

## **Pinnacle 571**

### **Chapter 571: Chat to death**

May 7th.

Everyone is officially on duty, and the first job of the Ministry of Internal Affairs is to scan the information of the new employees first.

Let alone Qin Yu, the employees know it all themselves.

How many of them were sent by other companies, nobody can really tell!

The headquarters of Miracle Company recruits people, but all the subsidiaries are under the jurisdiction.

Have access to all company documents and secrets...

If there is such a good opportunity, if no one does something, it is really a trifle for the mall.

The senior executives were recruited by Qin Yu himself, and he knew the origins of these people, so he didn't worry about it.

But there are so many employees below, hundreds of people.

Qin Yu didn't have much time to investigate everyone's background and experience, and then analyze whether the other party might be a commercial espionage.

Besides, the boss is doing all the work. What do you want the people below to do?

Should decentralization or decentralization, make the best use of things is the truth...

"Boss, there are still too few people in the internal affairs department. Would you like to hire more people for us?" Nan Zhonghao, the chief of the internal affairs department, stood at the desk with a smiley face.

With five short stature, sunken eyes and a big nose, the facial features of the whole person have a strange feeling of incongruity.

Coupled with individuals less than 165cm, ordinary people will only find it funny when they see it.

Don't look at his humble appearance, but he has real abilities.

A retired veteran, he only did one job during his service: the interrogator.

More than 20 years of interrogation experience has allowed him to develop a pair of eye-catching eyes. Based on this alone, no one is more suitable for the position of head of the internal affairs department than him.

Besides, this man can bend and stretch, and he has a hippy smile all day long, and he doesn't seem to be threatening at all.

This kind of person is the best eye and knife...

The person was introduced by He Wu.

Knowing that he needed such a role, He Wu disappeared for a day and brought people directly in front of him.

Only then was there a conversation between the Ministry of Internal Affairs and the immediate future.

"There are so few people in the headquarters. You have 50 in the Ministry of Internal Affairs, plus 51 of you. Isn't that enough?" Qin Yu asked indifferently, looking at the other side's uncoordinated face.

Nan Zhonghao grinned, his expression even more strange: "Hey, who is too crowded?"

"You don't think so, other people should have opinions." Qin Yu frowned, and said with a smile: "Just like the number 50, it's enough to use it well."

Seeing that he still needs to speak, Qin Yu preemptively said: "This is the case, there is no discussion!"

Seeing his resolute attitude, Nan Zhonghao smiled angrily, turned around and took the door to go out of the office.

The room became quiet again, and Qin Yu couldn't help squeezing his forehead.

After the headquarters was officially put into operation, the exchanges and contacts with various subsidiaries were endless.

Qin Yu has experienced this in the past two days, what is meant by being busy from early to dark.

After finally getting off work, he was busy until early when he returned. He hadn't had a good night's sleep for three days in a row.

If it weren't for his amazing physical strength now, Qin Yu would really be afraid of hitting the front page of the hot search.

The young entrepreneur died suddenly from overwork. Experts suggest...Balabara!

I rubbed my head for a while and felt that it was not right.

Qin Yu thought of Watson's technique that day: "Wason, come in."

Using the inside line to call in Hua Sen outside the door, Qin Yu lay back and said: "I'm a little tired, press it for me!"

Watson did not speak, came to stand behind the chair, and directly pressed.

There was a bit of hesitation in his expression, as if there was something to say, but he didn't know how to say it.

"In a hurry?" Qin Yu asked suddenly, who was enjoying a massage.

Watson stopped, and then continued to press: "It's a bit."

Seeing that every position was occupied, Watson was still a small assistant.

She felt a little uncomfortable in her heart, 'even if the boss feels that she is not capable enough, she should give herself a chance to practice, right?'

"Don't worry." Qin Yu said with a light smile: "I have arrangements for your going!"

"Boss, can I ask where I should go first?" Watson's heart was hot, and the department that was still short of people passed through her head automatically.

After thinking about it, I realized that there seems to be no location to choose from.

Several deputies are there, but they have little real power.

Said to be a deputy, in fact, is to lay hands, deal with some chores, and mediate conflicts between employees.

This is not in line with Watson's future planning and positioning, and it doesn't look like she should go.

However, whether to go or stay is not for her to decide in the end.

It still depends on the boss's specific arrangements...

"It doesn't need to be general, the first vice president, in charge of personnel and finance." Qin Yu throws the topic away, and the Huasen people freeze.

Of course she knows that the candidate for the vice president of personnel and finance has not been finalized yet.

But she thought that these two bosses would be personally responsible.

Never thought, it was actually prepared for myself...

This surprise came a bit big, before Watson really didn't dare to think that he could reach the sky in one step.

So, when I came here all of a sudden, my mind was a little confused!

"Boss, wait for me to slow down." After a few steps back, he leaned against the wall and calmed his head with his hands for a long time before Watson could believe it was true.

"Boss." Looking at Qin Yu with complicated eyes, Watson asked: "You really don't worry about it."

"Don't worry, you can live with it. Besides, there is a president on it. If there is no such thing as my boss, what are you afraid of?" Qin Yu said.

"President? You don't take the position of president personally?" The information in his words surprised Watson again.

"Do you think I am suitable?" Qin Yu asked jokingly.

Thinking of his past style, Watson reluctantly chose to remain silent.

It is definitely wrong to say that the boss is incompetent.

But to say that he was diligent and conscientious, and he was a thousand miles away.

So, it's better to shut up!

"The new president...Do I know?" Watson was a little curious about the candidate for the president.

"Knowing, not only knowing, you have also dealt with!" Qin Yu raised his head and smiled, and said the name of the president candidate.

...

...

Deserted city, international airport.

Xu Hao got off the plane and didn't make a stop, so he went directly to the scheduled online taxi.

"Master, Miracle Company." Xu Hao put his backpack beside him, his tone a little hurried.

"Young man, are you here to apply?" The driver turned on the chattering mode with a direction.

"Yes, haha." Xu Hao responded with a smile.

"Then you are late, the recruitment of Miracle Company is over." The old driver is well informed, and there are only a dozen in the group.

There is something going on every day, I know it right away.

The job fair held by Miracle Company in the talent market is a big event for the abandoned city.

Many families want to trust relationships, find someone to stuff money, and send their children's relatives and friends inside.

Let's not talk about the success or failure, anyway, there is a lot of trouble.

"I entered the job directly and I have already interviewed." Xu Hao replied.

I got mixed up with Qin Yu every three to five. When it comes to interviews, I have realized that there are now hundreds of games.

"Then the relationship is good, what position do you apply for?" the driver asked curiously.

"President, I'm going to be the boss." Xu Hao laughed loudly, sounding like he was joking.

The driver didn't take it seriously, and said cooperatively: "Oh, that's terrible, then I am not a big man."

"You're polite, you're welcome, just make a discount." Xu Hao said.

"This really doesn't work, the platform doesn't listen to me." The driver quipped.

Xu Hao thought for a while and smiled: "Is it enough to just buy the platform?"

"..."driver? ? ?

Brother, I'm talking about you as a human being, how about you and me as a monkey?

Bought the platform... Is this what people say?

I want to have that ability, so what kind of guests are you leaving here? You will experience life as me, huh?

Seeing the driver's face in a black face and not talking, Xu Hao's heart shook.

Yes, let's talk about the sky by myself!

Wordless all the way, Xu Hao wanted to be alone with the driver as soon as he got off the bus when he got there.

Hearing the sound of 'boom', the 1.4 engine just made a roar of V12.

Gone, it's gone.

"Thank you, ah!" Xu Hao stood still and couldn't hold back his words.

You can pay attention next time. UU reading [www.uukanshu.com](http://www.uukanshu.com) can't treat everyone as its own. Does the platform mean to buy it?

Why don't you find a few more people and buy them together!

"Hey, you have to control this mouth next time." Xu Hao patted his lips with his hand, and walked into the door with a bag full of emotion.

"Hello, what can I do?" The security guard saluted and smiled at the registration desk in front of the gate.

"I'm here to work, Xu Hao..." After explaining something to the security, the other party called the secretary desk.

After receiving Watson's confirmation, he saluted again and opened the gate for him.

"It's pretty good." The security guard's dedication to his duties gave him a sense of expectation for his future work.

## **Chapter 572: Options and reserves**

Seeing Qin Yu in the President's Office, Xu Hao was not at all polite.

He bypassed the desk and pushed aside the brand new ergonomic chair to sit on it: "Ah~Comfortable!"

"Born to be the boss' life!" Qin Yu teased deliberately.

Xu Hao said shamelessly: "Yes, we were born to command people, do other toothaches!"

"Your face can't be hit by a moving car." Qin Yu shook his head and complained.

"Hey, these are all trivial things." Xu Hao licked his face and smiled, jogging to Qin Yu: "Brother Yu, let's talk about the treatment first."

"An annual salary of 6 million, it is auspicious." Seeing Xu Hao as if he hadn't heard, Qin Yu knew that he was not so easily satisfied: "After working for a year, I will give you 1% of option stocks."

Option stock is a kind of right. Within a prescribed period, the operator who owns the option can purchase the company's stock at a certain price (a contracted share).

Of course, if the operator is not optimistic about the company's future development.

You can also choose not to use options and not to purchase company stocks.

After the time limit expires, the option is void!

The opportunity has already been given to you, and if you want to buy the company's stock again, you can only find a way to buy it on the market.

"Fuck, really?" Xu Hao flushed with excitement when he heard that he could buy a stake in Miracle Company.

From the preparation to the formal operation of this parent company, Qin Yu did not miss out on the relevant shares.

From the beginning to the end, it is clear that we must fully hold the shares...

I thought I had no chance to be led by Brother Yu again this time, who ever wanted to take a turn for the better, haha...

"Why?" Qin Yu raised an eyebrow and said coldly.

Xu Hao raised his hands in an instant, and said with a hippie smile: "No, Brother Yu, kneel, really kneel!"

"Let's say it's fine, work for a full year, 1%." Xu Haoyi finished speaking, turned and sat in the position of the boss again.

After shaking back and forth, he pressed the inside line: "Secretary, give me and Dong Qin a cup of tea."

Without waiting for the response from the other side, Xu Hao hung up and said, "Brother Yu, do I have a secretary?"

"..." Seeing his silly smile, Qin Yu regretted his decision a bit.

Or, throw him back to Hudu again, in exchange for someone?

...

...

Substitution is impossible, although Xu Hao is out of shape.

But as long as it is something that is seriously explained, what should be done, he can do it properly.

No stumbling, time after time!

The miracle department came from nothing, and Xu Hao ran a lot and took a lot of effort.

It's him who manages the management inside and out, and socializes.

Which time has there been a mistake?

If not, how could Qin Yu call him and give him a 1% option.

Regardless of only 1%, Miracle will sooner or later become a stronger business empire than Apple and the three-pointed star.

By then... you will know how valuable and energy this 1% is.

What's more, the future of miracles is much more than that.

The appearance of Xi He gave Qin Yu new ambition and ideas.

As a man, you must have a long-term vision.

How can you just look up at the one-acre three-point land in front of you...

In the vast galaxy, there is so much wealth and treasure.

Our goal is the stars and the sea. This is the courage and long-term vision that a man should have.

By the way, should Xi He also come back?

Watson came in with two cups of tea and opened the door.

Seeing that it was her, Xu Hao quickly stepped forward and took the tea tray: "Oh, I thought it was someone else! Secretary Hua, you said I couldn't make it myself."

In the future, the boss has given a lot of face, and Watson will naturally retaliate: "It is my honour to serve Mr. Xu and Dong Qin. Besides, this is not the first time I have done this little thing."

"That's different, just serve Qin Dong." Xu Hao smiled, meaning something.

"Okay, you two should stop praising each other." Qin Yu got up and disrupted their business bluffs, and said directly: "I'll leave it to you here. Watson will have a new position from tomorrow."

"The first task is to set up the server first, I have a great use, I want to as soon as possible..."

"For the specific situation, you two will match up by yourself, I will go first." Qin Yugang recalled Xihe through Qilin, and now he must find a place to put the 'diamond'.

"Boss, I'll give it to you." Watson followed.

"Don't give it away, quickly clarify the work, and let the company run normally as soon as possible." Without a leader, there is a pan of loose sand below.

Fortunately, everything is still in the docking, so I am not in a hurry for a while.

"President Qin."

"Good Mr. Qin."

"President Qin."

Qin Yu nodded and smiled and walked into the elevator, using the phone to inform He Wu that he was down.

At the door, He Wu had parked the car, opened the door and waited for him to get in the car.

"Go to Kuafu first." Qin Yu had to use the previous warehouse to store 'diamonds,' which happened to have a reasonable explanation for the previous seal.

Inadvertently discovered a brand new mineral, before its safety was determined.

Qin Yu first sealed it in the warehouse to ensure safety and confidentiality.

perfect!

As for this kind of ore that has never been discovered before, where was it found?

Sorry, trade secrets, no comment.

When he arrived at Kuafu, Qin Yu asked He Wu to go back first, leaving the car behind for himself.

The research institute here has become sparse compared to the bloatedness of the past.

Familiar faces are basically invisible, like Cui Geng's group, Jing Yuan's second group, and the third group under the charge of Shi Cui soon after its establishment, all moved to the headquarters.

Except for a few old employees, all those who stay here are interns.

The old employees also stay here, are responsible for bringing new people and guiding them on the progress of the experiment and work flow.

The personnel is not fixed, and it is rotated every three months.

Every three months, the three teams will send two team members here to be mentors. By the way, change the environment so that they don't forget the previous difficult conditions.

Compared with the new, bright, clean and dust-free experimental environment of the company headquarters, the conditions in the old laboratory here are indeed difficult.

Qin Yu circled inside, but couldn't see Wang Chao's figure.

This made him a little bit disappointed, but he was not surprised.

Wang Chao showed a lack of money, and making money faster naturally means that the pipeline will come faster.

As long as you are capable, you can get more than 20,000 yuan a month.

In his case, the quick money on the production line is obviously more in line with his situation than the accumulation of learning at the research institute.

Although losing an opportunity for improvement, it is not without hope for promotion in the first line.

As long as you work hard, Miracle Company will not treat any employee who makes a contribution.

What's more, the other party is already an adult and knows how to weigh the pros and cons and make the best choice for him.

Qin Yu hopes that one day in the future, he will be able to see him at the group executive meeting.

By that time, there may be more common topics between them!

right now.....

It was just sitting together with a twist. Apart from talking about the second and rebellious in junior high school, all that was left was embarrassment and silence.

Throwing a happy little thought, Qin Yu came to the warehouse alone.

Ask the administrator to leave first, open the warehouse door that was used before, and Qin Yu closed the door from within.

"Turn on the lights." Pop, the lights come on.

Qin Yu glanced at the empty warehouse, and left again after spinning a few times in it.

When he came back, there were hundreds of green wooden boxes at the door of the warehouse.

He glanced at the empty warehouse, and then at the box behind him.

Qin Yu shrugged helplessly: "Go ahead!"

Picking up the tabs on the side of the box with one hand, two at a time, Qin Yu leaned against the wall to neatly lay these boxes on the ground.

By the time he was finished, more than an hour had passed.

It's getting dark!

It's just that the company hasn't completely quieted down yet.

There are also employees working overtime, and the production line is still busy...

With nothing to do, Qin Yu stayed in the warehouse and swiped his phone.

I haven't been fighting for a long time, just taking advantage of this empty space, the wind and rain also hurt people, but there is a reward of 10 million fighting tooth coins is useless!

If it weren't for today, Qin Yu might have forgotten it someday.

After all, he now has fewer and fewer days to watch live broadcasts.

The platform update, various new benefits and functions, Qin Yu shut it down with a glance.

I first glanced at the anchor I was following, Cheng Xiyu was not there...

Two days ago, she said that she would continue to film "Xia Guo on the Bite of the Tongue", which should be in the process of recording now.

Li Shuangmeng was broadcasting live online, and Qin Yu was about to click in.

A message from her popped up in a private message: "Boss, it's been a long time since I came to find someone. Have you forgotten their small waist..."

A gal of anger came oncoming, this woman...

I really used my own advantages to the fullest. Brother Yu can't do it without hard work!

### **Chapter 573: Super super super big diamond**

Li Shuangmeng was blowing water in the live broadcast room, chatting with fans about her parents.

The soft voice and the smiles make people dream.

I don't know how many Isp drools in front of the screen.

Just when Li Shuangmeng was about to dance a song to add to the excitement.

The avatar that I have been following since then is bright!

Ouch, our eldest brother is here.

What kind of dance is this? Hurry up to greet your eldest brother to come to the table and talk about the takeaway by the way.

Since experiencing the happiness of Big Brother, Li Shuangmeng will never forget it again.

In the past few months, she has flown to Hudu several times.

But every time the eldest brother was busy with things, he couldn't spare any time, which made Li Shuangmeng feel depressed and endocrine disorder.

However, the eldest brother is the eldest brother!

Knowing that I don't have time to spend time with myself, I have to find something to do for her.

Li Shuangmeng has only one hobby besides live broadcasting.

Buy noodles...

Women, who can resist the temptation to shop.

No, I haven't seen each other a few times, but I have received a lot of red envelopes.

Three to five million more, ten to twenty less...

In short, Li Shuangmeng would definitely not let Li Shuangmeng run away.

In the words of the eldest brother: "As long as you are obedient, this little money is nothing."

Sent a private message to elder brother, Li Shuangmeng waited and waited...

The emperor's wind and rain also hurt people to visit the live broadcast room.

coming!

"Welcome to Brother Hurt, Brother hasn't been here for a long time." Li Shuangmeng's eyes lit up instantly.

The barrage also began to mess up: "Treat Big Brother is different!"

"Fart, you can do it if you have money."

"Don't envy mandarin ducks or immortals, envy big brother every day."

"Guide, you will be the big brother!"

"Look, there is an honest man here, come and bully him."

"Guide: Are you teaching me to do things?"

"What are you worrying about? Brother and the instructor have long known my depth, and I know your length."

"Go away, Lao Tzu's dream is shattered again."

"Look at it, the second list is gone, hiss, I feel sorry for my big brother."

"I take eight hundred yuan a month, and I feel sorry for my big brother hundreds of thousands. Is the bricks on the construction site not hot enough today?"

The heat in the live broadcast room is long and fast, and even the backstage is aware of this abnormal curve fluctuation.

Check it again, the wind and rain also hurt people.

Oh, that's all right.

This heat is nothing to the eldest brother, and he will have to rise later.

Anyway, professionals understand the market.

I didn't say a word here, 50 rounds of super fire warm up the field first.

After it was done, the eldest brother spoke unhurriedly: "Coordinates."

Li Shuangmeng's face bloomed, and she smiled brightly: "I'm at home, what about you, big brother?"

Wind and rain hurt people: "It's the same."

"It's been a long time since I saw my eldest brother. I missed my eldest brother." Li Shuangmeng moved her hair enchantingly, and the number of barrage instantly increased several times.

"Fuck, open the appointment in public?"

"I don't believe it, I don't believe it, meeting is just to eat, drink tea, woo..."

"Yes, the anchor has a hard time eating!"

"Bao, did the eldest brother let you scream all night and your throat hurts? I soaked honey grapefruit water, you remember to drink it, ooh..."

"Surprised, please tell your story upstairs."

"There is a picture, miserable!"

Li Shuangmeng is also paying attention to the barrage. The barrage is right in front of him. It is difficult to pretend to not see it.

However, she would all be dumb.

I only chatted with my eldest brother, and occasionally took the time to answer a few irrelevant questions.

Ignore the rest!

Don't blame her for the reality, the whole live broadcast room is added together, not enough for the big brother's fingers to leak out.

After broadcasting all afternoon, the gift is enough for 10 super fire.

Big brother is 5...

Don't worry, it's raining again, big brother.

200 shots were super hot and walked away, "Thank you, the most handsome hurt brother, love you!"

Li Shuangmeng blew a kiss to the camera, and couldn't close her legs happily.

I'm already looking at the ticket in private, and I want to airborne to the abandoned city, and give my eldest brother a lively song and dance.

At the other end of the video, I saw the reply from Li Shuangmeng who was scratching her head.

Qin Yu closed the video call with a smile, and made a clear new plan for tomorrow night.

Put away the phone, it was already 10:45 at night.

He pricked his ears and listened, the factory was quiet.

The workers are off work, and Qin Yu also opened the warehouse door.

Turn off the light, step back a few steps outside the door, make enough space, and the breeze is blowing...

After the wind disappeared completely, Qin Yu reentered the warehouse and closed the door smoothly.

At this time, the factory fence.

The man holding the SLR and equipped with an ultra-telephoto lens is pressing the shutter quickly.

The camera frequently switches the angle, and strives to capture every frame clearly.

In the shot, Qin Yu walked out of the warehouse and backed away, the moment he stepped aside the door.

Distorted ripples appear in the air, fleeting, like some kind of visual disorder.

But when he looked down at the photo, he found that the picture in the record did indeed have subtle ripples.

"What's this?" the man murmured doubtfully.

There seemed to be a voice in his heart telling him that he had discovered some great news.

Just when he decided to leave and go back to figure out what was in the picture.

The heart twitched suddenly, and the man clenched his chest with a grim expression.

The camera fell, and the weight it brought caused him, who had lost his body control, to carry it towards the wall.

Boom~

The man fell to the ground and knocked on his head.

A painful moan caught the attention of the security guard. Soon, an ambulance drove into the factory area and took the man away.

However, the SLR camera originally hung on his chest was detained by security.

Ambulances naturally don't care about these, want a camera?

After the man's rescue is over and he is sober, he will come to the company to ask for it.

The security guard will give the things to his head, and what to do later is what the leaders above worry about.

The security guards went back with their cameras, the patrol, the guard.

No one noticed that there was a strand of dark hair in the air that was drifting towards the storage area.

Recovering the Nanoworms sent out, Qin Yu found him as early as the other party appeared.

Waiting for the other party to pick up the camera and start shooting, and it happened to be stuck at the time when the Xihe returned to sail.

This made Brother Yu had to be a little worried!

So, they sent Nanoworms to create a little trouble for the other party, and eliminated the photos in the SLR by the way.

The entire memory card has been destroyed, leaving no trace!

As for the sneak shots, it's just an occasional heart attack, so you have to be careful when you go out in the future.

Thrilling behaviors like climbing up and down, it is better to come a few times less.

In case of bumps, it would be bad.

With this lesson, I will be cautious in the future, if I can't say I can live a long life.

No thanks!

In the warehouse, the invisible Xi He appeared.

When leaving, the two mechanical arms, which were folded on the side, were bent inward and opened diagonally.

In the middle of the mechanical claws above the cabin, there is just a huge transparent diamond.

That was one of the harvests of Xihe's trip.

Xihe collects ore outside, and when collecting information, only samples the size of the finger cover will be kept, and the coordinates will be recorded and returned.

There is a storage compartment at the bottom of the abdomen, but it can only store objects with a head.

Super super super big diamonds with a diameter of more than 5 meters like this can only be carried back with a mechanical arm roughly like this.

Under the control of Kirin, the robotic arm puts down the huge diamond.

From the outside, it is no different from diamonds.

Clear and flawless, with amazing purity.

However, after Qin Yu used Nanoworm's electronic eye to observe and analyze.

Suddenly, it was discovered that there was a liquid flowing like a flowing cloud inside the diamond body.

The speed is so fast that it seems to be still, crystal clear, gorgeous and dazzling.

The liquid spar is in hand.

## **Chapter 574: 0 food?**

A huge crystal with a diameter of more than 5 meters and a weight of about 20 tons.

Whether it is transportation, storage or utilization, it is inconvenient.

Fortunately, Xihe has an ultra-high frequency vibration particle knife, which can perfectly cut liquid spar.

The principle is simple, the ultra-high frequency vibration particle knife is a stable particle accelerator, which automatically peels off the object from the particle and molecular level by heating the high-frequency vibration particle.

So as to achieve the effect of cutting the object...

In reality, this technology is not a tall product.

It just changed its name, called Vibration Cutting!

The most common thing in daily life is the vibrating cutter in the cake room.

A whole piece of cake can be separated into the required size without scumming.

There is also medical surgery, etc...

But it wants to be as stable as the ultra-high frequency vibration particle knife used by Xihe.

Human technology still has a long way to go.

When the particle collision technology becomes extremely stable one day, those cold weapons that only exist in movies and animations may actually appear in the human world.

Looking at Xi He's robotic arm, he cut the liquid spar in a uniform proportion.

Then use another robotic arm to pack it into the box, and close the lid very intimately.

Qin Yu has a deeper understanding of its work efficiency and comprehensiveness.

The black technology contained in this mining machine is far more than what can be seen...

"That's right." Qin Yu suddenly had a thought in his mind.

Since the liquid spar can absorb the residual energy free in the air and space, can you also have the same ability?

After all, he can no longer be simply counted as a human being.

Have you ever seen any human, like Qin Yu, that has tens of billions or more of mechanical insects in his body?

"Unable to calculate..." Qilin.

"...In other words, does the use of liquid spar pose a threat to my personal safety and life?" Qin Yu changed his words and waited for its answer.

"Analysis shows that it will not pose a threat to the life safety of the host." Qilin.

With this answer, Qin Yu was relieved.

"If I want to absorb the liquid spar, what can I do?" Looking at each fist-sized transparent crystal, Qin Yu picked up one and threw it in his hand.

"Eat, control the decomposition and swallowing of nanoworms." Kirin.

"Edible?" Qin Yu didn't understand.

"To put it simply, it is to eat." Qilin's answer was straightforward enough.

Eat it directly, the nanoworm will decompose the liquid spar and use it effectively.

Compared with the release of millions or millions of nanoworms, which are easily exposed, eating is not unacceptable.

Looking at the fist-sized crystal in his hand, Qin Yu walked slowly towards Xihe.

Five minutes later, the crystal in Qin Yu's hand disappeared.

Instead, there are countless "crystal pieces" that are as shallow as cicada wings, which look like transparent green arrow gum.

It's only half the length, and it's cold in your hand.

Looking at the light, it disappeared like invisibility.

Only the real touch of the fingertips reminded Qin Yu of its existence.

The thickness of the wafer is only 0.1mm, plus transparency, it is really difficult to detect its existence under the reflection of light.

Trying to put the chip in his mouth, the secretions in the mouth increased, the mouth melted, and a cold liquid slipped into his throat and disappeared in his body.

Touching the surface of his body with his hand, Qin Yu asked Qilin to check his health.

It turned out to be realistic, no different from usual.

The crystal just disappeared without causing any reaction.

"It should be because the number is too small, and the accumulation becomes more..." Qin Yu once again took out a chip and threw it into the mouth accurately.

Melt, swallow.

Qin Yu was extremely skilled, as if he had been doing this for a long time.

"Kylin, monitor my body data all the time..." Remind Kylin to monitor his body data and health status in real time, and remind himself if there is a problem.

Qin Yu picked up a chip from time to time and threw it into his mouth.

He didn't really like snacks since he was a child, but he didn't expect that he would have more snacks for recreation as an adult.

It's just that no one can eat this kind of snack except him.

If you are a normal person, it is impossible to melt the chip in your mouth, let alone swallow it.

...Then I am afraid that I will die!

There was no one at the moment, so Qin Yu just put a few hundred chips on the box and threw one into his mouth from time to time.

But in daily life, he can't go anywhere with a few chips?

I have to find something to hold his new ration to avoid unnecessary misunderstandings...

"The activated carbon in the research institute can peel off graphene, and Xihe can use it to make a suitable box with the effect of isolating energy..." Kirin.

After getting a hint from Kirin, Qin Yu thought of Shi Cui's 'regenerated activated carbon.'

After research, it is found that there are curved nano-graphene self-assembled with carbon atoms in the body, which is the so-called natural graphene.

This new study found that Shi Cui became famous in the research institute.

The three newly established teams have also attracted enough manpower for this reason.

Shi Cui even avoided the embarrassing situation of becoming a polished commander.

The third group has just been established, and if you want to support the stall, you still have to rely on one group and the second group to deploy manpower.

But if no one actively applied for the transfer, even Qin Yu would not be able to force them to abandon the project at hand and invest in a new project.

All over again...

As the boss, he needs to consider the whole problem!

The three groups are important, but Cui Geng's group and Jing Yuan's second group are responsible for the projects that are equally important to the company.

Qin Yu should also give due consideration to the views and feelings of the two...

It's not always good to clean up the elite of the first group and the second group for the third group.

Let the two polished commanders do the remaining work by themselves!

How about saying that being a boss is difficult?

Fortunately, the new discoveries of the three groups were impressive enough, and 19 people took the initiative to apply for transfer.

Qin Yu didn't have to intervene personally to avoid an awkward confrontation...

Jing Yuan is not a good-natured girl, if she is really anxious, she will be able to block Qin Yu in and out of the office.

Then there will be a good show...

As his mind turned, Qin Yuren had already arrived at the door of the laboratory.

After returning to the warehouse with enough 'regenerated charcoal,'

Xihe once again performed its superb operation and comprehensiveness, on the console behind the cockpit.

An inky black box with beautiful stripes gradually took shape.

The box is 12.2cm long, 5.3cm wide, and its thickness does not exceed 0.7cm.

The overall fit is seamless, and it looks like a solid black plate.

When Qin Yu pressed his finger in the middle position, a faint halo appeared on the surface.

Then, an imperceptible slit cracked around the box.

Qin Yu took off the lid and put the 'chip' into it with satisfaction.

There are divided card slots inside the box, and each card slot is exactly the size of a chip.

Each slot can hold 4 chips at the same time. There are 30 such slots, which means that Qin Yu can carry 120 chips at a time.

Even if it was eaten as a snack, it was enough for him to eat for a few days.

Re-fit and lock.

Qin Yu put the snack box made of graphene into his handbag and put a mobile phone in.

It's not too big or small, and the weight is very light!

If you want to install cash with these two things, you will look a little bloated.

Fortunately, the domestic mobile payment is sufficiently developed, and you only need to prepare some change for emergency!

"How long will it take to complete?" Watching the two robotic arms interlacing constantly.

Qin Yu, who had nothing to do with cutting, sorting, was a little boring.

In the middle of the night, Brother Yu stayed with a machine and a stone.

Even if he said this, anyone would dare to believe it?

With the exception of Xu Hao, he must ask with a wicked smile: "Brother Yu, is the machine fun?"

This dog thief, there is no serious business in his mind.

From the inside to the outside, the pure yellow race is very mellow!

Knowing that it will take 26 minutes to complete, Qin Yu glanced at Richard Bone King on his wrist.

It's 3 o'clock in the morning. What should I do afterwards?

Lu Qing must be unable to find She is home today, and Qin Yu is not good to wake up the whole family.

It's not impossible to go home, but I'm used to sleeping.

Yu Ge didn't feel comfortable with this sudden change.

Teacher Song...

There will be classes tomorrow, and I will run over in the middle of the night and have to toss for a long time. How to teach the students tomorrow.

Jianfa's two golden flowers are meaningless alone.

It takes too much time to get the two together, forget it...

After thinking about it, Qin Yu didn't find a suitable one, which is outrageous!

Helplessly flipping through the contact on WeChat, Qin Yu's fingers suddenly stopped, and a strange and familiar figure appeared in his mind.

'Scan~' Looking at the data that appeared in front of him, Brother Yu smiled.

Hey, why did you forget her?

## **Chapter 575: Would you like to add more?**

In a shared house, Zheng Caiying sleeps Zhengxiang.

A harsh ringtone suddenly came from the pillow, making her frown impatiently.

His eyes opened a gap and found that it was still dark outside.

Zheng Caiying glanced at the phone, 3:20 in the morning, "Neurotic?"

Closing her eyes cursely, Zheng Caiying is about to hang up and continue to sleep.

Suddenly thinking of the scanned number display, a clever slammed in my mind, and the person sat up directly.

"Qin Yu..." Astonished, surprised, joyful, and ashamed.

Zheng Caiying's expression is very wonderful, even better than changing her face.

Gritting his teeth viciously, squeaking, and squeaking a few times, Zheng Caiying pressed the answer button: "What's the matter?"

Indifference, pride, disdain...

Zheng Caiying seems to have forgotten the days when she was waiting for her eldest brother to call back.

In other words, after experiencing too much disappointment, she has gradually realized the reality.

There is no shortage of people around Brother...

She is the dispensable side dish for the big brother at the dinner table!

However, after finally receiving a call from her eldest brother, Zheng Caiying still inevitably had some expectations in her heart.

But the only dignity and reservedness in her heart made her unable to continue to be humble!

"Where?" Qin Yu smiled and didn't care when he heard the voice with a small temper on the phone.

After all this, I left the other side for more than half a year.

If you don't have a temper anymore, how big a conspiracy you have to deal with him in order to continue licking shamelessly and get on the pole?

"At home, sleep!" Zheng Caiying's voice is still cold.

"Send you a position!" Qin Yu said directly.

"...What do you think of me?" The embarrassed Zheng Caiying's voice gradually increased: "I tell you, don't think you..."

"100,000." Qin Yu's voice interrupted her cursing, and her breathing suddenly disappeared.

Then, suddenly there was a fierce exhalation: "You...Don't do this, I tell you, I...I am not that kind of person."

No one knows how much courage Zheng Caiying must have to say this refusal.

She didn't know what to do if she was not in charge, and she really walked out of society, only then did she understand what it means to split a penny into two.

"200,000." Qin Yu's voice was still short and direct.

"Huh~huh~" The breathing in the microphone became heavy.

200,000, how long is enough to pay the rent?

No longer have to plan carefully for three meals a day, and no longer have to count the time every day to catch the last train.

No need to look at your favorite clothes, shoes, bags, and turn around silently.

By the way, she can still get a new phone...

Or, change to a better house? ? ?

Even through the phone, Qin Yu could think of the entanglement and struggle on Zheng Caiying's face at this time.

"I, don't...I'm not...you..." Zheng Caiying was in a mess.

All self-esteem and pride, reserved and resisted.

At this time, they were all overwhelmed by the power of money, and the only thought that could be thought of blurted out: "Why don't you add more?"

"Heh~" Qin Yu made her amused, "I sent you the address. I'll give you half an hour."

...

...

The next day, Qin Yu, who had only slept for two hours, got up on time.

The biological clock is accurate to the second, so that he himself couldn't help but curse: "Perverted!"

Zheng Caiying opened her eyes blankly, glanced at the bright sky outside, and muttered, "Are you up so early?"

"Life is not easy. Didn't you say that last night? As a boss, I should not be responsible for a dedicated employee like you?"

Qin Yu put on his clothes, tied the watch to his wrist, and said with a smile: "Today you can sleep in. It won't matter if you ask for a day off."

Hearing "asking for leave," Zheng Caiying immediately sat up with her hands propped up: "No, it's more than 100 yuan a day!"

As soon as the words were spoken, Zheng Caiying was stunned, sitting where she was, her eyes staring into the distance blankly.

"How?" Qin Yu asked curiously.

Her body trembled slightly, Zheng Caiying lowered her head and shook her head, "I just didn't expect..."

Unexpectedly, unexpectedly what?

I would have such a day, to care about a hundred dollars?

Hehe, so time and experience are the best way to temper a person...

The great goddess of politics and law at that time has now become a little woman who cares about her life and makes a lot of money.

"This is growth." Qin Yu sat on the edge of the bed and stretched out her hand to rub her hair: "If it's too hard, you can tell me."

Brother Yu doesn't mind having another little pet, as long as she is obedient and sensible...

Money is really nothing!

"Think about it for yourself, I have to go first." Qin Yu took out his phone and walked out after looking at the time.

Click, nourish~

The electronic lock closed again, and Zheng Caiying's mobile phone made a ding sound.

Picking up the phone in a distracted manner, his godless pupils suddenly enlarged, "One, ten, one hundred... 1 million?"

Repeated again, counted again, again...

Zheng Caiying stood up immediately, jumping on the bed and shouting: "I have money, haha, I have money."

Far beyond the hearing of ordinary people, Qin Yu, who had not walked far, heard her shout and excitement clearly, and shook her head funny: "The little girl is a little girl, is this satisfied?"

...

...

After leaving the hotel in a light car, Qin Yu parked the car in an alley two blocks away.

Shui Ling Dabao, a 60-year-old shop.

Three generations of people in the neighbourhood eat their buns for breakfast.

At first, young people pushed a bicycle to sell it on the street. Now young people have become old men and bicycles have become small facades.

What hasn't changed is the taste and recognition of neighbors, as well as the solid ingredients.

"Here are six meat buns, a bowl of tofu, no soybeans, more spicy!" Qin Yu took a small horse and sat at the low table and waved to the boss in the door curtain.

"Good." It was the uncle's son who greeted him, and the two greeted the small shop together.

This can be regarded as a kind of craft inheritance, family inheritance...

"I haven't come for a few days, so busy?" The old man took the fan, while making an order to collect the money, while greeted the regular customers.

Qin Yu is also a regular guest among the new faces. As long as he spends the night at W Hotel, he has to come here for breakfast.

"Yes, this is not just over the holiday, there are a lot of things to be busy!" Qin Yu replied, and the boss sent the buns and tofu brains.

"The dipping sauce is yours, this is a lot of spicy." He changed a small bowl with a lot of spicy to his low table, and the boss ran to greet the other guests with a smile.

This morning, I have to be busy until more than 10 o'clock to take a break and stop drinking!

"Be busy, young people should be busy." The old man fanned his fan and smiled and said: "The days are better, and the dolls become lazy, huh, it's not a good thing."

Qin Yu picked up the dipping sauce and replied: "Master, I think you are doing well this day, An Sheng!"

The uncle was anxious, and the fan went down and stood up: "Hello, can you dolls compare with me?"

He stretched his hand on his neck, and the uncle said loudly: "My old man is buried in the soil, and I have a good life in a few days. You are still alive today!"

After that, the uncle took a breath, and sat down as if a little tired, and said in a huff: "When I was young, I could walk hundreds of miles with a bag of noodles.

The current doll, hum...The days are better, and the bones are no longer good. This kind of person needs to have hard bones, and iron can't be discounted. That's a man. "

"That's right!" Qin Yu said and took a bite of the bun, Xiang!

He agrees with this very much, and some aesthetics in the first two years are indeed crooked and outrageous...

With thin arms, thin legs, and pointed monkey cheeks, he puts on a tattoo in a fancy way.

The clothes he wears are tight, just like a monkey.

There are also people chasing and following the trend, shouting "Big Brother 666..."

Those little arms and calves are like porcelain dolls, and they might break if they touch them.

Where is the beauty? ? ?

"Thirty years ago, it was like that. He had to let the \*\*\*\* break his arm while walking..." The uncle became more and more vigorous.

However, Qin Yu still wants to be fair to young people: "The atmosphere has improved a lot in the past two years, and the aesthetics has returned to normal. Our country is definitely getting better and better."

Wait until Brother Yu finished the steamed buns, and then finished the tofu nao snoringly.

The uncle didn't mean to stop, he said that the sky was falling in disorder, the saliva and the stars were all flying out...

In the end, the boss couldn't stand it anymore, and he interrupted with a smile: "Father, don't say anything, you guys have things to do after eating!"

The uncle lowered his head and glanced at the table, smashed his mouth unhappily, and nodded: "Let's do it!"

"Hehe, I'll come to chat with you if I'm not busy another day." Qin Yu bought the bill and nodded to the boss: "Go, see you later."

"Okay, UU read [www.uukanshu.com](http://www.uukanshu.com), go slowly, come often!" The boss responded with a smile, and said to his father: "Father, you are chatting with people and watching the time."

"I don't want to talk about it anymore."

"Then don't treat you like this, just grab someone and talk vigorously."

"Fine, I shut my mouth, and I won't say anything in a few years..."

"Look at you again, I'm not...you eat some cushions first..."

"Huh, I'm not hungry... come, sit here..."

The corner of Qin Yu's mouth was slightly tilted, listening to the squabble coming from his ears.

Little days, there are also the warmth and coziness of a little day!

## **Chapter 576: disturb**

Drive on the road to Kuafu.

Just when he met the red light, Qin Yu opened the 'snack box,' took out a piece of ration and put it in his mouth.

It melts in the mouth, it's so cold!

Don't say it, it's quite enjoyable to eat, but other people don't take it orally.

The green light is on!

Lightly stepping on the accelerator, Yu Ge couldn't help sighing in his heart: He is drifting away on the road of inhumanity!

"Boss, early."

"early."

After meeting the security guard at the gate, Qin Yu parked the car near the warehouse.

"boss."

Hu Guangquan rushed over and pointed at the truck that was driving not far away: "I've found the car. What is this going to transport?"

"A little new material, send it to the headquarters." Qin Yu said with a smile.

"New materials? We don't have any materials in our warehouse?" Hu Guangquan didn't understand, why didn't he know this.

"I sent them one by one myself, and there was a lot of piles, and they happened to be sent away one by one."

Hearing what he said, Hu Guangquan remembered the warehouse his boss wanted.

It turned out to be used for stacking materials, I said it earlier!

However, seeing his mysterious appearance, Hu Guangquan is also a little curious: What material makes it so mysterious?

Opening the warehouse door, hundreds of wooden boxes lined up neatly against the wall.

"That's it, all load the truck." Qin Yu stood by and let the workers do the work.

The 'dust' fell in the air, and each box was marked by him himself.

After all the boxes were loaded on the truck, Qin Yu said to Hu Guangquan: "I'll follow it first. Leave the warehouse alone, I'm still useful!"

"Okay, I see." Hu Guangquan nodded.

Driving the big G behind the box truck, the truck drove forward smoothly and normally.

But just halfway through the road, the wooden box in the cargo box was opened.

Looking away, Qin Yu saw the mover who was supposed to be following the car with the co-pilot. This would appear in the cargo compartment.

The partition in the middle of the cockpit was lowered, and it turned out to be a hidden door leading to the cabin.

"It's a coincidence." Qin Yu grinned and ordered Kylin to dial the number of the internal affairs department of the headquarters.

...

...

Two cars, one after the other, parked at the main entrance of Miracle Company.

The truck driver and the mover talked and laughed, and nodded and smiled at Qin Yu who also just got off the truck, ready to start work!

"The two masters have worked hard." Qin Yu scattered a pack of cigarettes to the two of them. It must be Huazi.

"The boss is polite." Seeing that it was Huazi, the master smiled and put it in his pocket: "Thank you, boss, let's work first."

"No hurry." Qin Yu had already seen Nan Zhonghao and his people coming out of the hall.

"I called someone from the company to help." While they were talking, the two also saw Nan Zhonghao and others.

It's just that the two didn't think much about it.

They brought the car by themselves, and they did not get out of the car and acted suspiciously.

No matter how you look at it, no one should know what they did.

If you change to a normal person, it's not wrong to think so...

Unfortunately, who caused them to run into the match?

But if they were really normal people, they would not treat the 'liquid spar' as casually as he did.

Not to mention fully armed, at least you have to find a reliable confidant.

I personally \*\*\*\* the car with the car, and never let the goods leave my sight.

"boss."

Nan Zhonghao greeted Qin Yu first, then turned to look at the two masters and went to smoke: "Come on, master, first smoke a cigarette."

Seeing each other's enthusiasm, the two did not refuse, just smoking a cigarette to ease their mood.

The driver first stretched out his hand to pick it up. Just as he pinched the cigarette with his fingers, a strong numbness spread from his neck to his whole body.

When the two eyeballs turned up, the person fell, and the smoke fell to the ground.

"You~" The mover backed back in horror, but his two arms were caught by the security guard who came up.

Nan Zhonghao picked up the cigarette on the ground and stuffed it back into the cigarette case.

Then put the cigarette box in your pocket, and then smiled and looked up at the messy mover: "I took something from someone else's house, should I tell the owner?"

"what did you say?"

The other party still has a fluke mentality, and wants to die, yelling: "Don't frame good people. Call the police. Call the police. Big companies are bullying people."

"Don't worry, the catch is on the way here, you will see you later." Nan Zhonghao looked at him with a smile, and reached out to grab the bag on his waist.

"What are you doing, don't touch me..."

Seeing that the pocket was taken away by the other party, the mover was struggling crazily and shouted: "You are an infringement of personal privacy. I want to sue you, I..."

The zipper opened, and the 'spherical' object wrapped in black cloth was held by Nan Zhonghao in his hand.

The last trace of luck in the other's heart is over here!

"Boss, the catch is a bit busy over there, it may take some time, or should I ask first?" Nan Zhonghao handed the things to the boss and asked him what he meant.

"Just ask?" Qin Yu took the spar and looked at him seriously.

Nan Zhonghao smiled more kindly: "Just chat, everyone is a business man, what can't you talk about?"

"Then talk about it." Qin Yu responded with a smile.

He also wanted to see how capable Nan Zhonghao really was...

In the end, how should I say... a bit unexpected!

There is no behind-the-scenes instructions, and no precise and comprehensive plan.

The two of them were not spies or agents, but ordinary drivers and porters.

Oh yes~

The two of them also have a part-time job, guarding a thief who stole.

The two of them changed the car by themselves, every time they had work.

Discovered something inconspicuous and valuable, or more mysterious and confidential.

The two of them will look for opportunities to help themselves in the transportation process.

Not much, one or two is enough, all as a bonus.

Because he was more concealed and never greedy, he was only discovered by Qin Yu today.

In fact, the two of them still don't understand how Qin Yu discovered it?

Naturally, he would not explain this to the other party, and when the arrest was about to arrive, he would hand the person to them.

Qin Yu explained the value and importance of this batch of goods: "Things must not be taken away, and pictures can be taken...In this way, I will make a call first."

This time, Qin Yu directly dialed Ye Lao's number: "Ye Lao, I am Xiao Qin..."

Twenty minutes later, a military jeep stopped in front of the building.

The driver was wearing a military uniform without epaulettes.

The co-pilot was dressed in civilian clothes, and Qin Yu knew, "Mayor Li, how can you make a trip yourself."

"Hello Mayor." The catcher who led the team saluted and said hello.

"It should be." Li Yuan said to the head catcher: "Well, it's been a lot of work, you should go back first, and wait for me to talk about other things.

"Understand, close the team." The head catcher decisively left.

"Ms. Qin, let's say it inside." Li Yuan wanted to find a place to talk to him alone.

"Okay, please inside." Qin Yu accompanied him to the company.

The rest area in the corner of the hall can be used for conversation.

As soon as the two parties were seated, Li Yuan went straight to the subject: "The above said that the situation is urgent. Let me deal with it immediately to avoid misunderstanding."

Seeing that Qin Yu just smiled without speaking, Li Yuan said again: "Can I ask, what is it?"

He can't hide what's going on, just say what he thinks.

He asked him to be a mayor to give a guarantor to a businessman.

It's not that it's impossible, but you have to let him know what it is for, whether it is valuable, and whether it can contribute to this city...

Or create value for the common people This right should he still have?

Seeing the sincere and serious gaze of the other party, Qin Yu opened the black cloth ball in his hand. '

"Things are here, just don't ask!" Qin Yu said, opening the cloth bag and letting the other person look inside.

The soldiers who came with Li Yuan looked at the same.

diamond? Crystals?

Or what special material or device?

The two of them have a lot of thoughts, and they want to get a clue, but they can't do it.

The only certainty is that the 'transparent stone' in his hand is very important.

## **Chapter 577: future**

Li Yuan guessed that it is important, but he has no intuitive concept of how important it is.

It was not until the appearance of a Wu Zhi that he realized that his pattern was smaller...

Now that someone took over, Li Yuan also had a reason, and naturally there was no need to stay any longer.

This matter was ordered from above, and Wu directly came to pick up the goods.

Whoever feels that he has done something wrong, he should talk to the chief envoy, or continue to report.

There are always iron-headed babies who are not afraid of pain, and Li Yuan himself is one of them.

However, Tietouwa ran into Tietouwa... a headache!

Sending off the parents, Qin Yu handed the things to the people who came to pick up the goods: "On this one, I am optimistic."

Bai Ze looked at Qin Yu with a weird expression, with a sincere tone and serious expression.

If he didn't know what was going on in his heart, he would almost believe it!

In the nearby truck, there is only one piece of stuff in a truck? ? ?

"Ms. Qin, where did this thing originate?" Bai Ze asked with a smile.

"I don't know, I picked it up on the road." Qin Yu lied, imaginative.

"..." Bai Ze thought about it before.

The other party makes up a reason at will, as long as he can pass it, he will treat it as a fact.

But upon hearing his excuse, good fellow...

This is to tell myself clearly: I know the place, but I just don't say it, eh...

"Mr. Qin, we don't have to be stupid, you know who I represent." Since soft is not good, Bai Ze decided to be hard.

Qin Yu raised his brows, and said in surprise: "Am I doing something wrong?"

This made Bai Ze somehow pick it up. He glanced at him and shook his head with a wry smile: "When I didn't say it, we will meet again next time."

Qin Yu grinned: "We may be violent, but it's better to be rare."

Every time I see him, there is nothing good, and I don't know to bring some good news to myself.

The road is narrow, know how to cut?

Bai Ze didn't say a word, and boarded Wu Zhi without looking back.

Oh, da da da...

The dust blown by the propeller flew up, and Wu Zhi lifted into the air.

Qin Yu spit on the ground, then turned around and said: "People sweep the square well, so it's the company door curtain."

This gray man is almost catching up with the village field.

Nan Zhonghao said to the receiver at the back: "Didn't you hear what Qin Dong said? Don't you hurry up and let someone do it, and other people will go up and move things."

After speaking, Nan Zhonghao leaned against Qin Yu and whispered: "Boss, that thing...is it okay?"

He saw that Qin Yu's expression was not very good, and he thought it was the liquid spar.

Judging from what happened before, the "glass ball" should be very important.

Why is it said that it is a glass ball, because the transparency is too amazing and the size is too big.

Said it is a stone, how can it be without any impurities.

If it's a diamond, who has seen a pure diamond with a big fist?

Besides, if it is really a diamond, it is really not going to be sent directly by military force.

Now, I don't know how many branches will grow after this glass ball is exposed.

"It's okay." Qin Yu couldn't guess Nan Zhonghao's mind, nor did he want to guess.

But he could see the worry in Nan Zhonghao's expression, clearly worrying about what happened before and the possible impact.

"Don't worry, this matter will not have any impact." Qin Yu smiled lightly, not showing any worry.

It is true that he is not bothering about the liquid spar...

In fact, it should be said that this exposure was intentional.

The reason is naturally to expose the liquid spar to the line of sight above, and then to cooperate with each other.

That's right, only he can collect liquid spar, but he wants to use it effectively.

Qin Yu alone can't do it, and others can't do the same.

Because nuclear fusion technology is used among them.

This alone killed Qin Yu beyond the threshold.

That technology can be mastered by a private person?

It's possible in foreign countries, but he is a native of Xia, and he passes directly

If Qin Yu could wait for more than ten or twenty years, it would not be impossible to get a consortium and borrow chickens to lay eggs.

But he doesn't have that patience and feels unnecessary...

There are many benefits to cooperation with the court, and it can not only promote the development of the country's downstream related industries.

Enhance scientific and technological strength, accelerate technological progress, and achieve goals in a simpler and more direct way.

No matter how you think, it is a win-win situation.

Qin Yu believes that he is now in the eyes of the above.

Why should I pay more attention to it so that people will not stretch out their hands indiscriminately at him, and Ye Lao will support him.

There is no need to worry about benefits and safety.

Even if there is a Shuntou baby who wants to hit him, should he first consider whether he can beat him or not?

Therefore, there is no need to mention the imperial court in brief and conspiracy.

It's all in the past tense!

There is a country where there is a home, and a good home and a country are better.

It was with this idea that Qin Yu let the car to the company without doing anything.

Let Nan Zhonghao lead the team to get people, and call the police by the way!

You think it was really for the two little thieves, Qilin had already called out their identities long before they arrived at the company.

All recent contacts, call history and travel track.

Including the dialogue and route in the dash cam, the check is clear.

Qin Yu naturally also learned from the conversation that the two were habitual offenders who were guarding and stealing.

It's just that he only needs to understand these.

Externally, it was the development of things that naturally led to the catch, Ye Lao and Bai Ze who came to pick up the goods.

Level 79, Confidential Laboratory.

With Qin Yu leading the way, Nan Zhonghao and the talents from the Ministry of Internal Affairs were able to appear in the laboratory.

"Things should be here." Pointing to the open space at the entrance of the laboratory, Qin Yu asked them to put all the subsequent boxes over there.

The people in the Ministry of Internal Affairs were silent all the time, because they were full of eyes from the moment they came in.

No matter where they go, there are people accompanying them, staring at their every move.

The situation should be the other way around. The Ministry of Internal Affairs is the real authority that investigates and supervises internal personnel.

This is their duty...

The current position is reversed, and the person who has been blatantly monitored becomes himself, of course he will feel uncomfortable.

However, some people are beginning to understand why most people in the company mentioned the Ministry of Internal Affairs with hostility and disgust.

At this moment, they can particularly appreciate the feelings of those employees.

There is nothing more empathetic than experiencing it in person!

"Ms. Qin?" Jing Yuan ran into him when he was carrying a box when he came out to rest after a short period of time.

"Well, how is the experiment?" Qin Yu asked.

Jing Yuan smiled confidently: "There have been new breakthroughs, and I believe there will be good news soon."

"Well, mobile phone batteries are a very important step in the future of Miracle, don't let me down!" Qin Yu hopes to hear the good news as soon as possible.

Internet companies have already begun preparations, and if they want to be put into operation as soon as possible, they must get breakthroughs in batteries.

Without reliable battery life, how to attract players' attention and desire to buy.

Is it still the same as in previous years, with cables all over the floor?

"Boss, these are these?" Jing Yuan's gaze was attracted by the wooden box in front of her.

She had heard a little about the episode that happened before the company.

After all, Wu Zhi has been dispatched, and even the most nervous people should see the shadow of Wu Zhi flying away in the sky.

"This..." Qin Yu patted the box and said modestly: "It's the future of the company."

People were asked to inform the leaders of the three research groups to come to the meeting, and Qin Yu met them in the small conference room.

There are no cumbersome documents on the table, only a wooden box that has just been moved.

"Boss." The last Cui Geng who came in closed the door.

"It's all here, sit down." Asking them all to sit down, Qin Yu raised his head to the box in front of him: "Open it and take a look."

Jing Yuan was the first to lift the lid, she couldn't wait a long time ago.

Click~

The lid rests on the table top, exposing the objects inside.

Six transparent 'crystals' of similar size are arranged in the box, underneath are covered with soft plush cushions.

"This is?" Jing Yuan turned her gaze to Qin Yu, UU reading [www.uukanshu.com](http://www.uukanshu.com) wanted to hear the answer from him.

Qin Yu said earlier that this is the future of the company...

But Jingyuan didn't see the so-called future, but just some crystals.

Although the material cannot be confirmed yet, she doesn't think these things can bring any changes and innovations.

Neither Cui Geng nor Shi Cui spoke in a hurry. Since Jing Yuan was willing to take the lead, they were also happy to be a quiet listener.

"A brand-new energy crystal. The specific data has been sent to you through the intranet. Go and see for yourself." Qin Yu responded with a smile.

The three looked at each other, not sure if they should be understood literally.

Or treat it as an exaggerated descriptive sentence?

**Chapter 578: Love learning, not too much, right?**

"Hiss~" The refreshing sensation in my heart made Yu Ge take a breath.

It feels so cool in this hot midsummer.

Looking down at the graphene box in his hand, Qin Yu shook his head and laughed at herself: "Sure enough, as long as it is something that can bring pleasure, people will always become addicted soon!"

Eating chip snacks has become one of his new daily habits in life.

It's just that you have to avoid people eating it quietly.

If someone in the research institute sees him, he must be regarded as some hidden monster!

The research and development of 'liquid spar' has attracted the attention of Qin Yu and the research institute.

The team led by Jing Yuan, Cui Geng, and Shi Cui drew elites to form a brand new core team.

Of the three teams from the miracle research, the one with Cui Geng occupies the 80-89 floor.

Jing Yuan's second group is on the 70-79 floor, and Cui Geng's group is on the 60-69 floor.

However, the three of them have no opinion on this.

Now, the core team occupies the vacant 90-100 floors and is responsible for only one project.

The extended development of 'liquid spar' and all related technologies, how to effectively use this brand new energy crystal is their first and only task.

The leader of the core team is personally assumed by Qin Yu.

This decision made Cui Geng and Jingyuan happy, but Shi Cui was a little confused!

The boss has taught them a few lessons, but that is different from what is in front of them. They don't really think that the boss is omnipotent, do they?

However, in the next few days, Shi Cui understood what is called 'papa' face slap.

Item by item, which looked like a heavenly book, was thrown out by the boss one after another.

All kinds of fantastic ideas and experimental data made him brain exhausted...

Tired, not physically tired.

It comes from extreme exhaustion and strong crit...

There were mountains of data in front of him, and every one of them left him at a loss.

Let's talk about that expression clearly: What the \*\*\*\* is this? ? ?

After receiving continuous spiritual attacks and insults, Qin Yu had a follower who admired him.

The original two dog skin plasters were enough to bother him.

It's better now, and another one came out.

To be tired, he should be the boss, research, and pretend to be...

Ahem, the five best students who study hard are more tired.

The good news is that he contributed 11.1 million experience points to himself.

Come on, hit the workers!

Having been busy for almost a month, Qin Yu planned to give himself a day off while Lu Qing was free.

The elevator descends to the 49th floor.

Ding~

The elevator opened and Watson walked in: "Boss, has your secretary chosen?"

She became a vice president as a big secretary, and now only one He Wu followed the boss.

Big old thick, stuffy canned food.

I want him to take care of his boss' schedule, think about it!

Therefore, Watson is particularly concerned about his secretary candidates.

Two days ago, Qin Yu was busy with liquid spar, and Watson led the team to two universities to hold on-campus job fairs.

This time I opened the back door for Miracle Company and held a special show.

As a prestigious Northwestern university, the competitiveness of the two universities is declining.

The biggest reason is also caused by the loss of high-quality talents...

Once the students graduated, they either went to coastal cities or went to Zhili City for development.

Otherwise, go to the capital and want to win a world.

There are very few who can really stay, not to mention the students from other provinces.

Most people who didn't go to these places chose to return home.

The last ten remaining are less than one or two.

Under this education standard that pays more and more attention to family education, high standards, high investment, and high returns, all senior intellectuals have gone to other provinces!

How can this make the two universities endure? ? ?

In the next few decades, what are the things about Xitong University and Polytechnic University in the national university rankings?

The loss of talents caused by the general environment and the pale fact of lack of core competitiveness have various impacts.

Whether it is the local Yamen, Xitong University, Polytechnic University, or Miracle Company, their goals are the same in this matter.

Keep the person, let him take root, sprout, bloom, and bear fruit!

Thinking of the gray resumes piled up in the corner of the table, Qin Yu smiled and said, "After reading, which one do you think is more appropriate?"

"There are two good candidates, Xu Meixin and Sun Yuan." Watson didn't doubt that he had him, and said two candidates he liked more in his heart.

"Yeah~" Qin Yu nodded thoughtfully, as if recalling the information of the two.

"In this way, I invited both candidates, one to be the accompanying secretary and the other to be the secretary of the permanent office."

Considering my current schedule, a secretary is really not enough.

Qin Yu is so capable and has several roles, how can one do it?

"Okay, then I will inform them that they will be on duty tomorrow?" Watson said.

"Just look at the arrangement." Qin Yu's trust in her fully moved Watson.

However, based on her experience with the boss for so long.

Why does Qin Yu's performance seem to be diminished? ? ?

'No, how can the boss have a guilty conscience, this is the trust and value of me. Watson hypnotized himself, turning a deaf ear to the growing intuition in his mind.

What bad thoughts does a good boss like Qin Yu have?

The elevator door opened, and the two drove away in the underground garage.

Qin Yu went straight to Xitong University and met Lu Qing who was waiting at the door...

Jiang Jiahui, Fang Mei!

Anyway, their two single dogs are fine.

It's better to eat and drink together, and make two more bowls of dog food by the way...

Remind yourself: Cherish life and stay away from love!

"Can't you two find someone?" After the two of you sat in the back row, Qin Yu turned around and joked: "I always eat dog food like this, so I'm not afraid of getting tired of it?"

"It's okay, you can eat sour!" Jiang Jiahui said and patted her belly.

Fang Mei learned everything, patted her stomach hurriedly, and said, "I can eat."

"..." Qin Yu almost smiled, shook his head and said: "Okay, let's eat first."

Sit wide.

The most famous is the shabu-shabu, fresh and delicious, decoration and privacy are very good.

It is also one of the ideal choices for business meetings.

It's just that Qin Yu and the others are here for dinner.

So after the waiter poured the water, Qin Yu let the other person leave: "We want to come by ourselves, if we need to call you."

"This place looks very high-end." Jiang Jiahui looked around, and the antique shelf that entered the door was filled with bottles and cans, which looked so expensive.

"It's nothing more than the self-suggestion brought by the environment, it's not true, it can't add up to more than 1,000 yuan." Qin Yu looked back and said with a smile.

"You still know antiques?" Lu Qing looked at him in surprise.

My boyfriend is becoming more and more mysterious, and every time I meet, I can bring myself new cognition and surprises.

The so-called freshness will always exist in him.

Because every time there will be new surprises and surprises, waiting for her to discover and dig.

So far, Lu Qing has not been able to fully understand what he will do.

Or: Is there anything he doesn't know?

"It's quite a lot, I don't know how to dance, gliding, skydiving, skiing... also only a little, too much..."

Hearing what he said, Lu Qing smiled and said, "Do you really think of yourself as a superman?"

It is said that women are greedy, and put him here even more greedy than women.

It's already good enough in itself, do you want to become a decathlon and be omnipotent?

"I really have this idea." Qin Yu nodded and asked after thinking about it: "Are there any arrangements for the holidays?"

"Not yet, how about you?" Lu Qing looked at him a little expectantly: "Is there time?"

During the few holidays, either Qin Yu was too busy, or Lu Qing and his family had arrangements, and he didn't want to bother.

Therefore, the two have never been able to go out alone.

Traveling is the best way to promote feelings and increase memories. Of course, Lu Qing is looking forward to it!

"This summer, let's go skiing in Holland together?" Just said skiing reminded him that he can take this opportunity to go to Holland.

Relax with Lu Qing, have fun, and solve some small problems by the way!

The lithography machine owned by Godson is very difficult to re-engrave.

One of the problems is that there are too few things to take apart and do it drastically.

If it breaks, who will bear the responsibility?

More importantly, just relying on Godson to open a gap of blockade barriers.

Will therefore return to the embarrassing situation of tightness...

At that time, the other party will inevitably adopt a tougher attitude and means to aspire to the changes and losses caused by the emergence of 'Loongson'.

This loss is not just a problem of the lithography machine and the chip.

It was a confrontation between nations, and the bald eagle did not take advantage of it.

Otherwise, the problem of the lithography machine, how has there been no text up to now.

The bald eagle yells every day for sanctions and testing.

I want this, I want that, I want everything, and in the end it just stays verbally.

The main reason was to contact him in private, and after expressing his attitude, he let the boss go back directly.

Do you want to go back when you have something in your hand?

Not to mention that you have no evidence to prove it. Even if there is evidence, it will make you no evidence.

Want?

Things are left at home, you have the patience... come here!

However, although it has a slight upper hand in this matter.

But the actual situation is not optimistic, because Godson and even the domestic high-end production is just that.

If you want to increase production, you have to figure out all the principles of this lithography machine.

Build a new lithography machine.

Qin Yu didn't have much confidence before, now...

With the existence of 'kylin', there is confidence.

But he thinks he can do something safer, first go to Holland, relax, ski and go around.

It is said that the scenery in the Netherlands is particularly good. For example, the small town called Wildhofen, like an orphan, is very good.

When you get there, look at the wheat fields and take pictures.

Bring the Nanoworms out to let the wind go to learn some new knowledge, don't you think this is not too much?

What ASML, is a good place to go!

Brother Yu doesn't matter, it's mainly Nanoworms.

These little guys are too easy to learn, they want to go to ASML's intranet to have a look.

What the \*\*\*\* does this company do? Is there really such a billion dots in the intranet?

As the main body of Nanoworms, does Yu Ge have to meet this small requirement as much as possible.

After all, these little guys are very caring for him...

### **Chapter 579: Zhaoyang call**

Of course, Lu Qing had no objection to Qin Yu's arrangement.

Husband and wife, what can she object to as a little woman?

At this time, she was chatting with her best friend while cooking fish fillets for Qin Yu.

The two things are done in an orderly manner, without delay...

Seeing her gentle and virtuous performance, Jiang Jiahui put down her chopsticks and sighed.

"what's happenin?"

Lu Qing put the fresh and tender fish fillets into Qin Yu's bowl, and curiously asked: "Doesn't you have an appetite?"

"No."

Jiang Jiahui shook her head and looked at her with emotion: "I heard people say that the virtuousness and tenderness of women are directly proportional to the achievements of men.

At that time, I thought it made sense, but I didn't have much experience... Now, I can see it. "

In Jiang Jiahui's eyes, Lu Qing is a proud, independent, independent and outgoing goddess.

She is always so energetic, with a strong infectious power.

Have confidence in everything and love to laugh.

At any time, on any occasion, where she stands is the center of the stage.

Even girls can hardly refuse her charm...

To paraphrase what little girls often say, that is that these sisters are too shabby!

But take a look, see how it is now...

The long hair of the shawl was rolled up and tied at the back of his head at random, and his confident smile became gentle as water.

How can she look normal now?

It is clearly a gentle little woman living under a man, willing to make a green leaf to set off his glorious image!

"Isn't this good?" Lu Qing asked rhetorically, the movement in his hand kept moving.

"Yes, yes, you Miss Lu has the final say." Jiang Jiahui rolled her eyes.

I thought I wouldn't invade a hundred poisons, but I never thought that the dog's food would be medicine.

MMP~

This young man has no morality!

He fiercely clamped the fish fillets with chopsticks, Jiang Jiahui decided to turn grief and anger into appetite, I eat, I eat, I eat...

"Oh~" Jiang Jiahui kept retching while squatting by the pool.

Fang Mei took the water and paper and looked at her funny and distressed: "How can you eat yourself like this?"

"Ah~" After taking a breath, Jiang Jiahui raised her head uncomfortably and said, "I don't know, I didn't feel anything when I ate it."

"Oh~" Jiang Jiahui waved her hand again and again, lowering her head and retching.

She was really not in the mood to talk, it would look like two stomachs grew in her belly.

It's so uncomfortable!

In the box, Lu Qing looked back at the door frequently.

Finally, she couldn't help but get up and said, "I'll go see Jiahui!"

"Yeah." Qin Yu nodded funny.

How old is he, he can still eat until he wants to vomit.

This child's brain is not so good!

Bell~

Not long after Lu Qing left, Qin Yu suddenly received a call from Zhaoyang.

"Manager Zhao, long time no see, haha..."

"Yes, Qin Shao didn't forget me. Xiao Zhao was really flattered."

Zhaoyang's broken mouth can really say that the sky has a slap in the face, and then the conversation changed: "Qin Shao, I have good news..."

The sixth element and other cars that have been waiting for a long time are here!

"The car is in the store right now. Do you think I will deliver it to you, or will you come and see it yourself?"

Zhaoyang wanted him to come to the store in person, to hold a welcome ceremony, take a group photo, and commemorate him.

Talk to Qin Shao a few more words to get into the relationship with each other.

Next time, there is nothing we can do.

Besides, if there is anything good, it is enough to make Qin Shao think of himself first.

To be a long-term person, the most taboo thing is that if something happens, the older brother is short, and it's okay to get out.

This kind of person can do nothing.

Otherwise, how come someone is always happy to cook a cold stove?

Zhaoyang's mind is very simple, and he has a good relationship with people like Qin Shao.

It's profitable and harmless!

Maybe someday something good will fall on me, or I can pull it like that when I'm in trouble.

As long as there is a one percent chance, it is enough for Zhaoyang.

Little people have the survival wisdom of little people. This is the experience of staggering in life.

It also created his exquisiteness and the principle of treating others with sincerity!

"I just have time..." Raising his wrist and taking a look, Qin Yu continued: "Half an hour, I'll be in the store."

"Okay, then I will let people prepare briefly."

"It's okay to take a picture, forget about the others."

"Understand, understand, keep everything simple..."

After hanging up the phone here, Zhaoyang turned around and said to the employees who had been waiting for a long time: "Hurry up and move."

"Oh!" Everyone got busy in the cheers.

That's the sixth element. I will go out and see my colleagues in the future, saying "Do you know the sixth element? Our store sold one."

Whether you are Martha or Prancing Horse.

Step aside!

Sitting wide, Jiang Jiahui took small steps and let Fang Mei get into the car.

After sitting down, my uncomfortable feeling eased a lot, and there was a smile on his face.

"Who is telling me next time to turn grief and anger into appetite... Xiao Mei, bite him." Jiang Jiahui said viciously.

Fang Mei raised her hand and patted her, and said with a smile: "Fuck you, you only bite."

"Or, you can just take it apart and bite it." Jiang Jiahui's eyes rolled around, and after speaking, she flinched back, clinging to the car door to avoid Fang Mei's attack.

Fang Mei glanced forward quickly from the corner of her eyes, reaching out as if Jiang Jiahui grabbed it: "Die Jiahui, watch me tear your mouth."

"Don't, hahaha... don't scratch me."

"Let you talk nonsense, let you talk nonsense..."

"Ahahaha...Ah, where did you catch?"

"...Catch it wrong, don't, I'm wrong Huihui...Ah, don't come over!"

"Hehehe, little beauty, let the uncle come to pamper you."

Listening to the two of them making more and more troubles behind, Lu Qing had to interrupt: "Ah, do you two pay attention?"

"Pay attention to what?" Jiang Jiahui was obviously mad.

Seeing that Lu Qing dared to refute himself, stretched out his hand and drew forward, hitting the bullseye!

...

...

Big G drove into the 4S store, and the salesmen at the door had been lined up.

With a warm smile, waiting for the boss to debut!

It's just that the car has been parked for a long time, why no one gets off?

Zhaoyang hurried a few steps earlier, padded his feet and looked in the trunk.

The head is shaking, it is clear that someone is inside.

It seems that the boss hasn't finished handling something, so he will bring someone to wait first: "Don't worry, wait a moment...The salute is ready."

After a while, the co-pilot turned on first, and Lu Qing jumped to the ground and shouted into the car: "Jiang Jiahui, Fang Mei, you two wait to go back to the dormitory."

The two small fists creaked, and the two men with their heads to their heads in the back seat were terrified.

It's over, Qingqing Big Sheep is angry, so broad and scared!

Goose Goose Goose Goose Goose Goose.....

"Come on, salute." Seeing Qin Yu coming out of the cab, Zhaoyang immediately greeted him with someone.

When Qin Yu was five or six meters away, the two shop assistants behind him turned the colored paper salute in their hands.

Bang bang~

Two crisp sounds and the falling colored paper added joy to the scene!

"Qin Shao." Zhaoyang bent down slightly, stretched out his hands far away, grabbed his right hand in front of him, and pressed down firmly: "Welcome."

"You!" Qin Yu reached out his hand and nodded him, his expression was not dissatisfied.

The other party was also for the atmosphere and the scene, where his duties lie, and Qin Yu couldn't say anything.

Furthermore, Zhaoyang has a good grasp of it.

It will neither appear cold, nor cause Qin Yu's boredom.

So, no one is an idiot who can do his position!

"Let's watch the car inside. Today, our shop will serve you alone." Zhaoyang smiled and bent forward and pointed forward.

That reminded Qin Yu of the tortoise who was recruiting guests at the gate of the brothel in the costume TV series.

But it's so similar...

"Qin Yu, what car did you buy that made the manager so excited?" Lu Qing didn't know the truth yet, only that Qin Yu bought another car.

Just buy it!

A Rambo is not a big deal.

She only proposed the president of the family to her family last month, specifically to transport her mother.

Her previous Aurora was eliminated and used by the nanny to buy food.

"Go in and take a look." Qin Yu pointed forward to the most conspicuous middle position of the exhibition hall. A car covered in dark green silk and satin was quite mysterious.

"Qingqing, go take a look." Jiang Jiahui and Fang Mei followed her, posing as if watching the excitement.

Lu Qing cast a blank look at the two of them, hum~

It's better not to plan with them at this time, and wait to go back to the bedroom, hehehe...

Bringing the two to the booth, Lu Qing's eyes curiously stretched out his hand and pulled it down!

Silky~

A sense of shock hit his face, and Lu Qing's whole body was not well.

This.....

Is it a sixth element? ? ?

### **Chapter 580: The track was built in the university**

"Wow, so handsome!" Jiang Jiahui held her chin with her exaggerated hands.

Fang Mei's eyes stared at the streamline of the car body vaguely, and she felt a tingling current.

So handsome...

This car...expensive!

The first reaction in their minds is how much is it worth?

You don't need to ask to know that it must be a figure that you can't afford, but this does not affect the two people's appreciation of it.

See if you don't break the law, right?

"Hello." The dumbfounded Lu Qing returned to his senses and asked Zhaoyang, "This is the sixth element?"

There was still uncertainty in her tone, it was that this car was too rare.

Moreover, it is the one she wants most.

"Yes, Miss Lu, this is exactly the sixth element, the ultimate dream of Lamborghini owners!" Zhaoyang introduced with a smile.

The tone is full of powerful pride and self-confidence, that's so fascinating!

"100 kilometers in 2.5 seconds, top speed 355, weight 999kg, equipped with -4Superleggera 5.2-liter V10 engine.

The maximum torque is 540 N, it can output 570 horsepower, carbon fiber reinforced plastic chassis, ceramic exhaust, the ultimate toy of the super rich on land. "

Lu Qing didn't say a set of data, the light in his eyes brightened.

This time, let alone Qin Yu, even Jiang Jiahui and Fang Mei who had been with her almost day and night were stunned.

When was she so knowledgeable and how much homework did she do?

Turning around, Lu Qingfei rushed to Qin Yu.

Put your feet up, wrap your hands behind his neck, and pull it down.

"Muma~~" A long kiss, ignoring the eyes and the crowd around, Lu Qing couldn't be excited by herself.

"I love it too much, husband~" Lu Qing called out with a deep gaze.

Qin Yu's expression was startled, and he asked again: "What was your name?"

Lu Qing's cheeks blushed slightly, but he yelled again, not to be outdone, "husband."

"Haha~" Qin Yu picked her up and turned around, "I like this name, and I will call it that in the future."

"Zhaoyang, the key." As soon as the voice fell, the key was delivered to Lu Qing.

Looking at Zhaoyang who bends over and smiles, handing over the key.

Qin Yu praised in his heart: It will happen!

"Is it all right now?" Lu Qing took the key and looked up at him with admiring eyes.

"It's yours." Qin Yu waved his hand, as if he wasn't talking about a super sports car worth more than 100 million yuan.

Seeing Lu Qing sitting in the cab excitedly, Jiang Jiahui took Fang Mei to Zhaoyang's side and asked softly: "Manager, can I ask how much money is this car?"

"Of course there is no problem, because it can only be customized at the headquarters. I am afraid to ask Qin Shao for the specific price, but it must be over 100 million."

Zhaoyang just told the truth, he certainly didn't know the specific figures.

However, he still knows the bottom line for the rough estimate.

Over 100 million, that's for sure.

The mouths of Jiang Jiahui and Fang Mei instantly turned into an 'O' shape.

Looking at Qin Yu again, his eyes have changed from incredible to numb.

It turns out that the big brother's world is like this...

Jiang Jiahui has poor words, and she doesn't know how to describe it.

In short, it is very nice!

envy.....

Buzzing~

Lu Qing stepped on the accelerator lightly, trying to control this violent beast!

The powerful kinetic energy and lightweight body make it seem like it is about to enter a runaway state at any time.

Seeing Lu Qing's expression a little nervous, Qin Yu came to the co-pilot and knocked on the window.

When the car comes to a complete stop, the brake lights come on.

Qin Yu pulled the car door and sat in: "Let's go, I will accompany you around."

Lowering the car window, Qin Yu said to Jiang Jiahui: "Wait here for a while, come back soon, Zhaoyang, entertain me!"

"Okay, Shao Qin, don't worry." Zhaoyang waved and laughed.

With Qin Yu's company, Lu Qing seemed to have enough confidence.

Stepping on the accelerator again tentatively, slowly and skillfully drove the car out of the exhibition hall.

Buzzing~

Weng...

Driving into the 4S shop, Lu Qing increased his right foot.

The body suddenly leaped forward, and her strong back pushing made her fingers pale when she was holding the steering wheel.

Release the throttle and slow down!

Accelerate, release the throttle again...

After running five or six kilometers, Lu Qing finally had a headache.

"Slow down, don't be nervous, just like driving normally, find the right position when stepping on the accelerator, and divide the accelerator into several gears, just like gears..."

Qin Yu spoke softly, helping Lu Qing better master this violent and tough mechanical beast.

When she drove into the parking lot of the 4S store, she had become more relaxed.

"Huh~" Lv Qing let out a long breath after stopping and turning off the engine.

Release all the inner tension and excitement, look at Qin Yu happily and say, "It's so enjoyable!"

Qin Yu smiled and said, "This is enjoyable, it's really enjoyable to go to the track."

"Hmm." Lv Qing's little chicken nodded while eating rice. "When?"

There is only one track in Feidu for the sixth element to release its power, so there is no need to ask where to go.

"How is it now?" Qin Yu responded.

Since she wants to play so much, just go straight to it.

Anyway, you can go shopping anytime, and it happens that Qin Yu also wants to get off the track to try his hand.

As long as a normal man sees this car, he has the urge to go fast.

What's more, Brother Yu who really owns it sitting inside.

"Okay, I love you so much." Lu Qing gave another hug, sending a very sweet kiss.

Don't ask, ask is very lucrative.

Use the fastest speed to complete the procedures and handover.

Qin Yu just glanced at LM002 and Urus, and then ignored them.

The car will be sent home by company staff, and Qin Yu has given the address and said hello to Aunt Qiao.

The ghosts are driven by him to the arena to test a wave of actual combat performance.

"Jiahui, follow me in the car, Xiaomei, you are ready to ride Qin Yu's ghost." As the hostess, Lu Qing naturally had her arrangements.

She was really worried about Jiang Jiahui, this girl was too wild.

Furthermore, his own man is not a fuel-efficient lamp.

If there is something unexpected, Lu Qing doesn't want to lose the happiness of being spoiled at this time and a good girlfriend at the same time.

"That's the arrangement, Xiao Mei." Qin Yu waved to Fang Mei, who was a little bewildered by the car, and took out the key of the big G and threw it to Zhaoyang.

"Help me send this car back too, thanks!" Qin Yu raised his hand and smiled.

"Yes, Shao Qin, Miss Lu, be careful on the road, I wish you all a good time." Zhaoyang said, squatting in front of the cab.

Qin Yu, who raised his phone and smiled at himself and the car window behind him, pressed the shutter, "Eggplant."

Qin Yu also put out his scissor hands very cooperatively, and was praised by Zhaoyang.

Scissor hands and scissors hands are also different.

The eldest brother is handsome, beautiful and stylish.

Others, "Man, when are you still using scissors?"

Start and ignite.

Qin Yu drove the car to the sixth element and said to Lu Qing with a probe: "Qing Qing, I will lead the way, don't follow too closely!"

With the power of the sixth element, you can't stop even if you follow too tightly.

Reaching out to give him an ok response, Qin Yu drove forward with a burst of oil.

The sixth element behind was 'revived again,' and the manic sound suppressed all sounds.

With the ghost VT6.0V12 engine, it can't compare with it.

It deserves its glory as the ultimate bull toy!

The two cars drove one after the other, leaving the 4S shop with few people and vehicles, and soon attracted countless eyes of consternation and shock.

Click~

I haven't seen less people taking pictures along the way.

There were also two BMWs that followed the shoot and came to the Auto Vocational University circuit together.

"Hey, brother, your car is too cool!" When Qin Yu stopped, one of the 5 series was parked next to him.

The other one stopped by the sixth element, apparently trying to talk to Lu Qing.

"It's okay." Qin Yu said with a light smile: "Why, two laps together?"

Young people who drive BMW all have aspirations and requirements for speed.

These two people can chase all the way to the stadium, certainly not just want to say hello and leave.

"Don't, brother, don't tease me." The young driver with Moxi's dry head folded his hands and smiled bitterly: "Will I go up here to look for abuse?"

Seeing Qin Yu just smiled and didn't speak, the other party then asked, "Um, brother, can I make a group video?"

"Just keep it for myself to watch and play, this car is too rare." The admiration of the other party really made it difficult for Qin Yu to refuse.

It just so happened that he had to go through the formalities, so he nodded and said, "The formalities will be over."

"Come on, it's necessary." Seeing Qin Yu's refreshment, the other party is thankful again, and the phone camera has been turned on.

Seeing Qin Yu going through the formalities, Fang Mei was sitting in the car, neither did she get out, nor did she get out of the car.

Finally, he simply twisted his head to the side, leaving the camera behind.

When Lu Qing wanted to strike up a conversation, it didn't go so smoothly.

In fact, he just ate behind closed doors.

I wanted to talk to Lu Qing, only to see her waving through the glass, expressing her reluctance.

Then, there is no more...

It was precisely because of seeing this scene that Qin Yu didn't go up and drive away the other party.

Or else, can he go through the admission procedures without asking?

However, Yu Ge was at ease with Lu Qing in his heart.

Based on her family background, appearance and figure, she has never seen what kind of temptation to study abroad for a few years.

If it is really not worrying, it will be Brother Yu's turn to pick the fruit.

If there is no such trust and confidence, how can the long-distance relationship of the past two years be maintained? The relationship between the two of them also seems boring, right?

"Okay, it's time for me to enter." Qin Yu interrupted the other party's filming after finishing the admission ticket and sat in the cab.

The other party was also acquainted, not entangled is a thank you, returned to his car, and simply left.

This made Qin Yu a little admired, and his impression of him was a little more favorable.

Men, the most annoying is the kind of twitching and procrastination.

Without any decisive determination, what kind of man?
