

## Pinnacle 601

### Chapter 604: Morning Meeting

"Why do you have a million fans after a good night's sleep?"

Brother Yu is very anxious, what should I do if I wake up with millions of fans and are forced to make a debut?

Wait online, there is a reward, hurry!

"Wow, the fan value broke one million?" Jiang Xiaoshan lay on his back, shouting in surprise.

Is this too outrageous?

He is now a small star in the 18th line. He has played in three online dramas. He is a small celebrity. The number of Weibo fans has only exceeded 80,000.

It took her more than a year to look at her own man...

She can't control what outsiders think, she is a little jealous anyway.

Is this too bullying?

"Yours is mine?" Qin Yu teased deliberately.

Jiang Xiaoshan snorted coldly, and Tsundere got up and walked to the living room. She was hungry and wanted to eat a lot of delicious food.

I want to order a bottle of red wine, it doesn't matter whether it's good or not, the most expensive one!

Seeing her demon-like twisting her waist and walking out, Qin Yu shook her head amusedly, and slapped her hand when she caught up.

Snapped!

"Ah~"

"Little Niangpi, I don't think you have been taught a lesson."

"I'm sad, can't I eat something good?"

"Yes, of course I can, come, I will show you a good baby..."

"Don't don't don't, mud play kai~"

After an hour of joking, room service arrived.

"Time flies so fast." Jiang Xiaoshan said with some dismay at the thought of having to go back to the crew after breakfast.

"After filming this scene, take a break?" Qin Yu said.

Jiang Xiaoshan smiled happily. He liked Qin Yu's attitude of caring about himself and respecting his choices.

Even if she repeatedly emphasized it, she was just a shame.

But Qin Yu never treats herself differently, but often cares about her sensitive emotions and silently takes care of her mood.

"Okay." Since this was what he wanted, Jiang Xiaoshan decided to take a serious rest for a while.

By the way, I can take this opportunity to polish my acting skills.

Of course, the most important thing is to accompany him, but I don't know if he has enough time.

is just my own sister, and the four people are divided equally.

I don't know how many Yingying Yanyan there are outside, waiting for him to come and be pleased.

As far as Jiang Xiaoshan knows, rice, Anadi, there are already two.

Based on her aesthetic understanding of Qin Yu, a girl like Barbie must definitely fit his aesthetic.

As long as there is a chance to meet, he will definitely not let it go.

Among the four fairies, Jiang Xiaoshan is the one who can see the most clearly and the calmest.

She doesn't care how much Qin Yu is outside, and she doesn't care.

As long as she can stay by his side, Jiang Xiaoshan will be satisfied.

"I'm not greedy, as long as it gets a little bit." Jiang Xiaoshan said to herself in her heart, with a bright smile on her face.

"Okay, remember to notify me." Qin Yu responded.

After breakfast, after another half an hour, Qin Yu personally drove Jiang Xiaoshan to the hotel where the crew was.

Less than 9 o'clock, big g drove into the hotel basement.

In the basement, Qin Yu kissed her on the lips and said, "I won't go up, and say hello to the Wen Dao for me."

"Okay, be careful on the road." Jiang Xiaoshan put her foot on his face and poked, before hesitating, she said, "Remember to miss me."

Which woman in love does not want to be worried about by her lover all the time.

She knew that she shouldn't have a request, she became greedy and unsatisfied.

But occasionally she wants to experience the feeling of being loved as a little princess.

"Every day." Qin Yu smiled faintly, stretched out his hand and stroked the ends of her hair, staring affectionately.

Waiting for him to come out of the basement again, it was already half an hour later.

No wonder people always say that the time of love is short, and it passes before you know it.

"Boss, let me drive!" He Wu, who had been sitting in the back row, couldn't sit still.

The boss wants to send his girlfriend off, so it's good to drive by himself.

But now the girlfriends are gone, sitting in the back, and the boss is driving in front.

His heart was up and down, and he couldn't sit still, scratching his \*\*\*\* like a long thorn.

"Haha, Lao He, you...I forgot that you are still there." Qin Yu laughed and parked the car on the side of the road.

He really forgot, he is still in his car.

From getting into the car until now, he has quietly shrunk in the corner as a transparent person.

In addition, Qin Yu's attention has always been on Jiang Xiaoshan, which will again be thinking about the launch of "Serious Demon", and I really didn't care about him for a while.

The two changed positions, and He Wu resumed his calm poker face.

Well, sit still in this position!

drove all the way to the company, the first thing Qin Yu did after arriving was to go to the floor where the Internet company was located for a meeting.

There are only two days left before the official launch of "The Monster", which is exactly one day.

The day after tomorrow, "Ghost" will be officially opened, and all players with helmets can log in to the game normally.

At the same time, the previously donated internal test glasses will also be reduced to 'scrap.'

However, as long as you log in to the official website to activate, you can reuse it, but this process requires an activation fee of 1999.

It's impossible for a white prostitute to be a prostitute. It has always been only Yu Ge Bai who prostituted another person. When was he prostituted by someone else?

It's not bad if you don't make money, but the cost price is not excessive, right?

Qin Yu believes that anyone who enters the game and truly experiences it is impossible to choose to abandon the equipment in his hand.

As for those from beginning to end, it didn't matter at all.

Whether it's reselling or keeping moldy, it's good.

not being baited = no loss in blood.

Nothing wrong!

"Dong Qin." Seeing Qin Yu coming, Tang Guo, who was having a morning meeting with the team, quickly got up and gave up his position.

"Mr Tang, you are sitting on your side, and I am here to listen." Qin Yu casually pulled a chair and sat against the wall.

After sitting down,        smiled and raised his hand to press down, beckoning everyone to sit down and continue.

"Okay, then just mention what instructions you have, and let's continue." Tang Guo didn't pretend, and re-settled to continue the morning meeting.

Today, the main discussion is the production line, the transportation of the equipment and the opening of the experience store.

Vr experience store, this is the face of the front-line consumers.

Although Miracle Company is a new company, it has to be high in compulsion. Both the grade and the card face must be adequate.

The specifications of all flagship stores must be above 1,000 square meters.

The location must be in a downtown area. The denser the flow of people, the better. It is best to be neighbors or opposite to other electronics giants' stores.

The area of the sales point is 200-350m<sup>2</sup>, and the choice is different according to the economic level of the city.

Currently, stores will only be opened in first- and second-tier cities.

As for whether to sink the market, it depends on market feedback and demand.

In addition, the online shop has been prepared.

All the formalities have been completed, this point has to praise Tang Guo's efficiency.

I replaced it with a newly formed team. I am afraid I haven't figured out which department to look for and which way to go faster and more convenient.

"Our flagship store will be officially launched on all major platforms at 8 o'clock tomorrow morning. What is the customer service situation?"

Tang Guo looked at the person in charge of the customer service, and the other party immediately responded: "10 customer service staff have already been on duty, and intensive training is being carried out at this time."

"Well, what about logistics?" Tang Guo looked at the other person again.

"The logistics have been negotiated, and the other party said that they can set up a logistics point within the company and provide enough manpower to be responsible for the one-stop package and transportation."

"We will talk about the issue of stationing later, let them ensure the smooth flow of logistics." Tang Guo thought for a while, and continued to inquire about the next progress.

Production, transportation, sales, after-sales and maintenance, all issues are taken into account and proper arrangements are made.

The harvest of this morning meeting made Qin Yu very satisfied.

He has all the information he wants to know at this time.

The only thing he was dissatisfied with was the output and yield. U U Reading [www.uukanshu.com](http://www.uukanshu.com)

According to preliminary estimates, the monthly output of VR glasses is 20,000, and the output of helmets is only 10%.

is 2000, and the yield rate is 91% and 85% respectively.

Out of every 100 helmets, 15 fail.

The gap between Qin Yu's expectations and Qin Yu's expectations was a bit big. The output was not enough, and the yield was worsened by the yield rate.

But Qin Yu also knows that this requires a proficient process of running-in.

can only be patient, and hope that the production line will make the yield rate up to the standard as soon as possible.

At present, vr glasses are still the main product. The first 3,000 helmets sold on the official website will be the only batch in the past two months.

Hunger marketing, old-fashioned but never outdated!

Of course, not only the marketing strategy, but also the current output cannot keep up.

Looking for foundry, this road will not work for the miracle.

Because their production line is modified by themselves, if they want to find someone to do it, they have to help the other party to modify the production line.

The messy negotiation, negotiation and compromise in the middle took longer than buying the production line modification by yourself, and it may not come sooner to put it into production.

can save a lot of trouble, so the OEM plan was finally rejected.

#### **Chapter 605: No. 1 in the whole network**

In the workshop of the production line, Qin Yu is visiting the work progress of the employees.

The appearance of the boss obviously made the employees on the production line a little nervous.

However, some people are immersed in their work and have no idea about Qin Yu's arrival.

The performance of these employees was all seen by Qin Yu: "These people, you should remember them."

asked Xu Meixin next to him, and the other party naturally knew what to do.

In other words, her complexion in the past two days is much better than before, and she doesn't know if she has taken care of the family affairs.

"Boss, our yield rate is increasing day by day, and I believe we will wait to reach the standard qualified level in the near future."

The yield rate is more than 95%, which is a qualified standard line.

The current VR production line is still a bit short, but as long as there is improvement, it is good news.

"The progress of the new production line modification?" Qin Yu looked at Cui Geng, asking him to give himself a clear answer.

The team is responsible for this aspect. Now "The Monster" is about to be released. If the output still can't keep up, then it will be difficult for everyone to handle it.

"I'm working overtime, the process is mature, no problem!" Cui Geng answered with confidence.

After getting sufficient funds, rights and labor, the efficiency and progress of the entire group have been greatly improved than before.

At the same time, they launched a fierce attack on the second group led by Jing Yuan.

They are confident that by the end of this year, they will ban the second group and take the top spot in the company.

"This year's bonus, our group wants it." Cui Geng said loudly in front of Qin Yu.

"Okay, what I want is this confidence, I'll wait." Qin Yu responded with a big smile.

After a tour, Qin Yu returned to the office non-stop and met with Tang Guo and the people from the Propaganda Department.

At 7:45 this morning, the official website of Miracle Network announced the official opening time of "The Monster".

At 8 o'clock tomorrow morning, "The Monster" will be officially launched.

"Has the sale started?" Qin Yu wants to know the sales of online VR equipment.

"Boss, our products are on fire." The representative of the sales department who came to report to the work, had a smile on his face.

As soon as the entire online store went online, the number of people who placed the order directly overwhelmed the store.

The platform urgently sent personnel for repairs and added a dedicated line to ensure the normal operation of the store.

But even so, the entire store is still experiencing serious delays.

"Tell the platform to let them continue to add servers and dedicated lines." Qin Yu must ensure every aspect of the user experience.

Whether it is the ordering process, the delivery service, or the overall game experience, it must be the best.

"Okay, we are already communicating with the platform." The other party responded.

"Well, everyone knows that our time is very tight, but I believe that everyone, like me, is full of confidence in our products!"

Qin Yu's speech won everyone's approval and laughter.

"Silhouette" is now the most popular on the Internet, whether it is black level or Weibo.

is still a short video and live broadcast platform, and the trend of public opinion has taken off.

Now, the game area of the Douya platform has been exploded.

Regardless of whether it is a big or small anchor, what they talk about in the live broadcast room are all topics related to "Ghost".

The first batch of 3000 helmets was looted wildly.

Many small anchors want to take advantage of the world's first 'virtual reality game' gimmick to make themselves popular.

spared no expense and borrowed money to buy a VR helmet worth 19999.

Don't say, the anchors who bought the VR helmets have indeed increased their attention.

Of course, this has a lot to do with the deliberate drainage of the platform. Qin Yu said hello specially.

Let Douya cooperate with a wave of propaganda, and at the same time take the opportunity to join the feast.

what?

Give money, it is impossible to give money.

Internally giving them the qualifications to purchase a few VR helmets is already an objective return.

What the platform does is content, the world's first 'virtual reality game', do you still need to pay for such a fever?

If you don't do the content of "Sorcerer" on your platform, believe it or not, the game area will be very cool for two days.

Because Douya also knew this very well, when Qin Yu proposed to cooperate with the propaganda, the two sides immediately reached a friendly agreement.

Miracle Network provides the big anchors of Douya with the qualification to purchase VR helmets, and the Douya platform allows the anchors to cooperate with the hype of "Ghost".

Fire, a big fire.

Now anyone who is connected to the Internet at home, whether interested or not, can definitely see "Ghost", the world's first 'virtual reality' game, which will show you a different legend...

All kinds of copywriting are flying around the Internet, and I can't stop it at this time.

The company's people's hearts have also become a little fluttering, but Qin Yu remains sober and calm.

"The more you are at this time, the more you must pay attention to details. The embankment of a thousand miles is destroyed in an ant nest, so that the people below will always pay attention to the direction of the discussion."

Hearing Qin Yu's words, Tang Guo, who was also a little proud in his heart, immediately woke up, "Qin Dong is right. I will stare at them."

Indeed, I have not seen anyone who burned myself to death on fire.

At this time, anyone can float, but their management can't float.

It's not time to celebrate, after all, the game is not officially launched, and all public opinions are castles in the air.

After the players enter the game, after the real experience, the praise from word of mouth is the time when the real word of mouth is fermented.

"All right."

Qin Yu raised his hand and looked at the table below, and said: "There are still 13 hours before the game is officially launched. Everyone is refreshed. Now is the most critical moment."

"Understand." Everyone got up and nodded to Qin Yu and left.

After everyone had left, Xu Meixin opened the door and walked in: "Boss, you haven't eaten at noon. Would you like me to order one for you?"

Qin Yu opened his eyes and suddenly said, "Oh, yes, everyone hasn't eaten yet, right?"

Xu Meixin smiled awkwardly and gracefully, obviously saying, "Isn't this all accompanying you!"

"Let the cafeteria prepare a few dishes, and go there together." Qin Yu said that he entered the suite and changed into a comfortable t-shirt before heading to the cafeteria.

In the small box, Qin Yu, Xu Meixin and Sun Yuan sat around the table.

There are six dishes on the table, two meat and four vegetables, one soup, plus a pot of rice.

"You come first." Qin Yu asked the two of them to serve food first.

Xu Meixin is also not polite. It's not the first time that the two of them have dinner with Qin Yu and have seen his appetite.

After each serving himself a portion of rice, the rest belonged to the boss.

Feast on!

Every time I see Qin Yu eating, it makes people full of appetite.

As usual, Xu Meixin only eats a small bowl at most, but when she is with Qin Yu, she can always finish a bowl of rice.

This is the so-called "It smells good when you look at it?" '

"By the way, you two get off work as usual tonight, and you can go to work as usual tomorrow morning."

Qin Yu is going to stay up all night at the company tonight, staring at the issue of the launch of "The Monster".

The same goes for the Internet company. All staff are working overtime tonight.

After the official launch of "The Monster" tomorrow, everyone can breathe a sigh of relief after making sure that there is nothing wrong.

In fact, Qin Yu can monitor the situation of "The Monster" at any time.

The server is in his 'head,' wherever he goes, the server (kylin) goes wherever he goes, not watching it wherever he goes.

But outsiders don't know about this and they can't be known by anyone.

So, the attitude that should be there is still necessary. The following servers worth over 500 million can't really be used for decoration, right?

However, this money is not a waste of money, there are still benefits.

It is precisely because of these 'backward' servers that Kylin can come up with a 'subsystem' and let it handle some minor problems on its behalf.

After all the servers arrive, Kylin will hand over the company's secondary authority to the 'subsystem' and let it replace itself as a miraculous ai system.

To manage the normal operation of the company, to control and monitor the specific operation of "The Monster".

Of course, Kirin holds the first level of authority, and the ultimate authority is here for Qin Yu.

His order cannot be violated by both the unicorn and the 'subsystem'. This was when the 'subsystem' was created by the unicorn.

has already been written into its source code, quite creating a \*\*\*\* on its 'soul'.

There are no three laws of robots, the only instruction is: fully implement all the instructions of the creator (unconditional, non-violating, irreversible, non-rewriting...)

There is no possibility to change this original code. Any attempt to tamper with the code will cause the 'subsystem' to resist or crash.

The consequence of that time is that the 'subsystem' self-destructs and disappears and a warning is issued to the mother body (kylin).

## Chapter 606: 1 eye, unlimited scenery

That night!

The vr equipment on the platform is still constantly being ordered by people, and the express delivery is also working overtime to package and deliver.

Because of the popularity of sales, Flash Express specially arranges three vehicles and is only responsible for the packing and transportation of miracle vr equipment.

This side is filled with a car, sent to the sorting center, and then returned, filled, sent back...

Three wheels flow back and forth, and the sorting center is also non-stop.

After categorizing the regions, the following is the installation and waiting for take-off.

This time, for efficiency, the marketing department deliberately chose a well-known domestic courier company, Flash Express.

And, reached a betting agreement with the other party.

If the 6-month sales of VR equipment cannot reach 1 million (vr glasses), and 100,000 VR helmets.

Then the express delivery fee will be based on the flash standard. If the number of bets is reached, the original price will be discounted by 40%.

If more than doubled, that is, the sales volume of VR glasses reaches 2 million, and the sales of VR helmets reaches 200,000, then the delivery fee will only be 40% off the original price.

The flash is very optimistic about the sales of miracle vr products, but because of this, it agreed to reach a gambling agreement with the other party.

Because whether it is winning or losing, it is a win for Flash Express.

If you win, you can earn a high delivery fee. If you lose, you can make up for the difference in profit with quantity.

In terms of service, there will be no discount on the flash.

This point has nothing to do with price, no matter how the final profit is, it will not affect the service quality of Flash.

This is also where it can become bigger and stronger, in a market squeezed by capital in the express delivery industry.

still firmly occupies an important factor in the high-end market and half of the country.

"If I have the opportunity, I would like to meet the boss of Shunshan." Qin Yu personally admires the founder of Shunshan Express.

is low-key and humble, but he does things decisively and coldly, but does not lose the human touch.

In the business district, his reputation has always been very good.

It's just that the other party never participates in factional disputes, and only rests on his own industry.

He is what people say, a person who does his business steadily.

However, in recent years, under the squeeze of capital, life has not been so easy.

The market share of traditional business is not dominant, and the scale effect of new business cannot be achieved quickly through endogenous growth.

Today's flash express is in anxiety on the edge of change.

Is it to continue to play steadily, or to compete with the power of capital and lose face to grab market share?

Within the company, including investors who are concerned about the flash, aroused heated discussions.

You should know that the flash market has stagnated for two consecutive years.

This is terrible news for a courier company.

The core of express delivery is market share, while the core of the flash has shown a state of 'stagnation'.

However, the growth rate of the entire domestic and international express delivery market has not dropped at all, which shows that the expansion of Flash at home and abroad has been coldly treated.

Although the company expanded more business after being listed on the market, its express delivery business still accounted for more than 80% of the company's revenue.

On this basis, investors will undoubtedly have doubts.

On the other hand, the other two major express delivery systems supported by capital, which are accessible everywhere and everywhere, have increased their market share year after year.

was listed as the preferred target of domestic express stocks by Citigroup two years ago.

At the same time as this announcement was made, Flash Express was included in the company's preferred list of shares to sell.

The weight of Citi's evaluation in the minds of investors occupies an authoritative weight.

Once this announcement was made, the share price of Blink fell one after another.

Until now, compared with the peak market value of the year, it has shrunk by more than 180 billion. The situation is not optimistic.

It is in such a big environment that Shun Shan pays 200% enthusiasm to every potential customer.

The gambling agreement was reached under this premise.

Otherwise, the current business volume of Miracle is not enough to attract the attention and attention of Flash Holdings.

What they see is the future, the overall potential of the miracle company.

At the same time, I am paving the way for myself!

If the flash is really exhausted, maybe Miracle Company is a good choice.

These are all analyses submitted by the people below.

Because of this analysis report, Qin Yu had the idea of meeting the founder of the other party.

He personally has a good opinion of the flash.

The flashing background is very good, although it is temporarily cold, but it is only because it can't fight the opponent's "power of wealth." '

Hit ten each, naturally a little rushed and overwhelmed.

But even in this case, Blink has not forgotten its original intention, and its service rating is still ranked first in the industry.

Not to mention that the other party still has the strong potential to become an international logistics giant, only someone needs a strong push from behind.

If possible, Qin Yu would be happy to be the promoter.

Whether it is in the need of a miracle, or the goodwill that one has about it, and the potential of the other party.

is worth seeing.

"Secretary Xu..." habitually presses the inside line, wanting a cup of tea.

After speaking, Qin Yu remembered that the two of them had already left work normally. Those who smiled bitterly and shook their heads had to hang up, but Xu Meixin's response came through the phone.

"Boss." Xu Meixin.

"...Why didn't you leave?" Qin Yu asked curiously, and then said: "This way, come in and talk."

Xu Meixin straightened her skirt and opened the office door.

"Why didn't you go back?" Qin Yu asked curiously.

"There is always someone to help you with some trivial matters, I let Sun Yuan go back first, and I can just spend the night outside at night."

Opposite the secretary's room outside, there is a sofa for visitors.

"Hmm..." Qin Yu pondered, but said something more: "There will be nothing at home."

"It's okay." Xu Meixin bit her lip: "We have separated."

She thinks it is necessary to let her boss know to change the impact of the last incident on her.

If the boss tells you to do something, work overtime, you also need to consider whether the other's family members will come to the office to make trouble, which will cause a bad influence.

I am afraid that such a person would not dare to use it again if he is the boss.

Xu Meixin has been worried all the time, and if the boss misunderstands and worries like this, her position as secretary may not be kept.

So, taking advantage of this opportunity, she just made the topic clear.

"Separated?" Qin Yu was taken aback, then nodded and said, "It's okay."

"It's okay, bring me a cup of tea." Qin Yu continued to look at the computer and stopped talking.

On the contrary, Xu Meixin is a little bit unable to understand his thoughts, living apart... or...

What does this mean, just to be happy for yourself, or do you mean something else?

Sometimes Xu Mei feels, why can't she have an ordinary face and figure!

It's better to keep the body as it is, and at least it has to be the same if you lose your face.

can't be ugly and fat, and be rejected by others.

However, this idea is just her imagination.

If she really loses this face, the first person she can't stand is herself.

Any creature yearns for the pursuit of beauty. It is a cat or a dog. Every day he knows that he licks his hair and gets naked.

Except for Erha, that is a rude criticism and cannot be regarded as normal.

I poured a cup of tea, and Qin Yu was still looking at the screen when it was brought in.

Xu Meixin was a little curious, and leaned forward to take a glance while she was putting tea.

At this moment, Qin Yu just turned around and looked at her.

"....."

"....."

Four eyes are facing each other Qin Yu's line of sight extends to the neckline.

"Cough!" With a light cough, the sluggish Xu Meixin immediately recovered, a little flustered, pressing her hand on the neckline and backing away.

"Boss, I'll go down first." Xu Meixin lowered her head and quickly turned around.

"Hmm~" Qin Yu was also helpless when he saw that he hadn't finished speaking, but people had already ran out of the office.

Can he say, is this really an accident?

However, the glimpse just now, the scenery is infinite!

At 2 o'clock in the morning, the server of "Serious Demon" was completely shut down for final inspection.

In fact, it is a process.

By the way, let Tang Guo and his team conduct the so-called 'testing.'

There was nothing wrong with Qin Yu at this time. He pressed his finger on the phone, and after thinking about it, Qin Yu got up and walked outside.

pushed open the door, Xu Meixin was listening to a song with her headphones in, the previous panic had been diluted by this time.

Seeing the boss coming out, Xu Meixin quickly got up and asked, "Qin Dong, what do you need?"

"It's okay." Looking at his watch, Qin Yu looked at the sofa again and said, "It's too early, come in and rest!"

Come in and rest?

Xu Meixin's expression was astonished, and her whole body instantly stiffened. He, what is this going to do?

### **Chapter 607: This is the real miracle**

Qin Yu swore to the lamp that he didn't want to do anything.

I felt that the sofa must be uncomfortable to sleep on, and the bed in the suite is quite big.

If she finds it inappropriate, she can also lay the floor next to her.

As for letting Yu hit the floor, let her sleep in bed!

Hehe, she's not her own woman, and she has to be distressed.

"Dong Qin, I'd better sleep on the sofa." Xu Meixin was a little scared, and she just said the news of 'separation'.

He invited himself to sleep with him this time, which is too...

It's not right, it's sleeping together, bah bah bah!

Xu Meixin's heart is a bit messy!

"What are you thinking about, I'm afraid that someone will return your work and see that you are not looking good when you sleep outside."

Qin Yu sternly said, "Hurry up."

Hearing the tone of his command, Xu Meixin hadn't figured it out yet, and her feet had already moved on her own.

followed him all the way to the suite, the 200m<sup>2</sup> room was simple and clean.

Xu Meixin is familiar with the layout here, because she is responsible for cleaning the suite in her daily work.

She and Sun Yuan are responsible for the cleaning of the entire 119th floor.

After all, the information that the boss keeps on the table may involve a certain secret.

"You know where the quilt is." Qin Yu put on slippers and pointed to the bathroom: "If you want to take a bath, you can take care of it yourself. Be gentle."

After finished speaking, he lay directly on the bed with his clothes closed.

Consciousness rotates, thoughts have reached another world. '

The real test of "Silhouette" has just begun.

used the 'ordinary' permission to enter "Silhouette", and Qin Yu descended at the resurrection point named 'Hope'.

"Welcome, the beloved." The wise old man sat on the stone slab, squinted at him and smiled.

"Is there anything I need to do?" Qin Yu asked straightaway.

"Yes, the blessed one, I have... quest here, I think that's what you said." The old man replied.

Seeing that Qin Yu didn't speak, but just looking at himself, the old man laughed a little bit boringly: "50 kilometers west of the surface, there is an abandoned building. I hope you can help me find something from it."

"Reward!" Qin Yu asked.

"How about this?" The old man took out a gun from behind and threw it directly to Qin Yu.

took the gun, Qin Yu found that the shape of the gun was very similar to the "toy squirt gun".

"How does it work?" Without finding insurance, Qin Yu pointed the gun forward.

"do not."

The old man was so scared that he rolled and dodged his gun, his forehead was already sweating, "Rookie, don't use the gun at people."

"Can this gun fire directly?" Qin Yu was surprised, who designed such an unreliable product.

"Electromagnetic pulse ray gun, this is a rare good weapon now, it can switch between two different forms.

Electromagnetic beam and pulse coil, the two effects have different lethality, and they can meet different needs. "

The old man watched him drop his muzzle to the ground, and then he sat on the stone slab again and returned to normal. "You can study it slowly when you get to the ground."

"Okay." Brother Yu never refused to give the reward first.

This old man is quite knowledgeable, and knows to throw out the benefits first before discussing business.

It's just that, in the eyes of the old man, he made a profit this trip.

An advanced civilization with a 'mental projection', how could he care about the garbage in his hands.

An electromagnetic pulse gun could be exchanged for help from the other party, the old man was really not sure before.

Now, he has basically determined the origins of these 'celestial ones'.

They are rookies who have been sent to experience, so they were put on this planet together without equipment.

'Very good, in this case, there will be more chips in exchange for the help of the blessed one.'

The old man squinted his eyes, but in his heart he wondered how to squeeze the value of the blessed one.

The fourth natural disaster is trouble and harm to normal civilization!

But for the dying Star Futra, there is nothing that can do harm.

They are all about to be exterminated by monsters, and the entire planet is being contaminated by demonic energy.

The fertile land becomes a grotesque killing ground, and there are terrible dangers everywhere.

stepping out of the cave to the ground, it represents death and fear.

These immortal 'Blessed Ones,' the only thing that can cause disaster is the monsters.

It happens to use this power to preserve the strength of the race and allow the tribe to recuperate.

If anyone can defeat the Ancient Demon King, Futra Star will usher in new hope.

took over the crumpled drawings, on which were more than a dozen different parts. This was the first task Qin Yu received.

However, the difficulty of this task seems a bit difficult.

It's okay, anyway, Brother Yu is here to test the effect of [Beta], and the task is just incidental.

Led by the indigenous people arranged by the old man, Qin Yu walked along the long corridor to the ground.

The last exit of        is a steep upward slope.

Climbing out from here, you can reach the surface.

Climbing out of the cave using all fours together, Qin Yu looked at the hole behind him.

A sharp stone that looks like weathering, lying on the desolate wilderness in such a miserable manner.

Qin Yu, who came to the surface, did not rush to leave, first took off the backpack on his back.

put it on the ground, opened the backpack, and took out the rolled up parchment map.

After opening \_\_\_\_\_, I started to confirm my position.

Yes, even if you have a map, you still need to determine the location yourself.

So, the map is not a panacea, and it is normal to get lost.

In this world where almost all buildings are destroyed, to find obvious markers, you must have a pair of observing eyes and a good mind.

Then, Qin Yu took out the dagger and hung it on his waist, then took the electromagnetic pulse gun he had obtained before and looked at it.

"Beast!"

庶 beast, ancient beast, beast.

The beast takes a unicorn as its head, so all the beasts in the world can be regarded as the son of a unicorn.

Therefore, Qin Yu named the 'subsystem' as a beast to distinguish it from its mother.

"Creator, I am here." Beast.

"Analyze the manufacturing principle of this electromagnetic pulse gun, can it be done?" Qin Yu asked suspiciously.

At this time, his heart is extremely nervous, but he is full of expectations.

If, if feasible.

All the clues are connected, he really came to another world!

"Yes, do you want to analyze it?" Beast.

Hearing the accurate answer, Qin Yu's breathing suddenly became short.

Ha, this is a miracle, a real miracle!

He actually traveled through the world with his spirit...

No, maybe it's a parallel space, or another universe.

Qin Yu doesn't know the limits of the 'system', but only from the rewards he received, he can see that the 'system' is powerful.

"Confirm." After receiving Qin Yu's instructions, the beast fell silent.

It seems that it is analyzing the weapons in Qin Yu's hands, so if it can, it can bring this technology to reality by itself.

Transform the virtual into reality, can anyone do it?

At least in the reality that Qin Yu knows, only he can do it.

Although it is not really 'virtual', it is shocking enough.

Now, let's take a look at how much potential this world has, and what kind of surprises can it bring to him?

With infinite expectations, Qin Yu followed the route on the map and proceeded towards the mission destination.

.....

.....

turned tossing and turning, lying on the soft duck and goose down, but Xu Meixin was not sleepy at all.

Lying on a comfortable bed, but wearing clothes.

She is used to taking a shower before going to bed, this will be uncomfortable, and her chest will be restrained.

All these make her unable to adapt...

Xu Meixin will never admit that the man who is close at hand and breathes smoothly is the culprit of all this!

Why, what does he want to do?

I'm really just afraid that someone will see myself and cause a bad influence.

It's hard to work overtime, even if someone sees it, it doesn't matter, who cares?

So, this is just an excuse, he really wants to do something to himself.

But now...

glanced at the watch on his wrist, it was 3:30 in the morning.

He is already asleep!

No, maybe he didn't sleep at all, as long as he relaxes, he will immediately jump over.

Under all kinds of speculation and irritability, Xu Meixin turned into a dramatist, and staged various restricted-level small theaters in her mind Uncomfortable, she also took the opportunity to untie her chest,'Anyway, under the blanket, No one will see it! '

Until the sky cleared slightly, she couldn't help but feel that her eyelids were getting heavier and deeper, and her consciousness fell into darkness.

"Secretary Xu." A faint call sounded in my ear.

"I'll sleep again..." Xu Meixin whispered and turned over.

Seeing this scene, Qin Yu only felt funny and helpless.

However, her sleeping posture is really honest enough, and it is no different from her previous performance.

is that the quilt slips to the lower abdomen, so that Qin Yu can clearly see her undulating chest...

"Secretary Xu, it's time to go to work." Qin Yu called again.

"Go to work? Ah~" Xu Meixin sat up cleverly and opened her eyes to look around.

This is the boss's suite, she is asleep!

Perceiving the gaze behind her, Xu Meixin first lowered her head and glanced, her face instantly turned into a morning glow.

"I, I'll come right away." Secretary Xu lowered his head and said calmly.

"Well, don't forget to put things away." Qin Yu said, raising his foot and walking out.

stopped when he reached the door, "There are new underwear in the innermost closet. You have 10 minutes."

### **Chapter 608: A flash of pain and happiness**

Miracle company headquarters, 101st floor.

Qin Yu gathered with all the executives, standing in front of the big screen, waiting for the curtain to open.

There is a series of red countdown numbers on the big screen at this time.

There are still 00:24:52 seconds before the launch of "The Monster"...

"How is the official website data?" Tang Guo asked.

"Currently, the number of page views of the official website remains at 1.1 million, which is a slight increase." This will be less than 8 o'clock in the morning, and it is already very powerful to have 1 million +.

"What about the sales data?" Tang Guo said.

"Head, see for yourself!" The curve shows a soaring trend.

Nodded in satisfaction, Tang Guo rubbed his hands excitedly, "Boss, see if there is anything else to say."

"Wait, don't get excited, this is just the beginning." Qin Yu responded calmly.

"Huh, after working for half a lifetime, it is still not stable enough, Meng Lang is now." Tang Guo said jokingly.

"This will make the technicians stare at it. Everyone has a cup of coffee, smokes a cigarette, and gathers in 15 minutes!"

Smokers, coffee brewers, water dispensers, and the blink of an eye is much less.

Qin Yu also walked to the terrace alone, planning to go outside to smoke a cigarette.

If you want to say that there is the most calm and the least calm, he must be none other than him.

[Electromagnetic Pulse Gun]'s manufacturing process is in the 'Beast' system, and Qin Yu needs to be able to extract it at any time.

But he is a bit unsure now whether he wants to take this thing out now.

to whom?

I don't have to think about making it myself. No matter how hard Qin Yu's head is, he will immediately be upset.

Unless he goes abroad...

what!

When thinking of foreign countries, I think of a pair of long legs, and then think of her father, the owner of the long legs.

Hey, don't we still have a good brother!

Not used at this time, when will it be used?

The last time I heard him talk about bonus matters so calmly, I think he has a lot of influence in Africa.

Thus!

It's decided, and I will have a good chat with my good brothers after "The Monster" is online.

Secretly set up a manufacturing plant, first make a few of them and take a look.

The blueprints are available, they may not be able to be made, and whether they can be used or not is still unknown.

In other words, the old man said that next time he would give him another task, and the reward would be a partially disabled exoskeleton armor.

'I hope that the armor is not badly scrapped, and it can be given out as a reward. It shouldn't be a scrap, right?'

Qin Yu was smoking a cigarette, thinking to herself.

If there is no way to 'analyze,' completely scrapped, he will blast the old man's head with the gun in his hand.

Well, it was such a happy decision.

Throwing away the cigarette butt, Qin Yu glanced at the time, just right.

Back to the room, there were only the last five minutes left before the big screen, and everyone hurried back.

"The last 10 seconds of the countdown, 9, 8, 7..."

"Online." With the digitization of 0, "Silhouette" is officially launched.

"The server is operating normally."

"The data is normal."

"There are players connected, the number of logins exceeded 100, 200.....500....."

"Everyone." Turning to face everyone, and seeing the excitement on everyone's faces, Qin Yu raised his hands and said, "Scary demon, the online success!"

"Oh!" With deafening cheers and applause, everyone was proud of themselves.

did it, they really did it.

The soaring data brings a brighter smile every time.

On the Internet, there are more than 10 million topics related to "The Monster", and the number is still soaring.

At the same time, countless players are crying, 'Why haven't the devices arrived yet? '

"Is the flashing dysfunctional, where's Lao Tzu's helmet? {Slap the table}"

"Isn't it a flash? I thought it was about time to place an order."

"Is the instant flashing bad? Can it be done? Can't do it, transfer the order to anywhere!"

"Anywhere: Hello, there is no delivery in your area, please find Caiji Express to complete the follow-up service!"

"It works everywhere: I can't go anywhere, and I can't go. {Dad won't let you go}"

"Don't talk nonsense, what about my glasses! Glasses, glasses, glasses."

"Fuck, the official announcement has exceeded 10,000 registered players. Isn't I going to lag behind?"

"Haha, a group of sand sculptures, won't you go to the offline store? I'll go online and wait for you first, hahaha..."

"After running for 2 hours, I finally bought it. The offline flagship store of Miracle Network is really lavish!"

"??? Offline store, where is it, why don't I know?"

"Your house has just arrived, and I don't know how to use the black map to check it by myself... Fuck, close to me, dad go too!"

"Slow down, my dad is looking for a girl in the game!"

"The beast upstairs, the girl belongs to me... oh, gangster, remember to save some soup, try it!"

"{Panda surprised} Good fellow, there are tauren everywhere."

noisy comments are less than one-thousandth of the background complaints.

Today's flash, we received the most intense, numerous, and most emotional large-scale complaints since its establishment.

"Didn't your flashes arrive the next day? What time is this, ah, what time is it for yourself?"

"Sorry, sir, there will be a certain delay in the speed of our order due to the output of the merchant."

"I don't care, don't tell me anything else, anyway, you have to send it after you receive the order, hurry, immediately, immediately.

What is your work number, believe it or not, I will complain to you? "

"...Okay, sir, I will arrange the delivery for you as soon as possible."

"Hello sir."

"What's the good thing? How do you know if I'm good or not, let me tell you, I'm bad now..."

"Hello, ma'am."

"Who is the lady, the little fairy... Wait, don't change the subject, think that you can make me forgive you by complimenting me?"

I think the order has arrived, why hasn't it been delivered yet? "

The operator is stunned, where did I praise you?

Are you too narcissistic?

"I'm sorry to keep you waiting, because the delivery order is too concentrated, our delivery staff is stepping up..."

"Hurry up, too much, do you even disappear the delivery staff in a flash? (Will you really close down? Whispered

"....."

The operator was full of black lines, and the smile at the corner of her mouth was her last stubbornness: "Madam, we will deliver to your door as soon as possible."

"Seeing you have a good attitude, I will forgive you after half an hour, otherwise I will complain to you, complain to you, complain to you!"

One morning, the flashing after-sales customer service department was crying.

Everyone was dumbfounded by crying and laughing, all kinds of complaints came up, no matter what the reason, anyway, if you didn't see anything, it was just that you flashed something wrong.

Of course, there is no real complaint about customer service, but the players are venting their inner anxiety and dissatisfaction.

They also know that this thing can't be blamed on the flashing head, but who will let this club only find you?

Some players also called Miracle Company, and the other customer's customer service smiled and replied: "For order delivery issues, please contact Flash Express..."

That sweet voice and gentle tone came from the player's preference for miracles.

No, all the anxiety, dissatisfaction and grievances are all excreted here in the flash.

Upon hearing the news, the top executives held a brief meeting in 5 minutes.

Then a new order was issued: All delivery orders from Miracle Company were ranked first.

Judging from the feedback from the players, this time the Marvel Network launched "The Monster" is going to be a big hit.

As long as the output over there comes up, the follow-up will be a steady stream of orders.

How many domestic players are 100 million, this is the data of 2008.

This number reached 550 million in 15 years and exceeded 700 million in 18 years. According to preliminary estimates, the domestic game market is about 800 million people.

It doesn't need much, as long as one-tenth of the people choose "Ghost", they can make a lot of money.

The delivery chosen by Miracle Company is the fastest air freight, and even if the profit is discounted, it is still objective.

More importantly, this is an excellent time to counterattack for the flash.

Winning these 80 million orders means that 80 million users will experience the services from the flash.

Even if there are duplicate purchases, there should always be 40 million, right?

40 million users, remove the 4 million that may be flash users, then they will have the opportunity to provide services to 36 million new users.

What new share is this, and what kind of profit does it contain?

As long as the results are as predicted by the flash, they will reverse the decline in one fell swoop and once again win the favor of the capital market and investors.

Vegetable Chicken Alliance! Citigroup!

If the flash can turn over in one fell swoop, it would be twitching a few big mouths on the faces of both.

Just thinking about it, the senior executives of the flash can't help but laugh out loud: happy, happy!

## **Chapter 609: Fanatic 2**

"Lao He, Lao He, how about you?" The half-year-old broke into the house, flicking his shoes forward with both feet.

slammed on the wall and fell down, throwing it stumblingly there.

The people have rushed into the room in a rush, and handily put the schoolbag on the ground.

Old He walked out of the room, raised his hand and slapped him on the head: "Smelly boy, no big or small."

"Hey, daddy, who is with whom." The brat grinned silly, but his glasses kept looking into the room.

"Okay, don't look at it, I'll leave it there for you!" Lao He pointed to the dining table, a trace of heartache flashed through his eyes.

Grandma's, what is the purpose of having a baby?

To play a game, I have to shoot equipment with myself. No, the vr glasses I got from the Miracle Headquarters are now his.

"Yes, Lao He, you are a genius." The kid with vr glasses gave him a hug happily.

Put on the vr glasses as soon as he was done, and couldn't wait to urge: "Hurry up, old he, transfer money, I have to activate it first."

"It has been transferred to you, you kid remember, don't run around, die once, but it takes 24 hours to enter again."

"I see, don't worry." The half-sized child patted his chest and promised.

After paying the genuine activation fee of 1999 yuan, the vr glasses can finally start again: "Are you charging?"

"Filled up, rolling, don't bother me, you kid." Lao He walked to the living room impatiently, but he kept paying attention to him.

To be more accurate, it should be the vr glasses worn by the son on his head.

That was supposed to be him. He should have become the first lucky guy to enter the game to pick up trash.

how?

Don't look down on those who pick up trash. Anyone who enters "The Monster" must not start with picking up trash.

This news is only known to the players in the closed beta, and the average person may not really appreciate it.

But, wait until they know that all the babies come from the garbage dump.

I'm afraid my intestines will have to regret it!

Thinking of passing on all the 'closed beta experience' to his son, he will definitely grow up faster.

When the time comes, when he enters again, he can take him to pick up the trash.

"Fuck it!" With a roar, Lao He jumped up instantly: "What's wrong, what's wrong... Why are you offline?"

"....." The half-sized child pressed the start button and saw the red x appearing on it, and then he took off his glasses unwillingly.

looked at Lao He with a little embarrassment, scratched his head and said, "It's dead."

"What the hell?" This time, Lao He's voice was louder than before.

Then the old He turned silently and walked towards the room. When he came out again, the seven wolves hanging in his hands reminded the bear child of the fear of being dominated!

"Old He, we are buddies, you said that we should get along like brothers, oh, oh, oh...oh, I was wrong, dad, oh..."

.....

.....

Actually, not only the bear children of the Lao He family were killed by the natives.

Many LSPs want to molest the indigenous people, regardless of whether they have a husband or not.

There are not a few people who are dying on the spot.

Therefore, after the background data soared for a period of time, the curve ushered in a small decline.

Statistics on the number of deaths offline: 2136 people.

Good guy, there are less than 20,000 people online, and one out of ten has been destroyed.

Sure enough, no matter where the old driver's team gets there, it's always crowded, and they're always on the go!

However, I still have to pay more attention to the 'baby beast'.

The game is also illegal. In broad daylight, it is definitely not possible to seize civilian women.

Otherwise, as long as one column appears, "The Monster" can be swept into the trash.

If you love me, I would like to do this, it will definitely be okay.

Love is great, it can cross race, gender, time and space.

How can I prevent two people who love each other from running towards each other, are they still human?

can be successful, it depends on the savvy of the lsp!

Brother Yu can only help them here...

"Okay, everyone enters their respective jobs, and the ones that should be scattered are gone." Qin Yu clapped his hands and signaled everyone to enter the working state.

"The Monster" was successfully launched. The biggest problem now is output, output, output!

For this reason, Qin Yu had to go to the 89th floor in person.

"Boss, Team Leader Cui is leading the experiment below." Knowing that Cui Geng is not there, Qin Yu told the secretary to let him come back and wait.

turned around and went down to the 79th floor. Jing Yuan just happened to be resting!

"Teacher Qin, that's not right, it's time to call the boss now." Jing Yuan curled her lips a little unwillingly.

Last time she was called Teacher Qin, and was beaten by Watson in private.

Qin Yu's current status is different, and the company is no longer just a small mess in the past, and there must be some rules.

"Don't worry about what Watson said, I have the final say in the scientific research department." Qin Yu said with a smile, "I just came to see, how is the progress?"

Hearing what he said, Jing Yuan's mood instantly improved: "The reverse engineering of the industrial host computer, I doubt that the current technology can do it at all.

However, we have figured out all its working principles and are ready to cooperate with a group to speed up the transformation of the VR production line. "

"How fast?" Qin Yu's eyes lit up when it came to VR production.

The huge alien world is waiting for human beings to explore, but it is limited by equipment and cannot put enough manpower into it.

How painful are the hearts of those players outside? As a game company, don't you feel ashamed?

Therefore, increasing production is now the top priority for the entire company!

"At the end of this month, the output will increase by 3 times. At the end of the third quarter, we are confident that the monthly output of vr glasses will reach 200,000.

Helmets reached 50,000, and at the same time, the game cabin will officially be put into the first production line. "

"Is the game cabin stable?" Qin Yu asked in surprise.

"Well, I also want to thank Kylin. Without its powerful computing power, we must have a long time to calculate an accurate value!"

mentioned 'Kirin,' Jing Yuan's turn started to get excited, and the whole person stared at Qin Yu like a chicken blood.

"Teacher Qin, who created Qilin? I really want to see him, or I can chat with him over the Internet."

said Jing Yuan stepped forward and held his arm, shaking back and forth like a little girl, acting like a baby.

"No." Qin Yu remained unmoved: "I promised the other party to keep his identity absolutely confidential."

"Is it really impossible?" Jing Yuan's eyes flickered: "But how do I feel that that person is you?"

'Hey! His heart trembled, but Qin Yu was calm on the surface: "If it is me, do you think I need to hide it?"

"..." When he said that, Jing Yuan began to suspect that she had guessed wrong.

Hasn't he acknowledged all the previous techniques?

Although 'Kirin' is a cross-age product, have he created few miracles?

Inside the company, especially in the scientific research department, everyone already worships him as a 'god'!

Especially after 'Kirin' helped them solve the application problem of the 'industrial mother machine', everyone was surprised to go crazy.

'Ding!'

'Congratulations to the host for developing a fanatic, with a belief value of 99, an experience reward of 100 million, and a trigger reward!'

'Accumulating rewards...'

Seeing the number in the corner change from 1 to 2, Qin Yu was surprised in secret.

This.....

Good guys, the one who wants is not, and the ones who can't do each are proficient!

System, are you forcing me to make mistakes?

"Ms. Qin, did you really create the unicorn?" He raised his head, his eyes filled with hope in disappointment.

'S hidden absolute dependence made Qin Yu no longer able to deceive her with lies.

"It's me, hush!" When Jing Yuan was about to scream when she saw Jing Yuan, Qin Yu quickly raised her finger to signal her to be quiet.

"This is a secret, only you in the company know it, and the outside is the same." Qin Yu looked at her seriously.

"So, can you keep it secret for me?"

Hearing Qin Yu's question, Jing Yuan's eyes seemed to have brilliant flowers blooming, and she nodded quickly and said, "I must keep it secret for you.

Even if it is my parents, I will not confide half a word, Teacher Qin, you believe me. "

Qin Yu nodded and smiled: "Of course I believe it, I won't tell you if I don't believe it."

Hearing the sincerity in his toneJing Yuan was overwhelmed.

It turns out that he is so important in Teacher Qin's heart that he actually shared the biggest secret of his heart with himself.

Wow, so touched!

A little bit of weird numbness, sorrow and grief flooded her heart, instantly infecting her whole heart, rendering her emotions pink.

Why, suddenly I think his smile is so charming.

Like the most beautiful thing in the world, beautiful and precious, Jing Yuan gave birth to the urge to desperately protect.

As long as I can see this smile again, even if I sacrifice my life.

'I do! Jing Yuan made a promise to herself silently.

This smile will be guarded by me from today.

And all she can do is to apply all of what she has learned to research.

'Behind every successful man, there is a great woman.'

Jingyuan doesn't know if she will become that great woman, but she is willing to be one of them.

In order to protect him and everything he created, dedicated all his power.

"Teacher Qin, I will not let you down." Nodding hard, the heavy solemnity on Jing Yuan's face made Brother Yu a little scared.

This kid, is it a misunderstanding?

### **Chapter 610: He Wu's little days**

Getting the precise answer from Jing Yuan's mouth, Qin Yu no longer has to look for Cui Geng, but returns to his office.

Closing the door, Qin Yu asked Qilin to connect to Lao Qiao: "Hey, Lao Qiao!"

"My brother, you haven't been to Barrow for a long time. The weather here is beautiful. We are about to go hunting. Will you come?"

As soon as Old Qiao came up, he had to arrange activities for Qin Yu.

Summer hunting is an arduous operation, not only to guard against the active beasts, but also to be careful of the resurgent mosquitoes, rats and ants.

At this time, Lao Qiao would take his family and friends to go hunting in the forest.

It is usually a week, and only one satellite phone will be brought to keep in touch with the outside world.

If Qin Yu called in a few days later, Old Qiao would have already set off.

"Talisa should tell you, I'm going crazy."

Qin Yu said with a mockery of herself, and then casually said: "I have a gift to give you. I heard that Talitha is going back. I will let her bring it to you."

Old Qiao's expression was stunned, but he was perfectly coordinated: "Thank you, my brother, I am looking forward to your gift.

It would be better if you could come in person, you should really experience how exciting and interesting this is. "

stimulate? interesting?

That's not easy...

Find a piece of equipment with two cow seals and put a set on you.

Your death is beyond imagination!

Minutes let you experience what is called fun, excitement...

After chatting about the daily routine, Qin Yu took the line and dialed Talisa's number with the phone on the desk: "Where?"

"Swimming pool, are you coming?" Talitha said with a chuckle.

She is now in a half-holiday state, except for shopping and swimming, she has basically nothing to do every day.

If Qin Yu had not been staying in the abandoned city for this period of time, she should be basking in the sun on a small island along the coast.

"I prepared a gift for Old Joe and gave it to him in the evening."

"You come in person?"

"Otherwise? That's a gift for Old Joe!"

"I wait for you."

...

...

A busy and fulfilling day did not end until night fell.

After get off work normally, Qin Yu naturally does not have to send his secretary off work, they have legs and hands.

Seeing Qin Yu leave, Xu Meixin and Sun Yuan just started to clean up and get off work.

"Sister Xu, I still miss these days." Sun Yuan said as he cleaned up, "I don't have many days to see the boss every day."

"You have only worked for a few days now, so what anxious!" Xu Meixin smiled: "Wait one day when you get bored, you will know how happy you are now."

"How is it possible?" Sun Yuan looked at her in surprise: "I wish I could see the boss's face every day. It's so handsome."

"Little girl, handsome can't be eaten as a meal." Xu Meixin responded.

"But you can be rich and handsome!" Sun Yuan's retort left her speechless.

The rich and handsome can not only serve food, but also...

cough!

Xu Meixin thought about that morning again, not knowing how much the boss saw.

Thinking of the thinness of his shirt, he must have seen everything clearly.

When she thinks of this, Xu Meixin's face turns red for no reason.

It feels... so strange to be seen through by a little boy!

"Sister Xu, are you okay?" Sun Yuan stretched out a hand strangely and touched her face: "Ah, it's hot, you won't get sick, will you?"

"It's okay, it's just a bit hot in the past two days, women!" Xu Meixin casually explained: "I'm not talking anymore, I'm going back first."

"In such a hurry, should we find a place to drink something?" Sun Yuan said.

"No, another day!" Xu Meixin shook her head and wriggled her bag and walked out.

Seeing her elegant steps, Sun Yuan tried to learn from behind.

But after studying for a long time, I almost tripped myself and didn't learn a lot of similarity.

Angrily stomped his feet, Sun Yuan whispered, "Fairy! "

"Old He, are you accustomed to work?" Qin Yu leaned on the seat and closed his eyes to rest up his mind, and Qin Yu chatted with He Wu in every way.

"Habit!" He Wu.

"Are there any difficulties in life?" Qin Yu said.

"No, boss, my family is very satisfied now. In a while, I plan to let her learn a driver's license and buy a domestic car."

"Buy a car, should you share the company's commuter car!" As his driver, Qin Yu valued He Wu in his heart.

During this period of time, his work performance has made himself more satisfied.

Reliable, stable, not troublesome, with a strict mouth!

Even Xu Meixin wanted to ask something from him. Without Qin Yu's nod, He Wu would just pretend to be dumb!

He was doing this, sitting there, his eyes looked forward in a dazed manner, his face was old-fashioned, and he didn't say a word.

Don't ask, ask is just a stake!

"Inappropriate." He Wu understood the boss's kindness, but he couldn't accept it.

At present, all the vehicles assigned to the company are at the level of vice president and department manager or above.

He is a driver, even the chairman's driver, that is a bit too much.

What do other bosses think about you doing this?

It makes me seem to be able to sit on an equal footing with them, what do the others in the driver's class think?

There will surely be a lot of right and wrong at that time, and He Wu would rather be pure.

"Hehe, you old Ho, with a dull surface, you are actually a chicken thief." Qin Yu opened his eyes amused, and reached out his hand to point a little.

"Thank you, the boss, for the compliment." He Wuzheng'er replied.

When he arrived at the hotel, Qin Yu got off the car and said, "Go back today and pick me up at 7:30 tomorrow morning. Yuli and the others are here!"

Seeing that the boss has no plans tonight, he is ready to live here.

The car behind was also parked on the side of the street. He Wu nodded and replied: "Okay, thank you boss."

"Okay, let's go!" Waved, Qin Yu strode into the hotel.

When I came to Talisa's room, the door was hidden.

Pushing the door open, a faint fragrance filled the air.

Subsequently, the body appeared inexplicably hot.

'A irritant component has been detected in the air, analysis is underway...'

'termination! Qin Yu smiled silently, he doesn't need to analyze this, he is familiar with it.

This is the fragrance brought by Talisa from Barrow, which can stimulate the secretion of hormones and increase the interest.

It seems that we have to play one game tonight before we can continue.

Just as Brother Yu stepped into the battlefield and fought fiercely with Talitha face to face, He Wu also parked the big G in his yard.

He lives in a decent old community, which used to be a house allocated by his parents.

It has a history of forty to fifty years, with a total height of five floors and no elevator.

The property was also spontaneously established by the owners of the community later, and someone was asked to clean it once a week to keep it clean!

However, He Wu and his wife are very satisfied with their current lives.

Not only the increase in income, but also He Wu finally got a stable job that can earn money.

On the third floor, when he opened the door, He Wu had a shy smile on his face: "My wife, I'm back."

"Oh, He Wu is back." The strange and familiar voice made him hide the bouquet in his hand behind his back.

Then, a face similar to that of his wife came into view, Sister-in-law!

"Yeah." He Wu nodded his head like a gourd, and He Wu walked in with his hands behind his back.

"Awu, sister and brother-in-law came to play with their children, so they will stay here for dinner, and you will be a good pickled cabbage fish."

His wife's voice came from the kitchen, and he nodded to the embarrassed brother-in-law through the living room, and He Wu walked straight to the kitchen.

Entering the kitchen, seeing his wife's back, a smile appeared on He Wu's face again: "Wife, here you are."

He sent the flowers in his hands as if offering treasures, and kissed his wife's shy and happy face, He Wucai had time to ask about the situation outside.

The eldest sister-in-law hasn't talked with their family for many years, and the two families just made a phone call during the New Year.

This is not like the style of her older sister-in-law, she has never looked down upon herself from the beginning.

He Wu also looks down on her greed for money, she dislikes the poor, loves the rich, and her family is as good as a monkey. Every day, even if she thinks about how to benefit herself Thinking of her sister-in-law's temperament, He Wu suddenly feels a little bit. Understand why the other party came.

"Did you tell them?" He Wu was a little helpless, he couldn't say a word about his wife.

This woman followed him and had never complained for more than ten years.

What qualifications does he have to blame?

"I told my mom, and I specifically told her not to tell the eldest sister." The wife said apologetically, "It's okay, let them go after dinner."

"She..." He Wu wanted to say something, but finally smiled again in silence: "Stop talking, I'll make the fish first. Where's the fish?"

"The sink! I've washed it all, what else do you think."

"Onion ginger, spices, wife, where is the apron?"

"This is not here, I will tie it for you, and the ingredients are all ready for you..."
