

## **Pinnacle 561**

### **Chapter 561: support**

When it comes to the boundary of his home, it should be Qin Yu who should arrange it.

But today, it is Ye Lao who is in charge. He is not good at taking the lead, letting the old man arrange it.

The car was turning around in the city, making Qin Yu, a local, stunned.

finally stopped in front of a fly house located in a narrow alley. The only thing Qin Yu could confirm was that this place belonged to the west.

More specific, he doesn't know.

Is this name a bit too sloppy?

Looking carefully, Qin Yu realized that there was a handwriting stamp on the front.

It's just a long time ago, and I can't even see the print.

The inside and outside of the shop also look full of age, old...

Old door, old table, old floor, old fan, nothing is not old.

To be honest, if Qin Yu came alone, he would definitely not enter this store.

However, Ye Lao's eyes are full of memories.

It seems that I have been here, so I must have a lot of memories.

"What's the situation?" Seeing Ye Lao fell into recollection, Qin Yu could only ask Ye Jinlan.

"Grandpa worked in the Northwest and came to this store." Ye Jinlan doesn't know much either.

She just treats her as the old man who came to see where she once stayed. Now, how do you think there is a story in it?

"Oh, here's someone." The young man who was busy in the kitchen came out.

wiped his hand on the apron in his arms, the boss smiled and greeted: "How many people can you eat?"

Ye Lao woke up and saw the young man asking suspiciously: "Are you Lao Yang's?"

The young man was taken aback and thought of his old man: "You mean my dad? He is retired, and the shop is now handed over to me."

Old Ye was taken aback, and smiled: "Haha, boy, I'm talking about your grandpa."

"Oh, you are asking far enough." The young boss invited him to sit down first, and then said, "My grandpa left the year before last."

"How did you go?" Ye Lao was surprised, and then asked: "Then, where's your grandma?"

The young boss said: "I walked in my dream, very peaceful, and I didn't suffer any crime!"

"My grandma left a few years ago, are you always?" The boss thought he was an old diners, but this would be a bit uncertain.

After listening to the old man in front of him, he suddenly felt sad.

There are even tears in his eyes, which is not what diners should have.

What the boss is curious about is whether he is sad for his grandpa or grandma...

There is something in the story!

"Old friend." Ye Lao calmly wiped the corner of his eye: "Also making haggis soup?"

The boss wants to ask a question, but the other person is depressed, and obviously doesn't want to say more, and it's not easy to ask: "Do."

"Three bowls, six more sesame cakes!" Ye Lao said.

"Okay, come right away, it's just stewed this morning, so it's still the old taste."

The boss smiled at Qin Yu and Ye Jinlan, then turned back to the kitchen and went to work.

"Little Friend Qin, my old man has been thinking about this place for decades, don't dislike it." Ye Lao greeted him and let him take his seat.

Qin Yu took a stool and sat across from Ye Lao, and said with a smile: "I'm just an ordinary person, so I don't dislike it."

"Haha, you are not ordinary at all!" Ye Lao laughed heartily, the loss between his eyebrows disappeared.

As far as life and death are concerned, he has long been bearish.

just suddenly learned that the person is no longer there, it will inevitably be a little bit sad!

"Girl, don't you wait for me to invite you?"

Old Ye Ye looked at Ye Jinlan, who was standing on his side, and said with a smile: "You two young people, I'm ashamed to ask my old man to say hello?"

"Grandpa, I won't wait for you to speak!" Ye Jinlan smiled mischievously and sat beside him: "Grandpa, where is it?"

"I used to eat here..." Ye Lao obviously concealed something, but he didn't say anything, no one could ask.

"Little Friend Qin..." As soon as Ye Laogang spoke, Qin Yu raised his hand to interrupt.

looked at him with a wry smile and said: "You can just call me Xiao Qin. It's not the first time we have met, Xiaoyou Qin, Xiaoyou Qin, I am awkward!"

Ye Lao tilted his head and glanced at his granddaughter. Then he looked back at Qin Yu and said with a weird smile: "Okay, it's my old man who is out of sight."

Qin Yu was a little helpless, and said to his heart: You see outsiders when you see outsiders, why do you see your granddaughter?

The two of us are...

We have different opinions, but this is not all popular now.

"Lao Ye, are you here this time?" Qin Yu didn't want to entangle this question any more, and took the initiative to change the subject.

If Mr. Xin Ye made a special trip to the abandoned city, he would invite him to eat a bowl of lamb soup, that would be naive...

"Why, guess I have something to ask for?" Ye Lao smiled and said, "I just came to see, visit your company, and have a long experience!"

"That's a good thing, you can look at it whatever you want." Qin Yu replied openly, turning to Ye Jinlan's eyes but full of doubts.

Come to stroll around, what's a joke?

To him, such a big person who affects his attention wherever he goes, is he able to travel on the spot?

As soon as he opened his mouth, countless people had to stop and persuade him.

If you can't stop it, you have to start arranging your itinerary, security, and confidentiality work must be prepared months in advance.

Xingshi moves the crowd, and moves the whole body if it is not necessary.

Ye Lao, whom Qin Yu knew about, would definitely not do that.

"Grandpa is here to visit your company, but the visit is secondary, mainly for some people."

Ye Jinlan said that, Qin Yu understood.

It seems that his performance still attracts a lot of people's attention, Ye Lao is here to cheer him on the platform.

"I'm here, this is Lao Tzu's grandson-in-law. I have my old man for a day, so I have to keep an eye on whatever you like."

This is the attitude Ye Lao wants to express on this trip, answering everyone's suspicions with the most direct action.

You guys don't want to see how much my old man supports him?

I haven't been in Shangdu for decades, so I am afraid of troubles and money.

This trip is for Qin Yu, he is here, this is the best answer.

"Xiao Qin, what are your actions, do it with confidence, my old man has your medicine and can last a few more years.

As long as he doesn't die for one day, the old man's face is still quite valuable. "

Ye Lao pointed to his wrinkled face, blinked and smiled triumphantly.

is like a bragging child, waiting for others to praise him.

"You bothered." Qin Yu said politely.

Ye Lao tilted his neck back and looked at Ye Jinlan with a clear expression saying: Look, my grandson-in-law can still speak.

Ye Jinlan was also dumbfounded about this, this man is getting old, but his temper is getting better and worse.

I feel like a child at every turn, and I have to take credit for doing something.

makes people feel comfortable with a few words of praise, and can be happy for several days.

"A few, here is the meal." The young boss is holding a tray with three bowls of soup and pancakes in a basket.

"Master, have a taste of it!" The boss took the tray and waited for Ye Lao's affirmation.

Here, Ye Lao broke the cake and soaked it in the soup. He even put the cake with chopsticks and chopsticks, and put it in his mouth to chew and swallow.

took another sip of the soup and said with a thumbs up: "It's still so authentic."

The boss was a little embarrassed to be so praised by him.

scratched his head smiled shyly: "That's good, you guys eat well, I'll go busy."

"Go, go!" Seeing the boss's back, Ye Lao had a touch of kindness in his eyes.

Qin Yu looked at Ye Jinlan, and met her equally curious look.

Qin Yu: There is a situation!

Ye Jinlan: Grandpa is a gentleman, don't guess!

Qin Yu: Is that my guess? Gang's tone, those eyes...

Ye Jinlan: I'm concerned about what's wrong with the younger generation. I never heard of being a friend.

Qin Yu: Do you care about your friend's younger generation as much as you care about your grandson?

Ye Jinlan: Fuck you, you are the old woman, and you have grandchildren.

Qin Yu: I said the old man, can we concentrate on it?

"Well, you two are endless?" The two of you exchanged eyes, affectionate, secretly sending Qiubo, the old man can't stand it anymore.

"My old man is still there!" Ye Lao joked and scolded, "Young people nowadays don't know how to be reserved."

"Grandpa~" Ye Jinlan shook his arm reluctantly.

In front of Ye Lao, she will always be the little girl who is not growing up.

"Haha, don't shake it, don't shake it, my old man surrenders, this dog food, old man, I did the head office, right?"

#### **Chapter 562: Starting from the value of the face, loyal to the body**

Regardless of Ye's old age, his thoughts are not out of date at all!

Following the trend, dog food will be eaten...

However, it's better to eat less dog food. Isn't Haggis soup fragrant?

Eat too much, the old man has a love at dusk on a whim.

Ye Jinlan should be prosperous, in a trance...

After catching the lamb, the two cakes and the soup were clean.

Qin Yu wiped his mouth and said, "Which company Ye Lao would like to see first?"

"When you get here, you are in charge." Ye Lao wiped his mouth and placed his chopsticks neatly by the bowl: "You have the final say."

"Then let's look at each family, let's start with Lixin?"

"Okay, I can hear this name like a cocoon in my ears."

"Old He!" He waved at the door to He Wu, who was on the other side of the road, and the other side drove over.

"Let Watson come over and accompany the old man to the company." Qin Yu has to go and arrange the mining machine first.

When that thing is not on the road now, it will not be too late to wait for the release of "Ghost".

After waiting at the restaurant for half an hour, Ye Lao talked a lot with the young people in the restaurant.

Mostly the old man is talking, the boss is listening...

Speaking of the past, he is not too annoying, he listens with gusto.

The more this happens, the more he can't stop.

For the past that happened in the northwest, several young people were more deeply impressed.

"Master, are you and my grandma?" The boss still couldn't help but asked.

Although I didn't say it clearly, when I mentioned my grandma, the old man's eyes were full of happiness.

everyone can understand...

"...Your grandma is a good girl, it's a pity." Ye Lao shook his head, and the topic suddenly came up.

What a pity, the old man didn't say it, but it was nothing more than that.

The two of them missed it.

This past event has become the old man's regret, and it is also the most fond memory!

Asking for nothing is the most beautiful...

"Boss." Watson arrived, and he arranged his schedule here.

Qin Yu explained with a smile to Ye Lao: "I still have some work here, I have to go there first, and then I will accompany you to stroll around."

"Well, I have Miss Watson with me, you are busy with you, my old man is not here to make trouble." Ye Lao smiled, raised the window and drove forward.

"Let's go." He Wu got in the car, and the two rushed to Kuafu as soon as possible.

"Go around to the back warehouse first." Without going to the research institute, He Wu drove the car directly to the center of the warehouse area.

A door is stuck with a seal, and the warehouse door locked with two big locks comes into view.

"You are waiting for me outside." Asking He Wu to drive out the car first, Qin Yu reached out and took out the key from his pocket.

This is what appeared in his pocket after the reward was given.

In the impression of warehouse management, it was "Qin Yu" who personally came to lock the door and took away the key.

and told them not to approach anyone except him.

Let alone open the door to see what's inside.

Insert the key and twist it gently.

Click~

The lock was opened.

opened the door, and Qin Yu closed the door again.

"Turn on the light." Nanoworm accurately found the switch and turned on the warehouse lighting.

slap~

In the center of the empty warehouse, something is covered under a layer of dust cloth.

Qin Yu stepped forward to pull it down with his hand, and the silver-gray machinery was exposed in sight.

The staggered yellow stripes give it a warm atmosphere, making the whole machine look less cold.

Two elliptical robotic arms are stuck on both sides of the top of the cabin like convergent wings. The entire cockpit is in the shape of a drop, and the front end is translucent 'glass.'

The pointed tail is a thruster, and there are four mechanical legs below it to support the balance.

Below the cockpit, there are several concealed cabins with gaps.

Through the 'nanoworm's sight, Qin Yu was able to have a 360-degree view of the entire machine, in the center of the two mechanical arms, outside the top of the cockpit.

has a layer of reflective crystals, through the interpretation of 'kylin'.

Qin Yu learned that it was the energy source of the 'mining machine' and the protective cover excitation device.

It can absorb the energy in the environment all the time and provide driving power for its own reserves.

Solar energy is only the most basic, including electromagnetic, light energy, radiation energy and antimatter, etc...

"Antimatter engine? Is a mining machine so advanced?" Qin Yu asked in surprise and curiosity.

As a 'mining' aircraft, is its configuration too high?

not only has an 'energy shield,' it can also be self-sufficient and use an 'antimatter engine.'

Is it true that in the civilization that produced it, 'antimatter engines' are as popular as bicycle chains?

"The hk-035 is an interstellar exploration machine, not just a simple mining machine."

After Qilin's explanation, Qin Yu was somewhat relieved.

hk-035's main job is mining, but it also has a deputy job, exploring new star areas and looking for high-value mineral resources.

In addition to not equipped with weapons, it can be said to have reached military level in terms of power, speed and defense.

"Search antimatter engine related data."

Numerous information jumps quickly in front of him, but Qin Yu's eyes accurately capture the knowledge he needs.

This is a blessing from "Nano Worm"...

Feel, the needle does not poke!

"How does it gather the exploding gamma rays toward the tail and generate thrust?" Qin Yu said.

Although human beings are only in a theoretical state of speculation about the 'antimatter engine', it does not prevent him from asking questions.

"The particle beam core creates a powerful gravitational circle. All the energy is annihilated one by one at the same time. After being restrained and squeezed, it is released under the control of the magnetic field..."

One question and one answer, if Qin Yu's performance at this time was seen by Ban Dao Che Xuan, he would be crying.

It turns out that it's not that students are hard to learn, but that what I teach is too good.

So, blame me? ? ?

"Can you let it leave without being discovered?" After understanding the relevant data of hk-035, Qin Yu decided to let it disappear tonight.

"After opening the energy cover, the surface can be mimicked and absorbed light to achieve an invisible effect." Kirin.

Get the affirmative answer, Qin Yu is in a good mood.

turned off the light and left the warehouse, and locked the door again.

He decided to experience the feeling of "Ascension" first tonight.

"That's right, I almost forgot..." Qin Yu remembered Bai Muqing's begging for herself after tapping his forehead.

I almost forgot this busy, so I called Ye Jinlan first.

"Actually, I can connect you to any electronic device communication, do you need it?" Kylin.

"Oh, what do you do?" Qin Yu asked.

"It's very simple, just invade and control its equipment." Kylin.

"..." Simple, you call it simple.

Okay, it seems really simple for it.

An aircraft like the hk-035 can be fully cracked and controlled in a few seconds.

Invaded a personal mobile terminal, it seemed really easy.

"Forget it, I still want to experience the feeling of being a human for a few more years." Qin Yu rejected its proposal: "Except for emergencies."

"What kind of urgency?" Kirin.

"Life-threatening." Qin Yu gave it a standard.

Although he doesn't think this will happen, it is always right to be prepared...

"Hey, Qin Yu, are you finished?" Ye Jinlan's voice came from the microphone.

"No, I want to ask you something." Telling Bai Muqing about her request, Ye Jinlan agreed.

Such a small matter, if you say hello, someone will take care of it.

without her coming out...

Compared with this incident, Ye Jinlan is more curious about who asked him to help.

"A friend of a friend, if you think you can help, it's fun to help others!" Qin Yu responded with a smile, and walked towards the institute.

"You are enthusiastic..." Ye Jinlan's voice was lowered a little bit: "At night..."

"I will send you the location." Qin Yu responded skillfully.

"Well, see you tonight." The joyful voice disappeared, and Qin Yu shook his head and put away the phone.

Woman!

starts from the value of the face, loyal to the body.

"I blame my brother for being so good." He stretched out his hand and raised his bangs, and Yu brother was also very upset about this.

Who makes him so talented, just so handsome and so strong.

is like the candlelight in the night sky, attracting Yingying and Yanyan to pursue them.

eh, it's too hard to keep a low profile...

### **Chapter 563: Teacher Qin, I love you so much**

Shi Cui!

This name sounds a bit unlucky, but people look serious...

No, it's a kind of talent!

Except that the hairline is a little bit higher, everything else is pretty good.

Wen Jianjian's bookishness can make his C-position debut with a set of Chinese clothes.

Despite his good looks, Shi Cui insisted on taking the line of talent.

No, I made a "regenerated activated carbon" inexplicably, which stunned the friends.

Even the big boss hurried back to meet his own face, but Shi Cui Niu was broken!

It's just that he feels a little lighthearted in his heart...

Xu, I have no bottom!

This result is too accidental, Shi Cui still can't believe it: I did it?

"Shi Cui, you have worked hard." Holding Shi Cui's hand tightly, he looked at his thin body.

Qin Yu said sadly: "Look at you, how hungry and thin you are for doing research... Fortunately, there is finally a return. After the results of this time have been reviewed, the company will definitely not treat you badly."

Shi Cui: "???"

Boss, I'm really not hungry and thin. In fact, I can eat quite a bit. I can eat four bowls of rice in one meal.

I eat four slap-sized buns, and I have to add two dishes. I have this physique!

Shi Cui said this many times in his heart, but he couldn't say it outside.

The boss has set the tone, and he has worked hard to develop regenerated activated carbon.

If I tell the boss, I'm just overwhelmed and accidentally took the wrong materials.

Put the materials that should have been added to the No. 2 vessel into the No. 5 vessel...

Will he be beaten to death by the boss?

Thinking of the rumors about the boss' skill in the group, Shi Cui swallowed.

Staring at the boss's sincere gaze, he nodded vigorously and said: "I will definitely not let down the expectations of the company and the boss."

"Okay, just to have this kind of spirit of not being arrogant and not discouraged!" Qin Yu looked at the others, pointed to Shi Cui and smiled satisfied: "Did you see it? What is talent? That's it."

"..." There was warm applause, and everyone patted their palms red.

Cui Geng's face is a bit weird, 'not arrogant or discouraged? Damn talent...'

He knows the personal information of group members best, Shi Cui is good at everything.

Just one thing, you have to pull him away from behind.

Once no one was staring at this kid, he immediately let go...

There are all kinds of whimsical ideas in his mind, but the key is to lose one by one, not each.

To sum up, just one sentence: Just think, don't do it!

He is diligent and conscientious, he does not think about food, he is not arrogant or discouraged, to make himself a thin monkey for scientific research?

My heart is full of grooves, and I can't vomit...

When the applause stopped, Qin Yu asked everyone to go back to work, and Cui Geng quickly followed.

"Boss, is this technology handed over to our team?" Cui Geng is here to ask for the project.

People belong to his group, and the results are also made by a group.

No matter how you look at this project, you should stay in the same group.

"Don't worry, don't you already have a project on your side? How is the progress?" Qin Yuke is still waiting for VR to go into production and let "Ghost" go online smoothly.

"...It's more than halfway, and we are doing our best." When it comes to VR projects, Cui Geng has less confidence to speak.

None of the technical challenges proposed by the boss are easy.

I got stuck several times before, mainly due to material synthesis.

Just solving the problem of material synthesis, there are new problems at the core.

However, he is confident that he will overcome this technology before the end of the year and make VR headsets go into production smoothly.

"Okay, then go all out and leave the regenerated activated carbon to Shi Cui...I am going to set up another group to specialize in biological research. How about Shi Cui being the team leader?"

Hearing Qin Yu's pursuit of his own opinion, Cui Geng was a little embarrassed.

To be honest, it seemed to be excluding dissidents and jealous of the other's achievements.

Don't say it!

No one was whipping with a whip behind, and today is probably the most glorious moment in Shi Cui's life.

In the future, he can only go downhill, and maybe one day he will have to be eliminated.

"Just tell the truth if you have anything. There are no outsiders here." Qin Yu saw his entanglement and gave him reassurance.

The boss said so, and Cui Geng no longer struggled.

All his views on Shi Cui were told: "Boss, if someone urges him, he will definitely accomplish something."

Some people are born with salted fish like this.

Obviously rich in books, but he just likes to spend his days idle, everyone behind him, he can dry himself in the sun every day without moving the ground.

"Okay, I see." After listening to his evaluation of Shi Cui, Qin Yu was also dumbfounded.

If this matter was put before, Qin Yu might really have to think about it.

Do you want him to be the leader of these three groups, and how can he be the leader of the three groups without any self-control ability?

But now, Qin Yu is not worried at all.

Doesn't it need people to constantly supervise it?

I just sent him a few friends, accompanied him every day, stared at him, and gave him some motivation to move forward.

A thousand nanoworms flew out of Qin Yu's body, forming a line thinner than a hair.

Just about asking them to find Shi Cui, Qin Yu thought about it, and took back 500 more.

This Shi Cui is as thin as a stick, what if it \*\*\*\* him dry?

It is better to send 500, anyway, it is enough to remind him.

"Playing the watch on time every day," in the case of healthy physical values, be lazy for more than 1 hour.

These cute little bugs will charge him in time.

It's the kind of self-generating type lying on the heart muscle...

There is love and care from the inside out, so don't be too caring.

I believe that with such close company, Shi Cui will get rid of his lack of self-control.

Become more active, proactive, brave to assume and willing to contribute.

This little comrade is a good seed...

no problem!

Cui Geng walked on the front foot, and Jing Yuan came in on the back foot: "Mr. Qin, I have a question and I want to ask you."

"Yeah." Qin Yu's legs were soft, and he slid down on the chair.

On the surface, he said calmly, "Say."

"What is the difference between the lead frame used by the Godson packaging and testing?" Before Jing Yuan's voice, countless useful information and a comprehensive summary after analysis were already in front of Qin Yu's eyes.

And with reference to the second group of research progress, reports and other information stored in the intranet, Qin Yu clearly realized the key point of her problem.

The packaging and testing technology of a chip is the last link in the manufacture of a chip, and it is also a key point for determining whether a chip is easy to use.

"In addition, we found that Godson's die cutting does not match the mainstream design. After testing, so far, it still cannot be reproduced..."

Jing Yuan has more than one problem, but she has a lot of doubts.

These are all in 'reverse engineering'. After many trials and studies, it is still impossible to find the key points of breakthrough.

In order to solve these problems, Jing Yuan often immersed herself in researching.

After a few days and nights, the thick hair becomes thinner.

The last time Jingyuan's mother saw her, she mumbled about it.

Even more bluntly, "If your boss no longer knows that he feels bad for you, and his hair will be bald by then, I don't think you can marry him, and he will support you for a lifetime.

Qin Yu also heard about this, and was sweating...

Jing's mother is too sturdy!

Therefore, when I saw Jing Yuan this time, Qin Yu was going to really solve some problems for her.

Lest a good girl has to run to straighten her hair in the end.

When it spread out, people thought that Kuafu's work intensity was abnormal.

It's too bad for girls to lose their hair!

"Done?" Qin Yu raised her head and looked at him when Jing Yuan thought about all the questions.

Being stared at by Teacher Qin like this, Jing Yuan was stunned and lowered her head in embarrassment.

"I'm sorry, Teacher Qin, I'm too anxious..." She thought she used these 'small problems' to disturb Qin Yu and cause him unhappiness.

In Jing Yuan's mind, Qin Yu's image is already as high as dozens of stories.

For him, small problems like these can be solved by just moving his fingers.

The reason why I leave it to my team for research is to let them get started, understand the principle, deepen the impression, and learn the technology and knowledge by the way.

I couldn't even do this, and even ran to disturb Teacher Qin.

'Too bad. Jingyuan's heart is full of shame and guilt.

"Well, I'll go back later, remember to read the mailbox..." Looking at Jing Yuan in shock, Qin Yu said calmly: "I have sent you all the problems you mentioned, the breakthrough points, and the rest..."

"I will do the rest."

Jing Yuan clenched her fists in excitement, looked at Qin Yu with eagerness and excitement, and suddenly turned and ran out: "Mr. Qin, I love you to death."

The loud shouts echoed in the corridor, attracting countless eyes.

It's just that the look in that gaze always feels a little bit not serious.

#### **Chapter 564: Harmony and loving brother**

Mr. Jing likes Mr. Qin and boldly shows his love...

This news spread all over the company in the afternoon.

When Watson came to pick him up in the afternoon to report to his work, he asked about it specifically: "Boss, Engineer Jing is really in love with you, so what can you do... By the way, Engineer Jing is also pretty, just too..."

"Sloppy!" The dark-faced Qin Yu helped her summarize.

I stayed with a group of researchers every day, wearing work clothes, and sometimes I didn't wash my hair for a few days.

There are all kinds of grease on my body, where can I see it better?

However, under such circumstances, Jing Yuan still seems to be 'beautiful.'

I can only say that this girl has a good foundation!

Dressing up well is definitely better than any net celebrity face.

With a demon-faced face that confuses the public, I just want to eat this bowl of talent...

For any project, the year-end award will have to be made by Internet celebrities for several years.

How can you compare with such a generous boss as Qin Yu? ? ?

Seeing Qin Yu's dark face, Watson didn't dare to continue speaking, and the conversation turned: "Lao Ye said that he was tired, and he went back after a few words in Lixin.

"Tomorrow he wants to see the Kuafu Research Institute first." This request is no surprise.

Those who come here don't want to go to the Kuafu Research Institute.

This is the core technology team of the Miracle Group. From the outside, that is the place where miracles are born.

All projects are from the hands of the entire team, but the confidentiality work is done well.

In addition, Jing Yuan and Cui Geng stayed in the simplest place and rarely showed up, so they were not known to outsiders.

But the name of the entire institute is known to everyone in the industry.

Qin Yu, the chief technology officer, has not received much attention.

In the eyes of industry insiders, Qin Yu is nothing more than hanging up a name and leading the title.

Those scientific researchers may have a lot of words about this.

Especially the two team leaders, although they don't know the specific information, they still have their names. Maybe you can contact each other to find out?

Some people are smart and feel that this is an opportunity.

The clever people were busy swinging their hoes behind.

But they didn't know that the core of the whole group was Qin Yu, who they didn't look up to, and thought they were taking merit.

However, this made Brother Yu feel relieved.

As for Jing Yuan, will Cui Geng and others be poached.

To put it ugly, no one left when Brother Yu drove out...

Which of the technologies that my boss brought out is not a cutting-edge technology that can be called a cross-epoch.

The research atmosphere here is rare and clean and relaxed.

All day long, you only need to do what you want to do, what you like, and you don't have to worry about the rules of the workplace, let alone intrigue.

These two points alone are enough to attract them, not to mention the working environment and salary.

The working environment mentioned here does not refer to the current research institute, but the headquarters building under construction.

Seeing that the work is about to be completed, the boss's secret has been said.

As soon as the construction there is completed, they will move there collectively and work in the headquarters building.

Leisure, entertainment, refreshments and fast food are provided, and the basic salary can be obtained by meeting the effective working hours of 600 hours per year.

However, this one was simply ignored.

Who is going to mess around, and why are you here?

Find a few small and medium-sized enterprises and throw away your certificates.

Isn't it fragrant if you wait at home to count your money every day?

Furthermore, if you really want to mess around, get through your own person first.

Come here to mess around... the little eyes that look contemptuous shoot you.

Don't look at it as a bunch of nerds, it's not at all polite to cheer up people.

The yin and yang are weird, and the cynicism puts you on eye drops every day, and you can stay for a week.

When it comes to remuneration, the VR game room mentioned by the company is what impresses them the most.

It is said that the company is developing a virtual reality game.

Reality can reach almost perfection, making people feel like being on the scene, feeling the real sensory experience beyond imagination.

If it is true, there will be arrangements for future holidays.

what? girlfriend?

Huh~

Superficial human beings, girlfriends can have a good game, where does the confidence come from?

Besides, who stipulated that there should not be a high-speed race about love in the game?

As long as there is love in the heart, there is always a stadium.

Sir, is it illegal to play ball?

...

...

When he returned home, Qin Yu saw the mother-sama very rarely.

Wearing comfortable home clothes, he is sitting on the sofa and playing with pumpkins.

"Cauldron, cauldron, hug." As soon as the little guy saw Qin Yu pouting his butt, he slipped off the sofa and swayed towards him.

Just when he was about to rush in front of him, Qin Yu stretched out his index finger to point on his forehead and pushed forward forcefully.

Slap~

The little man fell to the ground, with question marks in his big eyes.

Looking forward, there is still the shadow of the cauldron.

Looking around, he found the cauldron again. He was already sitting on the sofa and eating his own milk-flavored steamed buns.

Grab a handful and throw it into your mouth gruntingly.

Creak, creak...

"Wow~" Loud crying sounded, and the little pumpkin stood up on his hands.

Turning around and lying on the ground, he rushed towards the sofa with his \*\*\*\* twisted and twisted.

He hit Qin Yu's calf with his head.

"Duang, duang, steamed buns, pumpkin, steamed buns..."

His mouth kept crying, and his head kept hitting his leg.

Qin Yu lay on the sofa and grabbed a handful just like a okay person, and threw it into his mouth to 'chuckle, chuckle' and enjoy it.

This is much better than the small Wangzai steamed buns when you were a child, and the milk flavor is rich: "Mother, are you too eccentric?"

Qin Yu glanced at the addicted little pumpkin, and said with a curled lips: "When I was a child, I didn't see you cooking for me."

Liang Chuyu looked at the two brothers with black lines and thought: What kind of evil did I make?

"That's your brother's food supplement, so you can't look like a big brother?" Liang Chuyu cursed angry and funny.

Qin Yu said solemnly: "Boys suffer much more frustration. I am cruel to make him adapt to society in advance."

"Yes, you are justified, why didn't you name you Qin Youli?" Liang Chuyu said.

Qin Yu tilted his head and thought, glanced at the pumpkin that had already broken his feet, nodded and said, "This name sounds pretty good."

Liang Chuyu gave him a white look, then got up angrily and walked towards the kitchen.

If the two brothers resolve the matter by themselves, she has to cook dinner.

"Hey, have you played enough?" Qin Yu asked, looking at the little pumpkin that was breaking his toes.

"Big brother is wicked and obnoxious." Little Pumpkin said angrily.

"Did you finish?" Qin Yu lay back lazily: "When you are finished, press the eldest brother, and there will be a gift for you."

The big eyes flickered and lit up suddenly.

Stand up holding Qin Yu's calf, yelling: dress, dress..."

"It's a gift, what kind of dress, who taught you Mandarin?" Qin Yu helplessly complained.

"Dress, dress, dress..." Little Pumpkin clapped his hands while jumping.

He likes his elder brother the most, and every time he has a small gift for himself.

The binoculars in the room, the little dolls, and the Lego bricks full of a wall cabinet.

They are all from the elder brother, and I like every little pumpkin very much.

I don't know what else did the eldest brother bring to himself this time?

"If you want a gift, press it to be comfortable." Qin Yu put his leg on the coffee table.

Little Pumpkin immediately straightened up sensibly and stretched out two small hands to press on his calves.

Heh, he squeezed.

When Liang Chuyu came out of the meal, he saw the eldest son lying on the sofa squinting.

The youngest son stood there, squeezing his legs and beating him, his face was red from exhaustion.

"Xiaoyu, you are a big brother, you are really good." Liang Chuyu thumbs up, staring at him with twinkling eyes.

Seeing the red light in the eyes of Master Mother, Qin Yu stood up cleverly.

He stretched out his hand and hugged the little pumpkin in his arms, "I am letting him move, and more exercise will help his body."

"..." Liang Chuyu was already unable to complain.

In short, he is right.

"Wash your hands and eat, and wash your brother clean."

"Okay, leave it to me."

He came to the bathroom with a small pumpkin, made sure there was no one behind, and Qin Yu put it on the sink for him.

As soon as he stretched his hand, Little Pumpkin sensibly pressed the hand sanitizer spit button.

I rubbed it, then stretched it out, and the faucet turned on.

After shook his hand, the towel was handed over, wiped clean, Qin Yu pinched his face and smiled: "What a good boy!"

This time Little Pumpkin poked her \*\*\*\* to wash her hands.

It's all done, being held in his arms by the elder brother again, Little Pumpkin asked about the gift.

After Qin Yu said, "The gift hasn't come back yet, it will take two days", Fenfen's small mouth immediately puffed up.

"Wow, mom, the cauldron is deceiving, wow..." Qin Yu pressed him back without a voice.

This kid is not on the road at all.

It seems that there is still a lack of education, and a lot of teaching is needed.

In this way, how to be a tool man in the future...

Cough, how to be a pillar of society, a good young man who has the courage to contribute?

**Chapter 565: All on your own**

After dinner, the little pumpkin was taken by the mother to take a bath.

Qin Yu sat in the room alone, playing with her mobile phone, and sent a message to Bai Muqing by the way.

When the matter is done, she just takes the child to fill in the information.

In the hotel, Bai Muqing, who had been waiting for most of the day with her mobile phone, put her hands together happily, thanking the gods and Buddhas in the sky.

Of course, I didn't forget to thank Qin Yu, and sent a good remark.

Finally, I want to invite him to dinner.

Qin Yu: "We will have opportunities in the future, so remember first."

Seeing what the other party said, Bai Muqing was no longer reluctant.

But I took this down in my heart, and I must thank the other person for the opportunity.

Things that can't be done even if you spend more than ten to two hundred thousand yuan.

The other party didn't say anything, and solved it directly.

The money was confiscated, and the food was not eaten...

Maybe for him, such a small thing is just a call.

But if people can think that way, Bai Muqing can't think that way.

Anyone who doesn't remember this thing can do, she, a mother, must remember and show her attitude.

Or else, who is willing to serve her in the future?

Even if you confiscate your money, you don't even have a meal... a polite remark.

Is this really not treating yourself as an outsider?

Qin Yu didn't care or pay attention to what Bai Muqing thought.

For him, this is just a whim, easy to do.

Gifts of roses, hand a fragrance!

You don't have to care about gains and losses in everything. Simply doing good deeds can bring great satisfaction to your heart.

This satisfaction is something money can never give...

At 2 o'clock in the morning, Qin Yu sat up from the bed.

I went downstairs quietly and went out without driving.

Walking out of the gate, he went straight to the shade of the trees not far from Nanhu Manor.

Entering the dark forest, Qin Yu's footsteps kept increasing, speeding up his figure to the open space in the middle.

call.....

A breeze blew by, and the air in front of him was twisted.

The HK-035 space mining machine that should have been parked in the warehouse just appeared in front of him like this.

The tightly-fitting and seamless hatch decompressed and opened, and Qin Yu stepped on the outstretched pedal to sit in the cockpit.

The console in front is as smooth as a mirror, without a steering wheel, joystick, or dazzling buttons.

"Kirin, start autopilot, set coordinates, moon." Qin Yu said to himself.

"Autopilot is turned on, the target is locked, ready to go." Kylin's voice echoed in the cabin.

At this time, he has taken over HK-035...

No, it should be called Xihe.

Xihe's system has been fully taken over by 'Kirin', and its voice came from the speaker.

As the cabin vibrated slightly, the lines of sight on both sides began to extend backward...

In the blink of an eye, Qin Yu was already 10,000 meters high in the sky.

The buildings and lights on the ground gradually shrank to the extreme, and Qin Yu looked up.

The clouds were thick and dense, and the Xihe pierced the clouds like water droplets and sailed toward the farther, deep space.

Flying out of the atmosphere, the dazzling galaxy appeared in front of you.

For a moment, the illusion for Qin Yu seemed to be within reach...

It's just that the satellites that feel coming and going fast, orbiting, including the space station in the extreme distance.

Qin Yu can be observed with the naked eye, with the help of the increase in the 'nanoworm'.

He could even see through the glass the astronauts passing by, living in the space station.

"Hello, astronaut." Qin Yu raised his hand and waved to the distance.

Xihe continued to fly towards its intended target, and the parent star behind it was also shrinking in proportion.

"Kirin and Xihe are flying at full speed. How long will it take to reach the moon?" Qin Yu wanted to know the time of the round trip.

"1.3 seconds." Kylin.

"So fast?" Qin Yu was surprised.

"Xihe's limit speed is 280,000 kilometers per second, but its own energy reserve can only last for 5 seconds. If it is overloaded, it will cause irreversible damage to the engine."

"What about the regular speed?" Qin Yu asked.

"Xihe's regular speed is 196,000 kilometers per second." Qilin.

The normal speed alone reaches 65.4% of the speed of light.

Qin Yu couldn't help but once again raised his previous question: Is this really a mining machine? ? ?

More than luxury, it's outrageous!

The four mechanical legs unfolded, and Xihe stopped steadily on the surface of the moon.

Looking at the desolate planet outside, Qin Yu silently communicated with the 'Nano Worm' in his heart.

After a long time, he seemed to make up his mind: "Open the hatch."

"Decompression, the hatch opens, puff..."

The moment the hatch opened, Qin Yu instinctively held his breath.

Decades of cognition cannot be changed in an instant.

Until the entire hatch was fully opened, Qin Yu clearly realized his current situation.

He opened his mouth and took a tentative breath.

"Hi~" No accident happened.

No slight sweetness, no bitterness, neither cold nor hot...

But he can breathe!

"Hahaha, just ask, who else?" Qin Yu jumped off the flying plane and laughed with his hands on his hips.

The second grade was only temporary, and Qin Yu quickly realized.

What kind of feat I have just done, the first person to walk on the surface of the moon in all ages.

Although it was done with nanoworms...

But Nanoworms are also part of his body.

So, I rely on myself.

Is there something wrong?

Nothing wrong!

After jumping for a while on the surface of the moon, the freshness passed.

Back in the cabin, Qin Yu issued a work order: "Let me see how good you are?"

Scan the landforms, explore the elements, and search for valuable minerals.

The Xihe who is working is completely different from its original image.

The mechanical arms on both sides of the head are like two big scorpion pliers, one arm is about 3 meters long when fully unfolded.

The internal mechanical hydraulic device can make the maximum length reach 12 meters.

Enough to deal with any complicated situation...

At the same time, the front ends of the two robotic arms can be replaced with tools.

Various types of drill bits, casings, cutting saws, hydraulic hammers, jacks, etc...

Now, Qin Yu knew what was under the cabin.

It is like a treasure chest of Doraemon. Whatever the robotic arm needs, you can take it from it.

After understanding its working process, Qin Yu ordered to return to the voyage.

Let Xi He send herself back first, and then finish her work.

Moreover, the risk of mining on the moon is too high.

Let the astronomers below discover that there are suddenly more holes on the moon, and they must be so excited that they faint to death.

Returning to its home planet, Xihe landed at the take-off position.

In the woods by the South Lake, Qin Yu got off the boat and gave new instructions to Qilin.

Explore the 'Diamond Star,' and bring him a piece of the diamond on it.

Men, we must do what we say.

Speaking of drawing HK-035, I have to go to Diamond Star.

Then you have to go...

What is the name of the foreigner who declares sovereignty, Frank?

The eldest brother sends a spacecraft to explore the way first, and when you can go up, let's discuss the ownership.

Seeing Xi He disappeared in front of her, a gust of wind blew by and disappeared out of space.

Qin Yu walked to the house leisurely...

Ye Lao's visit did not disrupt the normal operation of the company, there was no ostentation, and there was no need for employees to hold flowers, hold a welcome ceremony, and take photos.

Just walk around and see...

If you don't know anything, just pull Qin Yu over.

With him as the chief technology officer, what else can't you understand?

This visit lasted three days.

The fourth and last day.

Qin Yu accompanied Ye Lao to Miracle Pharmaceutical and visited the production line of 'Kidney Power'.

From production, to sealing, to packing into storage.

Directly loading the car through the conveyor belt, Ye Lao nodded with satisfaction: "Okay!"

This kind of good thing that can benefit thousands of families makes people happy to look at it.

What made him more satisfied was Qin Yu's stability.

Without the reputation brought about by kidney power, he just messed up and negotiated for lazy money.

Instead, a new biological research and development team was established to cooperate with the vigorous development of the pharmaceutical laboratory and strive for new breakthroughs.

"Very well, I didn't see the wrong person." Ye Lao laughed with satisfaction.

"Lao Ye, try our canteen's craftsmanship at noon?" After reading all that should be watched Qin Yu invited him to the canteen for lunch.

At noon these days, they all eat in the cafeteria.

It's not the delicacy of mountains and seas, but it is also nutritionally balanced and well-matched.

The color and fragrance can be talked about, which is very appetizing.

Qin Yu also took this opportunity to explore the situation in the canteen.

So far, the food in the cafeteria is pretty good.

The vegetables and meat are fresh, tasty, generous, and the environment is clean.

This is already good!

Today, Miracle Pharmaceutical is the last one.

When he came to the cafeteria, he opened the curtain and walked in. The neat and clean environment made Qin Yu smile with satisfaction.

It seems that there is nothing wrong with this one!

**Chapter 566: There are so many tricks for money**

"Grandpa, I'll help you prepare food." Ye Jinlan asked Ye Lao to sit and came to the window with Qin Yu.

Two meat and two vegetables, 8 yuan.

One meat and two vegetables, 6 yuan.

The price is not expensive at all, so you can drink any soup...

Ye Jinlan first invited Ye Lao two meat and two vegetables, and then asked himself one meat and two vegetables.

Like Ye Lao, Qin Yu is also two meats and two vegetarians.

A total of 22, Qin Yu took out the meal card.

Company employee benefits have different levels and amounts.

The welfare of several companies, Qin Yu dared to pat his chest and said, no worse than anyone else!

He has 500 yuan in his card, let alone eat one meal, his normal appetite is enough for a month.

"Dip, 11 yuan." Auntie Dafan swiped 11 yuan and threw the card back.

Qin Yu asked curiously: "Auntie, you made a mistake."

"Yes, the rest make up the money." The aunt said blankly.

"..." Make up money?

Qin Yu once suspected that he had heard it wrong. I had money in my meal card. Why should I make up for it?

"Why make up the money, I have money in my card." Qin Yu asked Ye Jinlan to go back first, so he had to ask carefully.

"The company stipulates this. You don't want to make up money and you go out to eat." The aunt didn't rush, just simply repeating a fact.

In this dining room, she is the biggest.

Qin Yu didn't say anything. He swiped 11 yuan with his mobile phone and turned back to the seat.

"How is it?" Ye Jinlan asked curiously.

In the company canteen, the meal card is not allowed, and half of the cash is paid for the meal.

This was obviously abnormal, and Ye Jinlan naturally thought that someone would profit from it.

"Eat first." Qin Yu smiled and picked up the soup bowl to serve the soup.

Open the lid and stir with a spoon to make the broth less watery.

That's not an exaggeration...

There is no standard for the free soup, but at least some egg flowers and seaweed are required.

Scum is okay, isn't it?

But when the pot is poured, it is basically white water, with no oiliness.

Food is no different from refugees, and may not be as good as each other.

Putting down the bowl and going back, Qin Yu smiled bitterly: "Don't drink this soup, Ye Lao, let you watch a joke."

"What's wrong with this?" Ye Lao said with a smile: "Nothing can be done smoothly. If it is true, then you have to have a refreshment."

There will be a smooth sailing day, and everything is to your liking.

It's not that someone is going to get rid of it, or it's in bad luck.

"What Ye Lao said is, let's eat first." Qin Yu seemed to have nothing happened, he should eat, drink...

I don't seem to have a drink, let's eat it!

"Add rice." One piece of rice.

Hey, good job!

Qin Yu hummed two bowls of rice and was full!

"It's not like your appetite." Ye Jinlan laughed and joked.

Qin Yu smiled and asked, "Have you finished eating?"

"Okay, the taste is still good." Ye veteran pushed his dinner plate forward.

There is not a drop of the food and rice in it!

The suffering the old man has suffered and the tragedies he has seen do not allow him to waste a drop of food.

Who knows dishes on the menu, A Journey.

These twelve words, the old man has a deep understanding and remembers every word...

"Then let's go!" After going out, Qin Yu first sent Ye Lao into the car.

Waiting for the car to leave, Watson who stayed in the car also asked He Wu to drive over.

"Boss, is it going well?" Watson asked with a smile when he saw him getting in the car.

"Yeah." Qin Yu snorted and said to He Wu calmly: "Old He, you can taste it in the cafeteria of each company tomorrow. It tastes good."

"This is the meal card, take it." Qin Yu leaned back and closed his eyes to sleep while giving him the meal card.

'problem occurs. 'This was the first reaction of the two.

Although I don't know what happened, it must be related to the cafeteria.

He Wuxin said, 'the boss asked himself to go to the cafeteria to taste it. This is for me to check. '

Knowing what the boss meant, He Wu put away the meal card and drove towards home at a constant speed.

For several days, Qin Yu did not show up at the company.

It was He Wu, who hung up a new job sign every day, and went to various cafeterias to eat, drink and chat.

Old driver.

They are all slick, one mouth can make smallpox, and everything can be said.

Although He Wu can't speak, he is willing to listen.

He listened very seriously, whoever spoke, he looked directly at the other person.

Putting on an empathetic look, there is no audience more qualified than him.

The honest and honest temperament is even more reassuring.

This is an honest person, and it doesn't matter if you just tell him something.

In this way, He Wu successfully penetrated into the 'enemy army'.

I've gotten acquainted with the miracle canteen aunt, and talked to him all day long.

After coming out of the canteen of the pharmaceutical factory again, He Wu felt that he was ready for business.

These people...There are so many tricks!

...

...

When He Wu called, Qin Yugang sent Lu Qing to the school.

The person is sitting in the car, observing the real-time picture of "Xi He".

It has already successfully reached the Nako Diamond Star, and it has indeed found diamonds on it.

It's just that this diamond seems to be a little different from Qin Yu's cognition.

In Xihe's records, this mineral similar to diamonds is called "liquid spar," which can be sufficiently dissolved with special chemical elements.

It works!

The crystalline plate of the Xihe's "back" that can absorb various energy and release the energy mask is developed and manufactured on the basis of the "liquid spar".

This is a huge surprise for Qin Yu!

Who would have thought that I just wanted to fish for some diamonds, so I would be happy for a while.

Unexpectedly, a brand-new mineral element was discovered, which is still the main material for manufacturing energy absorbing crystal plates and energy shields.

After giving Qilin new instructions, his thoughts were interrupted by He Wu's call.

"Boss, I checked it out." He Wu.

"Let Watson handle it." Qin Yu's answer was concise and clear.

It's just such a small matter, and he won't bother to handle it personally.

Whose problem should be dealt with.

Those who need to be held accountable for dismissal and dismissal cannot be tolerated.

In the end, whether to recruit a new canteen or convert it to self-employment, some people will take care of it.

What Qin Yu wanted was only a result, so he was satisfied with the final handling opinion.

After hanging up the phone, Watson answered in a few minutes.

"Connect." As soon as the voice fell, Watson's voice came in.

This is not the contribution of Kirin, but the control of the Bluetooth headset by Nanoworms.

As a special creature with nanocomputer, semi-mechanical and semi-biological, it is easy to control a small Bluetooth headset.

In fact, if Qin Yu needs it.

They can also invade various electronic products like Kylin.

However, it is not as convenient as Kylin. You can swim directly on the Internet and reach any corner in an instant.

But Nanoworms also have their own advantages, such as the intranet of some confidential projects.

Kirin must be connected to the line to be able to invade, but using nanoworms...

Qin Yu only needs to approach the address where the intranet is located, control the nanoworms to enter the base, and invade the intranet.

So far, there is no level of confidentiality that can prevent Qin Yu's nanoworms.

"Boss, He Wu has already told me the situation, what do you have to do with it?" Watson is here to ask his opinion.

What to do specifically, here is naturally Watson's grasp of the overall situation.

But Yan Shisong, to what extent, Qin Yu nodded.

After all, her job is just an assistant secretary, and a decision like this is not something her rank and authority can make.

When you convey your opinions to Watson, the other party will have a bottom.

Then, the entire newly recruited management of Miracle Pharmaceuticals was washed out by one third.

It sounds a bit exaggerated, but the actual total number is only 9.

Three people were fired and prosecuted.

The positions of the three persons are logistics supervisor, accountant and office director.

To say, these three are also unlucky!

Thinking that the boss is a handy shopkeeper, and so busy.

That being the case, why not take the opportunity to make a little money for yourself.

Meal supplement every month, because you need to make up half of your meal.

Employees can't use it up naturally, what should I do with the money left in the card?

The accountant collects it separately, but it is a half-fold.

The employees complained, but they just passed away.

The locals still feel that this is better. Anyway, it's close to home, so sooner or later, it's better to eat at home.

Eat here at noon, it costs 4 yuan to make up.

After that, the cost of the meal that was exchanged for money is refunded, which is much more than the cost.

Once and again, every month is equal to a few hundred yuan more bonus. Where is such a good thing?

As for the small amount of food, there is no oily water in the soup, which is basically the same as water.

These are nothing compared to the benefits of getting them.

Therefore, this matter was concealed.

It was not until Qin Yu went to the cafeteria himself that the lid was lifted.

Why didn't other executives find out that Qin Yu was here and there was no one to accompany him.

This is about how busy Miracle Pharmaceutical's current business is...

Every day at 4 o'clock in the morning, UU reading [www.uukanshu.com](http://www.uukanshu.com) has someone standing at the gate with money waiting to open the door.

If several executives don't shut down, they won't even sleep at night.

People seldom show up in the factory because they are busy all day long.

Not to mention discovering that Qin Yu brought people to visit and cared about what he ate in the cafeteria every day.

In other words, it is the reason why we started too fast and the foundation is too weak.

In a few years, the business will be proficient, and the factory will have its own confidant and eyeliner.

This kind of situation that no one knows about when the boss comes, I'm afraid it won't happen again.

## **Chapter 567: High hopes**

The turmoil that occurred in Miracle Pharmaceuticals has aroused heated discussions among employees.

But this kind of craze has always come and go fast.

Within a few days, this hot discussion became cold, and no one was interested in answering the conversation.

It is the newly recruited canteen, which officially started work today.

The big guys are curious about whether there will be any new moths this time.

Qin Yu didn't pay attention to these trivial matters. At the moment, he was at the Miracle Headquarters, inspecting and accepting the headquarters building project with the supervisor of the 13th Division.

That's right, the Miracle Headquarters is completed.

It was three days before the agreed time, and it was delivered before May 1st.

"President Qin, look here, we are not satisfied with the design of our hall." The engineering director next to the supervisor was a little proud.

The Miracle Headquarters can be said to be his most proud work in recent years.

Whether it is the exterior design, the environmental protection concept and the use of internal space.

Including daylighting and rationalized layout, there is no trace of flaws!

Of course, this is just his own opinion.

How about the details, you have to wait for Party A's father to check and accept it.

Shisansi was boisterous in front of others, but in front of this young boss, he really had to curb his arrogance.

Who would let someone on him...

Ye Lao's trip to the abandoned city stunned many people.

Nowadays, the rumors outside are disturbing, and there are all kinds of talks.

But there is one thing that the big guys have in mind: There is nothing to provoke the young man, it's not easy to provoke!

Naturally, it is impossible for Qin Yu to do the acceptance of the entire building alone.

The third-party agency he hired had already entered the venue half a month ago, and today is just in time for the final acceptance.

Shisanshi not only didn't comment, but was so happy...

If there is a problem, it is better to solve it as soon as possible.

This is the most troublesome thing if you go back and settle the accounts after the fall and turn over the old accounts.

This is what the Thirteen Division fears most. At first you let him accept and check, and he pushes three things and four things...

What I believe in the abilities of the Shisan Division, how to be assured of you, and how to trust.

I came to you every other time, today there is a problem with this one, and the one with a flaw tomorrow.

But your subsequent renovations and changes are all done.

I don't know who's the problem...

Naturally, there is no small backing that can make the thirteen divisions suffer from dumb losses.

It made people tireless, and finally had to swallow the stuffiness into the stomach, not to mention how uncomfortable.

Like Qin Yu, he handed over everything face to face.

One is one, twenty-two, that would be better...

"Boss, the acceptance is over, no problem!" The team representative sent by the third party handed him the form.

It was covered with the other party's official seal and signed.

If there were any problems with quality, Qin Yu would have to trouble them when he turned around.

However, the quality of the Shisan Division is still trustworthy.

Otherwise, he wouldn't have to cooperate with each other over and over again.

"Watson." Waiting for Watson to accept the documents, he confirmed that there was nothing wrong.

Qin Yu and the director of the 13th Division shook hands and said goodbye: "Happy cooperation."

"Shao Qin, look forward to the next cooperation!" The other party really thought so in his heart.

Every time I work with Qin Yu, I feel very comfortable.

Money is given quickly and not much, as long as the quality, design and timing are the points.

There is absolutely no messy spearhead, picking bones in the egg, deliberately seizing the project money...

This kind of thing has never happened.

On the contrary, the money is refreshed, which makes people feel a little uncomfortable.

When thinking of the first cooperation and getting the money, the heads of the branch offices were all dumbfounded.

"I'm doing engineering now, is the money so easy to settle?" He forced a question mark face.

When Hua Sen was sent away and returned, Qin Yu was left in the entire building.

Oh, right!

There is also the uncle of the concierge outside, the people of the thirteenth division, who will keep the door for a few days.

Wait until the staff here is all set, and then let people go back.

"When will the recruitment start?" Qin Yu is very short of people now.

"Tomorrow at 8 o'clock in the morning, the talent market has already been contacted, and there is only our family." Watson said.

Tomorrow, the talent market asks Qin Yu to give Baoyuan, five tables at the door, and a resume.

Those who pass the customs go in, and each has its own place.

Find a place to start the second level of interview, then the third level, and finally the internship assessment for entering the company.

The executives here are handled by Qin Yu and Watson themselves, and he is not at ease with the others.

Headquarters will take over the overall situation in the future, and the responsibility it shoulders is of utmost importance.

Qin Yu is the brain of the entire group, so the headquarters is the neural network that controls all limbs.

Can you command like an arm and let all the power go together?

Coordination, mobilization, cooperation, etc., all depend on these people.

Therefore, this time he will go out in person.

"Xitong University and Polytechnic University, how do we respond?" As the two most famous universities in Northwest China, Qin Yu couldn't ignore the invitation.

"In this way, when the preliminary staffing work is completed, a job fair will be held in the two schools." Qin Yu also hopes to keep more talents in his hometown.

Don't mention talent every time, the bosses of Abandoned City can only sigh.

Can't keep people, it hurts to spread (sa head)!

"Then I will reply to the other party." Watson said.

"Yeah." After receiving Qin Yu's affirmative answer again, Watson took the phone and walked to the side.

"Director Ma, this is Watson...Yes, our boss has decided on what you said..."

Make an appointment with the heads of the two colleges and universities, and this day will pass.

Seeing that it was almost time for dinner, Qin Yu didn't plan to go home to eat.

Looking at Watson, Qin Yu asked, "Is there anything? It's okay to have a meal with me."

"Okay, do you want me to change clothes?" Watson thought it was for entertainment.

"No, just three of us!" Qin Yu wanted to eat steamed buns, and was going to have a meal at the old restaurant where Lu Qing took him last time.

Leaning on the back seat, Qin Yu closed his eyes and took a nap.

In fact, we are communicating with "Kirin" about the Internet company...

When it was about the point, a hand passed around his neck: "Boss, let me squeeze it for you!"

Watson thought he was tired and wanted to squeeze his head.

Qin Yu didn't refuse, he hummed in his nose and continued to discuss the server structure with Kylin.

Slightly cold fingers were placed on the temples and pressed gently clockwise.

Although there is no feeling of fatigue, it is quite comfortable to massage like this...

At this time, Watson was observing the boss's face at close range, 'no matter how many times I watch it, I'm so young.'

Getting along day and night, Watson didn't know him more than outsiders.

Under the young face, countless secrets seem to be hidden.

Watson knew that she shouldn't have such thoughts, but she couldn't help being attracted.

This fatal attraction led her to want to get close to each other to understand everything about him in depth.

The more you get along, the more you feel how good he is.

Genius is no longer enough to describe his achievements...

Although there are few geniuses, there are often.

But there are a few people who can reach the height of Qin Yu today, and who can make breakthroughs in different fields one after another.

No.....

Thinking of all this, Watson's heart became soft as sand.

The movements between the fingers are also a bit more frivolous and silky...

That handsome face got closer and closer, making her almost suffocated.

"Boss, here it is." A calm call made Watson awakened.

At this time, I was only one finger away from Qin Yu.

The other party's closed eyes opened again, looking at him indifferently...

"Sorry, boss." After hurriedly retracting his hand and retreating, Watson adjusted his mind and said: "I'm gaffe."

"Yeah." Qin Yu was silent.

He opened the door and was about to get out of the car. He turned back and said, "It's better to let Lao He send you back first. Okay, boss, I see." He Wu answered.

boom.

With the door closed, Watson, who straightened his waist, slackened as if he was suddenly punctured.

Leaning weakly on his back, his eyebrows drooped into silence.

The car started again, and Watson remained silently sluggish.

When He Wu stopped the car again, the slight shaking made her sober: "Thank you, Master He."

"... Secretary Hua." When she was about to get off the car, He Wu suddenly stopped Hua Sen.

When she turned her head, He Wu continued: "The boss has high hopes for you."

Watson froze for a moment, and then seemed to understand something.

A trace of blood reappeared on his pale face, and he chuckled and nodded: "I understand, thank you Master He!"

## **Chapter 568: It's now**

The next day, the talent market.

Qin Yu arrived early in the morning, and Talitha, who hadn't been seen for a long time, was with him.

Seeing her at first glance, Watson instinctively showed hostility!

It was the instinct to meet a strong enemy. Two women with equal appearances immediately noticed the threat of each other.

However, the moment Watson saw Qin Yu, he suppressed the hostility.

He Wu's words echoed in his ears: "The boss has high hopes for you!"

Yesterday's loss made her almost forget her goal.

She didn't come here to talk about love, just like the boss asked her to come in, nor was it to satisfy the carnal desires.

"Miss Talisa."

"Assistant Watson."

Looking at each other and smiling, the two accompany Qin Yu to their own table.

The entire talent market has been arranged according to needs.

There are three tables in each of the left and right opposites, which is the second interview for candidates.

There is a table in the center, and Qin Yu will sit in the middle: "Go ahead?"

Outside the door, test takers who had been notified a week ago crowded the streets.

Everyone held a stack of resumes in their hands, and frequently raised their heads to look at the table and door in front.

Five tables, with an interviewer sitting behind each.

This is the first hurdle they will face. Three passages are separated by isolation belts in the back gate.

I don't know whether the purpose of the diversion channel is the same, or whether it starts from there to determine a different future from each other.

"You said, can we go in?" Several older test-takers got together a little imaginatively.

I always feel that the eyes around me are full of doubts and ridicule.

At this age, I still came to interview with young people.

How bad is it that this kind of person can join the company?

Although the establishment of Miracle Group is short, you can take a look at the following subsidiaries, each of which is simple...

Energy breakthroughs, lithography machines break the monopoly, chip innovation breakthroughs, and medical miracles.

One by one, one by one, they have supported the reputation and legend of the Miracle Group in the northwest.

There is also the salary treatment comparable to that of the big companies in Zhili City. Whoever wants to say nothing is simply slapping himself in the face.

Except for those who have mines at home, when people are unhappy, they go home and inherit over 100 million fortunes. Where can you have the time to fight with them like social animals?

Because of this, apart from the accompanying test taker, the eyes of the other people are all a bit wary and hostile.

As far as the eyes can be, all eyes are enemies.

So wide and scared~

"The door is open." With a loud shout, the crowd began to crowd forward.

"Don't worry, I'm here first."

"I'll be there at five o'clock, where did you come from."

"Don't squeeze, don't squeeze, ah~"

Seeing the crowded and messy situation in front of people, the staff of the talent market raised their loudspeakers.

"Don't be crowded, everyone is in a good line now. There is only one company for today's interview. There is no time."

"Disqualification for unconsciously queuing, disqualification for unconsciously queuing..."

As soon as this sentence came out, the crowded teams spontaneously moved closer and crossed instantly, forming five long dragons.

The noisy quarrel and yelling also disappeared, and they all waited quietly for notification.

Seeing this, the staff wiped the sweat from their foreheads.

After five years of work, it was the first time I saw so many people applying for a company.

Those who didn't know thought it was a freshman!

"Okay, let's start now. Please follow the on-site guidance." Everyone started moving when the loud horn rang.

Submit your resume, answer the questions, and fill in some basic information that is not on your resume.

After you're done, the interviewer tells you if you've been through it, go through that passage.

Only then did they see clearly that the three passages were numbered separately, with number one in the middle, number two on the left, and number three on the right.

It seems to be the second situation, and the gap has been opened from the beginning!

But this is also normal. It is said that Miracle Group will recruit a large number of talents this time, from executives to employees.

Naturally, the interview process cannot be treated equally, and it is not surprising!

The initial test progressed very quickly, and few were brushed off, except for those who ran over to fill up the numbers with the luck.

Soon, people who passed the initial test filled the talent market hall.

Qin Yu's side was exceptionally deserted, and there was no one coming from the middle passage until now.

Qin Yu didn't worry, took out his phone and started playing.

This is a pain for Talisa and Watson, the boss has a small business, and he can't follow along with him.

If someone comes over and doesn't see it, isn't it a joke?

Talisa sat down with a mentality of "she can persevere, and I can't show weakness", sitting tightly, looking at the front of her with an elegant smile.

As soon as you turn on the notes, a short video of the twins comes up.

He glanced twice and swiped upward.

Challenge the straightest leg of the entire net, ah, quite white.

Go on, dress up... Not bad, not bad.

Continue, continue, continue...

This big data really understands Yu Ge's thoughts, all of them are beautiful women.

As for the data, it's better not to look at it.

Brother Yu just took a casual look, relieved fatigue, and kept his mood happy.

If this is an analysis, it is disgusting, how to carry out the following work.

It was almost nine o'clock when the first person to apply for the job arrived.

As the interviewer said, walking into the middle aisle, Su Shu only felt that the eyes around him were instantly focused on his body.

Their performance is like seeing a cherished animal, full of curiosity, and with an attitude of scrutiny.

"Why can she go in the middle?"

Such a highly anticipated scene made Su Shu, who was originally relaxed, also nervous.

Looking up straight ahead, three young faces came into view.

The founder of Miracle Group, Qin Yu.

His great secret, Watson.

The other foreign beauty, Su Shu has no information about the other party.

This made her feel even more nervous. She thought she had done enough homework, but she was still in the wrong place.

"The three interviewers are good." Stepped forward and bowed with a smile, Su Shu sat on the chair at the table.

The three people on the opposite side looked at her quietly.

Data search...

Qin Yu was searching for information about Su Shu on the Internet, so he didn't ask for it the first time.

He didn't speak, and Watson was naturally not easy to speak. As for Talisa, she was here to join in the fun and add heads.

"Oh, yes, this is my resume!" Su Shu, who was staring more and more nervously, decided to break the silent deadlock and take the initiative.

Handing over his resume, this trick really made the other party react.

The gaze on himself also shifted to the resume.

After a simple glance, I found that the information I searched for was matched.

Qin Yu's first impression of her was pretty good. It has become the norm in the industry to pack her resume these years.

Even fresh graduates understand, and as a result, an industrial chain from top to bottom has been developed.

In this general environment, Su Shu, who seeks truth from facts, seems very sincere.

"Hello, this is Qin Yu." Smiling and nodding, Qin Yu began to inquire about the other party's job hunting intentions.

Vice President, responsible for marketing, planning, product promotion and packaging design...

When you talk about it, you have real power positions, and they are all vital departments.

To really let her take care of this, she would basically be the third-in-command under the president.

In addition to the vice president in charge of personnel and finance, she has the greatest say.

However, Qin Yu knew that she did have this qualification.

Su Shu is not very young. He is only 26 years old this year. He graduated from the Department of Management of the People's Congress, majoring in business administration and marketing.

Concurrently majoring in art and design, he has a PhD/Master degree.

Prior to doing an internship in a state-owned energy investment group, he was highly praised.

She has received offers from many Fortune 500 companies. No matter who thinks, she should stay on top.

But Su Shu made an amazing choice and returned to his hometown with her boyfriend.

Oh, this hometown is her boyfriend's hometown, a waste city.

Qin Yu admired this buddy a little, for being able to bring such talents to his hometown and let him stay willingly.

not simple!

"You have been hired."

Qin Yu directly announced the result before reading the Watson data.

"But the specific title and management department will be discussed after entering the job.

Don't worry, as long as you have enough abilities, there are opportunities for you to make a big splash in the company. "

Qin Yu said without exaggeration that he is not too many to give him ten talents like Su Shu.

capable?

Good thing, as long as you can afford it, there are empty places.

I'm afraid you won't be able to do it blindly and waste time in vain.

"Then when can I join the job?" Although Su Shu was a little stunned, he still remembered what he was here for.

Qin Yu smiled slightly and pointed to the chair next to Watson: "It's now."

### **Chapter 569: old classmate**

What should I do if I have just joined the company and are forced to open a business?

Wait online, especially in a hurry!

Su Shu would be completely confused, sitting in the interviewer's seat, not knowing what he was going to do.

The truth is, there is nothing to do.

Just sit and act as your head, and observe the recruitment scene at other times.

Otherwise, watch Qin Yu play with his cell phone.

It's just that Su Shu always finds this weird...

Half an hour ago, I was still one of the test takers, sitting across the table.

Waiting for several interviewers to decide their future destiny!

Now, in just half an hour, his position has been transferred to the other end of the table.

From the lamb whose destiny is determined by man, to the God who rules the destiny of the lamb?

It feels... great!

Su Shu has never been a person who likes to be controlled by her. Now this position is more suitable for her character and positioning.

"Someone is coming." Watson prompted.

Another candidate came, in a suit and leather shoes, with a somewhat worried expression, about 40 years old.

It was the older guys who were worried that they would not apply for success.

"This is my resume." Putting the resume in front of Qin Yu, the other party wiped the sweat from his forehead with some anxiety.

Chu Ge is very nervous now, very very nervous.

Because he is not young, he can't stand up to the slightest waves in his life.

This kind of sadness of a man like him, there are old people at the top, and young people at the bottom...

No matter when you make any decision, you have to hesitate for a long time and look forward and backward.

Because he has a family and important family members to take care of.

We must weigh the pros and cons, consider the pros and cons, and make sure that any decision made is the best for the family and the family...

At least the best he can do, and it has always been!

Chu Ge has a job, but he has always been dissatisfied with his work.

More than two hundred kilometers away from home, the treatment is not very good, and more importantly, it is too busy.

Very busy, so busy that there are only three or four opportunities to come home a year.

This is not only dissatisfied with Chu Ge, his family is also dissatisfied...

Every time Chuge came back, he could clearly detect his wife's dissatisfaction, the child's indifference, and the parents' grievances.

And, this situation is intensifying over time!

If he doesn't want a solution anymore, Chu Ge knows very well that this family will be destroyed.

He will lose his wife, children, and the family he cares about.

So he came.

At this time, Qin Yu has read his resume.

Very rich and monotonous!

After graduating from a bachelor degree, he entered modern chemical industry work.

This work has been for nearly 20 years, until now, at this moment...

From a small clerk, to team leader, to director, deputy director, supervisor...

Chu Ge transferred almost all the departments in the company, and they were all first-line departments.

This is very nice!

Qin Yu is thirsty for talents like this.

"Tell me about your requirements." Qin Yu put down his resume and asked what he wanted.

Now it's not what it used to be, and the choice of job search is two-way.

However, one thing has not changed.

That is, this rule only applies to truly capable people, those parts that can be replaced at any time.

There will never be a choice, always...

"Uh, it's mainly salary." Chu Ge has already begun to relax.

Previously, he was just caring and messing up. It was related to his family and future, so Chu Ge didn't pay much attention to it.

Now, Chu Ge, who is calm and reliable, and works steadily in the old city, is back again.

"You give a count." Qin Yu crossed his fingers and looked at him with a smile.

"20,000, I can handle all front-line management jobs, no matter what the company needs.

I can accept flat management, humanized management, and flexible working system. "

Good guy, as soon as he heard him speak, he knew he was the old man.

Qin Yu shook his head and said, "I don't need a strong comprehensive ability, nor a flexible working system. Being responsible for the work you need to be responsible is the only thing I need to do."

"In terms of salary, I will give you 25,000. All the benefits are available. I hope you are worth the price." Qin Yu stood up and put his right hand in front of him.

Chu Ge's expression was startled, then he pushed aside the chair and got up, choking...

The chair smashed to the ground, and Chu Ge was like a panicked rookie. He held the chair and wanted to shake hands with the boss, making a big joke.

"Okay, don't be nervous, we will be our own in the future." Let him come over and take a seat, and the job fair will continue.

...

...

Looking at Chu Ge, who was also confused and didn't understand the situation, he was sitting in the position.

Su Shu is relieved!

This is no, someone is company with oneself, and no longer stands out as an alternative.

Su Shu's mood relaxed all at once, and his expression became a little more leisurely smile.

Recruitment continues...

Next, Qin Yu saw several job seekers again.

Because of a good start, he is full of expectations for these people.

Unfortunately, everything is destined to be impossible to go smoothly.

Several people didn't meet his standards, and they were all old fritters in the workplace.

The so-called "old fritters" is to be proficient in everything, to be able to eat, drink and play, and to brag.

Specialization: Engage in infighting.

Any means that can't get through with my family is silly and superb.

This kind of person is troublesome for Yu Ge to even look at it more.

Seeing that the time is approaching noon, the job fair in the morning is almost over.

Suddenly someone called out his name from the side: "Qin Yu?"

Turning his head to look, Qin Yu saw a familiar face.

"Wang Chao?" A loose suit, a tense face, meticulous care, and a bit too shiny hair.

It turned out to be his old classmate in junior high school, Wang Chao.

"It's really you. I thought I had recognized the wrong person." Wang Chao raised his hand a little awkwardly, trying to scratch his head.

I also thought that I had waxed my hand in order to apply for the job today, and then put my hand down.

"Come, come and sit down." Qin Yu enthusiastically greeted him by pulling apart the isolation belt.

Watson gave up his position with great vision and changed to sit next to Su Shu.

"Are you here to apply?" Asking him to sit down, Qin Yu looked at this old classmate a little surprised.

Everyone is the same group of students, so this shouldn't be all around the university.

Why did he come to work?

"Yes." Seeing the doubts of his old classmates, Wang Chao laughed at himself: "I dropped out of school after I finished high school."

"What? What happened at home?" Qin Yu didn't know much about his situation.

It's just that I probably heard that his family's situation is not good, but his studies have been pretty good.

He is cheerful and optimistic, and likes sports...

It's a pity to just give up like this.

"It's something, there's no big problem." Wang Chao smiled reluctantly, and changed the subject: "Well, you are high now, how about taking care of your old classmates?"

"Are you really going to apply?" Qin Yu still didn't believe it, so he gave up.

"Haha, depending on what you said, I'm here to open my mouth to you." Wang Chaoqiang smiled and concealed his loneliness.

If there is a choice, who wants to go to this step?

However, as a man, he has actually made a decision, so he will immerse himself in the goal.

Others, let's talk about it.

"Okay, what position are you applying for?" Qin Yu took over his job resume.

The above line of academic qualifications really says high school.

With such a standard as him, there is a high probability that he can only work hard in the factory.

However, the future is not without opportunities for promotion.

Allowing Qin Yu to look at his resume, Wang Chao smiled vainly: "You can see what position I'm suitable for... It's best to make more money."

Lack of money, Wang Chao needs a job that can earn more, nothing else matters.

All he has to do now is to make money and make enough money.

For the rest, it's not too late to consider when the problem is solved...

Putting down his resume, Qin Yu thought for a moment, and felt that he should give his old classmates a chance: "In this way, I have two positions that are more suitable for you... One is to work as a team leader in the factory, and UU reading [www.uukanshu.com](http://www.uukanshu.com) is to take care of his staff. Personal work.

The monthly salary is between 12,000 and 15,000, and there will be performance bonuses at the end of the year... In addition, I went to study to be an assistant. The salary is a bit low, but I can learn something. "

Qin Yu's words are white enough, one looks at the present and the other looks at the future.

Wang Chao's abilities are there, and it is impossible for Qin Yu to directly push him to a high position.

One is inadequate, unable to convince the crowd, and unable to complete the work.

Second, Qin Yu is also responsible for himself and his employees, and pushes such an individual to a post he is incompetent.

In all fairness, the relationship between them is really not so good.

To give him a chance, Qin Yu thinks he has done well enough.

## **Chapter 570: start**

The application process was abrupt, and Wang Chao himself did not expect it.

He understood Qin Yu's suggestion, but he was a bit undecided for a while...

Just in time, Qin Yu invited him to lunch together.

"I'm not going anymore, go!" Wang Chao smiled and explained: "I have something else here, that... what you said, can I go back and think about it, and I'll come back to you in the afternoon."

"No problem, you can come over at any time during the three days of the job fair." Qin Yu patted his arm and said.

"Thanks, I didn't expect that I would also have a day in the light of my old classmates." Wang Chao joked and joked, trying to close the strange gap between each other and get closer.

Parting ways at the door, Qin Yu watched him leave before getting into the car.

Su Shu and Chu Ge got into Watson's car behind, a sky-blue beetle.

The special girls decorated inside are full of puppets and small ornaments...

I found a noodle restaurant that looked cleaner, and I just had a little lunch.

Beef noodles, add meat, enough for a large amount.

After dinner, Qin Yu called a few people to his side: "The company distributes the car, any of you have ideas?"

"The public is good, but Sagitar is good." Chu Ge has a soft spot for the public.

"I think the neon system is more suitable, economical, and the follow-up maintenance saves worry and money." Su Shu considers it out of economical applicability.

Turning her gaze to Watson, she thought about it, and said, "Boss, how about Azure?"

"..."

Su Shu and Chu Ge looked at her at the same time, saying, 'No wonder they are the big secret, look, look at this realization!'

The company cooperates with Azure, how can I forget such an important thing?

The road that was originally quite wide made myself narrow.

Sloppy, sloppy...

"Well, cooperation with Wei Lan is a good idea." Qin Yu nodded in agreement.

Watson went along and said: "We can also promote our own batteries. After all, they are company-owned cars. We can't control privately purchased cars, but the company's car-distribution must be perfect!"

Perfection, not only to ensure the company's commuter car, but also to promote its own products.

Going bigger, the company's patriotic image also has.

Domestic products always have to be supported by someone to have a way out.

"In this way, you first breathe with the other party's secretary and see what it means over there."

This matter is good for both parties, and Azure has to show some sincerity and give an internal group purchase price, right?

Otherwise, with so many choices, why bother with the Azure family.

Just like the Kuafu battery pack, it's not the only way to share it...

The mobile terminal battery development is smooth, and after the samples are stable, there will be more choices.

Of course, Qin Yu was just talking.

The cooperation between Kuafu and Wei Lan is very happy, and it is still in the honeymoon period.

I believe this period will last for a long time...

Unless, Tian Kuafu or Wei Lan set foot in the field of the other party, there is a conflict of interests.

It's not too late to turn your face...

After all, there is always a feast in the world.

...

...

The next day, May 1.

The Chinese have ushered in a long holiday with joy.

The Miracle Headquarters was brightly lit and crowded.

Uh.....

It is a little bit exaggerated, mainly because the place is too big and there are not enough people to fill it.

However, everyone's enthusiasm is quite high.

The entire building was cleaned by a cleaning company hired by it.

The entire cost of land reclamation and cleaning was more than 1.8 million yuan.

Wipe it with your hand, hey, it's worth nearly two million dollars, clean!

"Ah, everyone is quiet."

In the lobby of the company, Qin Yu stood in front of the gate, pressing his palm to signal everyone to be quiet.

Everyone turned their eyes to the young boss, with a yearning and expectation for a new life in their eyes.

"First of all, on behalf of individuals and companies, I welcome you to the Miracle Group. You..." Qin Yu stretched out his hand and pointed forward, sweeping from left to right with a smile: "Everyone will be reborn here."

"We have advanced technology, strong funds, the best equipment and instruments, and top-notch benefits."

After a pause, Qin Yu stared at the crowd: "Of course, there must be the best employees."

"If you want to show your fists, want to pursue your dreams, want to show off your ambitions, and accomplish a career. Here... is your paradise."

With a dumb smile, everyone laughed in cooperation, and the tension that had just been raised in their hearts began to relax.

But then, Qin Yu raised his voice: "But, I want to remind everyone present, don't be left behind...Here, no one will stand still and wait for you."

"Only with constant surpassing and the determination to climb, don't one day when you are eliminated, you will come to tell me...Boss, I know I was wrong."

"Here, I want to tell you in advance. Now is your second and last chance."

"Some people say that a person has three opportunities in his life." Qin Yu raised three fingers, and suddenly clasped two again, only the index finger was raised high.

"I said...this is your best opportunity, because we will lead the times and change the world." Qin Yu's voice fell.

1 second, 2 seconds, 3 seconds...

Wow~

The applause was thunderous, and everyone's expressions were filled with excitement.

Several young staff members turned their arms around and clapped vigorously, as if they felt no pain at all.

This scene, inexplicably beginning ghost animals...

"Well, each of you will get to the post to familiarize yourself with the environment. Before you formally enter the job, you have a three-day buffer period!" Qin Yu said, turning around and taking off the work permit on his chest.

Drop~

The green light came on and the gate opened.

Qin Yu walked into the elevator room first and pressed the elevator button.

"Go to work!" someone suddenly shouted.

Then a group of people yelled "Go to work" and walked towards the gate, dripping~

Even they themselves didn't expect that one day it would be a happy thing to be a "community animal".

Going to work happily is a slogan.

Today it seems to have happened...

The originally deserted building welcomed its protagonists.

No one knows how many wonderful stories will happen in this building.

The employees of Miracle Company only have two days during the five-day small holiday.

But no one raised any objections and wanted to work from the heart.

Three times the salary for three days, and two days of paid vacation!

It's so cool, just ask if you like it?

Compared to where you go, people stick to people, head to head, 'travel. '

They feel that they drink coffee at the company, are familiar with the route, and adapt to the working environment. Such an arrangement is simply not too intimate.

Of course, the most important thing is to assist the relocation of the Kuafu Research Institute.

Those engineers are really enviable. They not only have indoor greenhouses in their area, but they can also enjoy the freshness of nature indoors.

There are also sky garden bridges, swimming pools, lounges and recreation rooms.

When an employee helped to move things, I went into the meeting room of the engineers...

Jigsaw rugs, various Lego blocks and puzzle games, lazy sofas and spinning top chairs thrown everywhere on the ground.

What's more, there are seesaws and tea inside...

They can make their own juices, drinks, and alcohol in it, which is strictly forbidden.

Any employee drinking alcohol during work must be recorded in the file.

Recording twice in a row will directly cancel the qualification for promotion!

I heard that the Internal Affairs Department of the President's Office is already developing a random inspection mechanism to conduct random inspections on employees from time to time.

As soon as these guys entered the company, they started thinking about how to do business!

Therefore, it has also been hated by employees in other departments of the company.

But the other side didn't care, the two sides were in a state of opposition from the beginning.

No matter how good it sounds, it's still incompatible!

All 'performance' is based on the suffering of other people.

With such a serious conflict of interest, how can it be possible to sit together and talk and laugh with one shoulder and back?

Of course, the Ministry of the Interior is not saying that it will investigate whoever wants to investigate.

Everything must have a process, a rule, and the most important thing is a boss nodded.

The President's Office of the Interior Department is directly under the jurisdiction of the President.

Without the boss nodding, no action is allowed.

If the chaos happens in private, it is deemed to have been specifically provoking internal conflicts within the company and deliberately engaging in internal fighting.

The entire internal affairs department is cleaned down which is a matter of one or two hours.

With the current capabilities of the Miracle Company, their reputation will be rotten when they release the news.

Want to find a satisfactory job again, in the next life!

So don't watch them gather in small meeting rooms as soon as they arrive at the company, and they seem to be eager to make trouble.

In fact, they are also formulating rules to warn everyone where the bottom line is.

At the same time, I also deliberately distanced myself from other employees...

The responsibilities and positioning of the Ministry of Internal Affairs were destined from the very beginning to not need to care about anyone's eyes.

It is also necessary to keep a distance from other departments and employees at all times. If you walk for too long, it will not be a good thing for each other.
