

## Pinnacle 681

### Chapter 681: Upgrades and rewards

According to Qin Yu's observations during this period, mad believers can provide 1-10 points/day, and devotees 1-3 points/day.

The upper limit for devotees is 1 point/day, while for pan-believers, only 1 to 2 points/week.

Pan believers...

1~2 o'clock/month, unless it reaches a certain amount of change.

Otherwise, it can basically be ignored!

What fascinates Qin Yu the most is actually the "Basic Architecture of Light Gate 1.0" in the [Knowledge] category.

Although this name is a bit suspicious of matryoshka, 1.0~~ unlimited version.

But it can set up a teleportation light gate between the planet and the planet, even if it is a matryoshka.

Unfortunately, the price of this thing is as high as 20,000 faith points.

For Yu Ge at this stage, you can only watch from a distance, not play with it...

Suddenly, dull and tasteless!

Calculated according to the current increase rate of belief points per day, if you are lucky, it will take 11 days to accumulate 1,000 belief points.

If you are unlucky, you can make it in 20 days.

Seeing that the goal is close at hand, Brother Yu is naturally in a good mood.

"Close the mall and show the latest rewards!" Qin Yu said silently.

"Ding!"

"1+3, multiple happiness, multiple rewards. Congratulations to the host for realizing the true meaning of happiness. Starting from salary, random rewards are triggered."

"Reward 1: Sunshine value +2."

"Reward 2: The Big Bang Card of Public Opinion."

"Reward 3: Kinetic energy manipulator drawing."

It is worthy of the happiness of 1+3. Brother Yu felt full of sincerity the first time.

Qin Yu ordered Qilin to analyze the drawings of the kinetic energy manipulator as soon as it was unfolded.

At the same time, all knowledge poured into Qin Yu's mind, and he archived his memory.

Public Opinion Big Bang Card: It can guide the trend of public opinion, ignore the rationality, and detonate the public opinion frenzy.

Tip: The duration is 168H.

The sunshine value +2 is the gain provided by Caiying and Zhisu.

Jenny was no longer a little girl before this. Although the freshness was as high as 88 points, it was still a pity.

However, because of this, her performance last night was crazy to the extreme.

I want to use my own efforts to reverse my physical disadvantages.

Although she doesn't think so personally, what age is it...

But seeing the youngsters bleeding and sweating, in order not to make herself look maverick, Jenny can only make up for it with double sweat! !

"Ding!"

"Congratulations to the host for the upgrade, the current level is LV9, please keep working hard."

The money has arrived and has been transferred to the other party's account.

Qin Yu finally said, "Open the system panel."

"Show existing supplies." Qin Yu.

When the backpack compartment is opened, the first thing that attracts the eye is the consumer discount card 3\*.

This card has been used for almost 2 years, and Brother Yu has been useless.

When buying Futuristic Rhapsody Paradise, I have considered it.

But when he thought of the experience points needed to upgrade the system, Qin Yu once again threw it at the bottom of his backpack.

The second grid is a two-level reversal card, and the third grid contains a brand new special card: the cliff card.

Cliff Card: After choosing a stock to use, the locked stock price will fall off a cliff within 7 days.

Tip: The target needs to have huge hidden dangers.

Tip 2: High-quality stocks, concept stocks, and new stocks cannot be locked.

Tip 3: Use this card to attract deadly enemies with a higher probability.

Warm Tips: Please be sure to cut the grass and roots!

This card was originally used by Qin Yu to bring Sanqinhui to invest next time.

Now, there is the [Big Bang Card of Public Opinion].

Qin Yu decided to keep it, waiting for another opportunity to use it again.

This time, I can use the [Big Bang Card of Public Opinion] to stir up a wave of concepts, and now I can let them prepare first.

Just do it if he thinks of it, Qin Yu opened the WeChat account and found the group of Sanqinhui:

"Notice, the latest action: prepare funds in one week, and enter the following accounts...

The core members have a quota of 1 billion and the remaining members have a quota of 200 million. Those who fail to enter the account by the deadline shall be deemed to have given up voluntarily. "

The group that was still as quiet as a deep well, fry the pan instantly: "There is action."

"Mom, I finally waited."

"Brother Yu, Brother Yu, can I make money now?"

"Brother Yu, the quota is only 200 million, is it too small, I have money."

"Fuck, as long as you have money, and as long as you are capable, why don't you go to heaven?"

"Be quiet, close!" Xu Hao.

The following speeches became gentle and orderly in an instant, each of which indicated whether it was possible to give more quotas.

No one thinks that it is more than 200 million, but they think it is too small.

It's not that they all have a wealth of money and don't take money as money.

It is Lixin Investment, which has proven its ability and gained the trust of everyone with its amazing rate of return of several successes.

A bit blind, but sometimes in the face of miracles, blindness can also become an alternative success.

Looking at the achievements of Lixin Investment since its establishment, which time is not a remarkable record.

The last two reverse operations on Taipower were included in the classic tutorials of major financial institutes.

Repeatedly take it to class and analyze it.

That keen market insight and financial sense has made many big shots amazed: "This kid is born to eat this bowl of rice!"

Under this general trend, there are three successful examples of Li Xiao, Xu Hao, and Yang Chengjun, just like this alive.

They just want to calm down but can't calm down.

Ever since joining the Sanqin Club, I have been holding back a bit of energy, waiting for Qin Yu to announce his action.

The family had prepared the money early and kept it still in the account.

The special funds are used to invest and co-invest in Lixin, and for the rest, no one wants to touch the money.

Those who were able to join the Three Qin Club were reviewed by Li Xiao and Qin Yu nodded in the second instance.

Regardless of character, character, family background, strength, all aspects are fine!

Everyone is so concerned about Lixin's investment, and it's already a lot of money to do other things.

But on this matter, 200 million is really not much.

Each company has reserves of more than 300 million yuan, and within a week, if you are willing, it is not a problem to raise 200 million yuan to collect 500 million yuan.

Now, Qin Yu only gives a quota of 200 million yuan, which...not enough!

It's like you have saved 2,000 yuan and rushed to find the periphery, thinking how you have to be a net red face, long legs, white and tender skin, pink and delicate.

Then I found out that people only provide affordable 298T...

In an instant, it was not feeling in my heart.

It is said that the net red face, S waist, long legs, clearly said the truth.

Qin Yu can ignore these small complaints. After the notification is finished, he emphasizes the time again, and he closes the group chat.

With a quick pull, I saw the bedroom group with Shen Dong and Yan Er.

Brother Yu Yinyin smiled, open the group chat, select the picture-album-click to select-original picture-send.

call out!

5 seconds later, Shen Dong's frenzied bombardment struck.

One by one, the voices started to swipe the screen frantically, so that Yan Er didn't have time to see what was going on.

The group chat reminder on the mobile phone rang endlessly.

Wait for him to open the WeChat account again and look at "Dear guy, your mouth is pretending to be Blue Fire Gatling? It's 99+ every minute."

Holding back the full of complaints and climbing upstairs, waited to see Qin Yufa's picture clearly.

Yan Er's whole person was bad in an instant.

This, this, this... How can this be tolerated?

Even if a person ran to bomb Seoul, Zhuzi was not a human being.

Looking at the last photo in the hotel, the three girls are kneeling on the sofa, Qin Yu standing in the forefront wearing bathrobes, looking up at a 45-degree angle.

Click~

Yan Er's heart was also broken, red rose, wild rose, April in the world...

It's all gone, wow...

## **Chapter 682: Upgrades and rewards**

According to Qin Yu's observations during this period, mad believers can provide 1-10 points/day, and devotees 1-3 points/day.

The upper limit for devotees is 1 point/day, while for pan-believers, only 1 to 2 points/week.

Pan believers...

### **Chapter 683: Ministry of Truth**

Futra Star.

The Church of Miracle Science, the Sanctuary.

Ann adjusted her posture, letting her numb knees return to intuition, and she couldn't help thinking about when the adults would return.

For 28 days, the adults have not yet returned.

Ann, who desperately wants to join the "Ascension" project, has become more and more impetuous.

At this moment, calm footsteps came from the cave.

Ann recognized that it was his father's footsteps: "Anda."

Anda, who stopped at the door, had a complicated expression, but still said calmly, "Is your lord back?"

"Not back yet." Ann responded.

"Someone found the trace of the Balrog, I want to invite you to go there." Anda said.

"I want to guard your lord."

"No one will hurt him. This is 18...Science Church." Anda rubbed the bridge of his nose with a headache.

He is still not quite comfortable with this new name, Church of Science, what is that.

A combination of science and religion?

"I want to guard your lord." Ann's voice is still as firm as before.

"But... without you, it is very likely that the hunt cannot be completed. That is also the order of the adults." Anda knew that he could not persuade her.

In this case, she used the adult's order to persuade her in the opposite way.

This task, hunt down the Balrog!

The same is the order of the adults, the most important thing for the Church of Miracles is to reserve food and hunt monsters.

Now, they found the most powerful medium monster nearby, the Balrog.

As long as this monster is surrendered, the entire area will be temporarily safe, and the reputation of the Church of Science will also be established.

This is very helpful for the plan to annex nearby shelters!

The Church of Science that can hunt down medium-sized monsters will become a behemoth in the eyes of others.

No one will refuse the solicitation of such an organization, and this solicitation cannot be refused.

"...The mecha is repaired." Ann suddenly changed the subject.

"Yes, the third Xingtian armor, I will keep one at the base." Anda said.

"Weapon." An's concise language requires a long time to think about it.

Anda immediately responded: "37 electromagnetic pulse guns, 1 particle pulse gun...Although it can only be attacked 3 times, it will be scrapped."

The particle pulse cannon was found from the wreckage of a ship that fell to the ground and brought back after being disassembled.

Half of the entire gun mount was destroyed, and the scientist mounted it on a truck under the guidance of an adult.

But because the damage was too serious, the particle accelerator would be completely scrapped after 3 attacks.

Unless you can find critical precision parts to replace and repair!

"Got it!" An's figure appeared outside the cave, looking at Anda calmly: "Who stayed?"

...

...

After 40 minutes, the demon hunting team led by Anda set off.

This is a brand-new organization within the Church of Science, the Ministry of Truth: Demon Hunting Team. Those who can join are among the best scavengers.

They have a brand new name: Demon Hunter.

All truths are within the range of guns!

Similar to the demon hunters mentioned by Gao Bo, they also mainly hunt and kill demons.

At present, there are 43 people in the full staff, plus An who temporarily joined the team, a total of 44 people.

The numbers are not very auspicious, but four-fifths of the combat personnel of the Church of Science have been transferred.

Anda and the entire church attached great importance to this operation to hunt the Balrog.

Otherwise, he would not invite Ann to join him personally.

As a [mutant], her ability is an indispensable and powerful support.

Because there are too many people and there are particle pulse cannons, they can only choose to walk on the ground.

The predators are controlled by Ann, who searches and locks the target position first.

"Found it." An Qing cold voice came from the short-range wireless communicator.

At this moment, she was driving the predator close to the ground, following the ferocious monster that exuded the scorching heat from a distance.

After teleporting the target location, Ann carefully observed the monster in front of her.

The Balrog, seven or eight meters high, was covered with blue muscle strips.

Like a continuous ravine on the ground, the red magma in the depression kept surging.

Sometimes bursts of sparks fell on the ground, burning the earth into a dead silence of black dust.

Wherever the flame demon passes, no grass grows.

In the center of its chest, the dazzling red halo is its core.

Unless the core can be crushed and stripped, it is difficult to completely kill it.

Monsters have extremely strong healing power. Once given enough time to recover, no matter how severe the injury is, it can be recovered.

Therefore, this battle must be decided quickly.

Soon, a cloud of dust appeared in the distance, and it was the demon hunting team led by Anda arrived.

"Ann, the battle begins!" As Anda's voice sounded, the predator suddenly leaned forward and pulled up, and the laser weapon below was aimed at the Balrog in the distance.

call out!

The red beam accurately hit the Balrog's back, booming~

There was an explosion, but the predator suddenly turned over a swallow, turned around and ran away.

Phoo~

A burning arm slammed to the previous position of the predator and swept across.

Hesitate and lose!

If Ann hesitates for 1 second, the current predator has crashed under the attack.

"Prepare, it's coming." As he watched the flame demon running from behind and roaring wildly, An's expression was as indifferent as before.

The more you are nervous, the more you have to stay calm.

This is the first element summed up with life by every surviving survivor.

"Charging, 5, 4, 3, 2, 1, launch!"

When Anda counted to 1, the predator fishing the Balrog suddenly dived down.

When the fuselage was almost parallel to the ground, a two-finger-thick blue light beam flew past the top of the nose.

Boom~

Amid the strong explosion, Anda's voice came again: "Leave!"

Although he had tried his best to suppress his emotions, the hidden anxiety was still noticed by An.

Missed?

Ann's first reaction was that the attack was biased.

But she has tried her best to shield the Balrog's sight, so that it will focus all its attention on the predator.

There should be no mistakes in the cooperation at that moment.

"Warning, offensive sexual energy source detected!" The alarm sounded let Ann understand why he became nervous.

That's not a medium monster, Balrog.

It's a high-level monster, Lord Flame Demon.

"Damn, haven't they already left?" Pressing the escape button without hesitation, a violent explosion sounded from behind.

Predators are like fragile toys that explode into poignant fireworks in the air.

"Ann." Anda clenched his fists, the muscles on his face suddenly tightened, making his expression look particularly terrifying.

"Lock the target." The calm and suppressed anger caused the whole team to burn.

Everyone's heart was holding a sigh of breath.

The most tragic encounter is about to begin...

"Launch." The blue light beam struck forward again, and instantly arrived in front of Lord Flame Demon. At the same time, Lord Flame Demon advocated opening his mouth, and a beam of red heat energy that was also compressed and condensed was sprayed out.

Accurately collide with the particle beam.

This time, there was no cover from the predators, and this scene was clearly reflected in everyone's eyes.

It also made them feel heavy, and the devil breathed!

Regarded as a particle pulse cannon capable of turning the tide of battle, both attacks were completely blocked, failing to cause heavy damage to the target.

It only consumes part of the energy of the Flame Demon Lord, and the burning red core in his chest is a little dim that is not easily noticeable.

Now, it has only one chance to attack, and it will completely become a waste product.

"Coming soon." The scientist stepped back quietly.

He is only as a non-combatant to provide effective combat plans for combat.

Except for a kinetic pistol, I don't even have an electromagnetic pulse gun.

Therefore, it is better to stay away as soon as possible and let the demon hunters who are willing to dedicate everything to [God] to work hard.

"Huh~" Taking a deep breath, Anda drew out the thermal knife on his waist and shouted angrily:  
"Prepare to fight."

"Wooha~" Raising the weapon high, everyone spontaneously dispersed.

In an instant, Lord Flame Demon had broken into the encirclement, looking down at these fragile little ants, his expression was full of teasing ridicule.

The expression clearly said: "Little bugs, you are surrounded."

"Fuck him." I don't know which stunned head shouted, and everyone fired at the target at the same time.

Fierce explosions continued one after another, and the Lord of Flame Demon seemed to be hung up by a firecracker, crackling non-stop.

The blasted lava splashed out like water splashes, and two demon hunters who could not dodge were hit by the fire.

"Ah~" A miserable and desperate wailing sounded, and the twisted body burned and smoked in twitching, turning into two pools of scorched dross in the blink of an eye.

**Chapter 684: Choose and Arrive**

"Fragile bugs, your attack is like tickling me."

Lord Flame Demon stood there, letting these little bugs massage and scrape himself.

"Have a little harder, insects, haven't you eaten?" Sitting cross-legged on the ground, Lord Flame Demon squinted his eyes and continued to enjoy.

This reminded it of the fond memories in his hometown, when a deformity demon would massage his loose bones.

After the enjoyment, the Flame Demon Lord will send them to his mouth as desserts for a slaying ceremony!

That was the happiest day for Lord Flame Demon, and now it feels the original happiness again.

"Attack its core." Anda rushed forward with a heat knife.

Raise the blade high and slash it, Dangdang~

Sparks flew everywhere, and Anda kept adjusting his position, slashing the left arm of Lord Flame Demon.

Squinting Sovereign Flame Demon squinted at the happiest little insect who jumped. He has good Gu Sha skills.

Under the beating, the 'blood' that was about to stagnate became active and dredged again.

The molten smelt between the ravines was flowing faster and faster, and the face of the Lord Flame Demon also showed a satisfied expression of enjoyment.

Those beams that were shot at the chest were completely under the crotch by the strong chest.

As the core of the Flame Demon Lord, it is both the weakest and the strongest.

Except for the head, the hardest part of the Flame Demon Lord's body is the core part of his chest.

If you want to break its chest, you can rely on the weapons of these little bugs in front of you.

Give them another hundred years, and never want to cut a layer of skin, "Hahaha..."

Thinking of the desperate expressions of the little bugs after discovering the reality, Lord Flame Demon was as happy as drinking old wine.

The breath of despair in the air grew stronger and stronger, "Ah, what a wonderful smell."

Taking a deep breath, the despair that was invisible to the naked eye was conquered by the Flame Demon Lord.

Although it will not become stronger because of this, that is what succubus and dread demons are good at.

But swallowing this kind of negative energy will make its spirit most enjoyable.

It feels like smoking marijuana, I can't stop it!

Zizi...

The sudden concentration of strong energy caused Lord Yan Mo to open a small gap in his eyes.

The blue light beam condensed in front of him, cheering him up.

If it is hit head-on, it will not be fatal, but...

"It will hurt." At the moment the beam came, Yan Mojun advocated a big mouth.

The whole body blood poured into the core, and then gushed out again to gather in the mouth.

The scorching hot molten slurry concentrated in the throat, compressed and condensed into a mass, and then...

puff!

Scorched all over, standing on the back of Lord Yan Mo, dragging one arm.

It's Ann.

At this time, she had only one arm left, and the other arm was only a torn fracture at the arm.

The granulation at the fractured area spewed out a little blood from time to time, making her face full of gunpowder a little paler.

"It's over." The remaining broken arm pierced through Lord Yan Mo's chest strangely.

Ignoring the obstacles on the body, just blend into his body like this.

Hold the core!

"Ah~"

The death threat of the core being controlled, along with the intense pain of pulling, made Lord Yan Mo's soul tremble.

The pain caused it to raise its head to the sky uncontrollably, and the heat beam in its mouth shot straight to the sky.

At the same time, the last particle beam accurately hit the core of Lord Yan Mo's chest.

With her back facing the ground, Ann, with one arm hanging on Lord Yan Mo's back, pulled her arm with her own weight.

The right hand holding the core melted and disappeared under the high temperature.

Although relying on the ability of [Dissolution], he caught Lord Yan Mo's death by surprise.

But if the core cannot be peeled off, everything done will be in vain.

The angry Lord Yan Mo will kill everyone like an ant.

Then, the entire planet will be cleansed in anger.

Even Lord Yan Mo will get in touch with the Legion again, allowing the Burning Legion that swept across the galaxy to descend again.

That is the real nightmare, and An will never allow this to happen.

"Move me!" The feet that stepped on the back pushed upwards, backing and tearing the arm that was completely unconscious.

Melting into the forearm of the body surface, little flames spread upward.

The white bones were exposed to the air, and faint cracks appeared on the bones.

She is almost reaching the limit.

A desperate mood appeared in Ann's eyes, "My lord, I'm going to disappoint you."

At this moment, a pair of powerful arms suddenly dragged her body.

In the sun, a face with a faint smile came into the eye: "Who made you such a fool?"

...

...

The real world, half an hour ago.

Qin Yu, who boarded the plane, was still thinking about the farewell before leaving, "I will be ready for the next meeting. I hope you will not refuse my request."

Li Zhen looked at him with sincere eyes and bowed solemnly to him.

The dignified three-core imperial princess actually wants to inoculate him!

Outrageous!

Moreover, she has to make all preparations for the next six months.

Keep your body in the best state of fertility, and then take on this precious little life.

In Li Zhen's words, a child born from the combination of their two genes.

Must be one of the smartest people in the world.

Therefore, there is no room for sloppy.

This doesn't sound like making a child, but rather like making a tool.

"Has her brain circuit been so surprised?" Qin Yu couldn't help but vomit silently.

Ringling~

About to turn off the signal, the phone suddenly remembered.

It turned out that it was Li Zhen again. Qin Yu thought for a while, but decided to connect: "Then it is impossible, and it is not your and I have the final say."

The miracle is on, even if Brother Yu agrees, Li Zhen is not qualified to take on the seeds of miracles.

"The beautiful lady is with me. It seems that you have to worry about it again." Li Zhen said jokingly.

"???" Qin Yu only had question marks left when he heard the blank busy tone on the phone.

What beautiful woman is with her, Han Jiaren?

Hasn't she let her go? Why did you come back suddenly? Could it be that your charm has reached the point of love at first sight.

Although Yu Ge thinks that his charm is unacceptable, he is not exaggerated to such an extent.

So, what happened?

At the Shilla Hotel at this time, Li Zhen, who hung up, looked back at Han Jiaren.

The pale complexion of the other party made her look a little more pitiful and tender, and even more arousing love.

"Can you tell me, what exactly did you do?" Han Jiaren still doesn't understand why things happened like this.

"I just gave him two choices, you, or the 30% supply order of Sanxin Electronics." Li Zhen looked up at her indifferently.

The smile between words was like a devil, making Han Jiaren completely desperate: "It seems that he made the best choice for him."

Brother Yu on the plane decided to give up the struggle.

What is going on I will find out when I come to Smecta next time.

Now, he should enter "The Scary Demon" to see if his saint is impatient to wait.

Futra Star, the Church of Miracle Science.

When Qin Yu opened his eyes again, the first thing he saw was not the thin figure standing on one knee.

The huge metal shell immediately tightened his nerves: "Someone invaded?"

When he figured out the exoskeleton armor in front of him, he had personally made Xing Tian.

Qin Yu learned that Ann was following the Ministry of Truth to perform the mission of hunting the demon.

This mech was transferred back from [Underground Corridor] and was responsible for protecting Ann's safety while he was away.

"You don't need to stay here anymore and continue to explore the underground corridor." After issuing a new order to the other party, Qin Yu walked towards the church's command post.

As soon as he arrived at the door, he heard messy conversations inside.

"How come it is Lord Yan Mo, who is in charge of the investigation?"

"Sovereign Yan Mo is not much different from ordinary fire demon. Unless you observe it closely, it is difficult to tell the difference. Our people can't get close."

"This is not a reason. If there is something wrong with the father and daughter of Anda, you should explain to the chairman yourself."

"Oops, the predator was hit, life and death are unknown."

"Ah~" In the angry roar, Qin Yu turned and walked outside the base.

At the same time, Beast Beast has positioned the area where the demon hunting team is located, and always reports to Qin Yu the changes in the battle situation.

When he rushed to the scene, Ann's arm was completely melted under the burning of the magic flame, his bones burst, and he was about to fall into a lonely death.

He stomped hard with his right foot, and his body shot and flew like an arrow, and the person had landed firmly on Lord Yan Mo's back.

Qin Yu couldn't help but angrily said, "Who made you such a fool?"

#### **Chapter 685: Sublimated in death**

"My lord." An Xingfu passed out, the flames burning on his arm still spreading upward.

Seeing that the entire forearm had become white bones and miserable, the flames were spreading above the elbows.

Five slender black lines appeared in front of Qin Yu's fingers, like a cautious poisonous snake cautiously testing towards the flame.

Seeing the cautious performance of Nanoworm, Qin Yu issued a forcible command: "Eat it."

The Nanoworm, who was still swaying before, was cautiously probing, instantly frantic.

The dense black fluid converged into a mud-like stream, flowing along Qin Yu's fingers to wrap An's arm, and collided with the devil's flame at the elbow.

Phoo~

The anger was in full swing, and a large amount of confetti-like black ash floated around.

Millions of nanoworms fell into death, and the spread of flames was blocked by this death.

In groups, the vast nano army at the micro level charged towards the flames ahead.

Batch after batch of nanoworms fell into death, and Qin Yu fell into a disadvantage instantly, as if he could only passively consume the death of the nanoworms to save Ann's life.

In fact, nanoworms have undergone a completely new evolution in the process of ceaseless death.

Among the debris turned into paper ash, the bright spots that could not be seen by the line of sight drifted into the ethnic group.

As the time for the bright spots to fall increases, the time for the death of nanoworms is delayed.

From the initial touch and death to now entering the flame, being able to withstand 0.58 seconds is already a terrible improvement.

This kind of evolution is still born in death, allowing the entire ethnic group to be sublimated.

When the number of deaths of nanoworms exceeded 5 billion, a new turning point was finally born due to the qualitative change in the quantity.

On the dark gray surface of the nanoworm, a transparent crystal shell appears like a streamer.

If you compare its crystal shell with liquid crystals, you will find many similarities between the two.

But at the same time there is a huge difference, because the crystal shell on the surface of the nanoworm is more biased towards the biology.

It is alive and can be manipulated by nanoworms to change different forms.

This mysterious crystal shell forms a mysterious energy field on the surface of the nanoworm, isolating external energy.

Lord Yan Mo's fire damage was naturally isolated, and could no longer cause damage to Nanoworms.

In the chewing mouthparts, the strong and sharp upper jaw tore the skin of Lord Yan Mo and smoothly penetrated into his body.

Amid the miserable wailing, Lord Yan Mo could not move.

This \*\*\*\* upright bug is still holding its core firmly.

To Lord Yan Mo, it was like a poisonous snake pinched seven inches.

Lost all the ability to act, can only maintain the most basic thinking ability.

In fact, his original wisdom is not high.

Among the demons, physics is what the Balrog is good at, and the mind is a trick used by cunning demons.

The devil and the devil are incompatible with fire and water!

There are always people who confuse the two. This is what the devil hates most.

However, the Lord Yan Mo at this time extremely expected the devil to appear, and he agreed no matter what the other party wanted.

As long as you can get rid of the little bugs behind it, you can regain control of your body.

"Huh?" Sovereign Yan Mo suddenly noticed that there was a strange feeling of itching on his back.

It didn't feel irritating, but it was inexplicably irritating like a heartbreak.

And, as this itchiness increases, the irritability becomes stronger.

In the end, this irritability actually suppressed the life instinct's fear of death, causing the body of Lord Yan Mo, whose core was controlled by others, to tremble slightly.

Looking from the front, Lord Yan Mo's eyes at this time were about to spray molten liquid.

Now even if the Ancient Demon King is standing in front of him, he will be torn to pieces, "This \*\*\*\* feeling is so uncomfortable!"

Ten thousand ants bite their hearts, probably nothing more than that...

Maybe for a moment, maybe a century, the maddening tickling sensation is getting weaker and weaker.

Lord Yan Mo's consciousness is exhausted, and it seems that it may disappear at any time.

Outside, Anda, who had been repairing dead skins for Lord Yan Mo for a long time, had stopped.

Looking at the collapsed flesh and blood panting, his expression was full of astonishment and hope.

He didn't know what it was, but he knew that all of this was caused by Qin Yu.

He can really fight against higher monsters independently!

Although it was with Ann's cooperation, it was full of coincidences and uncertainties.

But this was still the first time someone was able to break the defense of a higher demon, causing its body to melt and collapse like a layer of ice.

Just under everyone's gaze, the time passed by 1 second and 1 second...

About 20 seconds later, Lord Yan Mo's body completely disappeared in front of his eyes, including his iconic head with a pinch of flames.

The only thing left on the scene was Qin Yu after landing, and the core of Zhiyan held in An in his arms: Yan Mo's Heart.

"My lord." Anda greeted him with a quick walk.

Not yet near, a hot air wave came oncoming, it was the heat radiated by [Yan Mozhixin].

Then look at the five bones left, and the right hand clasped tightly on [Yan Mozhixin], like a bone base dragging a weird and evil thing.

In the burning light, the bones became crystal clear like jade, exuding an unspeakable evil aura.

"Don't touch her, go back to the church right now, I want to treat her." Holding Ann, Qin Yu hurried to the truck in the distance.

The particle pulse cannon, which was reduced to scrap above, was roughly dismantled and discarded in place.

The scientist personally acted as the driver, sending Qin Yu and An back to the headquarters of the Church of Miracle Science in the fastest time.

Others stay in place to clean the battlefield, and all the parts that can be used on the waste products must be disassembled and taken back.

Even a screw cannot be lost.

Just dig three feet in the ground and find all the parts that were blown up.

There are also predators who are pierced by the heat beam, and they must be dragged back to the base to see if there is a possibility of rescue.

It is one of the most important assets of the Church of Miracle Science.

The truck finally stopped in a gap formed by three hills, and the gap between the V-shaped hills formed a natural hidden harbor.

Parked the car, Qin Yu jumped out of the car holding Ann and walked towards the end of the gap.

At the end of the seemingly roadless end, there was an inwardly concave bend on the left, along the bend all the way forward, and soon encountered two guards who were in charge of guarding.

"Let someone prepare the medical room, I want it now." As soon as the voice fell, a guard rushed to the depths of the passage.

Qin Yu, who was holding Ann, followed closely and hurried towards the base deep in the passage.

The guards who ran before alarmed the remaining survivors. When Qin Yu appeared holding Ann, in front of the cave on both sides of the passage.

The crowd was full of people looking around, and when they saw Ann's tragic situation, they couldn't help but let out a suppressed exclamation.

Qin Yu turned a deaf ear to this and went straight to the medical room.

Turning past the barrier formed by the stone wall at the door, the dry and clean cave space came into view.

The simple and clean metal bed has been supported The doctors and nurses who belong to the church treatment center are already in place.

"I need two assistants. The process may die, so I stay willing to stay." Qin Yu put it on the bed and said calmly.

Everyone looks at me, I look at you, with a little hesitation in their expressions.

"I stay." Suddenly, a man with a stubble beard stood up.

The girl behind him also took a natural step in tension.

When she reacted again, only herself and the master were left in the treatment room, as well as the adult and the unconscious saint.

"What is your name?" Qin Yu looked at the bearded man.

"I have forgotten my previous name. The president can call me a doctor." The bearded man said softly.

"Very good, doctor." Qin Yu nodded in satisfaction, not entangled in a simple code question.

In the Church of Miracle Science, there are two kinds of people: useful and useless.

Although I don't know what the doctor is, it has nothing to do with his code name.

Just like a scientist, who cares about what he used to be called.

He is now the chief scientist of the Church of Miracle Science, an important talent asset.

"Um, I, my name is Tangtang...guo." The girl as an assistant lowered her head and raised her hand timidly to speak.

Seeing her performance, Qin Yu turned to the doctor: "Are you sure she is fine?"

"Candy." The doctor did not answer his question, but said to Candy at a very fast rate of speech: "Be prepared for the operation and fully cooperate with the president's treatment."

"Yes." In the firm answer, Candy's attitude and temperament changed.

If she was a shy and introverted little girl before, then she is now a focused, intellectual, and calm medical assistant.

This huge contrast made Qin Yu remember her name: Candy!

## **Chapter 686: Ascendant**

In front of the treatment room, Anda stepped back and forth anxiously.

In the mission, he is the highest leader of the Ministry of Truth and the Demon Hunting Team, and is the spirit and banner of everyone.

Therefore, even if the predator is destroyed, Ann does not know his life or death.

At that time, he was still commanding the battle without a word, maintaining absolute sanity under his anger.

But now, he is just a father who is worried about his child.

Those hidden emotions, anxiety, restlessness, hesitation, helplessness, worry and fear, sprung up like bamboo shoots after a rain.

Anda's heart couldn't settle for a second. He couldn't wait to rush in directly and asked loudly: "Why does a treatment take so long?"

In Anda's view, Ann's worst situation is to lose both arms.

Although this is equally exciting, it is a good result compared to losing one's life.

In Anda's view, if you can save your life.

The so-called "Ascension" don't worry, the degree of danger and failure rate of this plan, as the high-level of the Church of Miracle Science, the Minister of Truth.

Clearer than anyone...

With a 68% failure rate, even if it succeeds, the whole person will become a semi-mechanical creature.

Although doing so, it will make a qualitative change in strength.

But as a woman, Anda is not sure that her daughter can withstand such a huge change.

I have to say that As a father, Anda, underestimated Ann's ambition and grandeur.

While Anda was walking anxiously, Candy suddenly appeared in front of the treatment room: "I need your thermal knife."

When you open your mouth, Anda will take advantage of it and survive.

But he didn't hesitate at all, and handed the thermal knife and scabbard to Candy.

"Also, can you find the automatic mechanical shoulder gun that the scientist sold?" Candy looked at him indifferently.

"Yes!" Anda almost agreed through gritted teeth.

No matter where the shoulder cannon is now, as long as it is needed by Ann, he will take it back at all costs.

By the time Anda appeared in the treatment room again, 4 hours had passed.

Full of burns and explosions, he handed the intact shoulder cannon to Candy: "Thank you."

Looking at this man with a firm face and bruises all over his body.

Suddenly there was a moment of envy in Candy's heart: "If I have such a family, how good would it be?"

After another 8 hours of surgery, An successfully survived the dangerous period and was sent to the rehabilitation ward.

At this time, her arms had been banned by the bionic mechanical prosthesis.

The fracture of the shoulder has been thinned again, and the shoulder of the left arm has also become a cold machine buckled outside.

The concealed shoulder gun is hidden in the slot inside her shoulder.

Because of the need to consider the size and coordination factors, the size and power of the shoulder cannon are weakened by one-third.

But still possesses a powerful lethality!

The two mechanical arms can even burst out tons of damage in an instant.

At the same time, in the dark slots on both sides of the robotic arm, all kinds of fancy weapons are installed.

Including thermal beam cannons, rocket boosters, and sun bombs.

But the most eye-catching thing is the weaving ray inlaid on An's chest.

It was bright and dark, changing with her breathing.

Just like the most popular breathing light on the market, it is very beautiful in one flash.

However, it's not just a mere appearance.

With [Yan Mo's Heart] as the core, it drives the robotic arms and various offensive weapons hidden in the arms.

The strength it can exert is enough to reach 2000%.

As a high-level demon, a member of the Burning Legion.

Sovereign Yan Mo is not an ordinary trash fish, and its core contains almost unlimited explosive energy.

From today, Ann is no longer a pure [mutant].

Not just a cyborg with brute force, but a powerful [Ascender].

The [Ascension Project], which is regarded as a tasteless one, should also be rectified.

After a long wait, 20 hours later, Ann on the hospital bed opened his twinkling eyes.

"My lord." At first glance, Ann saw the figure that made herself worry.

A nice smile appeared at the corner of his mouth, and then he paid attention to his situation.

Squeak~

The faint sound of the machine's operation was clearly transmitted to Ann's ears.

The fish scales that replace the shoulders can flexibly shrink and change angles, just like real shoulders.

As the mind turned, the fish scales on the surface instantly opened a rectangular dark groove.

The shoulder cannon controlled by the Z-shaped bracket ejected and aimed at the wall ahead.

"Be careful, you are an explosive barrel now." Qin Yu said jokingly.

"???" Ann was a little dazed.

When he found that Qin Yu had been staring at his chest and looked down, he realized the biggest change in himself.

咚咚~

Two heartbeats, yes, Ann is sure he heard clearly.

One comes from her original heartbeat, and the other comes from the implanted [Yan Mo Zhixin].

No wonder she felt scorching heat all over her body.

There is a backlog of anger in her heart, which makes her want to run away at all times.

"The function of the robotic arm, you can test it slowly, and now check to see if there is any discomfort in your body."

Hearing Qin Yu's instructions, An closed her eyes and began to feel every part of her body.

After 10 seconds, Ann opened his eyes again: "It's better than ever."

This answer made Qin Yu smile with satisfaction.

Starting today, the Church of Miracle Science will usher in its first high-end combat power.

However, his head aches again when he thinks of the amount of precious materials consumed.

I don't know how long it will take to find enough materials to complete the transformation of the second place [Ascended One].

However, this matter can take time.

At present, no one except him can conduct such a complicated and large-scale reconstruction operation.

The doctor's knowledge and experience are still lacking, mainly in the past, he could only treat the human body.

I really don't know anything about machinery!

Now, it happens to use crude transformation to let him practice his hands and accumulate enough experience.

Those who can't afford a big price and want to modify their arms, legs or special parts individually.

It is the best monster that is most suitable for doctors to collect experience points!

Healing place, doctor.

Another subordinate organization has a direct leader, and the vacancy of the Church of Miracle Science is gradually being filled.

Sanctuary: Ann, the highest combat power of the Church of Miracle Science, 【Ascendant】 .

Ministry of Truth: Anda, under his command, he manages the violent organization of the Church of Science, the Demon Hunting Team.

Science Department: The scientist, the four wives of this guy, is currently acting as his assistant.

Healing place: doctor.

Assistant: Candy.

Although lacking in experience, Qin Yu believes that experience can be cultivated.

The toughness and big heart shown by doctors and candy in the previous remodeling operations are the most important characteristics of a qualified medical practitioner.

"Unconsciously, the staff of the Church of Science became enriched." Sitting in the sanctuary, Qin Yu fell into deep thought.

Although all departments have been structured, the low- and middle-level combat capabilities below are seriously lacking.

Like the Ministry of Science, only four wives of a scientist can be used as his assistants.

Who knows if this guy is usually in the Ministry of Science, studying science, or studying the black hole of profound knowledge ~ [www.mtlnovel.com](http://www.mtlnovel.com) ~ There is also a cure room, currently there are two people, a doctor and a candy.

Talent is too short!

Even under Qin Yu's mandatory request, all children were sent to school.

But cultivating requires a long process. It is not done overnight. Pulling out the seedlings to encourage growth will only make the seedlings grow crooked.

Today, the most reliable talent recruitment program.

It is to annex other refuges, increase the population base, and then elevate one from the dwarf.

With this [Ascended One] Ann, there is no need to worry about strength.

Qin Yu's only concern is that the surrounding shelters are full of mediocre mediocrities.

"It doesn't matter if there is a shortage of talents in reality, there is still a shortage of talents in the game... miserable!" Yu Ge only felt that his situation was miserable.

"That's right." Qin Yu suddenly remembered what Gao Bo said when he slapped his thigh.

The refuge where he is located is a secret military base before the catastrophe. It not only possesses strong strength, but also strictly manages orders and prohibits.

It also has a variety of professional and cutting-edge instruments, a complete weapon production line, sufficient ammunition supplies, and a circulating water system.

Most importantly, there are hundreds of professional talents from different fields.

"If you can swallow it in one bite, the basics of life, security, sustainable development, and talents will all be settled."

Just do as he thinks, and after Qin Yu decides to go offline, he asks Gao Bo for the detailed location of his refuge.

If the distance is close, then send an envoy to capture it first.

If it is far away, it can't be said that the Church of Miracle Science must have a vigorous migration.

The birth of every great organization requires a long history of migration and expedition.

During this period, everyone will be tempered by the cruelest blood and tears.

The weak will be eliminated, and what is left will be an iron-blooded team that can only play hard and endure hardships.

## Chapter 687: Lazy cat forced to leave

"Brother Yu, why are you asking about this?" Going to Gaobo, the other party was a little curious.

"I plan to visit your refuge." Qin Yu responded with a smile.

"That's a good thing, welcome, when the time comes, I will cover you." The doctor smiled and told him the location of his refuge.

Although not very detailed, there is only a rough position he heard from the old players.

But relying on the bastard, Qin Yu still accurately positioned the target location.

Later, when it is settled, people will naturally be taken to solve it!

Walking out of the airport, Qin Yu was making an appointment for an online taxi.

As far as his gaze was, Cayenne stopped on the side of the road to freeze his gaze.

In the lowered car window, the lazy cat who hadn't seen for a long time was smiling and waving, "Qin Yu."

Sitting in the car with a pleasant surprise, Brother Yu said, "Fortunately, I am alone this time."

Before Jiang Xiaoshan asked him when he would come back, Yu Ge became more mindful and asked Xu Meixin to return directly to the abandoned city this time.

Now it seems that his choice is so wise!

"Come back and sit." Instructed Jiang Xiaoshan not to drive first, and Qin Yu asked Lazy Cat to sit in the back.

"Oh!" Replied cleverly, the lazy cat pursed his lips and snickered, and quickly opened the door and jumped out of the car.

With his hands close to his side, he walked around the car door in small steps and got into the back row.

Jiang Xiaoshan stretched out her hand helplessly to pull the passenger door closed, vomiting: "Can't you two wait?"

Qin Yu didn't speak, but Lazy Cat whispered: "I haven't seen him for two months."

During this holiday, Qin Yu devoted all his time to work...

Cough, busy, too busy!

Seeing her serious look, Jiang Xiaoshan chose to shut up.

It's boring to tease the little lazy cat, because she takes it seriously.

This silly girl, besides dancing, can't his head be decorated with sophistication and humor?

Besides, since my husband is still there, it's time to be partial again later.

The only pet Lan Yue, this is the default and consistent attitude of the little fairies...

Don't forget, this one is a little confused about people and things other than dancing. The lazy cat who looks weak and bullying is the righteous eldest woman in the family!

"Shanshan, I'm hungry." Putting his head on Qin Yu's legs, letting him fiddle with his hair, Lan Yue whispered with a lazy face.

"Yes, madam, I will take you to bed now." Jiang Xiaoshan responded jokingly.

"??" There were countless question marks in Crescent Moon's eyes.

I'm hungry, why go to bed.

A few minutes later, the lazy cat who had figured out the situation pouted angrily and stared at Qin Yu with wide eyes.

"I didn't do anything." Brother Yu smiled innocently.

Why is it me who was injured? Jiang Xiaoshan said it clearly. What matters to me?

"It's all you, who taught them bad."

The lazy cat grunted angrily: "Once upon a time, Shanshan was the cold goddess in the bedroom, how could she..."

Thinking of the food she had alluded to earlier, the little lazy cat's cheeks instantly burst into a shy blush.

It's too bad, how can that kind of thing be used to eat! ! !

"Madam, it will be broken if you are not here, you have to take care of it." Jiang Xiaoshan said with a sullen smile after seeing the excitement.

Seeing her still adding fuel to the fire, Qin Yu glared at her fiercely.

This girl even raised her head proudly, straightened her back, and her beautiful collarbone emerged from the cardigan.

"I'm not afraid of you!" A cold, faint voice sounded in his mind.

Qin Yu sneered twice and gave her a look to comprehend for herself.

"Living in Binjiang tonight." When the lazy cat was sleeping, he got the woman next door to beat and beat.

A killer stick seems to be indispensable!

Finally, Cayenne stopped at the backstreet of the Shanghai opera, and the proprietress Mala Tang.

"Ouch, rare guest, Yueyue, this is just coming back from a performance... Last time I saw you on TV, but you are so pretty..."

As soon as she saw Lan Yue, the lady boss took the initiative to take her hand.

That concern didn't mean to take her as an outsider at all, and it seemed silly to Jiang Xiaoshan.

I have never seen the boss's wife so enthusiastic before, "Is this road wider?"

Seeing that the two of them held hands, stood directly at the checkout counter and chatted whisperingly.

Qin Yu was also surprised. When did the boss wife and Lan Yue get so close?

Help her choose a good dish and use it when weighing.

Lazy cat ended the chat with the proprietress and walked happily into the cubicle holding his hand.

"What are you talking about?" Looking back at the boss, Qin Yu's deep smile made Qin Yu a little curious.

"I can't tell you." Lazy cat shook his head grinningly.

Hey, my petty temper.

One by one grows up, the wings become hard, and they float, right?

Don't fight for three days, go to the house to reveal the tile!

It seems that tonight has to be beaten repeatedly.

So that they know that dad will always be dad...

"Come on, it's blanched." The lady proprietress brought the Mala Tang to the table, and gave two more side dishes.

"Auntie, how do you sell that side dish?" Someone looked at the side dish a little greedy.

"People bring it." The lady boss smashed this pot, beautiful!

Sure enough, when they learned that they brought it, no one asked again in an instant.

But in my heart, I was thinking that I can bring my own in the store, or...

Next time you bring some noodles, meatballs, greens, instant noodles and the like, and ask the lady boss for a bowl of soup after all! ! !

"Is this time to come to Hudu to perform?" Qin Yu remembered to ask Lazy Cat while eating.

Why does she have time to come back, isn't she about to conduct an internal assessment.

If you want to compete for the chief, the assessment over the years is an important indicator.

"The teacher asked me to come back, saying it was a combination of work and rest." Lazy cat raised his head and smiled sweetly.

Qin Yu understood these words, Lazy Cat practiced too hard, for fear that she would hurt herself, so she forced a vacation.

"You!" Reaching out his hand and rubbing her head with pity, Qin Yu really didn't know what to say.

This is her only pursuit and ideal.

All Qin Yu can do is tolerance, understanding and support.

Is the ideal lazy cat still a lazy cat?

He was not sure what the lazy cat would become after losing his ideals.

Is it mediocrity, or something else?

But he knows that has an ideal lazy cat is so vivid, just like a blooming peony, glorious.

This light that belongs to her alone should not be affected by any external factors.

"Have you two finished reading it?" Jiang Xiaoshan interrupted a little helplessly when he found the two eyes facing each other and their affectionate expressions.

What spinach for a meal? Autumn hasn't arrived yet!

"A few days off?" Qin Yu asked while eating.

"One week, Teacher Zhou will lead the team to participate in the lotus cup next week, and I will go with them at that time." Lazy Cat said.

"You want to participate?" Qin Yu said.

"Yeah." Lazy Cat nodded.

The reason why she was forced to take a vacation this time was to adjust her state and greet the upcoming lotus cup with a better appearance and full state.

A resume is a transcript of a person's growth and self-expression.

Being able to win the lotus cup is very helpful to her future.

If you want to run for chief, you don't have a good enough resume, you can't just have the strength.

This competition was also arranged by Zhou Xue and Teacher Zhou specially selected for her.

Not only the lotus cup, but also the grand prix and some professional dance show stages.

Like Chief Tang, he participated in the Taoli Cup National Dance Competition, the Lotus Cup, the Grand Prix and the variety show "Dance for Hegemony".

There is also the chief of the Yaodu Song and Dance Theater, chief Zhu, who also participated in "Dancing Storm".

These are all platforms for display and important qualifications in the future.

"To eat this bowl of rice, if you want to eat it for a lifetime, you must not only have the strength, but also have a beautiful enough resume.

Just like putting on silk satin, you want to make you look glamorous enough. "

Lazy Cat was lucky, and met two good teachers who thought about her wholeheartedly and planned for her future.

Shen Bing, Zhou Xue, sometimes the lazy cat even feels that they are like the same person.

### **Chapter 688: Good comrade in the line**

Night, deep!

After taking a shower again, Qin Yu returned to Lazy Cat. The girl slept heavily and didn't respond at all.

The same goes for Jiang Xiaoshan next door, and she will definitely have to sleep in late tomorrow.

He is the only one left, and the deeper the night, the more energetic the person.

The nanoworms in the body seem to be affected by him, and they also remain highly active.

In the previous damages suffered on Futera, more than 5 billion nanoworms all died.

The impact is minimal!

The total number of nanoworms in the body is still a mystery.

Even Qin Yu couldn't figure out how many nanoworms were lodged in his body.

In short, he can support only tens of billions at present.

There is no impact, but the changes are indeed huge.

The biggest change is that Qin Yu's intake of "chips" has increased.

Before eating snacks, it was Brother Yu who wanted to eat it himself, and even if he didn't want to eat it.

There are no hard and fast standards!

Now, the nanoworm in his body clearly expressed his desire for the "chip".

The wafers made of liquid spar have unimaginable benefits to them.

And this benefit has been truly reflected in the previous evolution.

Sublimated in death, after possessing a crystal shell.

The desire to become stronger from biological instincts makes Nanoworms more and more dependent on it.

If you want to become stronger, you need to absorb more "chip" energy.

Therefore, the inventory in Qin Yu's snack box is empty.

"Kirin, is Xi He back?" Qin Yu asked in his heart.

"Returning, arriving at the destination in 28 minutes." Qilin.

"Take me as the coordinates, full load, send me a chip." Qin Yu gave the order.

Fully, it's not that Xihe is full, but that the volume of Qin Yu's snack box is the upper limit.

Let Xihe send a takeaway, and then continue the collection of liquid crystals.

Qin Yu got up again, put on a vest, big pants and slippers, and went out.

Did not go downstairs, but went straight upstairs to the rooftop.

The roof door is locked.

There are a lot of people jumping off the building these days, and the rooftops of ordinary communities really dare not open up indiscriminately.

Who doesn't want to take a jump, big and small is a trouble!

Finger forward a bucket, and the lock is unlocked!

"Hey, there is no lock that I can't open." Brother Yu smiled triumphantly and opened the door to the rooftop.

Because no one comes up all the year round, it's natural to be bothered.

There was a mess on the rooftop, Qin Yu stood on the side and drank a cigarette, smashing it with a small blow.

The sparks flashed, raised his hand and looked at the watch, the time was almost up.

On the other side, the kid who stayed up all night lay on the window, curiously looking at the red dot on the opposite building.

The red dots are bright and dark, so interesting!

Just thinking about it, a machine suddenly appeared in front of the red dot, which looked like a thin crab.

Slap~

The child slapped the glass with excitement, then turned around and said to his mother: "Handjob, handjob..."

Tired and about to suffocate, the muddy mother lay on the bed, murmured: "Yes, plane, fly, huh~hu~"

Packing the wafers into boxes, Qin Yu relocked the rooftop door up and down the stairs.

The shielded electronic signals around are restored, and it will only be regarded as a fault in just ten seconds.

Besides, it is early in the morning, and no one will deliberately check it.

What's more, the inspection couldn't find anything, how could they find the trace of the unicorn.

This time, the volume of the wafer is thicker than last time.

Qin Yu felt that next time, he should change to a larger snack box.

But that would be inconvenient to carry, and you have to weigh the left and right.

There is no news from Sanxin, and I don't know how Li Zhen is preparing.

Miracle Company is ready to make a titanium-rhodium alloy coating for the 'bait', with a weight of 5 square decimeters.

This weight is enough to attract the attention of the gold masters behind the three cores, and it is time for Lixin Investment to act.

Open the WeChat account and look at the statistics list inside. Everyone's money has arrived.

The list of core members: Han Hu, Meteor, Fatty Cao Rui, Li Xiaoxiao and Ye Jinlan.

The quota per person is 1 billion, for a total of 8 billion.

Because there are also Li Xiao, Yang Chengjun, and Xu Hao who have been appointed as vice presidents, but the quota is the same as that of the core members.

Below are 57 ordinary members, each with 200 million, for a total of 11.4 billion.

Add the two together: 19.4 billion.

The total amount of funds currently available for Lixin Investment is around 50 billion.

Of the 200 billion of own funds, 30%, 60 billion in domestic and foreign markets for long-term and short-term investment, this money will not move.

Qin Yu bought Futuristic Rhapsody Paradise for 36.8 billion.

In this way, nearly 100 billion went out.

The remaining 100 million is invested in the progress of various research and development projects under the miracle.

The remaining 50 billion is the funds that can be mobilized this time by Lixin Investment.

"Total less than 70 billion..." Sitting in the living room rubbing his chin, Qin Yu thought it should be enough.

This time, he wants to speculate in concept stocks!

Moreover, it is not a concept, but a big category.

Non-ferrous metals, graphene, chemical synthetic materials and coating materials, this entire category is all summarized.

Therefore, the funds that can be used this time will be relatively large.

700 billion, it sounds like a lot.

But in the end, it might not be enough. After thinking and thinking, Qin Yu decided to expand Jianfa again.

The last short-term dismantling of 50 billion yuan, but they made a lot of money.

If you want to change to someone else, you must beg grandpa and grandma from the bank.

I hope that the other party can raise your hand high and pull yourself.

But Brother Yu is different. He is looking for a bank, which is to make money with the bank.

Seeing that the sky was about to dawn, Qin Yu called Shen Chuxia directly.

Bell Bell Bell~

Shen Chuxia, who was sleeping at home, was awakened by the ringing of the phone.

"Who, so early?" The man beside him turned over, muttering in a vague tone.

"...Customer, I'll go outside to pick it up." Shen Chuxia, who was still a little confused, saw the caller ID prompt, and he immediately became sober.

Speaking of getting out of bed, wearing slippers, opened the door and walked to the balcony.

"Shao Qin..." The door closed.

The man lying on the bed facing the window, his eyes wide open, clear and indifferent.

...

...

On the new BMW 320li, Shen Chuxia put the small mirror into his bag, made sure that he was ready, and opened the door to the company.

This car was just mentioned in the middle of Shen Chuxia, and the whole model landed at 296,000. The discount is the ultimate.

Who made her have this face now, she is also a 'head of the bank'.

"President Shen."

"Hello, President."

Although it has been emphasized many times, let everyone call yourself 'Deputy Governor'.

But in Xia Guo's workplace, the unspoken rule of non-full-time leaders not calling the deputy, you have to understand!

After all, everyone likes to be the protagonist.

The big brother who drives a Ferrari supercar with one hand, except the co-pilot...

When he came to the president's office, Shen Chuxia found that the door was not closed, and the leader was sitting there drinking tea.

Kengkeng, "Leader, read the newspaper!"

Looking up, it was Shen Chuxia. The president was entangled and looking forward to his ecstatic performance. Someone who didn't know thought he was plotting Shen Chuxia.

This little Shen!

He is really scared and in love now, and what she is afraid of is that she will say: "Pay money."

The amount each time made the Chief Executive be frightened, and it was a distressing one.

But as long as it wasn't for money, when the good thing came to his head, the president would be able to jump up happily.

Lixin's investment is more than 100 billion on the books, which is a tangible performance.

The last time he went to the head office for a meeting, he was praised by the boss on the spot for his performance.

They say that they have a solid work The service is in place, the long-term vision, and the customer loyalty is high. We must continue to carry forward this spirit...

Just this, he made a good appearance in front of many colleagues.

Don't mention too much pride!

After the meeting, those old friends who were looking for him for dinner were many times more numerous than before.

Everyone envied his good luck. Lixin Investment and Miracle Company took root in the northwest. Such a big pie hit him on the forehead.

Don't mention how envious those people are.

In this regard, the big governor smiled haha on the face, but in fact he had already cursed the other party with a squirrel.

We had two golden flowers, but we had to sacrifice ourselves so that we left such a big gold master.

For you, just those crooked melons in your business, okay?

Thinking of Shen Chuxia's dedication, the head of the governor looked at her softly.

This is a good comrade who has made great contributions to the industry, thoughtful and enlightened!

She Xiaojia, for everyone, this allowed him to make a lot of face in front of the boss.

It should be happy, happy...

"Sit." Inviting her to sit down, let the secretary make a cup of tea, and the two opened the door to talk.

"It's Shao Qin? Xiao Shen, you have to give me some good news this time!" The president held the tea cup and blew the floating tea leaves on it, jokingly said.

Now this workplace is not easy to mix, the more you are in a high position, the more you must pay attention to these rumors.

Especially with Shen Chuxia, what's her situation, can the leader not know?

Some rumors spread to Qin Shao's ears. Do you still want the business of Lixin Investment and Miracle Company in the future?

Losing such a big customer, he, the big president, can't afford to walk around.

I really thought that the president would have no troubles, he was just the boss, and he still scratched his head for some problems.

It's just that everyone's troubles are different!

### **Chapter 689: To be a man, we must plan far-reaching**

"Young Shao Qin wants a loan? Okay, good thing!" Upon hearing the news, the president put down his teacup.

After closing the lid and walking back and forth a few times, she looked at Shen Chuxia and said, "What was the valuation of Miracle Company last time?"

"360 billion." Shen Chuxia responded.

The valuation of banks has always been low but not high.

Of course, not absolute.

But the miracle has not been listed now, and it has not been established for a long time, and its development is limited.

It is a miracle to be able to give a valuation of 360 billion, just like its name!

"How much does he want, how about 300 billion?" The big governor came with his mouth open, stunned Shen Chuxia.

With a debt ratio of 83%, he really dared to give it!

Seeing Shen Chuxia's expression, the president knew that he had given too much.

But he also has his own difficulties, the head office gives such a heavy task, more than every year.

He also wanted to fight for his breath, complete it once, and show it to the head office.

The Northwest is also capable and potential!

Show the limelight is to show up, but the facts also have to be done.

Don't just think of being popular, do nothing, and don't want to take risks.

then you.....

Can pie fall from the sky?

It just falls, it won't hit you.

If you can't figure it out, wash and go to bed early, you have everything in your dreams!

"Qin Shao said it would cost 50 billion, the same as last time." After calming down for a long time, Shen Chuxia could speak.

The main reason was that the big governor was shocked by 300 billion in one breath.

He is going to bet all his wealth and life on the miracle company, Qin Yu...

300 billion, what's a small problem at random!

He is the big governor, and he has to squat in the iron window for two years.

"50 billion?" The president frowned, but he had calmed down in his heart.

50 billion is indeed a bit less, judging from the past achievements of Lixin Investment and the valuation of Miracle Company today.

At least 100 billion is no problem.

"So, is Shao Qin in the abandoned city?" The president wanted to talk to the other party in person.

"No, I flew directly from Smecta to Hudu, and school has started." said, "School started," Shen Chuxia's expression was full of helplessness.

Look at people, they are still in school, and they are worth hundreds of billions.

When talking about money on weekdays, the unit always starts with '100 million'.

I am now the president of the bank, and at most I can bring ten thousand.

The most commonly used daily is still a hundred. How can this gap be expressed as a loss.

"Hudu...it's a pity." The chief governor shook his head and suddenly sat down and said, "In this way, you are here to make a call with Qin Shao.

Ask him, how about 100 billion yuan? Appropriate discounts can be given in terms of interest, and a longer period of time can be used. "

"..." Although there are countless grooves in my heart, I want to vomit.

But think about the face of the bank, the attitude I used to treat large customers in the past.

Shen Chuxia understood it in vain, not everyone is the same!

Whose family is your own brother, you have money but not money, the number of times your brothers and sisters walk around your house is not the same.

Not to mention attitude, so...

What's wrong with a bank that can lend you money without relatives and no reason?

"Yeah." The call was connected, and a cold hum came.

The president looked at Shen Chuxia unexpectedly, and clearly said, "That's it?"

He thought that such a charming young woman Shen Chuxia had long been fascinated by Qin Yu.

Shen Chuxia didn't say a word, gave him a helpless look, and said, "President, you only know now, how difficult it is for me to live normally?"

"Xiao Shen, it's been hard work." Give her a comforting look, the president has already decided that he will adjust her treatment when he has a chance next time.

The title has just been promoted to the deputy governor of the provincial bank, and he will definitely not be able to promote it again in a short period of time.

But the treatment, the articles that can be done here, the floating area can be bigger.

"Shao Qin, I, Xu Du, Old Xu, haha..." In front of Qin Yu, the chief governor kindly bought an early old man from the door.

"Oh, Governor Xu, I thought it was early summer!" Qin Yu's voice added a little smile: "Why, I have alarmed you, the big president, by this little thing."

"How can it be a trivial matter? It has something to do with you, Qin Shao. There is no trivial matter for C&D. If you say this, Qin Shao, you are criticizing our work for not doing well!"

"Well, I have always been very satisfied with C&D's service. The cooperation between us has not always been very pleasant."

Hearing Qin Yu's words like this, the governor had a bottom in his heart.

I was worried that the miracle company was developing too fast, so I dropped C&D's worry about going to other industries, and suddenly let go of it.

"Yes, our C&D service is obvious to all, especially for large customers like Qin Shao. If you have any comments, we will change it on the spot."

After talking nonsense for a long time, the president turned the topic to the main topic: "Qin Shao, Xiao Shen told me about the money.

That, are you going to take a long-term loan or short-term dismantling. I think you can go for a long time. We have cooperated for so long, so you can rest assured in terms of preferential treatment.

I assure you that I will definitely not let you lose. In addition, the company also needs money to develop. The projects of Miracle Company can burn money very much! "

Xu Du came up and looked at the problem from Qin Yu's perspective, with a tone of heart and soul for his sake.

Qin Yu also felt the sincerity of the other party, indeed from the heart.

This is the top-notch professional practice in doing business. Even if you want to make money, I am definitely going to worry about the customers first, and enjoy the pleasure of the customers first.

No matter when, even if you make less money, you should make your customers comfortable and satisfied.

Even if I made money, this money is definitely what the client is willing to let me make.

If you do well, the customer is afraid that you will make less, and he will not make it through if he doesn't give more.

This is called business! ! !

Xu Du's idea is very simple. As long as the performance can be achieved, even in the interest side, he will find a way to remove part of the income from the bridge and dismantling.

After filling it up, Qin Shao must be satisfied.

The cliché: you must have a long-term perspective in life.

What is the miracle company, that is, the standard industry potential stock, the dark horse among the dark horses.

Since the establishment of the miracle, one after another miracle has been born.

The introduction of talents, urban competitiveness, economic development trends and the level of attention from above are all increasing day by day.

Among other things, let's just talk about Ye Lao's visit to the abandoned capital and visit the entire miraculous industrial chain.

This impact is viewed from the social level.

Only in the sporadic reports, such a sentence was casually mentioned.

Not even the overall space.

But anyone who reaches a certain level can access the internal journal.

You will know that influence is still playing an unimaginable role today.

In other words, the above-mentioned support for the Northwest and the plan for the next five years will be stepped up unknowingly.

This support and planning has always been substantial.

For example, it is five years to build a high-tech industrial zone, with an investment of 100 billion yuan.

Finally, the industrial zone is drawn up is also built.

But the funds are like squeezing toothpaste. Squeeze a little today and a little tomorrow.

The rest of the investment support, little benefits will not be seen.

Not to mention the propaganda from the upper echelons, sometimes the first sentence will overwhelm you for many years of hard work.

Meet up with the capital giants, and just click "That place is good, you can take a look."

I dare not say that the giants will definitely put new projects here, but they will definitely be included in the scope of inspection.

With just such an opportunity, the local government doesn't know how much effort it will take to get it.

In the past, Fei Du rarely got such a 'verbal recommendation letter.'

Now, in this year alone, two Fortune 500 companies have come to visit the site.

And after fully understanding the scale of Miracle Company and the projects involved, there are plans to set up its own office in the inland port area.

Although it is only a symptom, as long as you see the real benefits later.

Do not believe that they are not tempted...

The development of the Miracle Company is based on a space rocket.

There is no room for delay.

The local yamen also have a deep understanding of its situation.

The downstream supply chain is seriously inadequate, and there are countless types of materials that need to be imported and purchased from other places.

The quantity increases with the increase in output.

It is believed that in the near future, the order from Miracle Company will become a sweet pastry for the giants to scramble.

At that time, they will not be allowed to build factories in the northwest.

Do you need to open an account for the factory? Do you need to use capital flow?

At that time, Qin Shao casually called, whether C&D had to be considered in the first place.

Is it more incense than other banks.

This is far-reaching...

Being able to sit in the position of today's big governor, Xu Du didn't rely on being able to drink three catties of alcohol, he also had real abilities.

## **Chapter 690: Suicide!**

The thoughtfulness of the president is not far-reaching!

Qin Yu did have a slight move. Long-term loans are not bad. It depends on the discount offered by C&D.

"3.5%, Qin Shao, we are old friends, and I won't give you any falsehood, this is the bottom line I can give."

Qin Yu didn't say anything, but in fact, Qilin had already been investigating.

Only after this investigation did I know how full the sincerity of Xu Du, the big governor, is.

The benchmark interest rate is lowered by 20%.

This is a direct hit to the end, Lao Xu's path is really widened.

Professional and sincere!

Qin Yu was embarrassed to reject the other party's proposal, 100 billion.

According to this interest, it is 3.5 billion a year, which does not seem to be a lot...

Gone, Brother Yu is really floating.

It's a few billions, and it's nothing in his eyes.

But who makes Yu brother not love money!

Money is not just for making things.

"5 years? 10 years?" Since it is a long-term period, let me be sincere.

What's the point of giving one or two years?

"10 years..." Xu Du pondered, skipping the relevant interests in his mind quickly, making him proud to judge the gains and losses.

Judging from the development history of Miracle Company, 10 years is too long.

At that time, the miracle will either become a monster or a world.

Either fall into the dust, shining and passing away like a comet.

Therefore, neither for himself nor Qin Yu, this is not a good choice.

Xu Du's ideal proposal is 3 years, not long or short, to control risks, and to change the future cooperation relationship.

Just enough time to observe and respond...

However, since Qin Yu has mentioned these two times, Xu Du also refuses: "Qin Shao, I think five years is the best choice for both parties!"

"It seems we are looking for a chance, we need a drink!" Qin Yu responded with a smile: "My thoughts with the chief executive coincided with each other!"

"This is the same as what a hero sees, haha..." Xu Duchang laughed.

A 100 billion loan with a 5-year term and an interest rate of 3.5%.

Such a large list was finalized in the chat and laughter of the two.

Naturally, the procedures cannot be completed so quickly.

Even if the progress is accelerated here, it has to be reported to the head office, and Xu Du also needs to operate it himself.

It takes at least 2 months before and after.

If it is normal, it will take at least one or two years to give a simple plan from contact to meeting between the two parties.

Then I will talk step by step, and finally, the boss who can call the shots will conduct various data review, qualification inspections, and third-party evaluations.

The mess came down, and it was fast in two years.

"Two months?" Qin Yu's tone hesitated a little more.

As soon as Xu Du heard it, he knew what was going on, and he immediately said, "As for the funds Qin Shao needs this time, short-term dismantling is fine."

For the short-term dismantling of 50 billion, how much interest should be.

Later, he has to withdraw part of the income from the annual dismantling, bridge crossing and various hidden incomes to fill the vacancy in interest here.

It happens that the past two years have focused on clean government, and welfare benefits have been cut across the board.

There is no need to worry about the dissatisfaction of the people below with the reduction of welfare.

Anyway, the money saved will not fall into my pocket in the end.

When it comes to the head office, it is just a digital record that has been taken.

How can there be such a shining achievement in corporate loans of 100 billion yuan? At the end of this year's summary meeting, I will come out on top and show the limelight again.

Thinking of the envious eyes of his old friends, Xu Du touched the sparse hair on the top of his head.

My hair is not white!

...

...

The loan line of 50 billion, the cost is still the same, 10 million a week.

Less than a week, a day is counted as one hundred and fifty thousand.

The money will arrive tomorrow at the latest, and Qin Yu has already let Lixin Investment begin to enter the market.

Now, the Martian child has eyebrows.

It's a good time to warm up, and it's too late to wait until the fire burns up before you want to enter.

"This time, the goal is to focus on concept stocks..." Qin Yu used the Kirin live encrypted line to maintain the conversation with Jiang Luo.

Jiang Luo's small life now has a good time. The last time I saw her, I knew that she had bought a house near the company.

Not big, an apartment of more than 60 square meters, just suitable for her to live alone.

Qin Yu persuaded her to buy a larger one for future consideration.

Jiang Luo smiled and shook his head to show that he was used to being alone.

Seeing her own plan, Qin Yu didn't say much.

Moving on, he was afraid that he would not be able to pick up the question raised by Jiang Luo!

Like foreign giants Freeport, Glencore, BHP Billiton...

In particular, BHP Billiton, as the world's largest comprehensive mining industry, must focus on it.

The rest, silver mining giants like PLC and Yintai, should also be highlighted!

Silver is an indispensable good thing in the coating.

Even a certain proportion of silver is added to the titanium-rhodium alloy coating technology. After public opinion spreads, it will not rise without reason!

Moreover, in recent years, with the multiple applications of silver, its price has continued to rise.

As the world's second largest silver producer, Peru has continued to reduce production year after year. In recent years, silver has attracted the attention of many investment institutions and rich people.

I believe that as soon as there is a new trend, they will take the lead.

This is also the reason why Qin Yu asked Jiang Luo to enter the stadium early, and they had to be extra careful this time.

At least, we must keep an absolute low-key before public opinion spreads and detonates.

The central point of public opinion this time is to be ignited by the gold master behind the three cores, and what Qin Yu did is just to fuel the flames.

Let the entire public opinion completely detonate, setting off a wave of investment frenzy.

As for the wealth wave caused by capital, whoever lives and dies depends on his own ability!

Foresight, layout in advance.

He also held the switch of the public opinion bomb in his hand, such a big killer.

If this is the case, people can press it...just suicide!

Waiting for the lazy cat to squint, wearing a custom-made chinchilla dress pajamas, dazedly, lying on Qin Yu's lap dangling.

Shrinking himself into a ball, he struggled his head and found a comfortable posture.

With a satisfied and happy smile, when I plan to come back to sleep.

Qin Yu has arranged the work properly, leaving the time for the two of them in the afternoon.

Snapped!

I took a picture on the back bridge of Lazy Cat, and after listening to it, Qin Yu didn't want to use it at all.

The confused lazy cat pouted, rubbed it with his hands, and muttered, "I'll sleep again, just a while."

"The sun has reached the big butt." Qin Yu joked.

"Where is it older, people are clearly well-proportioned." Mingming's head is not clear, and he doesn't forget to rectify his figure.

"It's almost noon. Didn't you make an appointment to have lunch at Teacher Shen's house?" Qin Yu was not teasing her.

If you say "I like big ones," the lazy cat will get tangled next.

Is he implying that I am too young and want to be bigger?

But this will affect the coordination, balance and control of the body.

It takes a long time to re-adapt, and then I have to participate in many competitions and performances.

But Qin Yu likes it. Will he be unhappy like this?

Would you be angry and think that self-dancing is more important than him He doesn't want to be himself, right?

The entanglement of the whole journey in his heart, Qin Yu made up for it in an instant.

Because she was worried about her body, she was initially dissatisfied with the dance.

Coupled with the guilt caused by not being able to accompany him by dancing, gathering less and more, various factors.

Lazy Cat has always felt that Qin Yu is opposed to her dancing.

Even in order to accommodate yourself and compromise, it is just not annoying!

Moreover, this girl's mind is particularly sensitive.

If someone else makes a joke, she may remember it and worry about it all the time.

Therefore, Brother Yu would not make such a joke.

He didn't want to see Lazy Cat next time, and he would see a skinny skeleton frame.

"Ah, what time is it?" Hearing the lunch appointment, Lazy Cat jumped up.

"This will be too late." Before Qin Yu finished speaking, Lazy Cat hurriedly walked to the room.

"It's too late, it's too late, make-up, change clothes, and buy gifts!" Lazy Cat muttered, his tone full of anxiety.

At this moment, the opposite door opened.

Jiang Xiaoshan, with a white T-shirt, jeans, dangled hair, and elegant makeup, walked out: "Can you go now?"

"..." The lazy cat suffocated his mouth, and moved a little faster.

I simply drew a plain outfit, changed to a comfortable casual outfit, and tied my hair behind my head.

A group of three went out to buy gifts.

Naturally, all kinds of supplements are indispensable. After that, I bought a few high-quality flower gums and packed them in bottles.

It is tied with a bow with a red ribbon, which is all from the heart of a lazy cat.

By the time the western-style building, the hour hand had passed 12 o'clock.

"Hurry up, hurry up..." With a gift in both hands, Lazy Cat ran into the house and shouted: "Xuan Xuan, Teacher Shen, I'm coming to see you..."
