit-chat. Let's get a move on!"

The leader stood firm on his decision not to venture into Dragon's Grave Valley. However, he couldn't shake the feeling that the strange phenomenon was caused by the appearance of some rare magical herbs in the area.

delighted smile on his face as he stared at the two premium ultimate weapons. "Why don't you get some rest, Lord Garrison?"

not planning on staying up all night to forge ultimate weapons, are you?" Larissa chimed in as
